The 'Columbia Giant', a 600-ton capacity shore-based crane located at the port, is one of the largest capacity lifting facilities on the West Coast. The twin booms of the derrick reach 130 ft. above the dock and have a tested lifting capacity of 660 tons. The blocks can be hoisted separately or in tandem. The lifting system is certified by Federal and State agencies and has passed safety requirements for heavy lifting of AEC controlled projects. The 'Columbia Giant' is available for single lifts ranging from 65 short tons up to its rated capacity of 600 short tons.

Also see "Berthing" – Berths No. 6 and 7.

STEVEDORES: At least 24 hours notice necessary to arrange gangs before ETA. Arrange through Port Office via Ship's Agent.
MEDICAL: Hospital facilities available.
TANKERS: No facilities.
DENSITY: Columbia River is fresh water at Longview.
FRESH WATER: Available through 8 in. line with 2.5 in. connections. Rate of delivery approx. 14.5 t.p.h.
FUEL: Available by tanker trucks only.
CONSULS: At Portland, Oregon.
REPAIRS: Some deck and minor engine repairs are possible at Longview.
GANGWAY/DECK WATCHMEN: Arrangements for security guards can be made.
OPENING/CLOSING HATCHES: Work carried out normally by stevedores.
CUSTOMS ALLOWANCES: See "Portland, Oregon".
REPATRIATION: No facilities for effecting crew changes or repatriations.
AIRPORT: Nearest airport served by regular airlines is in Portland. Charter flights may be arranged from a small local airport.
TIME: GMT minus 8 hours. In addition, clocks are moved ahead 1 hour on the first Sunday in April and returned back 1 hour on the last Sunday in October, at 0200 hrs. local time on those 2 days.
HOLIDAYS: New Year's Day (January 1st); Martin Luther King Jr.'s Birthday (3rd Monday in January); President's Day (3rd Monday in February); Memorial Day (last Monday in May); Independence Day (July 4th); Special Longshore Holiday (July 5th); Labour Day (first Monday in September); Veteran's Day (November 11th); Thanksgiving Day (fourth Thursday in November); Christmas Day (December 25th). Cargo work can be arranged on most of these holidays.
POLICE/FIRE/AMBULANCE: Police 911; Fire 911; Ambulance 911.
TELEPHONES: Available at dockside.
BANKS: Rainier National Bank and Seattle First National Bank.
STORING: See "Prelims".

SHIP SUPPLY SERVICE: The only firm currently engaged in the ferrying of personnel from ship to shore in the Columbia River in the Port Longview area is Brix Maritime Co. Their address is: Brix Maritime Co., 611 East "A" Street, Rainier, Oregon 97048, U.S.A. Tel: (206) 577-0487.
SHORE LEAVE: Crews allowed ashore if papers are in order.
IDENTIFICATION CARDS: Advisable but not necessary.
AUTHORITY: Port Longview, P.O.Box 1258, Longview, Washington 98632. *Tel:* (206) 425-3305. *Telex:* 289990. *FAX:* (206) 425-8650.
Contact: Ken O'Hollaren, Port Manager.

L.O.O.P. TERMINAL (Louisiana Offshore Oil Port), Louisiana: 28.53 N. 90.01 W. **(See Plan)**

OPERATOR:
Official Address: LOOP Inc., One Seine Court, Box 6638, New Orleans, Louisiana 70174-6638.
Requests for Port Information: LOOP Inc., One Seine Court, Box 6638, New Orleans, Louisiana 70174-6638. Attention: Vice-President, Operations.
TWX Address: LOOP Inc. (810) 950-5875 (LOOP MARTERM), (810) 951-5165 (LOOP Inc., Nola).
Telephone Number:
New Orleans Office (504) 368-5667. Contact: A.B. Cranstoun, Administrative Coordinator
Operations Centre (504) 632-6970
Marine Terminal (504) 632-6980
Radio Contact:
Call sign "KR – 7808".
Frequencies:
VHF-FM
U.S. Channel 10 156.500 MHz (Simplex only)
U.S. Channel 16 156.800 MHz (Simplex only)
U.S. Channel 74 156.725 MHz (Simplex only)
LOOP Personnel involved in Tanker Discharge:

(1) Port Superintendent: Resident at Marine Terminal who has overall authority over the Marine Terminal and port.
(2) Vessel Traffic Controller: Resident at marine terminal. Responsible for traffic control at the port.
(3) Mooring Master/Assistant Mooring Master: Assists the Master in mooring and unmooring the vessel. Remains on board to coordinate the discharge.
(4) Deck Watch: Maintains a 24 hour watch of tanker's manifold and bow while vessel is moored.
(5) Cargo Transfer Supervisor: Resident of Galliano Operations Centre. Supervisor of cargo discharge. In constant radio contact with the Mooring Master.

Time Zone: Local-Central Standard Time (CST). Greenwich Mean Time (GMT) minus 6 hours or Zone plus 6.
Note: From the first Sunday in April to the last Sunday in October, this is modified by use of Daylight Saving Time to minus 5 hours GMT or Zone plus 5.
Official Language: English.
U.S. Coast Guard: Telex: 701801 (USCG NLN-UD).

The LOOP Inc. deepwater port and associated facilities are designed for unloading crude oil cargoes from deep draft tankers. The marine terminal is located in open waters of the Gulf of Mexico approximately 29 km. (18 statute miles) offshore from the State of Louisiana.

The port is owned and operated by LOOP Inc. under licenses granted by the Government of the United States of America and the State of Louisiana. The port is governed by the laws of the United States in the same manner as if the port were an area of exclusive federal jurisdiction located within a state.

LOOP shall not permit a tanker registered in a foreign state or flying the flag of a foreign state to utilise its facilities unless the foreign state involved does not object to the jurisdiction of the United States over the tanker and its personnel while the tanker is located within the safety zone of the port, and unless the tanker owner or operator has designated an agent in the United States for receipt of service of process in the event of any claim or legal proceeding resulting from activities of the tanker or its personnel while located within the port safety zone, and unless the tanker owner carries insurance or demonstrates financial responsibility as required by Title 33, United States Code Annotated, Section 1517 and any amendment.

At the time of nomination of a tanker, LOOP shall require the person nominating the tanker, or his authorised agent nominating the tanker, to provide LOOP with the name and address of the tanker's designated agent in the United States.

The United States Coast Guard's Marine Safety Office, whose office is in Morgan City, La., has governmental authority over LOOP.

LOOP's Port Superintendent has overall authority over the marine terminal and port. This encompasses all personnel at the port, including contract personnel, and all vessel and aircraft operations at the port. During emergency conditions, all response activities at the port are directed by the Port Superintendent. This includes the shutdown of tanker cargo discharge. Emergency conditions are those that, in the Port Superintendent's judgment, involve or could involve safety, environmental protection, personnel injury or property damage. Examples of these emergencies include, but are not limited to, the following, if they occur at the marine terminal, or on a tanker, or other vessel or aircraft, or at any other location anywhere in that portion of the deepwater port that lies within the safety zone:

(a) Oil spill.
(b) Fire or explosion.
(c) Tanker collision, actual or potential, with another vessel or with the pumping platform complex.
(d) Tanker grounding.
(e) Electrical power failure on the platform.
(f) Disruption of communications between shore and the port.
(g) Aircraft disaster.
(h) Serious illness, injury or death.
(i) Presence of poisonous gas.
(j) Evacuation operation of the platform (usually due to impending hurricane).

The Port Superintendent is present at the port at all times when oil transfer operations are in progress.

ABBREVIATIONS:

AMM – Assistant Mooring Master
ANSI – American National Standards Institute
AST – Atlantic Standard Time (ZD + 4)
CFR – Code of (U.S.) Federal Regulations
CST – Central Standard Time (ZD + 6)
EST – Eastern Standard Time (ZD + 5)
FERC – Federal Energy Regulatory Commission
GCLW – Gulf Coast Low Water (Datum)
GPM – Gallons Per Minute
M – Thousands (used with barrels of oil)
MBPH – Thousands of barrels per hour
mi – Miles
MM – Mooring Master
n – Nautical (used with the word *miles*)
NOAA – National Oceanographic and Atmospheric Administration
OTS – Oil Transfer System
PLEM – Pipe-Line End Manifold (at the SPM)

PLATFORMS:

Pumping Platform Complex:

The Marine Terminal pumping platform complex consists of the pumping platform and the control platform. The two platforms are connected by a walkway bridge between the lower decks. The top of the lower deck of each platform is 21.3 m. (70 ft.) above MHW.

The pumping platform measures 61 m.×65.5 m. (200 ft.×215 ft.) and contains equipment for receiving, measuring, sampling, controlling and pumping oil to assist in cargo unloading.

The control platform contains a control room manned 24 hours a day for communications, traffic control, monitoring and surveillance purposes. Also, a supervisory control and monitoring system provides the capability for the control room personnel, when so directed, to assume control of all marine terminal processes otherwise normally initiated from the Operations Centre located near Galliano, Louisiana.

The control platform is a two-deck structure measuring approximately 21.3 m.×21.3 m. (70 ft.×70 ft.). The lower deck contains platform utility equipment and supporting facilities. The upper deck supports a two-level control building.

DOCUMENTS: See "New Orleans".

PILOTAGE: See "Tanker Arrival".

MAX. SIZE: See "Berthing".

TANKER ARRIVAL:

Arriving from Seaward: Tankers will normally approach LOOP via the 63 mile Safety Fairway. Communications with LOOP shall be established when the tanker is 20 miles from the entrance of the Safety Zone on the International Calling Frequency 156.800 MHz (Channel 16). The Vessel Traffic Controller will assign a working frequency, usually 156.725 MHz (Channel 74) and will pass instructions to the vessel. The arrival time for a tanker is recorded as the time and date the inbound tanker enters the Safety Zone.

Tankers *Proceeding Directly to a Mooring:*

(a) Weather permitting, the tanker should have on both sides, a pilot ladder 2.0 m. above the water and, when so instructed, an accommodation ladder properly prepared for use by the Mooring Master, Assistant Mooring Master, deck watch and oil inspectors. The tanker will be advised of what side the mooring and connecting equipment will be handled on, so that the appropriate derrick can be topped and rigged in preparation for lifting the equipment aboard and for handling the hose after mooring. The derrick block should be plumbed midway between the rail and the manifold at the manifold centreline. Tankers are asked to turn and make a lee in order to allow for a safer boarding and an easier equipment handling operation.

(b) The Mooring Master, Assistant Mooring Master, deck watch and oil inspectors will board the tanker, and the port furnished equipment is picked up by the tanker prior to entering the Safety Zone. The boarding area is usually at the North end of the Safety Fairway where it turns and joins the approach section at the Safety Zone. The entrance to the Safety Zone is marked at the lateral boundaries by Buoys No. 1 and 2. (Note: Also see "General" – "Helicopter Transfer of Personnel and Supplies" – Section (B) for times when Mooring Master boarding is done by helicopter).

(c) Equipment brought aboard the tanker for use in the mooring arrangement is transported to the tanker's bow by the tanker's personnel if it was not taken aboard at the bow. Supervised by the tanker's designated officer and advised by the Assistant Mooring Master, tanker personnel prepare and arrange the tanker's mooring equipment and fittings for the mooring operation to the satisfaction of the Assistant Mooring Master and tanker's Master.

(d) After the Mooring Master is aboard, the tanker may proceed under his guidance into the Safety Zone to the assigned berth for mooring. The shipper and tanker owner shall be responsible and liable to LOOP for any damage or injury done by his tanker to any LOOP facility, equipment or personnel. Services of the Mooring Master, Assistant Mooring Master, deck watch, mooring launches and their crews, and such other LOOP personnel as may be required aboard the tanker are provided with the express understanding that the Master of the tanker has and accepts the ultimate responsibility for the tanker and crew. If it becomes necessary for the Master of a tanker to disregard a Mooring Master's advice in order to ensure the safety of his ship, it is requested that a written report from the Master be submitted promptly to LOOP.

(e) Specific tanker speed will be recommended by the Mooring Master to the vessel, consistent with the International Rules for Navigation, Rule 6 – Safe Speed.

Tankers Proceeding Directly to LOOP's Anchorage (in Safety Zone):

(a) Tankers proceeding directly to LOOP's anchorage may proceed into the Safety Zone without a Mooring Master on board when the following conditions are met:
  (1) The tanker is proceeding directly to the designated anchorage section.
  (2) Entry is via the designated Safety Fairway through Buoys No. 1 and 2.
  (3) Clearance is obtained from the Vessel Traffic Controller.
  (4) No other tankers are underway in that portion of the Safety Zone that is South and East of Buoys No. 3 and 4.
  (5) No more than 4 tankers are anchored in the designated anchorage.

(b) Specific tanker speeds are to be consistent with the International Rules for Navigation, Rule 6 – Safety Speed.

(c) The shipper and tanker owner shall be responsible and liable to LOOP for any damage or injury done by his tanker to any LOOP facility, equipment or personnel.

Tankers Proceeding to Mooring from Anchor (in Safety Zone):

(a) The Vessel Traffic Controller advises the tanker of the arrival time of the Mooring Master, Assistant Mooring Master, deck watch and oil inspectors, and of the equipment to be made ready. Included is advice for preparation of an accommodation ladder and/or pilot ladder and equipment hoist. (Note: See "General" – "Helicopter Transfer of Personnel and Supplies" – Section (B) for times when Mooring Master boarding is done by helicopter).

(b) Upon receiving clearance from Vessel Traffic Controller, tanker may get underway without a Mooring Master on board for the purpose of making a lee only. The Mooring Master will then board the vessel and proceed to the bridge to pilot the vessel to berth.

(c) Equipment brought aboard the tanker for use in the mooring arrangement is transported to the tanker's bow by the tanker's personnel if not taken aboard at the bow. Supervised by the tanker's designated officer and advised by the Assistant Mooring Master, tanker personnel prepare and arrange the tanker's mooring equipment and fittings for the mooring operation to the satisfaction of the Assistant Mooring Master and tanker's Master.

(d) Specific tanker speed will be recommended by the Mooring Master to the vessel, consistent with the International Rules for Navigation, Rule 6 – Speed.

Tanker Proceeding to Mooring from Anchor (Outside of Safety Zone):

(a) The Vessel Traffic Controller advises the tanker of the arrival time of the Mooring Master, Assistant Mooring Master, deck watch and oil inspectors, and of equipment to be made ready. Included are instructions for preparation of an accommodation ladder and/or pilot ladder and equipment hoist. (Note: See "General" – "Helicopter Transfer of Personnel and Supplies" – Section (B) for times when Mooring Master boarding is done by helicopter). Tanker may raise anchor and get underway prior to Mooring Master's arrival, but under no circumstances shall the tanker enter the Safety Zone until the Mooring Master is on board.

(b) Equipment brought aboard the tanker for use in the mooring arrangement is transported to the tanker's bow by the tanker's personnel if not taken aboard at the bow. Supervised by the tanker's designated officer and advised by the Assistant Mooring Master, tanker personnel prepare and arrange the tanker's mooring equipment and fittings for the mooring operation to the satisfaction of the Assistant Mooring Master and tanker's Master.

(c) Specific tanker speeds will be recommended by the Mooring Master to the vessel consistent with the International Rules for Navigation, Rule 6 – Safe Speed.

Navigational Assistance: During the mooring operation the Mooring Master and the Assistant Mooring Master perform the following functions:

(a) The Mooring Master advises the tanker's Master on operational and ship control matters and regulations that are peculiar to the port, such as navigational aids, depth and current characteristics of the manoeuvring area during existing conditions, mooring equipment and procedures, and the port's vessel control procedures. The Mooring Master will maintain communications with the Vessel Traffic Controller, mooring launches and the Assistant Mooring Master until the mooring operation has been completed.

(b) The Assistant Mooring Master is stationed on the forecastle of the tanker during mooring operations to assist the Mooring Master by reporting position approach data relative to the SPM and to advise the tanker's personnel in the handling of mooring equipment peculiar to the port.

Vessel Routeing and Approach to Moor: Tankers must enter and depart the port via the Safety Zone between Buoys No. 1 and 2. *Tankers proceeding to moor must have anchors housed and windlass brakes must be checked for absolute tightness in order to prevent the anchors from being accidentally dropped, with resultant damage to submarine pipe-lines.*

Transiting the Approach Section and Anchorage Section: The Master of the tanker, a competent deck watch officer and a competent helmsman must be on the bridge at all times while the ship is manoeuvring in the approach section and anchorage. A competent deck officer is to be on the bow along with one seaman as lookout, who is capable on command of letting go the anchor, if necessary. A watch engineer and sufficient crew to operate the power plant shall be in the engine room.

Transiting the Terminal Section and Approach to Moor: The Master of the tanker, a competent deck watch officer and a competent helmsman must be on the bridge at all times while the tanker is transiting the terminal section of the Safety Zone and approaching an SPM to moor.

A competent deck officer is to be on the bow along with one seaman as lookout. Sufficient qualified engineers should be in the engine room to operate the plant properly and safely.

Anchor Watch: While the tanker is at anchor in the anchorage section of the Safety Zone, a competent deck officer shall be stationed at all times on the bridge to watch for any dragging of the anchor which can be detected by taking radar ranges or rounds of bearings as necessary on the pumping platform or on any other fixed object.

Manoeuvring Capabilities: LOOP SPM buoys are located on a radius of 2,438 m. (8,000 ft.) from the Marine Terminal Pumping Platform Complex, with spacing between buoys of 1,981.2 m. (6,500 ft.). Tankers must have the capability to perform the manoeuvring required to approach and depart from an SPM within an area not greater than 1,524 m. (5,000 ft.) radius from the buoy at speeds not exceeding 5.5 km./hr. (3 knots). LOOP may require evidence of a tanker's capability to approach and enter the safety zone. The Mooring Master may determine this by pre-berthing checks of a tanker's manoeuvring characteristics.

Berthing Order: When a buoy becomes available, the tanker with the earliest Firm Arrival Window will be berthed, provided that tanker has issued its Notice of Readiness to discharge. LOOP may adjust a tanker's position in the queue a maximum of one position when such adjustment is necessary for optimum operations of the LOOP system.

VESSEL REQUIREMENTS:

Navigation Equipment: Any vessel calling at LOOP must meet the U.S. Coast Guard navigational equipment requirements for a vessel entering U.S. waters; i.e. 33 CFR 164.35. Coast Guard personnel will board selected arriving vessels to ensure compliance with Federal Regulations.

Pre-arrival, Connection and Transfer:

Preparations, procedures, tests and inspections to be followed both by the tanker and by the LOOP platform during the pre-arrival time, connection and transfer must meet the requirements of 33 CFR 150(D), and the recommendations of the OCIMF Safety Guide.

The Mooring Master will have a LOOP Check List, which includes a Declaration of Inspection, that shows all the items to be tested or inspected in order to comply with the Federal Regulations and with current OCIMF recommendations. This Check List is to be signed both by the tanker's Master and by the Mooring Master.

Oil Transfer Equipment:

All tankers must meet the requirements of 33 CFR 155, with regard to oil transfer equipment. Cargo hoses must be connected by the tanker's personnel, under the guidance of the Mooring Master or the Assistant Mooring Master.

The Mooring Master will provide a remotely operated Emergency Shutdown Signalling Device to be kept in the Cargo Control Room. Activation of this alarm requires an immediate, rapid stopping of the pumping operation. The Mooring Master will explain the use of the Emergency Shutdown Signalling Device.

Physical Parameters of Vessel:

Tankers to be accepted by LOOP must:

(a) Have oil transfer equipment that conforms to the technical recommendations of the Oil Companies' International Marine Forum (OCIMF). (Any OCIMF recommendations that change after issuance of this manual are overriding to LOOP's requirements).

(b) Be equipped with shipboard mooring fittings installed and located for safe and effective mooring to an SPM.

(c) Be equipped with a derrick, located near the cargo manifold for hose handling, capable of lifting and sustaining a safe working load of 10 tons to a height of 13.7 m. (45 ft.) above deck level. (ULCCs should have a 15 ton crane because of the extra hose weight due to their greater freeboard).

(d) Not exceed maximum mooring load limitations of SPMs. See "Berthing".

(e) Have serviceable pumping equipment.

(f) Be capable of delivering a cargo size or quantity that is in accordance with LOOP's Terms and Conditions of Service.

Hull Condition: Hulls of tankers calling at LOOP shall be free of obstructions, (e.g. barnacles) which could cause damage to marine hoses, pollution, or injury to personnel.

Deck Floodlighting:

Illuminated Locations: In addition to the light usually displayed, tankers are required to furnish adequate additional lighting for night operations including:

(a) Proper safety lighting of the accommodation ladder for personnel embarkation and disembarkation. This is particularly essential for arriving and departing tankers when the Mooring Master and Assistant Mooring Master board or depart the tanker. A deck officer is required to supervise these procedures.

(b) Lighting of the forecastle area.

(c) Lighting of areas encompassing the derricks, deck and water during equipment and hose handling operations.

(d) Lighting to illuminate the cargo manifold.

(e) Proper safety lighting for any bunkering or transfer of supplies or equipment.

(f) Portable or hand-held safety lanterns for inspections and other deck activities that may require particular attention.

Type of Equipment: Only explosion-proof lighting equipment and electrical apparatus certified intrinsically safe for use in a hazardous area is permitted to be used on deck while a tanker is at an SPM. Portable electric lamps or other apparatus with flexible cable shall not be used without permission from the ship's officer-in-charge and from the Mooring Master/Assistant Mooring Master aboard the tanker. In this regard, the recommendations of ISGOTT paragraph 2.4.2 should be followed.

Accommodation: Tankers discharging at LOOP must provide meals and accommodation for the Mooring Master, the Assistant Mooring Master and deck watch, during their time on board and for an independent Petroleum Inspector during his required time on board. In addition to these persons there is at times a United States Coast Guard Inspector who also may need accommodation.

Vessel Readiness:

Equipment/Personnel: Vessels at moorings or anchorage must maintain engines and propulsion machinery in readiness to clear the Marine Terminal area under full power on short notice. No repairs are permitted which would interfere with this requirement. Vessel trim and draft should also be considered in determining vessel manoeuvring capability. Masters of tankers are advised to have sufficient personnel aboard to enable them to depart upon advice from the Vessel Traffic Controller. The Master of a tanker may, in an emergency, for the protection of life or property, depart without clearance from the Vessel Traffic Controller, if the Master advises the Vessel Traffic Controller of the circumstances by radio at the earliest moment.

Minimum Ballast: The Master is to maintain his vessel in a seaworthy condition and be ready to sail and manoeuvre at all times. This port is in the open sea and *is not in a Harbour*. Weather can change rapidly as mentioned in section on weather. The Master is to maintain his vessel with sufficient ballast to obtain full immersion of the propeller at all times while maintaining a reasonable stern trim. These additional factors must be considered by the Master in maintaining the seaworthy condition and readiness to sail and manoeuvre.

A 10 minute or less ready standby requirement for engines and anchors will be invoked in the event of rough weather. The Port Superintendent will invoke the rough weather advisory.

NAVIGATION AIDS:

SPM Buoys: In addition to the port name "LOOP" and an SPM number each SPM buoy is painted white on top with yellow sides and is equipped with the following navigational aids:

(a) A quick flashing (0.3 seconds "on", 0.7 seconds "off") white light installed on the buoy at a height of 5.5 m. (18 ft.). The light can normally be seen through 360° of arc at a range of 7.4 km. (4 nautical miles). It is actuated by a solar photo-electric switch.

(b) A 406.4 mm. (16 in.) diameter all-directional radar reflector mounted on the highest point of the buoy.

(c) Buoy number daymarks at 90° intervals around the buoy hull.

Platform Complex Beacon Light: A rotating beacon which shows a flashing white light (6 flashes per minute) is mounted above the pumping platform atop the communications tower at an elevation of 64 m. (210 ft.) above MHW and it is visible all around the horizon. It is actuated from the control platform. The light is 47,000 candela and is visible for at least 18 miles.

Platform Complex Obstruction Lights: Obstruction lights are installed at each corner of both platforms and one on the bridge connecting the structures. The lights on the pumping platform are 25 m. (82 ft.) above MHW and on the control platform are 23 m. (76 ft.) above MHW. They are quick flashing white (0.3 seconds "on", 0.7 seconds "off") (60 flashes per minute). They flash in unison and are placed so that at least one light can be seen for a minimum of 5 nautical miles from any approach angle to the platform complex. They are actuated from the Control Platform at night and in periods of low visibility.

Platform Complex Fog Signals: 2 fog horns are installed at the platform complex. One is hung below the lower deck near the middle of the Northwest edge of the pumping platform about 21.3 m. (70 ft.) above MHW, and the other is hung below the lower deck on the Southern edge of the control platform. The signals are synchronized to sound a 65 800 Hz 2 second blast every 20 seconds and can be heard for at least 3.7 km. (2.0 nautical miles). They are actuated from the control platform

Buoys: The following table lists the characteristics of the buoys marking the approach section of the safety zone:

Buoy Daymark	Buoy Colour	Water Depth Metres	Water Depth Feet	Lantern Colour	Radar Reflector	Fog Signal
No. 1	Green	47.5	156	Green	X	X
No. 2	Red	46.3	152	Red	X	None
No. 3	Green	37.5	123	Green	X	None
No. 4	Red	36.9	121	Red	X	None

From seaward, Buoys No. 1 and 3 define the port (left) lateral limits of the approach section and Buoys No. 2 and 4 the starboard (right) lateral boundary. Buoys No. 1 and 2 are located at the entry to the approach section when proceeding from seaward.

Safety Zone Boundary Marker Buoys: The Safety Zone is shown in "Plan Section" together with the location of floating aids to navigation and marine terminal components. International "Rules of the Road" apply in the safety zone. The purpose of a deepwater port safety zone s to define an area in which any activity that may directly or indirectly ncrease the environmental and safety risks associated with port operation may be minimised or prohibited. The Inter-Governmental Maritime Organization (IMO) vessel routing measure known as a precautionary area; i.e. a routing measure comprising an area within definite limits where ships must navigate with particular caution and within which the direction of traffic flow may be recommended, has been adopted as the concept for U.S. deepwater port safety zones. The safety zone is made up of 3 parts; the approach section, the anchorage section, and the terminal section. Inside the terminal section there are 4 "areas to be avoided"; one is 600 m. in radius around the pumping platform complex and 3 are 500 m. in radius around each of the SPMs. "Areas to be avoided" conform to IMO measures to keep ships or certain classes of ships outside a delineated area. 4 navigational marker buoys define the boundaries of the approach section of the safety zone. Proceeding from seaward, the 3.7 km. (2.0 nautical miles) wide approach section extends 9.3 km. (5 nautical miles) from the Safety Fairway to the terminal section. The buoys have the following characteristics:

Daymarks:	Reflective, located at 90° intervals around buoy superstructures; visible range 3.7 km. (2 nautical miles) minimum.
Lights:	Installed at 4.6 m. (15 ft.) above the water; slow flashing (0.6 seconds "on", 5.4 seconds "off"); light intensity 75 candela, actuated by solar photoelectric switches.
Radar Reflectors:	All-directional; detectable from at least 15 km. (8.0 nautical miles) by typical shipboard radar systems.
Fog Signal:	(Buoy No. 1 only) minimum audible range approximately 1 km. (0.5 nautical miles); programmed to send Morse code "L" at 20 second intervals. This buoy's fog signal operates continuously.

Safety Fairway: The LOOP Safety Fairway, shown in NAV 3A, "Plan Section", has no marker buoys. To lessen the chance of accidents, ships enter and leave U.S. Gulf Coast ports via safety fairways. The fairways are 2 miles wide. No offshore drilling rigs or structures are permitted in them. LOOP recommends that tankers enter or leave the LOOP Safety Fairway at its Southernmost point or at least South of 28° 18′ N. NOAA Chart 11359 has details of the LOOP Deepwater Port including pipe-lines within the safety fairway and safety zone.

Service Vessel Mooring Buoys: The 2 buoys provided for mooring port service vessels at the marine terminal are white with a horizontal blue band between the top of each buoy and the waterline. The buoy dentification is reflective. Battery powered, slow flashing (0.4 seconds "on", 3.6 seconds "off") white lights are installed 2.4 m. (8 ft.) above the water, and are actuated by solar photoelectric switches.

Also see "Anchorage".

ANCHORAGE: *Anchorage Section Marker Buoys:*

The designated anchorage section of the safety zone is a 3.7 km. (2.0 nautical miles) wide area beginning at safety zone Buoy No. 2 and extending 7.4 km. (4.0 nautical miles) along and next to the Eastward boundary of the safety zone. Buoys "L-B" and "L-A" mark the corners and define the outer boundaries of the anchorage section. The anchorage section buoys have characteristics as follows:

Daymarks:	Reflective, located at 90° intervals around buoy superstructures; visible range 3.7 km. (2.0 nautical miles) minimum.
Lights:	Installed at 4 m. (13 ft.) above the water; slow flashing (0.6 seconds "on", 5.4 seconds "off"), actuated by solar photoelectric switches.
Radar Reflectors:	All-directional; detectable at 15 km. (8.0 nautical miles) by typical shipboard radar systems.

Buoy Daymark	Buoy Colour	Water Depth Metres	Water Depth Feet	Lantern Colour	Radar Reflector	Fog Signal
L-B	White	45.7	150	White	X	None
L-A	White	37.1	122	White	X	None

Also see "Tanker Arrival".

RADIO/VHF: *Notices of Arrival:*

The Master of a tanker bound for LOOP should send his first arrival advice message as nearly as possible to 7 days before his expected date of arrival, even if he is in port at the time. If his trip to LOOP is less than 7 days he should also send another arrival advice as soon as possible after leaving his loading port. His next arrival advice should be sent 72 hours before the estimated time of arrival. The arrival advice should be transmitted and updated again at 48 hours and again not later than 24 hours before the estimated time of arrival. An arrival advice message can and should be sent at any time when there is a significant change in a previously estimated arrival time. These arrival advice messages should be sent to LOOP INC. The first message should contain, at a minimum, the following:

1. Tanker's name and call sign.
2. Estimated time of arrival at LOOP.
3. Draft fore and aft.
4. Type(s) and amount(s) of cargo on board.
5. Basic discharge plan, times and pumping rates.
6. Cargo manifold size and type, if 16 in. not available.
7. Type of mooring equipment installed.
8. Expected discharge rate.
9. Expected number of ballast hours upon completion.
10. Any special requirements which need early actions.

These messages can be sent by Western Union International TWX (810) 950-5875, LOOP MARTERM or by radio to coast stations WNU Slidell, WLO Mobile or WPA Port Arthur. It is suggested that ETA advice also be sent to tanker's Agents, with logistics requirements.

Pre-Arrival Instructions: A message will be sent to LOOP-bound tankers approximately 72 hours prior to their arrival, outlining arrival procedures and discharge planning recommendations. See "Pre-Arrival Message" below.

LOOP's Pre-Arrival Message:

To Master:

(a) Mooring Master Station is 28° 47′ N., 89° 53′ W. Recommend approach via existing safety fairways. If anchoring on arrival, you may enter the LOOP Anchorage without a Mooring Master, if cleared by the port.

(b) LOOP Terminal call sign is "LOOP Radar" and guards Channel 16, VHF-FM.

(c) Advise "LOOP Radar" when 20 nautical miles from Pilot Station.

(d) LOOP's marine facility includes pipeline and pumping systems to receive crude oil from the tanker and pump the crude to the Clovelly Dome Storage Area 46 miles away. Since the terminal has no crude storage tanks, efficient discharge at LOOP requires a discharge plan different from those used when discharging to terminals with storage tanks.

For efficient discharge at LOOP, it is important that during the bulk of the discharge, the vessel pumps at it's maximum rate, further, the rate should be maintained as constant as possible.

Reductions in the discharge rate for Crude Oil Washing (COW) or stripping should be avoided. COW and stripping can most efficiently be handled at prearranged periods, when the vessel is not pumping ashore at the end of the bulk of the discharge.

You are requested to plan your discharge accordingly, subject to safety considerations prevailing at all times. Be further advised that the Master is to maintain his vessel in a seaworthy condition and ready to sail at all times, even if this requires early COW of dirty ballast tanks to allow for ballasting.

Please advise LOOP of your basic discharge plan including pumping times, rates, any planned shutdown for stripping and Crude Oil Washing and the percentage of crude oil tanks to be Crude Oil Washed.

Upon arrival, the vessel's Master should submit a fully detailed discharge plan to the Mooring Master for review.

Signed: Port Superintendent.

24 Hour Message: By regulation, the 24 hour arrival message shall be addressed both to the Coast Guard Captain of the Port, Morgan City (Telex 701801 USCG NLN-UD) and to LOOP INC. This message should contain the following:

1. Name, gross tonnage, and draft of the tanker.
2. Type and amounts of cargo on board.
3. Any condition on the tanker that may impair its navigation, such as fire, malfunctioning propulsion machinery or steering equipment, or limitations on navigational or radiotelephone capabilities because of equipment or material malfunctions. (No vessel will be allowed to be underway in the Safety Zone with any significant steering or propulsion equipment deficiency).
4. Any leaks, structual damage, or machinery malfunctions that may impair cargo transfer operations or cause a discharge of oil.
5. ETA at the Safety Zone. If the information reported changes at any time before entering the Safety Zone, or while the tanker is in the Safety Zone, the Master of the tanker shall report the changes to the Coast Guard Captain of the Port and to LOOP INC. as soon as possible, by cable and single side band.

Radio Frequencies for Berthing: In addition to the above notices, radio communication on the International VHF Maritime Band (Channel 74, 156.725 MHz.) should be started at a distance of 20 nautical miles from the safety zone, or more, if possible. This Channel should be used for a "twenty-mile", final arrival notice, and for communications with the terminal and with the Mooring Master, until he boards the tanker.

Radio Communications at the Port: The LOOP platform always guards the international calling frequency 156.800 MHz. (Channel 16). LOOP's working frequencies are VHF Maritime Channel 74 (Primary), and Channel 10 (Secondary). Use of shipboard radar and HF radio is forbidden while moored to an SPM. While in port, LOOP communicates with the tankers via the Mooring Master's UHF portable radio.

LOOP's Communications Facilities: LOOP has the ability to use the following communications for vessels trying to contact the Port:

Type of Communications	*Frequencies*	*Call Sign*
VHF-FM Maritime Mobile	(Carrier assigned in MHz) 156.500, Channel 10, Commercial Working.	KR-7808
	156.800, Channel 16, Distress, Safety and Calling.	
	156.725, Channel 74, Port Operations.	

Transit Traffic: LOOP maintains a VHF Maritime radio system capable of communicating with vessels other than tankers or LOOP support vessels if such vessels are equipped with comparable equipment. When necessary to communicate with vessels of unknown communications capabilities, the Vessel Traffic Controller will attempt to contact such vessel on VHF Channel 16. If such efforts at radio communication are unsuccessful, a LOOP mooring launch or personnel boat will be dispatched to advise the vessel of any potential danger to the vessel as observed by the Vessel Traffic Controller's surveillance and also to advise the vessel operator of the port's precautionary areas and areas to be avoided.

When requested by a Master of a vessel other than a LOOP support vessel or tanker, the Vessel Traffic Controller shall furnish information concerning tankers, support vessels, and other vessels underway or moored in the safety zone.

Weather Advisory System: Coast Guard radio stations make two types of marine information broadcasts: radiotelephone (voice) for all seagoing users, and radiotelegraph (CW) for vessels carrying trained radio operators. Scheduled radiotelephone broadcasts include routine weather reports, small craft warnings, storm warnings, navigational information and other advisories on working frequencies, following a preliminary call on the voice international distress and calling frequencies. Urgency and safety broadcasts are made upon receipt of the information, urgency information is repeated 15 minutes later, and both are included in the next scheduled broadcast unless cancelled before that time. Additional broadcasts may be made at the discretion of the originator. Urgency broadcasts are preceded by the signal: "PAN" for radiotelephone and "XXX" for radiotelegraph. Both the urgency signal and message are transmitted on 2182 kHz and 156.80 MHz (Channel 16). Safety broadcasts are preceded by the signal: "SECURITE" for radiotelephone and "TTT" for radiotelegraph. After a preliminary call on 2182 kHz, or 156.80 MHz, the station shifts to its assigned working frequency for the broadcast.

The following Coast Guard Radio stations in the Gulf of Mexico area and its approaches make urgency, safety and scheduled marine information broadcasts preceded by a preliminary call on 2182 kHz or 156.8 MHz, at the times and on the working frequencies indicated:

Station	*Working Frequency*	*Time(s)*
NCF, Miami Beach, Florida	2670 kHz.	0400, 0600, 0800, 1050, 1300, 1900 and 2250 EST
	157.10 MHz (Channel 22)	0630, 1200 and 1730 EST
NOK, Key West, Florida	157.10 MHz (Channel 22)	0600, 1200 and 1700 EST
NMA-21, St. Petersburg, Florida	2670 kHz	0920 and 2320 EST
	157.10 MHz (Channel 22)	0650, 1250 and 1750 EST
NMG, New Orleans, Louisiana	2670 kHz	0435, 0635, 1035, 1150, 1635 and 2350 CST
	157.10 MHz (Channel 22)	0450, 1050 and 1650 CST
NMG-15, Grand Isle, Louisiana	157.10 MHz (Channel 22)	0435, 1035 and 1635 CST
NOY, Galveston, Texas	2670 kHz	0450, 0650, 1050 and 1650 CST
NOY-3, Port Aransas, Texas	157.10 MHz (Channel 22)	0440, 1045 and 1645 CST
NCH, Port Isabel, Texas	2670 kHz	0440, 0640, 1040 and 1640 CST
	157.10 MHz (Channel 22)	0435, 1035 and 1635 CST
NMR, San Juan, Puerto Rico	2670 kHz	1100 and 2300 AST
	157.10 MHz (Channel 22)	0710, 1310 and 1810 AST

Scheduled radiotelegraph broadcasts include routine weather reports, small craft warnings, storm warnings, navigational information and other advisories on working frequencies following a preliminary call on the radiotelegraph international distress and calling frequency 500 kHz. Urgent and safety broadcasts are made as follows:

(a) Safety broadcasts are made upon receipt of the information; urgent broadcasts are also made upon receipt of the information except within 10 minutes of the next silent period.

(b) Safety and urgent messages are made during the last 15 seconds of the first silent period after receipt, and are repeated at the end of the first silent period which occurs during the working hours of one-operator ships, unless the warning has been cancelled or superseded by a later warning message. Urgent broadcasts are preceded by the signal "XXX". Both the urgent signal and the message are transmitted on 500 kHz. Safety broadcasts are preceded by the signal "TTT". After the preliminary call on 500 kHz, the station shifts to its assigned working frequency to transmit the broadcast. The following Coast Guard radio stations in the Gulf of Mexico area and its approaches make urgent, safety and scheduled marine information broadcasts preceded by a preliminary call on 500 kHz, at the times and on the working frequencies indicated:

Station	*Working Frequency*	*Time(s)*
NMA, Miami, Florida	440 kHz	1100 and 2000 EST
NMG, New Orleans, Louisiana	428 kHz	1120 and 1830 CST
NMR, San Juan, Puerto Rico	466 kHz	1220 and 2120 AST

LOOP also has weather and sea monitoring equipment installed at the Marine Terminal and receives private and government weather advisories. Upon request, weather information will be transmitted to tankers in the vicinity.

In addition, NOAA gives continuous weather information, forecasts and warnings on the following frequencies:

WX1 162.500 MHz WX2 162.400 MHz.

Weather facsimile information is available via WLO, Mobile on the following frequencies:

6852.0 kHz.
9157.5 kHz.

RADAR: *Navigation Advisory System (Surveillance Radar):* 2 radar surveillance systems, X-band and S-band frequencies, are installed at the marine terminal. The systems provide coverage from the platform complex to a range of about 50 km. (27 nautical miles) for tankers, and include, among other things, a collision avoidance system. After an incoming tanker makes radio contact on the VHF system about 20 miles from the safety zone, the Vessel Traffic Controller will advise of the location of navigational hazards as well as relative positions and estimated courses and speeds of other vessels within radar range of the platform.

Radar Beacon: The LOOP radar beacon (RACON) operates 24 hours daily on the X-band frequency from 9300 to 9500 MHz. The transponder is mounted on top of the communications tower 64 m. (210 ft.) above MHW. The RACON will respond to incoming signals by transmitting Morse coded letter "O" as the identifying signal for the marine terminal platform complex. The RACON has a range of about 40 km. to 48 km. (22 nautical miles to 26 nautical miles), depending on the height of shipboard radar antennas.

TUGS: Support Vessels: *List of Characteristics by Vessel Name:* The following 2 launches are operated by LOOP for the primary purpose of assisting in mooring operations:

Names: "Loop Line" and Loop Loader".
Length overall: 26 m. (85 ft.).
Beam: 7.9 m. (26 ft.).
Draft: 2.1 m. (7 ft.).
Propulsion: 2 model 16V-92 GM diesel engines, twin screw, 1,200 h.p. total.
Maximum speed: 10 knots.
Bollard pull: 3,629 Kg. (8,000 lb.) line pull.
Navigation and Communications: Sitex 48 mile radar, digital fathometer, Loran C, SSB and VHF radios (Channel 10, 16 and 74) plus an 8 Channel LOOP UHF radio.
Construction material: Steel.
Fuel Capacity: 75,708 litres (20,000 gallons).

The LOOP maintenance vessel functions primarily for inspection, servicing, and maintenance of marine terminal components.

Name: "Loop Lifter".
Length overall: 61 m. (200 ft.).Beam: 15.2 m. (50 ft.).
Draft: 3.7 m. (12 ft.).
Propulsion: 2 D-399 Caterpillar engines, twin screw, 3,000 h.p. total.
Maximum speed: 11 knots.
Navigation and communication: Auto pilot, Sitex 48 mile radar, fathometer, Loran C, SSB and VHF radios (Channels 10, 16, and 74), plus an 8-Channel LOOP UHF radio.
Construction material: Steel.
Fuel Capacity: 80,000 gallons.
Fire pump: 9,475 litres per minute (2,500 GPM).

LOOP also employs a crew boat for transporting LOOP personnel between the small boat harbour and the marine terminal.

BERTHING: LOOP single point moorings (SPM) are the single anchor leg mooring (SALM) type, designed for tankers up to 700,000 d.w.t.

The SPMs are numbered clockwise and are described as follows:

SPM 102:

Water Depth	35.1 m. (115 ft.)
Maximum Tanker Draft*	28.7 m. (94.3 ft.)
Maximum Tanker Length	427 m. (1,400 ft.)
Minimum Tanker Length	230 m. (755 ft.)
Maximum Mooring Load	650 tons
Tail/Rail Hose Diameter	406 mm. (16 in.)
Maximum Discharge Rate	15,900 cu.m./h. (100 MBPH)

SPM 103:

Water Depth	35.7 m. (117 ft.)
Maximum Tanker Draft*	29.4 m. (96.3 ft.)
Maximum Tanker Length	427 m. (1,400 ft.)
Minimum Tanker Length	230 m. (755 ft.)
Maximum Mooring Load	650 tons
Tail/Rail Hose Size	406 mm. (16 in.)
Maximum Discharge Rate	15,900 cu.m./h. (100 MBPH)

SPM 104:

Water Depth	35.1 m. (115 ft.)
Maximum Tanker Draft*	28.7 m. (94.3 ft.)
Maximum Tanker Length	427 m. (1,400 ft.)
Minimum Tanker Length	230 m. (755 ft.)
Maximum Mooring Load	650 tons
Tail/Rail Hose Diameter	406 mm. (16 in.)
Maximum Discharge Rate	15,900 cu.m./h. (100 MBPH)

*The maximum drafts shown here allow for a gross underkeel clearance of 6 m. (19.7 ft.) during Gulf coast LW and calm seas. The maximum drafts result in a clearance of 2.9 m. (9.4 ft.) above the SPM base U-joints, since the U-joints are 3.4 m. (11.3 ft.) above the ocean bottom. Gross underkeel clearance means the distance between the keel of a tanker and the ocean bottom when the tanker is moored in calm seas. Net underkeel clearance means the distance between the ocean bottom and the keel of a tanker that is anchored, considering ship motion in response to wind, wave, tide and current conditions. It is required that there be a net underkeel clearance of 4.7 m. (15.3 ft.) during bad weather.

The limiting drafts at various significant wave heights that will result in a 4.7 m. (15.3 ft.) underkeel clearance during bad weather, when a tanker may be pitching or rolling, are shown on graphs in the Plan Section.

Note: Significant wave height is the average height of the highest one-third of all waves passing a point in a given period of time.

MOORING:

Mooring Equipment: In accordance with OCIMF recommendations LOOP will provide, in addition to the mooring hawser assemblies, the supporting equipment needed to connect the mooring lines to the tanker. Such equipment includes snotters, shackles, and devices for holding the mooring while connection is made. This equipment will include such items as special mooring gear and a hawser load monitoring device to be used at the bow, gaskets, bolts, tools, elbows, and adapter spool pieces (when required). Mooring equipment and other associated gear supplied by LOOP is lifted aboard the tanker from the mooring launch which transports the Mooring Master and Assistant Mooring Master. *Prior to arrival the ship should notify LOOP of the type of mooring equipment installed on the ship's bow in order for required port-furnished equipment to be readied to be put aboard the tanker.*

As recommended by OCIMF, the shipowner, depending on tanker mooring equipment, should supply as a means of securing the mooring chafe chain:

(a) (Preferred) bow chain stoppers, designed to accept the 76.2 mm. (3 in.) section of the chafe chain; or
(b) Smit type brackets built to specified dimensions; or
(c) Mooring bitts, suitably positioned and of adequate strength; and
(d) Bow fairleads spaced near the tanker's bow and capable of accepting 2×76.2 mm. (3 in.) chafe chains with a triangular plate 356 mm. (14 in.) wide;
(e) Pedestal roller fairleads and winch drums or capstans to provide proper leads and clearances (drum end of anchor windlass is acceptable). Tankers are requested to remove the blank flanges from their discharge manifolds before mooring so as to expedite the connecting of the floating hoses.

Mooring Hawser System: Before a tanker is accepted for offloading, LOOP may require information necessary to determine whether the mooring equipment installed on the tanker is capable of sustaining the safe working load that will be imposed on it when the tanker is moored at a LOOP SPM. It is recommended that tankers calling at LOOP be fitted with properly installed and positioned bow chain stoppers and bow fairleads for mooring at SPMs. Other arrangements are acceptable when evidence is provided that such arrangements will not be below the required safe working load for the tanker. The exact arrangement will be determined by the Assistant Mooring Master after inspection of ship's fittings and equipment. *Mooring and unmooring is to be done by the crew of the tanker with the advice of the Assistant Mooring Master.*

Two launches will normally assist in mooring. One launch will tend the hawser systems. Successively for each of the two hawser systems, the launch personnel will secure the tanker's messenger line to a pick-up line in order for the hawser system chafing chains to be winched aboard the tanker and secured to the shipboard mooring fittings. All tankers are required to utilise the two hawser systems to moor to the buoy. The second launch tends the floating hose strings during the tanker mooring, drawing the hoses aside from the tanker's track during the approach and mooring. LOOP has no tugs to assist in mooring.

Hawser Monitoring: Each SPM is provided with a hawser load monitoring system, with strain gauges mounted in pins in mooring couplers on the mooring buoy. Also see "Tanker Arrival".

HOSES: *Floating Hoses:* The floating hoses, which extend approximately 1,100 ft. from each buoy, consist of 2×24 in. crude oil discharge hoses with 16 in. inside-diameter tails, each with 150 ANSI flanges for connection to the tanker's manifold. Each hose-string has a pick-up buoy at its end, along with a pick-up sling. In order to avoid delays in connecting hoses, tankers should have an adequate number of reducing spools to fit 16 in. standard ANSI flanges. *Connecting and disconnecting of the cargo hoses is to be performed by the crew of the tanker under the advice of the Assistant Mooring Master.*

Hose Handling: Mooring launches tow each floating hose into position beneath the tanker's lifting derrick. The derrick runner is lowered to the launch and secured to the hose pick-up wire. After the hose is lifted above the level of the tanker's rail, it is swung inboard. A snubber chain connected between the first and second hose-lengths are then used to control its angle; i.e., to guide it towards its proper place on the cargo manifold. When the hose has been raised enough to span the distance between the tanker's rail and the cargo manifold, the snubbers can be made fast. The hose end is then lowered to the manifold and connected to it. Upon completion of discharge, each hose is disconnected from the manifold after its weight is borne up by the derrick runner. It is then swung outboard, lowered to the water, and released.

Care in Raising and Lowering the Hose: Care is necessary in raising the hoses before discharge and particularly in lowering them after discharge. At these times they are especially vulnerable to kinking.

Damaging Configurations for the Hose: While the cargo transfer hose is connected to the tanker, certain positions that the tanker might take relative to the SPM could cause the hose to bend excessively and thus could damage it.

For example, if a tanker overrides the buoy, it could damage both the hose and the buoy. This condition can be corrected by the tanker's going astern or being pulled astern.

Another damaging position could happen if the SPM seabed swivel does not turn as the tanker swings around it. In such a case the Mooring Master will seek LOOP's assistance. If this situation is not immediately resolved, the Port Superintendent or the Mooring Master should issue the order to stop pumping cargo.

Also see "Tanker Arrival".

CARGO OPERATIONS: *Tanker Discharge Planning:* Ship's officers should be aware of LOOP's requirements prior to preparing their pre-arrival discharge sequence planning. Consistent with maintaining vessel seaworthiness and readiness to sail and manoeuvre, LOOP encourages the highest possible bulk discharge rate followed by a stoppage for consolidation of strippings and Crude Oil Washing (COW). This runs counter to conventional tanker practice of always keeping some flow going ashore but is necessary at LOOP in order to maximise pipeline utilisation. While stopped for stripping and/or COW, another ship will normally be pumping at a high rate.

Discharge Operation: The discharge operation will be controlled and personally supervised by a ship's officer, to the satisfaction of the Mooring Master or the Assistant Mooring Master. Upon being informed by the ship's officer on watch that the tanker is ready to begin discharging, the Mooring Master will request the discharge operation to proceed according to a previously agreed upon plan regarding start-up rates and maximum discharge rates. *In the event of any emergency, either on board the tanker or on the operating platform, or anywhere in the LOOP system, all oil transfer must be stopped and all oil transfer valves closed.*

These emergencies are:

(a) Fire or explosion of a tanker, on the platform, or anywhere on the LOOP system.
(b) Loss of power or steering on a tanker underway in the safety zone.
(c) Breakage of a hawser.
(d) Rupture of a floating hose.
(e) Any confirmed pipe-line rupture in the LOOP system.
(f) Power failure at any LOOP pipe-line facility.
(g) Severe electrical storm in the area of the port. (Ballast receipt must also be stopped during such electrical storms.)
(h) Failure of the UHF radio communication system.

In the event of failure of the UHF radio communication system, the tanker will sound 5 long blasts on her whistle. Cargo discharge is then stopped until communications are re-established.

Oil Transfer Watch: One crew member will be stationed at the bow and an additional crew member stationed at the cargo manifold area. A licensed officer and pumpman will be based in the cargo control room, with the pumpman moving onto the deck as necessary. During the cargo transfer, the watch organisation must provide the capability to shut down pumping on short notice and to stay in constant communication with the Mooring Master and LOOP personnel at the Marine Terminal and the Galliano Operations Centre. Communications for cargo handling will be directly with the Mooring Master through the LOOP UHF portable radio system. (NOTE: Each Tanker shall have an officer who is fluent in English on duty at all times.).

Crude Oil Washing (COW): Crude Oil Washing of cargo tanks is allowed after LOOP is assured that the operation will be done safely. In order for Crude Oil Washing to be undertaken, the tanker and the tanker's personnel must satisfy the following requirements:

(a) Strict compliance with USCG Regulations 33 CFR 157. A copy of this regulation must be aboard the tanker and readily available to key shipboard personnel.
(b) Strict adherence to ISGOTT Recommendations for Crude Oil Washing are required. A copy must be aboard the tanker and readily available to key shipboard personnel.
(c) Notwithstanding the above regulations and guidelines, no COW will be permitted until the Mooring Master is satisfied that:
    1. All cargo tanks have discharged at least 1 m. of cargo depth in order to eliminate any water that may have accumulated on the bottoms of cargo tanks.
    2. The Chief Officer or the person in charge of the COW operation has participated at least twice in Crude Oil Wash operations aboard a tanker similarly equipped.
    3. There is a sufficient number of adequately trained personnel onboard to assist in the dual operations of transferring cargo and crude oil washing, in order to ensure that:
        (i) Gun nozzles are rotating in proper sequence.
        (ii) Enough source product remains in the tank supplying the cleaning oil.
        (iii) The on-deck piping system carrying the cleaning oil is continuously watched.

Note: Consideration should be given to washing dirty ballast tanks as soon as is practical to allow for ballasting, should the weather condition deteriorate.

Departure Readiness: Vessels at moorings or anchorage must maintain engines and propulsion machinery in readiness to clear the marine terminal area under full power on short notice. During discharge sufficient ballast condition must be maintained, to insure that the vesssel's propeller is immersed at all times. No repairs are permitted which would interfere with this requirement. Masters of tankers are advised to have sufficient personnel aboard to enable them to depart upon advice from the Vessel Traffic Controller. The Master of a tanker may, in an emergency, for the protection of life or property, depart without clearance from the Vessel Traffic Controller if the Master advises the Vessel Traffic Controller of the circumstances, by radio, at the earliest possible moment.

DEPARTURE: *Normal Departure Procedure:* Upon completion of the cargo discharge, the tanker's Master or Chief Officer and the Mooring Master together estimate the time needed to prepare the tanker for departure. This time will be given to the Vessel Traffic Controller on the control platform, so that clearance for departure can be planned and so that a mooring launch can be summoned to assist the tanker in the operations of unmooring.

When the tanker is ready to leave the SPM, the Assistant Mooring Master on the bow recommends the use of the tanker's engines in order to ease the load on the mooring lines. When the load is eased enough, the tanker's crew can then disengage the mooring hawser and lower the mooring lines to the water.

Departure time is the time when the last mooring line is cast off. After the tanker is unmoored, she manoeuvres to go clear of the SPM buoy and to take a course for departure through the safety fairway.

Departure from the SPM to the disembarking point of the Mooring Master is done under the Mooring Master's guidance and the Vessel Traffic Controller's surveillance.

Emergency Departure Procedures: An emergency departure can be initiated either from the control platform or from the tanker. If initiated from the platform, the Mooring Master is so notified. The tanker's engines must then be made ready for immediate service, and if cargo is being discharged, the tanker's pumps must be shutdown in accordance with the seriousness of the emergency. *If an abrupt shutdown of the platform's booster pumps is necessary, it is essential that the tanker's pumps either be immediately shutdown or else immediately shifted to a recirculation mode.* In accordance with the nature of the emergency, cargo hoses may be lowered by line-slipping to the water. All other procedures are the same as those initiated from the ship. The Master of a tanker may, in an emergency, for the protection of life or property, depart from an SPM without clearance from the control platform.

Emergency Shutdown: Following are the procedures to be followed in case the offload pumping must be quickly stopped because of some emergency.

(a) LOOP's Cargo Transfer Supervisor notifies the tanker's watch officer and the Mooring Master of the emergency shutdown, and activates the Emergency Shutdown Signalling Device.
(b) The LOOP system automatically goes into a pumping rate reduction, and shuts down the pumps and meters as the flow rate dictates.
(c) The tanker's manifold valves and the hose end butterfly valves are closed as soon as LOOP's pumps and the tanker's pumps are shut off.
(d) The Pumping Platform Supervisor shuts LOOP's PLEM valves.
(e) If the emergency is one that makes a quick departure of the tanker necessary, the emergency departure procedures of the preceding paragraph will then be followed.

MEDICAL: Agents can arrange medical and dental treatment as well as consultation and hospitalisation at short notice.

FRESH WATER: Not available.

FUEL: LOOP does not provide any bunkering services or facilities to tankers operating in the LOOP deepwater port area. Such bunkering will be conducted by private concerns under arrangements made with the owners or operators of tankers. Bunkering will not be allowed to interfere with the safe and expeditious unloading of crude oil from tankers. All companies, craft, equipment and personnel involved in bunkering inside LOOP's deepwater port area *must* have LOOP's prior approval and must also follow LOOP's Bunkering Guidelines and Regulations, copies of which are available upon request from LOOP.

FIRE PRECAUTIONS: As per the "International Safety Guide for Tankers and Terminals".

REPAIRS: Skilled craftsmen are available for all on-board repairs through Agent.

SURVEYORS: *Petroleum Inspectors:* A contracted "Inspector of Record" is available at the port to make shipboard inspection of the cargo. Use of this service is at the option of the shipper and is at shipper's expense. Shipper shall have the right to have representations witness the inspection. Shipper should contact LOOP or the "Inspector of Record" regarding the prevailing fees and to make known intentions regarding use of the service.

AIRPORT: New Orleans International Airport is serviced by major airlines with world wide connections. The airport is located 90 miles from LOOP.

WEATHER: *Waves and Currents:* At the port, significant wave height is less than 1.8 m. (6 ft.) for 72% of the time, and greater than 3 m. (10 ft.) for 5.4% of the time. Currents take a generally Westerly direction 25% of the time. Average current speed is 0.72 knots, but 3% of the time the current can reach a speed of 2 knots.

Weather at the Port: LOOP's Marine Terminal is located in a semi-tropical zone. Average Summer temperature is 29°C (84°F), and average Winter temperature is 14°C (57°F). Lowest temperature recorded is −12°C (10°F) and highest is 38°C (100°F).

Thunderstorms in Summer and cold fronts in Winter develop quickly and can be quite severe, with storm winds (up to Force 10) developing for short periods. The Terminal is in a hurricane zone, and although such storms are an infrequent occurrence at the port, the area is often affected adversely between the months of June and November by hurricanes passing East or West of the port. Poor visibility occurs most often in January when visibility of 2 nautical miles or less occurs 2% of the time.

Weather Operating Rules: As a general rule, the LOOP Port Superintendent will use the following guidelines in deciding whether various port activities will be allowed to begin or continue, or whether they will be terminated:

(a) Bunkering is generally allowed in significant seas of up to 1.5 m. (5 ft.)
(b) Tanker mooring and hose hook-up generally are allowed in significant seas of up to 2 m. (6 ft.)
(c) Operation of the mooring launches and work boat, as well as cargo discharge, are generally considered safe in significant seas of up to 4 m. (12 ft.)
(d) In seas of 4 m. (12 ft.) or more, cargo discharge may be stopped and cargo hoses disconnected, especially if a storm is building up.
(e) Tankers may be required to depart:
    (1) if seas become greater than 5 m. (15 ft.);
    (2) if winds become greater than 22 m. per second (44 knots);
    (3) if current becomes greater than 1 m. per second (1.8 knots) and is aligned with winds of 20 m. per second (40 knots) or more;
    (4) if current becomes 0.6 m. per second (1.2 knots) and is perpendicular to 20 m. per second (40 knot) winds.
(f) The complete shut-down of all systems and the evacuation of the port will be ordered when it is predicted that the centre of a hurricane will pass within 290 kilometers (180 statute miles) of the port. Normally evacuation orders will be issued 36 hours before the storm's expected arrival.
(g) A hurricane alert is issued 72 hours ahead of an approaching hurricane. Incoming tankers will not normally be berthed after a hurricane alert, and berthed tankers will complete discharging as soon as possible and depart the port.

Also see "Radio".

REPATRIATION: Crew changes and repatriation of crew members can be arranged through Agent.

GENERAL:

List of United States Federal Regulations referenced in this Port:

Title 33 USCA 1517	– Deepwater Ports – Liability.
Title 33 CFR 150(D)	– Oil Transfer Operations.
Title 33 CFR 150.345	– Regulated Vessel Activities.
Title 33 CFR 155	– Oil Pollution Prevention Regulations for Vessels.
Title 33 CFR 157	– Rules for the Protection of the Marine Environment Relating to Tank Vessel Carrying Oil in Bulk.
Title 33 CFR 157.25 – 157.49	– Vessel Operations.
Title 33 CFR 159.7	– Marine Sanitation Devices – Requirements for Vessel Operators.
Title 33 CFR 164	– Navigation Safety Regulations.
Title 33 CFR 164.35	– Equipment: All Vessels.

Annex V of MARPOL 73/78.

Charts: The following official charts of the National Oceanographic and Atmospheric Administration (NOAA) are recommended for use when approaching LOOP's Marine Terminal:

11340 (U.S. Gulf Coast – Mississippi River to Galveston).
11358 (U.S. Gulf Coast – Barataria Bay and Approaches).
11359 (U.S. Gulf Coast – Louisiana, LOOP Deepwater Port).

The latest editions of NOAA charts are listed in NOAA's publication "Dates of Latest Editions", which is issued quarterly and available free from National Ocean Survey, Division C44, Riverdale, Maryland 20840, U.S.A.

Support Vessel Base: National Oceanographic and Atmospheric (NOAA) Administration Chart No. 11358 shows the navigable route from the marine terminal to the small boat harbour located on the East shore of Bayou Lafourche near Belle Pass where the support vessels are based.

Onshore Components: Major onshore components are: the Clovelly Dome Storage Terminal for receiving and storing the oil coming from the Marine Terminal and for delivering it to connecting facilities; the Operations Centre for controlling and monitoring system operations; and the Fourchon Booster Station for helping to pump the crude oil from the Marine Terminal to Clovelly Dome Storage Terminal.

Services: LOOP does not provide facilities for logistic services to tankers using the port. The company is not an "Agent", but does render to all tankers calling at its terminal the services necessary to effect a prompt, efficient turnaround. LOOP provides those services and facilities necessary for scheduling, receiving, mooring, unloading of cargo and departure of tankers calling at the port. Arrangements for logistic services must be made through each tanker's agent. Lists of logistic services can be obtained from the Agents. Messages concerning such requirements, except in an emergency, will not be accepted by LOOP.

Vessel used to deliver bunkers and tanker supplies must be approved by LOOP. Such vessels must apply for approval in accordance with the LOOP Guidelines and Regulations covering logistical service. Lists of currently approved vessels are available from LOOP on request. No telephone service is available to the ships.

Included in tanker services that need to be arranged through tankers' agents are mail services, medical services and garbage pick-up. Garbage collection shall be in compliance with Annex V of MARPOL 73/78. There are no facilities for handling mail. *It is important that mail for tankers not be addressed to LOOP Inc.* There is no medical service on LOOP's offshore platforms. Medical service ashore, as well as helicopter service for medical evacuation, is available through the Agents.

Helicopter Transfer of Personnel and Supplies: Helicopter operations are sanctioned on tankers, subject to the Master's and the Port Superintendent's approval, for the following situations:

(a) Medical evacuation, personnel transfer and replenishment of supplies by helicopter is permitted on an individual basis. The Port Superintendent has authority to determine when conditions are not safe for such helicopter operations. Shoreside treatment for medically evacuated patients must be arranged by the tanker through the tankers' agent. LOOP will assist with communication relays for emergency medical purposes but will not act as agent.
(b) When weather conditions dictate, helicopters may be used for transfer of Mooring Masters and other port personnel at the discretion of the tanker's Master. The Mooring Master and the Port Superintendent jointly decide when such a condition exists.
(c) In order to facilitate decisions about the safety or feasibility of helicopter operations on tankers, LOOP advises Masters of the characteristics of any helicopters that LOOP itself dispatches.

Personnel Transportation: LOOP provides no boats for transportation of tankers' personnel to shore. When transportation is required, it must be arranged through tanker's agents. There is almost no public transportation on land from towns near the LOOP platform. Any such land transportation should also be arranged in advance through tanker's agents.

Small Boats and Visitors: No boats are permitted or authorised to come alongside tankers calling at the port except those required by LOOP or by the ship to furnish services or carry out official business, and then only after clearance from the Vessel Traffic Controller and Mooring Master.

It is strongly recommended to Masters of tankers that visitors to the ship be restricted to a minimum, because of the hazards involved. Visitors to the ship are not allowed to embark or disembark by the way of LOOP's platforms or launches.

Masters of vessels are advised that decks and the ship's ladders should be well lighted and ladders should be kept well clear of the water during unloading to prohibit unauthorised persons from boarding the ship.

Cargo Documentation: The cargo quantity and quality report, which is a LOOP document, will be completed as much as possible by LOOP personnel before each tanker's arrival. After the tanker finishes discharging, the Mooring Master receives the necessary figures by radio from the Control Transfer Supervisor, so that the document can be completed before sailing. Cargo quantity is measured by representatives of LOOP by using turbine meters and provers on the pumping platform. Cargo quality is monitored by automatic sampling devices on the platform, and for accounting purposes manual tests are done on samples taken from the automatic sampler on the platform. LOOP furnishes United States Customs authorities with the necessary documentation.

Pollution: Discharge of oil or oily slops into the sea is strictly forbidden. LOOP has no facilities for receiving any oil residues or oily ballast water. Tankers wishing to offload such substances must do so elsewhere. Tankers that release oil or oily ballast water either at the SPM or in the anchorage area will be held responsible for all clean-up costs. The U.S. Coast Guard Regulations concerning water discharges at sea are contained in 33 CFR 157.25 to 157.49. Regulations in 33 CFR 159.7 require an operable marine sanitation device aboard all vessels in United States waters. For purposes of these regulations the LOOP safety zone is considered U.S. waters.

Note: All ballast and bilge overboard discharge valves are to be shut and sealed and all deck scuppers plugged while at a LOOP SPM or anchorage, although scuppers can be temporarily opened to drain off rainwater.

Safety: LOOP maintains a vigorous safety programme. The Mooring Master will discuss and review LOOP's safety requirements and procedures with tanker's Master and Chief Officer before cargo discharge begins. Coast Guard Inspectors will board all foreign vessels, at least annually, to ensure compliance with federal regulations, including Part 164, Title 33 of the United States Code of Federal Regulations, Navigation Safety.

Drug and Alcohol Policies: It is the company's belief that the use of drugs or alcohol impairs employee performance and creates unsafe working conditions, thereby posing dangers to employees, contractors, vessel personnel and to the environment. LOOP is committed to maintaining a productive and safe working environment. To that end, all LOOP employees and employees of contractors performing services for LOOP, are not permitted to consume or have in their possession any alcohol or drugs, while on Company premises. For this policy's purpose, the Safety Zone is considered to be Company premises.

Masters, whose ships are in the Safety Zone, are strongly encouraged to voluntarily follow LOOP's policy concerning consumption of alcohol and drugs by crew members, thus contributing to a safer discharge.

Customs: LOOP furnishes customs authorities with documentation of volumes and evidence of quality of cargoes received into the system based on measurements at the Marine Terminal pumping platform. Arrangement for the posting of such sureties and payment of fees or duties, and for other documentation that may be required, is the responsibility of the importer and/or operator of the tanker. The importer's customs broker, or his other authorised representative, will advise the importer regarding procedures and the amount of duty or fees levied on oil shipped through the port complex.

Storage: Procedures and charges for storage of crude oil by shippers in excess of normal residence time are covered in the Terms and Conditions of Service.

State Fees: There are presently no usage fees directly assessed by Louisiana to shippers and tankers at the deepwater port. If Louisiana imposes any fees in the future, tankers will be responsible to pay them.

Provisions: All deck and engine room stores are available in quantity. High quality fresh and frozen provisions available through Agent.

Regulated Vessels Activities: Vessel activities permitted and prohibited at the port, controls on those activities, and the specific safety zone areas in which the controls apply are set forth in 33 CFR 150.345.

	Safety Zone		
Regulated Vessel Activities	*Areas to be avoided around each PPC and SPM*[1]	*Anchorage Area*	*Remaining Portion of Safety Zone*
Tanker calling at port.	C	C	C
Support vessel movement.	C	C	C
Transit by vessels other than tankers or support vessels.	N	P	P
Mooring to SPM by vessel other than tankers or support vessels.	F		
Anchoring by vessels other than tankers or support vessels.	N	F or P	N
Fishing, including bottom trawl (shrimping).	N	P	N
Mobile drill operations or erection of structures[2].	N	N	N
Lightening/transshipment[3].	N	N	N

[1] The radius of areas to be avoided around each PPC is 600 m. and around each SPM is 500 m.

[2] Not part of Port Installation.

[3] Exception, 33 CFR 150.423(e).

Note: The person in charge of any vessel planning to enter a Safety Zone should contact the port's Vessel Traffic Supervisor on Channel 10 VHF-FM before entry and comply with that person's instructions.

Key to regulated activities:

F – Force Majeure.

N – Not permitted.

C – Tanker calling at port and support vessel movements: Permitted when cleared by Vessel Traffic Supervisor.

P – Vessels other than tankers or support vessels: Permitted when not in immediate area of tanker, clearance by Vessel Traffic Supervisor required.

Communications with Vessel Traffic Supervisor required.

For transitting foreign flag vessels, the requirement for clearance to enter the Safety Zone is advisory in nature.

AUTHORITY: LOOP Inc. (See "Operator").

LOS ANGELES, California: 33.43 N. 118.16 W.

(See Plan)

PORT LIMITS: The seaward boundary of the Port of Los Angeles is, for most purposes, the breakwater through which arriving vessels pass at Angels Gate Light.

DOCUMENTS: *First Port of Arrival:*

1 Complete Manifest deposited with Customs, original and traveller.

1 Complete Manifest returned to vessel.

1 Manifest of first port cargo deposited with Customs broker.

2 Quarantine Declarations (Form PHS 43).

2 Agriculture Declarations (Form AIQ 43).

1 Visaed Crew List (Form I-418) 5 additional copies.

1 Crewman's Landing Permit (Form I-95A) for each crew member and (Form I-94) for each passenger.

1 Dangerous Cargo Manifest deposited with Captain of the Port. 1 copy in hands of Chief Officer for review by the Fire Department.

The Coast Guard Captain of the Port must be informed of vessel's ETA 24 hours prior to vessel's arrival.

Second and each subsequent Port of call in U.S:

2 Manifests of Cargo for second U.S. port left with Customs.

1 Travelling Manifest returned to Master.

(*Note:* Travelling Manifest is carried and deposited with Customs at final port of discharge in U.S. – in addition to above required documents 4 additional copies should be available.)

PILOTAGE: Request made through Agent. Contact can be made through VHF Channels 14 (156.7 MHz) or 16 (156.8 MHz). Call: KEB 260 Los Angeles Pilots. Tel: 519-3805. Not less than 1 hour's notice of arrival or departure. 1 long and 1 short blast on ship's whistle or siren, or international signal. Pilot will board in vicinity of sea-buoy ("LA" entrance buoy, lighted bell buoy "L.A." red and white vertical stripes. Radar reflector).

Under normal weather conditions, the pilot ladder should be on the starboard side 1 m. above water.

Arriving vessels should keep to Eastward of Los Angeles Sea-Buoy.

Departing vessels should keep to Westward of Los Angeles Sea-Buoy.

Masters or Agents are requested to advise the pilot station whenever there is a change in the arrival or sailing time.

Note: Ships arriving can usually make good VHF radio contact except between Point Vicente and Point Fermin.

ANCHORAGES: Anchorages defined on charts. No permit required to anchor less than 10 days. Permit for over 10 days obtained from Captain of the Port, USCG and Harbour Department Port Warden. Permit is required for Explosives anchorage.

APPROACHES: Vessels approaching the ports of Long Beach/Los Angeles should use the prescribed traffic separation scheme. Be advised that the traffic separation scheme has been temporarily modified, pending adoption of permanent changes by the Maritime Safety Committee. The modification reconfigures the Western approach to the Los Angeles/Long Beach precautionary area in the following manner: a portion of the TSS separation is reduced from 2 miles to 1 mile in width and merges with the existing separation zone at a slightly adjusted turn point; the outbound lane has been shifted 1 mile South of its present charted location; and the precautionary area is reduced in size on its Eastern side. Vessel charts should be corrected as per most recent Notice to Mariners for geographical positions of these changes. Large tankers should pick up the Pilot 1 to 2 miles South of the sea buoy and Pilots should have the opportunity to board without excessive way on the vessel so as to have her under control before entering the breakwater area. All vessels entering the port should pass Eastward of the respective sea buoy and vessels outbound shall pass Westward of the sea buoy. The Master should use extreme caution in the Precautionary Area due to proximity of outbound traffic and numerous small craft, when at night, their lights are not easily distinguishable in and around breakwaters or against the background of harbour lights. Outbound vessels should avoid setting course before clearing South of the sea buoys and adjoining anchorages and be alert for crossing traffic.

MAX. SIZE: Restrictions on draft only. Supertanker terminal in outer harbour has fairway of 51 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Los Angeles Quarantine Station.

Quarantine: U.S. Quarantine Station, Los Angeles International Airport, 380 World Way, Box N-19, Los Angeles, CA 90045. Tel: (213) 215-2345.

1990 Standard Procedure: The Master of a ship destined for a U.S. port must report immediately by radio, through the owner, operator or agent, to the Public Health Service Quarantine Station at or nearest the port at which the ship will arrive, the occurrence on board of any death or any ill person among passengers or crew (including those who have disembarked or have been removed) during the 15 day period preceding the date of expected arrival or during the period since departure from a U.S. port, whichever period of time is shorter (Section 71.21 of Public Health Service Foreign Quarantine Regulations 42 CFR part 71).

As used in these regulations the term "ill person" means a person who (1) has a temperature of 100°F. (or 38°C.) or greater, accompanied by a rash, glandular swelling, or jaundice, or which has persisted for more than 48 hours, or (2) has diarrhea. (Section 71.35)

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: International Telephone and Telegraph, call letters "KOK" Los Angeles Radio.

RADAR/VHF: The Los Angeles Harbour Pilot's station equipped with radar for use of Pilot. The Pilots also monitor VHF Channels 14 (156.7 MHz) and 16 (156.8 MHz). Also see "Long Beach" and "Services".
TUGS: On stand-by 24 hours a day. However, should be ordered prior to arrival. Tugs join vessel in main channel, tug lines used, except when towing astern.
BERTHING: Generally arranged through Agent. Berthing under control of Port of Los Angeles' Chief Wharfinger. There are 32 general cargo berths with depth alongside 45 ft. (See "Max. Size".)

Berth No.	*Depth* (ft.)	*Remarks*
37–40	35	Under construction
49–50	51	Coal (Berths No.49–53). Loading rate 1,400 t.p.h. Travel 600 ft.
51–55	37	Coal, General Storage
57–60	30–35	Warehousing
72	14	Fish Markets
73 A–E	20	Commercial Fishing Vessels
87–89	40	General Cargo
90–92	37	Cruise Ships
93 A	37	Cruise Ships
93 B	37	Cruise Ships
126–131	35	Containers, General Cargo
134–135	35	Cement
136–139	45	Containers
142–144	45	General Cargo
153–155	37	General Cargo
174–181	45	Omni–use
191	35	Cement
195–199	37	Cars
200 A–H	37	Cars, Lumber
206–209	40	Container, Cars
210–211	37	Scrap Metal
212–215	35	Containers
216–225	45	Omni–use
227–236	45	Containers
237	38	Oil, Ship Repairs
257	18	Boat Repairs

CONTAINER HANDLING FACILITIES:

Container Terminal: Berths 87 – 90.
Operated by: Public berth.
Contact: LA Harbor Department, Tel: (213) 519-3860.
Total Land Area: 25 acres (10.1 hectares).
Berth Length: 800 ft. (244 m.)
Container Capacity: 1,800 TEUs, 120 reefer outlets.
Number of Cranes: 2 × 40 ton portainers.
Stevedores: Optional.
General: Handles containers and breakbulk.

Container Terminal: Berth 131.
Operated by: Public berth.
Contact: LA Harbor Department, Tel: (213) 519 3860.
Total Land Area: 18 acres (7.28 hectares).
Berth Length: 800 ft. (244 m.).
Container Capacity: 1,500 TEUs, 120 reefer outlets.
Mode of Operation: Grounded and Chassis
Number of Cranes: 2 × 40 ton portainers.
Stevedores: Optional.
General: Terminal has one gate, and the yard is fully computerised.

American President Lines: Berths 121 – 126.
Operated by: Eagle Marine Services Limited, Berths 121 – 126, San Pedro, CA 90733.
Contact: For general information, Tel: (213) 548-8000.
Total Land Area: 114.6 acres (46.4 hectares).
Berth Length: 2,000 ft. (609.6 m.).
Container Capacity: Grounded and Chassis.
Mode of Operation: Wheeled/Grounded.
Number of Cranes: 5 × 40 ton.
Stevedores: Eagle Marine Services Limited.
General: Container freight station of 154,000 sq.ft.(14,307 sq.m.).
Maintenance and repair station of 39,000 sq.ft.(3,623 sq.m.).
Underground Bunkering.
Services: American President Lines (APL), ANZDL and PM&O.

Hanjin Container Terminal: Berths 127 – 129.
Operated by: Marine Terminal Corporation, 1606 West Water Street, Long Beach, CA 90802.
Contact: Ray Cunan, Tel: (213) 499-4500.
Total Land Area: 40 acres (15 hectares).
Berth Length: 1,600 ft. (488 m.).
Container Capacity: 2,662 TEUs with 200 reefer outlets.
Mode of Operation: Grounded and chassis.
Number of Cranes: 2 × 40 ton single-lift portainers.
Stevedores: Marine Terminal Corpration.
General: Maintenance and repair facilities.
Services: Hanjin Shipping Line.

Trapac Terminal: Berths 136 – 139.
Operated by: Trans Pacific Container Service Corporation, 920 West 'B' Street, P.O.Box 1178, Wilmington, CA 90748.
Contact: John Maddox, Tel: (213) 830-2000.
Total Land Area: 70 acres (28 hectares).
Berth Length: 1,775 ft. (540 m.).
Container Capacity: Stacking area for 2,450 units, including 48 reefer units. On-chassis area for 1,850 units plus 206 reefer units.
Mode of Operation: Grounded and Wheeled Storage.
Number of Cranes: 4 × 40 ton.
Stevedores: Trans Pacific Container Service Corporation.
General: Three transtainers and one toplifter. 80,000 sq.ft. (7,432 sq.m.) for a future container freight station.
Service: Mitsui OSK, ACT/PACE, Dole Fresh Fruit, Columbus Line.

Matson Terminal: Berths 206 – 209.
Operated by: Matson Terminals Inc., P.O.Box 3367, Terminal Island, CA 90731.
Contact: Richard Bliss, Tel: (213) 519-6538.
Total Land Area: 86 acres (34.8 hectares).
Berth Length: 2,180 ft. (655 m.).
Container Capacity: 10,000 TEUs with three and four-high stacking.
Mode of Operation: Grounded and Chassis.
Number of Cranes: 5 × 30 – 40 ton capacity gantry cranes.
Stevedores: Matson Terminals Inc.
General: Container freight station of 6,200 sq.ft. (576 sq.m.).
Additional four-rail mounted Morgan cranes, four transtainers, 12 straddle carriers and four side loaders.
Services: Matson.

Indies Terminal: Berth 216 – 225.
Operated by: Stevedoring Services of America, 965 Harbor Scenic Way, Long Beach, CA 90802.
Contact: John Di Bernardo, Tel: (213) 547-3351.
Total Land Area: 99 acres (40 hectares).
Berth Length: 3,000 ft. (915 m.).
Container Capacity: 40 acres (16.19 hectares) grounded storage, plus area for on-chassis.
Mode of Operation: Grounded and Chassis.
Number of Cranes: 4 × 40 ton.
Stevedores: Stevedoring Services of America.
General: Two warehouses of 200,000 sq.ft. (18,580 sq.m.) each full time Customs service.
Services: NYK, Elma, Nedloyd, Grancolombiana, Yangming, Star Shipping, Shipping Corporation of India (SCI), Hyundai, Hiuka American, H.J. Baker, P.T. Moges, Chilean Fruit, Baltic.

Evergreen Terminal: Berths 229 – 236.
Operated by: Metropolitan Stevedore Company.
Leased by: Evergreen Marine Corporation (California) Limited, 260 West 5th Street, San Pedro, CA 90731.
Contact: Robert Chiu, Tel: (213) 514-4000.
Total Land Area: 118 acres (47.8 hectares).
Berth Length: 3,900 ft. (1,200 m.).
Container Capacity: 3,600 TEUs, one high; 636 × 20/40 chassis, 130 with reefer plugs.
Mode of Operation: Grounded and Chassis.
Number of Cranes: 5 × 40 ton.
Stevedores: Metropolitan Stevedore Company.
General: Customs, full-service maintenance and repair facilities available. Refrigerated container wash rack and maintenance. Nine transtainers and two tophandlers.
Services: Evergreen, Johnson Scanstar.
CRANES: *Barge Cranes:* 1×350 tons capacity (Manson).

SPECIALISED CARGO HANDLING: Bulk loading facility, especially designed to handle coal and other dry bulk materials. Wharf length 800 ft. Depth alongside 51 ft. Loading rates up to 3,000 t.p.h., and unloading 500 t.p.h.

The cement storage ship "Muscat Cement", located at Berth No. 134, is a 600 ft. 60,000 d.w.t. vessel that transfers cement from bulk carriers to trucks for distribution.

Other specialised facilities include the GATX Petrochemical Terminal, designed especially to receive petrochemicals; the Hugo Neu Corporation installation, where old automobiles are reduced to scrap metal for export; Coos Head and Louisiana Pacific Terminals; United Brands Company's Banana Terminals; and the processing and shipping plant of the U.S. Boron Company.

BRIDGES: Highway suspension bridge (Vincent Thomas) crosses main channel between Berth 95 and Berth 225; overhead clearance of 185 ft. in centre. 2 bridges on Cerritos Channel separating Los Angeles and Long Beach harbours, 1 double leaf-bascule (Badger Avenue Bridge) the other is a lift bridge (Schuyler F. Heim), as these bridges are less than 50 ft. apart they will be treated as one, overhead clearance 155 ft. at centre of Heim Bridge.
STEVEDORES: Agents make necessary arrangements.
MEDICAL: Necessary to notify Agents of required medical attention: this can be done when final ETA is determined. Hospital facilities available (private).

Vaccinations/fever certificates, etc., shall conform with rules and models prescribed by the International Sanitary Regulations.
TANKERS: Load and discharge lines have 6 in. and 8 in. standard flanges (super-tanker terminal has 12 in. lines with standard flanges). If not so equipped ship must furnish its own "C" clamps. Recommend ship have reducers on board to handle 6 in. and 8 in. flanges. Residue discharge facilities available for limited quantities. All types and grades of petroleum available. Also see Long Beach – "Tankers".

Berth No.	*Length* (ft.)	*Depth* (ft.)	*Operator*	*Remarks*
45–47	898	50	Unocal/Mobil	Crude, bunkering, products. 5 loading arms. Pipeline 1.4 miles by 30 cm. 2 conveyor belts for stores.
70–71	575	37	GATX	Petrochemicals, petroleum products. 111 tanks, capacity 578,000 barrels. Pennzoil uses Berth 71 for lube oils.
97–102	848 805	32 32	Chevron	Petroleum, bunker fuel, diesel, lube. 21 tanks capacity 660,000 barrels. Access by road only.

Berth	Length	Depth	Operator	Remarks
118–119	821	35	GATX	GATX have 4×30 cm. and 2×15 cm. pipelines from wharf to 11 storage tanks, total capacity 535,000 barrels. B.P. North American Petroleum also uses this public berth.
120–121	418	35	Western Fuel Oil Co.	Petroleum, LPG and chemicals. 30 cm., 25 cm. and 15 cm. pipelines to Western Fuel, Petrolane, B.P. and GATX tanks.
148–151	1,344	45	Unocal	Refined products.
163–164	892	35	Wickham Oil Terminal Inc.	Also used by Ultramar Inc., received base oil, fuel oil and diesel.
165–166	679	45	U.S. Borax	Exports borates. Rate 1,000 t.p.h.
167–169	1,249	45	Shell	Receives crude, receives and ships petroleum products. 16 storage tanks, capacity 672,000 barrels.
171–173	1,412	35	GATX	Public terminal. Receives crude, ships petroleum products. 19 storage tanks, total capacity 1,000,000 barrels.
187–190	No Limit	45	Wilmington Liquid Bulk Terminals Inc.	Public terminal for storage and shipping of various liquids (lube, diesel, caustic, coconut oil, etc.). 65 tanks, capacity 1.3 million barrels.

DENSITY: Average density 1026 (exception during or after heavy rain).

FRESH WATER: Availability unlimited, delivery universal, rate of delivery 100 t.p.h.

FUEL: Unlimited fuel, all grades at attractive rates. 48 hours' advance notice generally required.

FIRE PRECAUTIONS: Whenever vessel bunkering, sufficient serviceable fire hose with suitable nozzles attached to reach all parts of vessel shall be connected to fire main on vessel and made ready for instant use at all times during bunkering operations. If no adequate water pressure available on board, connections shall be made to shore lines to obtain adequate pressure. All tankers shall be moored bow seaward and have wire towing pendants rigged fore and aft readily available for emergency use, fire hoses shall be connected as above at all times while vessel in port.

International fire signals will be used in case of fire (5 prolonged blasts of ship's whistle or siren of 4 to 6 seconds duration).

SURVEYORS: ABS, Det Norske Veritas, Lloyd's Register and NKK.

Philippines – Trade Representative
Portugal – Trade Office
Sweden – Trade Commissioner
Switzerland – Vice Consul
Yugoslavia – Trade Commissioner

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: Largest dry dock 659 ft. by 97 ft., 22,000 displacement tons. 3 smaller dry docks (17,500, 15,000, 10,000 tons).

CERTIFICATES: *Passenger Vessels:*
Safety Certificate, with 50 or more passengers.
Load Line Certificate.
Radio Certificate.
Radio Telephone Certificate, if aboard.

Cargo Vessels:
Safety Equipment Certificate.
Load Line Certificate.
Certificate of Inspection/Home Certificate.
Trading Certificate.
Cargo Gear Certificate.
Radio Certificate, Radio Telephone Certificate, if aboard.

If carrying passengers from U.S. ports, vessels must have PAC (Persons in Addition to Crew) Certificate issued by USCG.

Tanker Vessels:
Same as cargo. Exception: if carrying exotic cargo, required to have cargo facilities plan reviewed and approved by USCG, Washington, D.C. On vessel's first visit it will be inspected and receive a letter of compliance.

GANGWAY/DECK WATCHMEN: Gangway watch recommended. Tankers and vessels handling dangerous cargo required to have gangway and deck watch.

OPENING/CLOSING HATCHES: Automatic hatches may be opened and closed by crew, manual hatches opened and closed by stevedores.

CUSTOMS ALLOWANCES: Tobacco, either 300 cigarettes, 50 cigars, or 3 lb. of smoking tobacco, for the personal use of crew member. Wine and/or spirit, 1 quart for personal use of crew member.

CARGO GEAR: Gangway net attached between ship and dock; extending 5 ft. beyond turntable in one direction and 5 ft. beyond point of intersection of gangway and stringpiece in the other direction. Preventer guy must be rigged separately to head of boom from working guy. Exception if cast head of boom is capable of withstanding the stress of all the lines attached thereto. (This is a West-Coast requirement.)

REPATRIATION: Arrangements can be made through Immigration on request of Agent to have crewman change ship or return to home port.

AIRPORT: Approximately 20 miles to International Airport which serves all major airlines.

TIME: Standard Time, GMT minus 8 hours. Daylight saving time GMT minus 7 hours (April through October).

HOLIDAYS: Cargo may be worked on holidays with holiday pay scale.

POLICE/AMBULANCE/FIRE: The telephone numbers are Fire (213) 832-4241, Police (213) 832-7211, Ambulance (213) 832-4243. Fire Alarm boxes adjacent to all cargo sheds. Emergency number is 911.

EMERGENCY CO-ORDINATION CENTRE: Coast Guard Rescue Co-ordination Centre. Tel: 590-2225.

TELEPHONES: For passenger vessels at passenger terminals only.

SERVICES: A ship-reporting service "The Marine Exchange" located at Angels Gate Park near Los Angeles Harbour.They monitor Channels 14 (156.7 MHz) and 16 (156.8 MHz) VHF and have Channel 9 (156.45 MHz) VHF as their own. Primary duties are reporting arrivals, departures and locations of vessels.

BANKS: Over 50 international banks.

SHIP SUPPLY SERVICE: The port is served by numerous ship suppliers offering a wide range of services.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: 1 crewman's landing permit (Form I-95A) or Immigration card (Form D-1).

REGULATIONS: Permits required for hot work (welding, cutting, etc.). Permit required for any dangerous cargo. Permit to discharge ballast (clean water) required. Restrictions on bunkering operations (scuppers plugged, valves closed).

DELAYS: No delays in berthing, load or discharge or bunkering can be expected.

DEVELOPMENTS: Pier 300: 130 acre container terminal, 103 acre consolidated dry bulk terminal and 47 acre near-dock railyard.

CTC: Consolidated Transportation corridor.

Berths 212-215: 100 acre container terminal for Nippon Yusen Kaisha.

AUTHORITY: Port of Los Angeles, P.O.Box 151, (425 S. Palos Verdes Street), San Pedro, California 90733-0151. *Tel:* (213) 519-3400. *FAX:* (213) 831-0439. *Contact:* Ezunial Burts, Executive Director. Ward Pierce, Chief Pilot.

MANITOWOC, Wisconsin: 44.06 N. 87.38 W.

LOCATION: Situated on the Western shore of Lake Michigan, 70 miles North of Milwaukee. Port open all year round.
DOCUMENTS: Vessels cleared by Quarantine Officials at Quebec. Customs Officer stationed at Green Bay.
PILOTAGE: Not locally required or available. Pilots should be taken on board prior to entering harbour.
MAX. SIZE: Max. draft 21 ft., vessels up to 600 ft. LOA can berth.
HEALTH: See "Documents".
TUGS: Not available.
BERTHING: 2 breakwaters protect the harbour. Entrance dredged to 25 ft. Outer harbour from pier heads to inner red light dredged to 23 ft. Inner harbour up to Medusa Cement Company dredged to 21 ft. Maximum depth alongside docks, 19 ft. Turning basin, 600 ft. radius.

All berths owned by private industry and located as follows from harbour entrance:

1. Manitowoc Public Utilities: 2 slips capable of handling 400 ft. car-ferries which handle railroad freight cars or Ro/Ro vehicles. Located port side at a right angle to river channel South side of harbour.
2. C. Reiss Coal Company, 509 Jay Street: A 900 ft. slip just inside car-ferry docks, at a right angle to river channel, South side of river.
3. Manitowoc Company Inc., 500 South 16th Street: 800 ft. long. South side of channel, parallel docking.
4. Busch Agricultural Resources Inc., 605 Washington Street: 490 ft. South side, has marine leg for unloading grain.
5. McMullen & Pitz Construction Company, 901 Commercial Street: 300 ft. North side of river between 8th and 10th Street bridges.
6. Soo Line Railroad Company, 923 Commercial Street: 300 ft. North side of river just above 10th Street bridge. This includes an unused car-ferry slip capable of handling a 400 ft. car-ferry. Also, 600 ft. North side just above car-ferry dock but is unimproved.
7. Manitowoc Company Inc., 500 South 16th Street: Approximately 8 berths varying in length from 180 ft. to 850 ft., port side bordering the peninsula.
8. Medusa Cement Company, 1801 Spring Street: Final large dock upriver, 1,200 ft. starboard side.
9. Consumers Steel & Dock, 1311 Spring Street: 330 ft. starboard side just prior to Medusa dock.
10. Burger Boat Company, 1811 Spring Street: 300 ft., starboard side, just beyond Soo Line Railroad swing bridge.

CRANES: Manitowoc Company Inc.: One fixed crane max. 80 tons lift. Travelling crane max. 70 tons lift.

Burger Boat Company: One stiff leg derrick, 40 tons max.
BRIDGES: Operating regulations in effect. Contact City Police or the Harbour Master in advance.
DENSITY: 1000.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Can be undertaken by Bay Shipbuilding Co.
DRY DOCKS: Floating dock available. Length 604 ft., width 70 ft., depth over blocks 13 ft., max. LOA 640 ft. Bay Shipbuilding Co., Sturgeon Bay, Wis.

Bay Shipbuilding Co. have 1 drydock which will accept vessels of 1,000 ft. LOA and 35,500 gross tons. Depth over sill 17 ft.
SURVEYORS: Lloyd's Surveyor available from Cleveland.
AIRPORT: Manitowoc County. N.W. side of City off Monasha Avenue. Simmons Airlines, commercial feeder line, passenger and freight.
TIME: GMT minus 6 hours.
AUTHORITY: City of Manitowoc, Harbour Commission, 817 Franklin Street, Manitowoc, Wisconsin 54220. *Tel:* (414) 683-4550. *Contact:* E. Steckmesser, Harbour Master. Tel (414) 682-8349.

METLAKATLA, Alaska: 55.08 N. 131.35 W.

LOCATION: Located on Annette Island. Open all year.
DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: Ships coming up from the Hecate Straits or outside of Graham Island proceed into Dixon Entrance to the vicinity of Point McCartey where the Pilot will meet them. Vessels coming up the inside passage from Vancouver, B.C. are met at Lucy Island Pilot Station.
ANCHORAGES: Good anchorage in gravel and mud.
RESTRICTIONS: Usually daylight berthing only.
MAX. SIZE: Depths in harbour 120 ft. Tides: diurnal range – 14.7 ft. Also see "Berthing".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
CUSTOMS: Quarantine, Immigration and Customs, from Ketchikan.
VHF: Harbour Master monitors Channel 16.
TUGS: Available in Ketchikan. A minimum of 2 tugs required for berthing and unberthing. Arrangements made with Pilot from Ketchican.
BERTHING: 2 berths: 1. City Dock: 400 ft. long and 60 ft. wide. More than 35 ft. deep. Due to shallow water at East end, a starboard landing is usually made. No covered storage, temporary open storage. 4 fork lifts, 2 of 20,000 lb. capacity.

2. Annette Island Canning Co.; 200 ft. long and 23 ft. deep. 15 ton crane and 2 fork-lifts. 1×25 ton fork lift.
CRANES: No Port Authority cranes.
STEVEDORES: 4 gangs available.
MEDICAL: Hospital available in Ketchikan; small clinic in Metlakatla.
SUPPLIES: Bonded and unbonded stores from Ketchikan.
WATER: Available.
FUEL: Not available.
REPAIRS: Facilities at Ketchikan.
SURVEYORS: Cargo Inspectors and Surveyors available in Ketchikan.
AIRPORT: Small charter plane only. Jet to Juneau and Seattle via Ketchikan Airport only.
EMERGENCY CO-ORDINATION CENTRE: At Ketchikan.
BANKS: National Bank of Alaska.
STORING: See "Prelims".

1. By truck.
2. Yes.
3. Yes.
4. Yes.
5. None.
6. Yes.

DEVELOPMENTS: New state ferry pier under construction.
AUTHORITY: Port of Metlakatla, P.O.Box 8, Metlakatla, Alaska 99926. *Tel:* 886 – 4646. *Contact:* Bruce Guthrie, Harbour Master. *Tel:* 886 - 3531 (Residence).

MIAMI, Florida: 25.46 N. 80.10 W. **(See Plan)**

PORT LIMITS: The Miami Harbour embraces the artificial basins, slips and channels that have been dredged along the bay front of Miami and in the bay and through the shoal water of Biscayne Bay to the ocean, and is located generally at Lat. 25° 46′ N., Long. 80° 10′ W.
Administration: The Port of Miami is a "non-operating" port, taxpayer-owned and administered by the Seaport Department, a function of Metropolitan Dade County Government. Permanent facilities are leased to port users and operators. All equipment (except the gantry cranes) is owned and operated by private companies. The gantries are lease operated under Seaport Control. Berth space is authorised by the Port Director, and scheduled by Seaport Operations. The U.S. Coast Guard serves as Captain of the Harbour.
Physical:
Total port land area: 600 acres (242.83 hectares).
Dodge Island: 300 acres (121.41 hectares).
Lummus Island: 300 acres (121.41 hectares).
Total lineal dimension: 30,000 ft. (9.144 km.).
Bulkhead berth space: 11,510 ft. (2.18 miles) (3.51 km.).
Container berth: 3,000 ft. (914.4 m.) piling-supported concrete.
Lineal balance 17,635 ft. (3.34 miles) (5.38 km.) under development.
Dodge and Lummus Islands connected by two-lane partial, temporary connecting causeway.
DOCUMENTS:
Customs: All foreign and "in bond" goods entering the Port/Country are subject to Customs examination and duty. Manifest of foreign cargo inbound must be presented to the Customs Boarding Officer prior to commencing discharge.

Ship's Agent must notify Customs 2 hours prior to the ship's arrival. Regular working hours, Monday through Saturday 0800 – 1700 telephone 536-5261. Outside normal working hours, telephone contact 526-2305; overtime is charged.
Forms required:

2 Master's Oath on Entry of Vessel in Foreign Trade	Form 1300
2 General Declaration	Form 1301
2 Ships Manifests	Form 1302
2 Ship's Stores Declaration	Form 1303
2 Crews' Effects Declaration	Form 1304
Crew Members' Declaration (1 Declaration for each Crew member)	Form 5129
1 Application – Permit – Special Licence (Unloading, loading, overtime services)	Form 3171
2 Passenger Lists	Form I – 418
2 Crew Lists	Form I – 418
Customs Declaration (Passengers) (1 Declaration for each family)	Form 6059 – B
2 Declarations of foreign repair to vessels (U.S. flag vessels only)	Form 226

Immigration: An Immigration Inspector will meet all ships entering port. Valid travel documents/passport/visa/entry permit are required in some cases.

Ship's Agent must notify Immigration at least 1 hour prior to ship's arrival. Regular working hours, Monday through Friday 0800 – 1630 telephone 350 – 5739. Outside normal working hours, telephone contact 526 – 2626; overtime is charged.
Forms required:

Crewmen's Landing Permit	Form I – 95
Alien Passengers' Landing Permit	Form I – 94
Passenger List	I – 418
Crew List	I – 418

PILOTAGE: All vessels with a draft of 7 ft. or more are required to take a Pilot who boards near the Outer Sea Buoy, 2.5 miles offshore.

Request Pilot through Biscayne Bay Pilots Association, 24 hours in advance, call sign KGW 303, VHF Channel 16, direct from ship or through vessel's steamship Agent accompanied by particulars of draft and berthing assignment. Ship to confirm on VHF Channel 16 one hour prior to arrival. Channel 16 is monitored 24 hours and station can monitor VHF Channels 10, 12 and 14. Ship may cable pilot station direct through RCA Radio Lantana, Florida, call sign, Miami Pilots. Estimated time of departure should be made when ship docks and must be confirmed by phone (375-9453) 1 hour prior to the Pilot boarding.

ANCHORAGES: The prescribed anchorage area for vessels anchoring outside the harbour is located Eastward of a line about 1.5 nautical miles offshore and Northward of a line about 0.2 miles nautical miles North of the sea buoy at the entrance to the ship channel. The entire anchorage area lies North of the entrance channel to Miami. The Northern and Southern extremities of this area are marked by spar buoys. Vessels desiring to anchor off the entrance to the Harbour of Miami are required to do so within this area, to avoid possible damage to cables laid on the ocean bottom in the vicinity. Refer to anchorage area 202.188 on Coast and Geodetic Survey Chart No. 547.

RESTRICTIONS: *Locations:* Main Turning Basin: Lat. 25° 47′ N., Long. 80° 11′ W. Sea Buoy and Channel Entrance: Lat. 25° 46′ N., Long. 80° 06′ W. (approx.).

Channels, Turning Basins: The main channel is marked by 2 sea buoys about 2 miles (3.38 km.) East of the port, at the Western fringe of Gulf Stream shipping lanes. From that point, at which the depth is 40 ft. (12.19 m.), the channel runs 1.02 miles (1.65 km.) at 256° magnetic to a bend, changing to a control depth of 38 ft. (11.58 m.) and turning to 296° for 3.64 miles (5.82 km.), terminating in a 1,700 ft. (518.16 m.) (along North-South axis) by 1,650 ft. (502.92 m.) (East-West) turning basin. MLW depth in the main channel, at Northside berths and in the turning basin, is 36 ft. (10.96 m.). At a distance of 1.3 miles (2.08 km.) from the entrance channel bend at the outer bar cut, the Fisherman's Channel (South Channel) branches off due West for 1.01 miles (2.69 km.), then turns parallel to the main channel for another 1.01 miles, then turns to 247° for 1,500 ft. (467 m.) to intersect the Intracoastal Waterway. Depth along the entire Fisherman's Channel is 25 ft. (7.62 m.), except for the Easternmost 3,300 ft. (975.36 m.), where it is 38 ft. deep. Width of the main channel is 400 ft. (121.92 m.) from the sea buoys, for 3.65 miles (5.84 km.), and 900 ft. (247.32 m.) wide along Dodge Island and into the main turning basin. Width of Fisherman's Channel is 500 ft. (152.4 m.) along its entire length.

MAX. SIZE: No limit to length at port complex. Dodge Island has 4,300 ft. (1,310.64 m.) of lineal berthing space for general cargo, quarter ramp and side ramp vessels plus 4,740 ft. (1,444.75 m.) for 10 Ro-Ro berths at MLW depths from 25 ft. (7.62 m.) to 36 ft. (10.97 m.). Lummus Island container berth has 3,500 ft. (1066.8 m.) of berthing with a MLW depth of 42 ft. (12.80 m.).

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.

Ship's Agent must request quick clearance, "Pratique", from United States Public Health Department.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

An Agriculture inspector will board all foreign, coastwise and domestic ships on arrival.

Ship's Agent must notify Agriculture at least 1 hour prior to ship's arrival. Regular working hours, Monday through Friday 0800 – 1630, telephone contact 536-4758. Outside normal working hours, telephone contact 526 – 2821; overtime is charged.

Forms required:

1 copy of Cargo Manifest.
1 Report of Ship's Stores and Port of Origin.

Forms provided by and filled out by the inspector:

Cargo Form 212
Boarding Report 288

RADIO/VHF: The Coast Guard and pilot station can be raised on VHF Channel 16. Telephone contact to Agents, receivers, etc., can be made via Miami Marine Operator.

Port of Miami maintains a guard on VHF Channel 16, call letters "KCE 254".

TUGS: Large tugs up to 3,000 h.p. available 24 hours per day. Request tug service via pilot station. Big tugs privately owned by Belcher Towing Company who work closely with Pilots. Smaller tugs available on Miami River and operated by Backus Towing Inc.

BERTHING: Berths are all marginal berths, no piers or slips. 9,040 ft. (2,755.40 m.) at MLW depths of 25 ft. (7.62 m.) and 36 ft. (10.97 m.). Dock aprons are 68 ft. (20.72 m.) wide. Large ships are able to turn at berthside in the 900 ft. (274.32 m.) wide main (North side) channel or may continue into the 1,700 ft. (518.16 m.) × 1,650 ft. (502.89 m.) turning basin. The new (Fisherman's Channel) South Channel is 500 ft. (152.40 m.) wide and 42 ft. (12.80m.) depth at the Eastern end for a distance of 3,200 ft. (975.36 m.) and continues Westerly at a depth of 25 ft. (7.62 m.) for its remaining 10,000 ft. (3,048 m.) with 3 turning basins: one at the confluence with the main channel, one midway and one (under construction) at the Western junction with the Intracoastal Waterway. There are 10 Ro-Ro berths for bow and stern loading vessels. Lummus Island container berth at port's Eastern end is 3,500 ft. (1066.8 m.) long with a MLW depth of 38 ft. (11.58 m.).

Gear and Heavy Lift Equipment: 8 shipside cranes, all truck-mounted, rubber-tyred with outriggers, capacity 2×140 tons; 2×150 tons, 1×165 tons, 1×180 tons and 2×200 tons; 20 container movers ("port packers") to 85 tons, 4×35 ton forklifts, 12 forklifts from 15 to 31 ton capacities, and about 125 smaller forklifts from 3,000 lb. to 30,000 lb. capacities.

Cruise Ship Piers: Marginal berthing for 12 cruise ships, each with modern air-conditioned passenger lounge and Custom Inspection areas.

Container Handling: 3×40 long ton (with telescoping spreader for 20 ft. and 40 ft. containers; 45 long ton under hook) gantry cranes with 130 ft. outreach and 85 ft. vertical clearance over apron. Duty cycle 40 per hour and 3×50 long ton (with telescoping spreader for 20 ft., 40 ft and 45 ft. containers with 60 ft. clearance between legs; 70 long tons under hook) gantry cranes with 151.5 ft. outreach and 85 ft. backreach with 100 ft. vertical clearance over apron. Duty cycle 45 per hour. All 6 cranes service a 3,500 ft. (1066.8 m.) concrete container berth at the Easternmost end of Fisherman's (South) Channel, just 2.3 miles (3.7 km.) from ocean shipping lanes, with a MLW depth of 38 ft.

Cold Storage Cargo: Current port facilities provide in excess of 15,000 sq.ft. of refrigerated space. In addition, there are approximately 300 reefer outlets throughout the port.

Commercial Warehouses: Ample on the mainland. On Port, 81,754 sq.m. in 7 modern transit cargo buildings.

BRIDGES: There are no bridges between the open sea and the port, or the Miami River. The new South Channel provides direct access from shipping lanes and the river, as well as all berthing on the seaport's South side. A highway and rail bridge spans the Intracoastal Waterway between the island seaport and the mainland, and is manned 24 hours per day. It is primarily used for pleasure craft. The bridge maintains a guard on VHF Channel 16, call letters KCE 254. Only smaller ships enter the Miami River, which is dredged to 15 ft. at HW and is 150 ft. wide for a distance of 3 miles above entrance. A bridge about 0.5 miles from entrance is closed from 0700 hrs. to 0900 hrs. and 1600 hrs. to 1800 hrs. local time.

STEVEDORES: All receiving, recording, moving, loading and discharge of cargo is performed by the stevedoring companies. They employ longshoremen members of the International Longshoremen's Association (I.L.A.). Normal working hours 0800 – 1700. Overtime is charged for Saturdays, Sundays, and holidays. Port open 24 hours per day.

MEDICAL: Clinic available.

TANKERS: No slop (residue) discharge facilities in the Port.

Private facility: Belcher Oil Company, Fisher Island – No slop (residue) discharge facilities. One tanker berth available, 760 ft. Max. draft of 34 ft. at MLW. No special fittings required. Telephone contact 672-1065.

Report: Cautionary Advice – Approaches: All approaches to the Sea Buoy should be made from the East to avoid shoal areas to the North and South of the Entrance Channel. The Gulf Stream current running to the North may be felt just outside the Sea Buoy. A counter current usually sets to the South in the vicinity of the Sea Buoy and Southbound traffic is usually encountered 1 mile off the Sea Buoy.

Miami has numerous passenger ships calling at this port. Most movements between Sea Buoy and berths take place between 0500 to 0700 hrs. and again at about 1700 hrs.

Care must be taken to carefully identify each navigation light to avoid mistaken identity with bright lights along the coast.

Vessels may anchor to the Northward of the Sea Buoy outside the 50 ft. depth line.

Entering and Berthing: Vessel should have full manoeuvring power available and competent helmsman at the wheel. The currents around Fisher Island are strong (3 to 4 knots reported), and the ebb tide runs from a direction of 270° at the berth to approximately 300° in the Main Channel. Ranges and buoys are used to identify channel limits. The Outer Channel is 500 ft. wide and the Main Channel starting between the jetties narrows to 400 ft. The distance between Sea Buoy and Fisher Island is 4.5 miles.

The draft of a tanker berthing at Fisher Island is limited due to depth limitation at the berth and just offshore of the bow and stern areas of a vessel in the berth. (See "Plan").

Berthing is limited to beginning of ebb tide period in order to take advantage of higher water level as well as to stem the outgoing tide. The ship is difficult to control in the Turning Basin off the berth with a strong current running. Unberthing is carried out during flood tide when current is weak.

The berth at Belcher Oil Terminal has a total berthing face of 700 ft. with a total of 8 pier bollards spaced 100 ft. apart. The ship berths port side to the pier.

Gangway: There is no pier gangway available. There is ample room on the pier deck for the ship's gangway.

FRESH WATER: Available every 240 ft. at Port of Miami, Dodge Island. Delivered via hose.

FUEL: All grades; bunker, intermediate and marine gas oil, Diesel, bunker C. Ships fuelled at dockside from Belcher Oil Co. barges.

All deliveries in both ports are made by barge.

FIRE PRECAUTIONS: Usual safety precautions on smoking, flying "B", mooring pendant available, ample persons aboard to fight fires, fire hose led out, etc.

Belcher Oil Company tugs equipped with fire fighting equipment.

SERVICES: All types of special services such as tank cleaning, compass adjusting, admeasurement, radar/radio repairs, rathometer repairs, etc., available.

SHORE LEAVE: Crew members are allowed ashore after clearance by Customs, Immigration and Quarantine.

IDENTIFICATION CARDS: Definitely needed in order to return to ship at night. A security guard at Port of Miami will check.

AUTHORITY: Port of Miami, 1015 North America Way, Miami, Florida 33132, U.S.A. *Tel:* (305) 371-7678. *Telex:* 493-1214 Port Mia. *FAX:* (305) 372-7918. *Contact:* Mr. Carmen J. Lunetta, Port Director.

MILWAUKEE, Wisconsin: 43.01 N. 87.53 W. (See Plan)

PORT LIMITS: The Port of Milwaukee limits are generally considered to be the harbour breakwall housing the harbour entrance lighthouse. However, unless specifically declared to the contrary in the covering charter party, a vessel will be considered an "arrived ship" upon anchoring outside the harbour breakwall, in the event that a proper berth and/or anchoring space inside the harbour breakwall is not available.

DOCUMENTS:

Vessels from Canadian ports:

Dominion clearance and Public Health Pratique (both issued at Montreal).

Vessels from all other nations:

Inward Foreign Manifest(s)
Stores Lists, over Master's oath.
Curio Lists, over Master's oath.
Permit to Lade and Unlade.
Discharge Manifest.
Inspection by U.S. Dept. of Immigration (Crew List).
Inspection by U.S. Dept of Agriculture.
Receipt of Entrance fee.
Receipt of Tonnage Tax.

Additional documents may be required, dependent on commodity involved in the carriage, point of origin, flag or any unusual circumstances existing.

PILOTAGE: Pilot boards at Montreal and at several other stations along St. Lawrence Seaway route.

ANCHORAGES: The chart does delineate anchorage area for large vessels and shows the 27 ft. depth just East of South Piers 1, 2, and Liquid Cargo Pier. This deep area, about 2,400 ft.×5,400 ft., used by large vessels for anchorage.

MAX. SIZE: 739 ft. × 75 ft. with 27 ft. draft. No tidal effect, although lake levels vary seasonally. Minimum depth above low water level 27 ft.

HEALTH: See "Health: All Ports" before first U.S. port (Albany). Illness Reports made to Chicago Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Radio station at City Heavy Lift Dock. Harbour Master and Dock Superintendent can be reached at this facility Monday through Friday between 0800 and 1630 hrs.; 156.8, 156.6 and 156.5 MHz.

TUGS: Normally pick up vessel inside breakwater. Tugs optional at discretion of ship's Master. Fee for use of tug's lines.

BERTHING: The time of passing harbour entrance lighthouse establishes order of berthing, provided vessel is ready to work.

BRIDGES: (Inner Harbour only) Bridges closed between 0730 and 0830 hrs. and 1630 and 1730 hrs. except on Sundays and 8 legal holidays. In addition, 2 hours' notice required for opening bridges across Milwaukee River North of and including Buffalo Street.

SPECIALISED CARGO HANDLING FACILITIES: In addition to the 3 general cargo terminals of approx. 340,000 sq. ft. covered area (9 berths), and dry bulk terminal, the port is served by a refrigerated warehouse of 10,000 sq. ft.; 1 open dock area (2 berths) for handling bulk commodities such as pig iron; 1 open dock (3 berths) for heavy lifts and equipped with a 220-ton stiff leg crane and 2 gantry cranes of 70 and 50 tons; 1 liquid cargo pier for edible and inedible fats, greases and tallow; 2 grain elevators of 3.5 million and 2.5 million bushel capacity and 2 scrap iron loading facilities. The port is also equipped with a mobile heavy lift/container crane, of 200 tons capacity, capable of serving all berths.

STEVEDORES: Vessel should provide a stowage plan, manifest of inbound cargo and exceptions list (unusual vessel or cargo characteristics affecting facilitation of cargoes). Vessel should comply with the U.S. Dept. of Labor's safety regulations.

MEDICAL: Advance notice desirable. Hospitalisation available.

TANKERS: Diameter of load lines and discharge lines 8 in. and 10 in. Slop residue facilities. 4 berths available, with draft to seaway depth.

FRESH WATER: Potable water available at most berthing areas.

FUEL: All grades of fuel oil available by truck delivery at shipside, also 24 hour refueling berths available for bunkering.

CONSULS: The following countries are represented:

Belgium
Costa Rica
Denmark
Dominican Republic
France
Nicaragua
Norway
Sweden
Yugoslavia

REPAIRS: Full service repairs, except large vessel dry docking.

GANGWAY/DECK WATCHMEN: Not necessary, but available on request.

OPENING/CLOSING HATCHES: At the option of ship.

CERTIFICATES:

Registry of Ship.
Master's Licence.
1st, 2nd and 3rd Officer's Licences.
Radio Licence.
Wireless Operator's Licence.
Derat Certificate (done each year).

(Additional certificates may be required, dependent upon Registry, cargo, trade route engaged in, nationality of crew, etc.).

CUSTOMS ALLOWANCES: Tobacco, 10 packages or 200 cigarettes in possession at any time. Wine and/or Spirits, 1 bottle per officer.

REPATRIATION: Local Agents effect repatriation.

AIRPORT: 5 miles distant.

TIME: U.S.A. Central Time. Central Daylight Time from early April to late October – 5 hours behind GMT. Central Standard Time from late October to early April – 6 hours behind GMT.

HOLIDAYS: Memorial Day, Columbus Day, Veterans Day, July 4th (if on a Sunday, Monday is a holiday); First Monday in September; Fourth Thursday in November; Christmas Day; New Year's Day. Cargo can be worked on these days at holiday pay.

POLICE/AMBULANCE/FIRE: Police – non-emergencies Tel: 273-8680. Emergency, including emergency ambulance service Tel: 765-2323. Fire, including rescue squad service Tel: 347-2323.

TELEPHONES: Can be arranged, but unnecessary because sufficient phones available in dockside offices.
SHORE LEAVE: Crew allowed ashore.
IDENTIFICATION CARDS: U.S. Immigration rules.
DELAYS: No delay.
DEVELOPMENTS: Full service Seamen's Club operational in Port. Milwaukee inner harbour berth for maximum size bulk vessels undergoing comprehensive site enhancement.
GENERAL: Chandlery services for foodstuffs, ship complements and laundry services available. Garbage and waste disposal are available through private operators, chandler usually making the arrangements.

The Liquid Cargo Pier is also available for non-petroleum liquid cargoes and vessel bunkering.
AUTHORITY: Port of Milwaukee, 500 North Harbor Drive, Milwaukee, Wisconsin 53202, U.S.A. *Tel:* (414) 278-3511. *Telex:* TWX 910-262-3042. *Cables:* Milharcomil. *Contact:* Kenneth J. Szallai, Municipal Port Director.

MOBILE, Alabama: 30.40 N. 88.02 W. (See Plan)

DOCUMENTS:
3 copies Cargo Manifest (Form 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (curio list).
2 copies Stores List.
2 copies Passenger List (Form I.418).
2 copies Crew List (Form I.418).
Customs Boarding Officer will also examine Ship's Register and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:
Health Pratique.
Master's Oath (Form 1300).
All foreign clearances.
U.S. Certificates of Payment of Tonnage Tax (Customs Form 1002).
Certified Crew List.
PILOTAGE: Pilotage is compulsory.
ANCHORAGES: If berth is congested, vessel may anchor at the bar (35 miles from harbour).
RESTRICTIONS: Controlling depth: 40 ft. for entrance, channel and anchorages. Mean tidal range 1.5 ft. Nature of bottom: soft mud. Vessel can dock and sail at any hour at any stage of the tide.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: There are 7 tugs, available 24 hours, with max. 2,600 h.p.
BERTHING: There are 34 berths at most of which, direct loading or unloading can be effected from quayside tracks. Ro/Ro berth available.
Public Grain Elevator: Depth alongside 40 ft. Loading rate 115,000 bushels/hour for grain. Grain received by rail, truck and barge.
McDuffie Terminals: 2 berths. No. 2 with dolphins, total length 320 m., No. 1 length 170 m. Bulk coal handling plant, depth alongside the berth is 45 ft. Shiploaders can load over 4,000 t.p.h. or 7,000 t.p.h. combined. 3 stacker/reclaimers can handle 4,000 t.p.h., one tipple for rail cars which can dump 30 cars per hour and one tipple that can dump 60 cars per hour, rated at 4,000 t.p.h. and 3 barge unloaders that work 3,500 t.p.h. each. A conveyor belt system connects the entire complex.
Bulk Handling Plant: 2 berths, depth alongside 40 ft. Total quay length 1,500 ft. 2 unloading towers which can unload 3,000 t.p.h. and 2 loading conveyors, rate 2,000 t.p.h.

Depth alongside other public berths as follows:

Pier 2	38 ft. MLW	Pier River End B	38 ft. MLW
Pier 3	38 ft. MLW	North Pier B 1	40 ft. MLW
Pier 4	38 ft. MLW	Pier North B 2	40 ft. MLW
Pier 5	38 ft. MLW	Pier North B 3	40 ft. MLW
Pier 6	38 ft. MLW	Pier South C1	41 ft. MLW
Pier 7	38 ft. MLW	Pier South C 2	41 ft. MLW
Pier 8	38 ft. MLW	Pier South C 3	41 ft. MLW
Pier South A	37 ft. MLW	Pier River End C	38 ft. MLW
Pier River End A	30 ft. MLW	Pier North C 1	39 ft. MLW
Pier North A 1	38 ft. MLW	Pier North C 2	37 ft. MLW
Pier North A 2	38 ft. MLW	Pier D Cold Storage	37 ft. MLW
Pier North A 33	38 ft. MLW	Berth 1 tipple	Under repair
Pier South B 1	41 ft. MLW		
Pier South B 2	41 ft. MLW	Berth 2 tipple	44 ft. MLW
Pier South B 3	41 ft. MLW	Berth 3 tipple	40 ft. MLW

CRANES: 1,600 ton capacity (1,200 tons at 208 ft.) crane, 75 ton stationary crane, 50 ton mobile crane and 80 ton floating crane.
SPECIALISED CARGO-HANDLING FACILITIES: Container berth, length 894 ft., equipped with 1×45 ton lift capacity crane.

1 Ro/Ro berth at Pier A.
STEVEDORES: Normal working hours for the port are 0800/1700 hrs. Monday through Friday.
TANKERS: Max. length 950 ft. restricted by turning basin. American Bituminals & Asphalt Co. – Jetty berth dredged to 38 ft.
Magazine Point: Hess Terminal: Jetty berth dredged to 43 ft.
FRESH WATER: Available ex-wharf at all berths.
FUEL: Most grades fuel/diesel available via pipe-line, barge or truck.
DENSITY: 1000 (Fresh Water).
REPAIRS: *Atlantic Marine, Inc.* – Dry Docks ranging from 5,000 to 18,000 tons displacement all serviced by 51 ton gantries. Dock length range from 380 ft. to 620 ft. Also available is a 70 ton floating crane. Any type of repair can be effected.
Bender Ship Repair. 1 dry dock of 2,500 tons displacement. Majority of repair work is top-side. 100 ton floating crane available.
CUSTOMS ALLOWANCES: At the discretion of customs officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.
HOLIDAYS: Normally no work is performed on New Year's Day, Easter, July 4th, Labour Day, Christmas Eve (1200 hrs.–2400 hrs.), Christmas Day and New Year's Eve (1200 hrs.–2400 hrs.). Working holidays are New Year's Eve (0001 hrs.–1200 hrs.), Martin Luther King's Birthday Holiday, Mardi Gras Day, Monday after Easter, Veteran's Day, Thanksgiving Day and Christmas Eve (0001 hrs.–1200 hrs.).
IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95, issued for the same vessel.
DEVELOPMENTS: The 400 ft. wide ship channel was recently dredged to 45 ft. and to be dredged at a later stage to 55 ft. with a width of 550 ft.

The Alabama State Docks is currently involved in a $25 million capital improvement program, which will upgrade the general cargo warehousing and docking facilities. A 365,000 sq.ft. forest products warehouse and steel and heavy lift berth is presently being built to better serve dock customers. A 14 acre waterfront site was recently purchased and renovated providing a 1,400 ft. pier system, open storage area and a 175,000 sq.ft. warehouse.
AUTHORITY: Port of Mobile, Alabama State Docks Department, P.O.Box 1588, Mobile, Alabama 36633, U.S.A. *Tel:* (205) 690-6047. *Telex:* TWX 810 – 741 – 7748. *FAX:* (205) 432-5328. *Contact:* E.G. Browning, Jr., General Manager, Market Development.

MOREHEAD CITY, N. Carolina: 34.43 N. 76.42 W. (See Plan)

DOCUMENTS:
3 copies Cargo Manifest (Form 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (Curio List).
2 copies Passenger List (Form I-418).
2 copies Crew List (Form I-418).
Customs Boarding Officer will also examine Ship's Register and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:
Health Pratique.
Master's Oath (Form 1300).
All Foreign Clearances.
U.S. Certificates of Payment of Tonnage Tax (Customs Form 1022).
Certified Crew List.
PILOTAGE: Pilots obtained from Morehead City Pilots' Association, Morehead City, North Carolina 28557. Tel: 919-726-6134.

The Port Terminal at Morehead City is 3.5 miles from the Sea Buoy. The port is located on the Intracoastal Waterway and is situated 75 miles S.W. of Cape Hatteras and 14 miles West of Cape Lookout.

Pilots should be given 24 hours notice and then contacted by VHF Channel 16 about 2 hours before arrival at Sea Buoy R "2BI".

Pilot boat is about 40 ft. long, with white hull and superstructure; the hull is marked with "Pilot" in black letters on both sides.
RESTRICTIONS: The channel at Morehead City is maintained at a controlled depth of 40 ft. – MLW.

The East Turning Basin has a depth of 42 ft. and the West Turning Basin has a depth of 35 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to New York Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available. Service provided by Carteret Towing Co. Inc., Radio Island, Morehead City, North Carolina 28557. Tel: 919-726-5440.
BERTHING: The wharf is 5,250 ft. long. This length enables the port to provide berths for 10 × 500 ft. general cargo ships and 1 petroleum tanker at any given time.

Adjacent to the general cargo dock area is a 1,000 ft. deep water berth for out-loading through the bulk handling facility.

The wharf is constructed of concrete and steel and has marginal tracks and crossovers for full length. Truck ramps are located at various points for easy Roll-on/Roll-off access.

Morehead City also provides a barge terminal with 1,200 ft. of modern berths. This terminal was developed as a part of the bulk handling facilities, but is also used for the loading or off-loading of a variety of cargoes.
Bulk Handling Facilities: 6,000,000 ton annual capacity bulk facility for receipt, conveyance, storage and shipment of bulk cargoes. Loading capacity 3,000 t.p.h. Storage capacity 225,000 tons (used mainly for phosphate).

Woodchip handling facility which can outload 1,000 s/tons per hour, annual capacity one million tons.
CRANES: 2×115 ton capacity gantry cranes with container handling capability.
FUEL: Available from Colonial Oil and Texaco Inc.
CONSULS: Royal Norwegian Consulate, Wilmington, North Carolina 28402. Tel: 919-763-8271
SURVEYORS: Saybolt, Lloyd's, S.G.S. and National Cargo Bureau.
REPATRIATION: This is possible but should be avoided as there is no Immigration Office. Closest airport is about 1 hour's drive from the town.

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours from first Sunday in April till last Sunday in October.
SERVICES: There are no shipyards in the port. Service on any kind of electronic equipment is not available.
IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95, issued for the same vessel.
AUTHORITY: North Carolina State Ports Authority, P.O.Drawer 829, Morehead City, North Carolina 28557. *Tel:* (919) 726-3158. *Telex:* 510 924-2983. *FAX:* (919) 726-1943. *Contact:* Robert D. McMahan, General Manager.

MYRTLE GROVE (incl. Davant), Louisiana: 29.38 N. 89.57 W.

LOCATION: West Bank of Mississippi River, about 82 miles (via Southwest Pass) from sea (at Mile 61.5 above Head of Passes).
DOCUMENTS/PILOTAGE: For all general information refer to "New Orleans".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Minimum of 2 tugs required for berthing and unberthing. Additional tugs at Elevator Management's discretion.
BERTHING: *Mississippi River Grain Inc.:* Distance between bollards 1,000 ft., alongside 500 ft. dock, depth 48 ft. (consistent with Southwest Pass). Loading rates, 80,000 to 120,000 bushels per hour.
Loading Spouts: 4 spouts in use with 1 additional planned. Total distance between 5 spouts after completion (pivot to pivot) 500 ft.
International Marine Terminal: Max. LOA 290 m. Max. draft 12.2 m. Max. beam 48 m. Berth length 312 m. Length of travel of loader 244 m. One loading spout. Max. loading rate for coal 9,000 tonnes per hour.
Davant:
Electro Coal Transfer Corporation: Terminal located 55 miles above Head of Passes opposite Myrtle Grove. Total length of dock 3,000 ft. Channel depth 12.19 m. Depth alongside 18.0 m. One fixed loader, rate 4,840 tonnes per hour and one travelling loader, rate 6,000 tonnes per hour.

There is to be a Topping-Off operation 2 miles from the S.W. Pass entrance using 4×600 t.p.h. cranes mounted on a 38,000 d.w.t. ocean-going barge.
DENSITY: Fresh Water (1000).
FRESH WATER: Not available.
FUEL: Not available.
AUTHORITY: Plaquemines Port, Harbour and Terminal District, Woodlawn Building, Rt.1, Box 53A, Braithwaite, Louisiana 70040. *Tel:* (504) 682-0081.

Mississippi River Grain, Inc., Main Office: Suite 2730, Energy Centre, 1100 Poydras St., New Orleans, Louisiana, 70163-2730. *Tel:* (504) 582-2200. *FAX:* (504) 682-0081, ext. 2444. *Contact:* H. Benvenutti, Port Director.

Myrtle Grove Elevator, Rt. 1-Box 606, Belle Chase, Louisiana 70037. *Tel:* (504) 656-2212. *Telex:* 209330. *Contact:* Wayne McCalla, Elevator Superintendent. J. T. Dugas, Traffic Manager.

NAWILIWILI, Hawaii (including Port Allen): 21.57 N. 159.21 W. (See Plan)

DOCUMENTS:
4 Crew Lists.
4 Passenger Lists.
Customs Documents.
Clearance, Travelling Manifest.
Local Manifests.
Health Documents.
Bill of Health and Vaccination Certificates.
4 Manifests.
4 Bills of Lading.
Ship's Papers.
Certificate of Registration or Enrolment.
Annual Inspection Certificate.
Load Line Certificate.
Derat Certificate.
Drinking Water Certificate.
Radio Certificate and Licence.
4 Stores Lists.

PILOTAGE: Vessel's Agent orders Pilot 48 hours in advance by telephone, correcting ETA as necessary with 4 hours final notice if a last minute change occurs. Tug-boat *"H. A. Walker"* serves as pilot boat for Nawiliwili and Port Allen, 75 ft. long, black hull, white house, topsides red. Radio telephone within 1 hour of arrival and while tug is working. Channels 12, 16 and 18. "WYB 8343". Pilot boards 1 mile East of Nawiliwili and 0.5 miles South of Port Allen. Signals in accordance with International Code.
ANCHORAGES: *Nawiliwili:* Between Nawiliwili Light and Carters Poin in 5 – 9 fathoms. Not good in strong trade-wind weather. Fair holding ground. Not recommended.

Port Allen: 0.5 miles South of Port Allen Breakwater Light in 5 – 10 fathoms. Fair holding ground. Untenable in Kona or S.W. storms which occur from November to March.
RESTRICTIONS: 24 hours notice of arrival is obligatory. Nawiliwili: Arrivals sunrise, departures sunset time. From October 21 to March 21 Pilot boards at 0630 hrs. Balance of year 0600 hrs. Port Allen: No time restrictions.
MAX. SIZE: *Nawiliwili:* Length 687 ft., draft 32 ft. 6 in.

Port Allen: Length 687 ft., draft 32 ft. on North side and 28 ft. on South side. Pier is 600 ft. long, so larger vessels overhang.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Honolulu Quarantine Station.
RADIO: Communicate through RCA or ITT stations in Honolulu. Also KQM marine operator for radio telephone and telephone to Kauai.
TUGS: One 1,500 h.p. tug meets vessels off port and in outer harbour. Both ship's lines and/or tug's line may be used. Has radio telephone, "WBY 8343" and Channel 12 is usually used. Extra tugs available from Honolulu.
BERTHING: Limited to 1 large vessel at Nawiliwili and 1 at Port Allen. Considerable barge traffic. Prior reservations by Agent necessary with District Manager. Berth conflicts usually solved in Honolulu by rerouting of Island ports.

New Ro/Ro barge facility at Pier 1.
CARGO HANDLING FACILITIES: Nawiliwili has 2 sugar loading gantries on Pier 2; no equipment or storage to handle grain, ore, coal, sulphur. Fertiliser is discharged by self-unloading barge, and the bulk hauled away via truck. There is a container yard but no facilities to off-load containers. Weekly service is by a self-unloader. Roll-on/Roll-off cargo is moved on ramps furnished by barges. LPG and petroleum product lines are privately owned.
STEVEDORES: All stevedoring by McCabe Hamilton and Renny Co. Ltd., with headquarters in Honolulu and branches in outports. 48 hours notice by Agent for labour and equipment. Inward cargo is containers, general, bulk fertiliser, petroleum products, and building and construction materials. Outward is raw sugar, general and molasses. Foreign vessels are subject to heavy fines for carrying stevedore gear inter-island without Customs Clearance.
MEDICAL: 2 hospitals on Kauai with 2 doctors under contract to United States Public Health Service. Standard international inoculations and vaccination required. Advance notice by Agent desirable but not necessary.
TANKERS: All piers have pipe-line connections for incoming cargo and outgoing molasses. Fuel oil 10 in., molasses 10 in., water line 6 in., gasoline, kerosene and diesel 8 in. These are the main lines under the wharves. Hose connections to ships vary with the type of riser and hose so size of fittings should be checked with Agent. No slop discharge facilities available. 4 tanker berths available.
DENSITY: Varies from full salt to brackish in periods of heavy rainfall with freshets in the streams. No specifics available.
FRESH WATER: Available from 2 in. dock hydrants via ship's hose. About 100 gallons per minute.
FUEL: Bunker C not available for large vessels. Diesel fuel available via tank truck with 6 hours notice. Weekend and holidays order previous day.
CONSULS: All in Honolulu.
REPAIRS: Light machine shop, welding and burning and pipe work available. Plantations may do some heavy repairs if part can be sent to their shop. Their engineers are helpful in emergencies. Heavy or technical repairs must be done in Honolulu.
GANGWAY/DECK WATCHMEN: Tankers discharging gasoline required to have uniformed dock watchman. Usually off duty policeman. All ships provide own gangway and deck watch.
OPENING/CLOSING HATCHES: Normally done by stevedores. A few foreign ships prefer doing it with own crew.
CUSTOMS ALLOWANCES: 200 cigarettes, 50 cigars per man, and one bottle, U.S. quart, wine or spirits.
REPATRIATION: Agent can arrange by air via Honolulu. Immigration clearance necessary.
AIRPORT: Lihue is 3 miles from Nawiliwili and 20 miles from Port Allen; served by inter-island regular carriers. Numerous lines, and charter flights available.
TIME: GMT minus 10 hours, all year round.
HOLIDAYS: National: New Year's Day (January 1st); President's Day (February 22nd); Memorial Day (May 30th); July 4th; Labour Day (first Monday in September); Election Day (first Tuesday in November); Veteran's Day (November 11th); Thanksgiving Day and Christmas Day (December 25th). Cargo can be worked but at penalty rates.
POLICE/AMBULANCE/FIRE: Emergency calls – Dial 911 for all services, or dial "O" for operator.
EMERGENCY CO-ORDINATION CENTRE: Coast Guard Search Rescue Centre, Tel: 245-4521.
TELEPHONES: Arrangements by Agent.
SHORE LEAVE: Permitted after Immigration check. Eastern Bloc visitors may be restricted.
IDENTIFICATION CARDS: Desirable but not required by law.
DEVELOPMENTS: Turning basin may be enlarged to handle liners and large bulkers. Project depth 35 ft.
AUTHORITY: State of Hawaii, Department of Transport, Harbours Division, P.O.Box 946, Lihue, Kauai, Hawaii 96766, U.S.A. *Tel:* (808 245-6996. *Contact:* Charles E. Scharsch, Harbour District Manager.

AGENT: See "Honolulu".

NEW BEDFORD, Massachusetts: 41.38 N. 70.55 W. (See Plan)

DOCUMENTS: See "Boston".

PILOTAGE: Compulsory. 3 Massachusetts State Pilots available, ordered through Agent. VHF Channel 16 monitored. Pilot on station only after 12 hours notice. Small pilot vessel with basic communication equipment. Pilots board all vessels at Buzzards Bay Buoy at the entrance to New Bedford Outer Harbour situated at Lat. 41° 30′ 42″ N., Long. 70° 50′ 07″ W.

ANCHORAGE: It is recommended that vessels delayed due to weather, etc., anchor 0.5 miles South of Buzzard's Bay Bell Buoy.

RESTRICTIONS: A modern harbour approach begins at Buzzard's Bay Buoy and runs a straight course of 7.5 miles direct to the pier facilities. The channel is 350 ft. wide and has a depth of 30 ft. MLW. The channel leads into a moderate size (1,000 yd.) turning basin.

Hurricane dyke barrier gate 150 ft. wide with depth of 30 ft. MLW.

MAX. SIZE: 700 ft. length. Vessels over 30 ft. draft restricted by tides.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

HEALTH: See "Health: All Ports" before first U.S. port (Albany). Illness Reports made to New York Quarantine Station.

RADIO: RCA Chatham Radio, New Bedford Marine Operator for VHF, and Boston Marine Operator for ship to shore frequencies.

VHF: Pilot vessel on Channels 16 and 13. Pilot office on Channels 16 and 18A.

TUGS: Tugs join vessel in inner harbour. Tug lines used. 2 tugs available. Tugs are not normally used at the State Pier in docking and undocking of deep-water vessels. The large turning harbour basin, the wind-sheltered position of the pier and lack of tidal current minimise use of tugs. In extreme weather conditions tugs are used.

BERTHING: At State Pier, berthing space for 3 ships:

North side 600 ft. length, South side 775 ft. length, East side 450 ft. length.

Depth of water at all berths is 30 ft. MLW.

Maritime Terminal, depth 27 ft.

BRIDGES: Passage to upper reaches of harbour to Maritime Terminal requires navigation through the New Bedford and Fairhaven Bridge only in daylight for larger vessels over 250 ft. length.

STEVEDORES: 24 hour notice required for New Bedford Stevedoring Corporation to prepare gear. 25 tons discharged or loaded per hour as average production per gang. Nearly all cargoes handled.

MEDICAL: 24 hours notice required. Excellent hospital facilities available.

DENSITY: Static, since tidal variations light. Density same as ocean water.

FRESH WATER: Fresh water available.

FUEL: All types available, to be ordered in advance.

CONSULS: Most Consuls available in Boston, 50 miles or 1 hour away.

REPAIRS: All types of minor ship repairs available.

GANGWAY/DECK WATCHMEN: Watchmen available. Non police or police.

OPENING/CLOSING HATCHES: Depends on negotiated contract and cargo handled.

CUSTOMS ALLOWANCES: Designated by U.S. Customs with regard to particular circumstances.

REPATRIATION: Agent can handle formalities.

AIRPORT: 3 airports within 1 hour's drive. All international services.

HOLIDAYS: New Year's Day (January 1st); Washington's Birthday (February 22nd); Patriot's Day (April 19th); Memorial Day (May 30th); Independence Day (July 4th); Labor Day (first Monday in September); Columbus Day (October 12th); Veterans' Day (November 11th); Thanksgiving Day (last Thursday in November); Christmas Day (December 25th).

TELEPHONES: No telephones on board, but exist adjacent to pier.

SERVICES: All services can be obtained if required.

SHORE LEAVE: If U.S. Immigration has cleared crew member, he is allowed ashore.

SHIPMASTER'S REPORT: December 1982.

Documents: See "Boston"

Pilotage: Compulsory. Pilot boards at "BB" in Buzzards Bay. Advise Agent 6 hours prior to arrival.

Restrictions: Vessels enter and leave on rising tide during daylight hours. The approach is hazardous as vessel has to pass through hurricane barrier (width 150 ft.) and swing bridge (width 94 ft.).

Max. Size: LOA. 600 ft. Beam 85 ft. Draft 25 ft. Underkeel clearance of 5 ft. required in channel. Mean tidal range 3 ft.

Radio: Chatham Radio.

Tugs: 3 tugs available (2,000 h.p.). 2 tugs are normally sufficient for berthing/unberthing.

VHF: Pilot on VHF Channel 16.

Berthing: Maritime Terminal Wharf: Distance from "BB" Buoy to Berth is 9 miles. U.S. and U.K. Pilot Books indicate 30 ft. to 31 ft. at berth. Least depth in Channel from sea to berth 30 ft. Nature of bottom at berth – very soft mud. Density 1025. Good security. Palletised cargo and 20 ft. and 40 ft. containers handled. Ample storage space for containers.

Services: Fresh water, fresh provisions, limited repair facilities, Lloyd's Surveyors (at Boston), Salvage Surveyor (New York), laundry service, (Boston). Bunker fuel oil, diesel oil, lubricating oil, doctor, hospital, groceries and meats (Boston).

AUTHORITY: City of New Bedford, Harbor Development Commission, Pier 3, Wharfinger Building, New Bedford, Massachusetts 02740. Tel: (617) 993-1770. *Contact:* Martin Manley, Director.

NEW HAVEN, Connecticut: 41.14 N. 72.55 W. (See Plan)

DOCUMENTS: Refer to "New York".

PILOTAGE: Compulsory. State Pilots are available on a 24 hour basis and are usually arranged through the ship's Agent or directly by shipping companies. Pilot will board vessel in vicinity of New Haven Sea Buoy, marked "N.H." – short and long flash; black and white vertical stripes. Boarding will be from a 44 ft. steel launch named *New Haven Pilot* – blue hull with "Pilot" marked on both sides in white letters, or from a tug-boat. Contact can be made via VHF telephone, Channel 13 (156.65 MHz), Channel 16 (156.80 MHz), or Channel 19A (156.95 MHz).

Pilotage Association Report: The New Haven – Bridgeport Pilots maintain a tide gauge, from where they depart to meet vessels. The normal tidal range is 6 ft. They believe that 4 ft. of water in excess of the ship's deep draft is necessary for a safe transit. A rule of thumb, used by them, is 31 ft. on LW, and 37 ft. on HW. (For any variation of this, a Pilot should be consulted.) A normal transit time from the entrance buoy to any of the berths in the inner harbour is 45 minutes to 1 hour. Docking time of 30 minutes to 1 hour should be added to this average, dependent on where the ship is berthing, as well as possible weather conditions.

There was a maintenance dredging of New Haven Harbour, completed in 1983. The after-dredging survey submitted to them by the U.S. Army Corps of Engineers shows a controlling depth, with rock bottom of 35 ft. at MLW. This rock is located at South West Ledge Light at a point where a 35° turn is executed by the ship.

Prevailing winds are Westerly, and have a decided effect on the rise of tide. The tide gauge is the determining factor as to the time of entry when wind conditions do exist.

Advice from State of Connecticut, Department of Transportation:

Pilotage is compulsory for vessels transitting the waters of Long Island Sound via Block Island Sound bound to or from ports and harbours on Long Island Sound. Vessels bound for New Haven via Block Island/Long Island Sound usually board a Pilot at either the Point Judith Pilot Station (41° 17.2′ N., 71° 28.5′ W.; 2 miles South of the Point Judith R "2" whistle buoy), or the Montauk Pilot Station (41° 02′ N., 71° 42′ W.; 3 miles due East of Montauk whistle buoy Mo (A) "MP"). Some Block Island/Long Island Sound Pilots also serve as Pilots for New Haven. If a local harbour Pilot is to be boarded, he will usually board vessel in vicinity of New Haven Sea Buoy, marked "N H" – short and long flash; red and white vertical stripes.

ANCHORAGES: Vessels awaiting berth, and or tides, will find good anchorage up to 40 ft. draft within 1 mile S. – S.E. of the "N.H." Buoy.

APPROACHES: *From New York:*

Charts: 12339, 12366, 12367, 12363, 12354, 12371.

Vessels leaving New York bound for New Haven will be transiting New York's East River and Western Long Island Sound. All shoals and rocks are well marked and the close proximity to the shore line provides an excellent radar target for position checking. During Summer months, thick fog will present a hazard on this route. Long Island Sound is also a major yachting centre, so extreme care must be exercised while transiting this area.

There are numerous dangers to be wary of when making the passage from New York to New Haven. In order of approach they are:

1. East River and Hell Gate are areas of strong tidal currents averaging 4.6 knots for the ebb current which sets in a Southwesterly direction. Vessels drawing up to 35 ft. may transit Hell Gate at HWS only. Sluggish handling vessels should arrange for towboat assistance up the East River and through Hell Gate.
2. 26 ft. Buoy "32A" usually passed well clear to the South.
3. Cable and Anchor Reef usually passed to the South.
4. Stratford Shoals deep draft vessels pass at least 1 mile off the South of the shoal then alter course to New Haven Sea Buoy.

From Block Island:

Charts: 13205, 13215, 13209, 12354, 12371.

On approaching Block Island from the Southerly direction, Block Island's Southern shore is mainly high rock cliffs, and a good radar target is obtained along with bearings taken from the RDF station at Southeast Light.

Care should be exercised by vessels deeper than 30 ft. to always approach Block Island to the East due to the numerous shoals found on the Western side of the island.

It is also advisable to remain at least 1 mile to the East of Block Island due to the numerous shoals close in shore.

There are numerous dangers to be wary of when making the passage from the pilot station to New Haven. In order of approach they are:

1. Block Island North Reef Buoy "1B1" marks a dangerous shoal and should be passed well clear.
2. The Race is a narrow channel into Long Island Sound. Strong East to West currents exist during maximum ebb or flood and knowledge of position should be maintained in view of the possibility of unusual set. Valiant Rock, with a least depth of 19 ft., nearly in the middle of the Race, is surrounded by shoal area. A lighted bell buoy is Northward of the rock.
3. Great caution should be exercised during the Summer months when transiting through Block Island and Long Island Sound due to the heavy small boat traffic, especially in the area in proximity to The Race.
4. Fog is prevalent during the Summer months and is heavy. Good judgement should be used before transiting the area during fog.

Good water is found in Long Island Sound from The Race to New Haven as long as the Mid-Channel Buoys "P1" and "CF" are passed close to and care is taken so as not to pass North of "Twenty-Eight Foot Shoal" lighted bell buoy. When a vessel is within 4 or 5 miles of New Haven, the depth of the water is reduced, so caution is again needed. Radar is the best navigational aid in this area. There are numerous RDF stations that can be used to ascertain positions. Also fathometer readings will be helpful.

RESTRICTIONS: Vessels can proceed to and from berths in New Haven Harbour at any hour during the day or night, weather and tide permitting. Entrance channel dredged to 35 ft. MLW and width 400 ft.
MAX. SIZE: Draft up to 38 ft. subject weather and tides. Vessels of 50,000 d.w.t. with part cargo, do call occasionally, but should consult with the Pilot and terminal concerned.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
HEALTH: See "Health: All Ports", before first U.S.A. port (Albany). Illness Reports made to New York Quarantine Station.
RADIO: Vessels arriving from North use Chatham Radio. Vessels from South use Amagansett Radio on Long Island.

Bridgeport Marine Operator on VHF Channels 24 and 27.
TUGS: Red Star Towing Company operates tugs based in New Haven and serves Long Island Sound Ports. The office is on Channel 19A. Tugs monitor 19A, 16 and 13. Dispatchers can be reached 24 hours a day on Channel 19A. The number for Red Star is area code (212) 536-3841 or (800) 225-5470. 3 tugs 1,600 h.p. – 1,800 h.p.
BERTHING:
Wyatt Inc.: Ships are not docked on the West side at ebb tide, though ships in ballast can sail whenever ready, regardless of flood or ebb tide. The East berth docking is done on flood or ebb, with draft to be considered. In the Spring of 1983, this terminal was dredged to 37 ft. on the West side, and 32 ft. on the East side. Fresh water and bunkers are available, with steam on the East side available through a 2 in. line, with 125 lb. pressure.

Ships of 715 ft. are regularly docked here. Vessels are docked port side to on the West side, and would be delayed if the East berth is occupied by a ship.
Gulf Terminal: The Gulf Dock is located parallel to the channel on the East side of the inner harbour, and ships of 35,000 d.w.t. with draft of 35 ft. and LOA of 675 ft. are considered to be maximum size. (350 ft. from bow to manifold.)

The dock parallels the channel and consists of 2 main caissons, a centre platform and dolphins connected by a catwalk. Ships consigned for Gateway Terminal use this facility.
Gateway Terminal: Gateway Terminal is an independent deep-water marine terminal owner and operator, handling various types of dry and liquid bulk cargoes. It features its own petroleum transfer and oil storage tank farm (4 tanks), with an aggregate capacity of approximately 500,000 barrels. The fuel transfer facility is connected to the Buckeye-Jet line Pipeline System servicing central Massachusetts, and has a working arrangement with Gulf Oil to utilise a number of their immediately adjacent facility components, including their T – dock.

Gateway Terminal has a newly constructed concrete pier, 750 ft. length by 60 ft. width, which is at a 90° angle to the main channel. The pier provides up to 3 berths and can accommodate on the South side 40,000 d.w.t. tankers and dry cargo vessels up to 700 ft. LOA, 120 ft. beam and 35 ft. draft at MLW. Smaller vessels and barges with up to 30 ft. draft at MLW use the North side. Also available are 3×9,000 ton elevators for cement storage. The pier provides a timber/rubber cushion 50 ft. on centre fendering system. Two high speed gantry cranes with capacity 40 tons are on the pier and additional mobile cranes with capacity 25 tons are available. Advanced truck loading and weigh stations are immediately adjacent to the pier. Ships can berth port or starboard side to.

Bunkers, petroleum products and fresh water are available at all times.
New Haven Terminal, Inc.: This facility has 3 ship berths on a 90° heading from the channel, dredged in 1983. The Scrap Dock, as it is called, is a continuous pier, with a wearing strip cushioned by a rubber backing. The pier is 650 ft. long, with 35 ft. at MLW. Scrap is loaded from here and all types of dry cargo handled. Two gantry cranes are on the dock and additional mobile cranes are available. Railroad cars can be brought on to the dock. Ships berth port side to.

The Finger Pier on the North side is a continuous pier, 650 ft. long, and is mainly used as a tanker berth. Bow to manifold is 350 ft. (additional hoses can be added to increase this distance.) The slip is 196 ft. in width, and 2 ships may be accommodated at the same time, as long as 30 ft. is allowed for a tug boat between the ships. Depth 35 ft. at MLW.

The South side is a tanker or general cargo berth, with 40 ft. at MLW. Bow to manifold is 350 ft. and additional hoses may be used. Ships of 700 ft. may be secured at all 3 of these berths.

Bunkers can be trucked in, and fresh water is available at all berths.
Exxon Terminal: Exxon Dock parallels the main channel. The dock is 750 ft. long with 2 main caissons, dolphins, and platform connected by a catwalk.

Ships of 50,000 d.w.t. call at this dock, with a draft of 36 ft., docking on the rising tide. Ships are docked starboard side to. Bunkers are not available, though fresh water is.
MEDICAL: All facilities available.
TANKERS: See "Berthing".
BALLAST: There are no slop lines available.
FRESH WATER: Available at all terminals.
FUEL: Available from oil terminals or delivered by barge.
CONSULS: All countries represented in New York.
CUSTOMS ALLOWANCES: At the discretion of Customs Officers. Normal allowance is 200 cigarettes or 2 lb. of tobacco and 1 quart wine/spirits per man. Additional allowances may be given if considered necessary, due length of vessel's stay in port.
AIRPORT: New Haven Airport 1 mile distant. New York International Airport 70 miles distant.
TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours from first Sunday in April till last Sunday in October.
HOLIDAYS: New Year's Day (1st January); Washington's Birthday (22nd February); Memorial Day (30th May); Independence Day (4th July); Labor Day (first Monday in September); Columbus Day (12th October); Veteran's Day (11th November); Thanksgiving (fourth Thursday in November); Christmas Day (25th December).
SERVICES: Professional Sea Services (monitor Channels 16 and 19A of New Haven offers launch service to ships at anchor, movement o stores, and skin divers. Tel: (203) 932-2159.
GENERAL: Through a co-operative agreement, all the terminals have a slick boom, skimmers and absorbent available at all times.

There are no slop tanks available in this port for pumping ballast.

None of the terminals supply gangways; ships must use their own.
AUTHORITY: U.S. Coast Guard, Captain of the Port, New Haven.
Contact: Captain D. V. Monks, New Haven-Bridgeport Pilots Association Inc., 23, Highland Drive, Wallingford, Connecticut 06492
Tel: (203) 878-8667.

NEW LONDON (Including Groton), Connecticut: 41.21 N. 72.06 W. **(See Plan**

DOCUMENTS: Refer to "New York".
PILOTAGE: Pilotage is compulsory for vessels transiting the waters o Long Island Sound via Block Island Sound bound to or from ports an harbours on Long Island Sound. Vessels bound for New London harbour via Block Island/Long Island Sound usually board a pilot at either the Point Judith Pilot Station (41° 17.2′ N., 71° 28.5′ W., 2 miles South o the Point Judith R "2" whistle buoy,) or the Montauk Pilot Station (41° 02′ N., 71° 42′ W., 3 miles due East of Montauk whistle buoy Mo (A) "MP"). Some Block Island/Long Island Sound pilots also serve as pilots for New London. If a local harbour pilot is to be boarded, he wi usually board the vessel at General Anchorage "E" or if under wa inbound, approximately one mile South of New London entrance buoys "1" and "2". Vessel's agent will arrange pilotage and advise vessel o pilot boarding area.
ANCHORAGES: General Anchorage "E": In the waters off the mouth of New London Harbour, approximately 1.5 miles S.S.E. of New London Ledge Light (See "Plan").
RESTRICTIONS: Vessels can proceed to or from berths in New London or Groton at any hour during the day or night, weather and ti permitting. Transits of the Thames River to or from Dow Chemical's Terminal at Allyn Point are limited to daylight hours.

The U.S. Navy has dredged New London Harbour to provide a mai ship channel with depths of 36 ft. and 40 ft. at MLW, 500 ft. wide fro Long Island Sound to the Route I-95 bridge.
MAX. SIZE: Dry cargo vessels of approximately 600 ft. – 650 ft. an tankers of approximately 800 ft. have been using the harbour.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to New York Quarantine Station.
RADIO: Vessels arriving from North use Chatham Radio on Cape Cod. Vessels from South use Amagansett Radio on Long Island. However either one may serve the purpose.
VHF: New London Marine Operator monitors VHF Channels 25, 26 an 86.
TUGS: Usually join vessel at Ledge Light if a dry cargo vessel and nea entrance buoys "1" and "2" if a tanker. Tugs use their own lines. Thre tugs of about 1,000 h.p. – 3,000 h.p. are usually available with advanc notice. Tel. (203) 443-9433.
BERTHING: Advance ETA must be made for berthing.

State Pier No. 1: Depth-pending completion of hydrographic survey pilot and terminal should be consulted.

Admiralty Pier: Depth 26 ft. MLW (docking on rising tide).

Dow Chemical Co. Wharf: Depth 22 ft. MLW (docking on rising tide daylight docking and undocking.

Hess Groton: Depth 36 ft. MLW.

City Pier (South side): Depth 20 ft. MLW (not used as a carg terminal).

Capability of State Pier and Admiralty Pier to accommodate 2 vessels simultaneously, depends mainly upon vessels' dimensions and order o arrival or departure. Pilot and terminal should be consulted regarding depths and berthing arrangements at the preceding facilities.
BRIDGES: There are no bridges across Main Ship Channel. However at New London, at the head of the Main Harbour, the Thames River i crossed by 1 drawbridge and a twin fixed bridge: the Amtrak Railroad bascule bridge with a horizontal clearance of 151.5 ft. and a vertical clearance of 30.9 ft. at high water and a fixed highway bridge with a vertical clearance of 135 ft. for a middle width of 200 ft.
STEVEDORES: Gangs must be requested on weekdays no later tha 1630 hrs. preceding the scheduled work day.
MEDICAL: All facilities available.
TANKERS: Hess Oil Dock: Depth alongside 36 ft. (Lines 10 in. an 12 in.).

Pfizer Wharf: Barge berth, currently not handling tankers.
Report: Port Approaches – Cautionary Advice: When approaching Block Island from the South or East, prior to picking up the Pilot, all mariners should be aware of the precautionary zone to the S.E. of Block Island. Usually ships bound for Point Judith Pilot Station will make for 1 mile East of Block Island S.E. lighted whistle buoy then, traffic permitting, head due North, to pick up the Pilot. All traffic in this area should be monitoring VHF Channels 13 and 16. Principal navigational aids used in making landfall are RDF stations at Montauk Point, S.E. Point, Point Judith, Brenton Reef Light and Buzzards Bay Light Tower. The high bluffs on the South side of Block Island also provide excellent radar targets for position fixing. Ships bound for Point Judith Pilot Station are advised to approach the pilot station from the East side of Block Island due to the shoals found on the island's Western side. Ships bound to the Montauk or Point Judith Pilot Station should be cautioned against proceeding past the pilot boarding area without a pilot on board. Vessel agents arranging boarding at Montauk Pilot Station should consult pilots regarding draft restrictions for vessels transitting the Montauk-Block

Island Channel, S.W. of Block Island. Among the dangerous shoals in that area is Southwest Ledge, marked by a lighted buoy. There are numerous dangers to be wary of when making the passage from the pilot station to Groton. In order of approach they are:

Block Island North Reef Buoy "1B1" marking a dangerous shoal which should be given a wide berth.

"The Race" which is a narrow channel leading into Long Island Sound. Strong Easterly and Westerly currents exist during maximum flood and ebb tides (flood set to the West) and an accurate position should be maintained at all times so that any unusual set may be observed.

It should also be noted that sport fishing boats frequent the area in great numbers practically all year round. Tugs with large barges on long hawsers can also be expected. Valiant Rock, with a least depth of 19 ft., nearly in the middle of The Race is surrounded by shoal area. A lighted bell buoy is northward of the rock. Security broadcasts should be made on VHF Channels 16 and 13 when approaching the area and passing situations discussed before entering "The Race".

Cautionary Advice: Extreme caution should be exercised during the Summer months when transiting through Block and Long Island Sounds due to heavy small boat traffic, especially in the area around "The Race".

Submarine operating areas are in the approaches to New London Harbour and off the Northern end of Long Island. Submarines may be operating either surfaced or submerged in these areas.

Fog is prevalent during the Summer months and can be very dense. Prudent judgement should be used before transitting the area during fog because of the aforementioned hazards.

Berthing: (Hess Oil – Groton): The harbour provides excellent room for manoeuvring. Currents of up to 0.5 knots exist but set fair with the channel. The tidal range averages 2.6 ft. with a spring range of 3.1 ft. Vessels approach the berth at a small angle stemming the last of the ebb tide. Usually vessels dock starboard side to. Once alongside the platform, the bow will be secured first, followed by the stern. The Platform is well protected by rubber fenders. Lines are run to offshore piles and a mooring buoy by a small boat. 12 mooring lines are used under normal weather conditions. (See "Plan").

FRESH WATER: Available at pier side through 2.5 in. and 1.5 in. hoses.

FUEL: Bunker or marine diesel availability should be determined well in advance through vessel's agent.

CONSULS: Nearest at New York.

REPAIRS/DRY DOCKS: Drydocks of sufficient size/capacity to handle cargo ships currently unavailable to the public. Towing and minor repairs are available through Thames Shipyard, Inc. in New London. Tel: (203) 442-5349.

GANGWAY/DECK WATCHMEN: Not required and not recommended.

OPENING/CLOSING HATCHES: May be performed by stevedores or ship's personnel.

REPATRIATION: Facilities exist.

AIRPORT: Nearest airport is Groton - New London Airport, situated in the Southeast part of Town of Groton, Connecticut. Continental Airlines and USAir provide scheduled commercial service to this field.

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours, from first Sunday in April till last Sunday in October.

HOLIDAYS: New Year's Day (1st January); Lincoln's Birthday (12th February); Washington's Birthday (22nd February); Good Friday; Memorial Day (30th May); Independence Day (4th July); Labour Day; Columbus Day (12th October); Veteran's Day; Thanksgiving Day; Christmas Day (25th December). Cargo work can be arranged on holidays.

POLICE/AMBULANCE/FIRE: Dial 911.

TELEPHONES: Available if required.

AUTHORITY: State of Connecticut, Dept. of Transportation, Bureau of Water Transportation, State Pier, New London, Connecticut 06320, U.S.A. *Tel:* (203) 443-3856. *FAX:* (203) 437-7251. *Contact:* Robert M. Hardiman, Deputy Commissioner.

NEW ORLEANS, Louisiana: 29.56 N. 90.04 W.

(See Plan)

DOCUMENTS:

3 copies Cargo Manifest (Form 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (Curio List).
2 copies Stores List.
2 copies Passenger List (Form I-418).
2 copies Crew List (Form I-418).
2 copies previous Tax Certificates (Form 1002).
2 copies Certificate of Financial Responsibility.
2 copies General Declaration (Form 1301).
2 copies Vessel Repairs (Form 226) (Required only for American Flag vessels arriving from foreign ports).

Customs Boarding Officer will also examine Ship's Register and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States Port:

Master's Oath (Customs Form 1300).
All foreign clearances.
Certified Crew List.

The Bureau of Customs at New Orleans, Louisiana, will not, regardless of the circumstances, accept Customs Entry Papers from vessels unless they are on the proper U.S. Customs Forms and properly prepared.

Specially referred to are Customs Forms 1303 (Ship's Stores Declaration), 1304 (Crew Effects Declaration) and 1302 (Inward Foreign Manifest).

U.S. Customs at New Orleans require that the 1303 be completed, that is all stores (deck, engine, etc.) be listed on the form; it must also include firearms and medicines. They will not accept "as per attached list".

Form 1304, Crew Effects List, must likewise be properly completed. All effects and curios will have to be listed on the form. The term "souvenirs" is not sufficient and may not be used. All values have to be listed. Attachments to the 1304 are not permitted. (This does not apply to American Flag vessels using the Form I-418 Crew List with Crew Declaration numbers listed for their souvenir list.)

Also see "Berthing – Ama (Shipmaster's Report) – General" regarding Customs' areas of jurisdiction.

PILOTAGE: Advise Agents ETA at sea buoy 48 hours in advance. Agent will arrange for Pilot. Pilot boat 46 ft. long, red hull, white cabin, flying blue and white Pilot flag. Pilot boards at sea buoy, requires Pilot ladder 6 ft. above water level, and in compliance with Chapter V, Regulation 17 of the International Convention for the Safety of Life at Sea, 1974. Pilot boats can be contacted by VHF, Channel 9 or 16 when 30 to 40 miles off. Bar Pilot is exchanged for River Pilot at Pilottown, Head of Passes.

Following Advice Received from Crescent River Port Pilots' Association:

Cable: Crespilots, New Orleans.

Vessels bound to any destination on the Mississippi River and Mississippi River Gulf Outlet (MRGO) are requested to supply the following information via Coastal Radio Telegraph addressed to Crespilots, New Orleans:

(1) ETA – 24 hours before expected arrival at pilot station (Sea Buoys), and any change of ETA in excess of 6 hours.

(2) Indicate if vessel is arriving Mississippi River or Mississippi River Gulf Outlet.

(3) Deepest fresh water draft and speed of vessel.

(4) Please contact pilot station at entrances via VHF Radio Phone on Channel 16 (156.80 MHz), Channel 9 (156.45 MHz), or, Channel 13 (156.65 MHz) at least 2 hours prior to arrival for boarding instructions. (This is normally done by the Bar Pilot).

Your co-operation will greatly assist in expediting the dispatching of Pilots and avoid costly delays to your vessels.

ANCHORAGES: Safe anchorage within 2 miles of South Pass or S.W. Pass entrance. Vessels may anchor at the Point below New Orleans. Depending on ship size, weather, etc., tug assistance may be required.

APPROACHES: *Operator's Report:* 1984 (Corrected to 1988 conditions).

The coastline of the Mississippi River delta is low lying and generally swampy, having no easily distinguished geographic characteristics. The oil rigs and drilling platforms off Southwest Pass are usually sighted well before any navigational aids or landmarks. The first navigational aid to be seen is normally the Southwest Pass Entrance Light near the end of the East Jetty, a red tower on a white dwelling, 85 ft. above the water. The Entrance Light is also equipped with a Racon displaying Morse K (– · –) and Radio Beacon "OT" (307 kHz). The East End Jetty is also a conspicuous navigational aid consisting of a red triangular daymark on a red skeleton tower, 50 ft. above the water.

The sea buoy ("SW") is a red/white light (Morse (A)) buoy located approximately 1.6 miles South of the jetties and may be difficult to distinguish at long range due to the numerous oil wells and other lights in the vicinity.

Entry and transit should not be attempted during dense fog or any other unfavourable conditions.

River Transit: *General:* The Army Corps of Engineers has the responsibility for maintaining a project depth of 45 ft. in the entrance to and along the navigable channel in the Mississippi River up to Mile 150 AHP and 40 ft. from Mile 150 AHP to Baton Rouge. However, even with regular dredging, there will be occasions when the project depth cannot be maintained, resulting in a reduction of the transit draft. A decrease in water depth is most likely to occur when:

(a) the river stage is at its highest usually between January and June, and

(b) the river current velocity decreases causing siltation primarily after major Winter and Spring run-offs of rain and melted snow.

The influence of the above factors on water depth cannot be accurately predicted, neither for the day nor the location in the river. While this is not of concern for many miles of the river where deep water is always available, it is of particular concern within the 9 crossings between New Orleans and Baton Rouge.

Within these crossings it is, therefore, necessary for the Corps of Engineers to take frequent soundings not only to keep track of where the least water depth is, but also to determine the priority crossing for dredging.

Soundings taken for this purpose are very comprehensive, i.e., lines of soundings within each crossing are along the centre line ranges as well as along parallel lines 125 ft. to 250 ft. on either side of the centre line; soundings are recorded on these lines at about 150 ft. intervals. The maximum allowable transit drafts within the river are determined by the available water depth in the deepest 250 ft. wide channel in the 500 ft. wide crossings. As a result, Pilots in selecting such a navigable route may not always proceed on the centre line ranges of a crossing. The maximum draft will never exceed 45 ft. to Mile 150 AHP and 40 ft. from Mile 150 AHP to Baton Rouge.

Currents in the river vary according to the stage of the river (currents due to tides are a negligible factor) being of greater strength and velocity during high river flood stages and of lesser velocity during low river stages. High river stages normally occur in April and the low stages in October. Vessels transiting the river during flood stages should take precautions to avoid wash damage to the banks.

Extra caution is required in navigating the river in the vicinity of Algiers Point, particularly when the river is high. When the Carollton Gauge reaches 10 ft. on a falling stage, all vessels in the vicinity of Algiers Point shall be governed by the Governor Nichols and Gretna traffic lights. Furthermore, low powered vessels should not navigate the area unless they can clear Algiers Point during daylight.

When transiting the river it should be noted that the VTS is not in operation. Thus, the mariner may be confronted at any time with unreported hazards. It is important, therefore, that all Pilot rules and other applicable rules and regulations be strictly adhered to.

Six bridges cross the Mississippi River between Head of the Passes and Baton Rouge, with the following clearances:

Mile (AHP)	*Bridge*	*Horizontal Clearance* (ft.)	*Vertical Clearance* (ft.)	*Span*
94.0	Hale Boggs	1,400	170.0	A
95.7	Greater New Orleans	1,400	170.0	A
106.1	Huey P. Long	725	153.0	A
121.7	Luling & Destrehan	1,200	154.9	A
167.4	Sunshine	750	168.0	B
229.3	Baton Rouge I-10	500	172.5	A

Note: The vertical distance is measured at zero elevation of the river at the nearest gauge on the river. For example: the Baton Rouge I-10 bridge shows a clearance of 172.5 ft. at zero on the gauge. When the gauge shows 10 ft., the clearance is 172.5 ft. − 10 ft. = 162.5 ft.

Ferries transport passengers and cars across the river at Pointe a la Hache, Belle Chase, Chalmette, New Orleans, Gretna, Destrehan, Reserve, Lutcher, Donaldsonville, White Castle and Plaquemine.

When fog is predicted for the lower Mississippi River and/or Gulf, outbound vessels above New Orleans should anchor around Norco or above. Vessels below New Orleans should anchor well above Pilottown unless the weather can be expected to remain clear up to the entrance of the pass.

Draft/Speed Relationship: It is important to take account of the effect of "squat" when navigating within the crossings of the Mississippi River. For your guidance, the increase of draft due to "squat effect" is approximately 1 ft. for each 5 knots of speed.

River Crossings: The 9 crossings are critical areas, therefore, it is desirable to obtain either from the Pilot or local Agent the most recent information on locations where soundings indicate water depth less that the project depth 40 ft. or 45 ft. You should discuss with the Pilot what the intended track within a crossing should be in order to remain within the deepest water. In order to further reduce the risk of bottom touching, a reduction in speed is considered necessary in these circumstances. Reduction of speed should be discussed with the Pilot to ensure that the effect of "squat" is compensated for while in a crossing. Since it is important to ensure the desired ship response to rudder movements while in a crossing, speed reduction has to be carried out before entering a crossing.

The manoeuvres required at the crossings are rather unique. In most cases the channel is not parallel to the river current, and the Pilot will, therefore, utilise the set of the current to negotiate the crossing. Speed has to be sufficient to compensate for the effect of the current, while at the same time maintaining a balance with increased draft due to "squat". Full sea speed is to be avoided.

When entering or leaving a crossing, the Pilot may manoeuvre close to the bank and on occasions take advantage of bank rejection to aid the manoeuvre.

Experienced helmsmen are required during the entire river transit between New Orleans and Baton Rouge.

River Traffic: Surging caused by passing channel traffic is a common problem. To avoid damage to Chicksan/hose connections and the parting of wires or lines, special attention should at all times be given to the condition and tautness of moorings. It is recommended that one or several qualified crew members be assigned exclusively to the tending of mooring lines and winches.

RESTRICTIONS: Draft governed by Southwest Pass, project depth 45 ft. Entrance day and night. New Orleans is 115 miles upriver.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available, and join vessel off berth if required. One tug normally used for berthing/unberthing at New Orleans.

BERTHING: *Public Grain Elevator:* No. 2 Berth, 670 ft. long, 40 ft. depth; No. 3 Berth, 650 ft. long, 40 ft. depth; No. 4 Berth, 635 ft. long, 40 ft. depth.

Loading Rates 20,000 bushels per hour per belt, in Berths No. 2 and 3; up to 40,000 bushels per hour per belt, in Berth No. 4. Each berth has 2 loading belts.

Southern Scrap Material Co.: Berth 550 ft. long, 32 ft. depth. Loading 200 t.p.h. with cranes.

Kaiser: Chalmette Wharf: Aluminium discharge facilities, max. draft 38 ft.

Westwego: Continental Grain Elevator: 2 Berths, 600 ft. long and 500 ft. long, 40 ft. depth; loading 5,000 t.p.h., 4 loading belts. Louisiana Dock: 28 ft. alongside, bulk oil products loaded 200 t.p.h. Pacific Molasses Co.: Berth 35 ft. alongside.

Ama: Shipmaster's Report: February 1985 (Corrected to 1988 conditions).

Berth: Farmers Export Elevator Co.

Location: Lat. 29° 56.4′ N.,Long. 90° 18.5′ W. On the S.W. bank of the Mississippi about 122 miles from the Southwest Pass (New Orleans Customs Zone).

Health/Agriculture: See "U.S.A. – General" before first Port.

Tugs: Tugs normally used.

Berth: Length of berthing face about 550 ft.

Port side to, head up. Head, stern, breast lines to dolphins. Springs to wharf or dolphins according to size. Strong current along berth. River traffic passes close by. Substantial moorings required, with regular adjustment. Poop gangways generally do not reach wharf. A contractor's gangway normally on wharf but is charged for delivery, collection in addition to rental. Access road very narrow, no vehicles allowed on wharf. Road deliveries must be collected manually from levee 300 yards away. Otherwise delivery by boat from Fairview Wharf. All provisions, laundry, etc., from New Orleans. Public telephones on wharf.

Loading: Loading rate about 1,500 t.p.h. – 2,000 t.p.h. Using 4 "Buhler" arms simultaneously. Sometimes there is a delay in back weighing cargo for preparation of documents.

Fuel: By barge at anchorage only.

Density: 1000.

General: The River is divided into 3 Customs divisions, namely Baton Rouge, Gramercy and New Orleans. To pass from one to another requires a new port entry with fresh copies of Crew Lists, Stores Lists, Crew Personal Manifests, etc. Additional copies should be prepared at the same time as those for the first entry, as the Agents can then go ahead with the formalities.

It is a common practice for ships to anchor below New Orleans for clearance by Customs, N.C.B. and U.S.D.A. before going on towards a bulk or grain loading terminal. Bunkers are generally taken during this period as the grain elevators normally refuse permission to do this alongside.

Authority: Farmers Export Company, P.O.Box 97, Ama, La 70031.

CONTAINER HANDLING FACILITIES: Handled at most docks. Full container facilities at France Road Berth No. 1 with 830 ft. leased to Sea-Land. Napoleon Avenue wharf 1,520 ft. Nashville/Henry Clay wharf 2,820 ft.

France Road Berth No. 4, wharf 700 ft. France Road Berth No. 5, wharf 900 ft. Berth No. 6, 800 ft. Berth No. 4 leased to Navieras de Puerto Rico and Berths No. 5 and 6 leased to New Orleans Marine Contractors, Inc.

France Road Berth No. 6, with Ro/Ro pier.

BRIDGES: 6 bridges. 3 bridges cross river at New Orleans, 1 at Baton Rouge, 1 at Destrehan and 1 at Donaldsonville. Sufficient clearance at all times.

STEVEDORES: Working hours 0800 – 1200 and 1300 – 1700, Monday to Friday.

MEDICAL: All facilities available.

TANKERS:

Chalmette: Humble Oil Terminal: Tanker berth 30 ft. depth; Tenneco Oil Terminal: Tanker berth 35 ft. depth.

Amesville: Texaco Tanker Loading Berth, 34 ft. alongside. 2×8 in. hoses loading up to 12,000 bbls.p.h. No ballast facilities.

Avondale: American Liberty Tank Terminals Berth, 60 ft. alongside 4×6 in. hoses loading up to 18,000 bbls.p.h. No ballast facilities. International Tank Terminals Berth, 45 ft. alongside. 12 in. hoses loading 150 t.p.h.

to see side.

Gretna: Publicker Chemical Corp.: Berth 30 ft. alongside. Southern Pacific Company: Berth 600 ft. long, 35 ft. depth; dry cargo discharging only. Industrial Molasses Corp: Berth 27 ft. depth; 2×10 in. pipe-lines, loading 200 t.p.h.

Marrero: Hess Terminal Corp: Tanker berth 38 ft. depth; 6×12 in. hoses loading 500 t.p.h. Texaco: Tanker berth 35 ft. depth; 6×16 in. lines loading 250 t.p.h. No ballast facilities.

St. Rose: Cities Service: Tanker berth 35 ft. depth; International Tank Terminals: Berth 35 ft. depth; no fresh water available.

Operator's Report:

Pilottown: General: The Texaco Terminal is located on the East side of the river, 1.7 miles AHP and is a crude oil terminal consisting of a single berth. The dock, mooring dolphins and walkway are constucted of steel and concrete. The dock itself is a 'T' head dock 60 ft. in length; the total cluster of mooring dolphins, however, spans 1,000 ft.

Water at the berth is brackish with an approximate tidal range of 1 ft.

The berth is isolated and far from any commercial centre or district. Launch service to Venice, a small fishing village 8 miles upriver from Pilottown, may be available on request.

Cargo Handled and Shore Installations: Crude oil is loaded to vessels from an 820,000 bbls. capacity storage tank through a 22 in. shoreline leading into 3×8 in. hoses; maximum loading rate is 24,000 bbls.p.h. The hoses are supported by a steel boom at the top of the hose handling structure on the dock.

The berth is equipped with an emergency shutdown system located on the dock; the vessel is provided with a similar piece of equipment for emergency use.

Docking: The River Pilot berths the vessel. No tugs are required for docking or undocking; docking is strictly starboard side to.

Vessels should approach the dock stemming the current, dropping the port (offshore) anchor when off the dock. The anchor is then used to help manoeuvre the vessel alongside the dock. When undocking, the anchor is hove up as the vessel manoeuvres away from the dock.

Mooring bollards on the main dock structure are rated at 100 tons; mooring hooks on the dolphins are rated at 60 tons or more.

Gangway: The ship's gangway must be used and should be properly illuminated and rigged.

Bunkers and Fresh Water: No bunkers or fresh water are available at the dock.

Ballast/Slop Facilities: No ballast or slop facilities are available at Pilottown; vessels arriving with dirty ballast should plan for this.

Venice: General: Getty No. 1 Dock is a crude oil loading dock located on the West bank of the river approximately 11.8 miles AHP.

The 3 arms provided for loading cargo have a designed maximum rail to manifold distance of 12.5 ft. Vessels with a manifold inset greater than 12.5 ft. must use a 10 ft. long spool, provided by the dock, to connect the loading arms.

Cargo Handled and Shore Installations: Crude, the only cargo handled, is loaded through 3×12 in. Chicksan loading arms fitted with 8 in. manifold connections. Maximum loading rate is 40,000 bbls.p.h. The terminal requires that a minimum rate of 10,000 bbls.p.h. be maintained throughout the loading.

Emergency shutdown systems are located in the dock office and on the approach to the dock. The vessel is provided with a portable emergency stop.

Docking: Port side to docking is required and is normally performed by the River Pilot. No tugs are required for docking or undocking; the vessel's starboard anchor is usually used to control the vessel's movement during these manoeuvres. Approach should always be made with the vessel stemming the current.

Gangway: The ship's gangway must be used and should be properly rigged and illuminated.

Connecting Hoses: Chicksan arms are connected to the ship's manifold by ship's personnel.

Communications: A public telephone located at the terminal site, near the dock, is available for use by ship personnel.

Repairs: Only emergency repairs which do not involve hot work are allowed.

Bunkers and Fresh Water: No fuel or fresh water are available at this berth.

Ballast/Slop Facilities: A single 64,000 bbls. capacity tank is available for ballast storage/treatment. The maximum permissible discharge pressure is 150 p.s.i.

The terminal specifies that ballast shall not be loaded or discharged while handling bulk cargo and requests that vessels arrive with the minimum possible amount of ballast under the prevailing weather/river conditions.

Empire: General: The Chevron Terminal is a crude oil loading dock and is located at Mile 26.7 AHP on the East bank of the river. The dock consists of a 'T' head hose handling platform, 2 breasting dolphins and 5 mooring buoys (3 upsteam of the platform and 2 downstream). The dock is connected to shore by a 12 ft. wide pier capable of supporting 2-ton loads.

Cargo Handled and Shore Installations: Crude is loaded through 3×12 in. hoses attached to a loading arm assembly on the hose platform. The maximum delivery rate is 40,000 bbls.p.h.

An emergency shutdown system is located on the hose handling platform with a portable remote control unit aboard the ship.

Docking: Docking is generally performed by the River Pilot and only starboard side to dockings are allowed. No tugs are required for docking or undocking as the vessel uses its offshore anchor to manoeuvre alongside the dock.

Approaches should be made stemming the river current and the port anchor should be dropped when the vessel is above the dock to facilitate manoeuvring into position. The anchor is hove up as the vessel leaves the dock.

Repairs: Only emergency repairs which do not involve hot work are allowed.

Communications: A public telephone located on the hose handling platform is available for use by ship's personnel.

Gangway: The vessel's gangway must be used and should be properly rigged and illuminated.

Bunkers and Fresh Water: No bunkers or fresh water are available at this dock.

Ballast/Slop Facilities: All dirty ballast and slops must be pumped to the shore ballast tank, (capacity 80,000 bbls.) connected to the hose platform by a 16 in. pipe-line. Ballast and cargo operations cannot be handled simultaneously.

Maximum discharge rate for ballast is 20,000 bbls.p.h. at a maximum rail pressure of 125 p.s.i.

Bellechase: General: The Gulf/Alliance dock is a multiple product berth located on the right descending bank of the river, approximately 65.6 miles AHP.

Transfer of cargo is made through a set of 10 in. hoses attached to a loading arm assembly on the dock. Shore lines vary in size from 8 in. for toluene and benzene to 20 in. for crude oils.

Tank washing while alongside the dock is strictly prohibited.

Cargo Handled and Shore Installations: Products commonly handled by the dock include xylene, LPG, crude, naphtha, carbon black, toluene, benzene, gasolines, jet fuel and heating oil.

Maximum allowable rail pressure for discharging vessels is 100 p.s.i.

An emergency loading stop is located on the dock; another, portable, unit is placed aboard the ship.

Docking: The River Pilot normally handles docking and undocking operations. Docking is port side to only and generally requires the aid of a 1,200 h.p. tug. Small tankers are occasionally allowed to dock without the aid of a tug, using their starboard anchor instead. However, since dock regulations prohibit the use of an anchor while alongside, it is recommended that a tug be used by all vessels calling at the berth.

Approach to the dock should be made stemming the current with a tug on the vessel's starboard bow. The vessel is then manoeuvred into position alongside the dock.

Repairs: Minor repairs, excluding hot work, may be undertaken with written consent from the dock's Chief Operator countersigned by the offsite Shift Supervisor.

Gangway: The ship's gangway must be used and should be properly rigged and illuminated.

Bunkers and Fresh Water: Bunkers are not available at Gulf/Alliance. Fresh water, however, is available and can be delivered at a maximum rate of 7 t.p.h.

Ballast/Slop Facilities: All slops and ballast must be discharged ashore. The shore storage tank has a 100,000 bbls. capacity; ships discharge ballast/slops into this tank through an 18 in. line at a maximum rate of 12,000 bbls.p.h.

Meraux: General: Murphy Oil Refinery is located on the North side of the Mississippi River, approximately 75 miles AHP. The tall stacks and cracking towers of the refinery are prominent features of the shoreline.

The berth serves as a primary receiving dock for crude oils which are refined into various petroleum products for transfer by ship and barge to other ports.

Cargoes Handled and Shore Installations: Crude is received at a maximum rate of 20,000 bbls.p.h. or a maximum 125 p.s.i. rail pressure. Refined products (gasolines, jet fuel, etc.) are loaded on to vessels at an average rate of 5,000 bbls.p.h. All cargo transfer is made through 8 in. hoses.

Docking: Docking is normally performed by the River Pilot and is strictly starboard side to. All vessels are required to use a minimum of 1 tug for docking and undocking; more tugs may be used at the Master's discretion. Vessels approach the refinery dock stemming the current with a tug on the port bow. The tug assists vessels manoeuvring into position alongside.

Communications: A public telephone located at the head of the dock is available for use by ship's personnel.

Gangway: The ship's gangway must be used and should be properly rigged and illuminated.

Bunkers and Fresh Water: Bunker-C, diesel fuel and fresh water are available upon request.

Ballast/Slop Facilities: No ballast or slop facilities are available at this dock.

Chalmette: General: The Exxon dock is a small dock with 310 ft. of dock face consisting of a concrete deck on steel pilings. Mooring bollards on the dock and mooring dolphins are serviced by air driven capstans for hauling ship's mooring lines.

Cargo Handled and Shore Installations: Marine diesel and Bunker-C are handled at this dock. The dock is equipped with a loading arm assembly to which 3×8 in., hoses are attached for the transfer of cargo. Maximum allowable discharge pressure at the rail is 125 p.s.i.

An emergency loading stop control is located on the dock.

Docking: Docking and undocking are performed by the River Pilot and require the aid of an 800 h.p. tug. Vessels approach the dock stemming the current with a tug on the port bow and are then manoeuvred into position, starboard side to, alongside the dock.

Gangway: The ship's gangway must be used and should be properly rigged and illuminated.

Bunkers and Fresh Water: Bunker-C, inter-fuel, diesel fuel and fresh water are available upon request.

Ballast/Slop Facilities: There are no ballast or slop facilities available at the berth.

Harvey: General: The Commercial Solvents Wharf is located on the South side of the river near Harvey Canal; and consists of an 'L' shaped dock with 370 ft. of dock face and 6 mooring dolphins.

Cargo Handled and Shore Installations: Various clean speciality products are handled. The product most frequently handled is methanol. Cargo is transferred through a single 6 in. hose with a 6 in flanged connection at the vessel's manifold. Maximum rail pressure for vessel's discharging is 100 p.s.i., maximum loading rate is 2,500 bbls.p.h.

Docking: Docking is performed by the River Pilot and is strictly port side to. 2 tugs are required for docking operations and a single tug for undocking. The general mooring arrangement calls for 2 head lines, 2 stern lines, 1 breast line forward, 2 breast lines aft, 2 forward spring lines and 2 after spring lines for a total of 11 mooring lines.

Gangway: The ship's gangway must be used and should be properly rigged and illuminated.

Bunkers and Fresh Water: No fuel or fresh water are available at the dock.

Ballast/Slop Facilities: There are no ballast or slop facilities at the terminal.

St. Rose: General: The International Matex Tank Terminal berths are located on the North side of the river, approximately 103 miles AHP. The terminal consists of two individual tanker berths (No. 1 and No. 5) and a barge dock.

No. 1 Dock, upstream of No. 5 Dock, consists of a small 'T' head dock with 5 mooring buoys to accommodate head, stern and breast lines. No. 5 Dock has a longer dock face which can accommodate all but the head and stern lines. Both docks are connected to shore by catwalks.

The velocity of the river current at both berths varies between 1 knot and 4 knots, depending on river conditions.

Cargo Handled and Shore Installations: No. 1 Dock handles mainly the receipt of crude oils and the shipment of Bunker-C, No. 2 fuel and naphtha. The cargoes most frequently handled at No. 5 Dock are No. 6 fuel oil and No. 2 diesel oil.

No. 1 Dock is fitted with a set of 12 in. Chicksan arms. Cargo at No. 5 Dock is transferred through a maximum of 3×8 in. hoses. Maximum discharge pressures are 100 p.s.i. at No. 1 Dock and 90 p.s.i. at No. 5 Dock.

Docking: Docking is performed by the River Pilot and is strictly starboard side to at both berths. All vessels are required to use at least 5 tugs for docking and undocking; 3 tugs are required when the river is above 15 ft. on the St. Rose gauge.

The general mooring arrangement at No. 1 Dock call for 4 head lines, 2 breast and 2 spring lines forward, 2 spring lines aft and 2 stern/breast lines. The lead for stern lines is poor. Wires may be used on all bollards and hooks except those on the loading platform. The terminal prefers polypropylene lines to wires for docking at No. 5 Dock. This dock requires 2 head lines, 2 stern lines, and one breast and one spring line both forward and aft.

Communications: Public telephones located on each dock and at the shoreside end of each catwalk are available for use by ship's personnel.

Gangway: The vessel's gangway must be used and should be properly rigged and illuminated.

Bunkers and Fresh Water: Fuel (Bunker-C, inter-fuel and diesel) and fresh water are available at each dock upon request.

Ballast/Slop Facilities: No ballast or slop facilities are available at either dock.

Marrero – Texaco: General: The Texaco Tanker Berth is located on the South side of the river some 86.5 miles AHP. The berth consists of a 'T' head dock with pontoons and mooring buoys alongside forming a 750 ft. berthing space.

Cargo Handled and Shore Installations: Various products are shipped and received by barge; the only product handled by tanker is bonded heavy fuel oil. This product is received through a single 10 in. hose at a maximum pressure of 100 p.s.i. on the dock.

Docking: Docking is normally performed by the River Pilot and is strictly port side to. Tugs are recommended, but are not compulsory, for docking and undocking operations.

Approach is made stemming the current and parallel to the dock. When no tugs are used for docking, the vessel's starboard anchor must be used to manoeuvre the vessel alongside.

Gangway: The ship's gangway must be used and should be properly rigged and illuminated.

Bunkers and Fresh Water: Fresh water is available upon request; fuel, however, cannot be obtained at this berth.

Ballast/Slop Facilities: There are no ballast or slop facilities at the terminal.

Marrero – Hess: General: The Hess Tanker Dock is a concrete structure with steel pilings and 320 ft. of dock face. Mooring dolphins provide a location for head, breast and stern lines.

Current at this dock varies from 2 knots to 4 knots, depending on river conditions.

The dock is located on the South or left descending bank of the river approximately 86 miles AHP.

Cargo Handled and Shore Installations: Crude oils, Bunker-C and heating oil are commonly handled at this berth. All cargo transfer is made through 8 in. or 10 in. Chicksan arms.

Maximum loading rate for crude oil is 25,000 bbls.p.h. and for other products approximately 6,000 bbls.p.h. Maximum rail pressure for discharging vessels is 100 p.s.i.

An emergency loading stop control is located near the dock manifold.

Docking: Docking is strictly port side to and performed by the River Pilot. Vessels under 35,000 d.w.t. are required to use 2 tugs for docking and undocking; vessels greater than 35,000 d.w.t. are required to use 3 tugs. During extremely high river stages all vessels are required to use 4 tugs for docking and undocking operations.

Berth mooring requirements specify that 4 head lines, 4 spring lines forward, 2 after spring lines, 2 after breast lines, and 4 stern lines be used by all vessels (a total of 16 mooring lines.)

Gangway: The ship's gangway, properly rigged and illuminated, must be used.

Bunkers and Fresh Water: Bunker-C, diesel oil, inter-fuel and fresh water are all available upon request.

Ballast/Slop Facilities: No ballast or slop facilities are available at the terminal.

DENSITY: Fresh water (1000).

FRESH WATER: Available ex-wharf.

FUEL: Only available by barge. Oil companies can supply Bunker "C" ex-terminals at Amesville and Marrero. Chemoil can also supply fuel.

CONSULS:

Argentina	523-2823	India (Honorary)	582-8000

REPAIRS: 7 berths available.

GANGWAY/DECK WATCHMEN: Recommended if any crew detained by Immigration.

CUSTOMS ALLOWANCES: At the discretion of Customs Officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 litre wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.

AIRPORT: New Orleans International Airport, served by most airlines.

TIME: Central Standard Time GMT minus 6 hrs. Daylight Saving Time from first Sunday in April till last Sunday in October.

HOLIDAYS: New Year's Day (1st January); Clarence Henry's Birthday (7th January); Martin L. King's Birthday (third Monday in January); Mardi Gras; Washington's Birthday (third Monday in February); Good Friday; Memorial Day (last Monday in May); Independence Day (4th July); Labour Day (first Monday in September; Veteran's Day (11th November); Thanksgiving (fourth Thursday in November); Christmas Day (25th December). No work on New Year's Day, Mardi Gras, Labour Day and Christmas Day. Mail, baggage and perishable cargo excepted.

Holidays are observed on following Monday, if designated day is a Sunday.

POLICE: Harbour Police Department has jurisdiction over harbour are Tel: 528-3371 or 3372.

BANKS:

American Bank and Trust Co., International Branch – WTC Buildin New Orleans, LA 70130. 504/569-0482.

Citizens and Southern Intl. Bank of New Orleans, WTC Buildin New Orleans, LA 70130. 504/581-1586. Telex: 58-7409

First National Bank of Commerce, 210 Baronne Street, New Orlean LA 70112. 504/561-1371.

Hibernia National Bank of New Orleans, P.O.Box 6154 New Orleans, LA 70161. 504/586-5555.

Whitney National Bank of New Orleans, 228 St. Charles Avenue New Orleans, LA 70130. 504/586-7272.

SHORE LEAVE: Allowed for any crew member not detained b Immigration.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to b made up for each crew member on arrival. Not necessary for crew me already holding Form I-95, issued for the same vessel.

DEVELOPMENTS: Jourdan Road Terminal Complex comprising of a two berth facility with 290,000 sq.ft. of open space, 144,000 sq.ft. trans shed, complete with crane rails and marginal track, plus 440,000 sq.ft marshalling area. Marshalling area adjoining the terminal comple consisting of 10 acres with an additional 34 acres of preload area to b developed as required.

Lower Mississippi River dredged to 45 ft.

SHIPMASTER'S REPORT: 1975.

Customs: Stores List. Curio List. 1 Crew List. Sealed High Duty Bon Unchecked.

Immigration: Visaed Crew List. Seaman's Red I.D. Card or Passpo along with American Crew Pass. Typed. Question asked by Officia "How long at sea?" I.D. Card handed back to seaman with America Pass stamped. Department very thorough and efficient.

No mail or money to be distributed until Immigration completed, als no persons permitted ashore or onboard until formalities complete except for Agents and Officials.

If no visaed Crew List Master signs official form. Cost U.S.$10.0 f whole ship's company.

Port Health: Radio Pratique not granted as Seaman's Cards n completed. No representative visited vessel. Report any death throu Agents.

Agriculture Dept.: Inspected vessel. Galley, Messrooms, Store-rooms etc. Meat and Vegetable rooms sealed.

Garbage bins to be covered (Collection expensive, retain on boar until sail if possible).

Ratguards to be used.

Provisions and Stores: Select own supplier. Prices comparable U.K with good quality expensive. Stores and medicines ordered throu providore.

Laundry: Satisfactory. Billed by weight. 24 hour service.

Watchmen: None placed on board but security police at sectio openings.

Telephone: None placed on board. Use office on quay side.

Water: Plenty available. Shore connections used.

Bunkers: Delivered by barge. Charged for what is ordered. Do not ove stem. Barge hired from private firm. Any bunkers not taken paid for an revert to barge owners.

Walport Films: Exchanged.

Coast Guard: Require number of Oil Pollution Certificate (Certificate o Financial Responsibility). Whether AMVER participant. Require ship particulars including horsepower. Displacement tonnage on sailin Name of Master and Chief Officer. Dangerous cargo particulars an stowage.

National Cargo Bureau: Representative from National Cargo Burea comes onboard and requests ship's particulars also ports of call to an from. Inspector looked at hatches where cargo to be loaded. He the issues a Certificate of Readiness. Loading can then commence.

Code of Federal Regulations: Each ship should have a copy. Difficu to come by. Acquired 1970 copy from Agents. Equivalent to our 'Blu Book'.

Repairs: Select own firm. Anxious to please. Unable to judge as litt work contracted out.

Money: Delivered by separate security firm. Satisfactory.

Radio Messages: Send ETA at least 48 hours before arrival to Agent and Branch Pilots with draft. Notify Captain of the Port of any explosive for discharge or in transit. If all healthy and documentation correct as for Radio Pratique. Confirm ETA at 24 and 10 hours. Inwards send ET to Agents after passing Pilot Town. Agent will notify if Radio Pratiqu granted. Not necessary to fly "Q" flag going up river.

Stevedores: Hours of work 0800 to 1200 hrs., 1300 to 1700 hrs. Straig time. Weekday gangs will work until 1800 or 1900 hrs. to finish. Nig 1800 hrs. to midnight, 0100 to 0600 hrs. Head Stevedore checks Facto Act Book. Gangs will work continuously except for 3 hours in an 24 hours. 4 different Union Contracts. Plan maker makes own plan the airmails same to ports of discharge. Crew open hatches also close sam Crew not to do any cleaning.

General: Use S.W. Pass at all times. South Pass has only 18 ft. of wat and shoaling all the time.

Pilot boards on lee side at Sea Buoy – Flash "A" (· –) from fast launc painted black. Ladder about 6 ft. from water level. Branch Pilot tak vessel to Pilot Town where River Pilot takes over. Ladder usua starboard side inward and port side outward 8 ft. above water. First co first served at sea buoy. About 1.5 to 2 hours from Sea Buoy to Pi Town and about another 6 hours to berth. Proceed up river at harbo full speed. Reduce speed occasionally for long tows, dredgers and sh on loading berths.

River Pilot docks vessel.

Signals by day "H" flag. By night nothing.

Inland waterways rule of road applies.

We had clear daylight run up river and down at night. Mid December. Start of fog. Low fog experienced on water also some patches, fairly thick. If fog does develop it is worth remembering that once past Pilot Town Southbound, few if any places to anchor and one has to continue on.

Racon at entrance useful. Anchorages as per charts. When arriving contact Pilot on VHF Channels 9, 12, 13.

Berth: Satisfactory. 24/29 Market Street. Just past bridge. Quite a long walk to open section to get out of docks. Recommend at night get taxi back and if walking into town by day at least 2 persons.

Sufficient bollards. No cranes. Berth head up. Usually starboard side to.

Moorings. 4 headlines, 4 sternlines plus 2 springs each end. Passing traffic fairly heavy with considerable wash. Ratguards required.

Ship's gangway. Quay about 25 ft. above water level. Wooden pile fenders very effective.

Tugs: Used for berthing and unberthing. 1 only alongside port forward shoulder. 2 tug's lines. When making fast tug passes portable Walkie Talkie on board to send up to Pilot on bridge. Pilot left by tug which used own ladder.

Radar: Satisfactory repairs carried out.

SHIPMASTER'S REPORT: 1979.

South West Passage:

Pilotage: Pilots prefer accommodation ladder together with pilot ladder but will sometimes use pilot hoists, on larger vessels.

Restrictions: For 100,000 d.w.t. vessel max. draft for S.W. passage is 35 ft., (fresh water) to sail out at any time.

SHIPMASTER'S REPORT: 1979.

Mississippi Lightening Area:

Port Limits: Centred at Lat. 28° 00′ N., Long. 89° 30′ W. and within 15 nautical miles radius.

Documents: Officials take photostat copies of Bill of Lading and give receipt for cargo, and take one copy of Notice of Readiness.

Pilotage: They are equipped with Loran "C".

Anchorages: Very deep. Vessel drifted 7 nautical miles N.N.E. in 11 hours (February) with wind N.E. – 3. Checked with satellite navigator.

Health: No formalities.

Radio: Initial contact on W/T via "WLO" Mobile then by R/T 12427.5 kHz A3J. When close enough Channel 16 VHF; then Channel 11 for all operations. If vessel fitted with bridge wing VHF extension then best to give all engine room orders over Channel 11 so that lightening vessel can also hear.

Berthing: As per OCIMF/ICS SSTG (P). Require 2 headlines and 1 stern line from STBL after putting aboard their lines which are all polypropylene except springs which are wires with nylon tails. Steamed at about 3.5 knots. They throw across heaving lines and carry all necessary equipment. Do not require derrick, they have gangway and 4 'Yokohama' fenders.

Tankers: STBL can load at up to 10,000 t.p.h. They prefer to use 2 centre manifolds with reducers down to 16 in.

Identification Cards: Required.

AUTHORITY: Board of Commissioners, Port of New Orleans, P.O.Box 60046, New Orleans, Louisiana 70160, U.S.A. *Tel:* (504) 522-2551. *Telex:* 58-7496. *FAX:* (504) 524-4156. *Contact:* Mark Reynolds, Port Marketing & Sales. Kenneth Parker, Marine Terminals.

AGENT: Rice, Unruh, Reynolds Co., Two Lakeway Center, Suite 790, 3850 N.Causeway Blvd., Metairie, LA 70002. Tel: (504) 836-7074. Telex: TRT 161825. Fax: (504) 836-7079.

NEW YORK, New York and New Jersey:
40.43 N. 74.00 W. **(See Plan)**

DOCUMENTS:

3 copies Cargo Manifest (Form 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (Curio List).
2 copies Stores List.
2 copies Passenger List (Form I – 418).
2 copies Crew List (Form I – 418).

Customs Boarding Officer will also examine Ship's Register and Load Line Certificate.

In addition the following documents will be required for formal entry, to be made within 48 hours of arrival from abroad:
Health Pratique.
Master's Oath (Form 1300).
All Foreign Clearances.
U.S. Certificates of payment of Tonnage Tax (Customs Form 1002).
Certified Crew List.
Vessel's certificates may be inspected by a Coast Guard Boarding Officer during the vessel's Port call. Some of the certificates that may be required by the Coast Guard Boarding Officer include:
Certificate of Financial Responsibility (Mandatory).
National Cargo Bureau Certificate (Optional).
Load Line Certificate (Mandatory).
Oil Record Book (Mandatory).
International Oil Pollution Prevention Certificate (IOPP Mandatory).
SOLAS Safety Equipment Certificate (Mandatory).
SOLAS Safety Construction Certificate (Mandatory).
Radiotelephone Certificate (Optional).
Radiotelegraphy Certificate (Mandatory).
Vessel's Deck Log (Mandatory).

Note: The vessel's navigational charts are also subject to Coast Guard inspection. Mariners should have onboard and corrected up to date, the largest scale (greatest detail) charts for the intended route of transit through the port. Certain foreign charts have been approved for use. Contact Captain of the Port, New York for details.

Shipmaster's Report: March 1987.

3 copies of all necessary documents. All are given to Agent, who distributes them to Immigration, Customs, etc.

For all U.S. ports, the name of vessel's operator must be the same on Form 1300 as that shown on the U.S.C.G. Certificate of Financial Responsibility (Water Pollution).

For tankers, the cargo figures shown on Form 1302 should be in gallons and barrels.

PILOTAGE: Compulsory for foreign flag ships, and U.S. ships bound to and from foreign ports.

24 hours notice of ETA required. N.Y. N.J. Sandy Hook Pilot boat should be contacted on VHF Channel 16, call "Ambrose Pilot", pilot vessel also on Channels 13, 8 and 73 or ship-to-ship Channel 2638 or 2738. Vessels requiring Pilot should hoist signal letter "G" in daytime. In foggy weather the letter "X" should be sounded on whistle.

Pilot boat is generally found about 1.5 miles West of Ambrose Light Tower. In bad weather Pilot tries to stay windward of normal pilot station.

In poor visibility an inbound ship should make Ambrose Tower and then proceed at slow speed to the Ambrose Channel Sea Buoy while blowing the letter "X" on her whistle. If no Pilot is obtained by the time she is in the vicinity of the sea buoy she should then anchor about 0.5 mile to 1 mile North of the line from Ambrose Tower to the sea buoy and await Pilot.

ANCHORAGES: For ships entering from Sandy Hook there are anchorages in Lower New York Bay, Gravesend Bay, Raritan Bay, and Arthur Kill off Perth Amboy. In the Upper Bay, anchorages available off Bay Ridge for 30 days and off Stapleton for 48 hours. For vessels entering via Long Island Sound there are anchorages in the Western end of the Sound and in the East River.

Vessels must notify the Captain of the Port when it anchors, of the vessel's name, length and draft and its position in the anchorage.

Regulations for anchorages may be found in the 33 Code of Federal Regulations, Part 110.155.

Vessels entering New York Harbour are required to have 2 working anchors, by U.S.C.G. regulations.

Also see "Approaches".

APPROACHES: Ambrose Channel, 2,000 ft. wide, is the principal entrance from the Sea to the Lower Bay and onward to The Narrows between Staten Island and Brooklyn, which is 15 miles from Ambrose Tower. The project depth of this channel is 45 ft. MLW. Vessels proceeding up Sandy Hook Channel are limited by a project depth of 35 ft. MLW and an 800 ft. wide channel.

Vessels arriving at the Port of New York normally utilise General Anchorages No. 23 and No. 24 which are North of the Verrazano Bridge and adjacent to the Stapleton Quarantine Station or Anchorage No. 21 off Bay Ridge. However, at times it may be necessary to direct inbound tonnage to the Gravesend Anchorage, No. 25, South of the Verrazano Bridge. Occasionally, due to congested conditions at the above locations, vessels may be directed to anchor at the newly established anchorage adjacent and N.W. of Ambrose Tower. Vessels instructed to use the anchorage off Ambrose Tower must pick up a Pilot for proper selection of an anchorage location.

For limits of anchorages generally used in the Port of New York see "Plan". Use of Charts 12349 and 12334 is strongly recommended.

Specific operating and safety procedures have been agreed upon with the Pilot's Association, as follows:

1. Flood Tide Procedure:

Vessels with an LOA in excess of 800 ft. or a draft of more than 40 ft. (salt water) will not be brought in from sea to the General Anchorages off Stapleton, Staten Island (Southern part of No. 23 and entire area of No. 24) on the flood tide. This will avoid the need to turn around in order to anchor at a location which may be congested with traffic and ships at anchor.

2. Transit Restrictions:

Ambrose Channel: Guideline for starting in from Ambrose Tower during normal weather conditions.

Vessels with Drafts of 46 ft. 06 in.:
Thirty mintues after high water Sandy Hook.
Vessel with Drafts of 46 ft:
Thirty minutes to one hour after high water Sandy Hook.
Vessel with Drafts of 45 ft. 06 in.:
From thirty mintues after high water Sandy Hook to one hour and thirty minutes after high water Sandy Hook.
Vessels with Drafts of 44 ft. 06 in.:
From thirty minutes after high water Sandy Hook to two hours and thirty minutes after high water Sandy Hook.
Vessels with Drafts of 43 ft. 06 in.:
From thirty minutes after high water Sandy Hook to three hours and thirty minutes after high water Sandy Hook.
Vessels with Drafts of 42 ft. 06 in.:
From thirty minutes after high water Sandy Hook to five hours after high water Sandy Hook.
Vessels with Drafts over 40 ft. 00 in.:
From 30 minutes after high water Sandy Hook to 5 hours after high water Sandy Hook. All vessels in the above categories should pass through the Narrows before low water slack at the Narrows.

The procedures outlined above are guidelines only. Weather conditions, tides, currents and ship capabilities should, of course, be taken into consideration.

3. Anchoring Procedures:

The Pilot Association has notified the Pilots to stay aboard all arriving ships at anchorage until the following procedures are carried out:

(a) The anchor chain is to be brought up and ship is to be stationary.
(b) The Pilot will point out landmarks so proper bearings may be obtained and plotted on the charts.
(c) Pilots will inform the Master of conditions that he may encounter at the anchorage.
(d) The Master will be briefed on currents and time of tide change.
(e) All Pilots must record the ship's bearings on the back of their Pilot Orders.

In order to assist the attending Pilot, the Master should inform him on boarding of any special characteristics of his vessel, such as port manoeuvring speeds, turning circle, compass error and exact draft.

4. Anchor Watch:

Due to usually congested anchorages, strong tidal current, occasional fresh winds and traffic, all Masters are cautioned to maintain a continuous bridge anchor watch by a deck officer with engine on standby. Anchor bearings should be taken frequently and plotted to ensure proper anchor holding. During change of tides, the anchor windlass should be in readiness with a deck officer standing by.

If an anchorage becomes dangerously congested after a ship has been anchored, the ship's Master may request Agent to (a) send a Pilot to relocate vessel to a safer anchorage, or (b) send a tug to assist vessel in turning during a change in tide, or to stand by during fresh wind conditions.

RESTRICTIONS: Ambrose Channel, 10 miles long, maintained to a width of 2,000 ft. and a depth of 45 ft. MLW. The Northern approach to the harbour is through Long Island Sound into the East River. Main channels in the port are maintained to a depth of 45 ft. MLW.

MAX. SIZE: Restricted only by berth depth and location.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to New York Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

VHF: All vessels over 100 tons gross are required to keep continuous watch on VHF Channel 13 when in areas where U.S. Inland Water Regulations apply.

V.T.S. expected to be operational in August 1990. Channels to be used are 16, 13, 11, 12 and 14.

TUGS: Over 50 private towing and transportation companies registered in the port.

BERTHING:

Brooklyn: 8 berths at South Brooklyn Marine Terminal, including 2 container berths; 4 berths at 23rd Street Pier; 7 berths at Red Hook Marine Terminal.

Hudson River: Passenger Ship Terminal on Manhattan Shore between 48th and 52nd Streets provides 6 ship berths.

Hoboken Port Authority Marine Terminal: 2 piers, 4 general cargo berths.

Jersey City: 2 berth container facility at Port Jersey (Global Terminal) with 5 gantry cranes.

Newark, N.J.: Port Newark (22 general cargo, 5 specialised, and 4 container berths). Depth range alongside 30 ft. – 34 ft. Berths No. 10 and 12 handle coal with 3 floating cranes, rate 10,000 tonnes per day.

Elizabeth, N.J.: Elizabeth Port Authority Marine Terminal, 22 full container berths, channel depth 35 ft.

Department of Ports and Trade: The Department of Ports, International Trade and Commerce (PITC) of the City of New York is responsible for maintaining, leasing, and developing City-owned waterfront property. One of the principal maritime agencies in the nation's busiest port, the Department is actively involved in harbour affairs. As part of its commitment to the economic vitality of the Port, the Department plays a leading role in pressing for streamlined dredging operations, improved transportation connections, expansion of marine terminals, and the development of international trade and investment opportunities.

Howland Hook Container Terminal – Staten Island:

Operator: Sea Terminal Inc.

Shipping Line: Lloyd Brasileiro.

Situated on 187 acres in N.W. Staten Island, this facility offers 2,500 ft. of berthing space with a depth of 35 ft. 4×40 long-ton and 1×50 long-ton capacity container cranes on rail tracks move the entire length of the wharf so that vessels may be worked simultaneously by any combination of cranes. Special features include 360 reefer outlets, 22,000 sq.ft. of refrigerated warehouse space, plus 21,000 sq.ft. of hazardous cargo storage area. Shedded space of 280,000 sq.ft. is exclusively devoted to LCL shipments.

A Chessie System rail turnout directly links Howland Hook with Conrail track at Staten Island Junction in New Jersey. The terminal's location offers excellent access to the New Jersey Turnpike and Metropolitan New York.

South Brooklyn Marine Terminal:

Operator: Continental Terminal Inc.

Shipping Lines: Various lines bring cocoa shipments to this dedicated cocoa terminal.

Located directly off the Buttermilk Channel, this multi-purpose terminal can service as many as 9 vessels – container, LASH, Ro/Ro and breakbulk – simultaneously. Special features on this 110 acre site include a 90 ft., 75 ton capacity Ro/Ro ramp and 137 outlets for refrigerated containers. The terminal has a 70 short-ton, 2×50 long-ton capacity container cranes and a 140 long-ton P&H mobile crane. Also available is 705,000 sq.ft. of shedded space.

The Terminal is adjacent to the New York Cross Harbor Railway, an intermodal rail yard, providing carfloat/bridge and overland service connecting the terminal and Bayridge rail line with Oak Point Yard in the Bronx to points throughout the U.S., Canada and Mexico. Connections via Interstate 278 provide direct access to the region's major truck routes and airports.

With the cocoa operator in place since 1988, The City of New York is seeking other specialised breakbulk and container operators for the terminal.

Red Hook Container Terminal – Brooklyn:

Operator: Universal Maritime Service Corporation.

Shipping Lines: Elma-Empresa Lineas Maritimas-Argentinas-Elma, A. Bottacchi S.A. de Navegacion, America Africa Europe Line, Frota Amazonica, Chilean Line, D. B. Turkish, Egyptian National Line, Grancolombiana, Torm Lines, Venezuelan Line, Ivaran Lines, Hoegh Lines, Holland Pan-American Line, Jugolinija, P.T. Djakarta Lloyd, Waterman.

The newest cargo terminal in the harbour, Red Hook, is a joint venture between the City of New York, New York State and the Port Authority of New York and New Jersey. Situated on the 40 ft. deep Buttermilk Channel, this 79 acre facility offers 6,700 ft. of berthing space serviced by 4×40 long-ton capacity container cranes, 660 ft. of Ro/Ro berthing space. Water depth alongside the container berth is 40 ft. (MLW) and 35 ft. (MLW) by the Ro/Ro and breakbulk berths. Approximately 350,000 sq.ft. of cargo consolidation and breakbulk handling space is available at dockside. A computerised inventory control system provides maximum efficiency and security.

Red Hook's convenient location saves 3 hours sailing time over most New Jersey terminals and saves in tugboat costs. Direct rail access to the New York Dock floatbridge is available, allowing for direct delivery of boxcars and flatcars. Connections via Interstate 278 provide direct access to the region's major truck routes.

Also see "Developments".

Pier 36 Terminal – Manhattan:

Operator: Vacant.

Situated on 10 acres off the East River, Pier 36 is the sole marine terminal in Manhattan capable of handling breakbulk, Ro/Ro and containerised cargo. In 1986, 82,000 long-tons were handled. The facility offers 1,300 ft. of berthing space with a dockside depth of 32 ft. and 175,000 sq.ft. of covered transit shed space. Its location offers direct access to the lucrative Manhattan market, as well as convenient access to major truck routes in the Metropolitan area.

Pier 42 Terminal – Manhattan:

Operator: Vacant.

Shipping Lines: —

More recently used for handling imported bananas, pineapples and coconuts, Pier 42 is located on the East side of Lower Manhattan. 4 specialised gantry cranes and a highly mechanised operation enable this terminal to move 150,000 boxes of fruit per day. The facility handled 200,000 long-tons of fruit over the course of calendar year 1986. The terminal contains over 120,000 sq.ft. of warehouse space including an air-conditioned storage area. Water depth at dockside is 32 ft. 48 truck loading bays ensure that goods move quickly from dockside to the road.

CONTAINER FACILITIES: *Atlantic Container Line Terminal/Elizabeth:*

Location: South side of Elizabeth Channel (Berths 68, 70, 72, 74 and 76).

Owner or Lessee: The Port Authority of NY and NJ.

Terminal Operator: Atlantic Container Line.

Address and Telephone: 2170 North Fleet Street, Elizabeth, NJ 07201. Tel: (201) 289-3000 or (800) 526-6802.

Total Area of Terminal: 102 acres.

Length of Ship Berths: Berths 68 to 74: 2,825 ft. Berth 76: 750 ft.

Container Cranes: 3×30 tons (Paceco).

Equipment: 5 Clark straddle carriers (31.5 tons.) 15 Ottawa hustlers (25-ton capacity). 13 Ottawa hustlers (35-ton capacity). 1 Ottawa hustler (125-ton capacity). 1 P & H truck crane with 70 ft. boom (90-ton capacity). 2 Hyster cranes (5-ton capcity). 41 Hyster trucks (capacities ranging from 2.5 tons to 23 tons). 1 Kalmar truck (25-ton capacity).

Stuffing and Stripping Facilities: 145,880 sq.ft. 88 truck bays. Served by rail siding.

Ro/Ro Accommodations: 2 ramps×60 tons.

Rail Service: Conrail.

Global Marine Terminal/Jersey City:

Location: West shore of Upper New York Bay at the Jersey City-Bayonne boundary (part of the Port Jersey industrial complex).

Owner or Lessee: Global Terminal and Container Services, Inc.

Terminal Operator: Global Terminal and Container Services, Inc.

Address and Telephone: P.O.Box 273, Jersey City, NJ 07303. Tel: (201) 451-5200 or (212) 344-7020.

Total Area of Terminal: 100 acres.

Length of Ship Berth: 1,800 ft.

Container Cranes: 3 Star×40 tons. 1 Krupp×40 tons.

Toploader: 1 Taylor×30 tons.

Sideloader: 1 Taylor×8 tons.

Mobile Yard Gantry Cranes: 3 Drott×30 tons. 2 Krupp×40 tons EP.

Fork Lift Trucks: 1×26 tons, 1×30 tons, 2×15 tons.

Stuffing and Stripping Facilities: 140,000 sq.ft. 150 truck bays. Served by rail siding.

Rail Service: Conrail and Port Jersey R.R.

Chassis Vertical Stacking: 18 racks with a total capacity of 324 chassis stored vertically.

Howland Hook Terminal/Staten Island:

Location: Staten Island on the Arthur Kill just North of Goethals Bridge.

Owner or Lessee: The Port Authority of NY & NJ.

Terminal Operator: Sea Terminal, Inc.

Address and Telephone: 300 Western Avenue, Staten Island, NY 10303. Tel: (718) 816–7748.

Total Area of Terminal: 187 acres.

Length of Ship Berth: 2,500 ft.

Container Cranes: 4 IHI×40 tons, 1 Peiner×50 tons with rotating spreader, 2 Paceco×50 tons (2 on order).

Fork Lift Trucks: 19×10 tons to 50 tons.

Stuffing and Stripping Facilities: 208,000 sq.ft., 150 truck bays, 22,000 sq.ft. refrigerated warehouse plus MID defrost and inspection facility, 21,000 sq.ft. Special cargo warehouse.

Equipment: 4 heavy fork lifts (11.5 tons to 30 tons), 4 top loaders×50 tons, 3 top loaders×35 tons, 1 top loader×30 tons, 48 yard tractors, 79 hilos×2.5 tons.

Rail Service: Delaware Otsego Corp. (SIRC).

Maher Terminal/Fleet Street, Elizabeth:
Location: South side of Elizabeth Channel (Berths 62, 64 and 66).
Owner or Lessee: The Port Authority of NY and NJ.
Terminal Operator: Maher Terminals, Inc.
Address and Telephone: 202 North Fleet Street, Elizabeth, NJ 07201. Tel: (201) 527-8200 or (212) 962-6322.
Total Area of Terminal: 94 acres.
Length of Ship Berth: 2,000 ft.
Container Cranes: 2 Star×40 tons, 2 Star×30 tons.
Equipment: 20 straddle carriers, 30 yard hustlers, 14 fork lifts×15 tons, 15 fork lifts×4 tons, 30 fork lift×2.5 tons.
Stuffing and Stripping Facilities: 155,000 sq.ft. 120 truck bays. Served by rail siding.
Rail Service: Conrail.

Maher Terminal/Tripoli Street, Elizabeth:
Location: Newark Bay (Berths 78, 80, 82, 84 and 86).
Owner or Lessee: The Port Authority of NY and NJ.
Terminal Operator: Maher Terminals, Inc.
Address and Telephone: 4010 Izmir Street, Elizabeth, NJ 07201. Tel: (201) 527-8400.
Total Area of Terminal: 243 acres.
Length of Ship Berth: 3,150 ft.
Container Cranes: 3 Paceco×40 tons (low profile), 1 Canron×30 tons, 3 Morris×30 tons.
Equipment: 80 yard hustlers, 12 stackers (15-ton capacity), 7 toploaders×40 tons, 40 fork lifts×2.5 tons, 60 fork lifts×4 tons, 4 transtainers.
Stuffing and Stripping Facilities: 371,000 sq.ft., 238 truck bays. Served by rail siding.
Rail Service: Conrail.

Maersk Line Terminal/Port Newark:
Location: North side of Elizabeth Channel (Berth 51).
Owner or Lessee: The Port Authority of NY and NJ.
Terminal Operator: Maersk Container Service Co., Inc.
Address and Telephone: 231 Tyler Street, Port Newark, NJ 07114. Tel: (201) 465-1000.
Total Area of Terminal: 61.8 acres.
Length of Ship Berth: 764 ft.
Container Cranes: 2 Paceco×30 tons.
Equipment: 1 top loader×50 tons, 1 top loader×35 tons, 1 top loader×13 tons, 1 stacker×15 tons, 70 hilos×5 tons to 7 tons.
Stuffing and Stripping Facilities: 198,000 sq.ft., 154 truck bays. Served by rail siding.
Rail Service: Conrail.

Navieras de Puerto Rico Terminal/Elizabeth:
Location: South side of Elizabeth Channel (Berths 52, 54, 56, 58 and 60).
Owner or Lessee: The Port Authority of NY and NJ.
Terminal Operator: Puerto Rico Marine Management, Inc.
Address and Telephone: P.O.Box 1910, Elizabeth, NJ 07207. Tel: (201) 352-2700 or (212) 775-7330.
Total Area of Terminal: 97 acres.
Length of Ship Berth: 2,875 ft.
Container Cranes: 3 Paceco×30 tons.
Stuffing and Stripping Facilities: 116,700 sq.ft., 163 truck bays. Served by rail sidings.
Ro/Ro Accommodations: 3 ramps for side port operations.
Rail Service: Conrail.

Red Hook Container Terminal/Brooklyn:
Location: Brooklyn Waterfront, near entrance to Brooklyn-Battery Tunnel.
Owner or Lessee: The Port Authority of NY and NJ.
Terminal Operator: Universal Maritime Service Corp.
Address and Telephone: Building 115, foot of Hamilton Avenue, Red Hook, Brooklyn, NY 11231. Tel: (212) 875-0777.
Total Area of Terminal: 79 acres.
Length of Ship Berth: 3,030 ft.
Container Cranes: 3 Paceco×40 tons.
Equipment: 11 top handlers, 2 fork lifts×26 tons, 5 fork lifts×15 tons, 33 yard hustlers, 16 flatbed trailer, 125 hilos×3 tons.
Stuffing and Stripping Facilities: Break-bulk consolidation shed, 200,000 sq.ft., 80 truck bays.
Ro/Ro Accommodations: 660 ft. berth.
Rail Service: New York Dock Railway.

Sea-Land Terminal/Elizabeth:
Location: Newark Bay (Berths 88, 90, 92, 94, 96 and 98).
Owner or Lessee: The Port Authority of NY and NJ.
Terminal Operator: Sea-Land Service, Inc.
Address and Telephone: P.O.Box 1050, Elizabeth, NJ 07207. Tel: (201) 558-6000.
Total Area of Terminal: 232 acres.
Length of Ship Berth: 4,519 ft.
Container Cranes: 6 Paceco×40 tons.
Equipment: 3 top loaders×30 ton capacity, 45 fork lifts×2.5 tons to 12.5 ton capacity, 60 yard hustlers.
Stuffing and Stripping Facilities: 306,000 sq.ft., 328 truck bays. Served by rail siding.
Rail Service: Conrail.

South Brooklyn Marine Terminal/Brooklyn:
Location: Brooklyn shore of Upper New York Bay.
Owner or Lessee: The City of New York.
Terminal Operator: Continental Terminals, Inc.
Address and Telephone: Foot of 39th Street, Brooklyn, NY 11232. Tel: (718) 499-6300.
Length of Ship Berths: 1,535 ft. container berth plus 7 general cargo berths.
Container Cranes: 1 Star×50 tons, 1 Star×70 tons, 1 Kone×50 tons.
Equipment: 9 Valmet straddle carriers, 6 Clark straddle carriers, 10 Ro-Ro yard Tractors, 8 stackers, 65 fork lift trucks (varying capacity).
Stuffing and Stripping Facilities: 705,050 sq.ft., 4 separate LTL sheds 446,000 sq.ft. CFS and general cargo sheds.
Roll-On/Roll-Off Accommodations: 2
Rail Service: New York Cross Harbour Railroad Terminal Corp.

Universal Terminal/Port Newark:
Location: North side of Elizabeth Channel (Berths 53, 55, 57 and 59).
Owner or Lessee: The Port Authority of NY and NJ.
Terminal Operator: Universal Maritime Service Corp.
Address and Telephone: 221 Starboard St., Port Newark, NJ 07114. Tel: (201) 589-6200.
Total Area of Terminal: 85 acres.
Length of Ship Berth: 3,058 ft.
Container Cranes: 3 Paceco×40 tons.
Equipment: 11 top handlers, (42-ton capacity), 2 fork lifts, (26 tons), 5 fork lifts (15 tons), 33 yard hustlers, 16 flatbed trailers, 25 hilos (3 tons).
Stuffing and Stripping Facilities: Break-bulk shed 400,000 sq.ft. Served by rail sidings.
Rail Service: Conrail.
Also see "Berthing".

CRANES: Mobile floating cranes with capacity up to 500 tons available.

STEVEDORES: 13 stevedoring firms are active in the port, many of whom are also terminal operators. Normal working hours 0800-1700 hrs. Bulk Cargo work usually continues through 24 hours.

TANKERS: There is a history of repeated breakouts in the New York area due to sudden wind gusts of up to 60 knots, particularly associated with squalls. Moorings should, therefore, be kept tight and winch brakes tightened up after moorings have been adjusted.
Brooklyn: Paragon Oil Terminal, 2 berths, depth 37 ft.; Patchoque Oil Terminal, 2 berths, depth 29 ft. and 35 ft.; Whale Oil Terminal, 1 berth, depth 36 ft.
Hudson River: Tappan Oil Co., 1 berth, 35 ft. depth.
Bayonne, New Jersey: Public Oil Terminal, 3 berths, 32 ft. depth; Humble Oil Terminal, Constable Hook, up to 38 ft. depth; Belcher Oil Co., 3 tanker berths up to 38 ft. depth; Texas Oil Co., 4 tanker berths up to 32 ft. depth; Texaco, 4 berths up to 32 ft. depth. Constable Terminal: 1 berth for handling caustic soda, chemicals, vegetable oil and molasses. 27 tanks (9 million gallons). Max. draft 31 ft. MLW.
Kill Van Kull: Lehigh Tanker Terminal, chemicals, 35 ft. depth; Humble Oil Co., 3 tanker berths, up to 38 ft. depth; Texas Oil Co., 4 tanker berths up to 32 ft. depth; Ross Oil Co., 1 berth up to 32 ft. depth.
Newark, New Jersey: 4 berths, 31 ft. and 32 ft. depth.
Elizabeth New Jersey: Chevron Oil Company, 1 tanker berth, 26 ft. depth; Crown Central, 1 tanker berth, 30 ft. depth.
Arthur Kill: **Perth Amboy,** Chevron Oil Co. (tanker berth, 26 ft. depth); Hess Oil Co. (tanker berth 30 ft. depth); Cities Service (tanker berth 34 ft. depth); **Stolt-Nielsen,** (tanker berth max. draft 38 ft.); **Sewaren,** Royal Petroleum Co. (tanker berth, 32 ft. depth); Public Service Co. (tanker berth, 35 ft. depth); Shell Oil Co. (tanker berth, 35 ft. depth). **Port Socony,** Mobil Oil Co. (2 tanker berths, 27 ft. and 30 ft. depths). **Carteret,** American Oil Co. (tanker berth M, 25 ft. depth); General American (2 tanker berths, 25 ft. and 35 ft. depth). **Linden,** Cities Service (tanker berth, 32 ft. depth); Humble Oil Co. (tanker berth, 35 ft. depth); Sinclair Oil Co. (tanker berth 31 ft. depth). **Gulfport,** Gulf Oil Co. (tanker berth, 32 ft. depth).
Lightering Operations: Most crude and black oil tankers and an occasional clean oil tanker entering the Port of New York must be lightered before proceeding to their assigned discharge berths. All such vessels are assigned an anchorage either off Stapleton, Bay Ridge, or Gravesend Bay. (See "Anchorages" and "Approaches").

Lighters used in the New York area range from 1,000 – 12,000 d.w.t. capacity.

The U.S. Coast Guard has established regulations for oil transfer operations in U.S. waters as a means to avoid oil pollution. These regulations are enforced. The principal items covered by the new regulations are as follows:

1. Designation of person(s) in charge.
2. Qualifications of person(s) in charge.
3. Oil transfer procedures.
4. Emergency shutdown.
5. Records.
6. Requirements for oil transfer.
7. Connections, drip pans.
8. Declaration of Inspection.
9. Supervision by person in charge.

In most instances, an oil Company employed Oil Pollution Prevention Inspector will board vessel at anchorage to assist with the USCG requirements. In any case, the lighter officer must contact vessel for a joint inspection and completion of a Declaration of Inspection before oil transfer can be started.

Exxon Bayonne Terminal: The Exxon Bayonne Terminal at Bayonne, New Jersey, is located on the Northside of Kill Van Kull, 1.6 miles East of the Bayonne Bridge.

The terminals structure is a 700 ft. long concrete pier having a hose gantry and shore gangway. 2 teflon faced fenders breast the vessel out into the dredged basin.

Lube Dock – Pier 1: Docking/Mooring: Usually all vessel dock portside to at Bayonne with 2 tugs assisting. Vessels should arrive off the berth at slack water, turn, and head into the slip. Care should be taken not to have too much headway or to set down on the corner of the pier which is not fendered. Vessels should be taken completely into the slip before landing on the fenders. Fenders are teflon faced and will not slow the forward motion of the vessel. Once in position, 2 tugs will hold the ship while lines are run out. If the vessel extends past the end of the pier, then extra lines should be used aft as a precaution for the tidal current and passing traffic. Vessels having a bow thruster can undock with 1 tug, at the discretion of the Master. (See "Plan").

Hoses/Pumping: All shore connections are 6 in. A maximum pressure of 125 p.s.i. is enforced. There are no slop facilities ashore.

Bunkers/Water: Bunkers are not available at this facility. Bunkering can be arranged at anchor. For bunker requirements, the vessel's Agent should be contacted prior to taking arrival at Ambrose. Fresh water is not available at the dock.

Weather: There is a history of repeated breakouts in the New York area due to sudden wind shifts accompanied by strong and gusty winds. Vessels alongside the dock must insure that mooring lines are taut and properly set. Vessels are strongly advised to maintain a VHF weather watch and to shut down operations if conditions warrant. The terminal closes the berth during sustained Westerly winds of 50 m.p.h. or during sustained winds over 73 m.p.h. from any direction. During these conditions, vessel must shut down and disconnect; a tug may be required to stand by.

Fuels and Specialty Dock – Pier 6: The Fuels and Specialty docks are located on the North side of Kill Van Kull, just off the Constable Hook Range. The terminal structure is a steel and concrete pier connected to a concrete capped turning dolphin and fender system on the offshore end.

Docking/Mooring: Prior to berthing the intended docking manoeuvres should be reviewed with the Pilot. Information on the velocity and direction of the current as well as water height should be obtained from the Pilot. Tidal data is recorded from stations at the Battery, New York and Bergen Pt., New Jersey every 6 minutes. Readings can be obtained through VHF Channel 9 KEH 567.

Generally, vessel is assisted by 2 tugs. One of the 2 tugs will make fast near the bow. The second tug stands by on the inboard berthing side forward without making fast. As the vessel approaches the berth the inboard tug moves aft along the ship's side. This tug then shifts to the outboard quarter of the vessel in order to assist in berthing the ship against the dock fenders.

If installed, bow thruster should be ready for immediate use.

Ships should arrive off the berth at slack water. Care should be taken approaching the berth with minimum headway. Vessel should be taken completely into the slip before landing on the dock fenders.

Occasionally, unexpected cross currents are experienced while approaching the berth. Immediate corrective action may be required to maintain the ship within the dredged area in the vicinity of the berth.

Vessels approaching Pier 6 for docking on the North berth will appear to be making an approach towards the South berth. When the vessel's bow is close to the dolphin a the end of Pier 6, the ship is moved laterally North and ahead a sufficient distance to clear the fender line of the North berth. This manoeuvre is necessary due to the shoal area North of the dredged basin. Once in position 2 tugs will hold the ship while lines are run out. If the vessel extends past the end of the pier, then extra lines should be used aft as a precaution for the tidal current and passing traffic. Vessels having a bow thruster can undock with 1 tug at the discretion of the Master. (See "Plan")

Hoses/Pumping: Presentation flange sizes are grade dependent and can be obtained from Agent prior to arrival. A maximum hose pressure of 125 p.s.i. is enforced. There are no slop facilities ashore.

Bunkers/Water: Bunker C is available at this facility. Other bunkers can be arranged at anchor. For bunker requirements, the vessel's Agent should be contacted prior to taking arrival at Ambrose. Fresh water is available in limited quantities at a rate of about 20 t.p.h.

Exxon Bayway Terminal: The Exxon Bayway Terminal, consisting of 2 marginal type berths, is owned and operated by Exxon Company, U.S.A.

It is situated on the West bank of the Arthur Kill just below the Goethals Bridge.

Proceeding from Anchorage to Bayway: The Pilot/Mooring Master and tugs join the vessel at the anchorage. One of the tugs will assist in holding the stern of the ship up against the tide if a turn is required in the anchorage. Departure from anchorage is timed so that the vessel will arrive off Bayway at HW slack.

Before leaving the anchorage, the Pilot will broadcast a message by VHF advising other ships and New York VTS of the position of the vessel and the route it will follow. Normally 2 tugs attend the vessel while proceeding from the anchorage through the Kill Van Kull and Arthur Kill (between Staten Island and New Jersey) to the berth.

Three bridges are passed:

Bayonne Bridge: Vertical clearance of 140 ft. over channel at MHW.

Lift Bridge: Vertical clearance of 135 ft. over channel at MHW.

Goethals Bridge: Vertical clearance of 137 ft. over channel at MHW.

Because of the heavy traffic situation in the Port of New York and the close proximity of berthed vessels, ships should proceed at a moderate speed during the entire passage to Bayway. Also, ship personnel should stand-by the anchors.

On entering the Kill Van Kull the tide will be setting Northwestward and attention is to be paid to stay well clear of the bank extending Southward from Robbins Reef.

As a rule, the Pilot will be aware in advance of seagoing vessels proceeding Eastward through the Kill Van Kull. Normally the vessel will not enter the Kill until such outbound vessels have cleared the entrance.

Extreme caution is to be exercised when approaching and passing Bergen Point (about 3 miles Westward of the entrance to the Kill Van Kull) where 3 channels converge. In this are the view is obstructed by the Bayonne Bridge and by oil storage tanks located on Bergen Point.

The Pilot will communicate (VHF Channel 13) with the Pilots on the other vessels approaching this point and make arrangements for the vessel to pass this area without encountering other seagoing ships. Traffic information is also obtained from the operators of the railroad drawbrige across Newark Bay.

At times, cargo ships with destination Port Elizabeth wait off Bergen Point for the drawbridge to open. Normally, the Pilot is aware of this situation well in advance and the speed is adjusted to ensure that such ships are not passed off Bergen Point.

Berthing: The dock is a substantial concrete marginal-type with bollards located on land and on the dock. Most breast lines are run to hooks located on the dock which are secured to the shore bollards by wires. Spring lines are generally passed to the dock first. Large vessels dock and undock with the assistance of 2 tugs.

Large ships are berthed starboard side to (see "Plan") heading Southward; LPG ships docking at Berth No. 2 may berth portside to. (See "Report" dated August 1984).

The dredged basin at Berth No. 1 requires that the vessel be stopped off the berth and breasted into position. During docking, when vessels are in position, tugs hold the vessel alongside until all mooring lines are passed.

Passing traffic could cause the ship to break away from the Berth if mooring lines are not maintained tight and if the ship is not kept snug alongside at all times.

The following minimum moorings are required at the Bayway Pier:

Forward	*Aft*
2 head lines	2 stern lines
2 breast lines	2 breast lines
2 spring lines	2 spring lines

Depending on circumstances, additional moorings may be run out.

Departure:

1. Ships under 660 ft. LOA and mast height up to 130 ft. are turned off the berth and proceed to sea along the route which was followed when entering. The same precautions have to be taken when approaching the area off Bergen Point outward.

2. Ships over 660 ft. LOA are not turned off the berth because of limited manoeuvring space. They proceed to sea via the Southern part of Arthur Kill and Raritan Bay. A tug will accompany the ship until it has cleared Tufts Point (about 4 miles South of Bayway). The depths in the channel Southward of Bayway limit the departure draft to 33 ft.

The bridge across the channel near the Southeastern tip of Staten Island has a clearance of 143 ft. over the channel at MHW. Rounding Tremley Point (about 2 miles South of Bayway) requires particular attention. The view in this area is obstructed, therefore, before reaching this point the Pilot should ensure that there is no traffic approaching from the South which could hamper safe passage. Off Tufts Point, a 70° course alteration to starboard has to be made. The manoeuvring space is limited, and if required, the attending tug will assist in making the turn.

Tidal Information: Off Bayway the HW levels vary between 2.5 ft. and 5.0 ft. above MLW. Extreme LW has been reported as low as 4.0 ft. below MLW level. Current velocities of up to 2.0 knots are experienced.

Loading Connections: Berth No. 1 has 3×10 in. Chicksan Arms for receipt of crude oil.

Berth No. 2 has 3×10 in. Chicksan Arms for LPG receipt.

Both berths can also handle many refined black and clean products with various hose sizes up to 10 in.

Bunkers and Fresh Water: No bunkers are available through the pier connections at Bayway. All grades of bunkers may be supplied by barge, either at anchorage or while alongside the pier, providing arrangements are made in advance.

Fresh water is available in unlimited quantities, at approximately 20 t.p.h. to 25 t.p.h.

Stores, Provisions, Lubricants: All kinds of stores and provisions can be made available and delivered by truck or lighter, if advance request of at least 24 hours is received. During normal working days, stores and provisions may be supplied on very short notice.

Weather: There is a history of repeated breakouts in the New York area due to a sudden wind shifts accompanied by strong gusty winds. Vessels alongside the dock must ensure that mooring lines are taut and properly tended at all times and that winch brakes are properly set. During wind shifts and frontal passages, vessels have been blown off the dock with vessel and dock damage as well as pollution resulting. Vessels are strongly advised to maintain a VHF weather watch and to shut down operations if weather conditions warrant. Dock personnel will also advise vessels to shut down operations if an electrical storm is in the vicinity or if winds exceed 30 m.p.h. At 35 m.p.h. to 40 m.p.h., hoses and/or arms may be disconnected.

Belcher Bayonne Terminal: The Belcher Terminal in Bayonne, New Jersey is located 1.1 miles East of the Bayonne Bridge on the North bank of Kill Van Kull. The dock's facilities consist of 2 concrete mooring islands protecting a 600 ft. long wooden pier on which all pipe-lines and the hose gantry are supported.

Transit from Anchorage to Terminal: The Pilot/Mooring Master will board and heave anchor approximately 1.5 hours to HW (Battery). Then proceed into Kill Van Kull. 2 tugs will assist the vessel in docking. (See also Bayway Terminal).

Docking and Mooring: All vessels dock starboard-side-to with the assistance of 2 tugs. Vessels approach the terminal at time of HW slack with minimal headway. Due to the shape of the dredged basin all vessels are normally spotted off the berth and then moved broadside into position alongside the breasting islands. Tugs hold vessel in position while a small line boat runs head and stern lines to pile clusters. Note that the head line cluster is placed well inshore resulting in long (460 ft.) head lines leads. Head and stern lines cannot be wire due to the inadequacy of the small line boat. See "Plan".

Due to heavy passing vessel traffic, all mariners are advise to run extra lines to ensure that the vessel will remain safely in berth at all times.

The minimum suggested mooring arrangement is as follows:

4 head lines
3 forward springs
3 after springs
4 stern lines

Due to the poor mooring line leads from the bow, extra care should be given to the tending of all lines during the discharge. *There have been reports of vessels being pulled from the berth by passing traffic; exceptional care must be taken to properly tend mooring lines at all times.*

Hoses and Pumping: Cargo manifolds should be prepared prior to docking. The proper size and number of reducers should be in place and the blanks removed. Prior to berthing, ask the vessel's Agent what number and size of reducers are required. This will vary depending on the particular cargo being delivered. All shore hoses are equipped with 8 in. American standard flanges. Maximum working pressure allowed at the manifold is 125 p.s.i.

Bunkers and Water: Some grades of fuel oil are available from the dock in emergency situations, but most vessels bunker by barge. Fresh water is available in unlimited quantities at approximately 20 t.p.h.

Weather: There is a history of repeated breakouts in the New York area due to sudden wind shifts accompanied by strong and gusty winds. Vessels alongside the dock must ensure that mooring lines are taut and properly tended at all times and that winch brakes are properly set. Vessels are strongly advised to maintain a VHF weather watch and to shut down operations if weather conditions warrant.

Shipmaster's Report: 1976.

Greater New York Terminal, Astoria, Long Island:

Location of Berth: Lat. 40° 47′ N., Long. 73° 53.7′ W.

Distance from Entrance to Berth: 28 miles.

Max. Size at Berth: LOA, 900 ft. Draft, Pilot stated 34 ft.

Restrictions: Vessel should be ballasted sufficiently to pass under Brooklyn Bridge, clearance 127 ft.

Vessels may berth and unberth day and night but only at certain stages of the tide.

Anchorage: At Stapleton as designated by USCG.

Terminal Information: Starboard side manifold to barge at Stapleton Anchorage, use 6 in. hoses. Port side manifold used at the berth, ship's hoses not required. The connection is 12 in. running into 18 in. Nearest shore tank 1,000 ft. from berth. Line fitted with steam jacket but not efficient. Max. pressure allowed 125 p.s.i. Shore gantry used at berth. Derrick used at anchorage for discharging into barge. Product handled: Fuel Oil (Heating Oil). No slop tanks available.

General: Pilotage compulsory. Ambrose Pilot requires 24 hours' notice of arrival. Radio station handling traffic is Chatham. Most services are available at the berth, however it is advisable to take stores and send laundry from Stapleton Anchorage as there is no means of delivery at the berth other than carrying by hand. Stapleton Launch Service, tel. 981-8333/8384. Fresh water may have to be taken by barge in very severe weather as shore lines become frozen.

Approaching: From a Line from Rockaway Inlet to Ambrose thence Highlands Light, vessel must remain on VHF Channel 13 for ship-to-ship communication. When Pilot on board he maintains this Channel and ship can use own VHF other Channels. Marine operator on VHF 26 (call). For the passage of East River (remember Brooklyn Bridge Clearance 127 ft.) one tug each bow alongside. After Hell's Gate and passing Port Morris to port, vessel cants to starboard to pass between North and South Brothers to starboard and Rikers Island to port through 500 ft. wide buoyed channel (some unlit) South to berth (inwards). It is preferable to come through Hell's Gate at HW or LW slack, thus avoiding cross currents between Brothers at other times.

Report: August 1984.

Exxon LPG Berth at Bayway:

United States Coastguard requires all vessels with cargo on board (other than heel) to both enter and depart via Southern Channel, regardless of length. If vessel discharges completely (only heel remaining), then vessel is considered non-dangerous by U.S.C.G., and may depart via North Channel (without turning). (If completely discharged, other gas carrier restrictions – daylight only, 2 mile visibility, etc. – also do not apply.)

There are obstructions to South of Exxon berth which limits distance between manifold and bow or stern to 330 ft. (May be stretched to 335 ft. by Exxon on case by case basis.)

Other limitations given by Exxon for berth:

Draft: 31 ft.
Beam: 100 ft. (may be stretched)
Manifold Position: 13 ft. to 68 ft. above water line, 6 ft. to 15 ft. from deck edge.

Therefore any vessel which sails with part cargo must be turned for departure to comply with U.S.C.G. although it is physically possible to turn vessels up to 725 ft. – 730 ft. LOA off Exxon Berth provided there is no vessel berthed opposite Exxon at Gulfport (it has been done). Exxon is afraid that vessel might damage sea water intake structure for refinery while turning, and therefore says vessels longer than 660 ft. (may be stretched to 680 ft.), cannot be turned.

Other possibilities for turning are:

Continue North about 1 mile to Elizabethport Container Terminal where channel is wider.

Back ship anywhere between a few ship lengths to 0.5 miles South of Exxon, and then turn. We were advised by East Coast Pilots that it is possible to turn ship up to 730 ft. LOA at that location, with draft limit 25 ft. forward, 30 ft. aft. However, others advise that although oil tankers customarily turn at that location, it involves touching bottom (mud) at bow, and is therefore inadvisable for gas tankers.

FRESH WATER: Available at most piers in the port district at a nominal rate. Water barge available to serve vessels at anchor in emergency but this is expensive.

FUEL: All grades of fuel readily available. Except for tankers loading or discharging, bunkers are normally delivered by barge. It may be economical to shift vessel to refuelling berth.

GANGWAY/DECK WATCHMEN: Available and recommended if any crew detained by Immigration.

CUSTOMS ALLOWANCES: 200 cigarettes or 2 lb. tobacco, 1 quar wine/spirits per man.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I – 95 to be made up for each crew member on arrival.

REPAIRS: All facilities available for any size vessels.

DRY DOCKS: 4 docks with lifting capacities up to 25,000 tons (Bethlehem) and 1 dry dock capable of handling vessels of up to 1,100 ft LOA, 140 ft. beam and 120,000 d.w.t.

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours from first Sunday in April till last Sunday in October.

AIRPORT: Kennedy International Airport, Newark International Airport, La Guardia Airport.

HOLIDAYS: New Year's Day (January 1st); Martin Luther King, Jr.'s Birthday (January 15th); Lincoln's Birthday (February 12th); Washington's Birthday (February 22nd); Gleason's Birthday (March 17th); Good Friday; Memorial Day (May 30th); Independence Day (July 4th); Labour Day (first Monday in September); Columbus Day (October 12th); Armistice Day (November 11th); Thanksgiving (fourth Thursday in November); Christmas Day (December 25th). No work on New Year's Day, Independence Day, Labour Day and Christmas Day.

SHORE LEAVE: Allowed except for crew members detained by Immigration.

DEVELOPMENTS: Newark Bay and Kill Van Kull Channels to container berths to be dredged to 40 ft. in 1991.

Red Hook Container Terminal to be extended by 350 ft. and an additional container crane is to be installed.

NIKISKI (including Kenai), Alaska: 60.41 N. 151.24 W. (See Plan)

Located on West side of Kenai Peninsula between Homer and Anchorage. Pan and brash ice in Inlet from November to March. Never freezes solid. Open all year.

APPROACHES: Via Cook Inlet.

DOCUMENTS: See "Anchorage, Alaska".

PILOTAGE: Pilot pick-up point 1 mile South of Homer Split light. Also see "Homer" Pilotage.

ANCHORAGES: Good anchorage.

MAX. SIZE: Harbour depth in excess 40 ft. Max. size 80,000 d.w.t. Tides diurnal range 28 ft. Also "Berthing".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

CUSTOMS: Quarantine, local. Immigration and Customs from Anchorage, Alaska.

TUGS: From Anchorage.

BERTHING:

1. Port Nikiski Dock: 3 sided, 550 ft. long, 200 ft. on each side, 1,000 ft wide, 12 feet at MLLW. 400 ft. by 75 ft. covered storage.

2. Three finger piers for tankers and bulk carriers. All exceed 40 ft depth.

All 3 berths are dolphin berths ideal for rapid bulk loading. Main products:

(a) Union Chemical Dock: Bulk urea and ammonia gas. See "Shipmaster's Reports".

(b) Phillips Petroleum Dock: Petroleum products and liquid natural gas.

(c) Kenai Pipe-line Dock: Refined and crude petroleum products

STEVEDORES: Two gangs.

MEDICAL: Health Centre, 3 doctors, 3 dentists.

TANKERS: Report: February, 1985.

Vessel to load ammonia at Kenai in position 60° 33′ N., 151° 16′ W.

Regulations:

1. Vessel must have on board 20-24 mooring lines, each a minimum of 400 ft. in length, depending on weather on arrival.
2. Fresh water and provisions cannot be obtained or loaded at the wharf.
3. No preventative engine maintenance can be allowed at the wharf and vessel's engines must be maintained in such a way as to permit immediate manoeuvring power at all times while vessel is alongside the berth.
4. Sufficient vessel personnel must remain on board during loading to handle any emergency situation and adequate deck watch must be maintained on a 24 hour basis.
5. For proper light ship survey vessel must arrive suitably trimmed and sufficiently submerged both fore and aft.
6. Ballast tanks must be either full or empty and all cargo holds must be totally devoid of any ballast.
7. Please also ensure vessel has all certificates in order, including Oil Pollution Certificate (Certificate of Financial Responsibility).

General:

Please obtain Master's acknowledgment and confirmation of all above. Advise Master that pilot station is located Lat. 59° 36.2′ N., Long. 151° 24.5′ W. Master should cable ETA Homer pilot station to Agent.

Master to monitor ITT KFS (San Francisco) while in transit. If ship has telex on board, please provide number.

Rental mooring lines available at U.S.$300 each plus loading/unloading costs of U.S.$1800. Advise how many lines onboard and Agent will request funds based on how many rental lines necessary.

Berth Operator sometimes makes exceptions to restrictions on a case by case basis.

IFO fuel is virtually unobtainable in Alaska. While there is one supplier at Kenai (and none elsewhere in Alaska), they have a long standing and firm 5,000 bbl. minimum requirement with no exceptions.

Vessel will vacate berth during purging and will either purge at anchor off berth or at Homer.

Load rate 400 tonnes/p.h., except during purging, when rate much slower.

Confirm vessel has Letter of Compliance issued by Coast Guard and that vessel has been licensed to carry propane/ammonia simultaneously.

REPAIRS: Some at Kenai.

FRESH WATER: Limited.

FUEL: Not available.

TRANSPORTATION: Highway to Anchorage and Homer. Air transport available.

SHIPMASTER'S REPORT: July 1985.

Union Chemical Dock: (Formerly Collier Pier):

In addition to the comments on the "Plan", which see; the following notes are to be considered as a advice to those entering the Port of Nikiski:

Mooring without tugs. There is a 24 hour mooring service.

No mooring during slack tide.

Currents from up to 1.5 knots to 6.0 knots experienced.

Whilst mooring present bow first as near as possible to the pier at an angle of about 25° to the pier.

Firstly pass 2 spring lines and 2 head lines forward, engines running ahead for riding off the current.

It is most important during the entire mooring operation to hold both forward springs and both head lines tight.

Send out 2 breast lines forward; tighten; put both head lines on the bitts making sure not to allow any slack.

Send out 2 spring lines and two stern lines aft and tighten.

Send out 2 breast lines aft as soon as both stern lines are on the bitts and heave the stern along. Keep both aft springs tight at all times.

Note: Ships loading urea have to shift alongside when changing to another hatch, as the conveyor belt is a single point loading type.

Whilst shifting along the pier be aware of strong currents, or ice in Winter season getting caught between pier and ship's bow.

SHIPMASTER'S REPORT: October 1987.

Union Chemical Dock: This dock is the Southernmost dolphin berth and extends into the sea for approximately 800 m. It has a fixed loader for Urea. Ammonia gas is also loaded at this berth.

Anchorage: No anchoring allowed off Nikiski or Kenai. If the vessel has to vacate the berth for a priority vessel/barge, the vessel is taken back to Homer, a distance fo 84 nautical miles.

Berthing: Well handled by Pilots, making use of the tidal streams. No tugs available. The tidal stream runs at up to 6 knots and the range of the tides are up to 28 ft. For this reason a vessel is moored with a total of 19-20 ropes. Extra ropes can be hired and put on board at Homer Pilot Station.

Shifting alongside: This is only possible shortly before the changing of the tide. At all times have engines ready. Shifting up to 50 m. (2 holds) is not too difficult. We shifted from Hold No. 1 to No. 5 (100 m.) which took us about 3 hours. This is a much bigger operation than mooring as all ropes have to be shifted and there are only 4 men available ashore to assist. Also, by the time we finished there was already a strong flood tide running. When shifting over such a distance, I advise vessels to make use of a pilot.

Ice/Winds: According to pilots, some ice in Winter which makes berthing even more difficult. Strong southern winds may cause swell alongside.

Bunkers: Apparently fuel is available at another dolphin berth when unoccupied, but probably expensive.

Provisions: No ship chandler locally. Agents can arrange a small quantity of provisions from a supermarket at Kenai. No vehicular access to the vessel. Provisions transported on small car which runs through narrow 1 km. tunnel to the gate. This is also used by the crew.

Loading: Loading rate approximately 500 – 700 tonnes/hr. The shore figures may be wrong by 2% or more. The figures of a draft survey are taken for the final cargo loaded.

NORTHPORT, New York: 40.57 N. 73.20 W. **(See Plan)**

LOCATION: The Northport offshore oil discharge facility is operated by the Long Island Lighting Company. It is located in Lat. 40° 57′ 15.4″ N., Long. 73° 20′ 29.6″ W., approximately 10,000 ft. offshore from the power station, and approximately 2.6 miles East of Eatons Neck Point.

PILOTAGE: Pilotage is arranged by the vessel's Agent. A Pilot will be required to standby aboard vessel throughout transfer.

Vessels approaching from Block Island embark Pilot about 2.5 miles South of Point Judith.

U.S. flag vessels under enrolment approaching from Block Island embark Pilot 1.4 miles East of Old Harbour – Block Island.

The pilot boat 'Rhode Island Pilot' or 'Northeast Pilot' should be called via VHF Channel 16 approximately 1 hour prior to arrival at the pilot station.

APPROACHES: *Approaches to Pilot Station and Transit to Northport:* On approaching Block Island from the South, Block Island's high Southern shore provides a good radar target. Also, bearings can be taken from the RDF station at Southeast Light.

It is advisable to remain at least 1 mile to the East of Block Island due to the numerous shoals close in shore.

There are several dangers to be wary of when making the passage from the pilot station to Northport.

Block Island North Reef Buoy "1B1" marks a dangerous shoal and should be passed well clear.

The Race is a narrow channel into Long Island Sound. Strong East to West currents occur during maximum ebb or flood and knowledge of position should be maintained in view of the possibility of unusual set. Valiant Rock may be passed on either side.

Caution should be exercised during the Summer months when transiting through Block Island and Long Island Sound in view of the heavy small boat traffic, especially in the area in proximity to The Race.

Dense fog is prevalent during the Summer months.

Good water is found in Long Island Sound from The Race to Northport as long as the mid-channel buoys "P1" and "CF" are passed close by and care is taken so as not to pass North of "Twenty-Eight Foot Shoal" Buoy. "Stratford Shoal" should be passed to the South.

In the event that adverse weather restricts berthing, vessels should anchor, if necessary, North and East of the facility to avoid electric cables on the bottom. The submarine cables lie West of the facility and are shown on Chart No. 12363.

ANCHORAGES: All vessels are advised that 7 submarine electric cables lie West of the facility, as shown on USC & GS Chart No. 1213. To avoid any possibility of damage to these cables, vessels should anchor (if necessary) North and East of the facility.

RESTRICTIONS: Berthing of vessels shall be limited to 1.5 hours prior to and 30 minutes following high slack water, and shall be prohibited when winds exceed 20 knots.

MAX. SIZE: The maximum size vessel for which the Long Island Lighting Company can presently provide a safe berth, is a ship with a loaded displacement tonnage not to exceed 70,000 long tons and meeting all of the additional parameters as follows:

Hull Design:	Welded construction only.
Cargo Holds:	Compartmented.
Max. Length overall:	825 ft.
Max. Draft:	40 ft. at H.W.
Max. Beam:	144 ft.
Rail to Manifold:	15 ft. maximum.
Loaded Freeboard:	10 ft. minimum.
Light Freeboard:	40 ft. maximum.
Number of Mooring Lines:	20 independent lines.
Bow to Manifold:	50% of LOA.

RADIO: *ETA:* Vessels are required to send ETA message 72, 48 and 24 hours in advance of arrival at Block Island Pilot Station. These messages are to be sent to Agent in New York. Advise arrival draft (salt water) in initial message.

VHF: Pilots can be contacted on VHF Channels 16, 13 and 18A.

TUGS: A minimum of 2 tugs are required for mooring and a minimum of 1 tug for unmooring. Terminal requires 1 tug in attendance while vessel is alongside. A launch is provided by terminal to run vessel's lines to the mooring buoys. Launch will stand-by throughout operations.

BERTHING: *Precautionary Weather Information:* There is a history of repeated breakouts in the New York area due to sudden wind shifts accompanied by strong and gusty winds. Vessels alongside the platform must insure that mooring lines are taut and properly tended at all times and that winch brakes are properly set. Vessels are strongly advised to maintain a VHF weather watch and to shut down operations if weather conditions warrant.

The terminal requires suspension of transfer operations and clearing of the berth whenever sustained winds of 45 m.p.h. or greater are anticipated. Southerly winds (off the platform) of 30 m.p.h. may require similar action. The terminal is equipped with an anemometer. Similarly, heavy swells may require the suspension of transfer operations.

Berth Facilities: The berth consists of 3 concrete platforms and 6 mooring buoys. The 2 outer platforms provide a breasting face of 310 ft. The centre platform is fitted with 2×12 in. Chicksan arms for fuel oil unloading, and is 19 ft. above Mean Low Water.

A quick flashing white light is located 26 ft. above the extreme outboard end of each breasting platform.

Each mooring buoy is fitted with a quick release hook.

Berthing Operation: Vessels approach Sea Berth stemming current and/or wind.

Berthing port side to is recommended, weather permitting.

Moorings: It is imperative that the vessel remains in position alongside the berth. LILCO considers the minimum safe mooring for this berth to be as follows:

1. Two lines to buoy "A" (synthetic or steel).
2. Two lines to buoy "B" (synthetic or steel).
3. Two lines to buoy "C" (steel preferred, synthetic acceptable).

4. Two lines to buoy "D" (steel preferred, synthetic acceptable).
5. Two lines to buoy "E" (synthetic or steel).
6. Two lines to buoy "F" (synthetic or steel).
7. Two bow springs to one breasting platform bollard (steel preferred, synthetic acceptable).
8. Two stern springs to the other breasting platform bollard (steel preferred, synthetic acceptable).
9. Two lines from well deck to East breasting platform bollard (synthetic).
10. Two lines from well deck to West breasting platform bollard (synthetic).

Note: There shall be no mixing of wire and synthetic lines on any one buoy.

A boat will be provided by LILCO to handle the vessel's lines to the mooring buoys. Personnel will be provided to handle the vessel's lines to the breasting platform bollards.

Warping winches must be adequate to handle mooring lines under heavy strain. Stoppers must be readily available to stop off mooring lines for transfer from winch to bitts without loss of tension. Mooring lines secured on surge or tension winches are prohibited; any line on a winch must be set tight using the brake only.

CARGO OPERATIONS: The Chicksan arms are designed to permit fore and aft drift and some lateral movement. However, vessel should maintain position at all times. Failure to observe this will result in suspension of operations and disconnection of unloading arms. Ship's crew connect and disconnect arms.

Ships equipped with inert gas systems shall have such systems in operation prior to berthing, throughout the transfer and until the ship is released from the facility and underway.

A responsible member of the ship's crew, *capable of speaking and understanding the English language,* must be available on the vessel's deck to take any remedial action necessary to maintain safe and efficient cargo transfer.

FRESH WATER/FUEL/STORES: Bunkers and fresh water are not available ex-berth. Stores cannot be loaded from dock.

Transfer of bunkers from barge is not permitted while alongside.

MEDICAL: There is a hospital in Huntington, New York, Tel. No. 516-351-2000. Medical attention must be arranged by the vessel's Agent. The nearest United States Public Health Service Marine Hospital facilities are in New York City, which is approximately 45 miles West of Northport.

GENERAL: *Fire Fighting Facilities:* The terminal has very limited fire fighting equipment. 4×100 lb. CO2 extinguishers are provided; no fixed fire fighting gear is available. The standby tug is fitted with a low capacity fire pump hose.

Fire wires should be hung, one forward and one aft, on the offshore side for easy reach by a tug in case of fire.

The tanker should have all fire fighting equipment aboard in readiness to combat any fire that may arise.

Pollution: All U.S. harbours have stringent pollution regulations forbidding the discharge of oil into harbour waters or the emission of heavy smoke. Long Island Sound is a particularly sensitive area and all anti-pollution regulations are rigidly enforced. In the event of an emergency or pollution, the Agent should be contacted immediately.

Launch Service: LILCO does not provide launch service for ferrying of ship's personnel or stores. Vessels must make their own arrangements for such service. The LILCO standby boat is for the exclusive use of LILCO personnel, and will not be used for launch service. The LILCO standby boat will be used for initial boarding upon arrival.

Customs and Immigration: Northport is a Port of Entry whenever a vessel docks without first calling at another United States port. Entry and clearance must be arranged by the vessel's Agent. The appropriate authorities in New York City must be advised well in advance of the vessel's arrival; 24 hours advance notification is recommended as a minimum.

AUTHORITY: Long Island Lighting Co., Northport Power Station, Waterside Avenue, Northport, N.Y. 11768. *Tel:* (516) 262-2293. *FAX:* (516) 757-5797. *Contact:* Kevin Fox, Chief Engineer.

OAKLAND, California: 37.50 N. 122.18 W. (See Plan)

See "San Francisco" *for Documents, Pilotage, etc.*

HEALTH: See "Health: all Ports" before first U.S.A. port (Albany). Illness Reports made to San Francisco Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

BERTHING:

Outer Harbour:

Bay Bridge Terminal: Berths No. 8, 9 and 10. Operator: Pasha Maritime Services, 1625 Maritime Street, Oakland, CA 94626. Tel: (415) 456-5669.

Berths: 3; length 926 m. (3,039 ft.); water depth 10.7 m. (35 ft.) MLLW.

Multi-purpose cargo terminal designed to handle breakbulk, heavy lift cargoes, automobiles and Ro/Ro operations.

Sea-Land Container Terminal: Berths No. 20 and 21. Operator: Sea-Land Services, Inc., 1425 Maritime Street, Oakland, CA 94607. Tel: (415) 271-1000.

Berths: 2; length 1,355 ft.; water depth 10.7 m. (35 ft.) MLLW.

Container handling facilities: 3×30 ton Paceco gantry container cranes; 3 truck scales, 250 refrigerated container outlets. Chassis operation.

Outer Harbour Public Container Terminal: Berths No. 22 and 23. Operator: Stevedoring Services of America, 1195 Maritime Street, Oakland, CA 94607. Tel: (415) 271-1800. Berth No. 23 is preferentially assigned to NOL, OOCL and NLS.

Berths: 2; length 560 m. (1,839 ft.); water depth 12.2 m. (40 ft.) MLLW.

Container handling facilities: 3 gantry container cranes (1×30 ton Paceco, 2×40 ton Krupps); 6 Raygo Wagner Port Packers; 2 rubber tyred transtainers; 224 refrigerated container outlets; 4 truck scales; additional equipment as required. Combination, port packer/transtainer operation.

Maersk Line Terminal: Berth No. 24. Operator: Marine Terminals Corporation, 909 Ferry Street, Oakland, CA. 94607. Tel: (415) 763-4289.

Berths: 1; length 274 m. (900 ft.); water depth 12.2 m. (40 ft.) MLLW.

Container handling facilities: 2×50 ton KSEC container cranes; 190 refrigerated container outlets; 2 truck scales, Chassis operation.

Trans Bay Container Terminal: Berths No. 25 and 26. Operator: Trans Bay Container Terminal Co., 707 Ferry Street, Oakland, CA 94607. Tel: (415) 839-8228.

Berths: 2; length 309.4 m (1,015 ft.); water depth 11.3 m. (37 ft.) MLLW.

Container handling facilities: 2 gantry container cranes (modified 'A' frame Paceco 40 ton cranes); 1 truck scale; 120 refrigerated container outlets; 5 rubber-tyred, diesel generated, electrically powered straddle cranes (3 built by Mitsui and 2 by Paceco). One has a 30 long ton capacity and is capable of stacking 4-high, one has a 40 long ton capacity and is capable of stacking 4-high, and three have 40 long ton capacity and are capable of stacking 5-high; 12 yard hostlers.

7th Street Harbour:

Matson Container Terminal: Berths No. 32, 33 and 34. Operator: Matson Terminals, Inc., 3050 7th Street, Oakland, CA 94607. Tel: (415) 271-9733.

Berths: 3, including 1 for Ro/Ro operations; length 686 m. (2,220 ft.) water depth 10.7 m. (35 ft.) MLLW.

Container handling facilities: 3 gantry container cranes (1×30 ton Star, 1×28 ton Paceco and 1×40 ton Mitsui-Paceco); 2 truck scales; 460 refrigerated container outlets; straddle carrier-type operation with containers stored 2 or more high.

7th Street Public Container Terminal: Berths No. 35, 36, 37 and 38. Operator: Marine Terminals Corporation, 5190 7th Street, Oakland, CA 94607. Tel: (415) 271-0404.

Berths 4; 3 container, 1 Ro/Ro and/or combination breakbulk container; length 748 m. (2,453 ft.); water depth 10.7 m. to 12.2 m. (35 ft. to 40 ft.) MLLW.

Container handling facilities: 5 gantry cranes (3×40 ton Paceco and 2×50 ton Kocks), low profile; 5 truck scales; 128 refrigerated container outlets; 20 Clark 3-high straddle carriers with adjustable spreaders; 3 Raygo Wagner 35-ton port packers; 6 side picks; 4 forklifts; 6 yard hostlers and trailers. Stacked system of storage.

Berth 40: Available for use as required, contact Port of Oakland Manager of Marine Operations (415) 272-1302.

Berths: 1; length 185 m. (608 ft.), water depth 10.7 m. (35 ft.)

Facility: multi-use facility capable of handling a variety of general and specialised commodities as well as heavy lifts requiring direct ship to truck/rail transfer. Single rail access splitting into double tracks parallel to wharf.

Middle Harbour:

American President Lines Container Terminal: Berths No. 60, 61, 62 and 63. Operator: American President Lines, Inc., 1395 Middle Harbour Road, Oakland, CA. 94607. Tel: (415) 272-2010.

Berths: 4; length 836 m. (2,743 ft.); water depth 11.6 m. (38 ft.) MLLW.

Container handling facilities: 6 gantry container cranes (2×45 ton and 4×40 long ton container cranes); 3 truck scales; 250 refrigerated container outlets. Chassis operation.

Inner Harbour:

Charles P. Howard Terminal: Berths No. 67, 68 and 69. Operator: Stevedoring Services of America, One Market Street, Oakland, CA 94607. Tel: (415) 271-1880.

Berths: 3; length 694.4 m. (2,278 ft.): water depth 10.7 m. to 12.2 m. (35 ft. to 42 ft.) MLLW.

Container handling facility: Multi-use facility capable of handling full containerships, combination, Ro/Ro and conventional cargo ships. 3 gantry container cranes: 2×40 ton Hitachi modified 'A' frame cranes with articulated booms and 1×50 ton KSEC modified 'A' frame with articulated boom; 144 refrigerated outlets; 6 Taylor 35 ton capacity container top handlers; two rubber tyred fixed gantry cranes; 12 yard hostlers/trailers; 1 side pick with additional heavy lift/cargo handling equipment available as required.

9th Avenue Terminal: Berths No. 82, 83 and 84. Operator: Marine Terminals Corporation, foot of 9th Avenue, Oakland, CA 94606. Tel: (415) 452-3742.

Berths: 3; length 638 m. (2,093 ft.); water depth 10.7 m. (35 ft.) MLLW.

Facilities: Import steel and bulk cargo handling centre. 5 Manitowoc crawler truck cranes (capacity 100 tons). Bulk-loading facility with 10 steel storage silos capable of holding 9,750 cu.ft. each. Rail track alongside berth.

Schnitizer Steel Products: 2 private piers, foot of Adeline St. Tel: (415) 444-3919. 73.15 m. (240 ft.) of berthing space. Water depth 10.00 m. (33 ft.).

Facility used for loading scrap metal. Privately owned derrick barge with crane of 325 tons capacity available 24 hours a day.

AIRPORT: Oakland International Airport.

DEVELOPMENTS: Third new-generation crane (50 ton Kocks) capable of handling Post-Panamax vessels, to be installed in Spring 1991 at 7th Street Public Container Terminal.

Third new crane (50 ton Paceco) scheduled to become operational at Maersk Terminal by mid-1990.

A major new 37 acre (15 hectare) container facility (Carnation Terminal) contiguous to the port's Outer Harbour and Seventh Street Complex.

Berths: 1, length 274 m. (900 ft.).

Water depth 12.8 m. (42 ft.).

Final design in progress, construction to begin mid-1990, completion date scheduled for 1992.

The Outer Harbour Channel is to be deepened from 10.7 m. (35 ft.) to 12.8 m. (42 ft.) and widened. The Inner Channel is also to be deepened from 10.7 m. (35 ft.). The project is to be completed in phases and is scheduled to commence by the beginning of 1991.

AUTHORITY: Port of Oakland., 530 Water Street (P.O. Box 2064), Oakland, California 94604-2064. *Tel:* (415) 272-1172. *Telex:* 336-334. FAX: (415) 839-3458. *Contact:* Robert W. Crandall, General Manager – Marine Terminals Department (Tel: (415) 272-1301).

OGDENSBURG, New York: 44.42 N. 75.30 W. (See Plan)

Refer to "St. Lawrence Seaway" for important general information.

PILOTAGE: Seaway Pilot boards at Cape Vincent or Snell Lock and acts as docking Pilot.

ANCHORAGES: Anchorage area West of city at open roadstead area.

RESTRICTIONS: No tide. No restrictions other than Pilots' discretion as to wind and visibility.

MAX. SIZE: Largest vessel to enter 730 ft. long. Draft 27 ft.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to New York Quarantine Station.

RADIO: Western Union to OCN Corp. VHF Seaway Channel via Maria Radio Cardinal.

TUGS: No tugs necessary.

BERTHING: By prior notice only. Port Authority Terminal, length 1,200 ft., depth 27 ft. One Grain Elevator capacity 500,000 bushels.

CRANES: Available, up to 82 tons capacity.

BRIDGES: Ogdensburg/Prescott International Bridge – 126 ft. clearance MWD.

STEVEDORES: Order by 1800 hrs. day preceding arrival. Advise any change of ETA.

MEDICAL: Excellent medical service and availability of doctors. No vaccination necessary.

DENSITY: Fresh water.

FRESH WATER: Available by pipeline at Port Authority Terminal.

FUEL: One day's notice, all grades. Diesel, Bunker "C", Kerosene.

REPAIRS: Limited dockside repairs available.

GANGWAY/DECK WATCHMEN: Normally not used.

OPENING/CLOSING HATCHES: By stevedores.

CUSTOMS ALLOWANCES: Tobacco, wine/spirits, normal Customs allowance U.S. Ports.

CARGO GEAR: 25 ton mobile crane, fork trucks to 13 tons capacity. Ship's gear to be in good working order.

REPATRIATION: Can be arranged.

AIRPORT: (0.5 mile from city). Allegheny Airline – 3 flights daily to Syracuse, New York, etc.

TIME: Eastern Standard Time GMT minus 5 hours. Daylight Saving time in Summer GMT minus 4 hours from first Sunday in April till last Sunday in October.

HOLIDAYS: New Year; Washington and Lincoln's Birthdays; Memorial Day; 4th July. Labour Day, Veteran's Day.

POLICE/AMBULANCE/FIRE: Police, Tel: 393-1551; Ambulance, Tel: 393-1221; Fire, Tel: 393-1010.

TELEPHONES: Available at Pierside (315) 393-7580.

SHORE LEAVE: Crew members allowed ashore.

IDENTIFICATION CARDS: Needed as per Immigration Department requirements.

AUTHORITY: Ogdensburg Bridge and Port Authority, Bridge Plaza, Ogdensburg, New York 13669. *Tel:* (315) 393-4080. *Telex:* WUT 93-7486. *FAX:* (315) 393-7068. *Cables:* Ogdenport. *Contact:* Salvatore L. Pisani, Port Director.

OLYMPIA, Washington: 47.00 N. 122.53 W. (See Plan)

PORT LIMITS: Vessel is to be considered an "Arrived Ship" at the Port of Olympia, Washington, when anchor is dropped in Budd Inlet or when the vessel is all fast at the dockside.

DOCUMENTS: See "Tacoma".

PILOTAGE: The vessel picks up Puget Sound Pilot at the Port Angeles Pilot Station located at the entrance to Puget Sound on the Straits of Juan de Fuca, and it is normal for the vessel's Agent to provide the pilot station with a 48-hour, 24-hour, 12-hour and 8-hour ETA. The pilot station monitors VHF Channel 13.

ANCHORAGE: Safe anchorage is located North of Olympia Shoal in 30 ft. to 45 ft. of water. The bottom is sandy and area is a sheltered inlet.

RESTRICTIONS: Channel depth 30 ft. MLW with a high tidal range of 14.4 ft. Also restricted turning basin of 800 ft. Vessels max. size would be governed by the turning basin of 800 ft. and draft of 30 ft. at MLW.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: "KPH" San Francisco or Mackay Radio, Everett "KLB".

VHF: No VHF other than Pilot to tug or ship to tug available at Olympia.

TUGS: 2 Crowley Maritime tugs are berthed at the port. They use ship's lines to assist the vessel in turning at the turning basin and to moor.

BERTHING:

Berth No. 1 is a concrete dock with depth of 40 ft.
Berth No. 2 is a concrete dock with 40 ft. depth MLW.
Berth No. 3, is a concrete dock with 40 ft. depth MLW.

BULK CARGO FACILITIES: Presently discharged with ship's gear at Berths No. 1 and 2. Primary back-up cargo yard of approximately 12 acres handling coke, coal, pig iron and other bulk-type cargoes.

SPECIALISED CARGO HANDLING FACILITIES: Olympia has approximately 100 acres of open cargo yard; 28 acres are paved, however, it can be adapted for Ro-Ro traffic and is presently engaged in handling bulk cargoes such as coal, coke, etc.

Warehousing: Olympia has a 76,000 sq.ft. warehouse between Berths Nos. 1 and 2. The site has a 150 ft. apron from the face of the pier and is served by rail. In addition, there is another 40,000 sq.ft. of off-dock warehousing available for cargo storage.

BRIDGES: None pertinent to this area.

STEVEDORES: 3 stevedoring companies available in the Olympia area. 9 local gangs available for loading or discharging.

MEDICAL: Medical and hospital facilities are available without prior notification for emergencies; otherwise all medical and dental requirements can be taken care of by appointment.

TANKERS: No shore facilities for loading or unloading of tankers.

DENSITY: Salinity is on an average 29 parts per thousand.

FRESH WATER: Delivered to vessel by shoreside hose.

FUEL: Most grades available by barge from Seattle for fueling at dockside.

FIRE PRECAUTIONS: Standard for U.S. ports.

CONSULS: Most located at Seattle 60 miles to the North.

REPAIRS: All types of repairs possible.

DRY DOCKS: None available in Olympia. Nearest 60 miles to North at Seattle.

SURVEYORS: Lloyd's, A.B.S., N.V. available out of Seattle area.

GANGWAY/DECK WATCHMEN: Not required at Olympia under most circumstances unless crew members detained.

CUSTOMS ALLOWANCES: Sufficient quantities of tobacco, wine and spirits are permitted out of bond for each crew member sufficient to cover length of stay anticipated at the time of arrival. Actual quantities are at the discretion of the boarding customs officer.

CARGO GEAR: Generally vessels are loaded and/or discharged using ship's gear.

REPATRIATION: Facilities exist for repatriation of crew members.

AIRPORT: Local airport service by commuter airlines only. Major international airport (Seattle-Tacoma) located 40 miles to the North.

TIME: GMT minus 8 hours. Daylight saving time in effect during Summer months, from first Sunday in April to last Sunday in October.

HOLIDAYS: Official holidays observed by the State of Washington for 1980 were: January 1st, February 12th, February 18th, May 26th, July 4th, September 1st, November 11th, November 27th, November 28th and December 25th.

Work is available on an overtime basis on all days except Christmas, December 25th; January 1st, New Year's Day; and July 4th and 5th.

POLICE/AMBULANCE/FIRE: Telephone dispatch for emergency services, the numbers 911 dialled on any public telephone.

TELEPHONES: Public telephones are located within 100 ft. of any berth and are not provided on board the vessel.

SERVICES: Tank-cleaning, tank-washings, compass adjusting, etc., are all available from the Seattle area, located 60 miles to the North, and most services provide travelling repairs.

SHORE LEAVE: Crew are allowed shore leave by U.S. Immigration, depending on individual case.

IDENTIFICATION CARDS: Not issued by the Port of Olympia, and Seaman's Book is generally sufficient to allow Immigration to determine whether shore leave should be granted.

REGULATIONS: Similar to all North American ports; no special rules or regulations applied to vessels by the Port of Olympia. Rules are set forth in Tariff No. 7.

DELAYS: Only delays that should be encountered at the Port of Olympia would be in the event of berth congestion.

GENERAL: Rail Service: The Port of Olympia is served directly by the Burlington Northern and Union Pacific railroads.

Highway Access: The Port of Olympia is 0.7 miles from Interstate Highway 5, the major North-South highway on the West coast. Access to and from the Port is unobstructed.

AUTHORITY: Port of Olympia, 915 Washington Street N.E., P.O.Box 827, Olympia, Washington 98507-0827. *Tel:* (206) 754-1650. *Telex:* 152689. *FAX:* (206) 586-4653. *Contact:* Bill McGregor, Director of Operations.

ORANGE, Texas: 30.06 N. 93.44 W. (See Plan)

DOCUMENTS: Crew Lists, Passenger List and Customs Documents.
PILOTAGE: Radio to Agent, 12 hours and Pilots 2.5 hours in advance of ETA. Pilots contacted by VHF Channels 12 and 13. Pilots board at Sabine Pass, Sea Buoy position 29° 36′ N., 93° 48′ W. or upon request board at 29° 25′ N., 93° 40′ W. Pilot boats FM (VHF) Channel 65 – 156.275 MHz.
ANCHORAGE: Off Sabine Bar – 40 ft.
RESTRICTIONS: Sabine River Channel: Project depth 30 ft.; bottom width 200 ft., including slip at port; marked and lighted for 24-hour navigation. Turning basin, 1,000 ft.×3,000 ft.
MAX. SIZE: Length – no limit, breadth – no limit, draft – 30 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: RCA – Global Communications.
TUGS: Join vessel in port turning basin. Tug's line used, no charge.
BERTHING: 2,308 ft. mooring space to accommodate 4 deep-sea vessels; all concrete docks; additional berthing space in slip for laying-up 4 vessels. Lay-berth facilities also available. 11 finger piers ranging in length from 480 ft. to 900 ft.
STEVEDORES: 5 stevedore companies – handled through Agent.
MEDICAL: Local facilities – complete.
TANKERS: Limited to 30 ft. draft.
DENSITY: Brackish.
FRESH WATER: Ample fresh water, through 2.5 in. connection, rate of delivery about 500 gallons per minute.
FUEL: All grades available; 8 hours advance notice required.
FIRE PRECAUTIONS: No welding or burning without U.S. Coast Guard welding permit; also special authority required for ships loading explosives.
CONSULS: None available locally.
REPAIRS: Facilities available.
DRY DOCKS: Texas Drydock:
388 ft.×142 ft. 10,000 tons, 10 ft. 6 in. draft over blocks.
SURVEYORS: National Cargo Bureau, Inc., 550 Fannin, Petroleum Building, Suite 821, Beaumont, Telex: 77701.
American Bureau of Shipping, 396 Pearl Street, Goodhue Building, Suite 806, Beaumont, Telex: 77701.
REPATRIATION: Can be arranged through area Immigration.
AIRPORT: Local, no scheduled airlines. Mid-County Airport with scheduled airline service – 30 miles.
HOLIDAYS: New Year's Day; Martin Luther King's Birthday; Texas Independence Day; Good Friday; Memorial Day; Emancipation Day; Independence Day; Labour Day; Veterans' Day; Thanksgiving Day; Christmas Day; Any holiday which falls on Saturday or Sunday will be recognised on the following Monday. No work performed on Labour Day or Christmas Day.
POLICE/AMBULANCE/FIRE: Police Tel: 883-5654; Ambulance Tel: 883-6414; Fire Tel: 886-7431.
EMERGENCY CO-ORDINATION CENTRE: U.S. Coast Guard tel: (713) 983 8230.
TELEPHONE: Can be connected on board.
BANKS:
First City National Bank of Orange, P.O.Box 848, Orange, Texas 77630.
M. Bank, P.O.Box 1029, Orange, Texas 77630.
Orangebank, Orange, P.O.Drawer 969, Orange, Texas 77630.
STORING: See "Prelims".
1. Yes.
2. Yes.
3. Yes.
GENERAL: No strong tidal currents at the berths, excellent shelter during tropical storms.
DEVELOPMENTS: Additional 190 acre tract on Sabine River for future development.
AUTHORITY: Orange County Navigation and Port District, P.O.Box 516, Orange, Texas 77630-0516. *Tel:* (409) 883-4363. *Telex:* 779325. *FAX:* (409) 883-5607. *Contact:* Bryan Norwood, Interim Port Director. Walter S. Tilley, Operations Manager.

OSTRICA, Louisiana: 29.22 N. 89.32 W.

LOCATION: East Bank of Mississippi River about 42 miles above Southwest Pass Entrance.
DOCUMENTS/PILOTAGE: For all general information refer to "New Orleans".
ANCHORAGES: Available in river downstream of docks.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Not normally required.
BERTHING: Gulf Refining Co. Terminal, tanker berth 45 ft. depth 2×8 in. hoses loading 34,000 bbls.p.h. Ballast line 18 in. for slop discharge.
Report: General: The Gulf Terminal is located on the East bank of the river, approximately 23.2 miles AHP. The only access to the dock is by launch; a dock launch, however, is available for use at all times.

Cargo Handled and Shore Installations: Crude, heating oil, Bunker-C, premium, low-lead, and regular gasolines are types of cargo handled. Maximum loading rates vary from 34,000 bbls.p.h. for crude oils to 1,000 bbls.p.h. for Bunker-C, 4,000 bbls.p.h. for heating oil and 9,400 bbls.p.h. for gasoline.

Docking: No tugs are required for docking or undocking. Vessels should approach the dock stemming the current and drop the port anchor when above and off the dock. The vessel is then manoeuvred alongside with the aid of the anchor. The anchor is brought in as the vessel undocks.

Docking is starboard side to only and is normally performed by the River Pilot.

Gangway: The ship's gangway must be used and should be properly rigged and illuminated.

Bunkers and Fresh Water: Bunkers are available upon request and are delivered through a 16 in. line at a maximum rate of 900 bbls.p.h. There is no fresh water at the dock.

Ballast/Slop Facilities: Ballast and slop facilities are available at the terminal. Maximum discharge rate ashore is 15,000 bbls.p.h. at a maximum rail pressure of 125 p.s.i.
FRESH WATER: Not available.
FUEL: Bunker "C" available ex-wharf.
DENSITY: Fresh water (1000).

OSWEGO, New York: 43.28 N. 76.30 W. (See Plan)

LOCATION: Oswego Harbour is located on the South shore of Lake Ontario about 15 miles from its East end at the outlet to the Oswego River. It is the first major port on the Great Lakes off the seaway. It is also the Great Lakes entrance to the Great Lakes – Hudson River Waterway which connects with the Hudson River at Troy.
PILOTAGE: No requirements.
RESTRICTIONS: Average navigation season – April 1st to December 15th.
Approaches: Through entrance between the Arrowhead Breakwater pier heads and detached breakwater.
Entrance is 750 ft. wide with a depth of 25 ft. at LW datum.
Controlling depth of water 25 ft. at datum.
No vessel length and beam limitations.
Approach open 24 hours a day.
Navigation lights available
Harbour: Controlling depth – front of each terminal open for public use 21 ft. on West side. 28 ft. on East side.
Turning Basin – 115 acres.
Accessible 24 hours per day.
No vessel length and beam limitations.
HEALTH/AGRICULTURE: See "Health" and "Agriculture" before first U.S.A. port (Albany).
TUGS: Towage facilities available on request.
BERTHING: The general cargo facilities are operated by the Port of Oswego Authority. The West Side Facility is a finger pier 1,000 ft. long providing 4 berths and has 21 ft. of water alongside at LW datum. 28,000 sq. ft. of covered storage is available with limited open storage. A million bushel grain elevator is situated on this pier. The East Side Facility is a marginal wharf 1,900 ft. long, providing 3 berths and has 27 ft. of water alongside at LW datum. 134,000 sq.ft. of covered storage is available with unlimited open storage.

Oswego exports general cargo. It imports grain, cement, wood pulp, fertiliser, petroleum and general cargo.
New Marginal Wharf: Length of berth 1,750 ft. Depth 25 ft. at LW datum.
BRIDGES: None.
CRANES: Mobile heavy lift equipment available.
BULK HANDLING FACILITIES: One 1,000,000 bushel capacity elevator equipped with 3 loading spouts, 2 Marine legs and 2 car pits.
FRESH WATER: Available at all general cargo docks.
FUEL: Seaway Terminal of Metropolitan Petroleum Corporation, 4 tanks – Capacity 327,000 barrels of No. 2 and No. 6 oil. Coal bunkerage available by truck delivery.
CONSULS: None.
REPAIRS: Above waterline repairs available.
AUTHORITY: Port of Oswego Authority, P.O.Box 387, Foot of East First Street, Oswego, N.Y. 13126. *Tel:* (315) 343-4503. *Telex:* 926060 *FAX:* (315) 343-5498. *Contact:* John E. Fitzgibbons, Executive Director

PALM BEACH, Florida: 26.46 N. 80.03 W. (See Plan)

LOCATION: Port is located on a salt water sound known as Lake Worth and lies 1.3 miles from the 37 ft. contour of the Atlantic Ocean to which it is connected by an artificial cut at the North end of Lake Worth known as Lake Worth Inlet. The Inlet is located within the boundaries of the City of Riviera Beach, Florida.
PORT LIMITS: Sea Buoy at channel entrance. Dockage charges commence when vessel is made fast to wharf, and are on a 24 hour basis or fraction thereof.

DOCUMENTS: Basic Customs Documents for Entry:
2 copies Master's Oath, Form CF-1300.
2 copies General Declaration, Form CF-1301.
2 copies Arrival Crew Lists, Form I-418.
2 copies Passenger List, Form I-418.
2 copies Stores Lists, Form CF-1303.
2 copies Crew's Effects Declaration, Form CF-1304.
1 copy Clearance from Last Foreign Port (if available).
1 copy Manifest of *All* Foreign Cargo onboard.
1 copy Manifest of Cargo for Discharge.
1 copy Dangerous Cargo Manifest.
1 copy Form CF-3171 for formal entrance at Customs House.
Valid original vessel documents.

All vessels shall, upon arrival, report to Port Director all cargo to be discharged. Such report shall be in form of copies of Ship's Manifest, or certified statements, and shall show number of units, commodity, weight, destination, consignee, and all other information which Port of Palm Beach deems necessary for compilation of commercial statistics, for reserving of necessary warehouse or wharf space, or other purposes. (Also see "Jacksonville").

PILOTAGE: Compulsory. Provided by Pilots' Association of the Port of Palm Beach, 200 13th Street E, Riviera Beach, Florida, 33404. Tel: (407) 845-2628. Telex: 529327.

Pilot's communicate with vessel on VHF Channel 16; if no answer contact Marine Operator to call Pilots on land line. Tel: (305) 845-2628.

Notice of ETA and request for Pilot must be made to the Pilots at least 24 hours in advance.

CHANNEL: Entrance to the harbour is by a dog-leg channel running due West through the jetties and then turning South-westerly to the terminals. The channel is 400 ft. wide, narrowing to 300 ft. in width as it continues across the lake another 3,000 ft., leading into a trapezoidal turning basin, 1,400 ft. by 1,310 ft. adjacent to the port terminals on the West shore, with an extension of 672 ft. at 25 ft. depth to the New North Wharf and Loading Ramps. Present depth of entrance channel is 33 ft. at MLW.

ANCHORAGES: Anchorage is designated by the Bar Pilots, which in most instances is at sea. Port has two designated anchorages, one South of the entrance channel and one North of the entrance channel.

MAX. SIZE: Vessels up to 620 ft. in length with draft of 33 ft. have used facilities.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Port has no communication equipment. U.S. Coast Guard Station, Peanut Island, Riviera Beach, Florida, can be reached on 2182 kHz – 2678 kHz or VHF Channel 16 (156.8 MHz). Pilots VHF Channel 16.

TUGS: Available to assist berthing. Service is provided by the Port Towing Corporation, P.O.Box 12425, Lake Park, Florida 33403. Office Tel: 622-6422 and 622-8688, nights and holidays 844-4244.

Tugs normally join vessel at jetty entrance. Tug's lines normally used.

BERTHING: 2 slips and 4 marginal wharves with 6 Ro/Ro ramps including a 29 acre dedicated container yard.

Supplementing the berths are 187,000 sq.ft. of transit shed storage space. Open storage areas consist of approximately 43 acres. 33 acres dedicated to container handling.

All vessels, their Owners or Agents, desiring a berth at wharves, shall, as far in advance of date of docking as possible, make application to port specifying date of docking, sailing, nature and quantity of cargo to be handled, and name of the vessel.

SPECIALISED CARGO HANDLING FACILITIES: Ramps for Roll-on/Roll-off cargo and wharfside accommodation for equipment to handle containerised cargo only.

Dry Bulk Storage: 55,000 short tons (Cement); 20,000 short tons (Sugar).

Liquid Bulk Storage: 12,500,000 gallons (Molasses).

Freezer/Chill Facility: U.S. Dept. of Agriculture and U.S. Customs approved facility. 17,600 sq.ft. off pier site with rail siding. 5 minute trucking time to port docks.

Also see "Developments".

CRANES: See "Cargo Gear".

STEVEDORES: The recognised working hours of port are from 0800 until 1200 hrs. and from 1300 until 1700 hrs., Monday through Friday, holidays excepted. During the recognised working hours services will be charged for on a straight time basis.

When vessels are loading or discharging cargo the port may furnish checker-foremen to supervise release of cargo being loaded and/or check cargo being discharged. The charge for each man furnished will be based on labour-furnished rates for foremen, with the Port reserving right to furnish as many men as they deem necessary to protect their interests. Charges for this service will be rendered against the vessels, their Owners, or Agents.

MEDICAL: Full hospital facilities available without prior notice. Dentists available during normal work hours.

TANKERS: The port receives tankers each month in the 15,000 to 18,000 gross ton range. Petroleum tankers are handled in Slip 2, Berths 2/3 or 5/6. All petroleum tankers are boomed during pumping operations. Slop facilities at port by mobile tank trucks of private companies.

Report: Port Approaches – Cautionary: All approaches to the Sea Buoy must be made from the East to avoid shoal waters near the coast to the North and South of the Entrance Channel. The Gulf Stream current running to the North may be felt a short distance East of the Sea Buoy. A counter current usually sets to the South in the vicinity of the Sea Buoy. However, this may vary depending on weather conditions. Southbound vessels, avoiding the Gulf Stream, are encountered in close vicinity of the Sea Buoy.

Care must be taken to carefully identify navigation lights to avoid mistaken identity with strong lights along coast.

Vessels may anchor S.E. of the Sea Buoy in approximately 75 ft. – 100 ft. of water.

Entering and Berthing: Vessel should have full manoeuvring power available and competent helmsman at the wheel. Vessels leaving the Gulf Stream usually set sharply to the South and care must be exercised to keep vessel in channel. Ranges and buoys are used to identify channel limits. The turning basin is situated adjacent to Slip No. 2 where tankers berth. Tidal currents in Lake Worth Inlet set North on flood tide and South on ebb tide. Berthing has been limited to High Water Slack period, due to the limitation of tug horsepower. If a current is against the tide, an anchor is usually dropped and dragged into the berth. Due to the limited depths of water and the possibility of holing the ship's bottom if the anchor is run over, the use of anchor should be limited to emergency use.

The slip is 700 ft. in length with a width of 225 ft. Pier bollards are situated 50 ft. apart. The last soundings survey indicated depths of 35 ft. or more throughout area of slip with exception of extreme inside section where depths decreased to 32 ft.

FRESH WATER: Fresh water delivered to vessels at wharves or docks by pipe-line. Hoses can be supplied by port per tariff charges. Fittings on pipe-line are 2.5 in. Minimum charge of U.S.$25.00. Water $0.72 per ton of 240 gallons.

FUEL: Private firms (9) with trucks or barges available by prior arrangement through vessel's Agent.

FIRE PRECAUTIONS: Smoking is strictly prohibited in transit sheds, warehouses, or on apron of wharves and on vessels, handling dangerous, hazardous, or inflammable cargo. Smoking is also prohibited in any areas where gasoline or like materials are being handled or serviced to equipment.

Explosives and hazardous or highly inflammable commodities or materials may be handled over, or received on, the wharves or other facilities of Port of Palm Beach by special arrangements with and at the option of the Port Director, and the receiving, handling, or storage of such commodities shall be subject to Federal and State laws, rules and regulations.

In all cases where explosives and hazardous or highly inflammable commodities or materials are to be handled, prior consent by the U.S. Coast Guard must be received and a copy of the consent filed with the Port Director. Responsibility for safeguarding of life and property will be the duty of the shipper. Proof of sufficient liability insurance must be presented to Port Director prior to arrival of such materials.

DRY DOCK/REPAIRS: No major facilities at port. Mobile repair companies available. No berths dedicated for repair work.

SURVEYORS: Marine surveyors representing Lloyd's, A.B.S., N.V., operate at the port or nearby ports.

C. L. Marine Inc., 825 Oleander Street, Boca Raton, FL 33432. Tel: (407) 391-8932.

Douglas G. Lamb & Associates, P.O.Box 11367, Fort Lauderdale, FL 33339. Tel: (305) 564-3045. Telex: 159052 (ASST. CTR.)

Continental Marine Consultants, Inc., P.O.Box 14915, North Palm Beach, FL 33408. Tel: (407) 844-6111.

Donald J. Mahoney & Co. Inc., Marine Surveyors & Adjusters, The Tamiami Mall, 8776 S.W. 8th Street, Miami, Florida 33174. Tel: (305) 553-7066. Telex: 52-2268.

GANGWAY/DECK WATCHMEN: No requirement for watchmen required except for special vessel conditions or security reasons as determined by Port Director.

HATCHES: Normally opened and closed by ship's crew.

CUSTOMS ALLOWANCES: United States Customs Regulations.

REPATRIATION: Facilities exist for changes of crews and repatriation of seamen. Scheduled aircraft service Palm Beach area daily with additional flights from two nearby airports. Airports are 5 miles, 35 miles and 70 miles from port.

POLICE/AMBULANCE/FIRE: Police Tel: 845-4123 or 911; Fire Department Tel: 845-4111; Sheriff Tel: 833-7471; Ambulance Tel: 844-6577; Hospital Tel: 844-6300.

CARGO GEAR: Crane capacity can accommodate single lifts up to 300 tons. Also available are 2×150 ton cranes, 3×200 ton crane, 1×65 ton crane and 1×40 ton crane also 1×23 ton fork lift. 7×40 tonne straddle carriers, 7×40 ton fork lifts, 3×25 ton fork lifts, 1×20 ton fork lift, 33 tractors in terminal (10×40 tons and 23×35 tons). Load/discharge operations can be performed by ship's gear or shore gear.

HOLIDAYS: New Year's Day; Washington's Birthday; Columbus Day; Decoration (Memorial) Day; Independence Day; Labour Day; Veteran's (Armistice) Day; Thanksgiving Day; Christmas Day. When any one of these falls on Sunday, the following Monday is observed as a holiday. When any one of these falls on Saturday, the preceding Friday is observed.

BANKS: *Banks with Foreign Departments:*

Barnett Bank, 2001 Broadway, Riviera Beach, FL 33404. Tel: (407) 845-3400.

Florida National Bank, 411 South County Road, Palm Beach, FL 33480. Tel: (407) 655-3900.

Southeast Bank, N.A., 1710 S. Andrews Avenue, Fort Lauderdale, FL 33316. Tel: (305) 467-5322.

Sun Bank/South Florida, Inc., International Department, 25 S. Andrews Avenue, Fort Lauderdale, FL 33301. Tel: (407) 832-4121.

GENERAL: Marine terminal 1.3 miles from the open sea, served by U.S. Highway 1 and is directly connected by port-owned belt-line railroad to the Florida Coast Railway.

Broad aprons (80 ft.) with ship-side rail, and warehouses backed by open storage areas. The slips and wharves are located on a salt water sound, fully protected from the sea by barrier islands; departures from the slips average only 15 minutes through inlet to open sea.

DEVELOPMENTS: New 6 acre container marshalling area has been recently added. Raw sugar storage facility at Slip 2 capacity 20,000 tons, loading rate 600 t.p.h. Acquisition of additional land for port expansion underway. Port Administration Building completed offering Government Services and office space for Maritime companies located at the port. A foreign trade zone is available.

AUTHORITY: Port of Palm Beach, P.O.Box 9935, Riviera Beach, Florida 33419. *Tel:* (407) 842-4201. *Telex:* TWX 510-601-5031 Port of P.B.U.D. *FAX:* (407) 842-4240. *Contact:* Benson B. Murphy, Executive Port Director. Martin A. Mets, Deputy Director Operations and Marine Services. Jack Smith, Dock Master.

PANAMA CITY, Florida: 30.10 N. 85.40 W. (See Plan)

DOCUMENTS:

3 Passenger Lists.
3 Crew Lists.
3 Curio Lists.
3 Stores Lists.
Register.
Load Line Certificate.
Tonnage Tax Certificate.
Certificate of Financial Responsibility (Oil Pollution).

PILOTAGE: Compulsory. Pilots board at sea-buoy. Guard Channel 16 VHF. Safe anchorage at sea-buoy if waiting for Pilot.

PC Port Pilots Inc.: Pilot boat, grey and white hull with black lettering. Tel: (904) 785-2209.

PC Pilots Inc.: Pilot boat, red and white hull. Tel: (904) 769-0058.

ANCHORAGES: Several safe anchorages inside bay with 32 ft. or more depth.

RESTRICTIONS: Maximum safe draft over bar is 32 ft. No other restrictions except in case of bad weather.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Preferably WLO Radio, Mobile, Alabama, U.S.A. Also good service from RCA. Vessel should radio ETA and cash requirements.

TUGS: 2 tugs available. Tug is used only to assist in berthing. Always uses ship's lines.

BERTHING: Any time, except for unusual weather. Good safe port. Berths are about 1 hour from Pilot station.

Deepwater Terminal in St. Andrew's Bay:

1. 2,590 ft. of deepwater berthing:
   (a) 5 berths.
   (b) Mean depth of water 32 ft.
   (c) Concrete apron 60 ft.
   (d) Construction – steel sheet piling.
2. 6 Transit sheds totalling 280,000 sq.ft.
3. Bulk Warehouse (28,800 sq.ft.). Storage Silos (6,500 ton capacity) with scale weight in and out.
4. Covered loading/unloading rail service to each warehouse.
5. Truck dock serving each warehouse.
6. Marginal track capability.
7. Heavy lift capability by prior arrangement.
8. 24 hour security service.
9. Paved open storage – 300,000 sq.ft.
10. Ro/Ro capabilities.
11. Container facilities.
12. Barge/Container feeder service.

Barge Terminal in St. Andrew's Bay and Gulf Intracoastal Waterway:

1. 600 ft. of shallow draft:
   (a) Mean depth of water 12 ft.
   (b) Concrete apron.
   (c) Construction – steel sheet piling.
2. Transit shed totalling 30,000 sq.ft.
3. Bulk transfer capability.
4. Service for:
   (a) Covered rail loading and unloading.
   (b) Truck loading and unloading.
5. Paved open storage – 90,000 sq.ft.
6. Heavy lift capability by special arrangement.

Port Equipment:

1. 8 lift trucks, 5,000 lb. capacity.
2. 9 paper roll clamp machines, 7,000 lb. lift capacity.
3. 1 trackmobile switcher.
4. 1 diesel switch engine.
5. Rail tracks owned by Panama City Port Authority, capable o accommodating approximately 80 rail cars.
6. Sweepers.
   (a) Tennant.
   (b) Tractor with brush and front end loader.

STEVEDORES: 7 companies. Must have ETA by 1500 hrs. local time in order commence loading 0800 hrs. next day. Normal work day 080 – 1200 hrs., then from 1300 – 1700 hrs., Monday through Friday.

MEDICAL: Medical and hospital service available.

TANKERS: No slop discharge facilities, oil waste by barge.

DENSITY: Salt water. 1.5 ft. tide range.

FRESH WATER: Available all berths but ships must supply hose.

FUEL: Limited amount of diesel oil available. No heavy fuel. Local agents can make available through truck transfer or barge. Midstream Fuel Supply located at Port.

CONSULS: None.

REPAIRS: Limited deck and engine repairs can be effected.

GANGWAY/DECK WATCHMEN: Only if required by ship's Owners o Master.

OPENING/CLOSING HATCHES: Only MacGregor hatches may be opened by the crew.

CUSTOMS ALLOWANCES: Tobacco, 1 carton 200 cigarettes. Wine Spirits, reasonable quantity – 1 or 2 bottles.

CARGO GEAR: Must show safety inspection if requested.

REPATRIATION: Available.

AIRPORT: Approximately 4 miles from port. Served by 2 scheduled ai lines (Republic Airlines and Air New Orleans).

TIME: Central Standard Time (GMT minus 6 hours).

Central Daylight time in Summer (GMT –5 hours).

HOLIDAYS: *No work holidays:* New Year's Day; Easter; 4th July; Labour Day; Christmas Day.

Working holidays: Lincoln's Birthday (February 12); George Washington's Birthday (Third Monday in February); Memorial Day (Last Monday in May); Veterans' Day (Fourth Monday in October), Fall Festival Day, Thanksgiving Day (Fourth Thursday in November).

POLICE/AMBULANCE/FIRE: Dial operator, or Tel: 785-6161.

TELEPHONES: Placed aboard only by very special arrangement – no normally available.

SERVICES: Most repairs to radio, radar and other such equipment. Advance notice required.

SHORE LEAVE: Any time – any berth.

IDENTIFICATION CARDS: All crew must have U.S. Immigratio Landing Permit.

DELAYS: Normally, delays infrequent and for short durations.

AUTHORITY: Panama City Port Authority and Foreign Trade Zone 65. P.O.Box 15095, 5321 West Highway 98, Panama City, FL 32406. Te (904) 763-8471. *Telex:* 324775 Port Pc Usa. *FAX:* (904) 769-567 *Contact:* H. R. Etheredge, Port Director. T. L. Berry, Assistant Po Director.

PASADENA, Texas: 29.43 N. 95.13 W.

Refer to "Houston" for all general information.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

PASCAGOULA, Mississippi: 30.21 N. 88.34 W. (See Plan)

PORT LIMITS: Subject to Charter-Party Terms, an "arrived ship", subject to jurisdiction of the Port Authority, occurs when a ship arrives at Horn Island Sea Buoy.

DOCUMENTS: See "New Orleans".

PILOTAGE: Compulsory. Pascagoula Bar Pilots' Association ((60 –762 – 1151). Pilot boat to be contacted on VHF Channel 16, pilot bo has black hull with white house, International light and sound signals t be made by vessel requiring a Pilot. Pilot to be taken aboard vessel i vicinity of Horn Island sea buoy. Usual safety measures are required with respect to boarding. Vessels may anchor in this area while awaiting Pilot, there is a 35 ft. to 50 ft. depth with good holding bottom.

ANCHORAGES: Only anchorages permitted are in vicinity of Hor Island Sea Buoy or seaward.

RESTRICTIONS: Under normal conditions there are no entry restrictions as to time or state of tide.

From Horn Island Sea Buoy to Horn Island Pass the channel is 350 f wide by 40 ft. deep; from Horn Island Pass to Pascagoula River Turnin Basin the channel is 350 ft. wide and 38 ft. deep; the Pascagoula Riv Turning Basin is 950 ft. wide and 38 ft. deep.

Channel into Bayou Casotte (East Harbour) from Junction Buoy t mouth of Bayou Casotte Harbour is 225 ft. by 38 ft. deep; thence at inn harbour channel is 300 ft. wide and 38 ft. deep into the Bayou Caso Turning Basin; the Bayou Casotte Turning Basin is 940 ft. wide an 38 ft. deep. All dimensions listed are project dimensions; depths re to MLW datum.

No vessel or tow shall enter Bayou Casotte Channel outbound after a seagoing vessel or tow has passed Buoy 30 inbound, and; no vessel or tow shall enter Bayou Casotte Channel inbound after a seagoing vessel or tow has passed Buoy 11 outbound. Vessels or tows which are at a dock should remain at the dock until the inbound seagoing vessel or tow has passed, or until it has reached its berth, whichever occurs first.

MAX. SIZE: Length of vessel is restricted to approx. 900 ft. by turning basin, no breadth restriction, draft 38 ft. at MLW. Normal tidal range 1.6 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Use of Pascagoula Marine Radio (KLU-775) is advisable for ETA cables to Agent. Stands by on VHF Channel 16 and operates on Channel 27 throughout 24 hours.

RADAR/VHF: Radar and VHF radio on pilot boat, Channel 16.

Every vessel shall, when entering the Horn Island Pass Channel, and the Bayou Casotte Channel, or when getting underway from a berth, or when approaching the Pascagoula Channel while transiting the Intracoastal Waterway:

(a) Maintain a radio watch on VHF – FM Channels 13 and 16 in accordance with Vessel Bridge to Bridge Telephone Regulations of January 1st, 1973.

(b) Check on other traffic operating in the area by transmitting on Channel 16:

"SECURITY, SECURITY, SECURITY
(Vessel Calling)
THIS IS ....
ENTERING..................................
CHANNEL PROCEEDING FROM
..................TO ....
CHECKING FOR TRAFFIC, STANDING
BY ON CHANNELS 13 and 16,............

(Vessel Calling)
.... OUT"

If other traffic replies, utilise Channel 13 for exchange of information relative to safe navigation.

TUGS: Tugs will join vessels in harbour or off docks. No escort required. Tugs lines normally are used.

BERTHING: Private and public berths are available, by prior arrangement, in both the Pascagoula River Harbour (West Harbour) and the Bayou Casotte Harbour (East Harbour).

West Harbour – Public: Grain Elevator, 3,100,000 bushel capacity, 900 ft. berth at 780 ft. wharf and 38 ft. deep.

Terminal 'A' with transit shed, 500 ft. wharf and 38 ft. deep.
Terminal 'B' with transit shed, 544 ft. wharf and 38 ft. deep.
Terminal 'C' with bulk cold storage, 718 ft. wharf and 38 ft. deep.
Terminal 'D' with 732 ft. by 187 ft. open wharf by 38 ft. deep, with transit shed.
South Clusters, 1 ship berth approximately 600 ft. by 24 ft. deep.

West Harbour – Private – Ingalls Shipbuilding: Note. These berths are normally occupied with ships being fitted out and are not normally available.

West Bank Shipyard, 4,410 ft. bulkhead, 5 berths by 38 ft. deep.
East Bank Shipyard, three 600 ft. piers, one 800 ft. pier, each 32 ft. deep.
Ham Industries, rig repair facility; 1,100 ft. wharf by 38 ft. deep.

East Harbour – Public:

Terminal 'E' with transit shed, 517 ft. wharf by 38 ft. deep;
Terminal 'F' with transit shed, 737 ft. wharf by 38 ft. deep;
Terminal 'G' with transit shed, 516 ft. wharf by 38 ft. deep;
Terminal 'G' Extension 695 ft. by 64 ft. open wharf by 12 ft. deep.
Terminal 'H' with transit shed, 556 ft. wharf by 38 ft. deep.

East Harbour – Private:

Chevron U.S.A. Inc., Wharf No. 1, 5 berths by 38 ft. deep;
Chevron U.S.A. Inc., Wharf No. 2, 1 berth by 38 ft. deep; (crude and coke dock).
Chevron U.S.A. Inc., Wharf No. 3, 1 berth by 38 ft.;
Mississippi Chemical Company, 2 loading docks each 475 ft. by 34 ft. depth;
Chicago Bridge & Iron Company, slip 900 ft. by 16 ft. deep.

CRANES: The Port has a heavy lift capability of 400 tons by an arrangement with Ingalls West Bank Facility. Truck cranes with capacity up to 110 tons also available in the port area.

SPECIALISED CARGO HANDLING: Chevron U.S.A. Inc., Wharf No. 1 has facilities for handling acid, caustic, ammonia, and LPG, in addition to petroleum products. Chevron U.S.A. Inc., No. 2 has facilities for handling coke and crude. Chevron U.S.A. Inc., No. 3 has facilities for handling crude.

Terminals E & F are equipped for exporting bulk ores.

Gulf Cold Storage Inc.:

Freezer Area: 1.5 million cu.ft. of −10°F. storage.
Cooler Area: 500,000 cu.ft. of +40°F. storage.
Blast Freezers: 2× −50°F. Capacity 160,000 lbs. per day.
Location: Approx. 3 miles South of 1 – 10 of the West Bank area of the port. Adjacent to dock on a 38 ft. channel.

BRIDGES: None affecting 38 ft. channels.

Two bridges across the Pascagoula River above the turning basin, not passed through between channel and harbour.

STEVEDORES: 12 hours notice requested to arrange stevedore gangs. *Straight Time:* 0800 hrs. – 1200 hrs. and 1300 hrs. – 1700 hrs. Mondays through Fridays except Holidays. All other hours and days are overtime.

MEDICAL: Agents to be advised if immediate medical attention is required. Free Pratique granted except in case of communicable diseases aboard, inoculations required by Public Health Service, etc. Doctors and hospital services readily available.

TANKERS: Chevron U.S.A. Inc. owns and operates 3 wharves on East side of Bayou Cosotte harbour. Facilities have 6 in., 8 in. and 12 in. lines with adaptors, discharge tanks with a capacity of 60,000 tons, 3 tanker berths with a 38 ft. draft. Wharf No. 2 for receiving crude oil from large tankers. Wharf designed and built for 50 ft. draft, but presently limited to 38 ft. draft on account of channel and seaward. Wharf No. 2 also handles coke ships.

Also see "Shipmaster's Report" and "Specialised Cargo Handling".

DENSITY: Density varies with the state of tide and wind, from fresh to salt water.

FRESH WATER: Potable water is available at most berths. Water at public terminals can be delivered at flow rate of 50 g.p.m.

FUEL: Vessels are bunkered at berth in the harbour by truck or barge. All grades of fuel are available.

FIRE PRECAUTIONS: Usual safety precautions required. Verify unusual procedures for approval of U.S. Coast Guard.

CONSULS: Many countries have consuls within a 100 mile radius of Pascagoula. (Mobile and New Orleans).

REPAIRS: Most deck and engine repairs could be arranged within port facilities.

DRY DOCKS: Ingalls Shipbuilding Corporation, West Bank Shipyard, has 1 launch pontoon (dry dock) with 38,000 ton capacity.

Ingalls Shipbuilding Corporation, East Bank Shipyard, has 1 graving dock, 485 ft. inside length, 75 ft. wide gate, 34 ft. deep, with loading capacity of 1 ton per sq. ft.

Flechas Shipyard has one 600 ton dry dock.

There are several marineways in vicinity, capacities 50 – 100 tons.

SURVEYORS: Licensed Marine Surveyors are available in Port.

GANGWAY/DECK WATCHMEN: Port guards are furnished for the general cargo terminals at the port's expense. At least 1 person must be on duty aboard vessel.

HATCHES: Opening/closing hatches by the crew is at the discretion of the ship.

CUSTOMS ALLOWANCES: Each crew member is allowed either 300 cigarettes or 50 cigars or 3 lbs. of tobacco. In addition, each member is allowed 1 quart of alcoholic spirits as regulated by provisions of the Mississippi Alcoholic Beverage Commission Rules.

CARGO GEAR: No requirements for cargo gear other than it be certified by a recognised International organisation.

REPATRIATION: The City of Pascagoula is served by regularly scheduled transportation. Vessel's Agent to arrange clearance with Customs and Immigration officials.

HOLIDAYS: New Year's Day (January 1st); King's Birthday (3rd Monday in January); Washington's Birthday (3rd Monday in February); Mardi Gras (41 days before Easter – Tuesday); *Easter Sunday/Easter Monday (1st Sunday after 1st full moon after March 21st); King's Memorial Day (April 4th); Memorial Day (Last Monday in May); *Independence Day (July 4th); *Labour Day (1st Monday in September); Veterans' Day (November 11th); Thanksgiving Day (Last Thursday in November); *Christmas Eve (December 24th); *Christmas Day (December 25th); *New Year's Eve (December 31st).

(*Non-working). Non-working holidays are observed from midnight of the holiday through to 0700 hrs. of the following day with the exception of Christmas Eve and New Year's Eve when the non-working portion of the holiday commences at noon.

Should any of the above holidays except Easter, Christmas Eve, and New Year's Eve fall on a Sunday the following Monday will be observed.

Elevator employees observe Martin Luther King's Memorial Day instead of Birthday.

Saturday shall not be considered as a layday in determining time ships are in berth in this harbour.

AIRPORT: An airport is available approx. 35 miles from the city and is served by regularly scheduled airlines.

TIME: The Port of Pascagoula is on Central Standard Time, GMT minus 6 hours; clocks are moved ahead 1 hour during Summer months. (First Sunday in April to last Sunday in October).

POLICE/FIRE/AMBULANCE: Telephone numbers for emergency services are: Fire 762-1133; Police 762-2211; Ambulance 762-4949 or 762-4848. Universal emergency No. 911.

TELEPHONES: Not available.

SERVICES: Facilities are available for compass adjusting. Tank cleaning and receipt of tank washings can be arranged by contract services available in the area.

SHORE LEAVE: Allowed for any crew member not detained by Immigration Office.

IDENTIFICATION CARDS: Standard Immigration Form I-95 to be made up for each crew member on arrival. Not necessary for crewmen already holding Form I-95 issued for the same vessel.

DELAYS: Berths at Public Terminals and the South Clusters are assigned by the Harbour Master of the Port of Pascagoula. Berths at private docks are assigned by the respective owners. No exceptions to this are allowed. Berth at grain elevator is assigned by the Lessee-Operator, the Louis Dreyfus Corporation. No delays are encountered by following this procedure, emergencies excepted.

GENERAL: Some difficulty encountered by unscheduled tows who use harbour for shelter in inclement weather. Pilot Association aware of current situations. Ample barge storage is available in Barge Fleeting Area operated by Colle Towing Company who may be contacted on VHF Channel 16 (KKV-933). Tel. (601) 762-5700.

SHIPMASTER'S REPORT: June 1980.

Vessel: 32,000 g.r.t., loading ammonia at Chevron Refinery.

Approaches: Charts BA. 3981 and 3380.

Approach made from the South East along the Safety Fairway using "Satnav" positions for the approach to the fairway entrance. Failing this the echo sounder may be used to good effect in conjunction with sights.

Two large oil rigs were sighted at the South East entrance to the fairway, but their positions were not plotted.

On the final approach visibility is often reduced due to industrial smog and the outlying islands are low and give no reliable positions until about 8 miles off. There are 4 conspicuous flares beside the Chevron Refinery which will give a good lead to the "HIP" Buoy. These flares are not marked on either chart, but their approximate position is Lat. 30° 20.2′ N., Long. 88° 29.3′ W.

Petit Bois Island is the first to show but with no distinguishing features until close to it. "HIP" Buoy is easily identified at least 8 miles away and shortly afterwards the channel buoys may be identified on radar. These buoys are not marked on B.A. 3380, but help indentify "HIP" Buoys should there be fishing boats in the vincinity. There are numerous fishing vessels in the approaches but they do seem to keep the fairway clear. Many tugs and tows also in the area.

Pilotage: There is no berthing at night for vessels of this size (32,000 g.r.t.) due to having to turn in the turning area above the berth. Vessels may sail at night but careful consideration should be given to weather conditions before agreeing to do so.

Contacted Pilot Office on VHF Channel 16, thereafter working on Channel 13.

Pilot boards from a fast, black hulled launch off "HIP" buoy, ladder on lee side about 1 m. above water.

CAUTION: The outer channel is well marked with conspicuous buoys but the configuration of the channel is liable to change. The approach may be swept with strong conflicting cross currents and, since the widest section is only 350 ft., very careful attention must be paid to steering.

Once inside Petit Bois Island the channel narrows to 225 ft. in places; the Pilots do have an unofficial 'one way traffic scheme' in progress but this is not always adhered to by tows and fishing vessels.

Proceeding inwards, the vessel is turned at the very head of the harbour with the assistance of 2 tugs; vessel is turned to starboard and the head tug then shifts from the port bow to the starboard bow for berthing. Berthing is always port side alongside.

There is not a great deal of room in the turning basin, although the Pilots say that vessels over 800 ft. are turned there regularly.

On sailing, with a deep draft (32 ft. maximum) special care must be paid to steering within the channel. With a width of just over 200 ft. there is no room for error. I would advise that the watchkeeping officer be in attendance on the helmsman throughout the passage.

Time from Pilot aboard to 1st line ashore is about 2 hours.

Berth: Chevron Refinery: Least depth sounded 12.2 m. Very good, with a substantial Chicksan area and fairly good mooring arrangements.

Once made fast and loading a very careful watch must be kept on the moorings since large tankers pass up and down the harbour to the tanker berth close ahead; the shore personnel will not hesitate to stop loading if they think the moorings will allow the vessel to surge.

No motor access to the gate some 200 m. distant.

Telephone on the quay.

Loading: No difficulties were experienced. The facility is very keen on pollution and will watch the discharge of ballast very closely.

The refinery do require ballast to be discharged ashore but that is out of the question. A disclaimer will be presented for the ship to sign.

Since the upreach of the Chicksan is not sufficient, the low extension or flexible hoses will have to be rigged prior to arrival. Shore connection is 8 in. 150 ASA and was done on this occasion by ship's personnel.

No vapour return line.

There is a recirculating system and there was no need to blow through lines on completion.

Product was cold at this call but 'warm' product has been experienced here in the past. Overall load rate was 343 t.p.h. which the shore personnel were extremely happy with. Hourly rates frequently over 500 t.p.h.

Shore Surveyor attended and all figures were based on ship's gauges.

Personnel generally helpful.

General: Fresh water available on the quay but reported as *not potable.*

Bunkers available.

Stores have to be manhandled along the jetty but there are small trolleys available.

Gangway: Best left turned in until in position thence no problem, being clear of obstructions.

No objection made to ship's crew "touching up" ship's side from quay.

U.S.C.G.: No inspection this call but they are known to carry out both cargo and navigational inspections.

Films: Exchanged by ship chandler: Bow and Stern Marine.

Consul: The nearest British Consul is at Houston or Atlanta, should any surveys be required.

AUTHORITY: Port of Pascagoula, 3033 Pascagoula Street, P.O.Box 70, Pascagoula, Mississippi 39567. *Tel:* (601) 762-4041. *Telex:* 161858 PRT PASC. *FAX:* (601) 762-7476. *Contact:* Paul W. Smith, Port Director. Allen E. Moeller, Harbour Master.

PENSACOLA, Florida: 30.25 N. 87.13 W. (See Plan)

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
BERTHING:

Berth Number	*Length* (ft.)	*Depth at MLW** (ft.)	*Use*
No. 1	640	35	General Cargo and Bulk Handling Faciliites
No. 2	400	35	General Cargo
No. 3	425	35	General Cargo and Lumber
No. 5	425	35	General Cargo
No. 6	580	35	General Cargo

*While the Port of Pensacola has 35 ft. depth at MLW in berths, the Corps of Engineers project draft of 33 ft. is the controlling draft for the Port.

Transit Sheds:

Warehouse	
No. 1	72,000 sq.ft.
No. 5	72,000 sq.ft.
No. 6	90,000 sq.ft.
No. 8	83,000 sq.ft.
Total	317,000 sq.ft.

CRANES: Mobile cranes up to 85 tons.
EQUIPMENT: Leased Equipment: 18×6,000 lb. fork lift trucks, 8×9,000 lb. fork lift trucks, 2×5,000 lb. fork lift trucks, 1 front end loader, 2 motorised driven sweeper, 1 motorised driven scrubber, 1 paper clamp and stevedoring equipment: Fork lift trucks have individual heights of 10, 14, 15, 16 and 17 ft. Attachments permit conversion for handling paper rolls and bales.
BULK HANDLING FACILITIES: *Dry Bulk Handling:* Bulk warehousing capacity is 88,100 sq.ft. in 2 buildings. Each building with rail and truck loading capability. Bagging services provided on the port premises through arrangements with private stevedoring companies.
TANKERS: *Private:* Belcher Oil Co. of Pensacola. J.R. Sauls, Manager, Mid Gulf Area, Port of Pensacola, P.O.Box 12626. Pensacola, FL 32574. Tel: 904-432-2471. Facilities: Industrial, Marine Fuels. 6 bulk oil tanks of 662,000 barrels capacity connecting by pipeline to Berths 1, 2 and 3. 5 positions for loading and unloading. 5 bunkering stations and a truck loading facility.
Report: Port Approaches – Cautionary Advice: Vessels can approach the Sea Buoy with little or no difficulty. Deep loaded vessels should not enter past Buoy No. 1 without a Pilot. Currents in the Gulf of Mexico are varied, but will usually set in direction of the wind; sometimes approaching 4 to 5 knots during severe storms. When entering harbour full manoeuvring power and a good helmsman are essential as the current in the Entrance Channel can reach 5 knots. Currents inside the harbour are approximately 1 knot and set fair with channel. Vessel should anchor outside of Buoy No. 1 and off the centre of channel line when no Pilot is available to take them to the Inner Anchorage. Lightering is permitted at the Inner Anchorage. Harbour bottom consists of soft mud. There is very little harbour traffic.

Entering and Berthing: This harbour is serviced by one 1 Pilot organisation who knows all anticipated movements within the harbour so no unexpected traffic should be encountered and all passing is done at desirable positions. Vessels can enter and berth at any stage of tide. Pilots will use West Channel for ships docking at Berth No. 3 on the pier face. When docking at Berth No. 3, the Pilot approaches the berth dredging the vessel's anchor and passes her lines. When tugs are available in the harbour, Pilots will employ them.
FRESH WATER: Available.
AIRPORT: Pensacola Regional Airport is served by both domestic and international air carriers in addition to intrastate airline service.
AUTHORITY: Port of Pensacola, Marine Operations Department, P.O.Box 889, Pensacola, Florida 32594. *Tel:* (904) 435-1870. *Telex:* 702435. *Contact:* David A. Schaller, Port Director.

PETERSBURG, Alaska: 56.49 N. 132.57 W.

Located on Mitkof Island, Northern end of Wrangell Narrows. Open all year.
DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: (From sea via Dixon Entrance up Clarence Strait to Guar Island.) Under pilotage from Guard Island.
ANCHORAGE: Good anchorage in Scow Bay, mud bottom.
MAX. SIZE: Harbour depth 24 ft. MLLW. Tides: Diurnal range 15.7 ft. Also see "Berthing".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: 1×320 h.p.
BERTHING: Pacific American Fisheries Inc.: 75 ft. long, 65 ft. wid
Vessels should dock at slack water. Strong current.
STEVEDORES: 1 gang.
MEDICAL: 21 bed hospital.
WATER: State approved water available.
FUEL: Diesel and gasoline available.
REPAIRS: Marine ways to 35 tons.
CUSTOMS: Immigration, Guard Island. Quarantine and Customs, loca
TRANSPORTATION: Scheduled and charter airlines and ferry.
AUTHORITY: City of Petersburg, P.O.Box 329, Petersburg, Alas 99833. *Contact:* Tom Gustafson, Mayor.

PHILADELPHIA, Pennsylvania: 39.57 N. 75.10 W. (See Plan)

DOCUMENTS:
3 Crew Lists, Form I-418 (suggest 6 be made).
3 Passenger Lists, Form I-418 (suggest 6 be made).
3 Customs Stores Lists (suggest 6 be made).
3 Curio Lists (own ship Form) (suggest 6 be made).
3 Narcotics Lists (own ship Form) (suggest 6 be made).
Manifest (Ship Cargo List). If Philadelphia first port of call, require 1 copy for Customs and 1 copy to be used as "traveller" surrendered last port of call. If Philadelphia not first port of call, 2 copies required, all cargo to be discharged at Philadelphia.

For Immigration Service:
Visaed Crew List.
Valid Passport or Seaman's Book for each person on board.
Crewman's landing card (Form I-95) for each crew member.

CERTIFICATES: Ship's Register and Load Line Certificate are mandatory. If vessel is carrying passengers from the U.S. they will require a U.S. Coast Guard Certificate. This can easily be obtained in about 1 or 2 days subject to meeting the requirement for life-saving equipment.

PILOTAGE: Pilotage is provided by members of the Pilots' Association for the Bay and River Delaware who maintain a shore station and operations tower at Cape Henlopen. The pilot station is in operation on a 24 hour basis and guards VHF Channels 16 and 14. Telegraphic address is: Delpilots, 214 S. Eleventh Street, Philadelphia, Pa. 19107. Arrangements for Pilot may be made by the local Agent although an ETA and draft either by cable or VHF radio will be greatly appreciated and will facilitate prompt boarding on arrival. The pilot boarding area is inside a line between Entrance Buoys No. 5 and 6, or approximately 2 to 2.5 miles S.E. of Harbour of Refuge Lighthouse. Pilots may board further off-shore upon special request.

ANCHORAGES: Large and deep draft vessels awaiting berth are encouraged to avail themselves of the deep water anchorage adjacent to the Breakwater near the pilot station. There are 13 anchorage areas available along the Delaware for moderate size vessels of lesser draft. *Shipmaster's Report:* Good holding ground at Big Stone Anchorage. There is a launch service from Big Stone Anchorage to the shore, call VHF Channels 9 and 14.

RESTRICTIONS: There are no restrictions imposed upon entry except those dictated by vessel draft. Throughout most of its length, the Delaware River is dredged to 40 ft. at MLW. In addition there is a mean tidal range of about 5.7 ft. Vessels of 40 ft. fresh water draft can safely transit the river on a rising tide.

MAX. SIZE: Deep-draft oil carriers are lightered in a special anchorage approximately 10 miles N.W. of the pilot station. Vessels are restricted to a max. draft of 55 ft. by Federal Law.
Chesapeake/Delaware Canal: See "Wilmington" – Delaware.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to New York Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

VHF: A port radio service operated by The Ports of Philadelphia Maritime Exchange on a 24 hour basis is also available to all vessels while transiting the Delaware River. VHF Channels 16 and 14 guarded for purposes of this service.
Ship reporting service in operation.

TUGS: Tugs normally join vessels adjacent to berth. Tug's lines are used.

BERTHING:

Northern Shipping Co. Terminal	6 berths, depth 30 ft. to 35 ft.
Tioga Terminal	7 berths, depth 40 ft.
Delaware River Terminal	4 berths, depth 29 ft. to 32 ft.
Port Richmond	10 piers, depth alongside 26 ft. to 36 ft.
Delaware River	21 piers, depth alongside 26 ft. to 35 ft.
Packer Avenue Terminal	5 berths, depth alongside 40 ft.
Greenwich Point	2 berths 850 ft. length, depth 40 ft. to 42 ft.
Girard Point	3 piers, depth alongside 31 ft. to 40 ft.
Camden	3 piers, depth alongside 30 ft. to 40 ft.
Holt Marine Terminal	7 berths, depth up to 45 ft.

CONTAINER HANDLING FACILITIES: *Tioga Marine Terminal:* Handles containerised and Roll-on/Roll-off cargoes. The terminal is equipped with 2×45 ton container cranes. Length of the marginal wharf is 3,300 ft., upper slip berth 725 ft. and lower slip berth 625 ft.
Packer Avenue Marine Terminal: Handles containerised and Roll-on/Roll-off cargoes. The terminal is equipped with 2×45 ton container cranes, one has a heavy lift capacity of up to 375 tons. The marginal wharf is 3,200 ft. in length and the Roll-on/Roll-off slip berth is 825 ft. in length.
Holt Marine Terminal: 2×35 ton container cranes. Ro-Ro facilities available.

BULK HANDLING FACILITIES:

Berth No.	*Location*	*Operator*	*Berth Length (m.)*	*Berth Depth (m.)*	*Loading Rate (tonnes/p.h.)*
Pier No. 124	Greenwich	Conrail	310	12.19	5,000 (coal)
Pier No. 122 South	Greenwich	Conrail	260	12.19	3,000 (ore)
Pier E	Port Richmond	Conrail	260	12.19	2,000 (coal)
Camden-Beckett Bulk Terminal	Camden	South Jersey Port Corp.	200	11.50	500 (coal)

STEVEDORES: Ship's Agents make arrangements for stevedore gangs. Agents should be kept advised of any change in ETA.

MEDICAL: Advance notice of requirements desirable to the extent possible. Hospital facilities are available.

TANKERS: There are 83 petroleum handling berths along the Delaware River. All terminals are equipped with reducers. There are slop (residue) facilities at most terminals. Some main terminals listed below:

Fort Mifflin	Atlantic Refining and Marketing Co.	40 ft. depth
Point Breeze	Atlantic Refining and Marketing Co.	32 ft. depth
	Ballast Wharf	32 ft. depth
Hog Island	Chevron U.S.A. Oil Terminal	40 ft. depth
Paulsboro	Mobil Oil Terminal	30 ft. and 40 ft. depth
	B.P. Oil Terminal	36 ft. depth
Marcus Hook	B.P. Oil Corp.	35 ft. depth
	Sun Oil Co.	40 ft. depth
Westville (Eagle Point)	Coastal Eagle Point Oil Co.	40 ft. depth
Pennsauken	Texaco Inc.	34 ft. depth
Girard Point	Chevron U.S.A.	33 ft. depth
Delair	Amerada Hess Corp.	31 ft. depth
Delaware City	Texaco Inc.	37 ft. depth

Atlantic Refining and Marketing Co. – Fort Mifflin: Entering and Docking: There is a 5-knot tidal current that may cause extra care in tending lines while moored. Passing river traffic also requires constant attention to mooring lines. "A" and "B" Berths are 800 ft. in length and total mooring leads to each berth being 15. Maximum bow/manifold at "A" Berth is 375 ft.; head lines are 4 breast line leads. "A" Berth also requires 4 forward springs, 2 stern lines, 2 stern/breast lines and 4 after spring lines. "B" Berth requires 2 head lines, 2 forward breast lines, 4 forward spring lines, 2 stern lines, 2 after breast lines, 4 after spring lines. A gangway is not provided by the terminal.

Berthing: If the vessel is under 50,000 d.w.t., 2 tugs (1,000 h.p. – 2,000 h.p.) are required. Vessels in excess of 50,000 d.w.t. and equipped with a bow thruster may utilise 2 tugs. However, if the vessel is in excess of 50,000 d.w.t. and has no bow thruster, then 3 tugs should be used for docking. During normal conditions for vessels of any tonnage 1 tug (1,000 h.p. – 1,500 h.p.) should be employed for undocking. The vessel is normally turned off the dock prior to docking for starboard side mooring. Normal mooring is done approximately 1.5 hours prior to HW. A Pilot is required during docking and undocking. All hoses are 10 in. with bolted flanges. Cargoes handled are: crudes, gasolines, heating oil and kerosene. Maximum working pressure is 100 lbs. The terminal has no facilities for handling ballast or slops.

British Petroleum – Marcus Hook:

Pilotage and Docking: The services of a Pilot and Docking Master is both compulsory and recommended. When docking vessels of tonnages up to 30,000 d.w.t., 1 tug (1,700 s.h.p.) is required. Tonnages less than 50,000 d.w.t. require 2 tugs and vessels with a tonnage greater than 50,000 d.w.t. require 3 tugs when docking. For undocking vessels of any tonnage, 1 tug is required.

Hose Connection: Crude oil is discharged through 2×10 in. and 1×8 in. arm. All cargo connections are made with hydraulic quick coupler loading arms. Maximum loading and discharge pressure is 100 lbs. Fuel oils and heating oil are discharged through 10 in. and 8 in. arms to the vessel. The terminal has storage facilities for up to 92,000 bbls. of ballast and does not handle slops.

Facilities and equipment available at the terminal for cargo control include check valves on the dock leading to the shore pipe-line system. An emergency control to stop loading is located at the dock manifold.

Bunkers: Fuel oil and diesel oil are available from an 8 in. line with a maximum delivery rate of 2,500 bbls.p.h Quantities delivered are as required. Fresh water is piped at a maximum rate of 20 t.p.h. through a 3 in. line, there are no restrictions on amount delivered.

British Petroleum – Paulsboro:

General: The BP refinery at Paulsboro is located 1.5 miles Eastward of Bramell Point (87 miles from the Sea Buoy). The terminal has 2 offshore wharves which provide 1,053 ft. of berthing space. Depths of 38 ft. are reported alongside, and deck heights are 11 ft. and 12 ft. There is a 3.5 million-barrel storage capacity. The terminal is used for receipt and shipment of petroleum products and bunkering vessels. The berths are parallel to the channel and each have 4 steel dolphins.

Vessels up to 675 ft. in length and a maximum of 38,000 d.w.t. can be accommodated at the Terminal Dock. Max. draft (fwd) is 37 ft. at the dock. Docking of vessels is done 2 hours prior to HW. Vessels up to 26 ft. can dock or undock at any stage of the flood tide. Vessels in excess of 26 ft. must wait for HW to dock or undock. Passing river traffic will cause some surge to take place. Proper tension should be maintained on all mooring leads. A gangway is not provided by the terminal.

Pilotage and Tugs: The services of a Pilot and Docking Master is both compulsory and recommended. Vessels tonnages in excess of 1,000 g.r.t. required tug assistance from 1 or 2 tugs depending on prevailing winds. For undocking vessels of any tonnage 1 tug is required. Due to shoaling adjacent to the berth, be advised that undocking vessels should be lined up on the Billingsport Range prior to the exchange of the Docking Master and Pilot.

Hose Connection: Clean products, No. 4 fuel oil and No. 6 fuel oil are handled at this terminal through 8 in. hoses. These hoses are connected with bolted flanges, there are 2 connections for each product. All products are pumped with a maximum pressure of 100 lbs. The terminal has no facilities for handling ballast or slops.

Bunkers: Fuel oil and diesel oil are available in desired quantities. Maximum delivery rate is 2,000 bbls.p.h. through 8 in. lines. Fresh water is not available.

Dupont – Gibbstown:

General: Deepwater Point, located 0.6 miles above the New Jersey end of the Delaware Memorial Bridge and 59 miles from the Sea Buoy, is the site of the Dupont Chemical Company plant. The 550 ft. wharf (Lat. 39° 41′ 37″ N., Long. 75° 30′ 40″ W.) at the plant can provide 600 ft. of berthing space with dolphins. Depths of 33 ft. are reported alongside; dock height is 10.5 ft. Liquid sulphur, acids, and chemicals are handled at the wharf.

Pilotage and Docking: Vessels up to 630 ft. in length, beam 90 ft. and 28,000 d.w.t. can be accommodated at the dock. Max. draft allowed is 32 ft. The dock has a limited strength. Shoaling in the berth places a limit on vessel draft. For drafts of 32 ft. docking is done 2 hours prior to HW. Undocking can be done at any stage of the tide. Passing river traffic will cause the vessel to surge in it's berth. Proper tension should be maintained on all mooring leads. A gangway is not provided by the terminal.

The services of a Pilot and Docking Master is compulsory and recommended. Recommended mooring is with the bow downriver. The vessel is turned off the dock with tug assistance. For docking, 2 tugs (approximately 2,000 h.p.) are required. When undocking 1 tug (approximately 2,000 h.p.) is sufficient. The dock runs parallel to the river channel. All vessels are moored port side to. No mooring cables can be employed. All leads must be manilla or polypropylene lines.

Hose Connection: Fuel oil is discharged through 2×10 in. lines. These lines are connected by a flange. Maximum pumping pressure is 100 lbs. Numerous cargo lines are located on the dock for handling barge shipments of petro-chemicals and acid. Assigned vessels are cautioned to keep mooring lines clear of cargo lines. Safety check-lists are employed at this facility. Personnel at the facility are familiar with and follow safety practices. The terminal has no facilities for ballast or slops.

Fresh Water: Fresh water is only available at the dock. Fresh water is piped at 20 t.p.h. and supplied in an emergency only.

Chevron Oil – Hog Island (Berths No. 3 and 4):

General: The Hog Island Wharf is located 90 miles from the Sea Buoy on the Mifflin Range section of the Delaware River at Lat. 39° 51′ 46″ N., Long. 75° 14′ 15″ W. The terminal is a deepwater berth providing 2,754 ft. of berthing space with dolphins. Depths of 37 ft. are reported alongside the dock and deck height is 16 ft. The terminal is used for receiving crude oil and shipping refined petroleum products. There is a 5.5 million-barrel storage capacity at the terminal.

Entering and Docking: Vessels up to 1,000 ft. in length, 135 ft. beam and 110,000 d.w.t. can be accommodated at both berths. Maximum fresh water departure draft allowed is 37 ft. Vessels over 35,000 d.w.t. have a maximum fresh water departure draft of 36.5 ft. For vessels making arrival to the Hog Island Berths that have pre-arrival displacements over 35,000 d.w.t. a lightering service is available in the vicinity of Big Stone Beach. Chevron provides Yokohama Fenders for the lightering operations. Vessels over 35,000 d.w.t. should have a minimum arrival draft of 36.5 ft. (salt) prior to transit up the Delaware River. A gangway is not provided by the terminal.

Pilot and Tugs: The services of a Pilot and Docking Master is compulsory and recommended. Vessels should arrive off the berth 2 hours prior to HW. All vessels are turned prior to docking for starboard-side berthing with the heading down-river. 2 tugs are required if the tug is between 1,000 h.p. and 2,000 h.p. 3 tugs are required for vessels exceeding 35,000 d..w.t. For undocking 1 tug is required for all tonnages. No gangway is provided by the terminal. Passing river traffic will cause berthed vessels to surge. All mooring lines and/or wires should be tended at all times. Additional spring lines are recommended for vessels in excess of 35,000 d.w.t.

Hose Connection: Crude oil is discharged through 4 loading arms at both berths. The hoses are 12 in. and are connected with a bolted flange. Max. discharge pressure is 100 lbs. All lines on shore are common crude lines. The terminal has no facilities for ballast or slops.

Fresh Water/Fuel: Fresh water when required by the vessel can be provided by the terminal. Max. delivery rate is 50 t.p.h. through a pipeline. Fuel oil can be delivered by barge only.

Mantua Petroleum – Mantua Fuel Pier:

General: The Mantua Fuel Pier is located at the S.W. limits of Mantua Anchorage, 81 miles from the Sea Buoy. The entrance of Mantua Creek is adjacent to the Western end of the Fuel Pier dolphin located at each end of the pier. The terminal is used for the discharge of crude oil, fuel oil, heating oil, jet fuel and petrochemicals.

Vessels up to 800 ft. in length, 125 ft. beam and 80,000 d.w.t. can be accommodated at the berth. Maximum fresh water draft allowed at the pier is 37.5 ft. Shoaling at the berth may place further limitations on the allowed fresh water draft.

Pilotage and Tugs: The services of a Pilot and Docking Master is compulsory and recommended. Following transit of the Delaware River on a rising tide, vessels should arrive off the dock 2 hours prior to HW. Vessels are turned around in the Anchorage Area North of the terminal with 2 tugs assisting. After completion of the turn the vessel is then breasted, port side, into the berth. The berth is almost parallel to the channel. 2 tugs are used for docking vessels of all sizes. 1 tug is used for undocking all vessels. Approximate tug horse-power required is 2,000 h.p. All vessels are moored port-side to. The terminal recommends that manila or polypropylene mooring lines be used at this location. Passing river traffic will cause surging of the vessels at the berth. To minimise this surging, the terminal recommends doubling of fore and aft spring lines. All mooring lines should be tended constantly.

Hose Connection: Cargo handled at this terminal includes crude, heating oil, fuel oil and jet fuel. Jet fuel is handled through an 8 in. line. All other cargoes are handled through 10 in. lines. Connections of hoses are made with flanges. Maximum pumping pressure is 90 lbs. On completion of cargo discharge the terminal displaces the cargo in the hose with nitrogen. The terminal connects and disconnects all hoses and has no facilities for ballast or slops.

Bunkers and Freshwater: No fuel or freshwater is available at the berth. The terminal will not permit fueling of vessels at this berth.

Mobil Oil – Paulsboro:

General: The Mobil Oil Terminal is located at Bramell Point at the West end of the Paulsboro waterfront which is approximately 80 miles from the Sea Buoy. Facilities include a 2,453 ft. marginal wharf providing 2,254 ft. of berthing space. Depths of 39 ft. have been reported alongside and deck height is 12.5 ft. There is a 6.2 million-barrel storage capacity. The terminal is used for the receipt and shipment of petroleum products and bunkering vessels.

Vessels up to 900 ft. in length, unlimited beam and 80,000 d.w.t. can be accommodated at the terminal berths. Drafts to 38 ft. (freshwater) have also been accommodated at these berths. Shoaling at the berth may place further limitations on the allowed fresh-water draft.

Pilots and Docking: The services of a Pilot and Docking Master is compulsory and recommended. Vessels should arrive off the dock 2 hours before HW and are turned prior to docking for a port side mooring. After completion of the turn the vessel is breasted into the berth. Additional spring lines are recommended to prevent surging caused by passing river traffic. To insure a proper lead on the spring lines, the terminal recommends the spring lines be crossed. The terminal does not provide a gangway.

Tugs: Tug requirements for docking vessels include: 1 tug for vessels up to 30,000 d.w.t., 2 tugs for vessels over 30,000 d.w.t. For undocking vessels tug requirements include 1 tug for vessels up to 50,000 d.w.t. and 2 tugs for vessels in excess of 50,000 d.w.t.

Hose Connection: Crude is discharged at No. 1 Berth. 4 loading arms with 10 in. hoses using bolted flanges are connected to the ship. Max. discharge pressure is 125 lbs. Clean lubes are handled at No. 2 Berth through 3 loading arms when loading and 4 loading arms when discharging. 8 in. hoses with bolted flanges are connected to the ship. Max. line pressure is 100 lbs. Lube oils are handled at No. 3 Berth in the same manner as No. 2 Berth. The terminal has limited facilities for handling ballast through a 6 in. line. There are no common pipe-lines for cargo in the terminal. Safety check lists and practices are followed by terminal personnel.

Bunkers and Fresh Water: All quantities of fuel oil, diesel oil and fresh water are pumped to the vessel as required.

Sun Oil – Marcus Hook: (Also see "Shipmaster's Report").

General: Located at Mile 69 North, Marcus Hook is an important petroleum centre where large quantities of crude oil are received and refined petroleum products are shipped. Vessels can be bunkered at the rate of 1,500 and 5,000 bbls.p.h. Sunoco Wharf No. 3 (Lat. 39° 48′ 23″ N., Long. 75° 25′ 10″ W.), and Sunoco Wharf No. 2 (250 yards and Northeastward of Wharf No. 3) are both owned and operated by Sun Oil Company.

Wharf No. 2A can accommodate vessels up to 750 ft. in length, 125 ft. beam, max. 50,000 d.w.t. and max. fresh water draft 35 ft. Wharf No. 3A can accommodate vessels up to 810 ft. in length, 125 ft. beam, max. 76,000 d.w.t. and max. fresh water draft of 35 ft. Wharf No. 3C can accommodate vessels up to 1,000 ft., 125 ft. beam and draft 35 ft. Shoaling at the berth may place further limitations on allowed fresh water drafts.

Pilots and Docking: The services of a Pilot and Docking Master is compulsory and recommended. Vessels should arrive off the dock 2 hours prior to HW. Vessels are turned above the facilities prior to docking. Undocking is done at any stage of the water height. After completion of turn the vessel is then breasted into the berth for a starboard side mooring. Passing river traffic will cause moored vessels to surge unless proper tension is maintained on mooring leads at all times.

Tugs: Tug requirements for docking vessels include 2 tugs between 1,500 h.p. and 2,000 h.p. For vessels undocking 1 tug is sufficient.

Hose Connection: Crude and fuel oil are discharged at Berths No. 2A and 3A. Both berths have 4 loading arms, 12 in. hoses, and max. pumping pressure of 125 lbs. All connections are made with a bolted flange. Clean products are handled at all 3 berths through 8 in. or 12 in. hoses. Maximum pumping pressure is 125 lbs. Petro-chemicals are discharged at Berth No. 3A through a 10 in. line with a max. pumping pressure of 125 lbs. All connections for clean products and petro-chemicals are made with bolted flanges.

Bunkers and Fresh Water: Fuel oil and water is available at all berths. Fuel oil is delivered at 2,000 bbls.p.h. through an 8 in. line. Fresh water is piped at a rate of 45 t.p.h. Quantities available are enough to satisfy individual vessel requirements.

Swann Oil – Harkness Point, Schuylkill River:

General: The Schuylkill River is approximately 85 miles from the Sea Buoy on the Northside of the Delaware River. The junction is marked with a flashing red 4 sec. light mounted on a stone pile on the right side of the junction and Buoy "C1" on the lest side of the junction. A fog signal is located on the West side of the river junction. A lighted range (bearing 021.5°T) marks the entrance. Vessels proceeding to Harkness Point will pass under the Girard Point Bridge and Penrose Avenue Bridge, 0.6 miles and 1.3 miles, respectively, above the river mouth. Both bridges have fixed spans with clearances of 135 ft.

Pilotage and Docking: The terminal berth can accommodate vessels up to 630 ft. in length, 90 ft. beam, max. 28,000 d.w.t. and max. fresh water draft of 33 ft. There is a bow-to-manifold restriction and no proper breast line leads therefore the present mooring arrangement considered to be unsafe. Vessels should arrive at the Schuylkill River at HW slack for docking. Undocking can take place at any stage of the tide. A parallel approach is made when docking. A Pilot and Docking Master are compulsory and recommended. 2 tugs are assigned to all vessels when docking. For all vessels undocking 3 tugs must be employed. Undocking vessels have to be backed down the Schuylkill River to the junction with the Delaware River before turning can be accomplished.

Hose Connection: Fuel oil, heating oil, bunker and gasoline are all offloaded at this terminal. Bunkers are also loaded onto vessels at the berth. 4×10 in. lines are used for fuel oil and heating oil. All cargo lines are connected with a bolted flange. Max. pumping pressure on all lines is 100 lbs. 1×6 in. line is used for bunkers and 1×8 in. line is used for gasoline. The terminal has no facilities for ballast or slops. The dock manifold only permits the discharge of one grade at a time, this could affect the trim of the vessel.

Fresh Water/Fuel: Fuel oil and water is available at the berth. Fuel oil is delivered through a 6 in. line at 2,000 bbls.p.h. as per vessel requirements. Fresh water is piped at 40 t.p.h. maximum delivery rate

Coastal Eagle Point Oil Co. – Westville Nos. 2 and 3:

General: The Terminal is located 90 miles from the Sea Buoy at Lat. 39° 52′ 43″ N., Long. 75° 09′ 30″ W., East of Eagle Point. The facility has an offshore wharf which provides 1,380 ft. of berthing space. Depths of 40 ft. are reported alongside and deck heights are 6 ft. and 16 ft. There are water and elecrical shore power connections. Vessels can be bunkered at the rate of 1,500 bbls.p.h.

The terminal can accommodate vessels up to 910 ft. in length, unlimited beam, max. 85,000 d.w.t. with a max. fresh water draft of 38 ft. The controlling depth at the berth is 40 ft.

Pilotage and Docking: A Pilot and Docking Master are compulsory and recommended. Vessels dock at HW or first stage of ebb. Undocking takes place at any stage of the tide. For docking 2 tugs are recommended. For undocking the Master may decide to use 1 or 2 tugs, depending on the weather and tidal conditions. Vessels are turned prior to docking for a port side mooring. No gangway is provided by the terminal. A normal mooring arrangement is used. Distance between shore manifolds is 878 ft. The terminal requires 100 ft. clearance between vessel when Berths No. 2 and 3 are occupied simultaneously.

Hose Connection: Berth No. 2 handles off-loading of crude, No. 4 and No. 6 fuel oil through 12 in. and 8 in. hoses. All connections at both berths are bolted flanges. Max. pumping pressure at both berths is 100 lbs. for all cargoes except chemicals which are pumped at 95 lbs.

Berth No. 3 handles No. 4 and No. 6 fuel oil through 6 in., 8 in. and 12 in. hoses. The terminal can handle up to 10,000 tons of ballast providing the separator is operational. Slops can also be sent ashore. The shore ballast line is segregated. Fuel Oil and crudes are handled through a common line.

Fresh Water/Fuel: Available.

Dirty Ballast Facilities:

Marcus Hook (Sun): Line 8 in. Max. quantity acceptable 1,800 tons. Rate 250 t.p.h. Clean ballast may be pumped overboard.

Marcus Hook (B.P.): Line 8 in. Max. quantity acceptable 2,000 tons. Rate 250 t.p.h. Clean ballast may be pumped overboard.

Paulsboro (Mobil): Line 6 in. Max. quantity acceptable 2,000 tons. Rate 150 t.p.h. Clean ballast may be pumped overboard.

Paulsboro (Exxon): Line 10 in. Max. quantity acceptable 4,000 tons. Rate 800 t.p.h. Clean ballast may be pumped overboard.

Point Breeze (Atlantic): Line 6 in. Max. quantity acceptable, no limit. Rate 300 t.p.h. Clean ballast may be pumped overboard.

Eagle Point (Coastal): Line 10 in. Max. quantity acceptable, no limit. Rate 1,000 t.p.h. Clean ballast may be pumped overboard.

Girard Point (Chevron): Line 8 in. Max. quantity acceptable, no limit. Rate 500 t.p.h. Clean ballast may be pumped overboard.

General: Lighterage of deep drafted tankers effected at anchorage inside the Capes and before entering the main Ship Channel, i.e. at Big Stone Reach Anchorage, etc.

The holding ground in the upper river anchorages, such as Reedy Point, Marcus Hook, Mantua Creek, etc. is reported to be poor, whilst considerable siltation is also reported in these areas. Masters are therefore advised to take suitable precautions when having to use these anchorages.

Loading Fresh Water: This is effected at Mantua Creek Anchorage only.

Shipmaster's Report: September 1984.
Sun Oil Jetty (3C) at Marcus Hook.

Vessel: 140,000 d.w.t. LOA 270 m.

This is the only berth at Marcus Hook suitable for tankers of this size. Usually berth starboard side alongside, arriving off berth about 2 hours before HW. 1 tug each end, tugs' lines and usually made fast on main deck. 2 back springs first then 2 to 3 breasts and 2 to 3 head/stern lines. With this size of vessel it is better to have forward back springs from forecastle and use main deck moorings as head lines. Aft normally have back springs and stern lines from poop and breast lines from main deck.

Shore gangway and with an accommodation ladder about 20 m. abaft after manifold it is best to remove platform and land shore gangway there.

If bunkering then usual to pull off berth and anchor in Marcus Hook Anchorage.

Berthing Pilot boards off and normally uses accommodation ladder.

LNG/LPG: COAST GUARD REGULATIONS:

REQUIREMENTS FOR THE TRANSPORT AND TRANSFER OF LNG/LPG:

The following requirements are issued in the interest of port safety to supplement existing local, State, and Federal Regulations.

A. *GENERAL REQUIREMENTS.*

1. *Pre-arrival Conference:* Prior to a vessel's initial port call, or when such a vessel has not been to the port within six months, and is laden with LNG or LPG enroute to a facility under the jurisdiction of the Captain of the Port, Philadelphia zone, as defined in 33 CFR 3.15-25, a pre-arrival conference shall be held with all personnel concerned in the delivery and operation of the facility. The purpose of this conference is to disseminate and explain Captain of the Port requirements, local regulations, and establish emergency procedures for that vessel during the initial and subsequent port calls. The conference will include representatives of the Coast Guard, the vessel's Agent and charterer or operator, terminal owner/operator, and local authorities including the fire department.

2. *Notification:* The Captain of the Port must be notified:

a. At least 72 hours in advance of a vessel's arrival at the Delaware Breakwater with confirmation 12 hours in advance, and certification upon arrival.

b. Of the vessel's ETA at Delaware Memorial Bridge.

c. Of the intended length of port call and estimated time of departure.

d. Of any changes in the intinerary.

B. VESSEL DOCUMENTS: Prior to proceeding past the Delaware Breakwater at Cape Henlopen, the Master of the vessel shall ensure the following documents are valid and can be produced on demand:

1. A Certificate of Financial Responsibility issued by the Federal Maritime Commission.

2. If U.S. Flag, a Certificate of Inspection endorsed for the product(s) carried.

3. If foreign flag, a Letter of Compliance (LOC) for the carriage of the product(s) carried.

a. Vessels not holding a valid LOC shall be boarded by a joint COTP/OCMI inspection party at the Breakwater Anchorage prior to proceeding upriver. The vessel shall be examined in accordance with 46 CFR, part 154. If the examination is satisfactory, the vessel will be permitted to proceed upriver to the facility. Compliance with part C of this chapter will be strictly observed.

C. TRANSIT RESTRICTIONS FOR VESSELS LADEN WITH LNG/LPG CARGO:

1. *Vessel Movement:* Vessel movement will be conducted only with prior approval of the Captain of the Port.

2. *Propulsion and Machinery Status Report:* No vessel may proceed past the Delaware Breakwater unless the Master sends a message to the Captain of the Port within 12 hours before arrival stating that "To the best of my knowledge and belief there are no known casualties to this vessel or its machinery and all cargo handling and gas detection equipment is in proper operating condition". Should any condition be present that precludes the sending of this message, the vessel shall be boarded by the Coast Guard at the Breakwater Anchorage so that a determination can be made as to the vessel's seaworthiness and repairs necessary prior to transiting the river.

3. *Transits:* LNG/LPG laden vessels may only transit the Delaware Bay/River daytime during hours if the visibility is two miles or greater. After discharging, a vessel empty of LNG/LPG cargo may depart at any time.

4. *Intra-Harbour Movement:* An LNG/LPG carrier should submit 2 hours' advance notice of intra harbour movement to the Captain of the Port, earlier notice is desired if practicable.

5. *Radio Guards:* Continuous radio guard must be maintained on Channel 13 (156.65 MHz) and Channel 16 (156.8 MHz) during transit.

6. *Tug Escort:* No LNG/LPG laden vessels shall transit the Delaware River above Delaware Memorial Bridge without at least one commercial tug escorting.

7. *Coast Guard Escort:* Unless specifically authorised by the Captain of the Port, no vessel may transit the Delaware River above Delaware Memorial Bridge without a Coast Guard escort vessel.

8. *Meeting and Overtaking:* While transiting the river, the vessel will not overtake river traffic; nor will river traffic be allowed to overtake the vessel. The vessel shall be navigated so as not to meet other vessels at bends in the river channel. During meeting situations, neither vessel shall proceed in such a manner that they will meet at a relative speed greater than 20 knots.

9. *Emergency Situations:* In the event of an emergency situation, the Captain of the Port must be promptly notified of the vessel's position, draft, nature of emergency, time required to restore normal operations and future intentions. The vessel's Master or Agent shall have the authority to immediately enlist commercial assistance in an emergency situation or when the COTP deems that commercial assistance is required to prevent an emergency.

D. ANCHORAGE RESTRICTIONS AND REGULATIONS:

1. Transfer of product at anchorage is not permitted except in the event of an emergency such as to warrant, in the opinion of the Captain of the Port, specific authorisation.

2. A live bridge watch shall be maintained by a qualified watch officer. A round of bearings and/or ranges fixing the vessel's position shall be taken hourly followed by a report on the hour to COTP Philadelphia on Channel 16 FM reporting anchor holding and operations normal or any significant change in position or deviation from the norm. In addition to these requirements, during periods of sustained winds in excess of 25 knots, but less than 40 knots, the vessel must maintain the capacity of having engines on line within 30 minutes; if sustained winds are 40 knots or over, the main propulsion plant must be on line.

3. A continuous radio guard shall be maintained on Channel 16 FM while at anchor.

4. Vessels anchored in Mantua and Marcus Hook Anchorages may be required by the Captain of the Port to have tug assistance during the change of tide.

E. VESSEL TRANSFER OPERATIONS: (The Master shall be responsible for compliance with this section): Prior to the commencement of transfer operations, a Coast Guard boarding party will examine the vessel. Cargo transfer shall commence only after satisfactory completion of the inspection and issuance of Coast Guard Form 4260, Permit to Handle Dangerous Cargo.

1. The following is a partial list of items inspected by the Coast Guard boarding party:

(a) Relief valve records and data.
(b) Gas detection system/alarms operation and records.
(c) Remote shutdown operation.
(d) Firefighting equipment.
(e) Boiler burn off system (if installed).
(f) Condition of piping, flanges, expansion joints, relief valves, cargo valves, and gauges.
(g) Intrinsically safe equipment.
(h) Automatic controls.

2. In addition to the above, the inspection party will ensure the following requirements are complied with:

(a) Person-in-Charge: The Master shall ensure a licensed officer or qualified supervisor is aboard the vessel throughout the entire cargo discharge/loading operation.

(b) Other Vessel Activities: Only such activities as bunkering, loading of stores, repairs i.e., normal ship maintenance and support activities as approved by the Captain of the Port at the pre-arrival conference, will be permitted – under such conditions as stipulated – while vessels are transferring LNG/LPG. No cutting, burning, welding or other hot work is allowed on the vessel without specific approval from the COTP.

(c) Smoking Areas: Smoking areas shall be designated by the Master and posted at the gangway.

(d) Bonding: The Terminal Manager shall ensure the vessel is electrically bonded to the shore ground prior to commencing transfer operations. The connection shall be maintained until transfer operations are secured. An approved connection shall be used for securing, i.e., alligator clamps are not acceptable. "C" clamps would meet minimum requirements, bolted connections are recommended. The Master shall not commence hookup until this action is taken.

(e) Mooring Requirements: The vessel shall, when possible, moor bow to seaward, and be prepared to get underway on short notice. It may be required to have a live tug standing by during operations. A wire rope towing hawser shall be made ready forward, amidships, and aft with the bight at water's edge.

(f) Operations During Storms: Cargo transfer operations shall cease if an electric storm occurs and at any time lightning is observed or thunder heard; cargo transfer connections may be maintained.

(g) Language Requirements: Ship's supervisory personnel directly involved in supervision of cargo transfer operations must be able to read, speak and understand the English Language.

(h) Transfer Connections: Each flange in the overall transfer operation will be secured with all bolts and properly gasketed, or with a Coast Guard approved quick disconnect device.

(i) Venting: Venting of boil off vapours is prohibited. LNG vessels must demonstrate the ability to contain or consume boil off vapours for a minimum of 21 days.

(j) Fire System: The Master shall ensure the vessel's fire main is linked to the waterfront facility fire fighting system so that the vessel will maintain a firefighting capability, even if its fire pumps are inoperative. The bonding hose shall never be charged unless in use during a fire.

(k) Personnel Aboard: A minimum number of personnel to be retained aboard the vessel shall be established during the pre-arrival conference or dockside inspection.

(l) Barge Personnel: In operations involving barges, a tankerman possessing an appropriate certificate for the product being handled shall be present during cargo operations.

F. FACILITY OPERATIONS: (The Terminal Manager shall be responsible for compliance with this section).

A pre-arrival conference shall be held in accordance with para A so that the following regulations may be explained and disseminated prior to the initial operation of a facility. Drawings indicating cargo routing from the dock to all storage tanks shall be provided to Coast Guard representatives. A current list of qualified cryogenic supervisors shall be maintained with copies provided to the COTP. The following regulations shall be complied with during all transfer operations.

1. *Facility Security:* All facility/terminal security zone areas are to be posted and restricted to personnel authorised by the terminal manager. Adequate physical security shall be provided, including a guard force to allow on authorised personnel, i.e., those persons who have an official need for presence on the facility, during operations.

2. *Equipment Inspections:* Immediately prior to handling cargo, the shore piping which is to be used in the operation shall be inspected for proper operation of automatic controls, gas detection, and instrumentation. If any of the system contains air, it shall be purged prior to handling the product by an inert gas, in special circumstances, by using low pressure LNG/LPG vapour. Care shall be taken in purging to minimise the volume of flammable mixtures present at *anytime.* Following the purging, piping shall be so cooled as to prevent excessive thermal stress.

3. *Supervisor and Personnel:* A designated cryogenics supervisor shall be in attendance at the waterfront facility in the proximity of and during all cargo operations. During all periods of cargo transfer, the terminal shall have one man on board the vessel and one man at the tank car or storage tank loading stations who shall be able to communicate with each other at all times with intrinsically safe equipment.

4. *Language Requirements:* All shore supervisory personnel directly involved in supervision of cargo operations must be able to readily read, speak and understand the English language.

5. *Smoking:* No smoking shall be permitted except in designated areas determined by the facility operator, subject to the approval of the COTP.

6. *Hot Work:* Hot Work will not be permitted without prior authority of the COTP.

7. *Notification:* The COTP shall be notified one hour in advance of the commencement and termination of the cargo transfer operations at the waterfront facility.

8. *Fire Equipment:* The Terminal Manager will ensure currently tested and inspected fire hoses are laid out and connected to hydrants in tank car and storage tank loading areas unless otherwise provided with approved, permanently installed facilities. The international shore connection shall be connected in accordance with para. E, Vessel Transfer Operations. Hydrants shall be tested for satisfactory flow prior to connecting hoses. In addition to portable equipment, the offshore mooring area or waterfront facility area shall have any combination of semi-portable dry chemical extinguishers totalling 600 pounds. A fire main water source and spray equipment must be available as well. It will be the Terminal Manager's responsibility to have his fire marshall and fire equipment present at the connecting and disconnecting stages of the operation.

9. *Lighting:* Adequate shoreside lighting in conformance with the National Electric Code shall be provided.

10. *Hoses:* Each hose used to handle cargo shall have been designed for handling such products and shall be tested at 1 – 1.5 times its maximum allowable working pressure or 250 psi, whichever is greater prior to commencing the transfer operation.

11. *Vessel Protection:* Vessels moored to existing facilities and marginally to a channel, or when otherwise deemed necessary by the COTP, must be afforded protection through the use of barges or camels. Any such protection shall have specific approval of the COTP.

12. *Inspection of Reception Facilities:* All tank cars, tank trucks, barges and storage tanks shall be inspected prior to loading. Time of their last test shall be verified. Operability of overpressure protection devices shall be verified by a person designated by the terminal manager.

13. *Remote Shutdowns:* Remote cargo shutdowns shall be certified satisfactory by a person designated by the terminal manager.

14. *Transfer Completion:* Upon completion of all cargo transfers, the product line from pier head to tank car and/or storage loading stations in the type of operations where this applies, shall be unloaded into closed containers and not vented into the atmosphere. Where the operation of the LNG/LPG terminal is such that the product will be circulated continuously, it need not be unloaded – thus there will be no delay at the start of each cargo transfer operation while bringing the piping down to operating temperature, and a resultant reduction in cycling of thermal stresses. However, the unloading arms shall be drained, using nitrogen purge and left in a nitrogen atmosphere with the shipboard end of the unloading arm blanked off until ready for the next transfer operation.

15. *Bonding:* The terminal manager shall ensure the vessel is electrically bonded to the shore ground prior to commencing transfer operations. The connection shall be maintained until transfer operations are secured. An approved connection shall be used for securing, i.e., alligator clamps are not acceptable. "C" clamps would meet minimum requirements, bolted connections are recommended.

DENSITY: Philadelphia ports are fresh-water ports.

FRESH WATER: Fresh water normally not available directly at berth. Fresh water available by tank truck or through fire department. Water by barge available.

River Associates, Inc. of Philadelphia, Tel: (215) 922 – 6027, provides wash water in Philadelphia and Delaware Bay with two barges, 220 tonnes and 1,000 tonnes capacity.

FUEL: Bunker C and diesel fuel available at most oil terminals. Vessel's Agent should confirm berthing space at least 24 hours in advance.

CONSULS: The following countries are represented in Philadelphia:

Austria
Canada
Chile
Colombia
Costa Rica
Denmark
Dominican Republic
Ecuador
El Salvador
Finland
France
Germany F.R.
Great Britain
Guatemala
Haiti
Honduras
Israel
Italy
Japan
Lesotho
Mexico
Monaco
Netherlands
Norway
Panama
Portugal
Spain
Sweden
Switzerland
Venezuela

REPAIRS: All types of ship repairs can be effected.

DRY DOCK: Floating dock with capacity 70,000 tons.

SURVEYORS: American Bureau of Shipping, Tel: WA 5-2693 (after hours: 896-7586).

Caleb Brett, Tel: 521-1725.
National Cargo Bureau, Tel: WA 5-3546.
W. Saybolt, Tel: 727-1050.
Bureau Veritas, Tel: KI 3-5884.
China Corp. Register of Shipping, Tel: KI 3-5884.
Lloyd's Register, Tel: 836-7296.
Panama Bureau of Shipping, Tel: 543-5884.
U.S. Salvage Association, Tel: 544-4588.

GANGWAY/DECK WATCHMEN: These services are left to the discretion of the Master. It is often recommended by ship's P & I Club that watchmen be engaged when seamen are detained by U.S. Immigration. Ship is subject to fines by U.S. Government if any detained seaman deserts vessel.

OPENING/CLOSING HATCHES: Normally by stevedores.

CUSTOMS ALLOWANCES: No set rule. Reasonable amount allowed for personal use.

CARGO GEAR: For exceptionally heavy lifts, Pennsylvania Shipbuilding Co. has a floating derrick with 800 tons lifting capacity.

AIRPORT: Philadelphia International Airport is located approximately 6 miles from central harbour area.

TIME: Standard Time GMT minus 5 hours. Daylight Saving Time (GMT minus 4 hours) from first Sunday in April till last Sunday in October.

HOLIDAYS: New Year's Day (1st January); Martin Luther King, Jr's Birthday (15th January); Lincoln's Birthday (12th February); Washington's Birthday (22nd February); Thomas Gleason Birthday (17th March); Richard L. Askew Birthday (6th April); Good Friday; Memorial Day (Decoration Day); Flag Day (14th June); Independence Day (4th July); Labour Day (1st Monday in September); Columbus Day (12th October); November Election Day (1st Tuesday in November); Armistice or Veteran's Day (11th November); Thanksgiving Day; Christmas Eve; Christmas Day; and any other national holiday as may be provided by executive authority.

SHIP SUPPLY SERVICE:

Fleet Helicopter Service. Tel: 282-4100.
Keystone Helicopter Corp. Tel: 644-4430.
Seaboard Air Charter, Inc. Tel: 563-1564, (302) 856-6545.
Baker, Carver & Morrell of Phila., Inc. Tel: 336-2700.
Delaware Bay Ship Chandlers. Tel: (302) 422-8088.
Delaware Ship Supply Co. Inc. Tel: HO.3 – 1700.
Delaware Bay Launch Service Inc. Tel: (302) 422-8088.
Delaware River Harbour Service. Tel: 365-9777.
Hueber Launch Service. Tel: (215) 872-3544, (215) 425-3155.

POLICE/FIRE/AMBULANCE: Fire Tel: LO 3-6700; Police Tel: 231-3131; Port Disaster Tel: 609-WO 3-6420 or WA 5-8780.
GENERAL: If garbage removal is required while in port, it must be done under supervision of the plant quarantine service.
DEVELOPMENTS: Cibro to build coal terminal at Port Richmond.
AUTHORITY: Philadelphia Port Corporation, 1020 Public Ledger Building, 6th and Chestnut Streets, Philadelphia, Pennsylvania 19106. *Tel:* (215) 928 – 9100. *Telex:* WUT 834 – 652. *FAX:* (215) 928-1488. *Contact:* William B. McLaughlin, Director of Corporate Communications.
AGENT: Rice, Unruh, Reynolds Co., 232 South Fourth Street, Philadelphia, Pennsylvania 19106. Tel: (215) 629-1711 (Note: Answering service in attendance outside normal working hours). Telex: TRT 173232. Fax: (215) 629-0242.

PINEY POINT, Maryland: 38.08 N. 76.32 W. (See Plan)

Steuart Petroleum Company Terminal on East bank of Potomac River, 82 miles from sea.
DOCUMENTS/PILOTAGE: Refer to "Baltimore".
ANCHORAGE: Unlimited, available in Chesapeake Bay.
RESTRICTIONS: Berthing 24 hours a day with max. draft of 38 ft. Vessels exceeding 725 ft. or 36 ft. draft, 2 tugs required docking and 1 sailing. Vessels under, 1 tug docking and sailing.
MAX. SIZE: Limited by depth at berth, 38 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to New York Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: WMH Baltimore Radio. VHF Channel 26.
TUGS: 2 tugs available for berthing, join vessel off berth. Tugs despatched from Baltimore.
BERTHING: 1 tanker berth only operated by Steuart Petroleum Company. Long lines required for first ashore.
FRESH WATER: Available at berth.
FUEL: Bunker "C" only, available at berth.
AIRPORT: Washington National (80 miles) or Baltimore-Washington (100 miles).
TIME: GMT minus 6 hours. Summertime from April to October.
SHORE LEAVE: Allowed.
GENERAL: Nearest city with full services is Washington, 65 miles distance and Baltimore 110 miles.
AUTHORITY: Maryland Ports Administration, The World Trade Centre Baltimore, Baltimore, Maryland 21202. *Tel:* (301) 659-4550.
Operator: Steuart Petroleum Co., Piney Point, Maryland 20674.

PORT ADAMS, Texas: 29.45 N. 95.11 W.

Refer to "Houston" for all general information.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

PORT ANGELES, Washington: 48.08 N. 123.25 W. (See Plan)

DOCUMENTS, etc.: Refer to "Tacoma".
PILOTAGE: Compulsory for all vessels except those in coasting trade. Pilot station at Ediz Hook serves all vessels bound for Puget Sound ports. Pilot boards off Port Angeles.
APPROACHES: Depth at entrance 100 ft. – 160 ft. No bar.
ANCHORAGE: In harbour, depth at least 42 ft. MLLW.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available from Foss Launch and Tug Co.
BERTHING: 3 pier berths and 2 dolphin berths, depth up to 45 ft. MLLW. Forklifts with capacity to 10 tons.
STEVEDORES: 8 local gangs, additional gangs may be imported if required.
MEDICAL: All medical facilities available. Local hospital.
DENSITY: Salt water.
FRESH WATER: Available at all wharves.
FUEL: Barge delivery only.
REPAIRS: Minor repairs only.
GANGWAY/DECK WATCHMEN: Required only if detainees aboard.
CUSTOMS ALLOWANCES: No definite quantities specified; reasonable allowance at discretion of Custom's Inspector.
AIRPORT: William R. Fairchild International Airport 3.5 miles from the harbour.
HOLIDAYS: See "Tacoma".
AUTHORITY: Port of Port Angeles, P.O.Box 1350, 338 W. 1st Street, Port Angeles, Washington 98362. *Tel:* (206) 457-8527. *Telex:* 469230. FAX: (206) 452-3959. *Contact:* D. G. Hendricks, Executive Director. David H. Hagiwara, Director of Marketing.

PORT ARTHUR, Texas: 29.52 N. 93.56 W. (See Plan)

DOCUMENTS:
Entrance Direct from a Foreign Port:
Master's Oath on entry on vessel in Foreign trade, Customs Form 1300 (2 copies).
General Declaration, Customs Form 1301 (2 copies).
Ship's Stores Declaration, Customs Form 1303 (2 copies).
Crew Effects Declaration, Customs Form 1304 (2 copies).
Clearance from Last Port.
Inward Foreign Manifest, Customs Form 1302 (2 copies)
Passenger/Crew List. Form I-418 (3 copies).

In event import cargo is onboard, an additional copy of each of the above Forms is required for travelling Manifest. A copy of the Manifest for each port is also required.
Entrance from Domestic Port:
Clearance from Last Port.
Crew Effect Declaration, Customs Form 1304 (2 copies).
Stores List, Customs Form 1303 (2 copies).
Crew List, Customs Form I-418 (2 copies).
Master's Oath, Customs Form 1300 (2 copies).
General Declaration, Customs Form 1301 (2 copies).
PILOTAGE: Come up in vicinity of the Sea Buoy. 24 hours notice of ETA should be given and revised if ship is delayed 1 hour or more. Telegraphic address is "Sabine Pilots, Port Arthur, Texas". Pilot station keeps 24 hour continuous watch on VHF Channel 12 – 156.6 MHz and on 2738 kHz. Pilot boat is motor vessel with black hull, white housing flying Pilot insignia by day and Pilot light by night. Location of pilot boat is in general vicinity of Sabine Pass Sea Buoy. Pilot ladder only on lee side of vessel.

Pilot will, upon request and at extra cost, board incoming vessels at buoy marked "SB" in position Lat. 29° 25′ N., Long. 93° 40′ W.

Gulf of Mexico Pilots

American Master Mariners licensed by the United States Coast Guard. They are experienced in handling vessels of all types and sizes, and have many years of experience in navigating the Gulf of Mexico.

Gulf of Mexico Pilots cover the entire Gulf and the Florida Straits. They are on call to board vessels wherever requested within the service area, on 48 hours advance notice.

Request for service may be directed to:
Gulf of Mexico Pilots, 3741 Memorial Blvd., Port Arthur, Texas 77640. Cables: Gompilots. Tel: (409) 982-2961.

The Gulf of Mexico Pilot will provide assistance and advise in heavily congested areas. He will utilise up-dated local knowledge of conditions peculiar to navigation in the Gulf of Mexico. He will assist with VHF radio communications, expedite arrivals and departures between the Gulf Ports resulting in savings of time and fuel, while easing the human-fatigue factor caused by the demanding duties of Shipmasters operating in unfamiliar environment and the continuously changing conditions therein.
RESTRICTIONS: The Port Arthur Ship Channel is in operation 24 hours per day. The only restrictions that might hamper vessel traffic would be the draft of the vessel (Port will be able to handle vessels taking up to 40 ft. of water) or extremely bad weather conditions such as fog or high winds. Also, vessels of the 85,000 ton or more class can only be moved during daylight hours.
MAX. SIZE: Port Arthur Ship Channel will be authorised to 40 ft. in depth and will vary from 400 to 800 ft. in width. Turning basin, which is located at Mile 19 (only about 0.5 miles upstream from existing port facility) is 900 ft. in width. Bulk carriers going to grain elevator at Port Arthur or to one of the oil refineries would only be restricted by draft which would vary from 30 ft. to 40 ft. depending on load/discharge berth the vessel is en route to. See "Berthing".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: For a vessel in the Gulf of Mexico, and en route to Port Arthur, the best way to route an ETA message is to radio "Port Arthur Radio" (Radio Marine Corporation of America) whose call sign is WPA. Port Arthur Radio will then either send the message through Western Union via its telefax machine or via telex if the receiver of the message has a telex machine. There are also radio stations located in Galveston, Texas (Mackay Radio, call sign KLC) and in Mobile, Alabama (call sign WLO).
VHF: Pilot office on Channel 20. Pilot boat on Channels 12, 13, 16 and 65A.
TUGS: The exact position that the tug meets the vessel varies with each vessel but usually they meet just below Texaco Island. In some cases they meet as far up as Great Lakes Carbon Co. Berth (usually when vessel is in ballast and going to Gulf Oil Docks). Whether or not the tug uses the vessel's lines or its own lines depends entirely on the circumstances involved but the tugs usually use the ships lines. Port Arthur is served by 2 towing companies, (1) Moran Towing of Texas and (2) Sabine Towing & Transportation Company, Inc.
BERTHING: The first procedure for obtaining a berth at Port Arthur is to submit a Berth Request Form. The Berth Request will contain the following information and will be submitted, in duplicate, to P.O. Box 1428, Port Arthur, Texas: Date of request; type and name of vessel; loading ports; registry or flag; where vessel is to arrive from; ETA; where vessel is to sail for; estimated date of departure; what inbound cargo, if any, consists of; what outbound cargo, if any, consists of; date you expect to begin receiving outbound cargo. The Form must be signed by the Agent or Owner of the vessel. (Berth Request Form will be made available by the Port.) Upon receipt of a Berth Request from the Agent or Owner, the Port will then, upon determining availability of berth, return one copy of the initial Berth Request to the Owner or Agent as an assignment of berth. Berths are assigned on a first come first served basis at all times. All changes in vessel's ETA must be given to the Terminal Office immediately. All mooring and unmooring will be done by the Port. Procedure may differ at the various private terminals which are not under the jurisdiction of the Port Arthur Navigation District.

Also see "Developments".

BULK HANDLING FACILITIES: *Pabtex Terminal Company:* Bulk Marine Terminal in the Port's deepwater industrial park is located at Mile 26, handles dry bulk commodities from rail cars to storage to vessels at rates up to 3,000 t.p.h. and has space available for shipper storage tanks on pads, with open storage for 300,000 tons. The terminal also includes a 750 ft. wharf and is located directly on the Sabine-Neches Waterway which presently offers an authorised channel depth of 40 ft. All terminals described above are served by subject waterway and limitations of depth will vary at the face of dock at individual terminals. Pabtex maintains 40 ft. depth at the face of their facility.
Great Lakes Carbon Co.: Length of berth 300 m. Max. LOA 210 m. Max. draft 10.5 m. 2 loaders with total loading capacity 500 tonnes p.h. Petroleum, coke and coal handled.
CRANES: 1×75 ton diesel electrical crane services Berths No. 1 – 3.
BRIDGES: There are no bridges that would require a vessel to arrive at any certain time at Port Arthur, however, the first bridge approached involves a vertical clearance of 136 ft. MHW.
STEVEDORES: Advance order for longshore gangs varies as to contract held by ILA (International Longshoremen's Association). In Port Arthur, gangs have to be ordered as follows: Order by 1800 hrs. for the next morning (either 0700 or 0800 hrs.); order by 0800 hrs. for 1000 hrs; order by 1100 hrs. for 1300 hrs.; order by 1600 hrs. for 1900 hrs. Must order by 1800 hrs. day before for any starting time Sunday or Holiday.
MEDICAL: It is not usually required that the Agent be given advanced notice of required medical attention but in some instances it is helpful in arranging transportation to a hospital and in obtaining a bed in the event the hospitals are near full. Port Arthur is served by 2 hospitals; (1) St. Mary's Hospital and (2) Park Place Hospital, both of which are very well staffed and have adequate facilities for almost any emergency. Also, advance notice is helpful when vessel is scheduled to dock late in evening or during night, as doctors are not in their offices and have to be located.

Particular inoculations required by the Public Health Department vary as to the vessel's last foreign port of call. Any crew members who have not had the required inoculations can usually be given these inoculations on board either by the Public Health Officer or a Physician. This is usually arranged by the Agent or Owner.
TANKERS: There are 3 major oil companies: Gulf Oil Corporation; Texaco Oil Company, Inc.; and Petrofina Company. Gulf Oil Corporation and Texaco Oil Co., Inc. are 2 of the largest oil refineries in the country. The diameter of load/discharge lines range anywhere from 4 in. to 12 in. depending on the grade of the petroleum product being loaded. As far as slop discharge facilities are concerned there are ballast tanks at all major oil companies. Gulf Oil has 3,400 linear ft. of berth accommodation and Texaco Oil Co. has 5,299 linear ft. of berth accommodation together enough to accommodate 11 supertankers plus barges. Petrofina Co., being the smaller of the 3 oil companies, has berth accommodation for 3 vessels.
Report: Gulf Oil Terminal is located on the East side of the Taylor Bayou Turning Basin 30 miles from the Sea Buoy. The controlling depth of the channel and turning basin is 40 ft. The maximum size vessel normally received at this terminal is 50,000 d.w.t. The water about the terminal is salt. Docking and undocking occurs day and night. Vessels are cautioned of shoaling in the basin.

Vessels are normally turned upon arrival so as to head out. Wire ropes are not permitted unless fitted with fibre rope pennants of at least 3 fathoms in length. Fire wires must be rigged fore and aft.

Two tugs are normally used when docking unless vessel is over 34,000 d.w.t. when 3 would be used. When undocking, 2 tugs are used for vessels over 30,000 d.w.t., under 30,000 only one tug is used.

Amdel Pipe-line is located at the former ARCO Docks on the Neches River Channel 42 miles from the Sea Buoy and includes Berths 1, A, and B. Controlling depths for the channel, manoeuvring area/turning basin, and berth is 40 ft. The water at the berth is fresh to brackish. Attention to moorings by deck watch is required when passing vessels approach due to the close proximity of the berths to the channel.

Berth No. 1 is the largest and will accommodate vessels of approximately 50,000 d.w.t. Berth "A" normally accommodates vessels of 28,000 d.w.t. Berth "B" is normally used for crude oil and barge traffic. Loaded vessels normally moor starboard side to with standard mooring lines fore and aft. 2 tugs are used for both docking and undocking. Incoming vessels are met by tugs 1 mile below the berth. Vessels are turned just above Berth "B". Fire wires must be out fore and aft. For undocking 2 tugs are normally used.
DENSITY: Varies from fresh water (1000) to pure salt water (1025) depending on amount of rainfall and tide variations. According to figures obtained from the National Cargo Bureau, average density is 50% salt water or (1012.5).
FRESH WATER: The Port has 4 ships service outlets for fresh water, each of which is served by a 4 in. water line. Watering barges are available in the area for facilities which are not equipped to provide watering services.
FUEL: Almost any grade of fuel or marine diesel is available. In some instances there are fuel lines running directly to docks, but if not, bunkering barge is available. An advance notice is usually required by bunkering barge depending on number of vessels awaiting bunkering.
FIRE PRECAUTIONS: The Port has, in each of 4 equally spaced indentations along the front of its transit shed, a fire hose outlet fed by an 8 in. water line and there are numerous fire hose boxes throughout the transit shed. In addition to this a 24 hour guard service is constantly on the watch and is in direct communication with the Port Arthur Fire Department which is only seconds away. Authorized on-dock smoking areas are clearly defined for proper safety controls.
CONSULS: The nearest Consul-Generals are in Houston, Texas, approximately 90 miles from Port Arthur.
REPAIRS: All types of deck and engine repairs can be accomplished. Main ship repairers are: Vessel Repair, Inc., Bethlehem & Gulf Copper & Manufacturing Corp., Sabine Propeller Company and Coastal Marine Service, all of which are located in Port Arthur.

DRY DOCKS: 2 dry docks, largest being Bethlehem Steel's new full-service rig/vessel facility located 8 miles up-river from the Sabine Pass Anchorage. The dry dock at this new Bethlehem repair yard is big enough to lift any mobile offshore unit working the Gulf today. It will handle any jackup, whether mat-supported or independent-leg. Plus semi-submersibles, submersibles or drill ships. This sectional steel dock offers lift capacity of 56,000 long tons, 30 ft. of water over the blocks and it can be configured to provide a clear docking area of either 362×310 ft. or 825×122 ft., depending on the size and shape of the incoming vessel. The dock is outfitted with machine, pipe and other shops, and has the crane capacity to give it full repair service capacity. For especially heavy lifts Bethlehem's 400-ton capacity derrick barge is available.

The smaller dry dock is Vessel Repair, Inc., which occupies 60 acres with 3,200 linear ft. of frontage on Port Arthur Ship Channel. This yard also designs, constructs and repairs barges, tugs and other vessels. It has fully equipped shops, 2 marine railways with haul-out capacities of 1,000 and 1,500 tons and 1 floating dry dock of 3,000 ton capacity.

SURVEYORS: American Bureau of Shipping, Goodhue Building, Beaumont, Texas.

Captain Van. Inc., 550 Fifth Street, Port Arthur, Texas 77640. Tel: (713) 982-2911

National Cargo Bureau, 821 Petroleum Bldg., Beaumont, Texas 77701. Tel: (713) 839-4581

Soutex Surveyors, Inc., 3727 Doctors Drive, Port Arthur, Texas 77640. Tel: (713) 983-2004

Triangle Marine, Inc., 8700 Ninth Avenue, Port Arthur, Texas 77640. Tel: (713) 722-1922

Underhill Adjustment Agency, 1335 Proctor Street, Port Arthur, Texas 77640. Tel: (713) 985-9329

World Marine Associates, Inc., 580 Fannin, Suite 718, Beaumont, Texas 77701. Tel: (713) 838-9980.

GANGWAY/DECK WATCHMEN: Under normal conditions a watchman is not necessary on most vessels. Under certain conditions such as a communicable disease or a malafide crewman, a watchman would be feasible but the decision is left up to Master or owner of the vessel. There is a $1,000 fine if a malafide crewman disembarks from the vessel.

OPENING/CLOSING HATCHES: Paragraph 2, Rule No. 1 of the Deep Sea Longshore and Cotton Agreement for Texas ports and Port of Lake Charles, Louisiana, states as follows: "When vessel is in loading or unloading berth, loading and laying of dunnage and the opening and closing of hatches, when in connection with the handling of general cargo and/or cotton, is longshore work and will not be done by ship's crew." This agreement, however expired in 1978.

CUSTOMS ALLOWANCES: Tobacco: Each crewman is allowed to keep 300 cigarettes out of bond while in port. Wine and/or Spirits; Each crewman is allowed to keep 1 quart of spirits out of bond while in port.
CARGO GEAR: A current certified Gear Certificate is required to be on board at all times and is to be kept up to date.
REPATRIATION: There are facilities for effecting crew changes and repatriation.
AIRPORT: Port Arthur is served by Mid-Jefferson County Airport which is located approximately 10 miles North of Port Arthur on Highway 69. The Mid-Jefferson County Airport is served by TIA (Texas International Airlines) and Delta Airlines.
TIME: Central Standard Time (GMT minus 6 hours) during Winter. From first Sunday in April till last Sunday in October Central Daylight Time (clocks are moved ahead 1 hour).
HOLIDAYS: Longshore Holidays are: Veterans Day (Nov. 11th), Thanksgiving Day (Fourth Thursday in Nov.), Christmas Day (Dec. 25th), New Year's Day (Jan. 1st), Martin Luther King's Birthday (Jan. 15th), Washington's Birthday (Third Monday in Feb.), Texas Independence Day (March 2nd), Good Friday, Memorial Day (Last Monday in May), June 19th, July 4th, Labour Day (First Monday in September). At Lake Charles, LA., Mardi Gras Day to be substituted for Texas Independence Day. No work shall be performed on Labour Day or Christmas Day except in case of fire or where property is in danger.

When holidays fall on Sunday, the following Monday to be recognized as the holiday. No work to be performed between 1600 hrs. and 1900 hrs. on election days. When Christmas falls on Sunday, Monday will be an overtime day and gangs will work as ordered.
POLICE/AMBULANCE/FIRE: Police Department Tel: 983-5101; Fire Department Tel: 985-5511; Ambulance Service Tel: 985-5504 or 983-5666.
EMERGENCY CO-ORDINATION CENTRE: Coast Guard Captain of the Port, 2875 75th St., Highway 69, Port Arthur, Texas 77640. Tel: (409) 724-4343.
TELEPHONES: Facilities for placing a telephone on a vessel by request. There is a coin-operated telephone on the dock for anyone's use.
SERVICES: Tank cleaning done in port must be done by longshore labour. All major oil companies have facilities for removing tank washings.
BANKS: Allied Merchants Bank, 441 Austin Avenue, Port Arthur, Texas 77640. Tel: (409) 985-8851.

First Bank & Trust, 4000 Twin City Highway, Groves, Texas 77619 Tel: (713) 963-1141.

M-Bank Port Arthur, 8200 Highway 69, Port Arthur, Texas 7764 Tel: (409) 727-0123.

First National Bank of Port Neches, 1025 Port Neches Avenue Port Neches, Texas 77651. Tel: (409) 722-4365.

Nederland State Bank, 1308 Boston, Nederland, Texas 7762 Tel: (409) 727-3161.

Sabine Bank, 3723 Gulfway Drive, Port Arthur, Texas 7764 Tel: (409) 982-5741.

STORING: See "Prelims".
1. Vessels are generally stored by truck in the area but barge storing does occur on rare occasions.
2. There are no specific regulations covering barge storing while vessel is working other than what the individual terminal may deem proper.
3. Trucks normally deliver at shipside at the Ports' facilities but this will vary from terminal to terminal.
4. Fork lift trucks are never used on the jetty to handle stores.
5. None other than Bonded Warehouse products.
6. Can but are seldom used. Generally handled by ship's crew or other less costly labour that is available in the area.

SHORE LEAVE: The question of whether shore leave is allowed is entirely up to the ship's Master. The only requirements being; each crewman on shore leave must have a landing permit issued by the Immigration Department and no malafide crewman may be granted shore leave. Port Arthur has no restrictions pertaining to shore leave.

IDENTIFICATION CARDS: American crewman do not need any identification card. Foreign crewman need only the landing permit from Immigration Department in order to go ashore.

DELAYS: Delays in berthing usually arise from vessels ETA being delayed and thereby causing a berth conflict. The port is on a first come, first serve basis.

GENERAL: On vessels arriving directly from a foreign port there are 3 Government Agency Representatives that must board. Already mentioned and explained are Customs and Immigration. The remaining one, Animal and Plant Inspection Services. The Meat Quarantine representative boards the vessel to seal up all meat with the exception of what will be needed while in port. In the event a vessel is detained in port for some reason and more meat is needed the Meat Quarantine Rep. must return to the vessel and personally break the seal and then re-seal the remaining meats. This representative boards all vessels entering the port whether from foreign or coastwise.

The Plant Quarantine Rep. boards all vessels entering from a foreign port to check all fresh fruits and vegetables for any foreign insects such as the Khapra Beetle.

NOTICE:

Notice from U.S. Coast Guard (dated May, 1983).

Liquified Gas Vessels.

This is to clarify U.S. Coast Guard policy regarding liquified gas vessels operating in the Calcasieu Waterway that seems to be causing some confusion. Synopsis of each is as follows:

(1) The Captain of the Port (COTP), Port Arthur, Texas, needs to be informed of the arrivals and departures of all liquified gas vessels, whether loaded or in ballast, a minimum of 4 hours advance notice is required to ensure that a Notice to Mariners is broadcast. The vessel is reminded to have a Calcasieu River Pilot's confirmation of movements prior to notifying the COTP at (409) 724-4330.

(2) The COTP has determined that it is an unsafe practice to bunker a loaded or partially loaded liquified gas vessel at anchor from a barge alongside. If you have a loaded vessel arriving that needs bunkering, make your arrangements so that the vessel is offloaded prior to bunkering. If an empty vessel arrives, make arrangements to have the vessel bunkered prior to loading.

If there are any questions concerning these guidelines, please contact Port Arthur (Tel: (409) 724-4337 or 724-4339) or Lake Charles, La (Tel: (318) 433-3765).

Signed: Captain, U.S. Coast Guard, Capt. of the Port, Port Arthur, Texas.

DEVELOPMENTS: Located only 19 miles from sea, the new Public Ocean Terminal of the Port is located on the Sabine-Neches Waterway, presently 40 ft. deep with a minimum bottom width of 400 ft. The initial facility encompasses 360,000 sq.ft. including 1 transit shed 180 ft. × 1,080 ft. or 194,400 sq.ft. Rail trackage totals 120 car-spots at dockside with a 150-car storage yard behind the wharves. The facility includes a Gantry Crane (handling dry bulk, magnet, container and heavy lift cargoes) which straddles 2 of the 3 marginal tracks, travelling the entire 1,200 ft. length of dock. Crane will lift 75 tons a distance of 75 ft. off the face of docks, with all areas brilliantly lighted for 24 hour cargo operations. In addition to the 25 acre facilities described above, the District owns a total of 73 acres or 1 mile of frontage for future development. The master plan calls for a total of 4 Transit Sheds, additional open-dock wharves and Roll-on/Roll-off facilities.

AUTHORITY: Port of Port Arthur Navigation District of Jefferson County, Texas, 900 Fourth Street, P.O. Box 1428, Port Arthur, Texas 77641. Tel: (409) 983-2011. *Telex:* 779-421. *FAX:* (409) 985-9312. *Contact:* Ben Goldstein, Port Director.

PORT CANAVERAL, Florida: 28.25 N. 80.35 W.

(See Plan)

DOCUMENTS: Vessels arriving in the Customs Territory of the United States, Bureau of Customs Documentary Requirements:

1. The vessel's Register, International Load Line Certificate, Tonnage Tax Certificates, Clearance from last Foreign Port, and Certificate of Financial Responsibility (Oil Pollution).

2. Additional Documents required:

(*a*) Original Manifest (lists) of:
All Cargo on Board – Customs Form 1302.
All Passengers on Board.
Stores List.
Crew Purchase List.
Crew List.
Narcotic List.

(*b*) All items listed in Nos. 1 and 2 *(a)* must be presented to the boarding Customs Inspector and later at the Customhouse for entry. In addition a Customs Form 1300 (Master's Oath) and Customs Form 1301 (General Declaration) must be presented at the Customhouse.

(*c*) Duplicate Manifest (lists) of:
1. All Cargo for discharge at this port.
2. All Passengers for discharge at this port.
3. Stores List.
4. Crew Purchase List.
5. Crew List.
6. Narcotic List.
7. CF3171 – Permit to Lade or Unlade (this will usually be furnished by the vessel's Agent prior to the arrival of the vessel).

(*d*) If vessel is proceeding coastwise from Port Canaveral with residue foreign cargo on board, prepare a Traveling Manifest which is a true copy of everything listed in the Original Manifest (*2(a)*). This must be presented to the boarding Customs Inspector and later at the Customhouse.

3. Other Documentary requirements: The Immigration Officer will require the original certificate Crew List on Form I-418. The same for passengers. He will also require the presentation of all passports and documents of seamen and passengers as to their immigration status for entry into the United States. A supply of Seaman's Landing Permit Form No. I-95A and passenger Permit No. I-94 should be maintained and they should be typed and ready for landing.

The Immigration Officer will want to inspect the entire crew. The Customs and Agriculture Officers will want to inspect the food storage areas and the quarters of the crew. The Agriculture Officer will also require a stores list. The Customs Officer will place a seal on the Bonded Stores Locker.

Certificates:
Ship's Register.
Load Line Certificate.
Tonnage Tax Certificate.
Derat Certificate or Derat Exemption Certificate.

PILOTAGE: Pilotage is compulsory for all foreign vessels and for United States vessels under register in the foreign trade. Pilotage is optional for United States coastwise vessels who have on board a Pilot licensed by the Federal Government. Vessel applies for Pilot through Agent or Port Authority. May also call Pilot Office direct, Tel: (407) 783-4645. Pilot will board at Buoys 3 and 4 (Lat. 28° 22.6′ N., Long. 80° 31.7′ W.). Pilot boat is 37 ft. long with black hull, white house and buff deck, has "Pilot" painted on sides. Standard day/night pilot signals are displayed. Pilot boat stations itself 1 mile S.E. of Buoys 3 and 4, 0.5 hours before ETA of vessel. Vessels may anchor anywhere in area. Pilot boat is equipped with VHF Channels 12 (156.60 MHz) and 16 (156.80 MHz), but no continuous radio watch is maintained. Advance notice of at least 24 hours should be given.

ANCHORAGES: Within the harbour itself, none. Vessels may anchor anywhere in the area of the Pilot Station, Buoys 3 and 4.

RESTRICTIONS: Docking and undocking carried on day and night. Draft restrictions – if draft exceeds 34.6 ft. vessel must await rising tide to enter port.

MAX. SIZE: Length and draft at Tanker Berth No. 1 and No. 2, 650 ft., with 35 ft. draft. Cargo dock, length unlimited – 35 ft. draft.

HEALTH: See "Health: All Ports" before first U.S.A. ports (Albany). Illness Reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Pilot boat is equipped with VHF Channels 12 (156.60 MHz) and 16 (156.80 MHz) but no continuous radio watch is maintained. Advance notice of at least 24 hours should be given. Best to route ETA cables through Western Union Telegraph. Port Canaveral is equipped with VHF Port Operations frequency 156.6

TUGS: There are 2×1,800 h.p. tugs and 1 × 2,400 h.p. at Port Canaveral; most ships use the tugs for docking and undocking, but it is not mandatory. Tugs normally join vessel inside jetties and tugs lines are used.

BERTHING: All vessels unless prevented by conditions will be turned around upon entering turning basin and will be berthed headed seaward. No berthing permitted without Port Pilot aboard.

Northside:
Piers 1, 2, 3 and 4, all 35 ft. draft, general cargo, water available. Piers 3 and 4 with combined continuous length of 1,200 ft. – 35 ft. draft. Potable water and electricity available.

Southside:
Marginal Wharf with total length of 1,350 ft. 1,100 ft. at 35 ft. draft, 250 ft. at 24 ft. draft, general cargo, bunkers, water available.

Ro/Ro Ramp No. 1: 30 ft. width, elev. + 3 ft. MLW.

Tanker Berth No. 1: Dolphin type, 35 ft. draft, petroleum products, cement, bunkers, water available.

Tanker/Cargo Berth No. 2: Length 450 ft., 35 ft. draft, petroleum products, water available.

Cruise Terminals No. 2 & 3: 35 ft. draft, 1,300 ft. combined length.

Cruise Terminal 4: 35 ft. draft, 750 ft. berth.

Cruise Terminal 5: To be completed 1st December 1990.

Also see "Tankers".

STEVEDORES: Important that vessel gives accurate ETA at least 24 hours in advance to enable Agent to order gangs.

MEDICAL: Advance notice for Agents not required, but if available is appreciated. There are good hospital facilities available and an emergency walk-in clinic at the Port. A contract physician's office of the U.S. Public Health Service is at Cocoa Beach, just South of the port.

TANKERS: Tanker Berths No. 1 and 2 available at present for discharge operations, with 35 ft. draft limit. No oil to be pumped overboard. Heavy fines imposed for oil pollution, however slight. The ship or ship's Agent will immediately report any spillage of oil on the wharf or on the water and the extent of the spill to the Port Manager and the Harbour Master. If spillage is considerable all cargo operations must stop and vessel prepare to undock.

FRESH WATER: All wharves have facilities for supplying fresh water, delivered by 4 in. water line.

FUEL: The general cargo wharf and Tanker Berth No. 1 have facilities for supplying fuel. 24 hours' notice requested. Fuelling by truck available at other berths.

FIRE: Ships discovering fire on board or close by on shore will sound repeated long whistle blast signals and use every other available means to report the fire.

Gasoline Tankers: All deck scuppers must be plugged before starting to discharge cargo. Supply of sand or sawdust must be on hand near the discharge headers. Static cable must be connected to wharf. Minimum 100 lb. pressure must be on water main and fire hose connected. Discharging must be stopped during severe lightning. Deck Officers must keep close check on hose connections for gasket leaks. Emergency Ship Movement Policy of Port Canaveral must be observed.

CONSULS: None.

REPAIRS: Available in the port.

SURVEYORS: Surveyors are available on request.

GANGWAY/DECK WATCHMEN: Not usually employed, this service left to discretion of Master.

OPENING/CLOSING HATCHES: Usually done by stevedores.

CUSTOMS ALLOWANCES: 300 cigarettes per crew member. Wine and/or spirits: 1 quart per crew member.

REPATRIATION: All facilities available for effecting crew changes and arranging any necessary repatriations.

AIRPORT: Two airports available, serviced by regular airlines, Orlando International Airport, Orlando, Florida, approximately 50 miles from the Port; Melbourne Regional Airport at Melbourne, Florida, approximately 35 miles from Port. Also Space Coast Executive Airport approximately 25 miles from the Port, but this airport has only limited service.

TIME: GMT minus 5 hours normal, GMT minus 4 hours Daylight Saving Time.

HOLIDAYS: Numerous holidays do not effect operation of port, which operates 24 hours a day, 7 days a week.

POLICE/AMBULANCE/FIRE: Police/Fire, Tel. 783 – 7800; Ambulance, Tel. 452 – 1444.

EMERGENCY CO-ORDINATION CENTRE: United States Coast Guard Station, Port Canaveral. Tel: (407) 853-7601.

TELEPHONES: Arrangements are not available for placing on board.

BANKS: The American Bank, 326 E. Merritt Island Causeway, Merritt Island, Florida.

Barnett Bank, 430 Brevard Avenue, Cocoa, Florida.

The First Bankers of Florida, N.A., 111 George King Boulevard, Port Canaveral, Florida 32920.

The First National Bank of Brevard, 15 E. Merritt Island Causeway, Merritt Island, Florida.

United National Bank, 82 N. Atlantic Avenue, Cocoa Beach, Florida 32931.

Numerous other banks are available in this area.

STORING: See "Prelims".

1. Vessels stored by truck only.
2. N/A.
3. Yes.
4. No.
5. Usual.
6. Yes, if required.

SHIP SUPPLY SERVICE: No ship supply services operate at the port. In times of emergency, launch or tug service could be arranged through the Port Authority, and helicopter evacuation provided through the United States Coast Guard.

SHORE LEAVE: Crew allowed ashore.

IDENTIFICATION CARDS: Required.

REGULATIONS: All radio frequency radiations from ships' in Port Canaveral must be scheduled to prevent any possible interference to missile tests conducted on the Cape Canaveral Missile Test Annex. The only exception is standard ship/shore HF harbour control frequencies. Vessels desiring to radiate will request permission from the Port Manager and/or Harbour Master.

GENERAL: All vessels, civilian and military, will provide wire ropes from the bow and stern with eyes that can be reached by tugs coming alongside. Pilots will make sure wires are in proper position before leaving vessel. All vessels will undock and proceed to outer anchorage when so ordered by Port Manager and/or Harbour Master in the event of: *(a)* a severe oil spillage; *(b)* fire is discovered on board a vessel laden with petroleum, explosives or a quantity of dangerous cargo; *(c)* vessel is in jeopardy due to conditions on shore. Emergency movement of ships will be made with an able sea watch without awaiting for return of other ships personnel.

DEVELOPMENTS: Western Basin Expansion started in mid-1986, completion 1995. 7 additional ship berths, including container, general cargo, bulk cargo, shipyard and cruise terminals. Estimated cost $110 million US.

AUTHORITY: Canaveral Port Authority, P.O.Box 267, Cape Canaveral, Florida 32920. *Tel:* (407) 783-7831. *Telex:* 981573 Ptcanaveral. *FAX:* (407) 784-6223. *Contact:* Charles M. Rowland, Executive Director. Joseph Lapolla, Deputy Executive Director.

PORT EVERGLADES (including Fort Lauderdale), Florida: 26.05 N. 80.05 W. (See Plan)

DOCUMENTS:

3 copies Cargo Manifest (Form 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (Curio List).
2 copies Stores List.
2 copies Passenger List (Form I-418).
2 copies Crew List (Form I-418).

Customs Boarding Officer will also examine Ship's Register and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:

Health Pratique.
Master's Oath (Form 1300).
All foreign clearances.
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
Certified Crew List.

PILOTAGE: Pilot boards at Port Everglades Sea Buoy, located in Lat. 26° 05′ 30″ N., Long. 80° 04′ 45″ W. Pilot available 24 hours a day.

ANCHORAGE: The prescribed anchorage area at Port Everglades is outside the harbour and North of the channel. Vessels desiring to anchor off harbour of Port Everglades are required to do so in this area to avoid possible damage to cables laid on ocean floor South of the channel.

South of the channel, immediately offshore, there is a Government Restricted Area.

North of the channel, immediately offshore, there is a spoil bank visible at low water.

RESTRICTIONS: Entrance to Port Everglades is by a straight channel running in a due Westerly direction for a distance of 1.7 miles from the 50 ft. contour of the ocean to the turning basin. The channel is 500 ft. wide to turning basin. The water depth is 44 ft. including the turning basin. All depths are at Mean Low Water.

BASIN: The main turning basin is 1,200 ft. East and West and 2,450 ft. North and South with a depth of 44 ft. The North extension of turning basin is 620 ft. wide East and West on the North limits and 900 ft. wide East and West on the South limits and 1,150 ft. North and South, with a depth of 31 ft. The South extension of turning basin is 1,300 ft. wide East and West by 1,300 ft. North and South, with a depth of 37 ft. All depths are at Mean Low Water.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO/VHF: The following radio channels are available to communicate with facilities at Port Everglades:

Ship calling and safety: Channel 16.
Harbour Master and operations: Channels 16, 14, 7A and 18A.
Port Everglades Bar Pilot: Channels 16, 13, 14, 18A, 19A, 77.
Port Everglades Towing Co.: Channels 16, 13, 77.

TUGS: 3 tugs available to assist berthing with up to 4,200 h.p. Available 24 hours a day.

BERTHING:

Berth	*Length in feet*	*31 ft. depth*	*37 ft. depth*	*38 ft. depth*	*42 ft. depth*

Ro/Ro facilities at Berths No. 4 and 5.

CRANES: 2×30 ton and 1×50 ton container cranes located at Berths 16, 17 and 18 adjacent to marshalling facility. Up to 140 ton mobile cranes available for hire.

STEVEDORES: These services are provided by licensed stevedoring firms. Arranged by Agent.

TANKERS:

Berth 4: Length of 900 ft., with a depth alongside of 43 ft. Operators Belcher Oil Company; Exxon Company, U.S.A.; Marathon Oil Company

Berth 5: Length of 900 ft., with a depth alongside of 43 ft. Operators Belcher Oil Company; Exxon Company, U.S.A.; Amerada Hess Corporation; Marathon Oil Company; Shell Oil Company; Trumbull Asphalt.

Berth 6: Length of 400 ft., with a depth alongside of 35 ft. Operators Belcher Oil Company.

Berths 7 and 8: Length of 1,200 ft., with a depth alongside of 37 ft. Operators: Amoco Oil Company; Belcher Oil Company; Citgo Petroleum Corporation; Exxon Company, U.S.A.; Porto Fina Oil Company; Gulf Oil Company, U.S.A.; Amerada Hess Corporation; Marathon Oil Company Mobil Oil Corporation; Phillips Petroleum Company; Shell Oil Company Chevron, U.S.A.; Texaco, U.S.A.; Union Oil of California.

Berths 9 and 10: Length of 1,200 ft., with a depth alongside of 37 ft. Operators: Belcher Oil Company; Citgo Petroleum Corporation; Porto Fina Oil Company; Gulf Oil Company, U.S.A.; Mobil Oil Corporation Phillips Petroleum Company; Chevron, U.S.A.; Texaco, U.S.A.; Union Oil of California; Amerada Hess Corporation.

Berth 11: Length of 500 ft., with a depth alongside of 37 ft. Operators: Belcher Oil Company; Warren Petroleum Company.

Berths 12 and 13: Length of 1,225 ft., with a depth alongside of 35 ft. Operators: Belcher Oil Company; Citgo Petroleum Corporation; Porto Fina Oil Company; Gulf Oil Company, U.S.A.; Mobil Oil Corporation; Phillips Petroleum Company; Chevron, U.S.A.; Texaco, U.S.A.; Union Oil of California.

Berths 14 and 15: Length of 1,225 ft., with a depth alongside of 37 ft. Operators: Belcher Oil Company.

Size of Pipe-Lines:

American Oil Company: 3×12 in.

Belcher Oil Company:
- Berth No. 1: 6 in. and 8 in. bunker and diesel.
- Berth No. 2: 6 in. and 8 in. bunker and diesel.
- Berth No. 3: 6 in. and 8 in. bunker and diesel.
- Berth No. 4: 10 in. and 8 in. bunker and diesel.
- Berth No. 5: 12 in. bunker; 24 in. gas; 12 in. gas; 12 in. Jet-A; 12 in. diesel; 10 in. bunker; 6 in. diesel; 24 in. crude.
- Berth No. 6: 10 in. bunker and 6 in. diesel.
- Berth No. 7: 12 in. Jet-A; 12 in. diesel; 10 in. gas; 26 in. gas; 12 in. gas; 10 in. bunker; 6 in. diesel; 12 in. J.P. 4; 12 in. crude.
- Berth No. 8: 12 in. Jet-A; 10 in. bunker; 10 in. gas; 10 in. asphalt; 8 in. RC70.
- Berth No. 9: 10 in. bunker; 8 in. diesel; 6 in. diesel.
- Berth No. 10: 10 in. bunker.
- Berth No. 11: 8 in. bunker.
- Berth No. 12: 8 in. bunker; 6 in. diesel.

Belcher Oil has 6 in. and 8 in. bunker and diesel lines on all berths except 23, 26 and 27.

Chevron: 1×24 in.; 2×12 in.; 2×8 in.

Cities Service Oil Company: 3×12 in.; 1×14 in.

Exxon Oil Company: 3×12 in.; 1×8 in.

Gulf Oil Company (Berths No. 9 to 13): 6×6 in.; 1×8 in.; 2×10 in.; 1×12 in.; 1×14 in.; 2×16 in.

Hess Oil Company (North Terminal): 1×14 in.

Marathon Oil Company: 2×12 in.; 2×8 in.

Mobil Oil Company: 2×12 in.

Phillips Petroleum Company: 1×12 in.; 1×10 in.

Shell Oil Company: 3×12 in.; 1×8 in.

Texaco, Inc.: 1×14 in.; 2×12 in.; 1×10 in.

Trumbull Asphalt Company: 1×12 in.

Union 76: 2×12 in.; 2×8 in.

Warren Petroleum Company: Propane.

FRESH WATER: Available.

FUEL: Florida Fuels, Inc., 1040 Port Blvd., Suite 406, Miami, Florida 33186 U.S.A. Tel: 305/358-3835. Telex: 853274 Flor Fuel. Cables: Florfuel Miamiflorida.

All deliveries in both ports are made by barge. Florida Fuels can deliver all grades of bunker fuels including Bunker 'C', all IFO's, MDO, and MGO.

Belcher Oil Co., P.O.Box 13124, Port Everglades, Fl. 33316. Tel: (305) 525-4261. All deliveries ex-pipeline or tank truck. All grades of bunkers available.

CUSTOMS ALLOWANCE: At the discretion of Customs officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.

HOLIDAYS: New Year's Day (January 1st); Martin Luther King's Birthday (January 15th); Lincoln's Birthday (February 12th); Washington's Birthday (February 22nd); Good Friday; Memorial Day (May 30th); Independence Day (July 4th); Labour Day; Columbus Day (October 12th); Veteran's Day (November 11th); Thanksgiving Day; Christmas Day (December 25th).

When any of the above holidays fall on a Sunday, they will be observed on the Monday following. Work on these holidays is by special arrangement only.

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight saving time, GMT minus 4 hours, from first Sunday in April to last Sunday in October.

IDENTIFICATION CARDS: Standard U.S. Immigration Form I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95 if issued for the same vessel.

DEVELOPMENTS: Construction of South Terminal underway. When completed, the new complex will feature six cranes on a 2,850 ft. berth with 42 ft. MLW depth, a gatehouse complex incorporating a weighbridge, a piggyback rail facility, stuffing and stripping sheds and a computerised cargo tracking system. The 1st phase (2,000 ft. and 2 container cranes) will be completed in 1990, and the 2nd phase (850 ft. and 4 container cranes) will be completed in 1992.

AUTHORITY: Port Everglades Authority, P.O.Box 13136, Fort Lauderdale, Florida 33316. *Tel:* (305) 523-3404. *Telex:* 240042. *FAX:* (305) 525-1910. *Cables:* Portglades. *Contact:* Joel Alesi, Executive Director.

PORT HURON, Michigan: 42.59 N. 82.26 W.

Refer to St. Lawrence Seaway for important general information.

PILOTAGE: Compulsory, by Seaway Pilots.

ANCHORAGES: Near head of St. Clair River at Sarnia. Vessels should anchor as close to shore as safely possible to keep channel clear for passing vessels.

RESTRICTIONS: Navigation season from mid-March to end-December approx. Dock channel depth – 25 ft. Vessel's size restricted by Seaway locks.

MAX. SIZE: 730 ft. length; 26 ft. draft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Chicago Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Master must give at least 24 hours notice to Commander 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also, at least 24 hours notice of ETA at first U.S. discharge port is required. Port can be contacted through Marine Operator, Sarnia.

TUGS: Available. Not compulsory, but sometimes necessary in bad weather.

BERTHING: Port Terminal Co. Dock: 700 ft. long 26 ft. – 31 ft. depth.

MEDICAL: All facilities available.

DENSITY: Fresh water.

FRESH WATER: Obtainable by pipe-line at all docks.

FUEL: All grades available by pipe-line at all docks.

REPAIRS: Machine shops available for limited deck and machinery repairs.

AUTHORITY: *Managers:* Port Huron Seaway Terminal Co., 2336 Military Street, Port Huron, Michigan 48060. *Contact:* W. R. Neal, President.

PORT JEFFERSON, New York: 40.59 N. 73.06 W.

(See Plan)

OPERATOR'S REPORT: 1981

APPROACHES: *Port Approaches – Cautionary Advice:* (via New York) Charts: 12339, 12366, 12367, 12363, 12362, 12354.

Vessels leaving New York bound for Port Jefferson transit New York's East River and Long Island Sound.

Sandy Hook Pilots handle the ship in the East River and Hell's Gate, and the Long Island Sound Pilots handle the ship in the Sound. The change of Pilots is made off City Island. The pilot boat can be raised on Channel 13. All shoals and rocks are well marked and the shore line provides an excellent radar target for position checking.

During Summer months, thick fogs present a hazard on this route. Long Island Sound is also a major yachting centre so extreme care must be exercised while transitting this area.

There are several dangers to be wary of when making the passage from New York to Port Jefferson; in order of approach they are:

1. East River and Hell's Gate are areas of strong tidal currents averaging 4.6 knots during ebb tide which set in a Southwesterly direction. Vessels drawing up to 35 ft. may transit Hell's Gate only at Slack High Water. Sluggish handling vessels should arrange for tug assistance through the East River and Hell's Gate.
2. 26-ft. buoy "32A"; usually passed well clear to the South.
3. Cable and Anchor Reef; usually passed to the South.

Port Approaches – Cautionary Advice: (From Block Island) Charts: 13205, 13215, 13209, 12354, 12362.

On approaching Block Island from a Southerly direction, a good radar picture is obtained of the Island's South coast. The RDF station at S.E. Light is also useful.

It is advisable to remain at least 1 mile to the East of Block Island because of the numerous shoals close in shore.

Non-U.S. flag vessels and U.S. flag vessels under registry approaching from Block Island embark Pilot about 2.5 miles South of Point Judith.

U.S. flag vessels under enrolment approaching from Block Island embark Pilot 1.4 miles East of Old Harbour – Block Island.

There are several dangers to be wary of when making the passage to Port Jefferson; in order of approach they are:

Block Island North Reef Buoy "1B1" marks a dangerous shoal and should be passed well clear.

The Race is a narrow channel into Long Island Sound. Strong East to West currents occur during maximum ebb or flood and knowledge of position should be maintained in view of possibility of unusual set. Valiant Rock may be passed on either side. The Race is an extremely popular area for sport fishermen and the area is usually congested with small craft.

Extreme caution should be exercised during the Summer months when transiting through Block Island and Long Island Sound as there is heavy traffic of pleasure craft.

Thick fog is prevalent during Summer months.

Good water is found in Long Island Sound from The Race to Port Jefferson as long as the mid-channel Buoys "P1" and "CF" are passed close to, and care is taken so as not to pass North of "28-ft. shoal" buoy.

Vessels headed for Port Jefferson will pass South of "Stratford Shoal" light. Radar is the best navigational aid in this area, also, there are several RDF stations that can be used.

PILOTAGE: Harbour Pilot/Docking Master will board outside of the sea buoy. If at anchor, Docking Master will board at the anchorage.

ANCHORAGE: Anchorage is available North of "Mount Misery" shoal in depth of 80 ft. to 100 ft. Barges are available for lightering from New York. Winter weather conditions with strong winds sometimes hold up lightering operations 2 to 3 days. Vessels with stern anchors can sometimes minimise this delay by making a lee for the barge.

RADIO: Send ETA to Agent 72 hours, 48 hours and 24 hours prior to arrival at Block Island pilot station. Advise max. draft (salt water) in the initial message.

VHF: Pilot: Channel 13, 16 and 18A. Tugs: Channel 19A "KFT 234" 18A. Traffic Control: Channel 13. USCG: Channel 16. Terminal: Channel 13.

TUGS: 3 tugs available from New Haven, 2 single screw diesels of 1,800 s.h.p. and 1,600 s.h.p. and a twin screw boat of 1,800 s.h.p.

TANKERS: Consolidated Petroleum Terminal: Traffic at times may be heavy near the harbour entrance and in the inner harbour. Sand and oil tows, coastal tankers, and the Bridgeport/Port Jefferson ferry may be encountered. Arrangement should be made with the Pilot ensuring that other traffic is not hampering the safe entrance and channel transit.

Vessels start in one hour prior to HW. The entrance between the jetties is made by lining up with the ranges at the head of the harbour. Consideration should be given to a possible cross set. Once inside the jetties, speed is reduced, and the vessel is stopped off the dock. The vessel is then breasted into position starboard side to with the assistance of 1 or 2 tugs. The terminal is located approximately 1.8 miles from the breakwaters on the starboard side of the channel.

Vessels in a light condition, when departing with the assistance of 1 or 2 tugs, are backed and turned off the LILCO dock with the forward draft not exceeding 14 ft.

Shore Facilities: 3×8 in. hoses.
3×16 in. shoreline (3.5 miles long).
Shore booster pumps.

FRESH WATER/FUEL: Bunkers are not readily available; in an emergency, bunkers could be arranged by Exxon Marine, Bayway, N.J. and delivered by barge from New York. Fresh water is available ex berth.
GENERAL: *Gangway:* Ship's gangway is required.
Tides and Depth of Water: The depth of water in the channel determines the safe draft for entering. Agent and Pilot should be consulted as to safe draft. Strong Westerly winds will cause the water level to be lower than usual, and strong Easterly winds will increase the water level. Average range of tide is 6.6 ft.
Oil Pollution: This area is very sensitive to oil pollution, so extreme care should be exercised. In case of an oil spill, consult with Pollution Control Officer and notify U.S. Coast Guard, Terminal Representative and Agent. Visible smoke from ship's stack is also a very critical area of pollution in this port. Spill booms are deployed.
Security: The terminal is fenced and guarded. Maintaining a gangway watch is recommended.
Ballast/Slop Facilities: There are no dirty ballast or slop facilities in Port Jefferson.
Firefighting Facilities: The terminal is equipped with 2 fire pumps which service 2 fire monitors on the dock. The fire line has the capability to deliver foam. There is a 150 lb. wheeled dry chemical extinguisher, various hand extinguishers, and a 2,000 lb. dry chemical extinguishing system at the head of the dock to cover the hose tower area.

Fire wires should be hung, one forward and one aft, on the offshore side with eyes which can easily be reached by tugs in case of fire. The tanker should have all fire fighting equipment aboard in readiness to combat any fire that may arise.

AUTHORITY: Consolidated Petroleum Terminal, Inc., P.O.Box 312, East Setauket, New York 11733. *Contact:* Zenon Czujko, Manager.

PORT LAVACA/POINT COMFORT, Texas: 28.40 N. 96.35 W. (See Plan)

DOCUMENTS:
2 Cargo Manifests.
2 Stores Lists, Form CF1303.
2 Crew's Effects Declaration, Form CF1304.
1 Clearance from Last Port.
Vessel's Register, tonnage, tax receipts, etc.
2 copies Crew List.
2 copies Passenger List.

Certificates: Load Line, Foreign Clearance, Safety Equipment, Financial Responsibility (oil pollution), Tonnage Tax Receipts, will be required.
PILOTAGE: Ship's Agents notify Matagorda Bay Pilots as to vessel's ETA. Pilot boat can be contacted on VHF Channel 16, then switch to Channel 26 to continue conversation. Pilot boards at Buoy 1-A at position Lat. 28° 23′ N., Long. 96° 17′ W.
ANCHORAGES: Marked on chart of Matagorda Bay and approaches.
RESTRICTIONS: Vessels may enter any time day or night. Entrance channel depth 38 ft. Bay Channel depth 36 ft.
MAX. SIZE: Public Dock – max. length approximately 750 ft. Draft controlled by channel depth of 38 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Galveston Radio (ITT Mackay Marine) and Port Lavaca Marine operator can be contacted on VHF Channel 16, then switch to Channel 26 for continued conversation.
TUGS: 1 tug available joining vessel shortly before arriving at berth.
BERTHING: Vessels berth at Public Dock.
STEVEDORES: Boyd-Campbell & Co. and Dix Shipping Company of Corpus Christi, Texas. At Alcoa's Dock all plant labour is used.
MEDICAL: No advance notice required. Several clinics and 1 hospital available in Port Lavaca.
DENSITY: Average density is 1010/1012.
FRESH WATER: Fresh water available alongside berth.
FUEL: Fuel is available from VAL-CAP located in Port Lavaca. Can be delivered by barge or truck.
CONSULS: Only Norwegian Vice-Consul Tel: 512-987-2311.
REPAIRS: Only minor repairs possible. No dry docks.
OPENING/CLOSING HATCHES: At Public Dock this is done by stevedores. At Alcoa Dock this is done by ship's crew.
REPATRIATION: Arrangements are possible but preferably should be accomplished in larger ports.
AIRPORT: Nearest airport 20 miles at Victoria, Texas, served by Texas International only. Corpus Christi Airport about 90 miles; Houston Airport about 150 miles.
TIME: Central Standard Time during Winter (GMT minus 6 hours). Beginning first Sunday in April until last Sunday in October, Daylight Saving Time (clocks are moved ahead 1 hour).
HOLIDAYS: All holidays observed by contract with ILA. See "Houston".
POLICE/AMBULANCE/FIRE: Police Department, Fire Department and Ambulance Service, Tel: 911.
TELEPHONES: Telephones are available ashore only. Telephone booth on Public Dock.
IDENTIFICATION CARDS: Immigration Crew Landing Permit I-95 required for each man.
DEVELOPMENTS: Plans for lengthening dock and another warehouse are now being considered.
AUTHORITY: The Port of Port Lavaca/Point Comfort, The Calhoun County Navigation District, P.O.Box 397, Port Lavaca, Texas 77978. *Tel:* (512) 552-2727/3237. *Contact:* Doug Lynch, Port Manager.

Private Dock owned by Aluminium Company of America with its Agent being Alcoa Steamship Company Inc., Point Comfort.

PORT NECHES, Texas: 30.00 N. 93.57 W.

DOCUMENTS, PILOTAGE, RADIO, etc.: Refer to "Port Arthur".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Meet vessel in Neches River before arriving at berth. Normally 2 tugs used for docking, 1 for undocking.
BERTHING: Texaco Chemical Co. (Jefferson Dock) Chemical Co.: Distance from sea 30 miles, depth at berth November to March 32 ft., and from March to November 35 ft. Max. LOA 800 ft.

Texaco Terminal: Distance from sea 34 miles, depth at berth 38 ft. Max. LOA 810 ft.

MEDICAL: All facilities available.
DENSITY: Fresh water.
FRESH WATER: Available by barge.
FUEL: Bunker C not available ex-wharf at Texaco Terminal, only by barge from Port Arthur or Beaumont.
CONSULS: Nearest at Houston.
REPAIRS, DRY DOCKS: See "Port Arthur".
GANGWAY/DECK WATCHMEN: Not required unless crewmen detained by Immigration.
CUSTOMS ALLOWANCES: 300 cigarettes and 1 quart wine or spirits for each man.
AIRPORT: 15 minutes from docks. Several flights a day 0600 hrs.-2200 hrs. to Houston International Airport.
IDENTIFICATION CARDS: Foreign crew only require Immigration Landing Permit.
AUTHORITY: *Operators:* Texaco Chemical Company, P.O.Box 27712, Houston, Texas 77227-7712, U.S.A. *Contact:* W.C.Kent, Manager - Distribution Operations.

PORT ST. JOE, Florida: 29.49 N. 85.19 W.

DOCUMENTS:
All documentation must be on United States forms.
At least: 3 Passenger Lists.
3 Crew Lists (1 for visa Crew List).
3 Curio Lists.
3 Stores Lists.
2 Complete Manifests.
Clearance from Last Port.

PILOTAGE: Apply for Pilot through ship's Agent – address is "Port St. Joe, Pilots" and advance ETA 18 hours. "VHF – Channel 16". Pilot boat station is at Sea Buoy, Port St. Joe only and location of anchorage for vessel awaiting a Pilot is 1 mile West of Sea Buoy.
ANCHORAGES: Local harbour charts indicate safe anchorage.
MAX. SIZE: Draft 32 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Call sign WLO, Mobile, Alabama.
TUGS: None presently available.
STEVEDORES: ETA must be received by 1800 hrs. in order to have gangs at 0800 hrs. following day.
MEDICAL: No notice required. Hospital facilities available. Inoculations required same as public health U.S. Government requirements.
TANKERS: Discharge lines 8 in. No residue discharge allowed. 2 tanker berths 32 ft. draft.
DENSITY: Salt water – heavy concentration.
FRESH WATER: Available in unlimited quantities by hose connection from dock to ship, 1.5 in. to 2.5 in. size at 60 p.s.i.
CONSULS: None.
REPAIRS: None.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Only when requested by ship.
OPENING/CLOSING HATCHES: Work can be performed by either stevedores or crew.
CUSTOMS ALLOWANCES: 1 carton of cigarettes per week per crew member permitted. Further allowances would depend on circumstance Wine and/or Spirits 1 bottle per crew member as allocated by Custom
CARGO GEAR: Must be in compliance with "U.S. Governme Longshoremen Safety Codes".

REPATRIATION: Can be accomplished by Agent and Immigration but should be accomplished in larger ports if possible.

AIRPORT: Served by regular airlines. (Southern Airways, National Airways). 6 combined flights a day. Distance 40 miles.

TIME: Standard Time GMT minus 5 hours. GMT minus 4 hours Daylight Saving Time from first Sunday in April to last Sunday in October.

HOLIDAYS: *No Work Holidays:* No work performed New Year's Day, Fourth of July, Labour Day, Christmas Day, or December 24th & December 26th, and Easter Sunday, except handling of mail, baggage and perishables (except bananas) or unless a ship is in distress, such as fire or leaking bottom, or, other causes that would damage cargo or vessel. In event work done on New Year's Day, Fourth of July, Labour Day, Christmas Day, December 24th & December 26th, or Easter Sunday, rate of pay for such ship work shall be double the normal time rate. Should above holidays fall on Sunday, double time will be paid. Following Monday will be paid at time and one-half.

Working Holidays: Armistice Day, Thanksgiving Day and Memorial Day are to be paid for at overtime rate – one and one-half times straight-time rate. Should any of above holidays, except Sunday fall on Sunday, the following Monday will be observed.

POLICE/AMBULANCE/FIRE: Police Tel: 229-8265; 227-4526; Ambulance Tel: 227-1115 (Comforter), 277-1818 (St. Clair), 229-8111; Fire Tel: 227-1115.

TELEPHONES: Available for placing aboard.

SHORE LEAVE: Shore leave allowed when cleared by Immigration.

REGULATIONS: Normal working hours of longshoremen from 0800 to 2230 hrs. only, 7 days a week.

GENERAL: In sending ETA when ship is going to arrive over weekends (Saturday and Sunday), an ETA notice should arrive prior to 1700 hrs. Friday.

DELAYS: Only when due to port congestion.

AUTHORITY: Port St. Joe Port Authority, P.O.Box 280, Port St. Joe, Florida 32456. *Tel:* (904) 227-1111. *Contact:* Amelia Tapper.

PORT SAN LUIS, California: 35.10 N. 120.45 W.

(See Plan)

ANCHORAGE: The best anchorage in the Harbour is on the starboard side, coming from the sea, being the area between Pier No. 3 and the second, Union Oil Terminal Pier. Anchorage be outside of the existing mooring area and the holding ground is primarily sandy bottom.

APPROACHES: The approach channel, directly off the end of the Harbour District's Pier is an entrance channel, which is unlit and identified by large green or red buoys.

The tanker channel runs North/South to Pier No. 2 (Union Oil) and small vessels using Pier No. 3 (Harford) run a course of approx. S.E. – N.W.

MAX. SIZE: Tankers up to 750 ft. length and 26 ft. draft.

48,000 d.w.t. tankers may not use Pier No. 3 (Harford). Vessels wishing to use Pier No. 3 must give prior notice in writing, except commercial fishing vessels.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Los Angeles Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Vessels should contact Union Oil Company through Marine Operator. "Walkie-talkie" sets used for communication with terminal. VHF station KTD 411, Channels 10 and 16.

VHF: Harbour Office, call sign "KYZ 664", on VHF Channel 16 throughout 24 hours, working Channels 10 and 12.

TANKERS: Tanker berths only at Union Oil Company Pier. Vessels tie off pier at Berth No. 4. Depth alongside 32 ft. MLW.

1×12 in. and 1×16 in. load/discharge lines. No ballast discharge allowed.

DENSITY: Salt water, 1025.

MEDICAL: Services available.

FRESH WATER: Available.

FUEL: The Harbour District maintains and operates a diesel fuel facility, capacity 12,000 gallons. The facility is at the end of the District's 1,400 ft. pier. Limited use restricted to small vessels up to 300 d.w.t.

CONSULS: Nearest consuls situated at Los Angeles and San Francisco.

REPAIRS: Facilities available for all vessels.

AIRPORT: County Airport, San Luis Obispo, situated 12 miles distant. 6 flights daily to Los Angeles and to San Francisco.

HOLIDAYS: Christmas and New Year.

GENERAL: Port San Luis is an official Port of Entry with U.S. Customs. The Port Director is on duty Monday to Friday from 0900 hrs. to 1600 hrs.

There is a boat yard with a 50 ton mobile hoist.

WEATHER: The mean tidal range in San Luis Obispo Bay is 3.6 ft., the Spring range is 5.3 ft. and the maximum range is approximately 9.8 ft. The highest observed tide was 7.5 ft. above MLLW mark in January, 1948. The lowest tide of −2.3 ft. MLLW mark occured on January 7th, 1951. Tidal level above the MHHW or MLLW will occur approximately 20% of the time during severe storms. The existing breakwater gives partial protection from waves approaching from the Western part of the San Luis Bay. The bay is exposed to open sea from the South to Southwest. Northwesterly winds are predominant, except during the Winter months, October through April, when these storms from the South generate waves that approach from the S.W. to S.E. The magnitude of the surge is usually less than 0.5 ft. However, 1 ft. waves are common.

The prevailing wind is from the N.W. and averages 5 to 15 knots and, during a Southerly storm, can go up to 60 knots.

The climate and weather are typically mild and favourable. The rainy season, including the storm season, is generally from November 15th to April 15th. Occasionally, brisk winds or fog make it temporarily difficult to navigate within the Port. Rain and heavy winds are not usually experienced at other times of the year. Normally, the temperature is from the low 50's to the high 70's.

AUTHORITY: Port San Luis Harbour District, Pier No. 3, P.O.Box 249, Avila Beach, California 93424. *Tel:* (805) 595-2381 *Contact:* William S. King, Harbour Master. J. K. Elder, Assistant Harbour Master.

PORT SULPHUR, Louisiana: 29.28 N. 89.41 W.

(See Plan)

DOCUMENTS, etc: Refer to "New Orleans".

CERTIFICATES: Certificate of condition of cargo handling gear required when use of gear is necessary.

PILOTAGE: A vessel coming into port from sea can arrange to pick up a Bar Pilot (Associated Branch Pilots) by furnishing ETA to the ship's Agents, radio contact by VHF Channel 9 and AM Channels 2738 and 2182. Bar Pilot is exchanged for river Pilot at Head of Passes, Pilot town, Louisiana. River Pilot (Crescent River Port Pilot's Association) can be arranged through ship's Agent in New Orleans and radio contact as above. Vessel awaiting Pilot for departure may remain at dock until Pilot arrives. Advance notice of 3 hours is required for departing Pilots. This can be arranged by the ship's Master with the shipping foreman.

ANCHORAGES: Anchorage is available on East bank of river opposite to Freeport Sulphur Company Dock. Depth of water at anchorage is 40 ft., the controlling depth in the river.

RESTRICTIONS: No restrictions for entry because of time of day, nor conditions of tide or draft except the controlling depth of Mississippi River to Port Sulphur (35 ft. – 40 ft. as published in reports by U.S. Army Corps of Engineers).

MAX. SIZE: Max. permissible length – 750 ft., breadth not limited, draft equal to controlling depth of river.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Tropical Radio WNU New Orleans.

TUGS: Tugs not normally required. Shore crews usually handle ship's lines. Tug may join the vessel opposite the dock. Charges for handling ship's lines.

STEVEDORES: Not normally required. When requested, stevedoring services can be obtained from Port of New Orleans; contact ship's Agents for particulars.

MEDICAL: Advance notice for personnel requiring medical service is required through ship's Agents. Hospital facilities are available.

TANKERS: 1 tanker berth, permitted draft equal to or greater than controlling depth of Mississippi River. Diameter of loading/discharge lines are 12 in. and 16 in. respectively.

DENSITY: Density in port not affected by tide. Fresh water.

FRESH WATER: Not available.

FUEL: Fuel may be loaded by barge with vessel at anchor. Fuel transfer is not permitted at dock.

FIRE PRECAUTIONS: No welding repair permitted at dockside. Fuel transfer is not permitted. No other specific precautions observed except for "no smoking" precautions, etc.

CONSULS: Consuls offices are located in New Orleans, Louisiana.

REPAIRS: Engine and deck repairs are possible when the dock is not otherwise occupied.

GANGWAY/DECK WATCHMEN: Services of watchmen desirable but not required. Port does not furnish this service.

AIRPORT: New Orleans International Airport, served by most major airlines. 55 miles from Port Sulphur.

TIME: Local time is Central Standard Time (GMT minus 6 hours), except from April/October, Daylight Saving Time is in effect.

HOLIDAYS: Vessels are loaded on all holidays.

POLICE/AMBULANCE/FIRE: Police Tel: 564-2525; Ambulance Tel: 564-2525; Fire Tel: 564-3231.

TELEPHONES: Pay telephones are available.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Immigration Form I-95.

DELAYS: Loading will not commence until all holds are clean of scale and other foreign matter.

AUTHORITY: Freeport Sulphur Company, P.O.Box 1025, Port Sulphur, Louisiana 70083. *Tel:*(504) 564-3981. *Contact:* A.W. Dow, Operations Manager.

PORT WENTWORTH, Georgia: 32.09 N. 81.08 W.

PILOTAGE: Compulsory. Pilot boards at Savannah Sea Buoy. 48, 24 and 12 hours notice required through Agent.

RESTRICTIONS: Vessels can enter and leave port during hours of darkness and at any stage of the tide, however, depth of water at River Bends controls draft.

MAX. SIZE: See "Berthing".

VHF: Pilot on Channels 16, 14 and 13.

TUGS: Tugs from Savannah assist with berthing and unberthing.

BERTHING: *Continental Can & Paper Co.:* Port Wentworth is the most inland berth up the Savannah River and is 29 miles from the entrance. Max. size of vessel so far to berth was LOA 628 ft. Pilots would accept vessels of 700 ft. LOA but would be unable to swing with this length. The berth is dredged to approximately 40 ft. for a length of 700 ft. Least depth of water in channel from sea to berth 28 ft.

Mean tidal range at berth 8 ft. to 9 ft. Nature of bottom – mud.

Vessel is able to dock at any stage of the tide, however, vessels undock on the flood to swing off berth. (Approximately one hour's flood tide required). The berth is a timber faced concrete wharf of length 240 ft. *Facilities:* There are no bulk handling facilities or quay cranes. Three mobile cranes used. There are no Ro-Ro facilities or floating cranes available. Fork lifts are available for handling reels of linerboard. There are no facilities for handling containers as berth is only used by Paper Mill.

STEVEDORES: Savannah labour used (Experts on loading paper reels).

MEDICAL: Doctor and hospital available.

DENSITY: 1001.

FRESH WATER: Not available.

FUEL: Bunker fuel oil available by barge. Diesel oil and lubricating oils also available.

SERVICES: (Available locally or from Savannah). Fresh provisions, repairs, dry dock, airport, surveyors and laundry service.

AUTHORITY: Continental Forest Industries, P.O.Box 4068, Port Wentworth, Georgia 31407. *Tel:* (912) 964-1271. *Telex:* TWX 810-784-5635. *Contact:* J. R. Knight, Traffic Dept.

PORTLAND, Maine: 43.39 N. 70.14 W. (See Plan)

DOCUMENTS:
1 Crew List.
1 Passenger List.
2 Stores Lists.
2 Foreign Purchases Lists.
2 Inward Foreign Manifests uniform cargo.
Original Bill of Lading.
1 Form 1300 Master's Oath on entry of vessel.
2 Form 1374 Outward Foreign Manifest.

CERTIFICATES:
Load Line Certificate.
Certificate of Foreign Clearance.
Ship's Safety Certificate.
U.S. Tonnage Tax Certificate of previous trip if available.
Radio Operator's Licence.

PILOTAGE: Ship's Agents usually notify Pilot approximately 48 hours in advance of arrival then changes are made at 24 and 12 hours. Pilot boat usually called on Channel 16 and then switched to Channel 11 to continue conversation. Pilot goes aboard ship in vicinity of lightship using ladder on lee side. When weather bad, suggest vessel anchors approximately 1 mile North of the large navigation buoy (LNB).

Portland Pilots Inc. Tel: (207) 774-5623. Fax: (207) 774-5683.
Docking Pilots: McDuffie Pilots Inc. Tel: 781-3954.

ANCHORAGES:
Anchorage A (General): Beginning at Eastern corner of Grand Trunk Railway Company Pier No. 3 (Pier removed); thence approximately 90°, 1,700 yd. to Brooklyn Ledge Buoy 16; thence 330°, 350 yd.; thence 25°, 780 yd.; thence 303°, 750 yd.; thence 254°, 560 yd.; thence 186°, 750 yd.; and thence to the point of beginning.

Anchorage B (General and Quarantine): Beginning at Brooklyn Ledge Buoy 16, thence 58° to Little Diamond Island thence along the S.W. shore to the pier on the Southern end of Little Diamond Island; thence 143°, 1,200 yd.; thence 270.25° to House Island Light; thence along the Western shore of House Island to Fort Scammel Point Light; and thence 329°, 1,620 yd. to the point of beginning. Anchorage B is intended for general purposes, but especially for use by oil tankers and other deep-draft ships entering the harbour at night and intending to proceed to the dock allotted at daylight the following morning, or as soon as practicable. This area also is to be used for quarantine anchorage. Any vessel anchored in this area shall be ready to move on short notice.

Anchorage C: Bounded on the N.W. by House Island; on the North by a line running 90° from House Island Light to Peaks Island; on the East by the Western shore of Peaks Island, by a line running 198° from the Westernmost point on Peaks Island to Cushing Island, and by the shore of Cushing Island to its Westernmost point; and on the Southwest by a line running from the Westernmost point on Cushing Island to Fort Scammel Point Light. Anchorage C is intended for use only by small vessels and for temporary anchorage.

Anchorage D: Southerly and Westerly of a line beginning at Lighthouse Channel Buoy 1; thence 35° to Anchorage Buoy E; and thence 145° to the mainland. Anchorage D is for use only by small yachts and pleasure craft, and small, light draft coastwise freighters.

RESTRICTIONS: No entry restrictions at night. Deep draft vessels brought in on high water only.
Max. beam through bridge – 93 ft.
Max. draft through bridge – 35 ft.

MAX. SIZE: Size of vessel restricted to 45 ft. draft in harbour area. No outside installations at port at present.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to New York Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Tugs in Portland Harbour use Channel 07. Vessels arriving at Portland go through radio station in Chatham, Mass., RCA installations, or call station WOU via radio-telephone. VHF Harbour Control at Portland.

VHF: Voluntary reporting system in effect on Channel 13.
Channel 16, Calling & Distress Frequency, monitored 24 hours day;
Channel 22A, Main Coast Guard Frequency;
Channel 11, Portland Pilots;
Channels 7A and 78, Portland Tugboat and Ship Docking;
Channel 13, Ship to Ship.

TUGS: Tugs join vessel at Spring Point in Portland Harbour. Tugs use own lines at no additional charge. Docking Pilots not supplied by Company but are available.

BERTHING: Tidal conditions govern arrivals and departures. Depth alongside up to 35 ft.

Merrill Marine Terminal: Located in the upper Fore River. 600 ft. × 134 ft. concrete marginal wharf with 4 dolphins and provides 900 ft. berth with 35 ft. MLW and a 450 ft. Ro/Ro berth with 25 ft. MLW. 2 cranes. Liquid storage, covered storage. This Berth handles a variety of cargoes, including woodpulp, steel, fertiliser, long logs, tapioca.

This is the only general cargo facility within the Port. Located on the upper Fore River approximately one mile above the lift bridge and adjacent to the fixed highway (U.S. Route 1) and railroad bridges. Vessels normally navigate the Fore River on a rising or high tide and, depending on vessel's manoeuvring equipment (bow thrusters, etc.), either one or two tugs may be required for berthing. Vessels may dock either port or starboard side to. There is no minimum number of mooring lines required. Each berthing is handled on a case by case basis. Fresh water is available at the berth. Vessels may undock at any time and again may require the assistance of one or two tugs, depending on manoeuvring capabilities.

International Terminal: A passenger and Ro/Ro facility with limited cargo capability. Located immediately East of the lift bridge. Tug boats required for berthing. Wharf is a marginal wooden structure with 730 ft. of face and 35 ft. depth at MLW. Fresh water is available at the berth. Vessels may undock at any time and will require assistance of tugs.

Maine State Pier Transient Berth:
Length: 270 ft.
Utilities: None presently available but planned.
Location: Pier face far West end of Bath Iron Works facility.
General: Layover berth for small passenger or other vessels. Immediately adjacent to downtown area, vehicle access limited. Prior reservation required via City of Portland Waterfront Office, Tel: 207-773-1613 during working hours (0800 – 1600).

BRIDGES: No undocking on ebb tide through bridge.

STEVEDORES: 4 hours notice on ordering gangs.

MEDICAL: No advance notice required by Agent. 2 hospitals, Maine Medical Center and Mercy Hospital, who take bed patients.

TANKERS: Tankers arriving at Portland Pipe-line, Pier 2, make preparations for 2×10 in. and 12 in. hoses.

Berth	*Depth Alongside*
Clean Harbours of Maine	18 ft. MLW
B.P. Oil Terminal	34 ft. MLW
Getty Terminal	34 ft. MLW
Gulf Oil Terminal	28 ft. MLW (at bow)
Koch Terminal	34 ft. MLW
Mobil Terminal	35 ft. MLW
Northeast Petroleum Terminal	35 ft. MLW
Portland Pipe-line Pier No. 1	35 ft. MLW
Portland Pipe-line Pier No. 2	48 ft. MLW
Star Enterprise Terminal	38 ft. MLW

Shore Storage: Due to shore storage difficulties the Portland Pipe-line Authorities have requested vessels leaving Venezuelan ports for discharge at Portland to provide the following information in order to avoid ship delays at this terminal:
(a) Vessel's expected time of arrival at Portland.
(b) Quantity and grade of cargo loaded.
(c) In case of split cargoes, intended order of discharge.

The above mentioned information should be radioed to Portland Agent for forwarding to Portland Pipe-line Authorities immediately on sailing from the final Venezuelan loading port.

Report: *General/Anchorages:* Deeply laden vessels will enter Portland through the Witch Rock Channel, passing between Buoys "1" and "2", which mark Witch Rock. Lightly loaded vessels will enter through Willard Rock Channel. All vessels will pass between Portland Head and Cushing Island. The swell usually subsides near Spring Point, allowing the tugs to come alongside. Vessels bound for certain Terminals (N.E. Petroleum, Getty, B.P., Koch, Mobil and Star Enterprises) must pass through the South Portland bascule lift bridge which has a horizontal clearance of 98 ft. 2 tugs assist vessels through the lift bridge; one on the starboard bow with good backing line, the other on the starboard quarter. The bridge will not open between the hours of 0700 to 0900 and 1600 to 1800, Monday through Friday. The bridgetender can be contacted on VHF Channel 13; a minimum of 1 hour's notice prior to arrival at the bridge is desired.

Vessels proceeding to Hussey Sound to lighter will be taken by the Sea Pilot through West Cod Ledge and will enter the sound via the channel between Peaks Island and Long Island. Extreme care should be exercised while passing Soldier Ledge, a rock ledge with 40 ft. of water at MLW marked by lighted buoy "6".

N. E. Petroleum Terminal: The vessel continues approximately 1 mile above the lift bridge where it is turned to port and worked ahead into the berth. Vessels dock starboard side to with a minimum of 12 mooring lines. The terminal prefers synthetic mooring lines. The first lines positioned on the dock are the forward spring lines which are passed as the vessel moves ahead slowly. The pier is a typical wooden finger pier with 2 woodfaced steel pile breasting dolphins. Breast lines are led across the dock to wood pile clusters. Vessels dock at Slack High Water and generally can undock at any time with the assistance of 2 tugs. Upon undocking, the vessel must back into the channel and turn before heading out to sea.

Gulf Cumberland Farms Terminal: The Terminal is located in South Portland about 1 mile outside the lift bridge. The berth consists of 2 steel breasting dolphins 40 ft. in diameter which are fendered with wood. The hose rig and manifolds are located midway between the 2 dolphins. Vessels approach the finger pier and are breasted alongside by 2 tugs. Care should be taken not to work the vessel along the pier face. Vessels dock port side to with a minimum of 10 mooring lines. The 2 stern lines lead to 2 mooring buoys. Vessels start in 3 hours prior to HW in order to arrive at the dock at HW. Vessels undock with either 1 or 2 tugs. Mooring lines should be carefully tended as strong Northeasterly winds may cause a vessel to move off the breasting surfaces.

Getty, B. P. and Koch: This Terminal is located at the extreme Western end of the Fore River, approximately 1.5 miles beyond the lift bridge and adjacent to a fixed highway and railroad bridge. Vessels transit the Fore River on a rising tide in order to dock at Slack High Water. The vessel approaches the dock slowly, in line with the pier and slightly off of the face to prevent rubbing on the wood fendering. The vessel should be stopped dead in the water and then gently breasted alongside. All vessels dock port side to with a minimum of 11 lines. Stern lines are run to a mooring buoy. Vessels undock with the assistance of 2 tugs.

Mobil Terminal: This Terminal is a marginal-type berth located on the South bank of the Fore River approximately 1.25 miles above the lift bridge. The dock has 2 breasting cells 160 ft. apart. The cells are concrete capped supported by cylindrical steel pipes. The hose gantry platform is located midway between the breasting cells and is set back 3 ft. from the outer face of the cells. The breasting cells are equipped with hard rubber fixed fendering. The mooring points for head, stern, and breast lines are smaller concrete caps supported by steel pipes. A wood walkway runs the length of the dock connecting the the concrete caps. 2 tugs breast the vessel alongside for a port side to docking. 12 mooring lines are considered the minimum acceptable. Vessels dock at HW. On departure, the vessel is worked astern and then turned off the dock with the assistance of 2 tugs.

Portland Pipe-line Terminal: Portland Pipe-line Corporation operates 2 separate finger piers in South Portland. The Terminal is the Eastern terminus of a pipe-line which carries oil to Montreal, Quebec.

Pier No. 1 is the older of the 2 piers. There is a tanker berth on both the East and the West sides of the pier. Vessels dock bow in, starboard side to on the East side and port side to on the West side. On approaching the pier at Slack High Water, vessels are turned to port with the assistance of 2 tugs and are worked into the berth. Forward spring lines are positioned first. 12 mooring lines are recommended. Vessels undock with the assistance of 2 tugs at any stage of the tide. Max. size: 30,000 d.w.t. and 32 ft. draft at MLW.

Pier No. 2 consists of a 975 ft. extension to an older 1,000 ft. finger pier. There is a tanker berth on both the North and the South sides of the pier. Vessels dock bow in, starboard side to on the South side and port side to on the North side. Vessels drawing less than 42 ft. dock at Slack Water. Vessels dock at Slack Water due to the fact that the tide sets across the pier at about 1 knot. Vessels under 80,000 d.w.t. dock with the assistance of 2 tugs; vessels up to 110,000 d.w.t. may require additional tugs. Vessels make a normal approach to the finger pier, are turned to port, and worked slowly into the berth. Forward spring lines are positioned first. 12 mooring lines are considered the minimum acceptable. Vessels undock at any stage of the tide with the assistance of 2 tugs. Max. size: 124,000 d.w.t. and 45 ft. draft at MLW.

Vessels bound for Portland Pipe-line Terminal are usually brought to the inner anchorages, Diamond Island Roads, one tide before their scheduled berthing in order to dock at Slack Water.

Star Enterprise Terminal: The Terminal is located on the South side of the Fore River directly inside the lift bridge. Vessels dock with the assistance of either 2 or 3 tugs. The vessel must transit the bridge as slowly as possible for it must stop immediately after the bridge. It is then slowly turned slightly to starboard and breasted alongside the pier by the tugs for a port side to docking at Slack High Water. Vessels undock at any time with the assistance of 2 tugs and are turned before proceeding through the bridge outbound. 10 mooring lines are considered the minimum acceptable.

DENSITY: Average density 1024.

FRESH WATER: Available by tug for boilers only at rate of tug hire. Drinking water available at piers.

FUEL: No. 6 diesel oil and blended intermediate fuel oils. Delivery is via barge only and 24 hours notice required.

FIRE PRECAUTIONS: None – except at certain oil piers where information given to Shipmaster upon arrival at pier. Ample fire protection, salt water lines, sprinkler system on pier, local fire department.

CONSULS: Honorary Consuls for France and Sweden.

REPAIRS: Repair facilities for all types of machinery available.

DRY DOCKS: 3 basins divided into 7 berths which can handle a vessel up to 455 ft. long and 62 ft. wide (not currently activated). Also 3 other smaller marine slipways.

80,000 ton lift floating dock. Depth over keel blocks 14 m. Length 257 m. Clear width 40.7 m.

New Bath Ironworks: New dry dock in operation.

Specifications:	Clear Width:	134 ft.
	Draft:	46 ft. over 4 ft. keel blocks
	Max. Size:	LOA 1,000 ft. Beam 130 ft.
	Max. Lift:	90,000 long tons
	Dock Length:	747 ft. without outriggers 797 ft. with one outrigger.

SURVEYORS: National Cargo Bureau, Tel: 781-4467. Caleb Brett U.S.A. Inc., tel (207) 799-5569.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Ship's crew open hatches.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per man. Wine and/or Spirits, 1 bottle per person.

CARGO GEAR: Additional gear may be required for dry cargo. Vessel or agent should contact stevedores regarding same as soon as possible prior to vessel's arrival.

REPATRIATION: Arrangements must be made with Agent in advance by telegram.

AIRPORT: Portland Municipal Airport 3.5 to 4 miles distant.

HOLIDAYS: Accepted holidays: New Year's Day; Memorial Day; Independence Day; Labour Day; Thanksgiving Day and Christmas Day. Stevedoring available on any of these days by prior arrangement.

POLICE/AMBULANCE/FIRE: Switchboard 775 – 6361. Emergencies 911.

TELEPHONE: Arrangements can be made to have phone put on ship, but most docks have pay phones.

IDENTIFICATION CARDS: Form I-95 must be filled-out on arriving unless seaman has had a prior one made out for a previous arrival on same ship.

GENERAL: Discussions underway with Coast Guard and other officials to install fixed lighthouse stations to replace lightships at entrance.

DEVELOPMENTS: Plans under way for redevelopment of waterfront. Plans call for deepening Fore River from 35 ft. to 45 ft.

International Terminal: Reefer hook-ups and floodlighting is planned for 1990. A small landing craft ramp is planned for 1991.

AUTHORITY: Port of Portland, Two Portland Fish Pier, Suite 307, Portland, Maine 04101. *Tel:* (207) 773-1613. *Contact:* Thomas F. Valleau, Director. Captain Steve Richmond, Waterfront Manager.

PORTLAND, Oregon: 45.30 N. 122.40 W. (See Plan)

PORT LIMITS: The seaward boundary of the Port of Portland is Astoria, 96 miles N.W. of Portland.

DOCUMENTS:

3 Cargo Manifests.
3 Stores Lists.
3 Crew Curio Lists.
3 Crew Lists.
1 Clearance from Last Port.
1 Tonnage Tax Certificate.
1 Copy of Vessel's Register.
1 Itinerary of Vessel, port by port.

Certificates: Registered Tonnage Certificates. Certificate of Financial Responsibility (all details must agree with vessel's register).

PILOTAGE: Compulsory. ETA Bar Pilot Astoria at least 12 hours before arrival giving deepest draft. Bar pilotage covers from sea to the Port of Astoria, river pilotage covers from Astoria to Portland. They change from launch while steaming in channel off Astoria Buoy No. 37.

Warning: Due to heavy swells on bar during stormy Winter conditions, crossings may be temporarily suspended, therefore Masters should attempt earliest VHF radio contact on Channel 16 with Pilots or coastguard station "Cape Disappointment" for latest bar conditions.

During Summer months Masters should use extreme caution in poor visibility as many small fishing craft will be encountered near mouth of Columbia River.

Also see "General – Pilotage" before first U.S.A. port (Albany).

ANCHORAGES: Vessels may anchor to await berths at various locations on the Columbia River. Usual spots are at Tongue Point Astoria, Longview and at Vancouver, Washington.

RESTRICTIONS: All vessels Masters or their Agents to obtain Coast Guard Clearance at least 24 hours before arrival. Captain of Port may impose movement restrictions if any hazardous cargo. Under 36 ft. draft no movement restrictions, 36 ft. and over up to maximum permissible draft of 39 ft. on Pilot's recommendations. Bar Pilots will take vessels up to 45 ft. draft out on HW.

No size restrictions length and beam, however, Corps of Engineers maintain only 600 ft. wide channel, therefore, deep laden vessels over 600 ft. in length to use extreme caution when turning.

MAX. SIZE: No restrictions length and breadth. Depth at Columbia River Bar 55 ft. River channel to Portland/Vancouver maintained at 40 ft. by 600 ft. Seasonal tidal effect up to 3 ft. at Portland.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Seattle Quarantine Station.

Master to radio with ETA state of crew health noting any sickness. Agent will report sickness to Seattle Quarantine Station for clearance instructions.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Route ETA cables through KLBITT Seattle, Washington.

Marine Exchange of the Columbia River District (Merchants Exchange): 24 hour marine reporting. Call sign "KDO 759". Call on Channel 16 VHF. Working (Astoria – Longview and 50 miles out to sea) on Channel 9 and (Longview – Portland) on Channel 11 and 18A.

Marine Exchange (Tel: 503 – 228 – 4361) pass messages to vessels from Agents and vice-versa. Coverage is good in river and 50 miles to seaward.

TUGS: Tugs normally join vessel at designated berth. Tugs' lines used at no charge.

BERTHING: The port operates 4 public ocean cargo terminals containing 22 deepwater berths, including 7 container berths with 9 high-speed container cranes. Present depths alongside berths is 40 ft. min. at MLLW.

There are general cargo berths and berths for commodities which require special handling. Port facilities include 21 transit sheds, and 8 warehouses with 2.2 million sq.ft. of sprinkler protected storage area.

SPECIALISED CARGO HANDLING FACILITIES: As well as the 9 container cranes, there are 6 Whirley cranes, a 150 ton shear leg crane, a 55 ton/85 ton gantry crane and a 175 ton mobile crane, largest of its kind on the Pacific Coast.

At Terminal 2 is a 2,450 ft. container/general cargo pier with a 40 ton, a 50 ton, a 55 ton/85 ton gantry and an 85 ton straight line crane and 2×65 ton gantry cranes. Terminal 2 contains a Roll-on/Roll-off berth. Pier has a 25 acre open storage yard with rail and truck service. 4 straddle carriers, capable of stacking 20 ft. containers 3 high, or 40 ft. 2 high, serve the yard. Pierside warehouse and container freight station 90,000 sq.ft.

At Terminal 4 there is an 8.1 million bushel capacity grain elevator (Cargill), with box car tipper, truck dumper and barge unloading facility. Log dock is equipped with 2 Whirley cranes. There is a Dravo bulk unloader with digging capacity of 900 t.p.h. and a bulk outloader with a loading capacity of 1,500 t.p.h. Tanks are available for special cargoes such as petroleum, molassses, tallow and ore concentrates. Also available is a 120 acre open storage area and floating dock for import of automobiles.

The Terminal 5 elevator is the most modern grain outloading facility in the lower Columbia River and is operated under sub-lease by Columbia Grain Inc.

The elevator has a storage capacity of 1.5 million bushels and is the fastest on the river, with an outloading capability of 2,100 tonnes/p.h. The facility can receive grain by rail, truck and barge. The barge leg operates at 1,000 t.p.h., trucks are unloaded at 225 t.p.h. and about 65 railcars can be unloaded in an 8-hour shift.

Terminal 6 has a container pier, length 2,850 ft., with 3×50 ton and 2×40 ton straight line cranes and a 60,000 sq.ft. container freight station. Also a 150 acre open storage area and 2 floating docks for import of automobiles.

Bunge Corp: Depth alongside 40 ft. Storage Capacity: 8,000,000 bushels. Receiving Capacity: Ex-barge 500 t.p.h.; ex–rail 750 t.p.h. and ex-truck 750 t.p.h. Loading Capacity: 1,800 t.p.h. (1 belt and 5 spouts).

Louis Dreyfus: Depth alongside 42 ft. Storage Capacity: 1,500,000 bushels. Receiving Capacity: Ex-barge 600 t.p.h.; Ex-rail 350 t.p.h. Loading Capacity: 1,200 t.p.h. (2 belts and 6 spouts).

BRIDGES: No arrival times designated if coming from sea and in excess of 750 tons gross. Departures regulated, with bridge closures during peak traffic flow (0700 to 0900 hrs. and 1615 to 1815 hrs.) unless permission granted by Harbour Master.

STEVEDORES: Allocation for gangs Monday to Saturday must be confirmed at 1100 hrs. to longshore hiring hall. Allocation for gangs Sunday and Monday made at 1100 hrs. Saturday for both day and night gangs. Same procedure applies to allocation of night gangs, but night gangs may be cancelled by 1400 hrs. in afternoon if night gangs are to work.

MEDICAL: Any type medical treatment provided and hospital facilities available.

TANKERS:

	Max. Size Vessel	
Berth	*Length*	*Draft*
Shell Oil Company	575 ft.	32 ft.
Standard Oil	660 ft. – 700 ft.	35 ft.
Texaco Inc.	650 ft.	30 ft.
Phillips Petroleum Co.	No maximum	30 ft.
Time Oil Co.	600 ft.	38 ft.
Mobil Oil Corp.	550 ft.	31 ft.
Richfield	600 ft.	30 ft.
Union Oil Co.	550 ft.	30 ft.

DENSITY: Fresh water at all times.

FRESH WATER: Available at all berths delivered through pier-side connections.

FUEL: Viscosity grades of B and lower. No advance notice required. Barging essential. Also see "Notice" No. 2.

FIRE PRECAUTIONS: Fire precautions respecting tankers administered by U.S. Coast Guard, which enforces shipboard regulations under the Code of Federal Regulations, Part 46, Sub-Part D, Sections 20 to 40; the Police Harbour Patrol, which controls port movements, boards vessels to warn Master regarding harbour regulations, including spilling of oil, etc.; Fire Marshal exercises jurisdiction regarding fire regulations at shoreside facilities serving tankers.

All vessels to have towing cables rigged fore and aft on the offshore side. Cables to be made fast with the eye 1 m. above the water.

CONSULS: The following countries are represented in Portland:

Barbados
Belgium
Chile
Costa Rica
Cyprus
Denmark
Finland
France
Germany F.R.
Great Britain
Iceland
Ivory Coast
Japan
Korea
Malaysia
Mexico
Netherlands
Norway
Panama
Sweden
Thailand

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: 4 floating docks, largest 982 ft.×185 ft. clear width, with lift capacity of 81,000 long tons.

GANGWAY/DECK WATCHMEN: Option of vessel Owner/Agent and available through private firms.

OPENING/CLOSING HATCHES: While ship at dock, opening and closing is work of longshoremen. Ship may open or close own hatches while underway.

CARGO GEAR: Valid cargo gear certificate required, acceptable to U.S. Bureau of Labor Standards.

REPATRIATION: Arrangements possible for crew changes or other repatriation.

AIRPORT: Airport 10 miles distant, served by 14 regularly scheduled passenger airlines with direct service and/or connections domestically and world wide. 19 cargo carriers also serve the area.

TIME: GMT minus eight hours. Daylight Saving Time becomes effective annually on the first Sunday in April through the last Saturday in October.

HOLIDAYS: *New Year's Day; Martin Luther King's Birthday (January 15th); President's Day (February 21st); Memorial Day (May 30th); *Independence Day (July 4th); Harry Bridges Birthday (July 27th); *Labour Day (first Monday in September); Columbus Day (October 8th); Veterans' Day (November 11th); Thanksgiving Day, *Christmas Day (December 25th), State-wide Election Days. Other legal holidays may be proclaimed by state or national authority. When holiday falls on Sunday, the following Monday is observed as holiday. Longshore work performed on any of above listed days is overtime, which is one and a half time rate. Days marked (*) are stop-work days, i.e. no ships will be worked. This also applies to July 5th, which observed locally on unilateral basis.

POLICE/AMBULANCE/FIRE: Police Tel: 911; Fire Tel: 911; Ambulance: provided by several private firms, but can be obtained through police or fire number.

TELEPHONES: Available by order from terminal superintendents at $5.00 connection charge.

SERVICES: All services available such as compass adjusting, major or minor repairs either with work barges or at ship repair berths; lay berths available; charts available from private companies; all chandlery supplies available.

SHORE LEAVE: Crew members permitted ashore except where vessel has made first arrival from Communist-controlled port.

IDENTIFICATION CARDS: Immigration Dept. requires form No. I-95A and No. 31 (Repatriation). Changes can be effected at any U.S. Immigration Office.

NOTICE No. 1:
Custom of the Port Rules and Regulations:

Pertaining to bulk grain and other bulk commodities customarily handled through regular grain elevators, recognised as the practice in the Columbia River District by the Merchants Exchange. It is not the intent of the Rules and Regulations to supersede the contractural relationship between vessel and shipper or charterers, but rather state customary trade practices for the purpose of facilitating commerce under conditions where the contractural arrangements do not cover specific local conditions, in which case these "Custom of the Port" rules and regulations will apply. These rules are applicable to vessels loading in the Columbia River District, which shall be considered as one port and includes grain berths from Astoria, Oregon, to Portland, Oregon, including Longview, Kalama and Vancouver, Washington. Loading berth(s) to be declared during regular business hours at least 24 hours before arrival at the Columbia River.

Rule 1:

Subject to the exceptions enumerated below, vessels shall be assigned to a berth(s) in the order in which they file with the elevator(s) as ready to load. A vessel shall be considered ready when it has obtained Certificate of Readiness issued by the National Cargo Bureau, Inc., and an official certificate of stowage examination from the U.S. Department of Agriculture, Federal Grain Inspection Service, Inspection Division, stating the vessel is completely fit in all compartments in which it is intended to receive cargo.

EXCEPTIONS:

(a) In assigning berth to vessels at any elevator, liners shall be given preference over other vessels, except that any tramp vessel whose allowed loading laytime has expired shall assume the status of a liner vessel for purposes of berth assignment. (For the purpose of these rules, the term "Liner" is defined as a vessel sailing under an advertised Pacific Coast schedule and operated by a line maintaining regular sailings from any Pacific Coast port to named ports, and on which the total quantity of all grain to be loaded shall not exceed one-half of the total deadweight tonnage of the vessel.) A vessel which arrives and presents Notice of Readiness to load in accordance with this rule, but which cannot attain "Liner" status because the allowed loading laytime is not defined in the contract of affreightment, will not lose its berthing priority to a tramp vessel with later Notice of Readiness, that has gone on demurrage.

(b) The elevator may alter the turn of the vessels whenever confronted with the urgent necessity of receiving or loading any particular grade of grain, or to facilitate conditions at the elevator. When requested, elevator operator to supply written confirmation of such loading alteration as authorised under this rule and/or applicable tariff to owner's or charterer's representative.

Rule 2

Normal working days are Monday through Saturday from 0800 hrs. to 1700 hrs. (exceptions are Sundays, legal holidays, and July 5th). Refer to notes below.

(a) July 5th – while not a legal or longshore holiday, has not been worked by Pacific Coast Longshoremen since 1935, and is considered a holiday.

(b) Overtime – is all work over 6 hours in one day, and work between 1700 hrs. and 0800 hrs., Monday through Friday, and all work on Saturdays, Sundays, legal holidays, and overtime days as defined in the Pacific Coast Longshore Contract.

(c) Awaiting vessel – where the same holiday is observed on different days in adjoining states, a waiting vessel not knowing where it could work will observe (for laytime purposes) the holiday in the state that it first works.

Rule 3

Should the vessel refuse to work during a normal working day, or beyond a normal working day when so required in writing by the elevator in accordance with its published tariff, it shall lose its turn and vacate the berth in favour of the next vessel that is willing to work overtime. The vessel so losing its turn shall be entitled to berth as soon as the berth is next available thereafter. Should any vessel refuse to vacate its berth when ordered to do so under the above circumstances, the elevator may effect the removal of such vessel at the vessel's risk and expense.

Rule 4

The Board of Directors of the Merchants Exchange will, on an annual basis, select an abitrator for the purpose of arbitration or interpretation of the Rules and Regulations set forth herein.

Requests for arbitration or interpretation of these rules shall be submitted in writing stating the parties involved and outlining the facts in brief detail to the Manager of the Merchants Exchange. The Manager of the Merchants Exchange and the arbitrator will select the time and place for the arbitration. Failure of the parties named in the abitration to respond or acknowledge the request for arbitration will require the arbitrator to rule on the facts as presented by the requesting party.

Any requests for revisions of these rules must be submitted in writing to the Chairman of the Custom of the Port Rules and Regulations Committee with a copy to the Manager of the Merchants Exchange.

Arbitration fees payable to the Merchants Exchange shall be $50 plus any extra ordinary charges in connection therewith. The above fee shall be paid by the party requesting the arbitration or interpretation.

NOTICE No.2: Issued by the Harbour Master in August, 1980.

SUBJECT: Discontinuing Ship Repairs at Grain and Oil Docks, and Refuelling at Grain Docks.

We feel after considerable deliberation that ship repair at Oil and Grain Docks is an unnecessary hazard and should be discontinued at once.

The practice of refuelling ships at Grain Docks also would be considered taking an unnecessary risk, and as such, will be stopped.

After surveying numerous longshoremen and Grain Operators who reaffirmed this position, we are hereby notifying the concerned contractors that this will be our policy from now on.

AUTHORITY: Port of Portland, P.O.Box 3529, 700 Northeast Multnomah Street, Portland, Oregon 97208. *Tel:* (503) 231-5000. *Telex:* 910-464-5105. *FAX:* (503) 231-5332. *Cables:* Portofport. *Contact:* Robert Woodell, Executive Director.

PORTSMOUTH, New Hampshire: 43.03 N. 70.45 W. **(See Plan)**

PILOTAGE: Pilot boards at entrance.

TUGS: The Port of Portsmouth is serviced by 3 regular tugs, one of 1,200 h.p. and two of 1,600 h.p. operated by the Portsmouth Navigation Division of the Central Wharf Towboat Company, Inc. Tel: 1-603-436 1209 (radio frequency 1316). Additional tugs are available in the area if needed.

The rates for moving vessels from the anchorage (1 mile South of Sea Buoy KR2) to berths in the harbour vary according to distance, conditions and tonnage of vessels. Tonnage referred to is s.d.w.t. or Coastwise, whichever greater.

BERTHING:

New Hampshire Port Authority:

Operator: J. T. Clark & Son of N.H. Inc. Tel: (603) 431-8500. Fax: (603) 427-0771.
Location: 3 miles from Outer Anchorage (Buoy KR2).
Depth at Dock: 35 ft. (MLW).
Type of Pier: Length 600 ft. Concrete and steel pile with precast concrete deck.
Products Handled: General cargo, bulk and containerised.
Dry Storage: 50,000 sq.ft. in two sheds.
Dockside: Potable water, power, telephone and marine bunkers.
Modern fork-lift trucks, bucket loaders, tractors and heavy lift cranes are permanently stationed at the facility to prevent any delays in servicing all types of vessels. The 4 cranes range in size from 35 tons to a 220 ton mobile container crane.
Additional mobile cranes of 150 ton capacity are readily available.
A certified weighing system is located in the centre of the freight marshalling area for easy access to trucks and containers entering or leaving the terminal.

Fuel Storage Inc.:

Operator: Sea-3.
Address Terminal: Avery Road, Newington, N.H. 03801.
Tel: (603) 431-5990.
Office: 144 Washington Street, Portsmouth, N.H. 03801.
Tel: (603) 436-6225.
Type of Pier: Steel piled cells offshore 125 ft.
Depth Alongside: 38 ft. (MLW).
Normal ship side to dock: Port.
Line Handling boat required: Motorised shore bollards.
Access to vessel (for stores and repairs): Trucks to shoreside, cart or hand to shipyard.
Product handled: LPG.
Size and number of pipe-lines: 16 in. liquid line, 8 in. vapour return.
Bbls. per hour Discharge capacity: 12,420 bbls.p.hr.
Maximum vessel dimensions: 59,000 c.b.m.
Storage capacity: 400,000 bbls.
Other dock users: Belcher Oil, Sea – 3 Products Inc., U.S. Government, Global, Trimont International, Cyro.

Also see "Shipmaster's Report".

Public Service Co. of N.H. Schiller Station:

Operator: Mobil Oil Corp.
Address: Gosling Road, Newington, N.H. 03801.
Depth Alongside: 34 ft. (MLW).
Normal ship side to dock: Port.
Access to Vessels (for stores and repairs): Limited.
Products handled: Gasoline and distillates.
Size and number of pipe-lines: Various.
Discharge capability of bbls.: 6,000 bbls.p.hr.
Average distance to storage tanks: Tank farm adjacent to dock.

Simplex Wire & Cable:

Operator: Simplex Wire & Cable.
Address: Old Dover Road, Newington, N.H. 03801.
Tel: 436-6100.
Type of Pier: T-Shape (permanent).
Depth Alongside: 28 ft. (MLW).
Normal ship side to dock: Port (bow upstream).
Line handling boat required: Yes.
Access to vessel (for stores and repairs): Yes.
Product handled: Ocean cables.

Public Service Co. of N.H. Schiller Station:

Operator: C. H. Sprague & Son.
Location: 1.5 miles above the Interstate Bridge.
Distance seabuoy to dock: 7.1 miles.
Controlling depth in approaches: 35 ft.
Controlling depth at dock – MLW: 37 ft., ledge bottom.
Docking and undocking conditions: Docking is restricted to a high water operation – Pilot starting ship in from anchorage area at high water only.
Undocking: Low water slack at the dock or 1 hour before high water slack at the dock.
Length of dock and construction: 700 ft. with dolphins. Concrete pile, concrete decked T-head wharf with a 100×20 ft. approach.
Tugs and linehandlers: 2 or 3 tugs used to dock and undock.
Terminal personnel used as linesmen.
Bunkers: Available through 6 in. line at 2,000 bbls./hr.
Water: Supplied through 2.5 in. line.

C. H. Sprague & Son Co., Newington Terminal:

Operator: C. H. Sprague & Son Co.
Address Terminal: Old Dover Road,
Newington, N.H. 03801. Tel: (603) 431-5131.
Office: One Parade Mall,
Portsmouth, N.H. 03801. Tel: (603) 431-1000.
Type of Pier: Steel piled cells (2) and mooring dolphins (3) Offshore 300 ft.
Depth Alongside: 36 ft. 6 in. (MLW).
Normal ship side to dock: Port.
Line handling: Motorised capstans on all dolphins. Lines handled by Sprague personnel.
Lines: 6-18 depending on size of vessel.
Access to vessel (for stores and repairs): 5 ton vehicle or less to ship side, 5 ton vehicle or more, cart or hand to ship side.
Products handled: Kerosene, diesel fuel, No. 2 home heating oil.
Size and number of pipe-lines: 1×16 in., 1×14 in., 3×10 in., 1×8 in., 1×6 in.
Discharge Rate: 7,000-20,000 bbls./hr. (varies on product and tank size).
Max. vessel size: 700 ft. overall length.
Storage capacity: 1,200,000 bbls.
Dockside: Potable water, pay telephone, marine bunkers (light oil only).

Gold Bond Building Products Division of National Gypsum Company:

Operator: Gold Bond Building Products.
Address Plant: Freeman's Point,
Portsmouth, N.H. 03801. Tel: (603) 436-4840.
Mailing: P.O.Box 270,
Portsmouth, N.H. 03801.
Type of Pier: 2 circular marine cells, 40 ft. dia. at shore side.
Depth alongside: 40 ft. (MLW).
Normal ship side to dock: Port.
Line handling boat required: Motorised shore bollards.
Access to vessel (for stores and repairs): Trucks to shoreside.
Product handled: Gypsum ore through a conveyor system designed for self-unloading ships.
Other Dock Users: Northeast Petroleum Corp.
N.H. Trading Corp.

BRIDGES: *Bridge Clearances:*
Memorial Bridge (lift): Horizontal 260 ft., vertical 150 ft.
ME.-N.H Bridge (lift): Horizontal 200 ft., vertical 135 ft.
1-95 Highway Bridge (fixed): Horizontal 440 ft., vertical 135 ft.
General Sullivan Bridge (fixed): Horizontal 100 ft., vertical 46 ft.
New Castle Highway Bridge (Bascule): Horizontal 29 ft., vertical 12 ft.

TANKERS: Also see "Berthing".

Report: Cautionary Advice – Port Approaches: Vessels approaching Portsmouth should pass South of Isles of Shoals, and, if waiting for the Pilot, anchor inside of Gunboat Shoals Buoy No. 1. Vessels should not anchor during periods of heavy swell. It is not prudent to enter port in fog, snow or when swell is running West of Whaleback Reef. Numerous small craft frequent this area during Summer months.

Tugs: 4 tugs are available at this port. Pilot acts as Docking Master and his advice should be heeded concerning number of tugs and number and placement of mooring lines.

General: Portsmouth Harbour is at the mouth of the Piscataqua River and is the approach to all marine terminals located on the river. The terminals are located above the City of Portsmouth. Vessels transiting up-river must pass beneath either 2 or 3 bridges, depending on the terminal. The first bridge is the Memorial Highway Bridge which is a lift bridge with a vertical clearance of 150 ft. in the raised position. The second bridge is the Route No. 1 Bypass and Railroad Bridge (Noble Island Bridge) which is also a lift bridge and has a vertical clearance of 135 ft. in the raised position. The third bridge is the Route 95 Bridge which is a fixed structure with 135 ft. of vertical clearance. The 2 lift bridges monitor VHF Channel 13. The minimum horizontal clearance on the bridges is 200 ft.

The Agent must notify the U.S. Coast Guard 24 hours prior to the vessel entering the harbour. The vessel must notify the U.S. Coast Guard on VHF Channel 16 upon entering the harbour. The Pilot will get a vessel under way approximately 1 hour before the tide changes in order to make a Slack Water passage. Tugs will come alongside after the vessel has rounded Fort Point.

Sea 3 Terminal: LPG vessels scheduled to discharge at this terminal must pass through all 3 bridges. The terminal is located 2.9 miles above the Memorial Highway Bridge on the South bank of the river. An exact ETA is important for LPG vessels due to the nature of the vessel's cargo and necessary notification of state, local, and federal agencies (USCG). LPG vessels must meet the following Port Regulations:

(a) Vessels move within the harbour only during daylight hours (loaded or light).

(b) Vessels move within the harbour only during periods of good visibility. If the visibility falls to less than 2 miles, vessels at sea must not enter port without the permission of the USCG Captain of the Port. If a vessel is under way within the harbour and the visibility deteriorates to less than 2 miles, the vessel must notify the Captain of the Port and then proceed to the berth or anchor as directed.

(c) Vessels must continuously monitor VHF Channel 13 while under way in the harbour. Constant communications must be maintained with the attending tugs and the USCG escort craft.

(d) Vessels transiting in-bound may do so only during periods of Slack Water. This could be either High or Low Slack Water, depending on the vessel's draft. On departure from the berth, vessels leave either at LW or 1 hour before Slack High Water (daylight only).

(e) Vessels transit the harbour with at least 4 tugs in attendance.

(f) LPG vessels should not enter the port unless the terminal is able to immediately receive cargo.

(g) On a LPG vessel's first call to the port, a USCG inspection team will board the vessel at anchorage. All LPG vessels, whether awaiting inspection or harbour transit, must anchor 1 mile South of the Sea Buoy "KR2". After the initial inspection, a vessel on future calls to Portsmouth need only send the following message to the Captain of the Port, South Portland, Maine:

"To the best of my knowledge and belief, there are no known casualties to this vessel or its machinery which might affect its seaworthiness. I further state that all cryogenic handling and detection equipment is in proper operating condition."

This will permit vessel to proceed to the dock for pre-transfer inspection. Failure to send the message will require the vessel to be inspected at anchor.

(h) Vessels must be prepared to get under way on short notice in case of an emergency. One "live" tug must stand-by during all cargo operations.

LPG vessels transit Portsmouth Harbour and the Piscataqua River escorted by a USCG vessel with 4 tugs in attendance. The marginal-type dock consists of 3 concrete cells connected by catwalks. The 4 tugs breast the vessel alongside for a port side to docking. The bow is worked in first while head and forward breast lines are positioned and secured to the bitts. The stern is then worked alongside and the remaining lines positioned. This allows for the required tension on the long mooring leads forward. 20 mooring lines are considered the minimum acceptable as the ebb current forces the vessel off the dock and the bow has a tendency to yaw with the current. All moorings lines must be carefully tended. Light vessels undock with 3 tugs; vessels departing with part cargo must use 4 tugs to undock.

Also see "Shipmaster's Report".

New England Tank Industries – Newington: Located approximately 10 miles rom the Sea Buoy in the Piscataqua River. Vessels generally dock and undock with the assistance of 3 tugs. Vessels are breasted alongside by the tugs for a port side to docking. 12 mooring lines are considered to be the minimum as current can reach 8 knots especially during Spring freshets. Vessels dock and undock day or night. Vessels are turned off the dock or in the turning basin upon undocking after discharging.

Northeast Petroleum – National Gypsum: Located on the West bank of the Piscataqua River below and adjacent to the Route 95 Fixed Bridge. The berth is approximately 5 miles from the Sea Buoy and is above the City of Portsmouth. The marginal-type dock consists of 2 breasting cells set on 163 ft. centres. The hose gantry is mounted on a third cell which is set back 4 ft. from the face of the breasting cells.

Both breasting cells are fitted with hard rubber fixed fenders. A gypsum unloading conveyor gantry is located at the South end of the pier but the structure does not interfere with tanker operations. The mooring line lead to the shore mooring point is approximately 115 ft. Vessels dock day or night with the assistance of 2 tugs. The tugs breast the vessel alongside for a port side to docking. 17 mooring lines are considered to be the minimum acceptable. Vessels undock with the assistance of 2 tugs and are turned below the berth. Due to the strong river currents and the close proximity to the navigational channel, lines must be tended closely.

C. H. Sprague & Son – Company Shiller Station: Located on the South side of the Piscataqua River about 7.1 miles above the Route 95 Fixed Bridge. The dock consists of a concrete pile, concrete decked 'T'-head wharf and dolphins. The overall length of the dock with the dolphins is 700 ft. Pilots start vessels in from the anchorage area at a suitable time in order to dock during Slack High Water. Vessels dock and undock with the assistance of either 2 or 3 tugs. Vessels dock port side to using approximately 14 mooring lines due to the extreme currents experienced during maximum stages of ebb and flood. After completion of discharge, vessels are turned in the turning basin or off the dock. Vessels undock either at Slack Low Water or 1 hour before Slack High Water. As with other terminals, mooring lines must be closely tended at all times due to the strong river currents.

Tides and Depth of Water: Tidal currents are very strong in the Piscataqua River, averaging between 3 – 5 knots. Spring freshets increase this current. Eddies form around most of the berths making slack tide berthing mandatory. Tidal range is 8.1 ft.

FRESH WATER: Available.

FUEL: Available.

REPAIRS: Facilities available.

BANKS: First National Bank of Boston. Tel: (617) 434-3770.
First National Bank of Portsmouth. Tel: (603) 436-7700.
Maine National Bank. Tel: (207) 439-0451.
State Street Bank. Tel: (617) 786-3839.

GENERAL:

VESSEL ARRIVALS AND DEPARTURES

Marine Section, Federal Building, Room 103, Portsmouth. Tel: (603) 436-7620, ext. 737.

District Office (Portland, ME): Tel: (207) 780-3328.

COMMERCIAL VESSELS, ARRIVALS & ENTRY

Report of Arrival: These vessels must report arrival to a U.S. Customs Officer within 24 hours (19 U.S.C. 1433):

A. Vessels arriving at any port or place in the U.S. from any foreign port or place (refers to domestic and foreign vessels);

B. Domestic vessels arriving at any port or place in the U.S. from another U.S. location with bonded merchandise or foreign merchandise for which entry has not been made. Failure to report results in penalties.

Entrance: Within 48 hours of arrival from a foreign port, the Master is required to make entry of his vessel, even though the vessel may be at anchor awaiting berth. Foreign flag vessels arriving in ballast from another U.S. port must also make entry within 48 hours of arrival. When vessels which have residue foreign cargo and/or passengers on board arrive from another U.S. port, entry should be made within 24 hours.

Vessels arriving from a foreign port must have made either Preliminary or Formal entry prior to transacting any type of business or permitting anyone on board other than Customs, Immigration, Agriculture, Public Health, and Agent's personnel. Vessels arriving from another U.S. port to discharge cargo must make Preliminary or Formal entry prior to discharging cargo.

Foreign non-commercial vessels are also required to make entry. In Portsmouth this will be done on board at the time of boarding by Customs. The Officer will provide necessary forms and assistance. Non-commercial vessels may contact the New Castle Coast Guard Station for assistance in obtaining a Customs Officer.

WARNING REGARDING SEA STORES

(U.S. Dept. of Agriculture, Animal & Plant Health Inspection Service

You are hereby warned that WHILE YOUR VESSEL IS IN THE TERRITORIAL WATERS OF THE U.S., regulations of the Department of Agriculture **prohibit** the unloading for any purpose of:

1. Fresh, chilled or frozen meats;
2. Undrawn poultry carcasses;
3. Plants or plant products, including fruits or vegetables;
4. Garbage, consisting or contaminated with scraps, parts or other waste of meats, plants, fruits, and vegetables.

DEVELOPMENTS: The Port Authority has developed a comprehensive plan for maximum utilisation of existing space on a phased basis. An integral part of that plan is another docking facility, 1,000 ft. long with a depth of 35 ft. alongside at MLW. This new docking facility will provide additional berthing space for new users as well as prevent costly delays due to terminal congestion. The Port Authority is also planning to develop approximately 10 acres of new land from a tidal basin adjacent to the present facility. This area will be used for open as well as enclosed throughput storage.

SHIPMASTER'S REPORT: February 1983.

Sea-3 Terminal:

The vessel arrived off Portsmouth N.H. on the 2nd February, at the entrance to which port the Pilot boards, to take vessels up river to Newington. At the arrival time a S.E. gale was in force, so the passage was ended at 2400 hrs. and the vessel stood some 20 miles off the coast waiting for the weather to abate, as I considered it unwise to proceed to the waiting area to anchor; as the holding ground is not good and in S.E'ly winds there is no shelter. The vessel cruised around at reduced speed until the following day.

At 1450 hrs. on the 3rd February, with the weather, and sea conditions much improved, the vessel anchored 1 mile South of Kitts Rock No. 2 Buoy (KR2). Two U.S. Coast Guard officers boarded from a local harbour tug after some difficulty in coming alongside, due to the ground swell that was still running. The Officers carried out an inspection of all cargo handling equipment, and shut down systems. The Coast Guard officers then granted permission for the vessel to enter the Port of Newington, and disembarked at 1715 hrs.

As there is a port regulation that no LPG carrier can move during the hours of darkness, and that large vessels can only dock, and undock during slack water periods, it was necessary to wait until the following morning before docking.

At 1020 hrs. on the 4th February the Pilot boarded. At 1040 hrs. anchor aweigh, and the vessel proceeded up river. At the mouth of the river there is a shallow patch with only 35 ft. over it at low water. This left only 5 ft. clearance under the keel, and the vessel had to proceed very slowly over it. Four tugs were made fast, 2 for'd and 2 aft, and a U.S. Coast Guard cutter escorted the vessel up-river. The river is narrow, with some very sharp bends. There are 3 bridges, with the port limitations governed by the Noble Island Bridge. The vertical clearance on this bridge is 135 ft., and the horizontal distance is 200 ft. Maximum draft loaded, and on high water is 36 ft. On approaching this bridge it was necessary to let go the 2 for'd tugs, and allow them to pass through the bridge first, making them fast again when the vessel has passed through.

The vessel docked at Sea 3 Terminal, at 1315 hrs. 4th February. The berth constructed from 3 cement and steel dolphins, joined together by a steel platform. It stands about 150 ft. out in the river, and is connected to the shore by a narrow footbridge. The mooring arrangements for a vessel of this size are poor. There is not sufficient leads on the head lines or stern lines due to the way the mooring bollards are placed on the shore, and all the weight is taken on the spring lines. Recommended mooring arrangements as supplied by the Port Authority (see "Plan"). On the full run of the tide the water runs at up to 4 knots alongside, and because of this there is a port regulation that a tug must stand-by at all times while the vessel is alongside. The cost of this tug, on this call was U.S.$300 per hour, which can add a considerable amount to the overall cost of calling at Newington.

Before loading commenced, a liquid and vapour return line were connected. At 1530 hrs. on the 4th February loading commenced. The vapour return line proved very important as it appeared there was a large percentage of impurities in the product received judging by the performance of the vessel's reliquification plant. It was necessary to return a considerable amount of vapour to the shore tank during loading operations. I issued a Letter of Protest, to the Terminal Manager, protesting the quality of the product.

On docking, the vessel was again boarded by the U.S. Coast Guard, and further inspections were carried out. The Coast Guard personnel remained on board throughout the loading operation; sometimes as many as 6 Officers, but never less than 3 at any one time. It was explained to me by their Commanding Officer that some of the personnel had no experience of LPG vessels, and were on board to learn. In this respect the ship's Officers gave all assistance possible in showing them around. The loading rate was slow, only reaching an average of 400 tonnes/p.h. on full rate, and the shore installations could not supply the product any faster. Loading was completed at 0730 hrs. on Monday, 7th February when the cargo loaded was estimated as follows:

Ship's figure:	23,965.127 tonnes
Surveyor's figure:	23,901.602 tonnes
Shore figure:	23,828.614 tonnes (taken from shore tank gauge reading)

The draft on completion was 33 ft. 00 in. for'd., 34 ft. 08 in. aft.

Owing to port regulations the vessel had to remain alongside until the next daylight high water which was at 0800 hrs. on the 8th February. The vapour return line remained connected during this time, as regulations prohibit releasing uncondensables to the atmosphere, and in view of the impurities in the product it was found necessary to use this vapour return line.

At 0745 hrs. on the 8th February while the vessel was preparing to sail, a Coast Guard Officer boarded and informed me that the visibility in the river was less than 2 miles, and the U.S. Coast Guard would not grant permisson for the vessel to sail. Heavy snow had fallen throughout the previous day, but had cleared during the night, and the visibility at the vessel was over 2 miles. Evidently further down river it was still snowing, and visibility was restricted. The vessel had to remain alongside until the next daylight high water which was 0900 hrs. on the 9th February.

At 0715 hrs on the 9th February while preparing the vesel to sail, the vapour return line was disconnected, and a further survey of the product on board carried out. The result was as follows:

Loss of product as found by ship:	50.283 tonnes
Loss of product as found by Surveyor:	52.568 tonnes

At 0855 hrs. on the 9th February the vessel sailed for the Panama Canal. She was assisted by 5 tugs, as both the Pilot and the U.S. Coast Guard insisted on an additional tug being employed for the down-river passage as the vessel was deep loaded. There was no difficulty in leaving the berth. All stern lines were let go, and the vessel's stern allowed to swing out into the river, while still made fast for'd, with all weight coming on the for'd spring lines. When the vessel was at right angles to the dock all lines were let go, and the tugs pushed her around until she was heading down river. The river passage went without incident, and the Pilot disembarked at 1037 hrs. when approaching Kitts Rock No. 2 (KR2) buoy. The passage commenced at 1100 hrs on the 9th February, 1983.

AUTHORITY: New Hampshire State Port Authority, Port of Portsmouth, 555 Market Street, Box 506, Portsmouth, New Hampshire 03801. Tel: (603) 436-8500. *FAX:* (603) 427-0771. *Contact:* Ernest Connor, Port Director.

Harbour Master: *Tel:* (603) 436-8500.

PROVIDENCE, Rhode Island: 41.48 N. 71.23 W.

(See Plan)

PILOTAGE: Compulsory. Pilot boards 1 mile South of Brenton Reef Light Tower (position: Lat. 41° 25′ N., Long. 71° 23′ W.). Send ETA to Agent 24 hours prior to arrival. Pilots (call sign "Rhode Island Pilots") on Channels 16, 12 and 18A.

ANCHORAGES: There is no port anchorage for dry cargo vessels. It was reported that tankers can discharge into barges off Newport.

RESTRICTIONS: Vessels can enter and leave at any stage of the tide, day or night.

MAX. SIZE: Pilot advised max. draft is 38 ft., however, Agent recommends 38 ft. with 2 ft. keel clearance.

RADIO: Station WCC.

VHF: Port Authority on Channels 16 and 18A. Agent on 16, 18A, 13 and 9. Also see "Pilotage".

TUGS: 9 tugs available, 1,600 h.p. – 3,200 h.p. Vessels may dock and undock without tugs, however, they are required for turning in the harbour.

Providence Steamboat Company serving Ports of Providence, Narragansett Bay, Fall River and New England Electric at Brayton Point. 4 tugboats – 24 hour dispatching service. 2×3,000 h.p. tugboats.

BERTHING: *Municipal Pier No. 6:* The berth is the first port hand berth when entering Providence. Distance from entrance to berth 25 miles. Length and beam no limit. Max. draft 38 ft. Least depth of water in channel from sea to berth reported to be 40 ft. Mean tidal range at berth 4.5 ft. Also see "General".

Cargo Handling Facilities: Mobile cranes only available for handling bulk steel and scrap cargoes. 6 mobile cranes, capacity 100 tons to 250 tons. No Ro/Ro facilities. No floating cranes. There are facilities for handling 20 ft. and 40 ft. containers, also sufficient storage space. There is also adequate storage space for breakbulk and palletised cargoes.

MEDICAL: Doctor and hospital available.

TANKERS: LPG/LNG carriers – see "Shipmaster's Report" dated February 1985.

Report: *American Chemical-Wilkes Barre:* General: The Wilkes Barre Terminal of the American Chemical Company is located 26 miles from the Sea Buoy on the Providence River. This facility was formerly operated by Exxon Company, U.S.A. It is now operated by Union Oil Company of California and Getty Oil Co., Inc. The wharf has a 75 ft. face, 300 ft. with dolphins; 30 ft. depth alongside. Deck height of 9 ft.

The berth can accommodate vessels up to 600 ft. in length, 85 ft. beam, maximum 25,000 d.w.t., and maximum drafts to 27 ft. Docking is accomplished at HW or rising tide only. Undocking can take place at any state of the tide.

Pilotage and Docking: The services of a Pilot and Docking Master are recommended. The width in the existing berthing area and required approach manoeuvres make utilisation of the Docking Master mandatory. 2 tugs are required when docking vessels of any tonnage. A minimum of 1 tug (1,800 h.p.) is required when undocking. During strong Southerly winds 2 tugs shoud be employed for undocking.

Mooring: Normal mooring leads are adequate for this berth. However, strong Southerly winds are cause for concern. There is a poor lead for the after spring and breast lines. During times of excessive Southerly winds, all lines should be tended and checked frequently. The terminal does not provide a gangway.

Only No. 2 heating oil is discharged at this terminal. Discharge is accomplished through 2×8 in. hoses using ASA flange connections. Pumping pressure is 125 p.s.i. The terminal has no facilities for receiving ballast or slops.

Amoco – Providence, Kettle Pt.: General: The Amoco Wharf is on the East side of Providence River 26 miles from the Sea Buoy. This wharf is used for the receipt and shipment of petroleum products. The berth is aligned North and South with a total of 6 wooden breasting dolphins. The wharf has a 500-ft. face (600 ft. with dolphins). Hose rig and hoist are located on a "T" head 90 ft. long, 30 ft. wide at the centre of the pier.

Entering and Docking: 2 mooring dolphins located approximately 90 ft. inside the main pier and used for fore and aft breast lines, head lines are run to a mooring dolphin, and stern lines to bollards located on shore.

Vessels can dock either port or starboard side to but a starboard side berthing is preferred. Deep draft vessels dock on Slack High Water only, day or night, and can unberth at any stage of the tide any time.

Depth of water alongside the berth is 35 ft. MLW. Average tide at Providence is 4 ft. 6 in.

A Docking Master is recommended. Docking should not be attempted without local knowledge. 2 tugs are used for docking under normal conditions. One tug is used for normal undocking. Both tugs and Docking Master meet the vessel 0.5 miles below Kettle Point and assist vessels to the berth.

Gasoline, heating oil, diesel, and No. 5 fuel are all discharged through 8 in. hoses. All connections are made with ASA flanges. Maximum pumping pressure for all cargo lines is 90 p.s.i.

Gulf – Gulf Oil Pier: General: The berth projects Westerly into the river for a distance of 800 ft., and is 50 ft. wide, wooden piling, open faced construction, and wooden decked, terminating in a "T" head 90 ft. long and 30 ft. wide which is aligned North and South.

There are a total of 6 wooden piling breasting dolphins, 3 on each side of the "T" head for a total face of 280 ft. The hose rig, hoist, and discharge heads are located at the centre of the "T" head.

Entering and Docking: Vessels can berth heading either North or South, but a starboard side-to or up-river berthing is preferred. Bow, stern, and breast lines are run to mooring buoys.

Vessels can dock day or night, any stage of the tide, depending on draft. The depth of water alongside the berth is 35 ft. MLW.

In this area local features are such that current movement in particular is subject to considerable distortion.

This berth can accommodate vessels up to 675 ft. in length, maximum 100 ft. beam and maximum draft to 31.5 ft. at MLW. Docking should not be attempted without a Docking Master. 2 tugs are employed for docking and undocking all vessels. Tugs and Docking Master meet the vessel in the vicinity of Kettle Point and assist the vessel to the berth generally with the starboard side alongside the berth. Head lines and stern lines are run out to mooring buoys. Forward and back spring lines are run out to the "T" head. The terminal does not provide a gangway.

Mobil – South Terminal: General: The Mobil Oil Corporation Terminal is located 25 miles from the Sea Buoy on the Eastern side of the Providence River. This facility is used for the receipt and shipment of petroleum products and bunkering vessels.

Maximum size of vessels that can be accommodated at this facility include lengths up to 750 ft., beams to 125 ft., 50,000 d.w.t. maximum, and drafts to 39.5 ft. The water at this berth is brackish. Distance from bow to manifold is limited to 390 ft. Docking is done at HW only day or night.

Entering and Docking: The services of a Docking Pilot is both compulsory and recommended. 2 tugs are used for docking and one tug for undocking. Tugs and Docking Master meet incoming vessels in the vicinity of Sabin Point and assist vessels to the berth for a starboard side docking. If a port side landing is required, vessels proceed about 1 mile beyond the berth to Fox Point Reach and turn around. Normal mooring leads are used at this berth. No gangway is provided by the terminal.

C. H. Sprague: General: The C. H. Sprague and Son Terminal is located 26 miles from the Sea Buoy at the Allens Avenue Terminal.

The main pier projects Easterly into the river and is 526 ft. long and 37 ft. wide, wooden piling, open faced construction. A turning dolphin, concrete crown, wooden fendered, and connected by a walkway extending out from the main pier an additional 75 ft. and fitted with 2 bollards, making for a total face of 601 ft. The berth also has 3 unloading towers serving a belt conveyor system.

The South side of the pier is not used and has a depth of 12 ft. to 14 ft. alongside. The North side has a depth of 35 ft. LW, but commences to shoal up 35 ft. from the inner bulkhead.

Vessels up to 650 ft. in length, maximum beams of 100 ft., and drafts at MLW of 35 ft. can be accommodated at this terminal. Maximum deadweight of vessels at this terminal is 38,000 d.w.t. The water at this terminal is brackish.

Ships having a large flared bow should exercise caution as the loading towers extend over the pier, and in light condition the ship has to be given a 3° list before undocking.

Maximum limit bow to manifold is 380 ft. There are 4×8 in. hoses and 2 lines, 1×18 in. for No. 6 fuel and 1×12 in. line for heating oil. Vessels scheduled to call at this terminal should have hose derrick ready for lifting the hose as there are no facilities on the berth for this operation.

Deep draft vessels dock day or night, HW only, and undock anytime, any state of the tide.

Entering and Docking: A Docking Pilot is not compulsory but is recommended. Docking should not be attempted without local knowledge. 3 tugs are used for docking all vessels and 2 tugs are used for undocking all vessels. Tugs and Docking Master meet incoming vessels in the vicinity of Kettle Point and manoeuvre vessels to the berth. Normal mooring leads are used at this berth.

Normal docking is done port side to. The terminal does not provide a gangway.

Texaco/Curran: General: The Texaco/Curran Terminal is located 26 miles from the Sea Buoy at the Allen's Avenue Terminal.

The berth projects Easterly into the river for a distance of approximately 100 ft. and is 70 ft. wide, wooden piling, open faced construction, concrete decked for the first 800 ft. and the remainder of the dock is wooden decked.

The South side has a total of 3 wooden pilings, concrete crowned 20 ft.×20 ft. breasting dolphins, wooden fendered for a total face of 500 ft. Usable length of the berth on the South side is 650 ft. for fully loaded vessels and 700 ft. for partially loaded vessels and a controlling depth of 32 ft. MLW.

The hose rig hoist and discharge headers on the South side are located on a 60 ft.×25 ft. concrete platform 35 ft. from the extreme Eastern end of the pier, and is used by Texaco.

The North side of the dock has a turning dolphin at the extreme Eastern end of the pier, open faced wooden piling construction with a 12 in.×12 in. chafing string piece.

The North side has a usable length of 650 ft. for fully loaded vessels and 700 ft. partially loaded. A controlling depth of 32 ft. MLW. The hose rig and discharge headers are located 320 ft. from the extreme Eastern end of the pier and is used by Curran & Burton.

Vessels up to 700 ft. in length, beams of any width, drafts to 32 ft. at MLW, and 35,000 d.w.t. maximum can be accommodated at this berth. Vessels normally dock at HW, day or night, and undock at any stage of the tide. Water at this berth is brackish.

Entering and Docking: The services of Docking Master are not compulsory but are recommended. Docking should not be attempted without local knowledge. Docking Master and tugs meet the vessel about 0.5 miles below the berth and proceed to off the berth where the vessel is turned 90° and manoeuvred into the berth for a starboard side landing. 2 tugs are used for all vessels and 1 tug is used for all undockings under normal conditions. Normal mooring leads are used at this berth.

Cargoes handled at this terminal include heating oil, kerosene, gasoline, jet fuel, diesel fuel, and avgas. Sizes of cargo lines are 6 in., 8 in. and 10 in. All connections are ASA bolted connections. Maximum pumping pressure on all lines is 100 lbs.

DENSITY: 1016.

FRESH WATER: Available, rate 15 t.p.h. – 30 t.p.h.

FUEL: Bunker fuel oil available if vessel has contract. Diesel oil not available. Lubricating oils available.

REPAIRS: Minor repairs possible, machine shop available.

AIRPORT: At Green Airport, Providence, R.I.

SURVEYORS: At Rhode Island.

GENERAL: *Quay:* Granite slab construction with a wooden pile facing. A large number of the piles are missing but there are still sufficient to land on. Surface of quay looks very rough and covered in sand and earth but it is metalled under this and will take heavy mobile crawler cranes.

Ship Chandler: Satisfactory, prices reasonable.

Laundry: Satisfactory and prices reasonable. Laundry collected Saturday 1430 hrs. and returned Sunday morning.

SHIPMASTER'S REPORT: September 1982 (Updated 1990).

Documents: The same as for other U.S. ports.

Pilotage: (Serving all ports in the Narragansett Bay area).

Pilot boards near Brenton Reef Light structure. There is a 24 hour service. Cable address for Pilots is "Rispilot Providence". Pilot launch as well as their shore establishment have VHF and operate on Channels 16 and 10.

Anchorages: There are a number en-route to Providence. Our vessel anchored off Jamestown for 3 days in a well sheltered place and good holding. Max. draft allowed I was informed is about 36 ft.

Berths: There are a number of isolated tanker berths in and around Providence, details of which are found in the Sailing Directions.

A total of 6 berths comprise the Municipal Docks. There are 2 cargo storage sheds, one of recent construction. There are 2 Alliance container gantry cranes.

Fresh Water: Fresh water is laid on to the quay.

Stevedores: Normal cargo working is from 0800 hrs. – 1700 hrs. (Monday to Friday), overtime can be worked until 1900 hrs. and also weekends.

Cargo-Imports: Mainly automobiles from Japan, containers from feeder vessels, steel, lumber and general cargo from Europe by regular liner trade.

Cargo-Exports: Scrap steel, logs, timber and latterly wastepaper.

Our vessel loaded a full cargo of wastepaper (cardboard) of almost 12,000 tons. Stowage factor was 135 cu.ft./tonne. 1,400 tons were stowed on deck suitably lashed and covered. The whole cargo was loaded in 27 working days using ship's cranes. Sizes of paper bales varied immensely with weights ranging from 500 kg. to 800 kg.

Bunkers: Not available.

Repairs: Main repair facilities are at Providence (e.g. Promet Dreactor).

General: It was found difficult to bring the vessel alongside the quay at Berth No. 3 during the whole stay in port. This was due to strong water outlets on the quay face from the adjacent sewage works.

Vessel should be amply moored to compensate for strong off-shore winds which are quite common even in Summer.

SHIPMASTER'S REPORT: February 1985.

Port Limits: Entrance to Narraganset Bay, Brenton Tower.

Documents: Standard for U.S.A. Customs & Immigration. Coastwise documents are sufficient if coming from a U.S. port, no others are asked for.

Pilotage: Rhode Island Pilots, arranged via Agents, require 8 hours' notice. Board off Brenton Tower, listen VHF 16.

Anchorage: Can be obtained 1.5 miles S.E. of Brenton Tower but bottom is rock hard and holding will be doubtful in bad weather. There are allocated anchorages within Narragansett Bay.

Restrictions: Vessels can enter/leave at any time except for LNG/LPG Tankers. These must transit in/out in daylight only, whether they have cargo onboard or just cooldown 'heel' remaining. LPG Tankers are provided with a Coast Guard escort vessel, which creates a Safety Zone 2 miles ahead and 1 mile astern, keeping all other traffic clear.

Max. Size: 35 ft. draft was quoted; this vessel went in at 30 ft. comfortably.

Health: Standard U.S.A. requirements.

Radio: WCC Chatham.

VHF: All Channels used as necessary, no special allocation. "Securite" messages for LPG Tanker transit are broadcast on Channels 13 and 16.

Radar: No radar surveillance or Vessel Traffic Scheme (VTS) Control.

Tugs: Join off berth, using their own lines.

Berthing: LPG (Propane) is discharged at Municipal Wharf No. 5, with empty oil drums providing a safety area around the shore manifold, as this is a Public Wharf with free access.

Moorings were adequate, 2 headlines, 1 breast line, 2 springs forward and similar aft, the berth being a continuous quay with rubber tyre fenders.

Bridges: One vertical bridge, clearance 194 ft.

Medical: All facilities available.

Tankers: LPG discharged at No. 5. Municipal wharf at a bulk rate of 750 tonnes per hour, through a 10 in. Chicksan. This Chicksan is a mobile one connected temporarily into an underground line, and jacked up off its wheels; thus it is rather fragile and demands precise positioning during berthing, and careful control of the list during the discharge as it is at its maximum reach when a 60,000 cu.m. vessel is in ballast.

Density: Salt.

Fire Precautions: LPG Tanker, only those imposed by the ship.

Surveyors: Saybolt attended this LPG vessel on behalf of receivers.

Gangway/Deck Watchmen: None. Ship's accommodation ladder was used to the wharf.

Customs Allowances: Usual U.S.A. allowances but no check of bond made on this visit.

Repatriation: Local Airport with services to Philadelphia for International flights, or by bus – approximately 1 hour ($7.00) to Boston International.

Airport: See above.

Time: GMT minus 5 hours. Eastern Daylight Saving Time GMT minus 4 hours in the Summer.

Emergency: U.S.C.G. "Castle Hill" on Channel 16 VHF, working 22A or 12.

Telephone: At Municipal Wharf No. 5 there is a public telephone booth within 250 ft. of the foot of the gangway, against the wall of a warehouse.
Storing: No known restrictions.
Shore Leave: Bus route into town (2 miles) about 100 yards from Wharf No. 5.
Identification Cards: Standard U.S.A. Immigration requirements.
Regulations: All LNG/LPG Tankers have to anchor off Brenton Tower for U.S.C.G. inspection (2 – 3 hours), even those with valid letters of compliance and if no LOC then the inspection could take about 6 – 7 hours. During the discharge of LPG, 2 U.S.C.G. personnel are permanently stationed by the shore manifold, and do occasional spot checks onboard.
Delays: See above.

AUTHORITY: Port of Providence, Marine Terminal Building, Municipal Wharf, Providence, Rhode Island 02905. *Tel:* (401) 781-4717/8. *Contact:* John D'Artuono, Port Director.

REDWOOD CITY, California: 37.50 N. 122.28 W. **(See Plan)**

DOCUMENTS, PILOTAGE and all general information refer to "San Francisco".
RESTRICTIONS: Though a natural deep water channel extends down the bay to Redwood City there is controlled depth channel 500 ft. wide and 30 ft. deep across San Bruno Shoal. The entrance channel to the port is 2 miles long and 30 ft. deep (all depths are at MLLW) and 300 ft. to 350 ft. wide. There are 2 large turning basins at either end of the port harbour channel. See also San Francisco.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to San Francisco Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
BERTHING:
Port of Redwood City:

Berth	*Length* (ft.)	*Depth* (ft.)	*Remarks*
No. 1	500	36	General cargo and bulk cement through pneumatic pipelines.
No. 2	355	36	
No. 3	450	36	General cargo, heavy lifts and scrap metal.
No. 4 (New Berth)	450	36	General cargo USGS facility.
No. 5	500	36	Designed to accommodate large tankers, general cargo and heavy lift cargoes.
Private Facilities:			
Bell Marine	649	12	Barge unloading dock. Used for storage (not in use).
Lone Star Industries	496	18	Barge dock for loading cement. Not in use.
Lone Star Industries	20	16	Oil berth. Not in use.
Leslie Salt Co.	200	33	Elevator berth used for loading crude bulk salt.

BRIDGES: The San Mateo Hayward Highway Bridge with a vertical clearance of 141 ft. and horizontal of 500 ft. crosses the ship channel.
DEVELOPMENTS: See "Plan".
AUTHORITY: Port of Redwood City, 675 Seaport Boulevard, Redwood City, California 94063-2794. *FAX:* (415) 369-7636. *Contact:* Floyd Shelton, Executive Director.

RICHMOND, California: 37.56 N. 122.25 W. **(See Plan)**

(A) CHEVRON, U.S.A.
(B) OTHER TERMINALS AT RICHMOND.

(A) *CHEVRON, U.S.A.*

LOCATION: Richmond Long Wharf and Point Orient Wharf are situated on N.E. side of San Francisco Bay, a protected harbour. The refinery and storage tanks are near the wharves.

The exact position of the Long Wharf is Lat. 37° 55′ 20″ N., Long. 122° 24′ 35″ W. Wharf heading is 324° to 144°.

The exact position of the Point Orient Wharf is Lat. 37° 57′ 20″ N., Long. 122° 25′ 39″ W. Wharf heading is 356° to 176°.

There is adequate anchorage and room for manoeuvring in the bay.
DOCUMENTS and all general information, refer to "San Francisco".

DOCUMENTS: To clear vessel for entry, the Custom House requires the following documents:
Last Foreign Port Clearance.
Vessel's Register.
Vessel's Tonnage Tax Receipts.
Master's Oath of Entry.
Certificate of Financial Responsibility.
General Declaration.
If vessel is arriving from (or departing for) a foreign port, Master must also furnish:
6 copies Crew List.
3 copies Stores List.
3 copies Passenger List.
3 copies Curio List.
4 copies Cargo Manifest.
The Boarding Inspectors may require additional information.

PILOTAGE: Federal and/or State Regulations require licensed pilotage in and out of San Francisco Bay. Make arrangements for this ahead of time with the Ship's Agent.

Pilots may be picked up near the Light Buoy, 9 miles W.S.W. of the entrance to San Francisco Bay: Lat. 37° 45.0′ N., Long. 122° 41.5′ W.

To signal for Pilots:
In Fog – Approach, San Francisco approach Lighted Horn Buoy "SF", lay to, and blow four long blasts.
When Clear – By day, hoist International Code Flag "G".
By night, make four long flashes on signal light.

When necessary, Pilots may be contacted on 2182 kHz or VHF Channels 10 (156.5 MHz) and 16 (156.8 MHz). The Pilot boats may also be contacted by radio telephone.

The Pilot will serve as the Mooring Master until the ship is berthed.

If vessel goes to anchorage, a licensed Bay Pilot will be required before vessel can proceed to berths.

MAX. SIZE: The main ship channel into San Francisco has a project depth of 50 ft. However, the 35 ft. depth of the Southampton Shoal channel restricts the size of ships to wharves.

LIGHTENING: When a lightening operation is necessary the terminal management will direct the ship to Anchorage No. 9. The ship to be lightened will install fenders before the lighter ties alongside. The terminal will provide the fenders. The lightening Supervisor and ship's officer will hold a meeting to discuss the cargo transfer. During transfer, follow the same precautions and safety regulations that apply to cargo transfer at the wharf. The transfer rate will be regulated by the lightening vessel. The lightening Supervisor will observe all the lightening operations. The terminal will provide oil spill recovery equipment during lightening.

HEALTH: See "Health: All Ports" before first U.S.A port (Albany). Illness Reports made to San Francisco Quarantine Station.
Quarantine and Pratique: Vessels are not required to pass a quarantine inspection. It is necessary that vessels notify their Agents at least 2 days in advance of arrival in San Francisco Bay if sickness or disease is on board. The Agent shall notify Public Health for further action if necessary.

All vessels arriving from foreign ports will require clearance by the following U.S. Government Agencies: Customs House, Immigration Service, Department of Agriculture.

The vessel's Agent should make arrangements for the inspectors to board dockside or at anchorage.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO/VHF: The official language of the terminal is English. Therefore, vessel must have personnel on duty at all times who can communicate in English with the wharf personnel.

San Francisco Harbour Advisory Radar System, designated bridge-to-bridge frequency: VHF Channel 13 (156.65 MHz).

Federal Communication Regulations require that at any time VHF radio is in operation, Channel 16 must be monitored (156.8 MHz distress and calling frequency).

The U.S. Coast Guard requires all vessels anchored in San Francisco Bay to maintain a radio listening watch on VHF-FM Channel 13 (156.65 MHz) when the wind is 20 knots or greater. Any ship not equipped with Channel 13 shall maintain the listening watch on Channel 16 (156.8 MHz).

The 2-3 MHz radio telephone call letters for the San Francisco Bay area are KLH.

Richmond Long Wharf (radio call KCE 373 – Chevron Shipping) is equipped with VHF radio, manned 24 hours per day. Channel 10 (156.5 MHz) is the operating frequency. While at anchor, in San Francisco Bay, vessels should maintain normal listening watches on VHF Channel 10.
ETA Requirements:

The Master of a vessel bound for San Francisco Bay is requested to advise Chevron Shipping (Cables address: Chevronship Richmond Sanfrancisco) of ETA, 7 days, 3 days and again 1 day (24 hours) before arrival at the wharf. First ETA message should include:
Estimated time of arrival at the wharf (local time).
Last port of call.
Estimated deep draft on arrival.
Quantity of ballast to be discharged.
Quantity and grade of cargo to be transferred.
Distance from bow to cargo and bunker manifolds.
Size and type of cargo and bunker connections.
Quantity and grade of bunkers and lubes required.
Quantity of fresh water required.
Number of crew replacements expected.
Amount of provisions and stores to be loaded.
Repair work anticipated.
Make 24 hour ETA as accurate as possible and whenever arrival time changes, by 1 hour or more, send a correcting message promptly.

BERTHING: At least 1 hour before docking contact Chevron Shipping, in Richmond, by VHF radio (Channel 10, 156.5 MHz) and request a berth assignment. They will try to berth vessel as soon as it arrives. However, if no berth is available, anchor in the prescribed anchorage (as directed by the Captain of the Port) and maintain radio contact with Chevron Shipping, Richmond.

Recommended Docking Practices: The terminal require the use of adequately powered tugboats when docking at the wharves. Chevron Shipping Company has two tugs that can be hired, provided arrangements are made prior to vessel's arrival.

(a) In order to ensure maximum safety while berthing and unberthing ships at Long Wharf and Point Orient Wharf, the following minimum tug assistance is required:

Vessel Size	*No. of Tugs*	*Minimum Total Horsepower Required Mooring*	*Unmooring*
Up to 20,000 d.w.t.	1 or more	1,000 h.p.	1,000 h.p.
20,001 to 50,000 d.w.t.	2 or more	2,000 h.p.	1,500 h.p.
50,001 to 80,000 d.w.t.	2 or more	3,000 h.p.	2,000 h.p.
80,001 to 100,000 d.w.t.	2 or more	3,500 h.p.	2,500 h.p.
Over 100,000 d.w.t.	2 or more	4,000 h.p.	3,000 h.p.

(b) Bow thrusters are acceptable provided the horse power rating equals or exceeds the minimum requirements.

(c) Always stem the tide when docking.

(d) If possible, avoid steep-angle approaches.

(e) In view of the strong tidal currents at both wharves, make sure vessel is moored securely. Check on the number of lines and their strength. Pay special attention to the fore and aft leads.

Gangway: Rig gangway properly and safely, with handrails and adequate illumination, suspend a safety net under gangway. If vessel does not have a gangway, the pier has some available in limited sizes. However, the Company cannot be liable for the manner in which the ship's crew rigs the gangway. Berths 1 and 4 have permanent gangways installed.

There are 2 piers that accommodate oil transfers. They are referred to as Richmond Long Wharf and Point Orient Wharf.

Long Wharf: Richmond Long Wharf, a "T"-head pier, has an overall length of 3,396 ft. It consists of concrete and wooden piles and a concrete superstructure connected to the shore, 4,200 ft. away by a piled causeway. The fender-to-fender width is 132.5 ft.

Berths 1, 2 and 3 deck level is 15.5 ft. above MLLW. Berth No. 4 deck level is 25 ft. above MLLW.

There are four deep water berths on the West side. Berth No. 1 is 950 ft. long, Berth No. 2 is 650 ft. long, Berth No. 3 is 700 ft. long and Berth No. 4 is 1,050 ft. long. They are numbered 1 through 4 from South to North. Water depth is maintained at 38 ft. at MLLW. There are two inner Berths No. 9 and No. 11 that are used primarily for barge loading or discharging. Water depth is maintained at 18 ft. at MLLW.

Point Orient: The Point Orient Wharf, an "L"-head pier, is 2.25 miles North of the Long Wharf. It is 504 ft. long and 60 ft. wide. It is supported on wooden piles and has a causeway that extends 1,200 ft. to the shore.

There is one ship berth, No. 1 where the water depth is 32 ft. at MLLW. There is also one barge berth No.2. Deck level is 14.5 ft. above MLLW.

LOADING AND UNLOADING: Berth No. 2 is fitted with 4 in., 6 in. and 8 in. hoses for cargo transfer. Berth No. 1 has two 12 in. and two 16 in. Chicksan loading arms. Berths No. 3 has two 8 in. and four 12 in. Berth No. 4 has two 12 in. and four 16 in. arms.

NOTE: All terminal flange facings are carbon steel ANSI 150 lbs. rating.

No cast iron is allowed outside of (and including) the first valve on the vessel's cargo or bunker system.

Berth vessel so that its manifold is positioned within the horizontal and vertical limits of the hoses or Chicksan arms.

Cargo Transfer:

(a) Pre-Transfer Declaration of Inspection – Before cargo transfer begins, the Wharfmaster and Vessel Co-Ordinator will board vessel. They will discuss the safe transferral of your cargo. They will also review the Declaration of Inspection and sign it with you when all items are understood and agreed upon.

(b) Inspection During Cargo Transfer – These representatives will also visit the ship during cargo transfer. With the approval of Deck Watch, they will check to ensure that safe working practices are being observed by both ship and wharf.

(c) Minimum Cargo-Handling Crew – When transferring cargo or ballast, the officer in charge of cargo transfer must have at least two assistants: one to maintain watch on the open-deck cargo transfer manifolds; the other to assist in handling valves, tank gauging, or shutdowns of transfer pumps in case of emergency. Other crew members may be needed depending on the size and complexity of ship transfer system. These requirements will be developed at the pre-cargo-transfer conference. When loading ship's bunkers and lubes, the Master and Chief Engineer will assure the terminal that this transfer will be handled in a similar manner.

Loading Rates: Several products can be loaded at each berth. Loading rates depend on a multitude of situations. These will be discussed at the pre-cargo-transfer conference.

Unloading Rates: Unloading rates also depend on many things – vessel's pumps, the size and availability of terminal lines and tanks, refinery operations, etc. The pre-cargo-transfer conference will develop the estimated unloading and deballasting rates and procedures.

To expedite cargo transfer, it may be necessary to use booster pumps. To eliminate hazards to this equipment, notify the Berth Operator 15 minutes ahead of time whenever you are going to: Stop or change any cargo transfer rate, strip any tanks, switch tanks.

Maximum Temperature and Pressure Limits: The terminal cargo-handling system is designed to comply with the 150 lbs. ANSI flange rating. For example: 275 psig at 100°F, 240 psig at 200°F, etc. Special restrictions apply for aromatic and other hazardous stocks. These will be explained during the pre-cargo-transfer conference.

Tank Gauges: To ensure proper handling of each cargo, the termina requires U.S. flag company vessels to be gauged every *two* hours ar matched with shore-tank gauges. Non-company vessels are not require to gauge, but may wish to compare their gauges against the sho gauges. Transfer operations will shut down immediately if:

— the transfer rate is over 1,000 b.p.h. and there is a discrepancy i the tank's gauges that amounts to more than 20% of that transfer ra

OR

— the transfer rate is under 1,000 b.p.h. and there is a discrepanc in the tank's gauges that amounts to more than 30% of that transfe rate.

For example: Vessel arrived with 120,000 bbls. of crude. First 2 hou gauge at 1000 hrs. Estimated rate 7,000 b.p.h.

	Ship	*Shore*	*Difference*
1000 hrs.	14,241	13,996	245
1200 hrs.	28,435	25,643	2,792

As the estimated transfer rate is 7,000 b.p.h., the allowable differenc would be 1,400 bbls. The 245 bbls. difference at 1000 hrs. is OK ar transfer should continue. The 1200 hrs. gauge of 2,792 bbls. differenc is out of tolerance and the transfer should be discontinued un discrepancy can be resolved.

BALLAST: Ballast facilities at Richmond Long Wharf only (max. capaci 25,000 bbls. – normal capacity 15,000 bbls.). None available at Poi Orient. However, arrangements for this to be made through Agent befor arriving at the wharf. All ballast to be discharged must be pumped t shore while berthed at wharves.

POLLUTION: The Federal Water Pollution Control Act prohibits th discharge of oil or oily waste in the waters of San Francisco Bay whic causes a film or sheen on the water or discolours it or causes a sludg or emulsion beneath the surface of the water.

Regulations enforced by the Bay Area Pollution Control District als prohibit the emission of smoke and soot. Vessel can be fined if it emi visible smoke (Ringelmann 1) for more than 3 minutes in one hour, o blows its boiler tubes enough to create a soot nuisance on shore.

In addition, the terminal has certain regulations designed to elimina obnoxious odours. Vessel may, therefore, be required to follow specia procedures before tank cleaning, loading or ballasting. If, in spite o precautions, vessel does cause such odours, loading or unloadin operations may be stopped.

OIL INSPECTIONS: To control product quality, the terminal has severa requirements for sampling and gauging the oil as it is being transferred. These requirements will be explained during pre-cargo transfe conferences. Outside inspection service is provided by the followin independent companies:

Charles Martin & Company, 488 Wright Avenue, Richmond, Californ 94802. Tel. (415) 232-5270.

E. W. Saybolt Company, 889 Ensenada Avenue, Berkeley, Californ 94710. Tel. (415) 525-0417.

Caleb Brett U.S.A. Inc., P.O.Box 673, Station A, 310 29th Stree Richmond, California 94808. Tel: (415) 236-1733. Telex: 171-330.

S. G. S. Control Services Inc., 2917 MacDonald Avenue, Richmond California 94804. Tel: (415) 236-3007.

MEDICAL: No facilities at wharves. Local ambulance may be reache at: Cadillac Ambulance Service (415) 234-3242; Alhambra Air-groun Ambulance Service (air) (415) 228-1096; California Aviation Service In (air) (415) 569-3855.

FRESH WATER: Potable water available. Arrange through Agent.

FUEL: Many grades of bunkers, diesel and lubricating oils are availab in bulk or drum quantities. Agents order them from Supply an Distribution or Chevron International at least 48 hours before vesse arrives, otherwise, vessel may be delayed.

To take on bunkers and diesel, vessels must be able to connect t terminal's 4 in., 6 in. and 8 in. hoses in Berth 2, connect to 8 in. Chicksa in Berth 3, to 12 in. Chicksans in Berths 1 and 4.

PROVISIONS: Provisions and stores are available through ship's Agen However, they will be loaded only at the Richmond Long Wharf, an only when the loading does not interfere with cargo or ballast transfe No hydrocarbons, paints, detergents or other polluting materials will b allowed to go aboard the vessel by means of slings or cargo nets. If th vessel is large and is not equipped with booms, the Agent may need t supply a spark-proof crane for the loading. Stores will not be handle by wharf personnel. Contact Wharf Master for weight restriction o equipment on the wharf.

REPAIRS: There are many major repair facilities located in th San Francisco Bay Area. The Agent can probably make arrangemen for use of their services.

Repairs at the terminals are not normally permitted on non-compa vessels, unless it is absolutely necessary in order to move the vesse Any repair work that would necessitate hot work must have approv from refinery management. No repairs will be allowed that would dela cargo transfer or lengthen the transfer time.

REPATRIATION: Facilities exist for repatriating of crew by sea or a Make the arrangements through ship's Agent, and notify the termina management.

TIME: Local time: Pacific Standard Time GMT minus 8 hours or Zon plus 8 hours.

(Note: From the first Sunday in April to the last Sunday in Octobe this is modified by use of Daylight Time to GMT minus 7 hours or Zon plus 7 hours)

All communications should refer to local time.

STORING: See "Prelims".

1. Vessels cannot be stored by barge while at docks; however, th can be stored by small trucks.
2. Storing by truck requires the truck to be cleared by operations an towed into location. No paint or hydrocarbon may be lifted by n over local waters. This is described in the "Provisions".
3. Trucks can come alongside vessel (within 50 ft. of vessel).
4. There are no forklifts available at the terminal and the rental of on requires the rental of a "spark approved" forklift. Arrangemen must be made with the Wharf Master.

5. All customs rules and regulations are enforced.
6. Local riggers can be employed to help get stores aboard vessel, but the vessel must make arrangements with ships Agents, and all storing of vessels must be approved by Wharf Master.

Also see "Provisions".

SHORE LEAVE: Chevron Shipping Co. provides bus service from the Long Wharf to shore and from there ship's personnel can connect with local taxi or bus service nearby. For transit – system information, call (415) 232-5665.

No ship's commercial passengers are ever allowed to board or leave a ship at the wharves.

GENERAL:

Tides and Currents: The maximum tidal range is approximately 9 ft. and the mean range is 4.2 ft.

Tidal currents in the wharf area can be very strong. They generally run in a North'ly and South'ly direction.

Winds: Winds of varying strength may come from any quarter. The normal wind, however, is from the N.W. in Summer, and S.W. in Winter.

Visibility: The visibility in this area of San Francisco Bay is generally fair to excellent, with occasional late evening fog in the Summer lasting until noon the following day. In the Winter, morning or tule fogs frequently occur. The Winter fogs are generally more dense than those of Summer.

Weather: The local weather is usually moderate, with average temperatures ranging between 40°F and 85°F.

The U.S. Coast Guard radio stations make scheduled weather broadcasts (preceded by a preliminary call on 500 kHz and 2182 kHz) at the times and on frequencies shown below:

Radio Telegraph – NMC San Francisco, Calif. 420 kHz, 2000 hrs. and 0900 hrs. PST.

Radio Telephone – NMC San Francisco, Calif. 2670 kHz, 1800 hrs. and 0600 hrs. PST.

VHF Radio – KHB 49 San Francisco, California 162.55 MHz.

Navigation: Master is required to notify the U.S. Coast Guard Captain of the Port at least 24 hours before arriving in the Bay. Master will satisfy this requirement automatically if he reports in accordance with the U.S. Coast Guard's voluntary Automated Merchant Vessel Report (AMVER) System.

On entering the Bay, follow the traffic-separation scheme shown on United States Coast and Geodetic Survey Chart 5072.

Charts and Publications: The following official charts and publications are recommended for use when entering San Francisco Bay:

United States Coast & Geodetic Survey Charts:
- No. 5002 – San Diego to Point St. George.
- No. 5072 – Gulf of the Farallones.
- No. 5532 – San Francisco Entrance.

West Coast of North and South America Tide Tables, published by U.S. Coast and Geodetic Survey.

Tidal Current Charts – San Francisco Bay, published by U.S. Coast and Geodetic Survey.

Coastal Pilot No. 7 for West Coast of United States, published by U.S. Coastal and Geodetic Survey.

U.S. Coast Guard Regulations 33 CFR 154, 155 and 156, published by U.S. Coast Guard.

Current Edition of Operating Manual, S.F. Harbor Advisory Radar, published by U.S. Coast Guard.

Light Lists for United States and Possessions, published by U.S. Coast Guard.

Radio Navigational Aid, Pacific and Indian Oceans (Publication No. 117113), published by U.S. Hydrographic Office.

Wharf Communication: The Richmond Wharves are equipped with a positive and dedicated ship-to-terminal radio communication system. On arrival, vessel will be provided with one radio (walkie-talkie). It must be with an English-speaking person on duty at all times. Vessel will be instructed in the proper use of this radio during the pre-cargo transfer conference. If the radio is not returned, a charge of $2,500 will be levied.

Telephone: A telephone will be placed on the open deck of the ship near the gangway. It is to be used for the local calls only. the following is a partial list of commonly used numbers:

Wharf Master	4388
Vessel Co-Ordinator	4620
Head Operator (PAD) Long Wharf	4494
Terminal Superintendent	2314

There are two public telephones on the Long Wharf for outside calls, one between Berths 1 and 2 and one at Berth 3. There is also a public telephone at Point Orient Wharf.

1. Boiler–tube Blowing — Do not blow boiler tubes and take every precaution to prevent sparks from escaping from the funnel. If vessel safety is at stake, stop transfer operations and move the ship to anchorage before blowing the tubes. In case vessel has boiler trouble, notify Chevron Shipping Co. who in turn will notify the Air Pollution District Control.
2. Cargo Tank Tops:
   (a) Before berthing, all tank tops, ullage plugs, and gauge tapes must be closed and dogged down unless the Master certifies that the tanks are gas free.
   (b) Cargo and bunker tank tops must be kept closed. This also applies to permanent ballast tanks.
3. Cargo Connections, Unused – blank unused cargo and bunker connections. A proper-sized bolt in *every other hole* is the minimum requirement. Offshore risers on systems being used are to be fully bolted.
4. Engines – Keep the engines ready and the vessel trimmed so it can leave the piers under short notice. If the vessel becomes unable to get underway 2 tugs of adequate size will be standing by at all times.
5. Fire Fighting – Keep fire and emergency equipment in readiness. At least 2 fire hoses to be uncoiled and laid out at the vessel's manifold area. Place two portable fire extinguishers near the manifold.
6. Gas Venting:
   (a) Ullage Holes – Keep all ullage or gauge tapes completely closed (not secured) except for intermittent periods needed to ullage or gauge ship's tanks.
   (b) Flame Screens – When open, all ullage ports must be protected by clean, well-fitted flame arrestors of wire-gauge screens: these must be of an approved type and have no defects.
7. Gas Freeing and Tank Cleaning – Do not gas-free or clean any tanks at berth without prior approval of terminal management.
8. Gangways – Tend the gangway and keep it safely rigged, secured and lighted.
9. Mooring Lines – Tend mooring lines to keep them taut and keep the vessel in position. See that tension winches are on manual brake. During ebb tide and East winds, when the ship has a tendency to drift away from the pier, tend the mooring lines with special care.
10. Portholes – Portholes and passageway hatches facing the cargo transfer area must remain closed. Portholes facing the wharf must also remain closed or be suitably screened.
11. Repairs – While at berth, do not perform any repair work, hot work, or maintenance work without prior approval from the terminal management. Hot work will require *written* approval by terminal management.
12. Radio – At all times in port, keep the radio transmitter and aerials switched off and grounded. Portable radios (walkie-talkies) that are certified intrinsically safe may be used.
13. Sea Suctions and Bilge Valves – See that all ship's sea, bilge, and overboard discharge valves connected to the cargo system are tightly closed, lashed and sealed in accordance with U.S. Coast Guard Regulation 33 CFR 155.

    The seals are *not* to be broken while berthed except in the presence of the Vessel Co-Ordinator or in case of emergency.
14. Sewage Discharge – Install deflection plate over the sewage discharge if it is capable of discharging on the wharf.
15. Smoking – Allow smoking on board only in places which the Master has personally approved. There is to be NO SMOKING ON THE WHARF OR WEATHER DECK OF THE VESSEL AT ANY TIME.
16. Stern Discharge Line – Keep the stern discharge line, if any, blanked at all times.
17. Towing Wires – Keep the towing wires (fire wires) for emergency use, lowered to the water's edge from the offshore bow and stern. Tend them to keep the "eye" near the water's edge, where they can be reached by tugs in case of emergency.

B. Cargo Transfer – Observe the following additional regulations DURING CARGO TRANSFER:

1. Air Intakes and Air Conditioning Units – Close any central air-conditioning or fresh-air intakes which might take in gas. Close all intakes within a combined total of 100 ft. vertically and horizontally of cargo tank openings and venting points. External window-type air-conditioning units that face the cargo transfer area must be kept disconnected.
2. Communication – Ship/Shore – Station a responsible member of the crew on the loading deck by the transfer connections to maintain communications or remain in visual contact with the Berth Operator. He is to advise the Operator when changes in rates are required, using radio pack sets or voice contact.
3. Passageway hatches to open weather decks facing the cargo area and wharf must be kept secured except for momentary passage.
4. Electric Lights and Cables – Use only vapour-proof electric lights of an approved type, on the open deck. Disconnect portable electrical equipment on the open deck unless certified for use in hazardous areas.
5. Galley Fires – Light no galley fires unless you can first assure the terminal that they present no hazard to the cargo transfer.
6. Hand Torches (Flashlights) – See that hand torches used during cargo transfer are of an approved type, certified as safe in hazardous locations.
7. Hoses:
   (a) Before transfer, inspect cargo-loading hoses or arms to see that they are in good condition, *fully bolted,* and properly connected.
   (b) The hoses must be supported at not more than 12 ft. intervals with a bridle or mat to minimise kinks or chafing. They must not be bent to a radius less than 12 times their diameter. Do not use single slings when taking aboard or supporting during transfer.
   (c) The hose or arm-to-riser connections must have drip pans of adequate size installed under them.
   (d) When cargo transfer has concluded, each hose/arm is to be drained via the drain valve and blank-flanged *before* being removed from the vessel. The Terminal Head Operator is to be aboard the vessel to oversee the connecting and disconnecting of the loading arms and, also, to alert crew members when passing the arms.
8. Scuppers – All deck scuppers must be plugged and cemented oil tight or sealed with a Coast Guard approved device. Do not remove the plugs until ship has departed, except when necessary to drain off rain water. In such cases, supervise the draining closely and replace the plugs immediately. Install splash boards (on dock side) over scuppers. Cement is to be supplied by the ship.

9. Special Stock Hazards:

(a) Static-Ignition Hazards – Some kinds of stock require special precautions because of the static they accumulate. Their handling will also be fully discussed during pre-cargo transfer inspection. Lube oils may be loaded through ship's risers or connections to butterworth plates. No overall loading is permitted.

(b) Hydrogen-Sulfide Hazards – Some kinds of crude may contain dissolved hydrogen-sulfide or mercaptans in concentrations which would cause the gases vented during tanker ballasting to be hazardous or odorous. Do not ballast or load into cargo tanks that might contain H_2S or mercaptan vapours, unless the tanks have been passed for loading by the Wharfmaster. The vessel must proceed to sea for clean-up prior to loadback if the Wharfmaster deems the tanks unsuitable for loadback.

(c) Aromatic-Stock Hazards – Special precautions are required for toxic cargoes such as aromatics. It is recommended that Masters review the instructions by Owners/Charterers about toxic chemical hazards.

10. Valve Shut-off – Many new tankers have motor-operated valves, operated from a central location. Never operate these valves to close off against full oil-delivery rates unless the valve closure action takes at least 60 secs. Closure times less than 60 secs. may result in surge and hammer of sufficient force to rupture the loading arm/hoses.

11. Ventilators – Keep ventilators suitably trimmed with regard to tank vents and prevailing wind conditions to prevent entry of flammable vapours.

AUTHORITY: Chevron, U.S.A., Richmond, California.

(B) OTHER TERMINALS AT RICHMOND

BERTHING: *Levin-Richmond Bulk Commodity Wharf:*

Owners: Levin-Richmond Terminal Co.

Operated by: Levin-Richmond Terminal Co.

Use: Receipt and shipment of various dry-bulk commodities and scrap metal.

Water Depth: 35 ft. – 36 ft.

Mechanical handling facilities: On wharf; 4×50 ton electric, travelling full portal gantry cranes, each with 100 ft. boom and 2×45 ton electric travelling full portal gantry cranes, each with 118 ft. boom.

Dimensions: Length of face 600 ft.

Remarks: 50,000 sq.ft. warehouse. Railroad on premises.

Santa Fe Sugar Dock:

Owned and operated by: Atchison, Topeka and Santa Fe Railway Co.

Use: Presently not in operation, but the railroad should be contacted for further use.

Dimensions: Length of face 545 ft., lower end 51 ft.; depth alongside at MLLW 24 ft.

Richmond Terminal No. 3:

Owners: City of Richmond.

Operated by: California Stevedore and Ballast Co.

Use: Receipt and shipment of containerised and breakbulk cargoes in all trades.

Dimensions: Length of face 1,009 ft.; depth alongside at MLLW 41 ft.

Mechanical handling facilities: Two rail-mounted dock cranes and two transtainers, two transfer devices and two bridge cranes. Semi-automated operation.

Remarks: Area of container terminal – 16 acres plus a 40,000 sq.ft. enclosed warehouse.

Richmond Terminal No. 4 Wharf:

Owners: City of Richmond.

Operated by: Richmond Terminal Agency for Modesto Tallow Co., Paktank Corp. and Pacific Molasses Co., Ltd.

Use: Bulk Liquids.

Dimensions: Length of face 1,047 ft.; South side 175 ft.; North side 100 ft.; depth alongside at MLLW 32 ft. – 50 ft.

Richmond Terminal No. 5:

Owner: City of Richmond.

Use: Available for tug, barge and vessel lay-ups.

Dimensions: Two finger piers, each 550 ft. long; Pier No. 1, East side-depth 13 ft. and West side-depth 30 ft. Pier No. 2 East side-depth 16 ft. and West side-depth 12 ft., and is leased to Marin Tug & Barge Co. (Pier No. 2 only).

Pt. Potrero Marine Terminal – Terminal No. 7:

Owner: City of Richmond.

Operated by: Pasha Maritime Services.

Use: Import service and delivery of foreign automobiles.

Dimensions: Length of face 1,615 ft.; depth alongside at MLLW 35 ft.; usable berthing space with dolphin 900 ft.

Mechanical handling facilities: Mobile handling equipment available.

Richmond Terminal No. 6:

Owner: City of Richmond.

Operated by: Various Lessees.

Use: Five shipyard basins available for lay-berthing, fleet mooring, lay-up and project consideration.

Dimensions: No. 1, 4 and 5: 575 ft.×100 ft., 84 ft. gate. – Depth 15 ft. MLLW.
No. 2: 748 ft.×100 ft., 84 ft. gate. – Depth 26 ft. MLLW.
No. 3: 587 ft.×100 ft., 84 ft. gate. – Depth 26 ft. MLLW.

TANKERS: *Atlantic Richfield Tanker Dock:*

Owned and operated by: Atlantic Richfield Co.

Use: Receipt and occasional shipment of petroleum produc bunkering vessels.

Dimensions: Length of face approx. 250 ft.; lower and upper sid 40 ft. each; depth alongside at MLLW 35 ft.

Atlantic Richfield Barge Dock:

Owned and operated by: Atlantic Richfield Co.

Use: Receipt and shipment of petroleum products by barge; bunkeri vessels.

Dimensions: Length of face 150 ft.; depth alongside at MLLW 34 f

Richmond Terminal No. 1 Wharf:

Owners: City of Richmond.

Operated by: Petromark Inc.

Use: Receipt and shipment of petroleum products, chemicals a petrochemicals.

Dimensions: Length of face 557 ft.; depth alongside at MLLW 35 f

Richmond Terminal No. 2 Liquid Cargo Wharf:

Owners: City of Richmond.

Operated by: Richmond Terminal Agency for California Oils Co.

Use: Receipt and shipment of vegetable oils, chemicals a petrochemicals.

Dimensions: Berthing length 720 ft.; depth alongside at MLLW 35 f

Texaco Wharf:

Owners: Texaco Inc.

Operated by: Texaco Inc.

Use: Receipt and shipment of petroleum products.

Number of Berths: One.

Water Depth: 35 ft.

Dimensions: Length of face 600 ft.

Time Oil Company Wharf:

Owned and operated by: Time Oil Co.

Use: Receipt and shipment of petroleum products.

Number of Berths: One.

Water Depth: 35 ft.

Special Remarks: 3×10 in. pipe-lines extend to 25 steel storage tan in rear; total capacity of 618,000 barrels.

Union Oil Co. Tanker Dock:

Owned and operated by: Union Oil Co. of California (also servic Unitank).

Use: Receipt and occasional shipment of petroleum produc bunkering vessels.

Dimensions: Length of face 225 ft.; lower end 45 ft.; upper end 45 f depth alongside at MLLW 35 ft.

Mechanical Handling Facilities: Hose handling at wharf is by shi gear and small tractor crane.

Union Oil Co. Barge Dock:

Owned and operated by: Union Oil Company of California.

Use: Shipment and occasional receipt of petroleum produc bunkering vessels.

Dimensions: Length of face 150 ft. (approx.); lower end 45 ft.; dep alongside at MLLW 35 ft.

Mechanical Handling Facilities: Hose handling at wharf is by shi gear and small tractor crane.

Remarks: Wharf and Tanker Docks are spaced about 230 ft. apa together they provide 1 large tanker berth.

SURVEYORS: Surveyors are available from various San Francisco Ba Area companies and organisations.

EMERGENCY CO-ORDINATION CENTRE: The Emergency C ordination Center for the Port of Richmond is the U.S. Coast Gua San Francisco, California. CA. Tel: (415) 556-2103.

BANKS:

Bank of America, Richmond Main Office, 261 Harbour Way Sou Richmond, California. Tel: 415-231-1729. Telex: TWX (San Francis 910 372 7720.

Central Bank, Civic Center Office, 2705 Macdonald Aven Richmond, California. Tel: 415-233-5710. Telex: TWX (Oakland) TL 17-1329.

Crocker National Bank, 3900 Macdonald Avenue, Richmon California. Tel: 415-235-6458.

The Mechanics Bank, Civic Center Office, 22nd and Macdona Avenue, Richmond, California. Tel: 415-222-0340. Telex: TWX 910 3 8167.

Wells Fargo Bank, 1221 Macdonald Avenue, Richmond, Californ Tel: 415-232-3435. Telex: TLX 34-0284 (San Francisco-International

STORING: See "Prelims".

2. Yes.
3. Yes.
4. Yes.
5. Normal U.S. Customs Regulations apply.
6. Yes.

AUTHORITY: City of Richmond, Port of Richmond, 2600 Barr Avenue, P.O.Box 4046, Richmond, California 94804. *Tel:* (415) 62 6784. *FAX:* (415) 620-6716. *Contact:* Michael R.Powers, Port Direc

RICHMOND, Virginia: 37.32 N. 77.25 W. (See Plan)

LOCATION: On the James River, 90 miles from Chesapeake Bay.
DOCUMENTS: See "Hampton Roads".
CERTIFICATES:
Ship's Register.
Load-line Certificate.
Safety Certificate.
Tonnage tax receipts.
Certificate of nationality.
Passenger Certificate.
PILOTAGE: Entrance through Hampton Roads. Virginia Pilots Assn. original contact same as for Norfolk, Virginia. Pilots will arrange for change of Pilots to proceed up the James River.
ANCHORAGE: Hampton Roads Anchorage, also river anchorage approximately 40 miles up river, shown as "Upper Brandon" on charts.
RESTRICTIONS: Navigation of river above Upper Brandon recommended in daylight hours, except vessels under 250 ft. length.

Standard operations for vessels destined to Richmond: Earliest departure from Newport News 5.5 hours prior to sunrise; latest departure from Newport News 7 hours before sunset.

From Richmond to sea: Earliest departure from Richmond 30 minutes before sunrise; latest departure from Richmond 2.5 hours before sunset.
MAX. SIZE: Max. length recommended by Pilots 559 ft., draft 21 ft. 6 in. on any tide, depth of channel 25 ft. MLW tide, change 3 ft. 5 in.
HEALTH: See "Health: All ports" before first U.S.A. port (Albany). Illness Reports made to New York Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: See "Hampton Roads".
TUGS: Not needed for berthing unless vessel is to be turned around. Tug available from Blaha Towing, Inc. on reasonable notice.
BERTHING: Vessels berth alongside wharf 1,200 ft. long. Depth 25 ft. at MLW.

Turning Basin: 585 ft. at widest point, 1,600 ft. length.
CRANES: 2 Manitowic 4100W Series Two 230 ton capacity cranes.
BRIDGES: 2 bridges across river between Hampton Roads and Richmond. No specific time or notice required. Air draft 145 ft.
STEVEDORES: Arrangements to be made through Agents. 48 hours notice requested.
MEDICAL: Vessels cleared by U.S. Health Officials at Hampton Roads before proceeding up river.
DENSITY: 1000.
FRESH WATER: Available at pier.
FUEL: Bunkers available from Ocean Shipping Services, Richmond.
CONSULS: No consuls in Richmond, handled through Hampton Roads or Washington, D.C. if needed.
REPAIRS: Only minor repairs, no shipyards.
GANGWAY/DECK WATCHMEN: None required, unless crew detained by U.S. Immigration.
OPENING/CLOSING HATCHES: On bulk vessels, usually opened and closed by ship's crew, also steel hatches handled by ship's crew, sometimes determined by terms of Charter.
CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes (1 carton for 2/3 days) if further allowance is needed Customs Officer will return on request of Master. Wine and Spirit, 1 bottle per officer, Customs Officer will return on request of Master.
REPATRIATION: Handled through Norfolk, Virginia.
AIRPORT: Approximately 10 miles from port, regular airline service.
TIME: Eastern Standard Time, GMT minus 5 hours. Daylight saving time from first Sunday in April to last Sunday in October.
HOLIDAYS: January 1st, January 15th (Martin Luther King Day), Good Friday, May 30th, July 4th, Labour Day (1st Monday in September), Thanksgiving Day, Christmas Day.
POLICE/AMBULANCE/FIRE: Police Tel: 780-9461; Ambulance Tel: 780-9404; Fire Tel: 780-9191.
TELEPHONES: No arrangements for placing aboard vessels.
SHORE LEAVE: Allowed. Proper papers should be available.
IDENTIFICATION CARDS: Immigration landing permit required.
AUTHORITY: Port of Richmond.
Operator: Meehan Overseas Terminal Inc., 5000 Deepwater Terminal Road, Richmond, Virginia 23234. *Tel:* (804) 743-7678, 275-9248.

RIVERHEAD, Long Is., New York: 41.00 N. 72.39 W. (See Plan)

LOCATION: The fixed Offshore Tanker Berth is situated 1.2 miles offshore from the North shore of Long Island in Long Island Sound, 4 miles 257° True from the beacon on Mattituck Inlet Breakwater and 12.7 miles 178.5° True from Falkner Island Lighthouse. The geographical position of the centre point of the Operating Platform is in Lat. 41° 00' 01" N., Long. 72° 38' 50" W. The platform has 4 navigation lights situated on each corner of the structure flashing every second. A similar navigation light is also situated on each of the East and West mooring dolphins.
DOCUMENTS: See "New York".
Terminal will provide "Declaration of Inspection" Form which must be completed before cargo transfer begins.
PILOTAGE: Pilotage must be arranged by the vessel or vessel's Agent. Vessels arriving from sea with a draft of 40 ft. or less will pick up the pilot 2 miles South of Point Judith Buoy No. 2 (normally found at Lat. 41° 19.3' N., Long. 71° 28.5' W.).

Vessels proceeding to Riverhead from the New York Harbour will normally embark a Pilot at anchor or at a berth in New York.

The Pilot Associations serving the Riverhead area are:

Interport Pilots Associates, Inc.,
Post Office Box 312,
Atlantic Highlands.
New Jersey 07716.
Tel: 201-291-1310.
Cables: Port Pilots – Atlantic Highlands, New Jersey.

Northeast Marine Pilots, Inc.,
243 Spring Street,
Newport,
Rhode Island 02840.
Tel: 401-847-9050 (weekdays), 401-331-4824 (nights, weekends and holidays)
Cables: RIS Pilots Providence.

Sandy Hook Pilots
201 Edgewater Street,
Staten Island,
New York 10305.
Tel: 718-448-3900.

The Pilot will act as Docking Master when berthing vessels alongside the Northville Industries Corp. Platform.

The Pilot is required to remain aboard the vessel (for Northville's account), on standby, while the vessel is moored at the offshore platform.
ANCHORAGES: Vessels awaiting berth will normally anchor North of the Offshore Platform. Vessels drawing more than 50 ft. may wish to anchor in deeper water Northwest of the platform. Pilots are familiar with the best anchoring areas. Holding ground is good, and a scope of 90 fathoms (6 shackles) of chain is considered adequate.
RESTRICTIONS: Generally, vessels are moored on any stage of the tide and at night when weather conditions permit.
MAX. SIZE: The maximum size vessel which can be received in the North Berth is 225,000 d.w.t., 1,150 ft. LOA and 62 ft. draft.

The maximum vessel size which can be received in the South Berth is 42,000 d.w.t., 700 ft. LOA and 42 ft. draft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to New York Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
COMMUNICATIONS: Telephone at Riverhead, station to station: Dial (516) 727-5600. Cable Address "Northville Riverhead New York". Radio I.T.T. Amagansett. TWX No. 96-1415 Northville Melville and TWX No. 510-224-6443 or 510-226-7837 Northville Melville.

Use of the vessel's main radio equipment while at the platform is expressly prohibited. If a tanker's main radio telegraph must be tested following repairs, arrangements must be made to stop the transfer of cargo during the tests.

Wireless messages are most expeditiously received if transmitted via "RCA Chatham".
VHF: Communications with the Terminal may be conducted by VHF Channels No. 16 and 19A; with the platform on Channels No. 16 and 19A; and the utility boat on Channels No. 13, 16, 19A, 12, 6 and 22. Channel No. 16 is monitored by all stations when manned. A private frequency radio is provided to the Person-in-Charge of the vessel during oil transfer operations.

VHF Marine Operators use VHF Channels: Riverhead (N.Y.) Marine Operator 28; New London and New Bedford Marine Operators 26; Bridgeport Marine Operator 24; to place land calls.
TUGS: Tug assistance for docking is required, and will be arranged by the vessel's Agent. Normally, 2 or 3 tugs will be used for docking and one tug for undocking at the Riverhead Tanker Platform, subject to the agreement of the Pilot and Master. Tugs are usually arranged through Red Star Towing Co., based in New Haven, Connecticut (because of the shorter running time from that port).

Tugs normally based in New Haven are:

Newport (1,800 s.h.p., 20 ton B.P.) ....Single Screw
New Haven (1,800 s.h.p. 17 ton B.P.) ....Twin Screw

Call Red Star Towing Co. on (212) 536-3800.

Tugs must be ordered at least 24 hours in advance of the scheduled docking time.

Red Star has additional horsepower available, if given adequate notice, including:

Stanford (3,000 s.h.p., 32 L.T. B.P.)
Crusader (4,000 s.h.p., 47 L.T. B.P.)

Other tugs are available from New York Harbour, or from the Providence Steamboat Co., Providence, Rhode Island, on (401) 331-1930, which has 3,000 h.p. tugs available.
BERTHING: Vessels calling at the Offshore Platform or pier are moored at any time. The tidal current periods are substantially the same as the Race. Strong winds from the North and Northwest are experienced during the Winter and Spring. Tidal currents during maximum ebb and flood may reach 3 knots. Both docking and undocking operations may be delayed due to adverse weather conditions.

The mean range of the tide is 5.4 ft.

A terminal working crew will board arriving vessels from a 60 ft. utility boat on approach to the mooring platform. This crew will provide assistance and information to the vessel's Master and the line handling crews. The crew carries private-frequency radios for communication with the platform in positioning and mooring the ship.

The designated Person-in-Charge for Northville Industries Corp. will receive and sign the Notice of Readiness and complete all paperwork necessary for the transfer of cargo. Two representatives of the terminal will board each tanker as it approaches the platform. They will provide radio communications with the platform and terminal, and advice and assistance while mooring the ship.

North Berth: Vessels berthed during flood tide will moor starboard side to and during the ebb tide current will moor port side to. Forward and stern spring lines are secured to breasting dolphins and bow and stern lines are made fast to mooring dolphins located to the East and to the West of the platform structure. Terminal Foreman boards vessel to provide communications and assistance during mooring operation.

South Berth: Vessels berthed during flood tide current will moor port side to and during the ebb tide current will moor starboard side to. Forward and stern spring lines are secured to the breasting dolphins in the South Berth. Bow and stern lines are made fast to the mooring dolphins located to the East and West of the platform structure. Breast lines are secured to the North breasting dolphins.

Two mooring buoys are situated South of the mooring facility which were formerly used for mooring vessels in the North Berth. Mooring buoys will be used at the discretion of the Docking Master (Pilot) and/or Northville's Marine Supervisor.

Masters will note that platform is situated in an open roadstead and that all mooring equipment must be in proper working order and in good condition. If, in the opinion of the Pilot (Docking Master) or Northville's Marine Supervisor, the vessel's mooring equipment is inadequate, the vessel will not be permitted to remain in the berth.

Vessels must be equipped with 12 manila or better mooring lines of not less than 8 in. circumference and not less than 90 fathoms length.

Vessels having wire moorings secured on warping winches with brake are acceptable. Warping winches must be adequate to handle mooring lines under heavy strain. Efficient stopper lines must be readily available to "stop off" mooring lines for transfer from winch to bitts without loss of tension.

The Docking Master (Pilot) will assist the Master in the berthing of the vessel and supervise the mooring and unmooring operations.

No gangways are used at this terminal. Crew must use ship's ladder for launch service. Crew are forbidden to go on to the Platform, except on ship's business.

BERTHING FACILITIES: *North Berth:* The distance between the North Breasting Dolphins is 294 ft., centre to centre. The depth of water in the North Berth is 64 ft. at low tide. Spring lines from forward and aft are secured on to quick-release hooks situated on the North corners of each of the North Breasting Dolphins. Vessels moor heading either East or West and can normally be moored at any stage of the tide. Mooring dolphins located East and West approximately 350 ft. from the centre of the platform provide the mooring points for bow and stern lines from the vessel. The mooring dolphins have 4 quick-release hooks each for the North Berth, and 2 quick-release hooks each for the South Berth. These mooring hooks are provided with hydraulic releasing mechanisms which can be operated remotely from the mooring platform during vessel departure. Two mooring buoys are situated South of the mooring dolphins to provide securing points for extra bow and stern lines from very large vessels or in cases where anticipated severe weather conditions indicate the need for additional lines.

South Berth: The distance between the South Berth Breasting Dolphins is 160 ft., centre to centre. Spring lines from forward and aft are secured to bollards situated on the South Breasting Dolphins. Bow and stern lines are secured to the mooring dolphins described for the North Berth, breast lines to the South bollards or the mooring hooks on the lower decks of the North Breasting Dolphins. Depth of water 45 ft. at MLW

Operating Platform: The Operating Platform is 100 ft. long by 45 ft. wide.

The East Building contains 2 diesel powered 100 KW. generators, either of which will supply sufficient power to drive the deepwell Fire Pump rated at 750 g.p.m. at 120 p.s.i. The other generator will supply power to the hydraulic system for the operation of the loading/unloading (L/U) arms, the electric mooring capstans and air compressor, as well as illumination of the structure, including floodlighting and other electrical devices. A diesel powered 15 KW. alternator is available for normal power requirements such as charging emergency lighting system batteries, navigation aid batteries and normal illumination.

The West building contains quarters for personnel, office space for recordkeeping, radio and telephone communication equipment, and emergency and other control equipment. The quarters and control room are situated in the North half of the building and South half of the building is available for storage of emergency equipment, i.e. sorbent boom, life jackets, etc.

There are 4 hydraulically operated L/U arms, 2×12 in. and 2×16 in., situated at the North end of the Operating Platform. At the South end of the platform 2×12 in. L/U arms are situated to accommodate the South Berth. Connections can be made to 8 in., 10 in., 12 in., 14 in. and 16 in. 150 p.s.i. A.N.S.I. manifold flanges. Connections cannot be made directly to valve flanges (spool pieces must be provided). Adjacent connections cannot be made to flanges less than 6 ft. apart. The L/U arms are connected to the platform manifold which is designed to handle all products to or from either berth and is connected to the 2×24 in. submarine pipelines leading to the shore facility.

Approximately 1,200 ft. of 26 in. oil containment boom is stored adjacent to the catwalks leading from the platform to the North Breasting Dolphins. The boom is stored in a manner so that it may be safely and effectively deployed in the event of an accidental discharge of petrolem into Long Island Sound.

Terminal Transfer Piping: Vessels discharging cargo at the offshore platform should understand that they are discharging to an oil storage terminal approximately 1.5 miles distant from the dock and at an elevation of 150 ft. above sea level. The pipeline is 24 in. in diameter. The static head pressure generated by this pipeline arrangement is about 56 p.s.i.

Booster Pump Operation: Booster pumps are available to assist with the discharge of vessel's cargo. However, the Person-in-Charge of the vessel must realise that it is necessary for the ship to generate sufficient discharge pressure (minimum of 75 p.s.i.) and volume (minimum of 7,000 bbls./hr.), at the booster pump inlet, to start moving the product in the pipeline and to permit the booster pump to be engaged. Each booster pump will normally move 10,000 barrels per hour. The normal start-up procedure when discharging at Northville Industries Corp. doc is as follows:

(a) following agreement to begin transfer, the shore opens t platform manifold valves;
(b) the vessel will start its cargo pumps and increase pump spe until a discharge pressure of about 60 p.s.i. is obtained at the to of the pump room;
(c) the ship opens its manifold valves;
(d) ship pump's speed is increased until a discharge pressure o 100 p.s.i. is obtained;
(e) the pumpman on the ship is stationed at the pump controls an the shore is requested to start the booster pumps;
(f) as the booster pumps are started, ship personnel adjust the pumps as necessary to prevent engaging the overspeed trip;
(g) the ship adds pumps and increases pump speed as necessar to maintain desired discharge pressure.

Rapid fluctuations in the discharge pressure of the ship will cause th booster pumps to trip-out. To avoid this, speed adjustments to the ship pumps should be made gradually. Booster pumps are set to trip-out a a low pressure of 75 p.s.i. and, therefore, can provide no assistance t the ship for stripping cargo ashore.

After all cargo tanks have drained and the pumps have lost suction the discharge of cargo will be declared finished. With the agreemen between the Ship's Officer and the Platform Operator, the oil transfe valves on the Operating Platform will be closed. All product remaining in the unloading arms will be drained back into the vessel. If the vessel's pipeline system does not allow the complete draining of the unloadin arm, then arrangments must be made to drain the arm into a containe or via a drain hose into a cargo tank. *No product will be permitted t drain out on to the open deck of the vessel.* After the arms have bee completely drained, they may be disconnected and the ends blanke off to prevent any drippage of oil.

The discharge pressure at the rail shall be a minimum of 100 p.s. (maximum 125 p.s.i.) or the vessel's pumping rate shall be a minimu of 10,000 bbls./hr.

LOADING/DISCHARGING:
Discharging: Tankers are expected to achieve an unassisted discharg rate of 10,000 barrels per hour. Ships discharging at less tha 10,000 barrels per hour will be subject to charges for the extra platfor time used.

High Pour Petroleum: High pour petroleum must be discharged a 4,500 barrels per hour or more. If the discharge rate falls belo 4,500 barrels per hour for more than 2 consecutive hours, the vesse will be instructed to stop discharge of cargo and leave the platform. I the submarine line must be displaced from shore to vessel due to lo discharge rate, ship will be responsible for all expenses due to th procedure. Laytime will stop and wharfage will commence.

No. 6 oils, or other viscous products shall be heated, before discharg to at least 120°F (49°C), or at least 30°F (17°C) above the pour point o the product, whichever temperature is higher. (For example: Oil with a pour point of 75°F must be heated to 120°F or higher. Oil with a pou point of 100°F must be heated to 130°F or higher).

A "viscous" oil is one which has a Saybolt Furol Reading greater tha 25 seconds at 122° F. (This requirement is dependent, to a degree, o the pour point, discharge temperature, viscosity, and average discharg rate. The terminal reserves the right to order any vessel to sto discharging at any time terminal operations require.)

Loading: Tankers can be loaded at rates up to 30,000 barrels per hou at the request of the vessel and with the agreement of the terminal.

BALLAST: No ballast disposal facilities. Long Island Sound is inlan water and United States Anti-Pollution Regulations rigidly enforced. No bilge water, oil-contaminated water, garbage or any waste matte which may pollute sea water is to be discharged overboard while vesse within Long Island Sound and approaches.

Ballast suction valves must be sealed with a numbered seal on arriva Terminal personnel will inspect seals before and after cargo transfer.

MEDICAL: A full-service hospital is available in Riverhead for treatmen of medical emergencies. This is Central Suffolk Hospital located at th traffic circle/intersection of Roanoke Avenue (Route 73) and Route 5 Riverhead, about 4 miles from the Northville Terminal.

Emergency transportation to this hospital can be obtained by dialin 911 and indicating to the dispatcher the location of the medica emergency, for instance: "on the ship at the Northville Industrie Terminal on Sound Shore Road".

WEATHER AND TIDE: Strong winds from North and N.W. experienced during Winter and Spring. Tide during maximum ebb and flood ofte reaches 3.5 knots to 4 knots velocity.

DENSITY: Flood tide density 1025. Ebb tide density 1020.

STORES/FRESH WATER: No fresh water facilities. Stores should b ordered through the ship's Agent. For delivery of stores at anchor, o alongside the platform, Miller Launch, Tel: (516) 473-0132, or Whale Launch, Tel: (516) 698-0036, provides transfer services.

FUEL: Bunkers *may* be available by special arrangement *if* pipeline are in black-oil service.

Ship's bunkers should be ordered through the Agent, from the regul supplier for delivery, by barge, at anchor. Bunkering of ships is no permitted while alongside Northville Industries Corp. Docks. Eck Marine (212) 442-1112 and Standard Marine Services, Inc. (212) 88 1818 will perform bunkering services.

CONSULS: All Consuls offices located in New York City.

REPAIRS: No repair facilities are available. Vessel must remain i sailing readiness at all times while moored at the platform facilities.

DRY DOCKS: At New York Harbour.

SURVEYORS: *Inspection Companies:*
Caleb Brett – New Jersey. Tel: (201) 925-8282.
Independent Petro. Insp. Tel: (201) 925-4960.
S.G.S. Control Services. Tel: (201) 541-7200.
Saybolt. Tel: (201) 245-3100.

Surveyors:
American Bureau of Shipping, 65 Broadway, NY, NY 10006. Tel: (212) 440-0300.
Bureau Veritas, 17 Battery Pl. N., NY, NY 10004. Tel: (212) 442-2317.
Det Norske Veritas, 616 Palisade Avenue, Englewood Cliffs, NJ. Tel: (212) 868-6595.
Lloyd's Register of Shipping, 17 Battery Pl., NY, NY 10004. Tel: (212) 425-8050.
Panama Bureau of Shipping, 104 E. 40 St., NY, NY 10016. Tel: (212) 867-4760.

QUARANTINE, CUSTOMS AND IMMIGRATION: New York City is the quarantine, customs, immigration and agricultural quarantine port of entry for Northville. Officials are stationed in New York City. Arrangements for inspections of vessels arriving from foreign ports must be made by ship's Agent in advance, not less than 24 hours before arrival on Monday through Friday, and 48 hours on Saturday or Sunday. Vessels arriving from foreign ports are reminded to provide 24 hours' pre-arrival notice to the U.S. Coast Guard, Captain of the Port, New Haven, Connecticut.

Officials will board vessels in the anchorage prior to arrival, within the vicinity of the offshore platform.

Customs Officers: Customs officers will board all vessels arriving from a foreign port, or U.S. flag vessels arriving with foreign cargo. The Customs Officer must be the first person aboard the ship (with the exception of the Pilot). He will require the close assistance of the ship's cargo officer and the public inspector, for the prompt completion of his duties. Agents are requested to order U.S. Customs Inspectors for a time *2 hours before* the vessel's ETA at the terminal.

For questions concerning Customs business, the Regional Office should be contacted on (212) 466-4407 during business hours, otherwise the Communications Office on (212) 466-5472 should be contacted.

Immigration: An Immigration Officer will normally board vessels arriving from foreign ports. Until clearance is obtained from the Immigration Officer, no crew members may leave the ship.

For questions concerning Immigration matters, contact the District Office on (212) 264-5886.

Coast Guard Inspections: Coast Guard Officers may board tankers or barges at any time for the purpose of making inspections necessary to enforce the laws of the United States.

The Riverhead Terminal is within the jurisdiction of the Captain of the Port, New Haven, Connecticut, on (203) 773-2464.

A Regional Office is maintained at 146 Beach Street, Port Jefferson, New York on (516) 473-3570.

CUSTOMS ALLOWANCES: Tobacco, wine and/or spirit allowance: Same as permitted in New York Harbour.

REPATRIATION: Crew members departing vessels from the Northville Terminal may obtain transportation to domestic or foreign destinations (i.e. to an from either of the major international airports: J.F. Kennedy International Airport or LaGuardia Airport), by one of several methods.

The Riverhead Station of the Long Island Rail Road is located 10 minutes from the terminal by taxi and has services for both railway and bus.

Another method is limousine service. The following are limousine companies serving this area:
Long Island Airport Limousine. Tel: (516) 582-4077.
Winston Limousine. Tel: (516) 563-1323.
Transport Limousine of L.I. Tel: (516) 567-5100

AIRPORT: New York Airports, 80 miles distant.

POLICE/AMBULANCE/FIRE: Terminal attends Police/Ambulance and Fire services.

State Police Tel: 727-2727, Police Tel: 911 (Emergencies only). Fire Tel: 0 (to report fire, otherwise 727-2750). Ambulance Tel: 911 or 298-4016.

EMERGENCY CO-ORDINATION CENTRE: United States Coast Guard at New Haven, Connecticut. Tel: (203) 773-2464; and the United States Coast Guard National Response Centre. Tel: (800) 424-8802 (toll free number).

BANKS: European American Bank, located at 209 West Main Street, Riverhead, New York, NY 11901. Tel: (516) 727-7082.

STORING: Bunkers must be taken at anchor. Stores can be loaded during transfer.

Trucks cannot proceed alongside the berth, but by launch only.

Fork lift trucks cannot be used to handle stores.

Customs Regulations regarding storing are not known by this terminal.

Local Riggers can be employed to assist with storing.

TELEPHONES: A coin telephone is located in the platform office. Tel: (516) 727-9549.

SHIP SUPPLY SERVICE: J. & H. Marine Services operate Coast Guard inspected crew boats on a charter service to vessels in the Long Island Sound area. They also have available LCMs with a 25 ton capacity for stores and equipment. These vessels are based in Port Jefferson, Long Island, New York and are on call 24 hours a day, 7 days a week. Tel: (516) 654-4900.

J. & H. Marine Services also operates inspected crew boats for passenger service on a per head basis in New York Harbour. The operations centre is at Pier 13, Staten Island. They can be reached on Channel 16 VHF or call (212) 727-7303 or (516) 654-4900. Also available at this location are similar LCMs with 25 ton capacity for stores and equipment.

SHORE LEAVE: Shore leave permissible by arrangement with local launch service.

IDENTIFICATION CARDS: Issued by Immigration Officer.

AUTHORITY: Northville Industries Corp., P.O.Box 111, Riverhead, NY 11901. *Tel:* (516) 727-5600. *Telex:* 96-1415. *Cables:* Northville, Melville. *Contact:* Earl Espeland, General Manager. A. Golz, Marine Supervisor.

ROCHESTER, New York: 43.17 N. 77.36 W. (See Plan)

Refer to "St. Lawrence Seaway" for important general information. See "General" below.

PILOTAGE: Not necessary.

ANCHORAGE: No anchorage available within harbour limits.

RESTRICTIONS: Permit for non-emergency docking must be obtained 2 weeks in advance by mail or telephone request.

MAX. SIZE: Channel depth 20 ft. (LW). All depths in channel or alongside wharves should be checked carefully against the latest recorded elevated or lake level. This may vary from month to month. Entrance width 300 ft., turning basin depth 20 ft., 600 ft. in width.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to New York Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Rochester Coast Guard Station.

TUGS: Not available.

BERTHING: Entrance piers are parallel to each other, and about 450 ft. apart. The West Pier is 3,036 ft. long and the East Pier 2,699 ft. long. Fog horn and beacon on West Pier, East pierhead lighted. Radio beacon. Port Authority Terminal located on West bank of Genesee River at end of Lake Pier. Has a quay wall of about 1,400 ft. in length. Depth of water alongside quay wall uncertain, estimated at between 10 ft. and 16 ft. Charlotte Docks located about 2 miles upstream from mouth of river on West bank.

CRANES: Not available, except through private arrangements.

BRIDGES: New York Central Railroad swing bridge near mouth of the river and upstream from Port Authority Terminal. Traffic lift bridge about 0.25 mile upstream from railroad bridge.

STEVEDORES: Vessel to make own arrangements.

DENSITY: Fresh water.

FRESH WATER: Available at both docks.

FUEL: Vessel to make own arrangements.

CONSULS: None.

REPAIRS: Minor only.

REPATRIATION: Can be arranged.

AIRPORT: Approximately 10 miles from port.

POLICE/AMBULANCE/FIRE: Police, Ambulance and Fire Tel: 911.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required.

GENERAL: Rochester, New York, no longer operates a commercial port. The facilities are available only for tour and cruise boats to take on and discharge passengers, and by commercial vessels in the case of an extreme emergency.

It should be stressed that emergency docking is completely the Master's responsibility. The City of Rochester and the Department of Recreation and Community Services assume no liability for any vessel docking under emergency conditions at the former Port of Rochester.

AUTHORITY: City of Rochester, Department of Parks, Recreation and Human Services, Office of the Director, Room 226B, City Hall, Rochester, New York 14614. *Tel:* (716) 428-6755.

SACRAMENTO, California: 38.32 N. 121.30 W. (See Plan)

DOCUMENTS: See "San Francisco".

PILOTAGE: Pilots board vessel in San Francisco Bay. (Also see "San Francisco").

RESTRICTIONS: *Ship Channel:* Distance Fort Point to Sacramento, 79 nautical miles (146 km.). Bottom width in river reach 300 ft. (91.4 m.). Bottom width in channel reach 200 ft. (61.0 m.). Min. depth at MLLW 30 ft. (9.1 m.).

Harbour: Area 60 acres (24.3 hectare). Min. depth at MLLW 30 ft. (9.1 m.). Tidal variation 5 ft. (1.5 m.) average.

MAX. SIZE: 800 ft. LOA and 106 ft. beam, 30 ft. deep at MLLW.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to San Francisco Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: KBA 386, 156.9 MHz (24 hours).

TUGS: Join vessel at Light 76 (turning basin).

BERTHING: Anchor – ships will have at least 1 anchor ready to let go in case of emergency, when docking or undocking. Anchor will be raised immediately upon ship being made fast to wharf.

Insurance lines are required on off-shore side, fore and aft, immediately after ship is made fast to wharf.

A cargo net shall be securely placed under gangways. Save-all nets shall be rigged abreast of holds at which general cargo is being handled.

Rat guards, at least 3 ft. in diameter, shall be placed on all mooring lines immediately after docking, and shall be maintained in place until ship's departure.

Pier 1:

Owned and operated by: Port of Sacramento.

Use: Bulk-loading rice facility.

Construction: Concrete with timber fender piles, length 600 ft. (182.9 m.).

Water depth: 32 ft. (9.8 m).

Storage capacity: 22,000 tons; 8 silos at 2,200 tons each; 6 silos at 470 tons each; 6 silos at 270 tons each.

Mechanical handling facilities: 3 loading spouts dockside, conveyor system to storage facility.

Loading rate: 600 t.p.h.

Wharf 2:
Owned and operated by: Port of Sacramento.
Use: General cargo.
Construction: Concrete with timber fender piles; apron width 60 ft. (18.3 m.); length 600 ft. (182.9).
Water depth: 30 ft. (9.1 m.).
Transit sheds: One, 86,400 sq. ft.

Pier 5:
Owned by: Port of Sacramento.
Operated by: Cargill of California, Inc., as a public utility.
Use: Bulk-grain facility.
Construction: Concrete and steel silos; concrete with timber fender piles; length 600 ft. (182.9 m.).
Water depth: 32 ft. (9.8 m.).
Storage capacity; 1,250,000 bushels (30,000 tons); 17 concrete silos; total capacity 500,000 bushels; 6 steel silos; total capacity 750,000 bushels. Two dry bulk storage domes of 9,000 tons storage each.
Mechanical handling facilities: Bulk ship loader (600 t.p.h.), conveyor belt system connects bulk storage/rail/truck.

Wharf 6:
Owned and operated by: Port of Sacramento.
Use: General cargo and containers.
Construction: Concrete with timber fender piles; length 600 ft. (182.9 m.); apron 60 ft. (18.3 m.).
Water depth: 30 ft. (9.1 m.).
Mechanical handling facilities: 1 gantry crane, 45 tons.
Remarks: 6 acres of open wharf; 70,000 sq. ft. off dock warehouse.

Wharves 7-8:
Owned and operated by : Port of Sacramento.
Use: Bulk material facility and general cargo.
Construction: Concrete with timber fender piles; apron 60 ft. (18.3 m.), length 600 ft. (182.9 m.).
Water depth: 30 ft. (9.1 m.).
Storage capacity: Covered 200,000 tons, open 750,000 tons.
Mechanical handling facilities: Conveyor-belt system from truck to storage, from ship to storage; from storage to ship, or from storage to truck; 1 gantry crane, 45 tons.
Loading rate: 600 t.p.h.
Transit shed: 86,400 sq. ft. Bagging facilities for bulk cargoes.

STEVEDORES: Same as San Francisco. Port stevedores for bulk cargo.
MEDICAL: All normal medical facilities available.
DENSITY: Full fresh.
FRESH WATER: Available at all berths.
FUEL: All grades available with 24 hours notice. Delivered by barge.
CONSULS: Nearest at San Francisco.
REPAIRS: Limited repair facilities available.
GANGWAY/DECK WATCHMEN: Each ship shall have a security detail in readiness on board at all times it is in port. The security detail shall perform tasks of an emergency nature and shall have information concerning cargoes aboard in case of need for fire fighting purposes.
OPENING/CLOSING HATCHES: Opening/closing hatches is stevedore work while docked in port.
REPATRIATION: Can be arranged through local Agent.
AIRPORT: 16 miles from port and served by regular airlines.
TIME: GMT minus 8 hours.
HOLIDAYS: Only days not worked are 4th and 5th July, Labour Day, Christmas Eve and Day, New Year's Eve and Day.
POLICE/AMBULANCE/FIRE: Tel: 371-8000. Extensions 252 and 228.
TELEPHONES: Telephones are available.
SHORE LEAVE: Crew members allowed ashore subject to Immigration clearance.
IDENTIFICATION CARDS: A pass signed by the Master or his designated officer will be required for crew members, passengers and their personal property to leave the port's fenced area. Property may be subject to physical inspection before leaving the fenced area.
REGULATIONS: Ships will not blow boiler tubes while in port. Bilge water or oil will not be discharged into harbour. Accidents will be reported immediately to the Terminal Superintendent. Splash boards will be placed over disposal vent-pipe openings on inboard side of vessel.

Garbage – United States and California State laws make it unlawful to dispose of ship's garbage except in approved ways. Garbage retained on board must be kept in tightly closed containers.

Smoking – Smoking prohibited in and around cargo compartments, and on open decks except that it may be permitted in marked areas under sheltered portion of weather decks on offshore side. Smoking prohibited on wharfs and piers except in marked areas. Smoking prohibited on or near ship while it is bunkering.

Welding/Burning – Welding or burning will not be done until written approval is obtained from the Terminal Superintendent and the Fire Marshal. All requirements of both the Superintendent and Marshal will be strictly adhered to.

Fire Signal – Upon detection of a fire, regardless of location or size, the alarm of fire will be sounded. The alarm shall be sounded by telephone and/or whistle or siren blasts. 5 each, 5 second blasts repeated as necessary.
AUTHORITY: Port of Sacramento, P.O.Box 815, World Trade Centre, West Sacramento, California 95691. *Tel:* (916) 371-8000. *Telex:* TWX 910-367-3581. *FAX:* (916) 372-4802. *Contact:* Dennis Clark, Director.

SALEM, Massachusetts: 42.31 N. 70.53 W. (See Pla

SHIPMASTER'S REPORT: August 1986.

DOCUMENTS: See "Boston".
PILOTAGE: Cape Ann Pilots Association (serves Gloucester an Salem). Pilot on VHF Channels 16 and 12. Pilot boards about 1 mi South of Eastern Light Buoy No. 2.
ANCHORAGES: About 2 miles S.W. of Eastern Point.
RESTRICTIONS: Salem Channel 150 ft. in width only, therefore larg vessels berth or unberth in daylight hours only.
MAX. SIZE: Length 700 ft. (approx.). Breadth 110 ft. (approx.) and dra 34 ft. (salt water).
TUGS: Available from Boston.
BERTHING: New England Power Company (NEPCO) operates Sale Terminal Wharf to supply Salem Harbour Station with coal and fuel o

No cranes available, coal is discharged from "self-unloading vesse only.
TANKERS: 2 arms (Chicksan-type), 12 in. diameter. Discharging ra 7,000 bbls. each. Length of wharf (incl. dolphin) 250 m. (appro dredged to 34 ft. at LW.
DENSITY: 1022 – 1025.
AIRPORT: See "Boston", about 45 minutes. Cost U.S.$50 by van.
TELEPHONES: Not placed on board, however communication wi Agents via VHF possible.
GENERAL: Port is served by 1 or 2 colliers a week, and about 3 tanke a month.

NEPCO Representative acts as Loading Master. Linesman a provided from the power station.

REPORT: From Tanker Operator:
Port Approaches: The RDF stations at Cape Cod, Boston Buoy 'B' an Eastern Point are useful navigation aids. The rocky shore lines provide a good target for position fixing by radar. Fathometer readings shou not be relied on for position fixing purposes, since bottom contours a erratic. Fishing boat traffic in Massachusetts Bay is heavy especia near Gloucester. It should be noted that the small fishing vessels in th area sometimes display working and running lights that could b mistaken for reguar range lights. During the Summer months, the yac traffic is considerable. Most yachts reportedly show up poorly on th radar screen.
Channel Transit and Berthing: Loaded tank vessels enter with a risi tide. The Pilot and Agent should be consulted with regard to the actu water depths available in the channel during the intended period transit.

The transit from the pilot boarding area to the terminal is about miles. Salem Sound is entered via the Salem Channel between Bake Island and Little Misery Island, leading Westwards for 3 miles then Southwestward through a dreged section to the turning basin off th berth. The channel is well marked with buoys and range lights.

Shallow vessels and tows crossing the channel may be met. Duri Summer months, Salem Sound is crowded with pleasure craft. Coa Guard patrol boats must sometimes be utlised to clear a path.

The tugs usually join the ship before entering the inner dredg channel Buoy No. 16. The ship is berth port side to, which requires starboard turn of approximately 130° before landing.

During normal weather conditions, 10 mooring lines are conside to be the minimum acceptable.
Weather: Gales occur year round. The severest storms occur during th Winter months. Rain or snow associated with these storms, at time reduce visibility to zero for extended periods. During the Winter mont freezing spray may be experienced.

Fog presents a problem year round, being heaviest during late Spri and early Summer. It is not advisable to enter or leave in thick weath

SAN DIEGO, California: 32.41 N. 117.07 W. (See Pla

PORT LIMITS: The seaward boundaries of the Port of San Diego a which a vessel is considered to be an "arrived vessel" is that time wh the vessel is boarded by a Port Pilot at Sea Buoy No. 1 and (subject charter party terms) lay time commences when Notification of Readine is tendered at berth.
DOCUMENTS:

Crew Lists.
Passenger Lists.
Customs Documents.
Manifests.
Stores Lists.
Crew Curio Declaration List.

If the vessel arrives from foreign direct, 3 copies each of the abo documents are required.

If the vessel movements are between U.S. ports, 2 copies each the above documents are required.

Health Documents. Arrival from foreign direct, 1 copy only. All cre members should be in possession of valid vaccination certificates.

Manifests. Arrival from foreign direct, 1 copy of travellers mani which remains with vessel, and 3 copies each of U.S. Customs inw foreign manifest. Bills of lading, ship's papers carried aboard vess varies with steamship companies.

PILOTAGE: Compulsory. The San Diego Pilots do not maintain Pilots on station. Service is rendered according to ETA received from vessel. If any vessel's arrival or departure is delayed over 1 hour, an additional charge will be made. Telegraphic address of pilot station – radio ETA to "Pilots", San Diego. Advance notice of ETA required – 24 hours prior to arrival of vessel with amendments 2 hours prior to arrival. Pilot boat is 54 ft. in length, painted white. The exact area where Pilot boards the vessel is No. 1 sea buoy. Pilot on VHF Channels 16 and 12 (Tel: (619) 233-7814).
ANCHORAGE: 3 miles S.E. of Point Loma Light.
MAX. SIZE: Length, breadth – no restrictions. Max. draft alongside face of terminal, 36 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Los Angeles Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: All radio messages go through the Los Angeles station for relay.
VHF: The Port of San Diego Harbour Police maintains a listening watch on Channels 12 and 16. Channel 11 is available after initial call-up on Channel 16.
TUGS: Tugs normally join vessel approximately 1 mile before berth. 5 available ranging from 200 h.p. – 2,400 h.p. There is no charge for the use of tug's lines.
CONTAINER FACILITY: A new generation, high-speed, all-electric container crane capable of handling 20 ft. and 40 ft. units, or single hook lifts of 40 long tons at National City Marine Terminal. This 17.4 acre facility includes 32,500 sq. ft. for a container freight station, a container steam-cleaning facility, office, maintenance shop, truck scales, railroad spur, and paved storage for 2,280 containers including electrical outlets for 45 refrigerated containers. Depth 35 ft.
SPECIALISED CARGO HANDLING FACILITIES: High-speed bulk-loading facilities exist with 800 ft. of 35 ft. deep water berthing space and bulk storage, plus a bulk loader boom that travels 500 ft. laterally and can be extended or raised enough to load nearly any size or type of ship.
STEVEDORES: Advance notice of 24 hours desired in order to arrange gangs.
MEDICAL: Agents should receive notification of medical attention required 24 hours prior to ETA of vessel. Complete hospital facilities available.
TANKERS: Diameter of load/discharge line 6 in. to 8 in. Slop (residue) discharge facilities available upon request. 2 tanker berths – max. draft 35 ft. There are also 2 tanker berths at National City Marine Terminal with 12 in. discharge lines.
DENSITY: Salt water in bay.
FRESH WATER: Fresh water available, delivery via pipeline.
FUEL: Diesel and bunker fuel available.
CONSULS:

Chile
Costa Rica
Denmark
Dominican Rep.
Ecuador
El Salvador
Finland
France
Germany F.R.
Honduras
Italy
Mexico
Netherlands
Norway
Panama
Peru
Sweden

REPAIRS: All types of deck and engine repairs are available.
DRY DOCKS: Largest dry dock 1,000 ft. length, 140 ft. width, accommodates up to 30,000 displacement tons. Six additional dry docks from 3,500 to 28,000 displacement tons capacity.
SURVEYORS: A full complement of cargo inspectors and surveyors are available locally.
GANGWAY/DECK WATCHMEN: Available if considered necessary.
OPENING/CLOSING HATCHES: Carried out by stevedores.
CERTIFICATES: Registered Load Line Certificate, Certificate of Inspection, Safety Certificate.
CUSTOMS ALLOWANCES: Tobacco: Per each crew member U.S. Customs allowed 2 cartons of cigarettes and 1 box of cigars. Wine and/or Spirits: Quantity allowed per each crew member – 1 quart.
CARGO GEAR: Up-to-date certification of all cargo gear required in order to comply with Pacific Coast Marine Safety Code.
AIRPORT: Distance from marine terminal approximately 5 miles. Airport is serviced by major airlines.
TIME: Local time GMT minus 8 hours. Daylight Saving Time becomes effective the first Sunday in April and continues to the last Sunday in October.
HOLIDAYS: Recognised holidays are: New Year's Day; Lincoln's Birthday; Washington's Birthday; Memorial Day, Independence Day, Labour Day, Columbus Day, Veteran's Day, Thanksgiving Day, Statewide Election Day, Christmas Day, or any other legal holiday that may be proclaimed by State or National Authority; when a holiday falls on a Sunday, the following Monday shall be observed as a holiday.
POLICE/AMBULANCE/FIRE: Non-Emergency Police Telephone Number is 236-6566. All other emergencies (including paramedic) Tel: 911.
EMERGENCY CO-ORDINATION CENTRE: Local maritime emergency co-ordination is handled by the U.S. Coast Guard, San Diego Region, 2710 North Harbor Drive, San Diego, CA 92101. Tel: (619) 557-5860.
TELEPHONES: Arrangements exist for placing telephones on board. No charge for hooking up.
SERVICES: Tank-cleaning equipment. Facilities for tank washings. Compass and radar adjustments, etc.
BANKS: Full banking services for both domestic and international transactions are available locally.
STORING: Storing and provisioning may be accomplished at dockside or via barge by prior arrangement. Trucks and forklifts may be used alongside and riggers are available by arrangement with the representative Agent. U.S. Customs Agents will board on arrival and seal all bonded items. Otherwise, normal procedures concerning controlled items will be observed by the vendor.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: U.S. Immigration requires completion of Form I-95, U.S. Coast Guard requires landing permits.
DEVELOPMENTS: "B" Street Pier has been reconstructed as a cruise ship terminal. Broadway Pier is being reconstructed and is out of service until mid-1991. U.S. Customs have been temporarily relocated to the end of "B" Street Pier for clearance of fishing vessels.
AUTHORITY: Port of San Diego, P.O. Box 488, 3165 Pacific Highway, San Diego, California 92112. *Tel:* (619) 291-3900. *Telex:* 695-456. *Cables:* Sun Harbor San Diego. *FAX:* (619) 291-0753. *Contact:* Don L. Nay, Port Director. Stanley R. Westover, Manager, Marine Operations.

SAN FRANCISCO, California: 37.48 N. 122.25 W.

(See Plan)

DOCUMENTS:

General Declaration (arrival) on Customs Form 1301.
Cargo Manifest (Customs Form 1302). One original copy indicating all the cargo on board, used for making formal entry. One copy listing all cargo on board, to be used by the Customs Inspector. One copy indicating cargo for this port only.
2 copies of Crew's Effects Declaration on Customs Form 1304.
2 copies of Ship's Stores Declaration on Customs Form 1303.
2 copies Passenger List (Form I-418).
2 copies Crew List (Form I-418).
1 copy "Oil Pollution Certificate", issued in Washington D.C.
Customs Boarding Officer will also examine Ship's Register and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours of arrival from abroad, or 24 hours of arrival from a U.S. port:
(a) Health Pratique.
(b) Master's Oath (Customs Form 1300).
(c) U.S. Certificates of Payment of Tonnage Tax (Customs Form 1002).
(d) Certified Crew List (U.S. vessels only).

PILOTAGE: Pilotage in and around Golden Gate Region is performed by the San Francisco Bar Pilots who provide service from sea to all ports within the regions, including the Ports of Sacramento and Stockton.

The San Francisco Bar Pilots' Association, maintains a sea station 12 miles outside the Golden Gate, in the vicinity of the large navigation buoy for vessels arriving and leaving the area.

On station around-the-clock. Pilot boats are equipped with VHF radio-telephone, and maintain continuous watch for ship traffic and operate co-operatively with the Marine Exchange Communication Centre and lookout station. The Bar Pilots also carry portable VHF radios.

Some 8,500 ships are piloted annually into and out of the port complex, through the Golden Gate and the 2,000 ft. wide, 55 ft. deep main ship channel across the sand bar about 9 miles outside the Gate.

Considerable Summer fog is experienced on the pilot grounds. In Winter months radiation or tule fogs frequently occur. The tidal prism of hundreds of square miles of inland waters cause unusually swift and changing currents in the area. Pilotage for San Francisco Bar and entrance is compulsory and available 24 hours a day. The pilot boat is at a station 3 miles outside Main ship Bar Channel about 14 miles from San Francisco, VHF Channels 18A and 10 for radio contact. Vessels with a draft of 42 ft. or more are requested to arrive at the pilot station for the inward passage about one hour before high water at the Golden Gate Bridge.

ANCHORAGES: Several anchorages available in San Francisco Bay for any type of vessel up to 50 ft. draft.

The well-protected bay affords excellent shelter and anchorage in all weather. The Captain of the Port (Coast Guard) will assign an anchorage to a vessel upon request. In San Francisco and San Pablo Bays, there are a large number of anchorages available for naval, quarantine, general and explosives.

The specific anchorages available include:

1. *General Anchorage*

(a) No. 5 – found just South of the Richmond-San Rafael Bridge, has no limitations.

(b) No. 9 – found in the South Bay, also has no limitations.

2. *Temporary Anchorage*

(a) No. 7 – found off Treasure Island, has a 12 hour limit. A ship cannot lighter nor bunker at this mooring.

No. 8 – same as No. 7 but has a 6 hour limit.

3. *Explosive Anchorage*

No. 12 – is normally not activated.

No. 13 – found off Larkspur, this mooring is activated only as the need arises.

No. 14 – found in the South Bay, this mooring is always activated.

4. *Naval Anchorage*

No. 10 and No. 21 are the most frequently utilised.

RESTRICTIONS: The San Francisco Bay region is the first on the West Coast to have sea lanes established by the Coast Guard for greater safety in its ocean approaches. Use of the lanes is not mandatory, but is strongly recommended to reduce chance of ship collisions in congested approach and departure areas. The lanes are not intended to supercede or alter applicable rules of the road.

The lanes begin within 6 miles of the San Francisco Lightship, with each lane inbound and outbound separated by a buffer zone. The headings are: North lane outbound, 305°; North lane inbound 120°, main line outbound, 247°; main line inbound, 058.5°; Southern lane outbound, 169°; Southern lane inbound 343°.

The size of the bay and the narrowness of the Golden Gate cause tricky and sometimes difficult tidal and current conditions. The flood current sets into all parts of the bay and causes swirls as far East as Alcatraz and Angel Islands. At the San Francisco-Oakland Bay Bridge there are large current eddies near the foundation piers which may require care to maintain proper course.

The Bar Channel is dredged to 55 ft. MLLW by the U.S. Army Corps of Engineers. Entrance channels to the various ports are dredged to 35 ft., with the exceptions of Sacramento, Stockton and Redwood City, which are 30 ft. Stockton, however, is approved for a 6 ft. deepening, and study of similar deepening for Redwood City is being completed.

MAX. SIZE: The max. permissible draft for tankers at the oil installation is 35 ft., for regular freighters and passenger ships at the San Francisco piers is 40 ft. No restrictions on length or berth. The best time to dock with max. draft is at a rising tide.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to San Francisco Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Radio station via RCA – Radio Corporation of America – Station KPH ITT – World Communications – Station KFS.

Safe and efficient navigation for all bay vessel traffic is maintained through a Ship Location and Reporting Service operated by the Marine Exchange. U.S. Coast Guard Vessel Traffic Service on Yerba Buena Island and at Port Bonita maintains 24 hour radar surveillance of all traffic from Golden Gate on the West (with 32 mile capacity beyond) to Oakland on the East, Dumbarton Bridge on the South and Port San Pablo on the North. Vessel Movement Reporting System (VMRS) extends beyond Port San Pablo all the way to the Ports of Stockton and Sacramento. Coast Guard urgently requests that all vessels as specified below, moving anywhere within the VMRS (including all area under radar surveillance), tune to Channel 13 (156.65 MHz., VHF FM): All ships of 300 gross tons and over, passenger ferries for hire over 100 gross tons, and tugs with tows of barges or dredging rigs of over 26 ft. length.

Coast Guard Regulations: Foreign tankers should give 72 hours' advance notice of arrival to ensure that U.S.C.G. has enough time to check the vessel's records for compliance or outstanding violations and to arrange for any onboard inspections required. Failure to provide 72 hours' notice may delay the commencement of cargo transfer while awaiting the required U.S.C.G. inspections. Letter of Compliance inspections must still be arranged through Washington D.C. The statutory notification remains at 24 hours. This notice applies only to the San Francisco Bay area. Any vessel required to have an inert gas system must have its tanks inerted at all times unless they are gas free.

VHF: VTS in operation. Call sign "San Francisco Vessel Traffic Centre", operates on Channels 16, 13, 12 and 18A.

TUGS: Tugs available and normally join the vessel when approaching their pier. Tug's lines are always used, with no extra charge.

BERTHING: No restriction on berthing other than draft limitation and preferable at slack water.

Alameda: (See Plan). (Not part of the Port of San Francisco Alameda, an island and city across the Inner Harbour channel fro Oakland, is the home of Encinal Terminals, the largest privately owne and operated steamship terminal in the United States. There are 6 berth for vessels at Encinal.

Berths 1, 2, 3 and 4: Used for general cargo and bulk liquids. To berthing length 2,125 ft. Depth 31 ft. to 33 ft.

Berth 5: Used for general cargo. Length 750 ft. Depth 35 ft. Ber equipped with Paceco crane.

Berth 6: Used for receipt and shipment of bulk liquids. Depth 30 f Facility has tank storage of 12 million gallons.

Operator: Encinal Terminals, 1521 Buena Vista Avenue, P.O.Bo 2453, Alameda, CA. 94501. Tel: (415) 523-8800. Telex: TWX (910) 36 7174.

CONTAINER/BULK HANDLING FACILITIES: *San Francisc Container Terminal - (SFCT) South:*
(formerly Pier 94/96).
Container Ship Terminal.
Cargo Way.
Steamship Lines: Evergreen Line, Columbus Line, COSCO Grancolombiana Line, United Yugoslav Line, Evergreen Line, Zi Container Service, Japan Line.
Assigned to: Stevedoring Services of America.
Dimensions: Total terminal area is 76 acres. Outer apron is 2,456 ft.
Number of berths: Three at 40 ft. MLLW alongside and a design loa of 800 p.s.f.
Special Facilities: The ondock Intermodal Container Transfer Facil accommodates up to 20 rail cars on a single switch. Port packers use for yard operations. Elevated control tower with radio and R communications systems. A maintenance and repair building of 24,00 sq. ft. is sprinklered and has a 5-ton capacity overhead bridge cran Other buildings include an administration building (14,000 sq. ft.) an gate house/terminal office building (2,475 sq. ft.). 135×240 volt an 32×480 volt reefer outlets.
Lift equipment: 2×30 ton Paceco cranes, and 2×30 ton Starporte cranes, rail mounted. The spreaders can be expanded in order to affor easy accommodation of both 20 ft. and 40 ft. containers. Each cran has a 50 ft. gauge with an outreach of 115 ft., backreach of 30 ft. an an 88 ft. clear hoist above HW (to be upgraded to 103.5 ft. clear hois above HW). The Paceco can load and off-load containers thwartship There is also 1×25 ton P&H mobile crane.
Connections: Trucks via Cargo Way; Southern Pacific Railroad track San Francisco Belt RR.

San Francisco Container Terminal - (SFCT) North:
(formerly Pier 80)
Combination Terminal - Container/Ro-Ro/Unitized Break Bulk.
Foot of Army and Marin Streets.
Construction: Concrete pilings, concrete deck.
Steamship Lines: National Shipping Corporation of Philippines, ELMA South Seas Steamship, Tranportacion Maritima Mexicana, Navican Line, Nedlloyd Lines, Norsul and Ciamar.
Assigned to: California Stevedore & Ballast Company.
Dimension: Total terminal area is 68.5 acres. The face measu 1,296 ft. North measures 1,138 ft. and South measures 2,657 ft.
Berths: Four at 40 ft. MLLW alongside.
Special facilities: 2 steel-framed transit sheds totaling 396,000 sq. 273×220 volt and 36×480 volt reefer outlets and Container Freig Station accommodations. The van yard is fully lighted and complete fenced for security.
Lift equipment: 1×30 ton and 3×40 ton Paceco Cranes, and 1×30 to Starporter Crane, rail mounted. All cranes can accommodate 20 ft. an 40 ft. containers. Each crane has a 34 ft. gauge and an 88 ft. clear hoi above high water. (2 New Paceco cranes have a clear hoist of 9 above HW). Cranes can load and off-load containers thwartship.
Connections: Via Army Street or Marin Street; UP System Railro tracks.

Pier 70-72: Automobile Terminal.
Foot of 23rd Street.
Assigned to: Fred F. Noonan Company.
Construction: Timber pile, timber deck.
Steamship lines: Wallenius Line.
Dimensions: The total terminal area is 24.5 acres. The face measu 723 ft.
Berths: Two at 40 ft. MLLW alongside.
Special facilities: 22 acres of open storage for car-loading, unloadi and processing.
Connections: Via Third Street, East on 20th Street.

Pier 50: Combination Terminal.
Container/Ro-Ro/Unitized Breakbulk.
Foot of Mission Rock Street.
Construction: Concrete piles, concrete deck.
Steamship Lines: Various.
Dimensions: Total terminal area is 20.8 acres. The face measures 1,000 ft. North measures 1,480 ft. and South measures 1,100 ft. and 582 ft.
Berths: Four at 35 ft. MLLW alongside.
Special facilities: This pier offers 8 acres of open storage, 4 transit sheds totaling 274,000 sq. ft. and reefer outlets.
Connections: Via Mission Rock Street; Santa Fe Railroad tracks.

Pier 27 – 29: Newsprint/General Cargo/Containers.
Foot of Lombard Street.
Assigned to: Marine Terminals Corp.
Construction: Concrete piles, concrete deck.
Steamship lines: B.C. Forest Products, Papua New Guinea Line, Sig. Bergesen, Star Bulk Shipping, Atlantic Cargo Services and Scann Scot.
Dimension: The face measures 206 ft., North measures 750 ft. and South measures 1,340 ft.
Berths: Three at 35 ft. MLLW alongside.
Special facilities: Piers 27-29 are integrated piers connected by a 117,000-sq. ft. bulkhead and 2.5 acres of open storage space. It also offers 601,700 sq. ft of transit shed space.
Connections: Via Embarcadero; Belt Railroad tracks.

Pier 92: Automobile and Bulk Liquids Terminal
Cargo Way.
Assigned to: Baker Commodities (Bulk Liquids) and California Stevedore and Ballast (Fishmeal).
Construction: Concrete piles and deck, timber apron.
Dimensions: The face measures 702 ft. and 166 ft. This facility also has a transit shed measuring 57,270 sq. ft.
Special Facilities: 10 acres of open storage space for automobiles, automobile detailing and repair centre, bulk oil processing and storage equipment, and heated and cooled pipe-lines connecting pier with the storage tanks.
Berths: One with 38 ft. MLLW alongside.
Connections: Via Cargo Way from Third Street; Southern Pacific Railroad/S.F. Belt

STEVEDORES: Stevedores orders must be placed 1000 hrs. for night gangs and day gangs. 2×8 hour shifts 7 days a week. Sunday and Sunday night gangs must also be ordered on Saturday 1000 hrs.
MEDICAL: Medical, and all hospital facilities available. No advance notice required.
TANKERS: All major oil companies have their own oil discharging piers which are outside the jurisdiction of the Port Authority. Reducing pieces are available. The max. drafts are 35 ft. Tankers arriving with a greater draft are partly discharged in the bay before docking.
Davis Point: Union Oil Co. Oleum Refinery Wharf, depth up to 38 ft. MLW.
Martinez: Shell Oil Co. Wharf, depth alongside 30 ft. – 42 ft. MLW.
Phillips Petroleum Co. Amorco Wharf, 2 berths, depth 30 ft. – 42 ft. MLW.
Phillips Petroleum Co. Avon Wharf, depth alongside 35 ft. MLW.
Urich Oil Co. depth alongside 35 ft.
Ozol: Oil Wharf, depth alongside 39 ft. MLW.
Hercules; Sequoia Ref. Corp. Terminals, depth 35 ft. MLW.
DENSITY: Average density in the bay is 1016.
FRESH WATER: Available at all piers, rate 25 t.p.h. – 50 t.p.h.
FUEL: Fuel available by barge or at the oil companies own pier. Special blends require some advance notice.
FIRE PRECAUTIONS: Any special instructions are given to the Master upon docking.
CONSULS: All Maritime countries represented at San Francisco.
REPAIRS: The major yards in the Golden Gate region have fully equipped machine-shop facilities capable of handling virtually any job; welding, heavy plate construction, turning, boring, facing, grinding, milling and rolling.

The larger yards also have facilities for pipe, sheet metal, electrical, carpentry, painting, rigging, machining and boiler work.

Southwest Marine, Westwinds, Service Engineering, SFW Corp., Todd and Triple "A" Repair are all located in San Francisco and provide berth space for all types of ship repairs at plant and at any location in the San Francisco Bay area.

DRY DOCKS: San Francisco Shipyard has 3 floating dry docks, 1 with 22,000 tons capacity and 654 ft. long, 1 of 11,400 tons capacity and 542 ft. long, and 1 of 6,500 tons capacity and 450 ft. long. With a recently completed pier, its tie-up and outfitting space totals 4,271 ft.

Continental Maritime - New floating dock, carrying capacity 22,000 tons, LOA 664 ft., length over blocks 579 ft. clear draft over blocks 34.5 ft., clear width for docking 138 ft. Dock will accept vessels up to 70,000 d.w.t.

Williamette *Iron and Steel Company's* yard in Richmond has 5 concrete graving docks. 4 of these docks can each accommodate a vessel 600 ft. long with 83 ft. beam, and 1 dock can handle a vessel 750 ft. × 83 ft.

Tonnage capacity is limited only by the above dimensions. Williamette's facilities include 1,500 ft. of concrete outfitting pier for in-the-water repairs. The graving docks are served by 4 gantry cranes of 60 ton capacity and 2 of 45 ton capacity, and the outfitting pier by 3×45 ton cranes. Williamette has fully equipped shops for repair and conversion work, and mobile units for out-of-yard work at all Bay piers.
Hunters *Point Naval Shipyard:* (Triple A Machine Shop) Under lease from the U.S. Navy, graving docks and repair facilities available to all types of ships. Triple A operates 3 graving docks: (No. 4) 200 ft. beam×1,100 ft. length and 50 ft. depth; (No. 3) 150 ft.×1,000 ft. and 39 ft. depth; (No. 2) 100 ft.×800 ft. and 27 ft. depth, 17 repair berths can serve ships of any length. 12 gantry cranes of 50 ton capacity serve graving docks and repair berths. 50 ft. depth channel from Golden Gate to Hunters Point; unique to West side of San Francisco Bay.

GANGWAY/DECK WATCHMEN: Not required but this service available at Master's request.
OPENING/CLOSING HATCHES: Normally done by stevedores. But crew may open and close before arrival at the dock or after departure.
CUSTOMS ALLOWANCES: Each crew member may land free of duty and/or taxes articles acquired abroad not exceeding $10 in value, plus 50 cigars or 300 cigarettes or 3 lb. of smoking tobacco, and not over 1 quart of alcoholic beverages.
REPATRIATION: All facilities available for crew changes by sea, air or land.
AIRPORT: Distance about 10 miles South of San Francisco and is served by most domestic and international passenger airlines plus 20 international air cargo carriers.
TIME: GMT minus 8 hours. Summertime from first Sunday in April till last Sunday in October – GMT minus 7 hours.
HOLIDAYS: New Year's Day; Lincoln's Birthday (February 12th); Washington's Birthday (February 22nd); Good Friday (afternoon); Memorial Day (May 30th); Independence Day (July 4th); Labour Day (1st Monday in September); Admission Day (Calif. only Sept. 9th); Columbus Day (October 12th); Veteran's Day (November 11th); Election Day (1st Tuesday after the first Monday in November); Thanksgiving Day (last Thursday in November); Christmas Day.

When any of the holidays fall on Sunday, the holiday will be observed on Monday.

On a holiday the longshoremen are working at the overtime rate (time and a half) except on the following days when no work will be performed:

1. New Year's Day;
2. Bloody Thursday (July 5th, memory of 3 longshoremen killed during the 1936 strike);
3. Labour Day;
4. Thanksgiving Day;
5. Christmas Day.

POLICE/FIRE/AMBULANCE: Police, tel. 533-0123; Fire, tel. 861-8020; Ambulance, tel. 431-2800.
TELEPHONES: On some piers telephone connections to ships are available, no extra cost for this service.
SHORE LEAVE: Crew members are allowed to go ashore after passing U.S. Immigration at first U.S. Port.
IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95, issued for the same vessel.
GENERAL: Vessels arrival has to be reported to the U.S. Coast Guard 24 hours prior arrival by Agent.
DEVELOPMENTS: The channel over the bar has been deepened to 55 ft. A new channel will be cut 600 ft. wide and 45 ft. deep (at low water), through the upper bay and the channel through San Pablo and Suisun Bays will be deepened to 45 ft. Manoeuvring areas near Richmond and the refinery terminals will be widened. The Stockton Deep Water Channel will be deepened to 35 ft. and the channel alignment improved.
Improvements to Pier 35 – Passenger Terminal: Improvements to the passenger boarding and unloading facilities at Pier 35, including a new Customs area have been completed.

Pier 35 is the major steamship passenger facility in the Bay Area and the point of disembarkation for tens of thousands of cruise passengers who look forward to San Francisco as a port of call or destination. An improved passenger terminal will be beneficial to our city and its tourist industry.

The area involved contains a 200,000 sq. ft. passenger processing facility on the first floor with a 10,000 sq. ft. visitor waiting area on the second floor.

The cost of the initial phase of the improvement is estimated at $1 million.
Expansion of Rail Capabilities to Pier 94-96: New track construction, as well as reconstruction of existing track, from the Terminal to Southern Pacific's mainline track has been designed to allow unit train access onto the Container Terminal.

The Container Terminal is composed of Piers 94-96. This 65 acre three-berth facility is serviced by 4 rail-mounted cranes and represents a $45 million capital investment. An additional 75 acres of expansion area lies adjacent to the Pier.

Direct rail access to this terminal will position San Francisco as a competitive intermodal port offering direct land-bridge and mini-bridge services through Port facilities. By being able to move containers directly from ship to rail, carriers will have the advantages of reduced costs, better control of containers and less damage.

San Francisco will be the first port in California with this capability.
AUTHORITY: Port of San Francisco, Ferry Building, San Francisco, California 94111. *Tel:* (415) 274-0400. *Telex:* 275940 PSF UR. *FAX:* (415) 274-0528. *Cables:* Sfportcomm. *Contact:* Michael P. Huerta, Executive Director. Roger Peters, Intermodal Manager.

SAVANNAH, Georgia: 32.02 N. 81.07 W. (See Plan)

DOCUMENTS:
3 Crew Lists.
3 Stores Lists.
3 Curio Lists.
3 Manifests.
3 Passenger Lists.
These documents required in order to enter vessel at U.S. Customs.

Direct Foreign Arrival – Quarantine Pratique issued by Public Health Service representative; Cargo on Customs Form 1302, in duplicate with Abstract Manifest of Savannah only cargo; Crew List on Form I – 418, in triplicate; Passenger List on Form I – 418, or other acceptable form, in triplicate; Crew Curio List, in triplicate, with Crew Declaration on Customs Form 1304, or Crew List on Form I–418, in triplicate, with numbers of attached Forms 5129 endorsed thereon for American vessels, List of Sea Stores and Ship's Stores Customs Form 1303, in triplicate; for American vessels, Repair Declaration on Customs Form 226; for American vessels, Certified Crew List; Clearance from Last Foreign Port, if one issued.

Coastwise arrival with Residue Foreign Cargo or Passengers – Form 1301, "Permit to Proceed", in duplicate; Travelling Manifest; Abstract Manifest, in duplicate, of cargo to be discharged in Savannah; Stores List, in duplicate; Crew List, in duplicate; Crew Purchase List, in duplicate, and any Crew Declarations on Customs form 5123 for Savannah for American vessels; Passenger List, in duplicate.

PILOTAGE: Savannah Pilots' Association, 550 E. York, Savannah, Georgia, 31401 (telegraphic); Pilot required all vessels; ETA 24 hours advance notice, change ETA 8 hours; VHF Channel 16 (monitored at all times), 18, 12, 13 – Radio telephone 2182 and 2738 kHz. Pilot boards vessel 1 mile outside Fairway Buoy.

SHIP CHANNEL: Project depth and widths are as follows: Sea buoy to jetties 40 ft. depth×600 ft. width; New Channel Range through Upper Flats Range 38 ft. depth×500 ft. width; The Bight Channel 38 ft. depth×600 ft. width; Fort Jackson Range to Wreck Channel 38 ft. depth×500 ft. width; City Front Channel to Kings Island Channel 38 ft. depth×400 ft. width; Whitehall Channel 35 ft. depth×400 ft. width.

ANCHORAGES: Outside Fairway Buoy, North and N.E. of Fairway Buoy; no anchorages in river.

RESTRICTIONS: 31 ft. at any time; over 31 ft. on incoming tide, no restrictions day or night.

MAX. SIZE: Abbreviation OT: Ocean Terminal. Vessels berthing at OT 14 – 15 – 16 – 17 (slip 1). Vessels 550 ft. to 600 ft. on slack water; vessels less than 550 ft. any time to Berths 14 and 17; vessels docking or undocking at OT 15 – 16, with vessels in OT Berths 14 and 17, can be docked or undocked during slack water.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Vessels route ETA cables to Agents, etc., via Radio Lantana.

TUGS: Tugs join vessels at city front for berths above city; for berths below city, tugs usually meet vessels in vicinity of Fort Jackson or well below berth. Tugs' lines used at all times.

BERTHING: The Georgia Ports Authority operates 12 general cargo berths, 2 tanker berths, 5 container berths and 1 dry bulk cargo berth.

CRANES: *Ocean Terminal:* One 175 short ton gantry crane, one 100 short ton gantry crane, two 50 short ton gantry cranes, one 30 short ton gantry crane, one 100 ton mobile crane, one 30 ton mobile crane. *Garden City Terminal:* Two 35 short ton gantry cranes, one 100 ton mobile crane, one 30 ton mobile crane. Garden City Terminal (container port) – 9×45 short ton container cranes, 9×45 short ton rubber tyred bridge cranes. Other cranes, floating and mobile, are available from various private contractors.

BULK CARGO FACILITIES: Located at the Georgia Ports Authority's Garden City Terminal are 1 dry bulk cargo berth (loading). This facility is suited for the handling of various ores, grains, peanuts, meals and fertiliser materials. The storage at this facility consists of silos for the storage of grain and grain type products as well as flat floor storage for these various other materials.

Colonial Terminals: Kaoline/mineral bulk terminal. Handling rate 800 t.p.h. 12×109 cu.ft. Silos for kaoline. Minerals stored in 8×73,000 cu.ft. storage bays.

SPECIALISED CARGO HANDLING FACILITIES: Located at Container Port, on the up-river end of Berth 60, is a stern Ro-Ro ramp which is situated as to allow a vessel to utilise the Ro-Ro ramp and container cranes at the same time. Accommodating side and quarter ramps also available. At the Garden City Terminal there is a modern cold storage facility. The refrigerated space consists of 3 rooms of approximately 68,000 sq. ft.

BRIDGES: *Eugene Talmadge Memorial Bridge:* 135 ft. vertical clearance for 400 ft. at MHW. Distance between fender uprights – 600 ft. Also see "Developments".

MEDICAL: Agent should be advised as far in advance as practicable for required medical attention. U.S. Public Health Clinic in Savannah, also other extensive medical facilities. Standard information required as to inoculations, vaccinations, etc.

TANKERS: Standard requirements on diameters of load/discharge lines. No facilities for slop (residue) discharge facilities except American Oil Company. A.P.I. of local types of oil is 36 gravity marine diesel fuel. 8 tanker berths in port, max. drafts range from 32 ft. – 38 ft.

DENSITY: Average density of water at 20° Centigrade in channels of Savannah Harbour are:

	High Water	*Low Water*
Savannah River Entrance		
Surface	1.0196	1.0090
Bottom	1.0196	1.0181
Port Area		
Surface	1.0022	0.99915
Bottom	1.0120	1.0075

FRESH WATER: Available at all terminals.

FUEL: Marine gas oil (No. 2 Fuel). Marine diesel oil (No. 4 Fuel Oil). All Intermediate grades from Intermediate 30 (=30 centistokes at 50°C) to Intermediate 420 (=420 centistokes at 50°C) Bunker fuel oil (No. 6 Fuel). Advance notice of 24 hours required.

FIRE PRECAUTIONS: No special fire precautions. All tanker berths have water and fire extinguishers on dock. Fire fighting equipment on dock. Fire fighting equipment on tugs.

CONSULS:

Savannah: Brazil (912) 234-2266. Dominican Republic (912) 234-226 France (912) 236-2491. Germany F.R. (912) 236-8165. Italy (912) 23 5581. Sweden (912) 238-2301.

SHORE LEAVE: Crew members are allowed ashore provided they are not detainees.

IDENTIFICATION CARDS: Identification required by crew members coming ashore. U.S. Immigration & Naturalisation Service issues landing permit, I-94, to any passenger; and I-95, to any crew member of a foreign vessel who is not considered a security risk. This form must be in man's possession any time he is ashore.

DELAYS: With reasonable advanced notice of ETA no delay anticipated in berthing, loading, discharging or bunkering.

DEVELOPMENTS: Container Berth No. 6 under construction.

New bridge under construction close seaward of Talmadge Bridge with clearance of 186 ft. at H.W. Completion expected early 1991.

SHIPMASTER'S REPORT: August, 1980.

Pilotage: Because of difficulties with the port crane and large storing programme we elected to berth starboard side alongside this call.

The Pilot will only undertake this on the flood (since vessel is invariably deep, berthing will only be done on the flood in any case) but because of a delay we were off the berth very nearly at slack water. The Pilot carried out the manoeuvre in the most reassuringly competent manner and I would not hesitate to do the same again if necesary; only with a Pilot prepared to carry out the manoeuvre.

Vessel is swung downriver off the container berth, about 4 cables below the berth.

When landed on starboard side to, it is just possible to plumb the berth with the crane by making the connection to the after crossover.

Discharge: Straightforward; some slight initial delay. Capable of receiving cargo at over 1,000 t.p.h. Our rate 810 t.p.h. overall.

Connection 12 in. 150 ASA. No VRL.

Density 1000 this call.

Storage capacity about 50,000 cu.m. Storage plant only for filling road and rail tankers.

U.S.C.G.: Deck inspection before commencing. Vessel was congratulated on her 'very high standard of equipment and personnel'. Monitoring detail on board throughout. Scuppers unplugged, please.

They are aware of the draft problem at LW and boarded immediately on berthing.

General: Lloyd's Surveyor easily available.

Bunkered lube oils whilst discharging with U.S.C.G. approval.

Can touch up ship's side from quay.

Movements allowed at night, dependent on draft/tide.

Chandler: Southern Marine: Poor service this time despite our cables. This is in contrast to excellent service last time. These services are entirely at the mercy of ship representative.

SHIPMASTER'S REPORT: October, 1980 (updated 1984).

Approach: From East: The coast between Sandy Point to Isle of Palms near Charleston shows up at 40 miles and South of Hunting Island near Port Royal Sound at 35 miles, on radar. Port Royal Channel gives a good radar echo at 15 miles. Soundings give little indication of position until fairly close inshore. Savannah light was observed at 28 miles.

D/F stations at Tybee and Charleston are useful if nothing else is available.

Anchorage: Pilots advise anchoring to N.E. of Savannah Light Beacon. Good holding ground without obstructing arriving and departing traffic.

Arrival Procedure: ETA through Agents.

For deep draft ships proceeding to Ammonia Berth No. 61 about 5 miles above town, Pilot will board between 3 hours to 1.5 hours before HW.

Under 31 ft. can berth/sail any state of tide day or night. Berthing day or night.

Can berth either side to, the generally accepted side to is port side. However, if taking stores try for starboard side as the crane plumbs better, plus the Chicksan arm is in the way of trucks.

For starboard side to, arrive well in time for earliest Pilot boarding time.

The problem is the berth has a reported 36 ft. at LW (actually by lead line we found (Oct. '80) a minimum of 33 ft. 9 in. reduced to datum along the dock face). Therefore before LW you have to pump out about 2,000 tonnes, any delay can be important.

Pilots: Board from large cutter between Savannah Light and Whistle Buoy.

Give plenty of notice as cutter might be lying up-river at pilot station. Based at Cockspur Island in the ship channel. Call "Savannah Pilots".

Pilot ladder must be 8 ft. above water. Side dependent on wind. Berthing Pilot joins from tug using own ladder at Kings Island.

On departure from berth, Pilot requires 1.5 hours notice.

VHF: "Alpha" Channels used frequently.

U.S.C.G. uses 22A, Pilots use 18A, tugs use 19A. Otherwise use 16, 12 and 13.

Channel: The maximum draft of vessels has been 39 ft. with a 6 ft. tide. Normal maximum 37 ft. This can only take place on the flood so as to be on the berth at slack water.

Channel is narrow, less than Houston Ship Canal. Constant dredging is required. From Whistle Buoy to berth is about 3 hours.

Vessel is swung in Argyll Turning Basin off the container quay. 24 hour navigation is undertaken.

From soundings from Savannah Light Beacon to Berth No. 61 proceeding inwards 3 hours before Savannah HW (2.5 m.) a minimum of 1.6 m. under keel was found with draft 11.15 m.

Berth: Depth: See "Plan". Minimum depth reduced to datum found to be 33 ft. 9 in. along jetty face.

Berth No. 61: Owned by G.P.A. and leased to Occidental.

Concrete jetty on piles with centre section connected by roadway to shore, and mooring dolphins either end connected to jetty by catwalk. Length of centre section 266 m. Good fendering.

The upriver dolphin is not used due to damage. Can turn gangway out before arrival.

Pilot with the aid of powerful tugs swings vessel in very competent manner at Argyll Turning Basin.

Density: 1001 to 1002.

Moorings: Basic 3, 2, 2, each end. Forward headlines (3) go to Ro-Ro dock and breastlines to dolphin with springs to main jetty. Due to damage the upriver dolphin cannot be used so all stern and breast lines go to Grain Berth No. 62.

Springs out first, last in. Mooring boat used. Port Authority mooring gang require 4 hours notice.

Tugs: Atlantic Towing Company and Crescent Towing and Salvage Company of Savannah, Inc. based along town water front. Several large and powerful tugs. Two used, one each end, American style, tie up with own lines alongside. One and a half hours notice required.

U.S.C.G.: Very co-operative. Although Agent will try to get them to board in river for pre-inspecton, they board at dock. Carry out Check List and inspection before cargo allowed to be worked. Takes about 30 minutes.

One U.S.C.G. rating on board at all times (8 hour shifts). Strict on pollution.

The U.S.C.G. do not seem to mind which way round the ship is berthed. Scuppers to be plugged.

Discharge: Into mobile Chicksan (as berth only leased). After manifold if starboard side too. Maximum rate about 1,200 t.p.h. but generally nearer 900 t.p.h. to 1,000 t.p.h. Connection 12 in. 150 ASA. No vapour return line. Shore tank capacity 45,000 tonnes, which fills rail and road tankers. Takes about 45 minutes to connect/disconnect. Shore labour assist. Shore personnel always in attendance. Manager very helpful.

In light ship condition we had 18 m. air draft which did not create any difficulties.

General: Lloyd's Surveyor easily obtainable from Jacksonville. Fresh water from jetty, require 6 hours notice, especially at weekends.

Lube oils whilst discharging with U.S.C.G. permission. Stores lorry able to get close alongside ship.

Ship's crane (if starboard side to) will just plumb after end of jetty.

Liferaft service (Beaufort) at Southern Ship Supply – 24 hour service.

Shoreline infested with rats, snakes and big spiders.

Chandler: Southern Ship Service, good fresh produce.

Town: About 5 miles away. Can telephone for taxi – free of charge local calls, from hut at grain berth about 100 yards from gangway.

Airport 6 miles South of town centre with regular flights to Atlanta International, etc.

SHIPMASTER'S REPORT: August 1990.

Charts: B.A.Charts No. 2807 and 2865.

Approaches: New exploration towers around 80° 10′ W., about 45 miles offshore give a guide.

Coastline low, first indications on radar at 30 miles.

Savannah Light good, but Racon not operating (Pilots report that it rarely does).

About 30 miles East of the Gulf Stream axis, a Southerly set of about 1 knot was found.

Pilots: Pilot boards from large fast blue hulled cutter named 'Georgia' or smaller cutter called 'Savannah' at Fairway Buoy. Pilot will advise height of ladder, dependent on cutter.

Pilot Station at Cockspur Island inside breakwater at Lat. 32° 02.05′ N., Long. 80° 54.20′ W. Just West of the Pilot Station is a U.S.C.G. base.

Usual East Coast U.S.A. practice, tug master actually berths and unberths vessels.

Pilotage to Ammonia Berth (No.61) at Garden City is about 2.5 hours.

VHF: Pilots generally use Channel 14.

Anchorage: North of Savannah Light Tower, exposed.

Entry: For gas carriers no night transit inward or outward, unless totally gas-free, between 1600 hrs. (last pilot boarding time) and 0700 hrs. (first pilot boarding time).

U.S.C.G. do not escort vessel, unlike some other U.S. ports.

Channel: The range light at Fort Scriven is conspicuous. Pilots report 33 ft. maximum draft any state of tide, or 39 ft. H.W. to Berth No.61, above this berth to Port Wentworth 20 ft. at L.W. Maximum length 1,000 ft.

Actually found 36 ft. (reduced to M.L.W.S.) as minimum depth to Berth No.61. Least depth about 1 mile seaward of Talmadge Bridge.

New Bridge nearly completed, just seaward of Talmadge Bridge. Completion due early 1991. Vertical clearance MHW – 185 ft. When commissioned, the old bridge will be removed.

Tugs: 9 tugs up to 4,000 i.h.p. available from Atlantic Towing (now under new name) and Crescent. Two tugs and tug's lines generally used. Tugs join just upriver of bridge.

Berth: Ammonia Berth is Berth No.61 at Garden City, just above container quays. Berth is able to take up to 75,000 cu.m. gas carriers, but restricted due to river draft.

Always port side too, head upriver. Vessel swings in adjacent turning basin on departure.

Concrete dock with reasonable fendering. Mooring dolphin either end of dock connected by catwalk.

Mooring leads good (2, 2, 2), if bollards on adjoining docks used. No mooring boat, using wires as head or stern lines takes a long time.

Cargo: Mobile Chicksan which plugs into quay (12 in. 150 ASA coupling). It can take a long time to disconnect, if Chicksan diesel power plant fails to operate, which it is prone to.

Discharge to 45,000 tonne tank behind Soya Bean Silo. Actual pumping distance is about 0.5 miles.

Sometimes VRL from shore used (out of commission this visit).

Fast pumping at around 850 t.p.h. at maximum B.P. of 6.8 kg. (100 p.s.i.), back pressure generally less.

Only NH3 handled, terminal likes product cold – no warmer than −32°C.

Surveyors (Saybolt) prompt and read draft when vessel berths.

Terminal representative onboard throughout discharge, in Cargo Control Room with UHF set.

U.S.C.G. very attentive and always board vessels on arrival.

Pipework checked for soft patches – leaks, if any found, vessel will nearly always be refused permission to discharge.

Facilities: Fresh water available on jetty. Good pressure, no charge.

Stores trucks allowed alongside forward up to Chicksan position.

Bunkers by barge during discharge.

Public telephones near Soya Bean Silo office, or Agent leaves his mobile on board.

Local airport very near at hand with frequent flights to Atlanta International.

Chandler – We obtained some bonded stores from Southern Marine Supplies. Prices high compared with Tampa, and range limited.

AUTHORITY: Georgia Ports Authority and East Coast Terminal. Savannah Port Authority.

The Savannah Port Authority does not operate terminals; however, is engaged in port and industrial development for the City of Savannah and Chatham County, Georgia. Harbour Regulations, pier and bulkhead lines, etc., come under the jurisdiction of this organisation.

Georgia Ports Authority, P.O.Box 2406, Savannah, Georgia 31402. *Tel:* (912) 964-3811. *Telex:* 804782 and TWX 810-784-5634. *Cables:* Gaports. *FAX:* (912) 966-3615. *Contact:* George E.Nichols, Executive Director.

SEARSPORT, Maine: 44.28 N. 68.56 W. (See Plan)

LOCATION: The Port of Searsport is located on Penobscot Bay, approximately 112 road miles East of Portland, and 20 miles from Bangor.

ANCHORAGES: No restrictions on anchoring.

RESTRICTIONS: No restrictions at night. Deep draft vessels brought in only on high water. Draft in concurrence with docks, 32 ft. low water. 10 ft. rise in tide – approach to Searsport 35 ft. – Bay 60 ft. limit.

MAX. SIZE: Size of vessel restricted to 38 ft. draft in harbour area. No outside installations at the port yet.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to New York Quarantine Station.

DOCUMENTS:

Clearance from Last Port.

2 copies of Form 1300 (Master's Oath).

2 copies of Form 1301 (General Declaration).

3 copies of Form 1302 (Inward Foreign Cargo Manifest).

NOTE: Form 1302 will only be accepted.

2 copies of Form 1303 (Ship's Stores Declaration) (Including Narcotic Medicines).

Form 1374 Outward Foreign Manifest.

2 copies of Form 1304 (Crew Effects Declaration).

2 copies of I-418 (Crew List).

Also available: Vessel Register, Safety Equipment Certificate, Lo Line Certificate, Certificate of Financial Responsibility, (Oil Pollutio and U.S. Tonnage Tax Receipts.

PILOTAGE: Ship's agent notifies Pilot approximately 48 hours advance of arrival, correcting at 24 hours. Pilot's boat called on Chann 16.

Vessels from South and West, Pilot boards at Monhegan Islan (Buoy 14M). Vessels from East, Pilot boards at Matinicus (Buoy 2WB The pilot station is located on Matinicus Rock Island. Pilot boards Wooden Ball Light Bell Buoy "2WB." Lat. 43° 49′ N., Long. 68° 50′ W

The pilot boat is a fishing boat with a white hull showing international signals.

Pilot signal: 3 long and 2 short on ship's whistle.

Radio contact: VHF Channel 16 (156.8 MHz).

36 and 24 hours ETA requested, cable "Penbay – Belfast/Maine via Chatham Radio.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Tugs in Searsport Harbour use Channels 16 and 13. Vesse arriving Searsport go through radio station at Chatham, Mass., R installation, SSB station or a VHF public correspondence station.

TUGS: Penobscot Bay Towing Co., Marshall Wharf, Belfast, Mai 04915. Tel. (207) 338-3000. 24-hour service. Requested that orders tugboat service be given during normal business hours, 24 hours advance.

Tugs: "Patrick McAllister", 1,200 h.p.
"Brian F", diesel 1,200 h.p.
"Roderick McAllister", diesel 1,200 h.p.
"Bronx", diesel 1,800 h.p.

Radio: Ship to ship, VHF Channels 16-13-10.

Sea Pilots dock ship with tug's assistance.

BERTHING: Draft conditions govern arrival and departures.

Bangor and Aroostock Pier: Length 800 ft., width 100 ft. Depth alongsi (East side) 34 ft., (West side) 30 ft.

This pier handles a wide variety of cargoes including petroleum, fore and agricultural products, such as newsprint, tapioca, long lo dimension lumber, potatoes, etc.

Cargoes can be off-loaded or loaded directly from or to railroad ca or trucks. There are 4 warehouses on the facility available for import export cargoes.

C. H. Sprague Dock: Length 614 ft., depth alongside East side 33.6

This facility has and can handle many bulk cargoes, including sa coal, gypsum, potash, bauxite, liquid chemicals, and Bunker petroleum. There are 3 towers for discharge of bulk cargoes.

Turning basin off docks, depth 34.5 ft. and 1,200 ft. width.

STEVEDORES:

Weekdays:

Order gangs by 1700 hrs. for following day 0800 start.

Order gangs by 0900 hrs. for same day 1300 start.

Order gangs by 1300 hrs. for same day 1800 start.

Weekends:

Order gangs by Saturday 1200 hrs. for a Sunday 0800 start.

Order gangs by Saturday 1200 hrs. for a Monday 0800 start.

MEDICAL: No advance notice required by Agent. 1 hospital, Wal County, which takes bed patients.

TANKERS: 2 berths at Searsport – 2 for No. 6 oil and 1 for light oil an gas. 2×8 in. hoses. 34 ft. LW.

DENSITY: Average density 1024.

FRESH WATER: Available by tug for boilers only at rate of tug hire anchorage. Drinking water available at piers.

FUEL: No. 6 oil at C. H. Sprague Dock. Light oils delivered by tank tru at dock.

FIRE PRECAUTIONS: At certain oil piers information given Shipmaster upon arrival at pier. Ample fire protection, salt-water line sprinkler system on pier, local fire department.

CONSULS:

French: Dr. Paul O. Proudian, 776 Main Street, Westbrook, Maine.
Finnish; Frank W. Bjorklund, 163 Main Street, Norway, Maine.
Italian: Dr. Domenica A. Santoro, 43 Deering Street, Portland, Main
Norwegian: Allan Kjos-Hansen, 30 Mayer Road, Portland, Maine, Vi Consul.
Panamanian: Mary Navarro de Carrillo, Lafayette Town House, Portlan Maine.
Swedish: Martin Johnson, Vice Consul, 443 Congress St., Portlan Maine.

REPAIRS: All types of machinery repairs.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Ship's crew may open hatch af longshoremen boarded ship.

CERTIFICATES:

Load Line Certificate.

Certificate of Foreign Clearance.

Ship's Safety Certificate.

U.S. tonnage Tax Certificate of previous trip if have them.

Radio Operator Licence.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per man. Wi and/or Spirit allowance 1 bottle per person.

CARGO GEAR: No additional cargo gear necessary.

REPATRIATION: Arrangements must be made with Agent in advance by telegram.

AIRPORT: Bangor International Airport, 30 miles, Delta, United Airlines.

HOLIDAYS: New Year's Day; Washington's Birthday; Patriot's Day; Memorial Day; Independence Day; Labour Day; Thanksgiving Day; Christmas Day and Veteran's Day. Possible to get gangs to work all days except on Labor Day and Christmas.

POLICE/AMBULANCE/FIRE: Police Tel: 548-6372; Ambulance Tel: 548-2900; Fire Tel: 548-2900.

TELEPHONE: Arrangements can be made to have phone put on ship, but most docks have pay phones.

IDENTIFICATION CARDS: Form I-95 must be filled out on arriving unless seamen has had a prior one made out for a previous arrival on same ship (on plastic card).

DEVELOPMENTS: Directly across from the Port of Searsport lies Sears Island. A major new cargo facility and industrial park will be constructed. Emphasis will be directed toward potential user groups, equipment assembly and manufacturing, plus a full spectrum of forest products storage and shipment.

This development will feature modern container-handling facilities and breakbulk handling capability.

AUTHORITY: Maine Department of Transportation, Division of Ports & Marine Transportation, State House Station No. 16, Child Street, Augusta, Maine 04333. *Tel:* (207) 289-2841. *FAX:* (207) 623-1109.
Contact: R. D. Elder.

Town of Searsport, Maine, P.O.Box 499, Searsport, Maine 04974.
Contact: Wayne Hamilton, Harbour Master. Tel: 548-2985.

SEATTLE, Washington: 47.36 N. 122.20 W. (See Plan)

PORT LIMITS: Port of Seattle limits are co-extensive with the boundaries of King County in which Seattle is situated. A vessel has "arrived" when it has tied-up to a berth.

DOCUMENTS (on arrival from foreign):

Clearance from Last Foreign Port.
2 Crew Lists on Form. I-418.
2 Passenger Lists on Form I-418 (if applicable).
Passenger Declarations if applicable.
2 Stores Lists.
2 Crew Purchase (curio) Lists.
2 Manifests of Cargo for discharge on CF1302.

If first arrival port on an inward voyage, must also have 2 sets of Manifests of complete cargo on 1302, one for Customs at this port and the other for use as a "Travelling Manifest" to go forward to other discharge ports.

(A) – For U.S. Public Health Quarantine Boarding Officer: "Quarantine Declaration" on Form PHS.43. (Only required if boarding on arrival is necessary) see "Health" before first U.S.A. port.

(B) – For U.S. Dept. of Agriculture Boarding Officer: "Shipmaster's Declaration and Warning Notice" on Form AIQ.43.

(C) – For U.S. Immigration Boarding Officer:
Crew List on Form I-418 visaed by U.S. Consul abroad.
Passenger List on Form I-418.
Attachment to Passenger List on Form I-92.
Form I-94 for each passenger.
Form I-95 or ID Card (Form 184) for each crewman. (These are reusable for multiple entries, but for seamen on first trip to United States a new Form. I-95 must be ready for presentation on arrival.)

(D) – For U.S. Customs Boarding Officer and Agent or Broker:
3 copies Crew List (Form I-418).
3 copies Cargo Manifest on Form 1302.*
3 copies Stores List – Form 1303.*
3 copies Crew Purchases or Curio List (Form 1304).*
3 Passenger Lists on Form I-418.
For U.S. Ships – Declaration re foreign repairs on Form 3415.
For U.S. Ships – Certified Crew List from last U.S. port before going foreign.

*At subsequent U.S. ports of call 2 copies required of extracts Cargo Manifests of cargo for the port concerned, and 2 copies of lists of stores and curios remaining on board.

PILOTAGE: Compulsory for all vessels except those on coasting trade. Pilots may be obtained from Port Angeles Pilots' Association, Seattle, at short notice. Inward, Pilot boards vessel at pilot station off Port Angeles.

Port Angeles Pilots: Pilotage service furnished to any port or place on Puget Sound and its adjacent inland waters.

Pilot stations are located on Ediz Hook, Port Angeles and Seattle Washington.

Vessels desiring a Pilot should proceed to a position 0.25 miles East of Ediz Hook, where Pilot will board the vessel. If a Northwest wind, sea, or swell exists, vessels are requested to proceed to a position inside and South of Ediz Hook to obtain a lee and facilitate boarding.

In clear weather, vessels should indicate their desire for a Pilot by hoisting the International Code Flag "G" and by blowing the whistle signal of 1 long, 1 short and 1 long blast.

In fog or thick weather, the blowing of this whistle signal will attract the attention of the pilot station and repetition of this signal will assist the pilot boat to locate the vessel.

The pilot station is located 1,200 yards, 277° from Ediz Hook Light. At night, the station will show from a mast, 3 vertical lights, the highest and lowest being red and the middle one green, to indicate that the pilot boat is en route to the ship. The pilot station is equipped with radar to locate and track vessels. The pilot boats, 'Juan de Fuca' and 'Puget Sound' are equipped with radar.

Communications: Vessels may ensure prompt service by advising their ETA, Port Angeles, 24 hours in advance, via radio to station KLB, addressed to Port Angeles Pilots, Seattle, Washington. A vessel may also advise the pilot station, Port Angeles, Washington, addressed to "Pilots Port Angeles" of their ETA, and amended ETA, when subsequent conditions make it necessary. The message is transmitted immediately from KLB to Port Angeles via telephone. The pilot station, Port Angeles, monitors VHF Channels 14 and 16 continuously and transmits on Channel 13.

At the time of passing Cape Flattery, inbound vessels are requested to re-affirm their ETA by calling the pilot station directly, using VHF calling Channel 16 and transmitting on Channel 13.

Channel 14 is for Vessel Traffic System only.

Pilot Ladder Requirements:

1. Please contact pilot boat via voice radio (Channel 13) approximately 30 minutes prior to arrival for desired lee.
2. The ladder must be kept clean and used solely for embarking and disembarking Pilots.
3. Rigging of the ladder, along with embarking and disembarking Pilot, must be under supervision of a licensed officer.
4. The ladder must be made in 1 length and not consist of 2 lengths shackled or lashed together, and should be equipped with spreaders about 10 ft. apart to comply with SOLAS Regulation 17, Chapter 5.
5. The pilot boats have their own lights to illuminate the pilot ladder, but a standby light should be ready for an emergency.
6. The area of the deck where the Pilot boards and leaves must be well lighted and the area must be clear of all obstacles to ensure a safe passage for the Pilot.
7. *No tag lines, pull-up ropes, or trailing lines may be attached to the lower ends of the ladder.*
8. Ladders must be rigged well clear of discharge and water outlets and at a place near midship which affords the best lee for the Pilot. At no time should the ladder be rigged near the stern of the vessel.
9. Means must be provided to allow the Pilot to pass safely onto the ship's deck. Where portable stanchions and bulwark steps are used for this, the portable stanchions must be rigidly attached to the ship's structure and not the steps. The bulwark steps must also be securely fastened.
10. The ladder must be in good condition. The treads must remain horizontal when used and the upper surface must have a rough nonskid quality.
11. Manropes approximately 3 in. manila in circumference, a heaving line and a ring buoy with a self-igniting light must be provided.
12. If your vessel is to take a load of logs, make sure the Agent makes arrangements to have a cat-walk to provide safe passage to and from the ladder.

Accommodation Ladders for Embarking or Disembarking of Pilots:

1. All vessels where the distance from sea level to the point of access of the ship exceeds 9 m. (30 ft.) at any time, should carry on each side an accommodation ladder. The ladder is to be so sited that when in use the lower end of the ladder shall rest firmly against the ship's side under all conditions of roll and heel, clear of all discharges, and within the parallel length of the ship.
2. A conventional pilot ladder should be rigged just abaft the lower platform of the accommodation ladder. The pilot ladder should be secured firmly to the lower platform to allow access between the pilot ladder and accommodation ladder. The pilot ladder should extend at least 2 m. (6 ft.) above the lower platform of the accommodation ladder. Manropes to be provided and rigged alongside the pilot ladder.

ANCHORAGES: Extensive anchorage in Eliott Bay, depths of 90 ft.

RESTRICTIONS: Overhead power cables at Burlington Northern Railroad Bridge with a vertical clearance of 155 ft.

MAX. SIZE: Controlled by depth at berth.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available, 2nd tug normally used.

BERTHING: Over 46 berths for ocean-going vessels. Depths alongside, 10.6 m. – 21 m. MLLW.

Terminal No.	*Total Length (m.)*	*Depth (m.)*	*Remarks*
2	244	12.0	Leased to North Star Forwarding – barge berths.
5	537	13.5	3 container berths.
	166	—	Undeveloped berth (one).
18	1,844	12.0 – 15.0	Container, breakbulk, bulk, Ro-Ro, non-petroleum products. 352 reefer plugs.
25	482	15.0	2 container berths. 120 reefer plugs.
28/30	823	12.0	Container and breakbulk. 2 container berths and 2 general cargo berths.
37	270	15.2	1 container berth. 186 reefer plugs.
42	290	15.2	1 container berth
46	336	15.2	1 container berth. 217 reefer plugs.
48	585	10.6	
66	436	8.5 – 10.6	3 berths. Passenger ship terminal.
86	130	21.0	Export grain terminal operated by Cargill, Inc.
91	3,058	10.66	General cargo, auto import, fruit, frozen meats and seafood. Oil tank farm handles bunker fuel and waste oil products. Chill space 53,802 cu.m. Liquid storage 213,000 barrels.
105	338	12.0	Barge facility.
115	366	12.0	Steel imports, fish and crab processing, general cargo.
	122	4.25	Barge berth.

SPECIALISED HANDLING FACILITIES: Terminals 18 and 20 combined and now designated as Terminal 18. Pipe-lines are available to carry molasses, tallow or other non-petroleum liquid cargo, and has a tank farm for storage.

Terminal 105 – 2 berth, barge operation – Crowley Maritime.

Terminal 115 – 2 berths, capacity, import steel.

Terminal 115 – Jore Corporation Barges, has specialised finger piers, to handle container-to-barge operations.

Terminals 5, 18, 25, 30, 37, 42 and 46 – Container Terminals, equipped with large container cranes and yards to handle van shipments. Depth alongside, Terminals 18 and 25 – 50 ft. Terminals 5, 30, 37 and 46 – 40 ft.

Pier 86 – fully automated, deep water, Grain Terminal. 1 berth, length 600 ft. (Max. LOA 1,400 ft. using dolphins). Depth of water 70 ft. at MLLW. Grain Terminal: capacity 4.2 million bushels, loading rate 3,000 t.p.h. via twin conveyor belts.

CRANES: *Terminal 5:* 5×50 ton container cranes.
Terminal 18: 6×45 ton container cranes and 1×50 ton revolving crane.
Terminal 25: 3×45 ton and 1×33 ton container cranes.
Terminal 30: 1×50 ton gantry, 3×50 ton container cranes.
Terminals 37, 42 and 46: 6×45 ton container cranes.
Terminal 115: 1×50 ton gantry crane.

STEVEDORES: 40 local gangs available. Gang requirements must be made known to the contracting stevedore prior to 1100 hrs. on day before vessel plans to dock. Order before 1030 hrs. on Saturday for Saturday afternoon, Sunday, and Monday.

DENSITY: Salt water in Outer Port. Fresh water inside Canal Locks.

Certified Crew List.

PILOTAGE: Alaska Marine Pilot's Association, Box 273, Homer, Alas 99603. 48 hours advance notice. 2182 calling frequency KC – KTE 21. Anchorages as noted on chart. C. & G. S. 8529 Resurrection Ba
Pilot boards at Cains Heads in Resurrection Bay.

MAX. SIZE: Harbour depth 35 ft. MLLW.

ANCHORAGE: Suitable anchorage in 30 fathoms depth; available f deep draft vessels at the head of the Bay, South of marked buoy

AGRICULTURE: See "Agriculture" before first U.S.A. port (Alban

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illne Reports made to Seattle Quarantine Station.

RADIO: KWA 346 (AM) Alaska Railroad Dock, frequency monitored 2182 kHz. KWA 364 (SSB) Alaska Railroad Dock frequency monitored 4-6-8-12 Megs.

TUGS: Tug service available. Anderson Tug & Barge (907) 224-5506.

BERTHING: *Alaska Railroad Corp.:* 24 hour berthing. Berthing permit required. Advance notice of 48 hours requested.

200 ft. by 735 ft. steel and concrete finger pier.

East Side — 450 ft. long with 35 ft. depth of water (10 ft. out from dock face).

West Side — 600 ft. long with 35 ft. depth of water.

South End — 200 ft. long with 35 ft. depth of water.

(East and West Berths serviced by railroad spurs).

Ro/Ro capability provided through a triple deck, articulating ramp along West Berth.

CRANES: East and West Dock Face – 2 gantry cranes. Maximum capacity – 45 short tons, maximum radius – 105 ft. Forklifts ranging up to 35 ton capacity.

Operator: The Alaska Railroad Corp., P.O.Box 95, Seward, Alaska 99664. Tel: (907) 224-5550.

BULK HANDLING FACILITIES: *Terminal Specifications:*

Unit Train Unloading	3,000 tonnes*/p.h.
Stacking	
Rail-mounted stacker/reclaimer	1
Stacking capacity per hour	3,000 tonnes
Reclaiming capacity per hour	1,000 tonnes
Shiploading	
Fixed position slewing shiploader	1
Loading capacity per hour	1,000 tonnes
Ship berth	1
Maximum d.w.t.	120,000
Maximum draft (MLLW)	58 ft.
Additional Data	
Seward Coal Terminal Area	33.91 acres
Total conveyor length	6,590 ft.
Stockpile capacity	120,000 tonnes
Annual throughput capacity	3,000,000 tonnes

*1 tonne is equivalent to approximately 2,204 lbs.

Operator: Suneel Alaska Corporation, P.O.Box 1789, Seward, Alaska 99664. Tel: (907) 224-3120. Telex: 25353 Suneel Swrd.

City Dock Facilities: City Dock: Located inside Small Boat Harbour. Up to 100 ft. vessels. Depth 15 ft. MLLW.

Fourth Avenue Dock: Up to 300 ft. vessels. Depth 35 ft. at MLLW. Power available. Mobile cranes to 100 tons.

Seward Marine Industrial Centre: Basin is 660 ft. × 1,200 ft. with depth of 21 ft. at MLLW.

Syncrolift shiplift 300 ft. × 80 ft. with 3,600 ton lift capacity.

Adjacent 100 acre industrial site.

Light cargo dock 300 ft. long with 21 ft. at MLLW.

STEVEDORES: Northern Stevedoring and Handling Corporation supply labour force.

MEDICAL: Fully staffed 30 bed hospital. All medical facilities available.

DENSITY: 1.0248 at Mean High Water.

FRESH WATER: Available at East and West berths. 4 in. water line; 67 lb. pressure.

FUEL: Marine Gas Oil available from pipe-line at South & West Berth. Marine Diesel Oil available from same pipe-line during Summer months only (Maritime Oil, Vancouver, B.C.).

REPAIRS: Radio, radar, welding, machining and light engine repairs can be effected.

DRY DOCKS: Syncrolift available. See "Berthing".

OPENING/CLOSING HATCHES: Handled by crew, if done before berthing ship. By stevedores if tied to dock.

AIRPORT: 1 mile. 1 flight daily to Anchorage.

TIME: Alaska Standard Time.

HOLIDAYS: All holidays are time and one half. Cargo can be worked on all except Christmas, New Year's and Labour Day.

POLICE/FIRE/AMBULANCE: Tel: 911.

IDENTIFICATION CARDS: U.S.C.G. Port Security Card or Seaman's Card required.

AUTHORITY: City of Seward, P.O.Box 167, Seward, Alaska 99664. *Tel:* (907) 224-2231. *FAX:* (907) 224-3248. *Contact:* Foster Singleton, Harbour Master.

SITKA, Alaska: 57.03 N. 135.20 W. (See Plan)

Located on the Western side of Sitka Sound, Baranof Island. Open all year.

APPROACHES: 3 natural channels: Western, Middle and Eastern.

DOCUMENTS: See "Anchorage, Alaska".

PILOTAGE: Pilot pick-up point – close vicinity of Eckholm Light.

ANCHORAGE: Jamestown Bay.

MAX. SIZE: Harbour depth 22 ft. MLLW. Tides: diurnal range – 9.9 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

CUSTOMS: Quarantine, Immigration and Customs, local.

TUGS: 7 tugs 300 h.p. to 1,200 h.p.

BERTHING: 3 wharves.

1. Conway Dock: Berthing length 160 ft., depth 30 ft. MLLW. No cranes, 3 lift-trucks; 10,000 sq. ft. covered shed space; fresh water.

2. Japonski Dock: Government dock for limited commercial use only.

3. Alaska Lumber & Pulp Co.: (Private) Berthing length 700 ft., depth 35 ft. LW. Walking cranes only. Not less than 12 lift-trucks, 30,000 sq. ft. covered shed space; fresh water. (Located at Silver Bay, Sawmill Cove, 4 miles South of Sitka). 30,000 sq. ft. open storage.

STEVEDORES: 3 gangs.

MEDICAL: Sitka Community Hospital and S.E.A.R.H.C. Hospital on Japonski Island.

DRY DOCKS: 1×400 ton floating dock at Jamestown Bay, approximately 3 miles East of Central Sitka.

REPAIRS: Light repairs only.

FRESH WATER: Available.

FUEL: Not available.

TRANSPORTATION: Air and ferry.

AUTHORITY: City and Borough of Sitka, 304 Lake Street, Sitka, Alaska 99835. *Tel:* (907) 747-3439, 747-3294, 747-3245. *FAX:* (907) 747-7403. *Contact:* Brian G. Bergman, Harbour Master.

SKAGWAY, Alaska: 59.27 N. 135.18 W. (See Plan)

Located at the Northern end of Lynn Canal, 14 miles North of Haines.

APPROACHES: Via Lynn Canal.

DOCUMENTS: See "Anchorage, Alaska".

PILOTAGE: Pick-up point located in vicinity of Point Retreat.

MAX. SIZE: Harbour depth 30 ft. running out to 300 ft. Tides diurnal range 16.7 ft. Also see "Berthing".

ANCHORAGE: In Lutak Inlet, 14 miles South of Skagway.

HEALTH: See "Health: All ports" before first U.S.A. port (Albany). Illness Reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

CUSTOMS: Quarantine, Customs and Immigration available in Skagway.

TUGS: 2 tugs available at Skagway.

BERTHING: 1. White Pass and Yukon Railroad Dock: Containerised cargo to Vancouver and Whitehorse is the principal use, also used for tankers and cruise ships. 1,240 ft. long, 100 ft. wide; depth at face varies from 20 ft. to 43 ft. No covered storage. Open storage 80,000 sq.ft. 1 fork-lift is available. Containers presently loaded and unloaded with ship's gear. 2 straddle cranes for containers on dock. Deck for 400 lbs. per sq. ft. loading.

2. Skagway Terminal Co.: Ore loading facility. 1,000 ft. berth, fender dolphins, and walkway. 42.5 ft. deep at face. Used for bulk cargo ships and cruise ships. Vehicle ramp available. Adjacent to the berth is a warehouse of 108,000 sq.ft. Also available are 50 acres for open storage. Loading equipment consists of 1 fixed loading spout with a capacity of 1,500 t.p.h.

3. Skagway Terminal Co.: Cruise vessel dock. 960 ft. berth, fender dolphins and walkway (built 1990).

4. State: City joint use ferry pier – barge off-loading facility. Upland storage of 120,000 sq.ft.

5. City of Skagway: Small boat harbour, approx. 100 stalls. Fuel available. Water available in temperate seasons.

STEVEDORES: 3 gangs.

MEDICAL: Medical clinic and one nurse.

REPAIRS: None.

SURVEYORS: Not available locally.

WATER: Available in temperate seasons only.

FUEL: Available at Chevron Dock and small boat harbour.

AIRPORT: One mile from harbour. Scheduled and charter flights available daily. 3,400 ft. paved runway.

POLICE/AMBULANCE/FIRE: Emergency 911. Police Tel: 983-2301. Ambulance Tel: 983-2300. Tel: Fire 983-2300 or 911.

EMERGENCY CO-ORDINATON CENTRE: Skagway Fire Hall, Tel: 983-2300 or 911.

TELEPHONE: Pay phone at top of small boat harbour ramp.

BANKS: National Bank of Alaska, Skagway.

STORING: See "Prelims".

Storing at White Pass Railroad Dock:

1. By truck.
2. No barge storing.
3. Trucks can proceed alongside, except south 400 ft. of dock.
4. Fork lift trucks can be used.
5. Customs perform supervision of loading/unloading of all bonded stores. Customs/Immigration Tel: 983-2325
6. Local riggers are available.

GENERAL: Highways: Klondike Highway open all year round.

AUTHORITY: City of Skagway, P.O.Box 415, Skagway, Alaska 99840. *Tel:* (907) 983-2297. *FAX:* (907) 983-2151. *Contact:* Port Manager or Harbour Master.

SMITHS BLUFF, Texas: 30.00 N. 93.59 W. (See Plan)

DOCUMENTS, PILOTAGE, RADIO, etc.: Refer to "Port Arthur".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Meet vessel in Neches River before arriving at berth. Normally 2 tugs required berthing/unberthing.

BERTHING:

Sun Co.: Distance from sea 47.6 miles, depth at berth 40 ft.

Sun Marine Terminals:

Operators: Sun Marine Terminals, P.O. Box 758, Nederland, Telex: 77-9469. Tel: 409-727-2301.

Type of terminal: Handling crude oil and lub.

Density: Fresh water.

Controlling Depth: From channel to berth – 39 ft. – 40 ft. Actual depth alongside – 40 ft.

Vertical clearance at HW: 136 ft.

Max. length of berth facility: 150 ft.

Max. length of vessel to be moored safely: 900 ft.

Hoses: 4×12 in. (Crude). 6×6 in. (Lub).

Usual Discharge Pumping Capacity: 50,000 bbls.p.h. (Crude). 2,000 bbls.p.h. (Lub).

Usual Discharge Pumping Capacity: 50,000 bbls.p.h.

Ballast Facilities: Deballasting facilities available with prior notification.

Fresh Water: Available on 24 hour basis.

Fuel: Available ex-wharf.

Tugs: Per Pilot's requirements.

Anchorage: Max. draft 39 ft. (2 anchorages).

Report: Sun Marine Terminals is located on the Neches River 47.6 miles from the Sea Buoy. The terminal is owned, operated and used by Sun Company. The controlling depth of the channel and turning basin is 40 ft. The density of the water at this terminal is 1000. The maximum size vessel normally received at this terminal is approximately 76,000 d.w.t. at Berth No. 1 and 130,000 d.w.t. at Berths No. 2, 3, 4 and 5. Vessels are docked and undocked day or night. Vessels are cautioned to keep mooring lines tight and be on alert for passing traffic.

2 tugs are normally used while docking and 1 while undocking. Sabine Towing requests 3 hour advance notice when ordering tugs.

Vessels are berthed head upstream port side to with a usual arrangement of mooring lines including 3 forward springs and 3 aft springs. Head and stern lines run by launch. Pilots require one-way traffic and daylight navigation for all vessels in excess of 85,000 d.w.tonnes (83,700 LT). 2 lay-berths are provided across the channel. These consist of trenches dredged into the entrances of an unused ox-bow in the river. There are mooring points but most vessels lie to an anchor in the trench.

Sun Marine Terminals provides a gangway.

Fuel and fresh water are available at the terminals.

The terminal is fenced and guarded.

Pollution Control: 4,500 ft. of spill boom launch.

Fire: There are foam nozzles and monitors on the dock.

MEDICAL: All facilities available.

DENSITY: Fresh water.

FRESH WATER: Available ex-wharf.

FUEL: Available ex-wharf.

CONSULS: Nearest at Houston.

REPAIRS/DRY DOCKS: See "Port Arthur".

GANGWAY/DECK WATCHMEN: Not required unless crewmen detained by Immigration.

CUSTOMS ALLOWANCES: 300 cigarettes and 1 quart wine or spirits for each man.

IDENTIFICATION CARDS: Foreign crew only require Immigration Landing Permit.

AUTHORITY: *Operator:* Sun Marine Terminals, P.O.Box 758, Nederland, Texas 77627. *Tel:* (409) 727-2301. *Telex:* 77-9469 Sun NDLN.

STOCKTON, California: 37.57 N. 121.19 W. (See Plan)

DOCUMENTS: See "San Francisco".

PILOTAGE: Pilots commissioned by Stockton Port District. Pilots obtained by contacting San Francisco Bar Pilots Association, Pier 7, Buckhead (P.O. Box 26409, S.F., California 94126). Tel: (415) 362-5436.

ANCHORAGE: Emergency anchorage only permitted in Turning Basin, 37 ft. depth.

RESTRICTIONS: Restrictions only in effect if water at flood stage. See "San Francisco".

MAX. SIZE: Draft restrictions of 35 ft. at low tide, 37 ft. at high tide (fresh water). (Also see "Developments").

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to San Francisco Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Ship to shore Radio (KBP 376 – Marine Channel 18A) enables constant contact with Pilots who therefore aware of any problem that may develop up or down river. Arrangements also may be made for readiness of ordered gangs within 15 minutes of ship's arrival.

TUGS: 2×1,000 h.p. tugs available. Tugs join vessel 0.5 miles up river from Main Channel; generally, ship's lines used, however, tug lines may also be utilised. 2 companies – Stockton Tugboat, Tel: (209) 462-6471 and (415) 846-2320. Sacramento Tugboat Co. Tel: (916) 372-0986.

BERTHING: *Port Stockton Bulk Material Wharf, Berths 12-13:*

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Shipment of dry-bulk commodities, both systems handle the following: coal, petroleum coke, clay, copper concentrates, fertiliser, soda ash, sulphur, and other dry bulk commodities; receipt of liquid fertiliser.

Dimensions: Length of face 850 ft.; lower side 13.5 ft., upper side 13.5 ft.; depth alongside at MLLW 40 ft.; usable berthing space 880 ft.

Mechanical handling facilities: Two bulk handling systems.

(A) Max. vessel loading rate 700 short tons/p.h. Equipped with shiploader, belt conveyor, 360 degree spout trimmer, bottom drop car dump (Max. 7.5 cars per hr.) and truck unloader hopper (Max. 30 trucks per hr.) (B) Max. vessel loading rate 4,000 short tons/p.h. Conveyor system equipped with a 54 in. belt, rotary car dump, loop railroad for unit train.

Port Stockton Wharf, Berths 10-11:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Container-handling dock; receipt of molasses, bulk dry cargo, container cargo and general cargo. Delivery of scrap steel, container cargo and general cargo.

Dimensions: Length of face 810.5 ft., lower side 102 ft.; depth alongside at MLLW 35 ft.; usable berthing space 810.5 ft.

Remarks: Face of wharf is in line and continuous with face of Berth 9 providing a total of 1,455.5 ft, of berthing. This dock has 5.5 acres of open marshalling area. 1×30 tonne multi-purpose bridge crane for handling dry bulk, general cargo, containers. 700 ft. of crane rail. Construction of loop line R.R. track expected to be completed during 4th quarter of 1990.

Port Stockton General cargo Wharf, Berth 9:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo and receipt of bulk cargo.

Dimensions: Length of face 645 ft., upper side 75 ft.; depth alongside at MLLW: Face 37-34 ft., upper side 35 ft.; usable berthing space: Face 645 ft. upper side 110 ft. with dolphin; width of apron: Face 41.25 ft.

Mechanical handling facilities: Forklift trucks and other types of cargo-handling equipment, owned by the Port District and by stevedoring companies, are available as needed.

Port Stockton Wharf No. 8:

Owned by: Stockton Port District.

Operated by : Stockton Port District.

Use: Receipt and shipment of general cargo; Liquid sugar facility and receipt of molasses. Anhydrous Ammonia also unloaded at this dock through refrigerated pipelines.

Dimensions: Length of 396 ft.×88 ft.; depth alongside MLLW 37-36 ft.; usable berthing space 484 ft. with trestle.

Port Stockton Wharf No. 7:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo.

Dimensions: Length 516 ft. depth alongside MLLW 37-36 ft.; usable berthing space 516 ft.; width of apron 31 ft. with trestle.

Port Stockton Wharf No. 6:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo.

Dimensions: Length 418 ft.; depth alongside MLLW 37-36 ft.; usable berthing space 329 ft.; width of apron 31 ft.

Port Stockton Wharf No. 5:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo.

Dimensions: Length of face 428 ft.; depth alongside MLLW 35 ft.; usable berthing space 429 ft.; width of apron 31 ft.

Port Stockton Grain Wharf No. 4:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo, receipt of bulk cargoes.

Dimensions: Length of face 461 ft.; depth alongside MLLW 35 ft.; usable space 462 ft.; width of apron 31 ft.

Port Stockton Wharf No. 3:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo and receipt of bulk cargoes.

Dimensions: Length of face 461 ft.; depth alongside MLLW 35 ft.; usable berthing space 461 ft.; width of apron 81 ft.

Dock has 30 ton bridge crane capable of handling general and bulk cargoes, as well as containers.

Port Stockton Open Wharf No. 2:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo; shipment of logs, and handling of heavy-lift cargo. Also receipt of bulk cargo.

Dimensions: Length of face 506 ft.; depth alongside MLLW 32-36 ft.; usable berthing space 550 ft.; width of apron: open.

Remarks: Wharf has 39,000 sq. ft. of open storage area and 7 cone shaped buildings for handling inbound bulk cement, with direct belt conveyor from dock to cone buildings, with a capacity of 70,000 short tons to the rear of the dock area. At the Industrial Park approx. 60 acres of open storage area are located South of W. Washington Street; this area can be used for storing or staging import and export cargoes. An additional 45 acres of open storage are located North of W. Washington Street. There is a total of other warehousing with a capacity of 2.7 million sq. ft. of covered storage area comprised of 33 separate units.

Cargo may be transferred from off dock acreage via truck or rail.

This dock also has two Whirley type gantry cranes with a 30 short tons capacity each at 36 ft. offshore reach. Equipped to handle bulk dry materials, containers, heavy lifts, etc.

Continental Elevators Grain Elevator Main Wharf No. 1:

Owned by: Continental Elevators Inc.

Operated by: Continental Grain Co.

Use: Shipment of grain by vessels and by ocean going and inland waterway barges; receipt of grain by self-unloading barges.

Dimensions: Length of face 564 ft., West side 20 ft., East side 20 ft. depth alongside at MLLW 35-37 ft.; usable berthing space 780 ft. width of apron, open end 20 ft.

Mechanical Handling Facilities: 2 towers on wharf, each with 13 in. diameter, telescopic, mechanically operated, grain-loading spout; loading rate, 900 short t.p.h. (29,877 bu.) at East tower; 800 short t.p.h. (26,557 bu.) at West tower; combined rate, 900 short tons.

Remarks: Grain gallery connecting towers on wharf has a 30 in., electric-belt conveyor; and gallery extending from East tower to grain elevator has 2×30 in. belt conveyors. Grain elevator capacity 6,000,000 bushels.

BRIDGES: Fixed-span high-level toll bridge across Carquinez Strait, with minimum clearance of 134 ft. above MHHW. Southern Pacific Railroad lift span bridge crosses Suisun Bay 6.5 miles upstream from Carquinez Bridge, with minimum clearance above MHHW of 70 ft. when closed and 135 ft. when open. Horizontal clearance on lift span 291 ft. A third bridge, 22 miles above Southern Pacific bridge, is near Antioch. It has a fixed span bridge with minimum clearance above MHW 135 ft.

STEVEDORES: *General Cargo* – For gang start at 0800 hrs., orders must be placed at 1600 hrs. of previous day; night gangs must be ordered by 1100 hrs. These times pertain to week-day gangs. For week-end gangs, 1100 hrs. Saturday for Saturday night, Sunday morning, Sunday night and Monday morning. Day shifts from 0800 to 1700 hrs. Night shifts 1700 to 0300 hrs. Arrangements can be made for a special third shift from 0300 to 0800 hrs. Rates quoted on request.

Bulk Ore and Grain Cargoes – Orders for gangs must be placed at same time as for general cargo. This operation on 24 hour basis; day shift, 0800 to 1600 hrs., night shift 1600 hrs. to midnight, swing shift, midnight to 0800 hrs. Stop work meeting first Tuesday of each month.

Also see "Radio".

MEDICAL: Arrangements with San Joaquin Medical Society for physicians, surgeons and dentists. 5 hospitals within radius of 6 miles from port. Ambulance service readily available. Telephone number for this service is 948-1334.

FRESH WATER: Available through pipelines.

FUEL: All grades of fuel available with 1 day's advance notice.

CONSULS: See "San Francisco".

REPAIRS: Minor types of repairs carried out.

DRY DOCKS: Nearest dry docks, San Francisco.

GANGWAY/DECK WATCHMEN: Services of watchmen not necessary. Available if requested.

OPENING/CLOSING HATCHES: Hatches may be opened prior arrival and closed after ship sailed from port; any opening or closing of hatches at dockside must be performed by stevedores.

CERTIFICATES: See "San Francisco".

CUSTOMS ALLOWANCES: See "San Francisco".

CARGO GEAR: Safety regulations require strict adherence to max. loading or unloading weight capacity of ship's gear.

REPATRIATION: No facilities in Stockton for effecting crew changes and arranging any necessary repatriations. Special arrangements may be made through Customs.

AIRPORT: Stockton Metropolitan Airport located approx. 6 miles from port. Serviced by Frontier, Air West and PSA.

TIME: Pacific Standard Time, GMT minus 8 hours; Pacific Daylight Time goes into effect on first Sunday of April until last Sunday in October, when clocks are advanced 1 hour.

HOLIDAYS: New Year's Day; Martin Luther King's Birthday; Lincoln's Birthday; Washington's Birthday; Memorial Day; Independence Day; Harry Bridge's Birthday; Labour Day; Admission Day; Columbus Day; Veteran's Day; Thanksgiving Day; Christmas Eve Day; Christmas Day and New Year's Eve Day are all holidays. In addition to above, General Election Day, both State and National, as well as any day proclaimed by Governor of California or President of United States shall be observed as holiday. Work can be arranged for all holidays except New Year's Day, Labour Day, Thanksgiving Day and Christmas Day.

POLICE/AMBULANCE/FIRE: Security Force on duty 24 hours a day and can be reached by dialling extension 229 for any emergency that might arise.

ELECTRIC CURRENT: At wharves where current available for ship's use, it is 110 volt, single phase, 60 cycle for lighting and 440 volt, 3 phase, 60 cycle for power.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Not required.

REGULATIONS: Port of Stockton requests notice of ship's intent to come into port at least 7 days prior to arrival; vessels, who have made prior arrangements, will have precedence over vessels who sail into port without previous notice.

GENERAL: *Railroad Service:* Three transcontinental railroads serve the Port – Santa Fe, Southern Pacific, and Union Pacific (Western Pacific Division) with reciprocal switching privileges.

Truck Scales: Public truck scale available, operated by the Port.

AUTHORITY: Port of Stockton, 2201 West Washington Street, Stockton, California 95202. Postal address: P.O.Box 2089, Stockton, California 92501-2089. *Tel:* (209) 946-0246. Toll free outside State of California (800) 344-3213 or 344-3214. *Telex:* 35-9467 and TWX 510-765-6661. *FAX:* (209) 465-7244. *Contact:* Alexander Krygsman, Port Director. Mark Tollini, Manager – Port Operations. Patricia Huff, General Manager – Trade and Property Development.

TACOMA, Washington: 47.14 N. 122.28 W. (See Plan)

DOCUMENTS (on arrival from foreign port):

Ship's document.
Clearance from Last Foreign Port.
2 Crew Lists on Form I-418
2 Passenger Lists on Form I-418 (if applicable)
Passenger Declarations if applicable.
2 Stores Lists.
2 Crew Purchase (curio) Lists.
2 Manifests of Cargo for Discharge on C.F. 1302.

If first arrival port on an inward voyage, must also have 2 sets of Manifests of complete cargo on C.F. 1302, one for Customs at this port and other for use as a "Travelling Manifest" to go forward to other discharge ports.

A – For U.S. Public Health Quarantine Boarding Officer: "Quarantine Declaration" on Form PHS.43.

B – For U.S. Department of Agriculture Boarding Officer: "Shipmaster's Declaration and Warning Notice" on Form A1Q.43.

C – For U.S. Immigration Boarding Officer:
  Crew List of Form I-418 visaed by U.S. Consul abroad.
  Passenger List on Form I-418.
  Attachment to Passenger List on Form I-92.
  Form I-94 for each passenger.
  Form I-95 of ID Card (Form 184) for each crewmen. (These are re-usable for multiple entries, but for seamen on first trip to United States a new Form. I-95 must be ready for presentation on arrival.)

D – For U.S. Customs Boarding Officer and Agent or Broker:
  3 copies Crew List (Form I-418).
  3 copies Cargo Manifest on Form 1302.
  3 copies Stores List – Form 1303.
  3 copies Crew Purchases or Curio List – Form 1304.
  3 Passenger Lists on Form I-418.
  For U.S. Ships – Declaration re foreign repairs on Form 3415.
  For U.S. Ships – Certified Crew List for last U.S. port before going foreign.

* At subsequent U.S. ports of call 2 copies required of extracts Cargo Manifests of cargo for the port concerned, and 2 copies of lists of stores and curios remaining on board.

PILOTAGE: Compulsory for all vessels except those under coasting trade on West coast of the United States, including Alaska and British Columbia. Pilots board off Port Angeles Pilot Station.

ANCHORAGE: The depths as a rule are too great for convenient anchorage, but vessels occasionally anchor under the Northern shore about 1 mile Eastward of Brown's Point. Vessels may anchor in about 18.29 m., 450 yards N.N.W. of the outer end of Puyallup Waterway West Jetty.

City Regulations permit anchorage in any part of the bay outside harbour lines so as not to interfere with vessels arriving or departing from their docks.

MAX. SIZE: Length over 305 m. (centre to centre dimensions of mooring dolphins), draft subject to berth depth.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

VHF: Pilots on Channels 13 and 14.

TUGS: Available, join vessel in Commencement Bay, approx. half way between Brown's Point and the designated Dock. Tug's lines are used and there is a charge for tug's lines.

BERTHING: 32 deep water berths. Water depths: 9.15 m. to 21.34 m. below MLLW.

General Cargo: 161,000 sq.m. warehouse space, 91 hectares of open storage paved, lighted, fenced, serving all piers.

Logs are handled at the Port's Blair Terminal, where special shipments of heavy equipment are also handled. Total terminal area is 12 acres with 2 berths totalling 1,200 ft. (366 m.), depth 35 ft. and 32 acres of backup storage space.

Pierce County Terminal at 147 acres, is used for special cargoes and auto imports. It has 2 berths totalling 1,420 ft. (433 m.) and depth up to 45 ft. 1×54 tonne crane available.

BULK HANDLING FACILITIES: 550 m. pier with 12 m. to 15 m. water depth. 5 heavy lift Whirley cranes and bulk unloading crane with 750 to 1,500 t.p.h. capacity; 150,000 tons capacity alumina storage structure with load-out facility; 12.14 hectare stockpile area including holding area for 300 rail cars.

Bulk Grain Elevator: Continental Grain: 3 million bushel capacity: loading rate: 2,400 t.p.h.; 137 m. dock with dolphins to 244 m.; 21.34 m. water depth.

Bulk Liquid Facility: 3.5 million gallon capacity; heated tanks and piping for both rail and truck shipping and receiving; serves vessels at Pier 1, 676 m., 10.67 m. water depth.

CONTAINER HANDLING FACILITIES: *Terminal 3:* Adjacent to Terminal 4, the Port's new $30 million state-of-the art container terminal completed in March, 1989. The new terminal creates an additional 25 acres of container storage yard and a 950 ft. long pier with depth 45 ft. to accommodate the largest container ships afloat. Located next to the North Intermodal Yard, Terminal 3 can operate with less acreage while still being able to serve over-the-road carriers by use of chassis space.

Terminal 4: Container handling and general cargo. Container handling capability – 10,000 units per month. 2 berths, total length 492 m., width 42.7 m., Depth 13.7 m. MLLW. 1 warehouse 14,536 sq.m., 2×40 ton IHI container cranes, 2×40 ton Sumitomo container cranes, 10.12 hectares paved, lighted, fenced, back-up storage. 200 Reefer container outlets (240-480 volts). Direct rail access to pier. Intermodal yard for containers loading to rail cars.

Terminal 7: Containers and General cargo. 4 berths, total length 823 m., width 41 m., depth 13.7 m. MLLW. 2 warehouses each 9,290 sq.m. 2×40 ton Whirley cranes, 1×40 ton IHI multi-purpose crane, 1×50 ton Peiner multi-purpose crane (Containers, dry bulk). 1×40 ton IHF container crane, 1×40 ton Sumitomo container crane, 17 hectares paved, lighted, fenced, back-up storage. 24 Reefer container hook-ups (240-480 volts). Direct rail access to pier.

Husky Terminal: One berth, length 720 ft. Depth alongside up to 50 ft. 3×45 tonne container cranes. Berth operated by Cooper T. Smith Stevedoring.

Tacoma Terminals International: Two berths, length 1,600 ft. Depth alongside up to 40 ft. 5×45 tonne container cranes. Berth operated by Sealand.

BRIDGES: The 11th Street Bridge: All ships are required to notify for opening 2 hours in advance. The Puyallup River Bridge on 11th Street has been deactivated. The Blair and Hylebos Bridges have no restrictions. Closed periods apply to the 11th Street Bridge and the hours are as follows: 0645 – 0745 hrs., 1530 – 1730 hrs.

STEVEDORES: Jones-Washington Stevedore Company, Eagle Marine Services Ltd., Maersk Stevedore Co., Husky Stevedore Co. and Stevedoring Services of America (SS of A).

Gang requirements must be made known to contracting stevedore prior to 1100 hrs. on day before the vessel plans to dock. (1030 hrs. on Saturdays for gangs on Saturday p.m., Sunday and Monday.)

Stowage of cargo for discharge or load determines the gang size requirements. Sufficient information for intelligent gang orders is a necessity – i.e. advance cargo plans, unusual size and/or weight, etc.

TANKERS: Loading/discharge lines 8 in. and 10 in. 150 ASA flanged connections. Slop discharge facilities not available. Fresh water available. Coast Guard Regulations strictly enforced.

DENSITY: The average density in the port is 1016.8 at 15°C.

FRESH WATER: Available. Delivers to vessel through portable meter hose.

FUEL: Available. Advance notice required.

Grade	*Viscosity at 122°SSF*
Bunker "C"	165 – 175
PS – 400	112 – 116
Bunker Special	50 – 60
PS – 300	32 – 35

FIRE PRECAUTIONS: Very strict precautions in force.

REPAIRS: The largest repair yard in Tacoma can haul out vessels up to 1,000 tons for all kinds of repairs, including electronics, welding, painting and machining; shafts up to 30 ft. in length are machined here. Another plant does shipbuilding exclusively, but will perform topside repairs if needed. Wreckage and salvage facilities are available. Larger vessels go to Seattle for dry-docking. Minor repairs and services for small craft are available at marinas on the City Waterway and the N.E. shore of Commencement Bay.

GANGWAY/DECK WATCHMEN: Watchmen required if detainees are aboard.

OPENING/CLOSING HATCHES: Normally carried out by stevedores. In practice, however, the crew can perform this task while in transit.

CERTIFICATES:

Certificate of Registry.
Certificates for any previous U.S. tonnage tax payments within the past year.
International Load Line Certificate.
Safety Radio Certificate.
Derat Certificate.
Cargo Gear Inspection Certificate.
Certificate of Inspection (U.S. vessels).

CUSTOMS ALLOWANCES: Tobacco and Wine/Spirit: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.

AIRPORT: Seattle – Tacoma International Airport is 16 miles North from Port and Tacoma Industrial Airport 8 miles West.

TIME: Local time reference is GMT minus 8 hours. In Summertime it is GMT minus 7, or Pacific Daylight Saving Time, starting the first week-end in April and finishing the last week-end in October.

HOLIDAYS: New Year's Day (January 1st) no work; Lincoln's Birthday (February 12th); Washington's Birthday (February 22nd); Memorial Day (May 30th); Independence Day (July 4th) no work; Bloody Thursday (July 5th); no work; Labour Day (September 1st) no work; Columbus Day (Friday after Thanksgiving); Veterans' Day (November 11th); Thanksgiving Day (November 27th) no work; Christmas Day (December 25th) no work.

POLICE/AMBULANCE/FIRE: Emergency tel. numbers:
Police 593-4911; Fire MA 7-0151; Ambulance 473-1611.

TELEPHONES: Pay telephones available at Piers 4 and 7, Blair Terminal, Pierce County Terminal, Grain Docks 23 and 24. There is no charge for this service.

SHIP SUPPLY SERVICE: Contact: Foss Launch and Tug, 225 East F Street, Tacoma, WA. 98421. Tel: (206) 272-0362.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required.

AUTHORITY: Port of Tacoma, P.O.Box 1837, Tacoma, Washington 98401-1837. *Tel:* (206) 383-5841 or Seattle (206) 838-0142. *Telex:* 32-7473 A/B Port of Tac, TWX: 910-441-2646. *FAX:* (206) 593-4534. *Contact:* Rod Koon, Director – Port Relations.

TAMPA, Florida: 27.57 N. 82.28 W. (See Plan)

DOCUMENTS:

Passports and Seamen's Books.
Vaccination Certificate for each Seaman.
Certified Crew List: must be on American Form and certified by American Consular office at foreign country from which departed.
Crew List.
Ship's Register.
Load Line Certificate.
Certificate of Financial Responsibility (Oil Pollution Certificate).
U.S. Customs requires Inward Foreign Manifest (original and 3 copies). This must describe cargo which is to be discharged this port and/or any other port in vessel's itinerary. It must show:
  Vessel's name and flag.
  Master's name.
  Last foreign port of departure.
  Net registered tons of vessel.
  When and where vessel built.
  Consigned to Agent.
  Bill of Lading Number.
  Marks and numbers (on cargo).
  Complete description of merchandise.
  Weight in kilos or pounds.
  Port of loading.
  Port of discharge.
Stores Lists (original and 3 copies).
Crew Curio List (original and 3 copies).
Narcotics List (original and 3 copies).
*Dangerous Cargo List (original and 3 copies). This should be filled out even if nothing dangerous aboard.

Health officials will board vessel first. Bills of Lading not needed for Customs purposes.

PILOTAGE: Compulsory for all foreign vessels and U.S. vessels under register in the foreign trade. Pilotage is optional for U.S. coastwise vessels drawing over 7 ft. that have on board a Pilot licensed by the Federal government. Pilots board vessels day or night. Vessels entering by Egmont Channel are boarded between the Tampa Bay Lighted Whistle Buoy "T" (Lat. 27° 35.3′ N., Long. 83° 00.7′ W.) and Egmont Channel Lighted Bell Buoy No. 2 (Lat. 27° 35.4′ N., Long. 82° 59.0′ W.). Vessels entering by S.W. Channel are usually boarded between S.W. Channel Buoy No. 2 and Lighted Bell Buoy No. 3, or if desired, at the lighted bell buoy off the entrance to the channel.

Tampa Bay Pilots serve Tampa Bay. Tampa Bay Pilots have 2 launches, "*Manatee*" and "*Tampa Bay Pilot*", each with a black hull and white deckhouse with the word "Pilot" on either side. Pilot Association monitors VHF-FM Channels 10 (156.50 MHz), 12 (156.60 MHz), and 16 (156.80 MHz) continuously; call-sign, Tampa Bay Pilots. Pilot Association's boats are equipped with VHF-FM Channels 10, 12 and 16 and use Channel 10, 12 and 11 as working frequency. All pilot boats fly the International Code flag "H". For boarding, Pilots request that vessels maintain a speed of 6 knots or less and have the pilot ladder rigged 6 ft. above the water. Vessels are requested to give a 24-hour and a 3-hour advance notice of their time of arrival. Length, beam and max. draft of the vessel should be provided with the first notification. Vessels are normally not moved in dense fog, and during strong North/South winds vessels are boarded inside Egmont Key. In February 1990, the deepest draft entering Tampa Bay was 33 ft. 6 in. Pilots can be obtained by radiotelegraph (cable address: "Tampilot") by telephone (813-248 3732) through the Tampa Marine Operator, or through ships' Agents.

Pilots for St. Petersburg and Port Manatee can be obtained through the Tampa Bay Pilots.

ANCHORAGES: Vessels with good ground tackle can anchor anywhere outside Egmont Bar in depths of 35 ft. to 50 ft. Inside anchorages Southward of Mullet Key in depths of 30 ft. to 35 ft.; and S.W. of Gadsden Point in depths of 29 ft. to 36 ft.

Explosives and quarantine anchorages East of Mullet Key and South of Interbay Peninsula.

(1) Explosives Anchorage, East of Mullet Key. A rectangular area in Tampa Bay, approximately 4,459 yd. long and 1,419 yd. wide, beginning at Lat. 27° 38′ 30″ N., Long. 82° 39′ 09″ W., and extending N.E. to Lat. 27° 39′ 48″ N., Long. 82° 37′ 15″ W.; thence S.E. to Lat. 27° 39′ 17″ N., Long. 82° 36′ 46″ W.; thence S.E. to Lat. 27° 37′ 52″ N., Long. 82° 38′ 38″ W.; thence N.W. to point of beginning. Anchorage is used by vessels awaiting loading or unloading at Port Tampa where duration of anchorage will exceed 72 hours.

(2) Temporary Explosives Anchorage, South of Interbay Peninsula. Beginning at a point bearing 107°, 1,750 yd. from Cut F Range Front Light; thence to a point bearing 125°, 2,050 yd., from Cut F Range Front Light; thence to a point bearing 180°, 1,725 yd., from Cut F Range Front Light; thence to a point bearing 222°, 2,180 yd., from Cut F Range Front Light; thence to a point bearing 251°, 1,540 yd., from Cut F Range Front Light; and thence to the point of beginning. Anchorage is used for vessels engaged in loading explosives when duration of the anchorage is less than 72 hours.

(3) Temporary explosives anchorage off Port Tampa. A circular area with a radius of 200 yd. with the point at Lat. 27° 50′ 22″ N., Long. 82° 34′ 15″ W.

(4) Quarantine anchorage. S.E. of the temporary explosives anchorage, beginning at a point bearing 097° true, 4,370 yd., from Cut F Range Front Light; thence to a point bearing 113° 30′, 5,370 yd., from Cut F Range Front Light; thence to a point bearing 161° 30′, 3,770 yd., from Cut F Range Front Light; thence to a point bearing 163° 30′, 2,070 yd., from Cut F Range Front Light; thence to the point of beginning.

RESTRICTIONS: Draft recommendation is 33 ft. 6 in. No tidal restrictions with exception of loaded vessels into Port Tampa.

43 ft. harbour deepening project is completed, however only Berths No. 31 and No. 220 can accommodate over 33 ft. 06 in. (Call T.P.A Operations for soundings).

Existing Channels:

Name of Channel	*Width* (ft.)	*Length* (naut. miles)	*Depth MLW* (ft.)
Egmont Channel	700	3.9	45
Mullet Key Channel	600	2.9	43
Tampa Bay Channel Cuts A-F	500	13.6	43
Gadsden Point Cut	500	3.1	43
Hillsborough Bay Cut A & C	500	6.6	43
Hillsborough Bay Cut D	400	1.0	34
Seddon Channel	300	1.1	28
Garrison Channel	275	0.4	30
Ybor Channel	400	0.9	34
Sparkman Channel	400	1.2	34
East Bay Channel and Turning Basin	2,700	1.5	43
Port Tampa Channel	400	7.3	34
Port Sutton Channel	280	1.0	34
Alafia River Channel	200	3.4	32

BERTHING:

Container Facilities: Containers are handled at several general cargo terminals, but no specialised container facilities are currently in place. Also see "General Cargo Facilities", "Specialised General Cargo Facilities" and "Dry Bulk Facilities". Also see "Developments".

Facilities available for smaller vessels.

Operator	*Depth*	*Berthing Space*	*Product Handled*
Morton Salt Co.	14 ft.	600 ft.	Salt
Paktank Florida, Inc.	12 ft.	500 ft.	Grain fertiliser, materials, potash, caustic soda, salt.

GENERAL CARGO FACILITIES:

Operator	*Location*	*Length*	*Depth*	*Remarks and Equipment*
Eller & Co. Inc. (Port Authority Berth No. 209)	Verger Boulevard, Holland Terminal	600 ft. Marginal Wharf	34 ft.	Fork Lifts: 1×10 tons, 4×8 tons, 5×2.5 tons, 11×4 tons. Mobile shore cranes available 70 – 300 tons
Tampa Bay International. Terminal, Inc. (Berths No. 271,272).	13th and Beatrice St.	1,200 ft. Marginal Wharf	30 ft.	Crawler Cranes: 4 ranging from 37 to 72 tons. Fork Lifts: ranging from 1,000 to 20,000 lb. capacity. Bulk handling: 5 hoppers, clamshell buckets, shipside conveyor.
Spessard L. Holland Terminal (Port Authority Berths No. 201, 202)	Verger Boulevard	600 ft., 900 ft. Marginal	34 ft.	The 100 ft. apron on all berths is public. Cruise Ship Terminal location.
Kreher Terminal Berths No. 223, 224	Carbide Avenue, Hookers Point	1,120 ft. Marginal Wharf	34 ft. (for 720 ft.) 14/16 ft. (for 400 ft.)	Back land leased to South State Terminals and Standard Gypsum. Wharf apron and docking area is public and subject to preferential berthing rights of one tenant.
S.E.L. Maduro (Florida), Inc.	13th and York St.	1,200 ft. Marginal Wharf	30 ft.	All sizes fork lifts including specialised newsprint handling and 52,000 lb. capacity for handling of containers; mobile shore cranes. Modern banana unloading conveyor system.
Metroport Terminals Berths 263, 264, 265, 266.	601 N. 13th Street	700 ft. Marginal Wharf	28 ft. – 15 ft.	Banana unloading conveyor system.
Tampa Bay International Terminals. (Port Authority Berths No. 251, 252)	Foot of Grant St.	1,200 ft. Marginal Wharf	34 ft.	Cranes: 4×40 tons gantries. Fork Lifts: up to 20,000 lb., conveyor system
Harborside Refrigerated Services, Inc. (Port Authority Berths No. 210, 211)	Verger Boulevard	1,200 ft. Marginal Wharf	34 ft.	Fork Lifts. Mobile shore cranes available 70 – 300 tons.

SPECIALISED GENERAL CARGO FACILITIES:

Operator	*Location*	*Length*	*Depth*	*Remarks and Equipment*
Commercial Metals Transport Co.	West end of Port Sutton, East side of turning basin	530 ft. Marginal Wharf	30 ft.	Scrap metal loading facility. 4 diesel cranes 3×80 ft. boom, 1×70 ft. boom, each equipped with electric magnets.
Tampa Export	Maritime Boulevard	800 ft. Marginal Wharf	34 ft.	Scrap metal loading facility.

DRY BULK FACILITIES:

Operator	*Location*	*Depth*	*Max. L.O.A.*	*Max. Beam*	*Height of Vessel Waterline to bulwark*	*Chute Travel*	*Loading Rate (N)=Net (L)=Long t.p.h.*
Agrico Chemical Co.	Big Bend	34 ft.	1,500 ft.	120 ft.	47 ft.	1,500 ft.	3,000 (N)
CF Industries Inc. (Port Authority Berth No. 204)	Holland Terminal	34 ft.	600 ft.	85 ft.	47 ft.	Stationary	1,100 (N)

Rockport	22nd St. Causeway Boulevard	34 ft.	1,450 ft.*	120 ft.	53 ft.	1,450 ft.	3,000 (N)

*Can load longer vessels by shifting during operation.

Shipmaster's Report: Bulk phosphates are loaded in Port Sutton (one berth) and in the East Bay (two berths: Rockport owned by CSX and Eastern Associated Terminal).

Loading rates: about 1,000 t.p.h. at Port Sutton;
about 3,000 t.p.h. at the two berths in East Bay area.

Trimming: The loading elevators are not equipped with trimming devices. Most cargoes can be trimmed by bulldozers. The bulldozer weighs 5 long tons, and is placed on board with ship's gear. The IMC elevators at Port Sutton and the SCL elevator (Rockport) use shore gear to place the bulldozer on board. A minimum of 8 ft. to 7.5 ft. headroom under the coaming is required for bulldozer trimming.

DRY BULK FACILITIES: (continued)

Operator	*Location*	*Depth*	*Berthing Space*	*Handling Equipment*	*Storage Area*	*Product Handled*
Cargill Inc. (Port Authority Berth No. 256)	North 19th St.	34 ft.	700 ft.	Marine leg for unloading 30,000 bushels/p.h., and spout loader-rate of 600 tons	Capacity of elevator is 1,000,000 bushels; 8,000 ton bulk warehouse; 4,800 ton bulk warehouse.	Grain and dry bulk agriculture products
Lafarge	Hookers Point	34 ft.	820 ft.	Belt material handling system capable of receiving 4,000 short t.p.h. of cement or 1,500 short t.p.h. of gypsum, 3 electric travelling bridge cranes equipped with 2.5 and 3 cu.yd. grab buckets.	800×100 gypsum storage shed; 215,000 barrel holding tanks for fuel storage (for plant consumption) 220,000 ton capacity open storage.	Gypsum rock, cement
Ideal Basic Industries, Inc.	Port Sutton	34 ft.	1,038 ft.	2×8 in. pipelines to storage. 4×12 in. pipelines to storage.	8 silos with 190,000 barrel capacity. 3 bins with 5,640 ton capacity.	Cement
Tampa Bulk Services	Port Tampa	34 ft.	700 ft.	Belt elevator from storage to loading spout. Rate of discharge 500 t.p.h. Direct transfer from rail cars to vessels at 200 net t.p.h.	Silo capacity of 10,000 net tons.	Citrus pellets and other dry bulk products.
National Gypsum Co.	Port Tampa	34 ft.	950 ft.	Receiving hopper and conveyor–unloading rate of 2,000 net t.p.h.	Open area approx. 10 acres.	Gypsum rock
Paktank Florida, Inc.	Pendola Pt., Port Sutton	34 ft.	700 ft.	Dock crane with 80 ft. boom with unloading rate of 400 t.p.h. Loading tower with rate of 1,200 t.p.h.	Building 125 ft.×700 ft. with storage capacity of 50,000 tons. 4 silos with 8,000 ton capacity.	Potash, phosphatic products.
Tampa Electric Co.	Big Bend	35 ft.	788 ft.	200 ft. high travelling tower-conveyors system with unloading rate of 4,000 t.p.h.	24 acres	Coal
Tampa Electric Co.	Port Sutton Electric Co.	30 ft.	450 ft.	2 electric travelling unloading towers equipped with straight-line boom, and receiving hopper-combined unloading capacity of 1,600 t.p.h.	Exact size unknown	Coal
Ideal	Port Sutton	34 ft.	—			Cement
Lehigh	Port Sutton	34 ft.	—			Cement
Dravo Basic Metals (Port Authority No. 220)	Hookers Point	34 ft.	900 ft.	Conveyor. 2 radical stackers.		Building construction aggregates and materials.

MAX. SIZE: Max. draft 33 ft. 6 in. MLW. No limit on length and breadth. Air draft 149 ft. MHW. Skyway Bridge clearance.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.

RADIO: Radio station "WPD" should be used by vessel to route ETA cables to Agents, receivers, etc. Station KUZ 383 on Channel 25 VHF, available for public messages.

VESSEL TRAFFIC ADVISORY SYSTEM: The Tampa Port Authority provides a voluntary navigational aid to vessels transiting the bay. The VTAS can be reached by calling WHX362 on VHF Channel 9.

TUGS: Positions are:

Main port area – right past Beacon No. 35
Port Sutton & East Bay – Beacon No. 29
Port Tampa – Cut "K"
East Tampa – Beacon No. 16

Tug's lines only.

BRIDGES: The Sunshine Skyway Bridge spans lower Tampa Bay. The older twin central cantilevered span has a navigation clearance of 800 ft. and a maximum vertical clearance of 151 ft. at MLW. The new bridge located to the East of the old bridge has been completed.

STEVEDORES: Stevedoring gangs must be ordered approximately 24 hours in advance (before 1700 hrs. on day before needed).

MEDICAL: Advance notice for medical attention not required, but is preferable.

TANKERS: Also see "Developments".

Note that part of above terminals use same piers. Most terminals have residue discharge facilities.

DENSITY: Density is affected by local rains due to Hillsborough River. Seasonal variances too great to allow advance prediction.

FRESH WATER: Available all over port and delivered through ships hoses and meters. Rates of delivery various.

FUEL: All grades and types available, including all types of blended fuel and Bunker "C". 24 hour notice required. All types of lube-oil available with delivery in bulk or drums – 24 hours' notice is required. Major oil companies (i.e. Shell, Amoco Oil, Texaco, Gulf, Chevron, Central Oil, etc.) represented in Tampa. Delivery ex-pipe-line, barge or truck.

FIRE PRECAUTIONS: No specific precautions other than usual.

CONSULS: The following countries are represented in Tampa:

Colombia
Denmark
Finland
Germany F.R.
Honduras
Italy
Mexico
Norway
Panama
Sweden

REPAIRS: All types are possible.

DRY DOCKS: Graving dock: 900 ft. long × 150 ft. wide, 21 ft. from MLW to top of keel blocks; 525 ft. long on bottom × 80 ft. wide, and depth over keel blocks 16-18 ft. at MHW.

Dry dock: 200 ft. long × 65 ft. wide. There are 2 other dry docks besides those listed above.

GANGWAY/DECK WATCHMEN: Watchmen not necessary, but available when required.

OPENING/CLOSING HATCHES: Longshoremen open and close hatches.

CERTIFICATES:

Documentation Papers.
Load Line Certificate.
Certificate of Safety at Sea (when carrying passengers).
Certificate of Safety Equipment.

CUSTOMS ALLOWANCES: Tobacco, 2 packs of cigarettes per day per man; wine and/or Spirit, no set amount. Each boarding officer has different views (i.e. German and Scandinavian vessels allowed 2 bottles of beer per day per man). Allowances made within reasonable bounds at Master's discretion subject to boarding officer's approval.

CARGO GEAR: No local special safety requirements. Longshoremen and U.S. Department of Labor requirements are uniform over the U.S.

REPATRIATION: No foreign crew pools in Tampa (located in New Orleans, San Francisco and New York), but crew changes can be made when Master radios requirements to Agent who arranges with local Consul or through crew pool in nearest city named above for applicable country (if no Consul is available in Tampa). American crew pools for all unions in Tampa.

Repatriation available via Tampa International Airport and is handled by Consul or Master.

AIRPORT: Tampa International Airport served by regular airlines and located approximately 15 miles from main port area; 5 miles from Port Tampa and 16 miles from East Tampa.

TIME: Tampa normally on Eastern Standard Time (GMT minus 5 hours) with Daylight Saving Time in effect from first Sunday in April till last Sunday in October.

HOLIDAYS: New Year's Day, January 1st; Martin Luther King's Birthday, 3rd Monday in January; George Washington's Birthday, 3rd Monday in February; Good Friday; Memorial Day, Last Monday in May; Independence Day, July 4th; Labour Day, 1st Monday in September; Armistice Day, November 11th; Thanksgiving Day, 4th Thursday in November; Christmas Eve, December 24th; Christmas Day, December 25th; New Year's Eve, December 31st.

When any of above holidays fall on Sunday, they will be observed on Monday following. Work on these holidays is by special arrangement only.

POLICE/AMBULANCE/FIRE: Dial 911.

TELEPHONES: Installation of telephone aboard can be arranged by agent.

SERVICES: Compass adjustments available; radio direction finder; radar repairs; tank cleaning.

SHIP SUPPLY SERVICE: Captain Riley F. Bryan, Sea Taxi, P.O.Box 46618, Pass-A-Grille, Florida. Tel: (813) 381-3999.

Suncoast Helicopters, 4111 W. Columbus Drive, Tampa, Florida 33607. Tel: (813) 872-6625.

A. P. St. Philip, Inc., 1305 Shoreline Drive, Tampa, Florida 33605. Tel: (813) 248-1123.

SHORE LEAVE: Immigration Authorities grant Clearance after examination of Passport or bona fide seaman's papers.

IDENTIFICATION CARDS: Passports required.

DELAYS: Delay can be expected in loading phosphate rock (1 or 2 days), and same delay applicable for berthing at elevators. Some delay possible in general cargo loading or unloading.

DEVELOPMENTS: Main harbour channel has been deepend to 43 ft. New general cargo berth has been constructed which can structurally accommodate container cranes. This new berth is part of an expansive general cargo complex, which includes Berth No. 202, a 70,000 sq. ft. warehouse, and the recent addition of 52 reefer plugs and 6 acres of heavy paved area for containers. The Port has also recently constructed a dedicated liquid bulk terminal, primarily for the receipt of orange juice concentrate. The Port's huge dockside cold storage facility, Harborside Refrigerated Services, has undergone expansion that bring their total chill and freezer space to 176,000 sq. ft.

Construction began in October 1989 on Berth No. 219, a 400 ft. heavy duty wharf to be initially used to handle scrap metal exports. Estimated date of completion is November 1990.

In 1987, the Port constructed its second cruise terminal, a 17,000 sq. ft. facility designed to accommodate the port's growing cruise trade. Planning continues for the eventual development of a major downtown cruise terminal complex.

SHIPMASTER'S REPORT: July 1990.

Charts: B.A. Charts No. 3847 and 3848.

Approach: Low lying coastline. Radar picks up 'Sarasota' to South of Tampa Bay at 30 miles.

Anchorage: The Fairway Anchorage is North of Buoy No.1 (45 ft.). Various anchorages inside Tampa Bay with depths up to 30 ft. U.S.C.G. only allow vessels to remain a maximum of 48 hours.

Pilot: Boards at Fairway Buoy from fast black hulled cutter. Pilot Station at 'Egmont Key' South of main ship channel. Call Pilot Station on VHF Channels 16 and 12. Tampa Tri-County Pilots no longer in existence, only Tampa Bay Pilots.

One Pilot takes vessel to berth and docks ship.

Outwards Pilot disembarks at Buoy No.14.

Pilot requires 2 hours notice inwards and outwards.

Channel: The maximum channel draft at present is 39 ft. L.W., even though some berths and channels have well over 40 ft. Patches still require maintenance dredging to 40 ft.

Gas Tankers (Foreign flag) of any size, daylight transit only in loaded condition. Complete passage must be in daylight, but if in ballast 24 hour berthing allowed. Gas tankers allowed to shift berth in loaded condition throughout 24 hours, but only if in Port Sutton Channel.

U.S.C.G. safety launch in attendance for loaded gas tankers from just North of Port Manatee Channel inwards.

Oil and chemical carriers over 106 ft. LOA transit daylight only in loaded condition.

Sunshine Highway Bridges near bay entrance consist of new bridge close N.E. of old bridge, with vertical clearance of 175 ft. above MHW, and one single span of old bridge with 149 ft. clearance above MHW. One span of old bridge knocked down by ship some years ago in a storm. Old bridge to be completely removed in near future.

Tugs: 8 tugs in operation, up to 6,000 i.h.p., including 2 'Tractor' tugs.

Generally tie up "American Style" alongside with tug's lines, except 'Tractor' tugs which are on short line.

Tugs generally immediately available in emergency, otherwise require 2 hours notice.

Cancellation without payment, as long as tug has not left its berth. Two tugs used when loaded, and one tug when in ballast.

Berth: Gas (Ammonia) carriers can discharge at 3 berths, IMC and Seminole in Port Sutton Cut and Royster off 'Cut D'.

IMC: North side of Port Sutton Channel (27°54.25′ N., 82° 22.80′ W.). Jetty set out from Port Sutton Channel. Fendering dolphins each end of jetty.

Berth can take up to 70,000 cu.m. gas tankers. Limiting factor is draft. Presently maximum is 35 ft. plus tide. Fendering good, mooring arrangement good, 3, 2, 2 each end, starboard side alongside, head out. Ship's gangway used. Two public telephones near at hand at dock office.

Fresh water at good pressure. Connection at Chicksan, for which there is a charge.

Seminole: North side of Port Sutton Channel near entrance (27° 54.25′ N., 82° 25.50′ W.). Facility formerly owned by Grace, but sold in 1988.

Jetty set out from Port Sutton Channel. Outlying fender dolphins each end.

Berth can also be used for caustic soda and scrap metal. The Caustic Soda Jetty to the East of the Ammonia Jetty has no fendering, so take care when berthing.

Scrap metal ships often use same berth to load from facility to East of Ammonia Jetty. Check with Agent that dock bottom is clear of scrap before berthing. Apart from above, fendering fair. Berth can take up to 70,000 cu.m. gas carriers with limiting draft of 35 ft. plus tide.

Vessels berth starboard side alongside, head out. Shore gangway used. Nearest public telephone is at IMC to East. Master is permitted to use Seminole office telephone in working hours. Fresh water at good pressure. Connection at Chicksan, no charge.

Royster: Vessels can berth either side of finger pier at Hooker's Point, opposite Peter O.Knight Airport.

About 50,000 cu.m. gas carriers maximum size. Also used for other oil products and chemicals. Position: 27° 55.15′ N., 82° 26.60′ W., North side No. 227, port side too, South side No. 226, starboard side too. Ship's gangway used at both berths. One public telephone near base of jetty. Fresh water near Chicksan, charged.

Lay-By Berth No. 31, Pendola Point: If awaiting discharge berth, a berth attached to a cement silo can be used at South Entrance to Port Sutton Channel at Pendola Point (27° 54.2′ N., 82° 26.0′ W.) with 38 ft. plus tide alongside. Jetty with outlying mooring dolphins. Mooring leads at bow not good. Port side alongside, head out. Ship's gangway used. No fresh water, no telephone. Berth very isolated.

Discharge: IMC: Terminal requires product to be at −32.2°C. or colder. Tank pressures 49.2 mb. although not rigidly enforced.

Average discharge rate is 760 t.p.h., with approximately 6.5 kg./sq.cm. at ship's manifold, equates to 4 pumps.

One 20,000 cu.m. tank for NH3.

Chicksan 10 in. 150 ASA.

Necessary to cease discharge for passing traffic.

Surveyors: Saybolt and Thornton. Saybolt Surveyor may read draft before boarding. Thornton Surveyor uses different Density Tables from ship.

Seminole: Permitted pressure approximately 7.5 kg./sq.cm. at manifold, average discharge rate 535 t.p.h. using 3 pumps.

Necessary to cease discharge for passing traffic.

Chicksan 6 in. 150 ASA.

1×20,000 cu.m. and 1×12,000 cu.m. storage tank immediately adjacent.

Surveyor (Saybolt) reads draft before boarding. Arm drained to shore on completion.

Royster: Average discharge rate 980 t.p.h., equates to 6 pumps.

12 in. 150 ASA Chicksan which can swing either side of pier.

Stores: We used Florida Ship Supply who were helpful, and prices reasonable. Can use midship derrick at all berths, and aft derricks at Royster.

Repairs: Tampa International Ship Repair for repairs. Tampa Electric Motor Co. 'TEMCO' for electric motors repairs.

General: Tampa/St.Petersburg International Airport about 30 minutes from Port Sutton, to N.W. of city centre.

Plenty of shopping malls plus entertainment, such as Busch Gardens and Disney World, near at hand.

AUTHORITY: Tampa Port Authority, P.O.Box 2192, Tampa, Florida 33601. *Tel:* (813) 248-1924. *Telex:* 52441 – Port Auth Tpa. *FAX:* (813) 247-2352. *Contact:* Emmett C. Lee, Jr., Port Director.

TEXAS CITY, Texas: 29.22 N. 94.53 W. (See Plan)

DOCUMENTS, PILOTAGE, etc., refer to "Galveston".
RESTRICTIONS: Controlling depth in entrance channel 40 ft. Otherwise restricted by depth available at berth. Vessels enter day and night.
Industrial canal deepened from 34 ft. to 40 ft., in 1981.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available if required.
BERTHING:

Dock No.	*User*	*Depth at MLW* (ft.)

66,67	Union Carbide Tanker Docks (private) Dock 66 Dock 67	36 40

Report: *AMOCO:*

General: The Amoco Terminal at Texas City consists of Berths No. 31, 32, 38, 40 and 41 (Berths No. 40 and 41 also used by T.C.T. and Marathon). Distance from the sea buoy to these berths is 15 miles.

Mooring and Berth: Pilot services for the Texas City port are provided by the Galveston Pilot Association.

Products handled at Berths No. 31 and 32 include gasoline, distillate, anhydrous ammonia, crude and also ballast and slops. Anyhdrous ammonia is handled through 1 stainless steel arm, 6 in. flanged connection and maximum pumping pressure of 35 p.s.i. All other products are handled through 8 in. lines with flanged connections. Maximum pumping pressure on all products is 100 p.s.i.

Berths No. 40 and 41 handle the discharge of crude only. Both berths have 2 loading arms. All lines are 12 in. and are quick disconnect-type connections. Maximum pumping pressure is 150 p.s.i. There are no facilities for handling ballast or slops at these berths.

A minimum of 2 tugs are required for docking and undocking. However, the Master of the vessel and the Docking Master may determine actual tug requirements for their vessel based on vessel manoeuvrability and weather conditions.

The normal mooring arrangement at Berths No. 31 and 32 is starboard side to. Port side mooring is done after turning the vessel in the turning basin. 2 head lines, 2 forward breast lines, 2 spring lines, 2 stern lines, 2 aft breast lines and 2 aft spring lines are sufficient for mooring most vessels. Line handlers are supplied by Texas City Boatman Co. This terminal does not furnish a gangway to vessels.

ARCO:

General: The ARCO facility is located toward the North end and on the West side of the Texas City Turning Basin. Berths No. 11 and 12 are the 2 berths at this terminal. The area around these berths is dredged to 40 ft.

The ship dock is a concrete and steel finger pier permitting vessels to moor on either side. 2 vessels are the maximum that may be discharged at one time. There is no provision to load vessels at the facility and no facilites for dry cargo handling.

Mooring and Berth: Water depth is the factor that limits the size of fully loaded vessels that call at the facility. Lightered or partially loaded vessels of greater size can be accommodated. Distance from the bow of a vessel to the centre of its manifold cannot exceed 468 ft. and from the centre of its manifold to the stern of the vessel cannot exceed 500 ft. Vessels will be docked bow in unless prior arrangement has been made with facility operators to permit bow out mooring. Should the vessel be moored bow out, the bow/manifold restrictions become 500 ft. and the stern/manifold distance 468 ft.

The pilotage of vessels to Texas City is performed by the Galveston/Texas City Pilots. This terminal does not make arrangements for Pilots.

9 mooring structures are installed at each berth and several lines can be secured on each. A boat is required to reach some structures. The ship's Agent will be responsible for arranging mooring and unmooring line handlers. The handlers will be under the orders of the Ship's Officer regarding the handling of each individual line and location of the shore end. The facility has Regulations concerning the minimum number of lines and the type of lines used.

They are:

Vessels less than 525 ft. LOA:
- 2 head lines
- 2 forward breast lines
- 2 forward spring lines
- 2 aft spring lines
- 2 aft breast lines
- 2 stern lines

Mixed moorings not encouraged or allowed.

Vessels greater than 525 ft. LOA:
- 3 head lines
- 3 forward breast lines
- 3 forward spring lines
- 3 aft spring lines
- 3 aft breast lines
- 3 stern lines

Vessel's mooring lines must be kept taut and secure at all times. the vessel moves more than 4 ft. away from the dock or 4 ft. in either direction along the dock, all cargo transfer operations must be stopped immediately, and the proper manifold valves must be closed. Operations must not resume until the condition has been corrected.

Facility will provide gangway. Vessel's crew must attach gangway to the vessel and furnish/install safety net under gangway. If it is necessary to use vessel's gangway, facility's crew will help position gangway onto dock platform.

Aluminium gangways with rotating platforms and feathering treads are provided. The shipboard end is designed to attach to the vessel's gunwhale or over the ship's rail.

Crude is the only cargo handled at this berth. All lines are 16 in. and have hydraulic connections. Maximum pumping pressure is at 175 p.s.i. There are no facilities for ballast or slops at this terminal.

Municipal Docks No. 16, 18 and 20:

General: Municipal Docks No. 16, 18 and 20 are located adjacent to the Texas City Harbour turning basin.

Dock No. 16 has a 140 ft. face, 283 ft. with dolphins; 40 ft. depth alongside, deck height of 14 ft. This dock is used for receipt of crude oil and shipment of petroleum products, chemicals and petrochemicals.

Dock No. 18 has an 88 ft. face, 320 ft. with dolphins; 34 ft. depth alongside, deck height of 14 ft. This dock is used for receipt of crude oil.

Dock No. 20 has a 98 ft. face, 284 ft. with dolphins; 32 ft. depth alongside, deck height of 14 ft. This dock is used for receipt of crude oil and shipment of petroleum products.

Mooring and Berth: Tug requirements are determined according to vessel size, Master's requirements and recommendations of the Docking Master doing the docking.

The normal berthing manoeuvre into Dock No. 16 consists of a turn of 140° to port from the Texas City Turning Basin. The berth is on the starboard hand of the basin about 1,500 ft. from the turning basin entrance. Vessels tie up either port or starboard side to manila or polypropylene lines are normally used, but wire is permissible. No gangway is provided at this berth.

Vessels destined to Berth No. 18, enter the turning basin from the Texas City Channel. Berth No. 18 is at a right angle to the turning basin approximately 2,000 ft. from the entrance to the turning basin. Vessels normally turn in the turning basin in order to back into the berth. Normal side to dock is the port side. Berth No. 18 is the first berth on the North side of the municipal dock basin. No gangway is available at this dock.

Vessels destined to Berth No. 20 enter the turning basin from the Texas City Channel. Berth No. 20 is also at a right angle to the turning basin approximately 2,500 ft. from the entrance to the turning basin. Vessels turn bow first into this dock area from the turning basin for a port side docking. Manila or polypropylene lines are used. This is the poorest of the 3 docks. Adequacy of mooring facilities is marginal, physical condition of the dock is poor, but acceptable. Dock equipment is fair, but acceptable. No gangway is provided at this berth.

Products handled by Berth No. 16 are all handled through 8 in. lines with flanged connections at pumping pressures between 20 p.s.i. and 125 p.s.i. Baliast and slops are handled through 8 in. lines with a maximum pumping pressure of 100 p.s.i.

At Berth No. 18 crude oil is discharged through 2×8 in. lines with flanged connections. Maximum pumping pressure is 125 p.s.i. Facilities for ballast and slops are available.

Products handled by Berth No. 20 are all handled through 8 in. lines with flanged connections at pumping pressures between 30 p.s.i. and 125 p.s.i. Ballast and slops are handled through 8 in. lines with a maximum pumping pressure of 100 p.s.i.

MEDICAL: All medical assistance available.
DENSITY: Brackish.
FRESH WATER: Available at all wharves except Union Carbide.
FUEL: Bunker "C" available to tankers loading/discharging. All grades available by barge from Houston.
CONSULS: See "Houston".
GANGWAY/DECK WATCHMEN: Required only if crewmen detained by Immigration.
CUSTOMS ALLOWANCES: Each man 300 cigarettes or 100 cigars or 1 lb. tobacco. 1 qt. wine/spirits.
TIME: Central Standard Time GMT minus 6 hours. Daylight saving time effective from April to October.
SHORE LEAVE: No restrictions unless detained by Immigration.

SHIPMASTER'S REPORT: February, 1979.
Restrictions: Vessels on maximum draft must be clear of Texas City Channel before dark. There is no sailing or berthing during darkness for maximum draft vessels.

For large vessels it is necessary to ballast during discharge otherwise shore connections become too high.
VHF: Channel 13 from sea and Channel 14 for berthing.
Tugs: Usually 4-6 tugs for vessels on maximum draft.
Tankers: Large tankers dock at Docks 40 & 41 usually starboard side to. On either dock it is not easy loading stores from the dock 2×12 in. connections.
Customs Allowance: All souvenirs to be collected (items intended as presents) and sealed.
Repatriation: As with all U.S. ports must make out Form I-408 - application to pay off or discharge alien crewman.
Airport: At Houston.
Telephone: Pay telephone at bottom of gangway.
General: Will require ship's gangway abaft of manifold if bottom of gangway is more than 115.5 ft. (35.20 m.) abaft after manifold with a freeboard of 23 ft. or more.

AUTHORITY: Texas City Terminal Railway Co., P.O.Box 591, Texas City, Texas 77592-0591. *Tel:* General Office (409) 945-4461. Harbour Master (409) 945-5011. *FAX:* (409) 948-9160. *Contact:* K. L. De Ma President and General Manager. J. Gilder, Harbour Master.

TOLEDO, Ohio: 41.42 N. 83.28 W. (See Plan)

Refer to "St. Lawrence Seaway" for important general information.

PILOTAGE: By Seaway Pilots.

RESTRICTIONS: Navigation season from mid-March to end-December, approx. The port is connected to Lake Erie by an entrance channel, depth 27 ft. Vessel's size restricted by Seaway locks.

MAX. SIZE: 730 ft. length; 26 ft. draft. Height restriction of 104 ft. above water-line which applies to grain berths only.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Chicago Quarantine Station.

RADIO: Master must give at least 24 hours' notice to Commander 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also, at least 24 hours' notice of ETA at first U.S. discharge port is required. Toledo Port can be contacted through Lorain, Ohio or Port Colborne, Ontario.

TUGS: Available. Not compulsory, but sometimes necessary in bad weather.

BERTHING:

C & O Railway Dock: 2,000 ft. long, 26 ft. depth alongside.
Torco Dock: 1,200 ft. long, 26 ft. depth alongside.
Interlake Steel Corporation: 23 ft. depth alongside.
Mid States Terminals: 27 ft. depth alongside.
Cargill, Inc. Elevator: 27 ft. depth alongside.
Port Authority Facility: 4,100 ft. long, 27 ft. depth alongside.
Anderson Elevator: 27 ft. depth alongside.

CRANES: Located at Port Authority Facility No. 1 – electric gantry cranes 72.5 and 110 tons. Four 25-ton gantry cranes.

CARGO HANDLING FACILITIES: 3 grain elevators at Toledo load vessels at 50,000 b.p.h. There are 3 coal-loading machines, each of which can dump 1×100-ton car per minute, also 1 machine which dumps 2 cars simultaneously, for a max. of 6,000 t.p.h.

Iron pellets are received at new Torco Dock from self-unloading lake vessels. Storage Capacity 800,000 tons.

Liquids handled include petroleum products, industrial molasses, trichlorethylene and perchlorethylene.

BRIDGES:

Bridges crossing Maumee River:

UNALASKA (Dutch Harbor), Alaska: 53.54 N. 166.30 W. (See Plan)

DOCUMENTS:

Customs:

Master's Oath (1300).
General Declaration (1301).
Cargo Declaration (1302).
Ship's Stores Declaration (1301).
Crew Effects Declaration (1303).
Clearance from Last Port.

Immigration:

Immigration Documentation (I-418).
Crew/Passenger List.
Landing Permit (I-95).
Visaed Crew List for Shore Leave (Supplied by Immigration).
Passport and (or) Seamens' Book.

PILOTAGE: Compulsory. To avoid a delay in obtaining a Pilot, the Owner, Master or Agent of a ship bound for Unalaska/Dutch Harbor must make prior arrangements at least 12 hours before entering port. The following information must be included:

1. Name/Call Sign of vessel.
2. Nationality.
3. Length, draft and g.r.t.

Pilot Boarding Station:

Lat. 53′ 55′ 00″ N., Long. 166° 29′ 00″ W. 1 mile (1.61 km.) East of Ulakta Head. Pilots, tugboats, Harbour Master and shipping Agents standby on VHF Channel 16 (156.8 MHz).

Berthing:

(a) Pilot – Compulsory. Shifting of and EDT requires 1 hour advance notification.

(b) Berths arranged by Agent in advance.

(c) 1 small tug available annually. Circumstances may arise when other tugs are available for ship assistance.

(d) Lineman – Arranged through ship's Agent.

(e) Boatmen – Arranged through ship's Agent.

ANCHORAGE:

Outer Anchorage: Lat. 53° 54′ 00″ N. to Lat. 53° 55′ 00″ N. at Long. 166° 27′ 00″ W., Rocky, Depth 12 fathoms.

Inner Anchorages: Domestic and other vessels which have cleared customs.

1. Dutch Harbor: Lat. 53° 54′ 00″ N., Long. 166° 31′ 20″ W., mud, depth 18 fathoms.
2. Iliuliuk Bay: Lat. 53° 52′ 40″ N., Long. 166° 31′ 10″ W., mud, depth 14 fathoms.
3. Captian's Bay: Lat. 53° 52′ 00″ N., Long. 166° 33′ 33″ W., mud, depth 15 fathoms.
4. Nateekin Bay: Lat. 53° 53′ 00″ N., Long. 166° 37′ 00″ W., mud, depth 17 fathoms.
5. Broad Bay:
   (a) Lat. 53° 55′ 05″ N., Long. 166° 36′ 30″ W.
   (b) Lat. 53° 56′ 05″ N., Long. 166° 36′ 30″ W.

Must check with the U.S. Coast Guard and the Alaska Department of Fish and Game prior to anchoring or placing an oil rig at these locations. More locations may be forthcoming.

Note: When anchoring in Dutch Harbor, no vessel may anchor in the glide path to the airport.

MAX. SIZE: No restrictions except draft at various facilities and through the East Channel 24 ft., Rocky Bottom at MLLW.

RADIO:

(a) Department of Public Safety, Harbour Master, Pilots, Tugs, Shipping Agents and National Marine Fisheries Observer Transfer Station standby on Marine VHF Channel 16. 4125 A kHz.

(b) Alaska Department of Fish and Game and the Alaska Department of Fish and Wildlife, (State Troopers) standby on Marine VHF Channels 6 and 16. 4125 A kHz.

(c) Marine Operator calls vessels on Marine VHF Channel 16 and receives all radio traffic on VHF Channel 28.

(d) All other traffic stands by on Marine VHF Channel 6.

TUGS: Unimac Pacific Towing – 55 ft., 800 h.p. vessel.

Boatmen:

Victory Services – VHF Channel 78.
Ballyhoo Services – VHF Channel 16.

BERTHING:

Berth No.	*Wharf Length* (ft.)	*Depth at MLLW* (ft.)	*Remarks*
1	420	30	City Dock and Petro Marine tankfarm – Warehouse available.
2	300	40	APL – 208, 3 ph., 60 cycle power. 100,000 lb. gantry crane.
3	360	50	Delta Western Fuel Pier.

21	78	20	Walashek Industries (Repair, 300 ton haulout).
22	160	31	Underwater Construction.
23	300	35	Crowley Maritime.
24	420	20	Off Shore Systems Inc.

CRANES: 100,000 lb. container lift at American President Lines. Mobile cranes at the other facilities up to 150 tons at request through Shipping Agent.
FRESH WATER: Fresh water is available at most berths. Order through Agent or Dock Operator.
FUEL: Available at Delta Western Fuel Pier No. 3; Petro Marine Piers No. 1 and 6 and Crowley Maritime No. 23.
REPAIRS/SERVICES: Most deck, hull, engine, radar, RT, gyro, hydraulic, refrigeration and almost all types of marine electronic and electric repairs. Divers available for underwater surveys and repairs.
DRY DOCKS: Walashek Industries 300 ton haulout facility.
SURVEYORS:
1. Kodiak Marine Surveyors, P.O.Box 356, Kodiak, Alaska 99615. Tel: (907) 486-5616.
2. Rocky Point Enterprises, Inc., P.O.Box 1047, Homer, Alaska 99603. Tel: (907) 235-8967.
3. Alaska Marine Surveyors, SRA-2 Box 9312, Eagle River, Alaska 99577. Tel: (907) 694-3055.
4. Capt. Wolslenholm, P.O.Box 3313, Anchorage, Alaska 99510. Tel: (907) 277-5109.

GANGWAY/DECK WATCHMEN: Usually ship's crew. Ship's gangway used.
OPENING/CLOSING HATCHES: Stevedores or ship's crew whichever to ship's advantage.
REPATRIATION: Crew changes and repatriation can be carried out with little difficulty.
AIRPORT: Distance 4.5 miles from any facilities. Daily flights to Anchorage with domestic and international connections. Peninsular Airways, Mark Air and Aleutian Aire Ltd. Air charter service state wide.
TIME: GMT minus 9 hours in Winter, and GMT minus 8 hours in Summer. First Sunday in April clocks advanced 1 hour. Last Sunday in October clocks retarded 1 hour.
HOLIDAYS: New Year's Day, Lincoln's Birthday, Washington's Birthday (3rd Monday in February), Seward's Day (last Monday in March), Memorial Day (last Monday in May), Independence Day, Labor Day, Alaska Day (18th day in October), Veteran's Day (November 11th), Thanksgiving Day and Christmas Day and every Sunday and every day designated by public proclamation by the President of the United States or the Governor of the state as a legal holiday.
POLICE/FIRE/AMBULANCE: Tel: (907) 581-1233; Emergency Tel: 911; VHF Channel 16, 24 hours a day.
EMERGENCY CO-ORDINATION CENTRE: U.S. Coast Guard. Dial 0 – Ask operator for Zenith 5555 or 2182 kHz.
GENERAL: Fishing vessel's wide lights and search lights must be turned out prior to vessel entering port.
AUTHORITY: City of Unalaska, P.O.Box 89, Unalaska, Alaska 99685. *Tel:* (907) 581-1254. *FAX:* (907) 581-2519. *Contact:* Penny Mendenhall, Acting Port Director/Harbour Master.

VALDEZ, Alaska: 61.07 N. 146.21 W. (See Plan)
Also see "Valdez Marine Terminal"

Located at head of Valdez Arm in Prince William Sound.
APPROACHES: Via Prince William Sound to the Valdez Pilot Station.
DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: Pilots board approx. 2 miles North of Busby Light.
MAX. SIZE: Harbour depth over 300 ft. Tides: diurnal range 12 ft. Also see "Berthing" and also see "Valdez Marine Terminal".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
ANCHORAGE: Excellent, close by dock. Bay is too deep.
CUSTOMS: Quarantine, local. Immigration and Customs from Anchorage.
TUGS: Limited availability.
BERTHING: Valdez City Dock: 36 ft. MLLW. 600 ft. long by 40 ft. wide 2 warehouses, 1 heated, 1 unheated. Stevedore provides equipment which includes fork-lifts and 2×100 ton mobile cranes and 1×150 ton mobile crane. Dock operated by North Star Stevedoring Co.
Floating Quay: Length 700 ft., width 100 ft. Mobile cranes available Facilities for Lo/Lo and Ro/Ro.
STEVEDORES: 3 gangs.
MEDICAL: 150-bed mental patient hospital; 15 beds for local use 1 doctor, 1 dentist regularly from Anchorage.
TANKERS: *Tesoro Petroleum, Petroleum Dock:* Length 200 ft., width 40 ft., depth 36 ft. at MLLW.
Also see "Valdez Marine Terminal".
FRESH WATER: Available in temperate seasons.
FUEL: Not available.
REPAIRS: Minor repairs only.
TRANSPORTATION: Air; highway to Fairbanks and Anchorage.
AUTHORITY: City of Valdez, P.O.Box 307, Valdez, Alaska 99686.
Port of Valdez, 200 S.W. Market Street, Suite 985, Portland, Oregon 97201-5713. *Tel:* (503) 227-4567. *Telex:* 360718 Portvaldez Ptl. *FAX:* (503) 226-1023. *Contact:* Vernon W. Chase, Marketing Director, Port of Valdez, Alaska.

VALDEZ MARINE TERMINAL, Alaska: 61.05 N. 146.24 W. (See Plan)

OPERATORS: Alyeska Pipeline Service Company.
The terminal does not provide any tug, launch or pilotage assistance for the berthing or unberthing of tankers calling at the terminal. These services, as well as any other tanker services, must be arranged separately by tanker owners.
LOCATION: The Trans-Alaska Pipeline Valdez Marine Terminal is situated on the Southern shore of Port Valdez.
Port Valdez is a natural deep-water fjord located at the N.E. part of Prince William Sound which provides access from the Gulf of Alaska. Port Valdez is about 12 miles long and 2.5 miles wide, is surrounded by steeply rising mountains, and remains ice free throughout the year. The approach to Port Valdez is by way of Valdez Arm, a deep-water channel with a minimum width of approximately 3,000 ft.
The overland approach to the site, which is close to the mouth of the Lowe river, is by road about 6 miles long connecting the terminal with the Richardson Highway. The town of Valdez is 14 miles from the terminal by this route. The distance by boat across to Port Valdez is approx. 2.5 miles.
The terminal operates 24 hours per day, 7 days per week, throughout the year.
The administrative offices will normally be open between 0800 and 1630 hrs., Monday through Friday. The office telephone number is (907) 835-6620.
DOCUMENTS:
Certificate of Financial Responsibility.
SOLAS Safety Equipment.
SOLAS Safety Construction, or for U.S. documented vessels: U.S. Coast Guard Certificate of Inspection.
SOLAS Radiotelegraphy Certificate.
Crew Lists.
Derat Certificate.
Clearance from Last Port.
PILOTAGE: The Pilot boards off Blight Reef. Arrangements to be made by vessel's Agent.
ARRIVAL ADVICE: Masters of vessels bound for the terminal must advise the terminal as follows:
Last Port ETA: Tankers en route to the terminal, upon departure from their last port of call prior to Valdez, will send a telegram or telex to Alyeska Pipeline Service Company, Valdez, Alaska, Telex No. 090-26-564 (Answerback: Alyeska Valz) advising the estimated Alaskan local time and date of arrival.
72-hour ETA: Not less than 72 hours, unless transit time is less than 72 hours, prior to arrival at Cape Hinchinbrook, tankers will send a telex or telegram to Alyeska Pipeline Service Company providing the terminal with the following information:
a. ETA at Cape Hinchinbrook.
b. Quantity of ballast to be pumped ashore and grade of last cargo.
c. Quantity of oil to be loaded.
d. Distance from the bow to cargo manifolds.
e. Size, number and type of cargo connections.
(d. and e.:) At first call to Terminal. Not necessary on subsequent voyages.
f. Amount of provisions and stores to be loaded.

Final ETA: Tankers will send a final ETA, 24 hours in advance of their arrival. This 24 hour ETA shall be as accurate as possible and tankers will notify the terminal whenever the arrival time changes by more than 3 hours.
Notice of Arrival: After entering the Coast Guard's Prince William Sound Vessel Traffic Service, vessels ready to commence loading or deballasting should give immediate notice to the terminal. This notice is extremely important as it can affect berthing priority.
Coastguard Notification: Terminal will advise USCG at Valdez of all ETAs received.

AMVER Participation: The notice of arrival requirement to be given to the U.S. Coast Guard Captain of the Port in Valdez, Alaska, can be met if vessels participate in the Automated Mutual-assistance Vessel Rescue System (AMVER). Participation in AMVER will also make the Coast Guard's Prince William Sound Vessel Traffic Service aware of the tankers that will be entering the service.

Initial Radio Contact: Ship-to-shore radio telephone calls can be made to the terminal, (907)-835-2261, 24 hours a day by normal commercial Channels.

RADIO: All times are GMT – following information produced as a "guide" and subject to change.

VHF: The Alyeska Pipeline Service Company operates a VHF – FM base station in Valdez, Alaska under the call sign "WAB – 952". This base station is maintained for the purpose of transacting company business with either inbound or outbound vessels and is open 24 hours a day. (Transmit/receive range of this station is limited to Port Valdez.) The official language for all communications shall be English.

Channel	*Frequency*	*Use*	*At*
10	156.500 MHz	Intership and Ship to Coast Guard	A – B – C
16	156.800 MHz	Distress – Safety and Calling	A – B – C

A – Contingency Management Centre

B – Oil Contingency Warehouse

C – Operational Control Centre

The VHF – FM marine radio system utilised by the terminal is compatible with the Prince William Sound Vessel Traffic Service which is operated by the U.S. Coast Guard in Valdez, Alaska. The USCG Vessel Traffic Service will have VHF – FM radio-telephone coverage extending beyond Cape Hinchinbrook and including Prince William Sound, Valdez Arm, and Port Valdez. The tugs available at the terminal will also be equipped with VHF – FM transceivers.

TUGS: 2×7,000 h.p. and 1×9,000 h.p. twin-screw tugs and 2×300 h.p., single-screw mooring launches are on standby at the terminal to provide oil spill containment, cleanup and contingency services and fire fighting services as required by the terminal. The tugs are equipped with telescoping fire monitors and will be capable of providing 3,500 g.p.m. of foam or fire water at 150 p.s.i.g. at an elevation 70 ft. above the tug's waterline. The tugs are equipped with VHF-FM radio-telephone communication equipment. Should tankers desire to contact the tugs, the tugs may be reached by calling on Channel 16 (156.80 MHz).

The tugs and mooring launches are available to provide berthing and unberthing services to tankers calling at the terminal.

BERTHING: *Berth Priority:* Berth priority and berthing order will be determined by the Terminal Marine Superintendent who will use the general guideline of assigning tankers and berths in the order by which tankers enter the Prince William Sound Vessel Traffic Service and are in all respects ready to discharge ballast or load.

Procedures: Tugs will be dispatched by the Marine Shift Supervisor to meet inbound tankers and to assist in berthing at the nominated berth. The Master shall remain solely responsible, on behalf of his owners, for the safety and the proper navigation of his vessel. Manoeuvring power must be available on the main engines during berthing operations. The positioning of the tanker's loading manifold in relation to the metal loading arms has to be carried out to a proper alignment, as required by the berth operator.

Maximum Allowable Berthing Velocities: The following table gives the designed maximum allowable berthing velocities for Berths No. 1, 3, 4, and 5. The velocities are given in inches per second for the various size tankers in the 40% ballast condition:

	Berth No. 1	Berths No. 3, 4 and 5
85,000 d.w.t.	9 in./sec.	12 in./sec.
120,000 d.w.t.	8 in./sec.	11 in./sec.
265,000 d.w.t.	—	7 in./sec.

Note:

(a) 1 knot=20.2 in./sec.

(b) Velocities are given for a line normal (perpendicular) to the axis of the dock or the berthing dolphins.

Mooring Hooks and Mooring Capstans: Each berthing dolphin and each mooring dolphin will be equipped with a mooring capstan and either 2 or 3 quick-release mooring hooks. Berthing dolphins will have double quick-release hooks, and the mooring dolphins will have triple hooks.

The recommended mooring line arrangement diagrams included in the "Plans" show the location of these double and triple hooks. Since Berth No. 1 has no berthing dolphins, the 4 double quick-release hooks are located on the loading dock.

These mooring hooks are designed to service 1 mooring line per hook. Thus, no more than 3 lines should be led to any mooring dolphin nor should more than 2 lines be led to any berthing dolphin. These mooring hooks may be released locally.

Each mooring capstan will be mounted on, and form an integral part of, the associated double or triple quick-release mooring hook. This will provide a mooring capstan to assist in securing mooring lines at every berthing dolphin, mooring dolphin, and on the floating berth loading dock.

These mooring capstans are designed to give a minimum running pull of 2,000 kg. (4400 lb.) at a rate of 30 m. (98.4 ft.) per minute. The capstan will be positioned at a height sufficient to prevent mooring lines and messengers from becoming snarled on the quick-release hooks.

Mooring launches will be used to assist the tanker in running mooring lines to the mooring dolphins at each berth.

The terminal will provide suitable messengers for heaving in mooring lines from the launches.

Mooring Lines: Mooring arrangements shall be satisfactory to the Marine Superintendent. All critical moorings shall be of similar size and elasticity. Ropes of different material from those used to moor the ship may be used for positioning the vessel but shall not count as part of the final moorings. It is required that in ships of 90,000 d.w.t. and greater all final moorings shall be wire rope. Nylon tails may be used if fitted to all moorings. Ships should be outfitted with sufficient moorings of similar material for normal moorings. Ropes of different material may be used in emergency.

Moorings While Alongside Berth: Tankers must at all times remain adequately secured alongside the berth. Moorings must be kept at an even tension, avoiding a slack line or varying tensioning situation. Should such a situation arise and not be immediately rectified by the ship's crew after communication with the deck officer, the berth operator will suspend any transfer operation. All vessels fitted with tension winches should apply brakes once the tanker is moored and shall not leave winches in the self-tensioning position.

Emergency Towing Wires: While at a loading berth, tankers will provide emergency towing wires positioned at both the offshore bow and stern. The wires shall be in good condition, have an eye in each end, and be of adequate strength to move the vessel off the dock. The outboard eye shall be maintained at water level, and slack aboard ship shall be secured with small pieces of fibre line.

Mooring Line Arrangement Diagrams: (See "Plans"). The recommended mooring line arrangement diagrams are provided in the "Plans" as guidelines to acquaint the tanker Master with the general mooring line arrangement for the loading berths at the terminal. These arrangements are indicative of the minimum suggested number of lines and do not preclude the Master from using additional lines.

TANKER REQUIREMENTS: *General:* Certain requirements of governmental agencies are in effect at the terminal in order to minimise the chances for a pollution incident. These requirements apply to all tankers calling at the terminal.

Operations at the terminal are primarily aimed toward the safe loading of tankers and the prevention of collisions and groundings of vessels that call at the terminal. These aims will be met by insisting upon and utilising conventionally constructed tank vessels manned by skilled crews, use of positive vessel traffic control within Prince William Sound and Port Valdez, and use of all traffic advisory and communications services in West Coast ports. The purpose of the following requirements for tankers calling at the terminal is to materially enhance tanker loading and discharge operations and to increase the safety of navigation so that the danger of pollution from oil spills is substantially reduced.

Safe Navigation: Tankers will observe the rules and directions issued by the U.S. Coast Guard as operator of the Prince William Sound Vessel Traffic Service. These rules and directions will pertain to communications check points, ETAs, traffic lane separation, anchorages, one-way traffic, speed, etc.

In addition to the normal instruments used in celestial navigation and piloting (sextant, pelorus, etc.), the following electronic devices must be aboard and in good working order:

a. Fathometer/Depth Sounder.

b. Loran C Receiver.

c. Two Independent Radar Systems. (10 cm. and 3 cm.).

d. Radio Direction Finder.

All vessels must have a qualified Pilot aboard for the transit of Prince William Sound and Port Valdez.

Communications: Tankers calling at the terminal will be required to have the following communications equipment aboard and in good operating condition:

a. VHF – FM radio-telephone with sufficient Channels and speakers to comply with the Prince William Sound Vessel Traffic Service operating rules and the Bridge-to-Bridge Radiotelephone Act.

b. Radiotelegraph.

c. Portable UHF transceiver will be supplied by the terminal.

d. Single sideband radio.

The portable UHF transceiver shall have at least five Channels which are tuned to the berth frequencies listed.

Additional Equipment: Tankers calling at the terminal will be required to have the following additional equipment:

a. Tankers must carry standard 6 in. hose sufficient to make at least 50 ft. in length for emergency lightering purposes.

b. Accommodation ladders and Jacob's ladders must be of sufficient integrity and free from ice and snow to permit safe embarking and disembarking by the Pilot.

c. Mooring lines must be of sufficient size, strength, and quantity to permit safe mooring of the vessel.

d. Manifold reducers, connectors, and extensions must be made of steel. Cast iron reducers will not be permitted.

e. Tankers which call at the terminal will be required to retain all solid waste refuse aboard the vessel, or use a suitable sewage treatment plant before discharge.

f. All ullage caps will remain closed during loading except during gauging or sampling.

g. Prince William Sound emergency towing cable package.

Operational Requirements: The following procedural and operational requirements are listed in order to make tanker Owners and Masters aware of some additional safety and anti-pollution measures in effect at the terminal. These requirements will be restated in the sections pertaining to the pre-loading inspection and cargo loading.

a. No repairs to radars shall be made while a vessel is moored to the loading berth unless authorised by the Terminal Marine Supervisor.

b. The tanker's main CW wireless set must be de-energized and switched off while alongside the loading berth.

c. Tank tops shall remain closed during loading operations. Petroleum vapours shall be vented through mast risers or stand pipes at an appropriate height above the main deck.

d. Ship's crew will assist with connecting and disconnecting loading arms to and from the vessel's cargo transfer manifold. Assurance that the arms are secured properly without damage shall be observed during pre-loading inspection. However, as a convenience the shore crew will aid the ship's crew in connecting loading arms to the ship's manifold as the shore crew will be more familiar with the shoreside facility connection.

e. All sea valves connected to the cargo piping system shall be sealed in the closed position prior to loading oil.

f. Prior to commencement of loading operations, a joint inspection of the vessel and a pre-transfer conference will be held by the Terminal Marine Supervisor and the tanker officer in charge.

g. No repairs that would result in immobilization of the vessel shall be carried out while alongside of the loading berths unless the Terminal Marine Supervisor specifically authorises such work.

PRE-LOADING INSPECTION: *Pre-transfer conference and joint safety inspection:* Prior to the discharging of ballast from cargo tanks or loading of oil, a pre-transfer conference and a joint safety inspection will be conducted by the Terminal Marine Supervisor and a responsible deck officer aboard the tanker who will be in charge of bulk liquid transfers aboard the tanker.

The purpose of the pre-transfer conference and the joint safety inspection is to insure that both the terminal and the tanker are suitable and ready for safe loading and handling of oil.

The Check List is designed to meet the following requirements:

a. Section 4.4 of the International Oil Tanker and Terminal Safety Guide which relates to the agreed procedures and safety checks prior to the commencement of cargo loading.

b. Title 46, U.S. Code of Federal Regulations, Section 35.35-30 relating to a Declaration of Inspection for Tank Vessels.

c. Title 33, U.S. Code of Federal Regulations, Section 156.150, relating to a Declaration of Inspection prior to the transfer of bulk liquid cargo from a shore facility to a large vessel.

The Check List is to be taken aboard the tanker by the Terminal Marine Supervisor and shall be used during the pre-transfer conference and the joint safety inspection of the tank vessel to insure compliance with applicable regulations and safety standards. Columns are provided on the Check List for the Terminal Marine Supervisor and the tanker person-in-charge to initial, indicating that the requirements have been met. The original of the check list shall remain aboard the tanker, and a copy shall be returned to the Terminal Marine Supervisor for subsequent delivery to the berth operator.

Terminal personnel are authorised to suspend oil transfer operations if any of the safety rules listed or on the check list are not observed, or if any other danger is believed to exist.

The Master of the tanker or his representative has the right to shut down loading operations in the event he feels shore operations are unsafe.

During the pre-transfer conference, the Terminal Marine Supervisor shall provide the responsible ship's officer with a printed sheet detailing description and location of the fire-fighting system and the other emergency systems at the terminal in general and at the berth to which the tanker is moored in particular. The Terminal Marine Supervisor shall also advise the vessel if any unusual or dangerous weather conditions are forecast or expected.

As the shifts on the berth change, the relieving Terminal Marine Supervisor and berth operator shall assure themselves that all conditions pertinent to their responsibilities are as previously agreed to, and shall sign the copy of the Declaration of Inspection. The relieving officer aboard the tanker shall assure himself that the original conditions still exist and shall sign the original of the Declaration of Inspection aboard the tanker. These relieving personnel will then become the person-in-charge of the transfer operation for the terminal and the tanker respectively.

BALLAST: *Ballast Quantities:* The terminal is to be informed of the approximate quantities of segregated clean and dirty ballast in the Master's pre-arrival message. This message should also state where the ballast was shipped and the grade of last cargo.

Ballast Reception Facilities: The terminal facilities will include three 430,000-barrel ballast reception tanks. Discharge of dirty ballast will be by way of the four 12 in. loading arms (Chicksans) on Berth No. 1 and the four 16 in. loading arms on Berths No. 3, 4 and 5. These loading arms connect to 20 in. lines at the berths and lead into a 42 in. line connecting each berth to the ballast reception tanks. Although the shore lines are insulated, they are not heat traced and there are no booster pumps to assist in the discharge of dirty ballast.

No. 5 Berth is situated approx. 1.25 miles from the reception tanks and has a possible head of 150 ft. Max. pressure 40 p.s.i. (approx.).

In the event of any stripping problems, it is recommended that tanks containing unpumpable ballast be stripped internally to the slop tank and that the Load-on-top procedures be adopted.

Segregated Ballast: Only segregated ballast will be permitted to be discharged overboard. Segregated ballast is defined as ballast water that is introduced into a tank which is completely separated from the cargo oil and the oil fuel system and which is permanently allocated to the carriage of ballast. The deck log book must record all times of ballast discharge and when pumps are started or stopped. This log must also indicate whether or not the segregated ballast is being dropped in the initial stages to sea level. A close watch must be maintained on the overside discharge, with a deck floodlight or portable explosion-proof light being trained on the discharge during hours of darkness. If there are any indications of discolouration or sheen, discharge must be suspended and an investigation must be carried out. If there is any doubt as to the quality of the segregated ballast, all discharge will be made into the shore reception facilities.

Dirty Ballast: All ballast contained in any compartment or tank used for the carriage of oil will be classed as dirty no matter how clean the ballast may appear to be. No ballast carried in cargo tanks may be discharged at sea or in port.

After the connection of the loading arms has been completed and the suitable valves between the arms and the ballast reception have been opened, permission to commence discharge will be given to the responsible tanker officer by the berth operator who will have received approval from the Operations Control Centre (OCC).

Contact between the tanker and the terminal will be by means of the UHF radio that will be placed on board by the Supervisor. As during all transfer operations, there will be a continuous watch near the ship's manifold. In the event of an emergency on the berth, pressing of the emergency alarm will activate the valve closing mechanism.

On hearing this signal, the Crew member at the manifold must stop the ship's ballast pumps to avoid damage by pumping against a closed valve system ashore. (See "Emergency Procedures"). On commencing discharge of dirty ballast and at frequent intervals during the discharge a watch will be kept on the area around the sea valves even though the sea valves have been inspected during the initial safety checks and a seal has been placed on them by the inspecting Terminal Marine Supervisor. Any indications of any oily sheen will necessitate a shutdown of the discharge pumps and an investigation to be carried out before any further ballast can be discharged. Thirty minutes before completion of discharge, the responsible tanker officer will inform the berth operator who will in turn advise the OCC and the duty Terminal Marine Supervisor.

On completion of the discharge and after pumps have been stopped the loading arm(s) used for dirty ballast discharge must be drained back into the slop tank. On vessels with an inert gas system, gauging will be taken by way of the deck purge pipes to determine that tanks are empty. It is not intended that vessels will depressure cargo tanks for visual inspections, nor should tank lids be opened on any compartment that is not gas free.

All safety regulations applicable during the loading of oil will also apply during the discharge of ballast.

Governmental Ballast Discharge Requirements:

State of Alaska: The State of Alaska requires that the Master of a vessel scheduled to take on any petroleum product or cargo, complete and sign the State of Alaska Department of Environmental Conservation Ballast Water Discharge Certificate Affidavit. To support this affidavit the Master must be prepared to produce both deck and engine room log books and a legible copy of that portion of the Oil Record Book relevant to the sea passage from last discharge port to the terminal.

Federal Requirements: Prior to loading oil on any vessel, the terminal is required by the United States Department of the Interior to obtain from the Master of the vessel a legible copy of that part of the Oil Record Book that pertains to the voyage of the vessel to the terminal from the vessel's last oil discharge port. This legible copy shall be certified under oath by the Master as being true and correct. If the vessel is not required to maintain an Oil Record Book or similar records, the Master of the vessel is required to provide the terminal with an affidavit, duly sworn to and signed, stating any and all facts bearing upon any discharge of oil or oily water from the vessel during its voyage to the terminal from its last oil discharge port.

Should the Master be unable to comply with the preceding requirement or if it appears from the Oil Record Book or other documentation that a vessel has discharged oil or oily water during its voyage to the terminal, the terminal is required to promptly notify the Department of the Interior's representative, the Authorised Officer. Tankers discharging ballast water or other oily mixtures may be subject to penalties.

OIL CHARACTERISTICS: The predominent oil to be available at the terminal is currently North Slope Crude Oil. The following preliminary characteristics of North Slope Crude Oil are given to acquaint the Master and the cargo officers of tankers that will call at the terminal with the general properties of the cargo they will load.

Specific Gravity: 0.8933 at 60°F.
API Gravity: 27.0° API.
Pour Point: + 15°F.
Viscosity: 73.5 SSU at 100°F., 169 SSU at 60°F.
Reid Vapour Pressure: 4.0-4.5 lbs.
Sulphur Content: 0.94 per cent by weight.
Waxing: 85-117°F. (begins to precipitate). 50-55°F. (bulk of wax begins to come out of solution).
Mercaptan Sulphur: approx. 14 parts per million.
Loading temperature: approx. 100°F.
Dissolved H_2S: less than 0.2 parts per million.

LOADING FACILITIES: *General:* All loading operations will be accomplished in accordance with the joint inspection pre-transfer conference. Loading operations cannot commence until the vessel has complied with all State of Alaska and Federal Requirements and all required documentation has been provided.

Crew Responsibilities: Ship's crews will be responsible for assisting with handling the loading arms on board the tanker, furnishing and making the adaptor connections, removing blind flanges, and guiding the loading arms (Chicksans) to the appropriate manifold connections. However, as a convenience, the shore crew will aid the ship's crew in connecting loading arms to the ship's manifold as the shore crew will be more familiar with the shoreside facility connection. The Chicksan loading arms and couplings are hydraulically controlled by the berth operator who will be in constant voice communication with the individual responsible for the connection by means of the UHF portable radio that will be supplied to all vessels by the Supervisor.

If required, the terminal will supply 10 in. – 16 in. reducers at Berth No. 1 and 12 in. – 16 in. at Berths No. 3, 4 and 5.

Check List Requirements: After the Terminal Marine Supervisor is satisfied that all the safety requirements have been complied with, permission will be given to commence loading. All operations in connection with starting of loading, switching of tanks, and topping off will be the responsibility of the responsible ship's officers.

Before the maximum pressure or loading rates agreed to at the pre-transfer conference are reached, slow loading will be started and the responsible ship's officer will ensure that the cargo is flowing to designated tanks, thus ensuring that all block valves separating lines are open. On completion of this check and after advising the berth operator, the pressure/rate will be increased to the maximum previously agreed by the Master, or the officer in charge.

A responsible member of the crew will remain near the manifold within sight of the berth operator. This is in addition to the officer on cargo watch who, at frequent intervals, will check the state of loading with the berth operator by means of the UHF radio. This officer will also advise the berth operator when changes in the loading rate are required.

The rate of flow into the tanker can be observed on the large digital readout situated by the berth operator's control position.

Loading Suspension: Terminal: Terminal personnel will suspend loading operations if any safety rules are not followed, or if terminal personnel supervising loading operations believe any other danger exists, providing adequate notice is given to the responsible ship's officer.

Tanker: The Master is required to shut down loading if he feels that shore operations are unsafe, provided adequate advance notice is given to berth personnel.

Emergency Shutdown: In the event of an emergency (See "Emergency Procedures") the following types of shutdown could occur:

(1) "Danger" shutdown.
  (a) All berth block valves close.
  (b) Metering upstream block valves close.
  (c) Berth control valves close – one for each loading arm (in 5, 5.5, 6.0, and 6.5 seconds, respectively, to prevent surge to line).
(2) Fire shutdown
  (a) The preceding valve closures plus fire alarm and start fire pumps.
(3) Emergency shutdown, one per arm, closes control valve only.
(4) Low vapour pressure on any crude tank – initiates (1) preceding.

Pushbuttons for (1) preceding are located in berth area plus one on berth operator's alarm panel.

Pushbuttons for (2) 1 on roadway; 1 on roadway at land; 1 in Power Distribution Cabinet (PDC); 1 in Berth Operator Control (BOC) alarm panel; 1 in loading arm area.

Pushbutton for (3) 1 local at each valve.

Topping Off: Near the end of loading when topping off, the responsible ship's officer will request the gradual reduction of loading rate for topping off operations. This reduction will be achieved by the berth operator slowly closing the berth loading valves. The berth operator will progressively reduce the opening of the berth control valves and will take loading arms out of service, until the point when all berth control valves and block valves are finally closed, when advised by the ship's officer "Shut Down" or "Finished Loading". The loading arms will then be drained into a ship's tank.

Disconnecting: On being satisfied that loading arms and ship's manifold are empty, the order will be given from the responsible ship's officer to the berth operator to uncouple the quick release couplings.

During the period of disconnecting, the USCG Vessel Traffic Control Centre at Valdez will have been advised. Tugs will be on standby, and providing that there are no other ship movements that would interfere with sailing, the "Early Departure System" will be carried out. The actual Bill of Lading figures will be sent to the master by W/T or Telex after departure.

COMPLETION/DEPARTURE PROCEDURE: *Topping-Off:* As the tanker begins the topping off stage, the responsible ship's officer shall notify the berth operator who will in turn keep the OCC informed as the cargo loading rate is reduced. When the ship's officer estimates approximately one hour remains in the loading process, he shall notify the berth operator.

Tug Assistance: After being notified by the tanker that one hour remains in the loading sequence, the berth operator shall notify the OCC and the Terminal Marine Supervisor. The OCC shall continue to monitor the topping off process and the Terminal Marine Supervisor shall place the vessel's pre-arranged tugs on standby. The tugs shall be alongside the vessel after all loading arms have been disconnected and before any mooring lines are let go.

U.S. Coast Guard Vessel Traffic Service: The departure of tankers from the terminal shall be in accordance with the published standard operating procedures for the Prince William Sound Vessel Traffic Service. The Coast Guard Operations Centre located in Valdez shall be the directing authority for the operation of the vessel traffic service. The Terminal Marine Supervisor will notify the USCG-VTS one hour prior to the completion of loading and again when loading is complete. When the Terminal Marine Supervisor notifies the USCG-VTS that loading is complete, he will verify the tanker's status to enter the Vessel Traffic Service and will check on any inbound vessel traffic.

SAFETY: After the tanker is secured, the Terminal Marine Supervisor will board the tanker to contact the Master or his representative to:

– provide information on terminal safety regulations.
– agree on designated smoking areas
– advise ship's personnel on "Work Permit" and "Hot Work Permit" procedures.
– present ship/shore Safety Check List.
– present printed sheet describing terminal emergency procedures and fire fighting capabilities.

The following are **some** of the safety requirements.

Warning Signs, Lights, and Signals – Upon arrival at the terminal, a tanker shall display the following notice at the gangway:

WARNING
NO OPEN LIGHTS
NO SMOKING
NO VISITORS

During transfer of oil, and when in the non-gas free condition a red signal (flag by day and electric lantern at night) shall be displayed so that it is visible from all sides.

Blowing tubes – Funnel uptakes and boiler tubes will not be blown while a tanker is berthed at the terminal.

Use of Tools – No chipping or other operation likely to produce sparks will be allowed in any designated hazardous area. The Terminal Marine Supervisor and the responsible ship's officer shall both be satisfied that there is no such activity on the vessel or on the facility.

Flashlights, Hand Torches, Lanterns – Only self-contained battery powered flashlights, hand torches, lamps and lanterns, approved by USCG will be permitted to be used aboard the vessel or on the berths.

Main Engine – While berthed at the terminal, the tanker's main engines, steering machinery, and other essential manoeuvring equipment shall be maintained on standby status to permit the tanker to move from the berth on short notice.

Communications Equipment – A tanker's main transmitter shall be turned off and the main transmitting aerials shall be grounded whenever a tanker is alongside a loading berth at the terminal.

VHF-FM radiotelephone equipment, both portable and fixed, may be used as long as the equipment is permanently installed or intrinsically safe, conforms to FCC marine requirements, USCG requirements, and operates with a power and output of 1 watt or less.

The preceding requirements do not mean that essential servicing of ship's radio equipment cannot take place while alongside a berth. However, suitable arrangements for insuring safety during this work shall be made between the tanker and the terminal, including the securing of an appropriate work permit.

Operating and servicing of radar equipment aboard a tanker berthed at the terminal shall be agreed to by the Terminal Marine Superintendent or Marine Supervisor and shall be the subject of an appropriate work permit.

Vessels Alongside – Unauthorised craft shall be prohibited from securing to a berth at which a tanker is moored.

No craft shall come alongside a tanker while the tanker is handling crude oil or deballasting without the permission of the Terminal Marine Superintendent who shall instruct personnel aboard the craft that smoking, naked light, and galley fire regulations must be observed.

Designated Smoking Areas: Smoking shall be strictly prohibited within an area enclosing all tanker berths and loading docks and on board any tanker while at a berth, except.

(a) in buildings or other shore locations specifically approved for smoking and with such approval notices posted.
(b) on board a tanker in places specified by the Master, and agreed to by the Terminal Marine Supervisor.

Places designated for smoking shall not be outside of any of the accommodation areas. Special precautions shall be taken during conditions that may suggest danger; in particular, conditions of no wind or any indication of unusually high gas concentrations.

The Master is responsible for insuring that all on board are informed of the selected places for smoking and for posting suitable notices.

Only safety matches are permitted in approved smoking areas. The use of lighters is prohibited.

Galley Fires and Cooking Appliances – Galley burners are to be adjusted to insure efficient combustion and to prevent galley stack fires and sparks from incandescent soot. Flues are to be cleaned at regular intervals. When bottled gas equipment is used, the gas shall contain an additive which will give it a distinctive odour. Sufficient fire extinguishers shall always be provided near the galley. Oily rags and fat shall not be allowed to accumulate, and the exhaust fan ventilators shall be kept clean.

While a tanker is at a berth, the use of galley stoves and other cooking appliances with non-immersed elements such as electric hot-plates and toasters shall be permitted provided that the Terminal Marine Supervisor agrees that no hazard exists and that such use is in the galley, in the pantry, or in designated smoking areas.

Work Permits – If repairs are to be carried out on a tanker alongside a berth at the terminal, the responsible ship's officer must discuss and obtain agreement from the Terminal Marine Supervisor on the details of the work to be done. Certain types of repairs will be the subject of written work permits which shall be completed by the responsible ship's officer and authorised by the Terminal Marine Supervisor at the time of the pre-loading inspection Check List. These types of repairs include but are not limited to:

(a) Repairs to main engine, steering machinery, or other manoeuvring equipment which might immobilise the tanker.
(b) Repairs to tanker's radiotelephone or communications equipment.
(c) Repairs to radar equipment.
(d) Repairs to galley equipment and cooking appliances.

Hot Work Permits – Any hot work done at the terminal, either on the berth or aboard a tanker moored to a berth must be approved by the U.S. Coast Guard Captain of the Port, Western Alaska. This approval will be in the form of a signed Hot Work Permit, issued by the U.S. Coastguard.

EMERGENCY PROCEDURES: Fire: The signal for a fire aboard a tanker moored at the terminal shall be 5 prolonged blasts of the ship's whistle or siren supplemented by a continuous sounding of the ship's general alarm. In the event of a fire within the terminal, the tanker shall be notified by the berth operator and, in addition, the terminal fire alarm will also be sounded.

The initial action required of tankers in the event of a fire within the terminal is to prepare for a shutdown of all loading and ballast water discharge arms. This shutdown will be initiated by the terminal and not by the tanker. In case a shutdown does occur, loading and ballast discharge will not be commenced again until the all clear notification has been received from the Terminal Marine Supervisor.

In the event of a fire aboard the tanker or on the loading berth, the initial actions will consist of shutting down all transfer operations. The standby tug, followed by the other tugs, will be dispatched by the OCC to the appropriate berth and the fire water pump shall be started. If necessary, the tanker will be towed off the berth by tugs, using the emergency tow wires. Each berth is equipped with an independent fire water system which includes a 2,000-gallon-per-minute pump and a liquid foam system. Each berth is also equipped with the following fire-fighting equipment:

(a) 2 fixed foam monitors.
(b) 2 fixed firewater monitors.
(c) 5 fire hydrants.
(d) 3 hose reels.
(e) 1 shore to ship firewater connection including 75 ft. of 2.5 in. hose.

Each berth also has the capability to be interconnected with the tugs or with fire trucks to provide increased fire-fighting capacity. The foam system is designed for coverage of fire on the berths only and is not normally interconnected for use by shipboard firefighters in the event of a fire.

Note: Regardless of any assistance the terminal may render, vessels at the berth are expected to put their own emergency procedures into effect whenever required.

Man Overboard: In the event of a man overboard from a tanker moored at the berth, rescue efforts will be implemented immediately, and the Berth Operator shall be advised by UHF radio. The Terminal Marine Supervisor shall also be notified by the Berth Operator. The standby tug and mooring boat shall be advised by the Berth Operator and shall get underway immediately to attempt the rescue.

Life rings will be in position around the loading berth and also on the berthing and mooring dolphins. In case of a man overboard, the medical authorities will also be alerted by the Berth Operator.

Oil Spills: The notification requirements for an oil spill are delineated by Federal Law. The Federal Water Pollution Control Act (FWPCA) requires persons in charge of vessels (among others) to notify the appropriate federal agency whenever an oil spill enters navigable waters or the adjoining shoreline. The appropriate agency designated to receive these reports is the U.S. Coast Guard which can be contacted on Channel 16, VHF-FM.

Notification of an oil spill shall be passed by the tanker to the berth operator who in turn shall inform the Terminal Marine Supervisor.

The terminal will call other agencies that are required to be notified.

The terminal will provide any available containment and cleanup assistance for any oil spill at the terminal. The terminal will activate its oil spill response procedures upon notification of an oil spill and shall utilise all available personnel, equipment, and resources to limit and minimise pollution.

CHARTS/PUBLICATIONS: The following official charts and publications are recommended for study when planning a voyage to Valdez, Alaska and the Terminal:

(a) National Ocean Survey Charts:

Chart Number		*Title*
Old System	*New System*	
8500	531	Gulf of Alaska – Strait of Juan de Fuca to Kodiak Island
8502	16013	Cape St. Elias to Shumagain Islands
8551	16700	Prince William Sound
8520	16709	Prince William Sound – Eastern Entrance
8519	16708	Prince William Sound – Port Fidalgo & Valdez Arm, Valdez.

(b) Nautical Chart Catalogue No. 3 – Alaska
(c) United States Coast Pilot No. 9, Cape Spencer to Beaufort Sea (1964) with current supplement.
(d) Tides Tables, West Coast, North and South America (current year).
(e) Tidal Current Tables, Pacific Coast of North America and Asia (current year).
(f) United States Coast Guard Light List, Vol. III, Pacific Coast and Pacific Islands (current year).
(g) Weekly Notice to Mariners published by Defense Mapping Agency Hydrographic Center (DMAHC).
(h) Local Notice to Mariners issued by Commander, Seventeenth Coast Guard District, Juneau, Alaska.
(i) Radio Navigational Aids, Pacific and Indian Oceans (Publication No. 117B), published by U.S. Hydrographic Office.

WEATHER: *Wind:* The mountains which surround Port Valdez tend to constrain the flow of air to either an Easterly or Westerly direction. At Valdez Narrows, the predominant directions are Northerly and Southerly.

Jackson Point experiences stronger winds than Valdez Airport, however, light winds (less than 13 m.p.h.) occur about 85 per cent of the time. The prevailing wind directions are S.W. from May through September and N.E. from October through April. The N.E. Winter winds reach gale force but usually do not prevail for long periods. The site is well protected from Southwesterly winds but is fully exposed to the Northeasterlies and to winds coming off Mineral Creek, directly North of the facility, approx. 2.5 miles away across Port Valdez.

The occurrence of winds with speed greater than 19 m.p.h. from any direction is less than 7 per cent throughout the year.

A wind chill factor chart is presented for use in conducting operations during Winter seasons. As indicated, combinations of low temperatures and high winds combine to provide extremely low equivalent temperatures. Outdoor operations under these conditions should be closely supervised to insure that personnel and crewmen do not suffer from exposure or frostbite.

Precipitation: Precipitation is abundant during all seasons with the majority falling during the months July through November. Valdez has an average annual precipitation of 62.37 in. with a mean total of 244.5 in. of snow per year. Greatest snowfall in a 24-hour period was 43 in. in February 1928. Precipitation of an amount in excess of 0.01 in. occurs an average of 170 days per year. Estimate 1 in. rain = 12-15 in. snow.

Temperature: The mean monthly annual temperature is 35.7°F. with recorded extremes of +87°F. (June 1953) and −28°F. (February 1947). The month of January is the coldest with a mean daily minimum of 11°F. and a mean daily maximum of 26°F. The month of July is the warmest with a mean daily minimum and maximum of 45.2°F. and 60.1°F. respectively.

Visibility: Snow or snow with fog are the major causes of reduced visibility during Winter months. At the Valdez Airport, visibilities of 1 mile or less occur 3.7 per cent of the time, annually. Visibilities greater than 5 miles occur 85 per cent of the time.

Tides: The tide at Port Valdez has a diurnal range of 12 ft. and a mean range of 9.7 ft.

Waves: The port is surrounded by mountains and is well protected from the open sea and the wave action within the port is limited to wind-generated waves which are constrained by the fetch available. The maximum calculated wave height is 9.4 ft. from the East with a period of 4.3 seconds. Waves in the order of 6 ft. could occur from the N.W. quarter. An important exception to this is a Tsunami or seismically generated wave which can be far in excess of the heights quoted above. Investigations in 1968 showed mean wave heights 3 ft. to 6 ft. in Winter (independent occurence 0.7 per cent of time) and 2 ft. to 3 ft. in Summer (0.1 per cent of time). Berths at the terminal are designed to withstand waves of 12 ft. with a vessel alongside and 20 ft. when vacant.

Ice: Valdez is an ice-free port as far as tanker operation is concerned. Light ice forms along the banks and in the small boat harbour at Valdez but this has not interfered with small-boat operations.

Currents: It appears that surface currents measured during calm wind conditions in Port Valdez often oscillate with the tide, moving generally in and out of the port with maximum speeds of 0.5 knot. The Easterly (flooding) surface current during a falling tide may or may not persist throughout the year. Although Volume 9 of the U.S. Coast Pilot for Alaskan waters describes the current in Port Valdez as "too weak and variable to be predicted", measurements of surface current speeds typically show maximums of 0.5 to 1.0 knot.

It is requested that inbound tankers keep the OCC advised of weather conditions in the Gulf of Alaska, Prince William Sound, Valdez Arm, and Valdez Narrows in order that accurate information may be passed to outbound tankers.

VISITORS: Access to the terminal is limited to terminal personnel, authorised governmental personnel and authorised visitors with valid reasons for entry onto the terminal site.

Visitors to the Valdez Marine Terminal are requested to make arrangements through the Administrative Office in advance of their arrival at the Terminal. Authorised visitors shall be met at the main gate, which provides the only land access to the Terminal and is located at the East end of the Terminal site, and shall be escorted through the Terminal area. All persons passing through the main gate shall sign in and out with the guard. Any visitor who arrives at the main gate outside normal working hours of the Administrative Office and who has not made prior arrangements shall be turned away and requested to contact the Administrative Office during normal working hours.

The guard at the main gate shall ask any visitor desiring to meet a tanker crewman to wait at the gate until the vessel is called and arrangements have been made to meet the visitor.

Small boats and other vessel traffic will not be permitted to dock at the terminal site without the approval of the Terminal Marine Supervisor. Only taxicabs with valid passes will be permitted to enter the Terminal site, and any private or commercial vehicles that are permitted in the terminal area will be subject to inspection on entering and departing the area.

SHORE LEAVE: If tanker personnel return to the Valdez Marine Terminal site in such a condition that they might require assistance to insure their safe return to the ship, they shall remain at the main gate until the guard grants them admittance. Should an escort be required, it will be provided by vessel personnel.

All tanker personnel transiting the Terminal area will be required to carry their United States Merchant Mariner's Document (USMMD) and company identification of tanker owner for identification. These documents shall be presented to the guard at the main gate whenever tanker personnel enter or leave the Terminal site. Should a crewman present himself without these documents, he will be detained and the Master will be called to resolve the matter.

TIME: Alaska Standard Time (150th West meridian) for a zone description of +9(ZD9). Local time is modified from the first Sunday in April to the last Sunday in October by the use of Daylight Saving Time for a zone description of +8 (ZD 8) for Alaska Daylight Saving Time. This time is 1 hour behind that in Seattle and California and 4 hours behind New York.

To avoid confusion, all communications regarding sailing times, sailing dates, arrival times, arrival dates, etc. are to be quoted in Alaska Local Time.

FRESH WATER: Only in cases of extreme emergency can potable water be supplied and in a very limited quantity.

FUEL: Not available.

POLLUTION: U.S. Federal Pollution Prevention Regulations and Federal Water Pollution Control Act to be strictly observed.

TELEPHONES: Pay telephones will be located in the vicinity of each loading berth for the use of ship's personnel.

Telephones will not be placed aboard tankships calling at the terminal.

AGENCY: Alyeska Pipeline Service Company will not act as Agent for tankers calling at the Valdez Marine Terminal. Any requirements for such services as ship chandler, etc. must be obtained through the Owner's appointed ship's Agent. For security, the Valdez Marine Terminal must be notified of the appointed Agent.

AUTHORITY: Alyeska Pipeline Service Company, Valdez Marine Terminal, P.O.Box 300, Valdez, Alaska 99686. *Tel:* (907) 835-6620. *Telex:* 090-26564. *FAX:* (907) 835-6078. *Contact:* Larry D. Shier, Marine Operations Manager/Port Captain.

BERTHING FACILITIES: The major ship loading facilities include four independent loading berths, numbered 1, 3, 4 and 5. Berth No. 1 is a floating berth whereas Berths No. 3, 4 and 5 are fixed structures.

	Berth No. 1 See Note	*Berth No. 3* See Notes 1 and 2	*Berth No. 4* See Notes 1 and 2	*Berth No. 5* See Notes 1 and 2
Vessel Size (Design) d.w.t.	16,000 – 120,000	16,000 – 250,000	16,000 – 265,000	16,000 – 265,000
Type of Berth	Floating dock	Fixed loading platform	Fixed loading platform	Fixed loading platform

Minimum Ship Manifold Spacing 1	—	—	—	—
2	—	6 ft. 9 in.	6 ft. 9 in.	6 ft. 9 in.
3	—	6 ft. 9 in.	6 ft. 9 in.	6 ft. 9 in.
4	—	6 ft. 9 in.	6 ft. 9 in.	6 ft. 9 in.
Quick Disconnect Coupling (QDC) Size (in.)	12	16	16	16
Manifold Size Range Acceptable to QDC (in.)	10 to 16	12 to 16	12 to 16	12 to 16

Note: (1) Although all berths are designed to handle vessels in the 16,000 d.w.t. size, loading arm size requires ship's manifolds to be a minimum of 10 in. in diameter. Normally, vessels less than 45,000 d.w.t. will be handled at Berth No. 1.

(2) Because of mooring dolphin limitations, vessels of more than 180,000 d.w.t. would be acceptable only if their deck machinery and mooring leads allowed an efficient bow and stern mooring line pattern. In addition to this requirement, distance from bow to manifold and prevailing weather conditions would have to be considered before berthing of such vessels would be authorised.

VANCOUVER, Washington: 45.36 N. 122.40 W.

(See Plan)

DOCUMENTS: 3 copies of following:
Cargo Manifest.
Stores List.
Crew Cargo List.
Crew List.
One copy of following:
Clearance from last Port.
Tonnage Tax Certificate.
Copy of Vessel register and itinerary of vessel port by port.

PILOTAGE: See "General-Pilotage" before first U.S.A. port (Albany).

ANCHORAGES: Only designated anchorages on U.S. Coast and Geodetic Charts are at Tongue Point (Astoria), Oreg. 2 in number and designated on Chart 6151 Columbia River, Pacific Ocean to Harrington Point, as 1 Lower Tongue Point and 2 Upper Tongue Point. Additional locations on Columbia and Willamette Rivers where safe anchorages can be made upon advice of Columbia River Pilots. Anchorage in Vancouver harbour by permission of Harbour Master.

RESTRICTIONS: No restrictions on night entry. State of tide and draft restrictions not applicable to vessels drawing less than 40 ft.

MAX. SIZE: No restrictions length and breadth. Depth at Columbia River entry 48 ft. River channel to Vancouver maintained at 45 ft. by 600 ft. Seasonal tidal effect up to 3 ft. at Vancouver.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Seattle Quarantine Station.

RADIO: Route ETA cables through KBLITT Seattle, Wash.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Normally join vessel at designated berth. Tug lines used at no charge.

BERTHING: No special requirements for berthing and no special arrival times required except under particular circumstances.

7 berths. Total length 4,300 ft. Ro/Ro facilities available.

BULK HANDLING FACILITIES: The grain terminal, owned by the Port and operated by the United Grain Corporation, has about 1,000 ft. (305 m.) of dock available. The 7 vessel spouts load 1 vessel at a time at a combined loading rate of 40,000 bushels per hour. The grain terminal can off-load at 18,000 bushels per hour, and they have a storage capacity for 5,000,000 bushels, dry bulk facility with 50,000 ton capacity covered storage. Bottom dump pit and top unload for gondola railcars. Mineral concentrations such as copper concentrate, quartz silica and zinc concentrate. Covered conveyor to special dry bulk dock.

EQUIPMENT: The Port of Vancouver has 3 Whirley cranes, 1 of which is rated at 50 short tons at 60 ft. (18 m.) and 15 short tons at 130 ft. (40 m.) the other 2 Whirley cranes have a capacity of 34 short tons at 60 ft. (18 m.) and 10 short tons at 130 ft. (40 m.). These 3 travelling gantry or Whirley cranes operate on parallel tracks on the face of the dock in conjunction with the double direct transfer tracks.

Bulk materials make up a sizeable portion of the Port's traffic, and consequently, large crane buckets are available for handling these cargoes. In addition, the Port has a special crane bucket for the successful handling of zirconium – a very fine sand material considered a "problem" commodity for efficient and waste-free handling.

The Port maintains a full complement of support equipment. They have 42 lift trucks with 2 – 3.5 ton capacities, 9 lift trucks with 7.5 – 15 ton capacities, 1 lift truck with a 26 ton capacity, along with various straddle-carriers, conveyors, front-end loaders, jitneys – and a range of special attachments and gear for all their equipment (such as prong-lifts for steel coils, grabs and squeezers for paper rolls, push-pull slip sheets for bag goods, cartons and boxes) to handle any special situations or problem with which they might be confronted.

STEVEDORES: Allocation for gangs Mondays through Saturday must be confirmed at 1100 hrs. to the longshore hiring hall. Allocation for gangs Sunday and Monday are made at 1100 hrs. Saturday for both day and night gangs. Same procedure applies to allocation of night gangs, but night gangs may be cancelled by 1400 hrs. afternoon of night gangs are to work.

Marine Terminal Corporation manages Berths No. 8 and 9.

MEDICAL: Any type of medical treatment can be provided and hospital facilities available.

TANKERS: 1 berth. 3 × 6 in. pipe-lines to 21 tanks. Storage capacity 85,800 bbls.

DENSITY: Fresh water at all times.

FRESH WATER: Available at all berths delivered through pier-side connections.

FUEL: Viscosity grades of B and lower. No advance notice required. Barging essential.

FIRE PRECAUTIONS: Port fire precautions respecting tankers are administered by U.S. Coast Guard, which enforces shipboard regulations under Code of Federal Regulations, Part 46, Sub-part D, Sections 20 to 40; Police Harbour Patrol, which controls port movements, boards vessels to warn Master regarding harbour regulations, including spilling of oil, etc.; and Fire Marshal, who exercises jurisdiction regarding fire regulations at shoreside facilities serving tankers.

CONSULS:
Austria
Belgium
Costa Rica
Denmark
Dominican Republic
El Salvador
Finland
France
Federal Republic of Germany
Great Britain
Iceland
Italy
Japan
Lebanon
Mexico
Netherlands
Norway
Republic of Panama
Peru
Sweden
Venezuela

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: See "Portland, Oregon".

GANGWAY/DECK WATCHMEN: Services at option of vessel Owner/Agent and available through private firms.

OPENING/CLOSING HATCHES: While ship is at dock, opening and closing hatches is work of longshoremen. Ship may open or close own hatches while under way.

CERTIFICATES: Registered tonnage certificate.

CUSTOMS ALLOWANCES: Tobacco, reasonable quantity. Wine and or Spirit, reasonable quantity.

CARGO GEAR: Valid cargo gear certificate required, acceptable to U.S. Bureau of Labor Standards.

REPATRIATION: Any arrangements possible for crew changes or other repatriation.

AIRPORT: Airport 10 miles from town, served by 7 regularly scheduled airlines with direct service and/or connections domestically and worldwide.

TIME: GMT minus 8 hours. Daylight saving time becomes effective annually on first Sunday in April through last Saturday in October.

HOLIDAYS: Following holidays are recognised: *New Year's Day; Lincoln's Birthday (Feb. 12th); Washington's Birthday (Feb. 22nd); Memorial Day (May 30th); *Independence Day (July 4th); *Labour Day (1st Monday in September); Columbus Day (Oct. 12th); Veteran's Day (Nov. 11th); Thanksgiving Day; *Christmas Day (Dec. 25th); Statewide Election Days. Other legal holidays may be proclaimed by State or national authority. When holiday falls on Sunday, following Monday observed as holiday. Longshore work performed on any of above-listed days is at overtime, which is one-and-a-half time rate. Days marked(*) are stop-work days, viz., no ships will be worked. This also applies to July 5th, which observed locally on unilateral basis.

POLICE/AMBULANCE/FIRE: Police Tel: 693-2555; Fire Tel: 693-1441; Ambulance provided by several private firms, but can be obtained through police or fire number.

SERVICES: All services available such as compass adjusting, major or minor repairs either with work barges or at ship repair berths; lay berths available; charts available from private companies; all chandlery supplies available.

SHORE LEAVE: Crew members permitted ashore except where vessel has made first arrival from Communist-controlled port.

IDENTIFICATION CARDS: Immigration Dept. requires Forms No. 595 and No. 31 (Repatriation). Changes can be effected at any U.S. Consulate and are honoured here.

AUTHORITY: Port of Vancouver, P.O.Box 1180, 3103 Lower River Road, Vancouver, Washington 98666. *Tel:* (206) 693-3611 or (503) 289-8824. *FAX:* (503) 285-6091. *Contact:* Byron H. Hanke, Executive Director.

WHITTIER, Alaska: 60.47 N. 148.40 W.

SHIPMASTER'S REPORT: October 1980. (Updated 1988).

GENERAL: Whittier is a small port in position Lat. 60° 47′ N., Long. 148° 40′ W. The population in October 1984 was 250. There are 2 hotels, 3 grocery stores, a school and a post office. The port was constructed between 1941 to 1943. It was developed as a main supply depot for the storage of oil for the Anchorage area and also as a transhipment port for produce from other areas in the United States. There is regular barge traffic from Seattle and other West coast ports with ammunition, food, merchandise and motor cars. All these are carried aboard flat top railway wagons which can be loaded or discharged at any state of the tide. The port is operated by the Alaska Railroad system and there is no shore gear of any kind. Whittier is surrounded by very high mountains and there is no road or footpath in or out. There is a very short landing strip suitable for small aircraft but the normal communication is by rail which goes under the mountains in two long tunnels. The journey takes about 1.5 hours and the timetable is frequent in the Summer when a lot of people visit Whittier for boating and fishing or to get the ferry to Valdez. During Winter however the service is about four times a week, weather permitting.

APPROACHES: *Recommended Route to Whittier Pilot:* British Charts BA. 3363 and 3364.

When Smith Island bears 256°×8 miles, vessels should leave the traffic zone and steer 277° passing 1.5 miles South of Naked Island and 1.2 miles North of Point Eleanor. Then alter course to 281° passing 1 mile South of Mears Point. After passing Mears Point, steer 350° through Ferry Passage and alter to 280° off Point Culrose Light to the pilot station. It is not locally recommended to pass North of Perry Island through the Dutch Group.

PILOTAGE: Pilotage is operated by the Southwest Alaska Pilots Association who have an office in Valdez, telephone number (907) 835 – 2134. They also have an office in Homer, telephone (907) 235 – 8783. Both stations maintain a continuous watch on Channels 10 and 16.

In theory, Pilots embark at Hinchinbrook Entrance. This has not been the practice however, for the last year or so, due to the long sea passage for the small pilot boat and the severe weather sometimes encountered in this area. Pilots normally embark at Blight Reef near Glacier Island. The pilot boat is stationed at Rocky Point some 10 miles away. The normal pilot boat is "Bering" which is a 63 ft. long trawler, capable of 10 knots, with a blue hull and white house. A newer boat is also in attendance. This is a 43 ft. glass fibre boat called "Bernhof" capable of 20 knots. She has a white hull.

No vessel may enter Prince William Sound through the Hinchinbrook Entrance without permission from the Coast Guard at the Valdez Traffic Control Centre on Channel 13 or 16. Large vessels may only transit Prince William Sound in daylight hours.

If permission is obtained, vessels may proceed direct to the pilot station at Whittier, 1 mile South of Point Pigot. See "Approaches".

ANCHORAGE: Anchorage off Whittier may be obtained in 12 fathoms at Pigot Bay (Lat. 60° 50.4′ N., Long. 148° 22.0′ E.).

BERTHS/FACILITIES: The 2 railway berths are only for barges carrying flat top railway cars on which all cargo is carried. The Delong Pier is used for oil tankers. The length of the wharf is 140 m. and the maximum length of ship is about 170 m. The minimum depth alongside is 48 ft. at the West end and 80 ft. at the East end.

Tankers normally berth port side alongside. In October 1980 there was one tug "Avenger" in attendance being 2,000 h.p. A shore gangway is supplied. All manifold connections are 6 in. The ship must supply all reducers. 2 lines are used for kerosene. Jet fuel, Mogas and diesel are imported. The distance to the shore tanks is 1.5 miles. All products are pumped from the storage area to Anchorage. Bunkers are not available for large ships. Provisions and supplies can be purchased in Anchorage and shipped down by rail. There is a small clinic with a physician's assistant. The nearest doctor or dentist is in Anchorage. In an emergency there is an ambulance which can run on the road or rails.

GENERAL:

Weather: The winds are very strong and variable. It is very wet in Summer and has an extremely high snowfall in the Winter months. The port is completely ice free the whole year round.

Formalities: All the usual American forms apply. Customs, Immigration and Coast Guard all come from Anchorage as there are no officials at Whittier.

Joining/Leaving: Crew may sign on and off at all times. During Winter Whittier is often cut off by snow.

Accommodation: Pilot and Agent stayed aboard throughout our 36 hour stay which proved very convenient for clearance and paperwork.

Agent: North Star Terminal & Stevedoring Company, Anchorage, Alaska 95510. Cable: "Norstevco Anchorage". Telex: 26471.

AUTHORITY: Whittier Harbour Commission, P.O.Box 608, Whittier, Alaska 99693. *Tel:* (907) 472-2201. *FAX:* (907) 472-2404. *Contact:* Port Director/Harbour Master.

WILMINGTON, Delaware: 39.44 N. 75.32 W. (See Plan)

DOCUMENTS: Handled through local Agents.

PILOTAGE: See "Philadelphia".

ANCHORAGE: At Cherry Island.

MAX. SIZE: Length unlimited, breadth unlimited, draft 38 ft. MLW tide range 5.5 ft.

Chesapeake/Delaware Canal: Max. LOA 760 ft. Max. draft 35 ft. (FW) (Max. draft 27 ft. in report dated January 1990). Height of mast 133 ft. Max. beam 170 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to New York Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: U.S. Coast Guard, Gloucester, N.J.

TUGS: Available through Wilmington Launch Service Tel: 652-1666.

BERTHING: 3,260 ft. marginal wharf. 20 – 100 ton crane capacity. 400 – 600 t.p.h. bulk unloader. Covered bulk storage of 472,000 sq.ft. Dockside freezer capacity of 1,050,000 cu.ft. at present.

Two multi-purpose bulk/container cranes available, capacity 40 tons, outreach 115 ft.

Roll-on/Roll-off cargoes handled.

DENSITY: Fresh water port. Normal 12 hour tides.

FRESH WATER: Hose connection from dock.

FUEL: Available.

CONSULS: All Consuls are located in Philadelphia, Pa.

REPAIRS: Possible.

DRY DOCKS: Major repairs and dry dock facilities – Penn Ship Yard, Chester, Pa.

GANGWAY/DECK WATCHMEN: Required.

OPENING/CLOSING HATCHES: Optional.

REPATRIATION: Facilities are available and arranged by Agent.

AIRPORT: Philadelphia International Airport, regular service.

TIME: U.S. Eastern Standard (GMT minus 5 hours) and Daylight Time, from first Sunday in April till last Sunday in October.

POLICE/AMBULANCE/FIRE: Police, Ambulance, Fire, Tel: 302-654-5151.

TELEPHONES: Dock-side pay phones.

SERVICES: All services available.

SHORE LEAVE: Allowed unless restricted by Immigration.

IDENTIFICATION CARDS: See "New York".

DEVELOPMENTS: Additional land has been acquired and one new berth along the marginal wharf is being planned.

AUTHORITY: Port of Wilmington, Delaware, P.O.Box 1191, Wilmington, Delaware 19899. *Tel:* (302) 571-4600. *Telex:* TWX 510-666-2181. *FAX:* (302) 571-4646. *Contact:* Kenneth H. Mack, Port Director. John B. O'Donnell, Director of Trade Development. John H. Doherty, Deputy Port Director.

WILMINGTON, N. Carolina: 34.14 N. 77.57 W. (See Plan)

PORT LIMITS: A ship is considered an "arrived vessel" upon arrival at Buoy 2CF.

DOCUMENTS:

3 copies Cargo Manifest (Forms 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
3 copies Crew Manifest (Curio List) (Customs Form 1304).
3 copies Stores List (Customs Form 1303).
3 copies Passenger List (Form I-418).
3 copies Crew List (Form. I-418).

Customs Boarding Officer will also examine Ship's Register and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:

Master's Oath (Customs Form 1300).
All foreign clearances.
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
Certified Crew List.
Oil Pollution Certificate.
General Declaration (Customs Form 1301).
Load Line Certificate.
Safety Equipment Certificate.

PILOTAGE: Pilots board vessels at Buoy "2CF" off the mouth of the Cape Fear River. Masters should notify local Agents by radio of their ETA at Buoy "2CF" in order that the Pilots may be on station in advance of arrival. Additionally, Masters may communicate with Pilots by radio telephone on 2738 frequency and by VHF Channel 18A. Pilots remain on board until harbour limits of Wilmington, where docking Masters normally board vessels for purposes of docking.

APPROACHES: The port terminal at Wilmington is located on the East bank of Cape Fear River, approximately 26 miles from the sea buoy at the mouth of the river. Wilmington is 150 miles S.W. of Cape Hatteras and 26 miles North of Cape Fear.

ANCHORAGE: Vessels awaiting Pilots normally anchor in area off Buoy "2CF". There is no safe anchorage in the port of Wilmington for large vessels to be accommodated. Small vessels can be accommodated for brief periods in anchorage basin, although it is necessary to swing with the tide in order to avoid blocking channel.

RESTRICTIONS: The approach channel and basins adjacent to the port are maintained at a depth of 38 ft. MLW.

MAX. SIZE: No limits on length, breadth, and draft limit is present channel project depth of 38 ft. Master should communicate with local Agent regarding stage of tide for passage of vessels drawing 34 ft. or above.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to New York Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: 3 towing companies operate at Wilmington.

BERTHING: A continuous marginal wharf, 6,940 ft. long. Docking at any hour, day and night. Also see "Developments".

SPECIALISED CARGO HANDLING FACILITIES: State Port Terminal: Fully equipped to serve cellular type container ships, for bulk handling; equipped with 6 yard rehandler buckets, receiving hoppers, and paved open storage areas, 2×45 ton, 1×115 ton, 3×40 ton container cranes (2×50 ton under construction), 1×140 ton mobile crane and 1×225 ton gantry crane; 1 berth with tank farm for handling liquid chemicals. 99×480 volt electrical outlets for refrigerated containers (70 additional outlets planned).

Almont Shipping Company: 3 berths, open and covered bulk storage, 2×25 ton cranes and 1×85 ton derrick. No facilities for LPG carriers.

TANKERS: 10 tanker berths with drafts from 30 ft. to 40 ft. MLW. Night berthing at all berths. Fresh water available.

FRESH WATER: Available from shore connections at rates up to 50 t.p.h.

FUEL: Bunker "C" and diesel fuels available locally.

FIRE PRECAUTIONS: Normal precautions observed.

REPAIRS: Minor ship repairs available.

DRY DOCKS: 1×1,000 ton lift floating dry dock.

AIRPORT: New Hanover Country Airport, 7 miles from N.C. State Port Terminal. Served by U.S. Air and American Eagle.

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time from first Sunday in April till last Sunday in October.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95, issued for the same vessel.

DEVELOPMENTS: A 900 ft. extension to the South end of the wharf for an addition to the container terminal will be completed in May 1990.

AUTHORITY: North Carolina State Port Authority, 2202 Burnett Boulevard, P.O.Box 9002, Wilmington, North Carolina 28402. *Tel:* (919) 763-1621. *Telex:* 510-937-0330. *FAX:* (919) 763-6440. *Contact:* Stephen W. Jackson, General Manager – Port of Wilmington. Karen P. Fox, Manager of Public Affairs.

WRANGELL, Alaska: 56.28 N. 132.22 W. **(See Plan)**

Located on Wrangell Island. Open all year.

DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: (From sea via Dixon Entrance up Clarence Strait to Guard Island.) Under pilotage from Guard Island.
ANCHORAGE: Good anchorage N.E. of Woronofski Island in 22 fathoms of water.
MAX. SIZE: Harbour depth 32 ft. MLLW. Tides: mean range 13.7 ft., diurnal range 16.1 ft. Also see "Berthing".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness Reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
CUSTOMS: Immigration, Guard Island or local Customs Office. Quarantine and Customs, local.
TUGS: 9 tugs up to 1,800 h.p. available with sufficient notice.
BERTHING: 4 wharves.

1. Wrangell Lumber Co. Dock: Berthing length 320 ft., 150 ft. wide, depth South end 32 ft. North end 40 ft. LW. Height of pier from zero tide 23.5 ft. Crane – 1 mobile, 8 ton, 6 lift-trucks. No shed space. 3 acres open storage.
2. Alaska Wood Products: Berthing length 300 ft., 50 ft. wide. Depth at LW 32 ft. Height of pier from zero tide 23 ft. No shed space.
3. Port of Wrangell Wharf: 35 ft. depth at both ends. Fresh water available. Lift trucks on rental from local private firms. Dock face 400 ft. with additional mooring dolphins for a total overall length of 700 ft.
4. Barge: Transfer bridge facilities, 17 ft. wide, capable of up to 70 tons (140,000 lbs.).

STEVEDORES: 4 gangs available.
MEDICAL: Small but new hospital.
WATER: Available.
FUEL: Small quantities available.
REPAIRS: None.
TRANSPORTATION: Air and ferry.
AUTHORITY: City of Wrangell, P.O.Box 531, Wrangell, Alaska 99929. *Tel:* (907)874-3736 or 874-2381. *FAX:* (907) 874-3952. *Contact:* Ronald O. Phillips.

YORKTOWN, Virginia: 37.14 N. 76.30 W. **(See Plan)**

OPERATOR'S REPORT.

GENERAL: The American Oil Terminal at Yorktown, Virginia is located about 3 miles below the York River bridge on the South side of the river approximately 38 miles from the Chesapeake Bay Sea Buoy "CB". Co-ordinates of the terminal are Lat. 37° 13′ 37″ N., Long. 75° 26′ 23″ W. A 3,000 ft. finger pier ending with a marginal pier, reaches the deepwater channel in the river. Tankers supply the refinery with crude and intermediate feedstocks which are refined into gasolines, fuel oil, liquefied petroleum gas, coke, and liquid sulphur which is distributed by barges and tankers.
PILOTAGE: Pilots board 1.5 miles N.E. of Cape Henry Light. Vessels should use traffic lanes as outlined on Chart No. 12221 when approaching the pilot area.

U.S. flag should call the Chesapeake Federal pilot boat approximately 1 hour before arrival to arrange Pilot embarkation. Non-U.S. flag vessels should call the Virginia State pilot boat 1 hour before arrival.
APPROACHES: *Cautionary Advice:* RDF stations at Chesapeake Light and Cape Henry provide coverage for position fixing and numerous buoys mark the fairways, channels and obstructions. While proceeding to the pilot station one should be aware of the heavy traffic in this area and the ship should stay within the prescribed traffic lane. Careful consideration should be given to the current, which has a velocity of up to 3.0 knots and higher and which tends to set a vessel out of the channel.
ANCHORAGES: *Anchorage and Lightering:* Vessels requiring lightering proceed to Hampton Roads where all lightering operations are conducted. This channel is well marked and presents no difficulties. Upon completion of lightering, the vessel must return to Cape Henry before proceeding to the berth. The bottom of Hampton Roads consists of soft mud and provides good holding ground.
RADIO: ETA messages should be sent to Agent 72, 48 and 24 hours before arrival. Any change in ETA should also be transmitted, as the pilot vessel is not continually on station. Advise draft (brackish water) in first message.
VHF:

Pilots	Channels 6, 11, 13, 16, 19A
Tugs	Channels 9, 10, 12, 13, 16
U.S.C.G.	Channel 16
Marine Operators – Norfolk	Channels 16, 22, 27

BERTHING: The Docking Master boards the vessel from a tug 1 – 2 miles East of the Amoco Dock. 2 tugs are generally used for docking; vessels over 28,000 d.w.t. may require 3 tugs at the Docking Master's discretion. The vessel makes a normal marginal approach to Dock No. 1 with the tugs breasting the vessel alongside and holding it there until secured. Vessels generally dock port side to at Berth No. 1. Berth No. 2 is of new construction and is located 1,122 ft. to the West of Berth No. 1. When docking at Berth No. 2, vessels approach Dock No. 1 on a Southwesterly heading to initially avoid a shoal area located N.N.W. of Berth No. 2. When the vessel is within 550 ft. of Berth No. 2, the approach is made parallel to the dock face until the vessel is off the dock when it is breasted into position port side to by the tugs. Extra caution must be exercised when approaching Dock No. 2 when there is a ship at Dock No. 1. At Dock No. 2, difficulties will be experienced in placing vessel's gangway due to the extremely limited dock space amidships.

The berth is equipped with 12 in. Chicksan arms for crude discha and 10 in. hoses for product loading. Weather conditions are carefu monitored by terminal personnel, and vessels are shut down wh conditions warrant such action.
FRESH WATER: Available.
FUEL: Available.
AUTHORITY: Amoco Oil Company, Yorktown Refinery, P.O.Box 57 Yorktown, Virginia 23690

NOTES

Please also advise Shipping Guides Ltd.

Uruguay

GENERAL:

REGULATIONS: Increased fines became effective in June 1973 in respect of infringements of the Uruguayan Marine Code. There are approximately 119 Articles to the Marine Code, and Owners and Masters of vessels proceeding to Uruguayan ports are recommended to obtain a copy of the Code (which lists port regulations and amounts of fines for infringements, maximum fine being 760 U.R.) prior to arrival. We understand that copies of the Code, entitled "Reglamento Preventivo y Represivo de Infracciones Maritimas, Fluviales y Portuarias", may be obtained from Centro Navegacion Transatlantica, Colon 1486 p. 3, Montevideo.

Freely translated, we give below some extracts of Port Regulations as specifically applicable to Montevideo, but also to all Uruguayan ports in general:

Articles 1 to 8 cover respectively the reasons for setting up this preventive set of regulations; the definition of what a vessel is in terms of the legislation; the establishment and amount of fines (they may be tripled in the event of repeated offences); the fact that very small vessels may only have imposed 10 per cent of the full fine; the jurisdiction for the regulations covering the whole of the Uruguayan coast and river frontage; the stipulation whereby the General Marine Prefecture must send to the Master of the vessel a statement of the offence immediately it is observed and this in triplicate and to the local Agent for the vessel. The actual information which the form must contain is delineated. Notification of offences can be made after a vessel has sailed, this being to the local ship's Agent by phone and confirmed within 24 hours in writing. All Masters must give written consent to their local Agent, and the Agent must accept this in writing, empowering the Agent to act in the Master's name in all cases of fine payment. The Authorities may delay the sailing of a vessel if they see fit in connection with any offence. Finally, Article 8 deals with the right to appeal to the General Marine Prefecture against any fine imposed, this having to be done within 10 days dating from day following personal notification of the offence.

Articles 9 to 119 cover the specific offences subject to fine and indicate individually the full fine imposable in local pesos.

An abridged summary of each of the articles is as follows: No anchoring within 900 m. of the illuminated buoy in the port access channel.

Vessels carrying hazardous cargo must hoist flags according to the International Code of Signals.

Vessels with anyone on board with contagious diseases must hoist appropriate flag (letters "QL").

Flag "Q" must be hoisted and maintained in position until Health Authority has given Free Pratique.

All vessels anchoring in the roads, bay or ante-port must take due precautions not to harm or cause damage to other vessels; the fine will be imposed notwithstanding claims for damages from third parties.

Agents of vessels which may wish to anchor in the Roads must obtain prior permission from the Marine Authority, specifying vessel's measurements and the reason. If authorised, the anchorage to be used will be notified.

No anchoring at the docks unless justified, and anchors must be raised immediately the reason for dropping them has gone. There must be no delay on the part of vessels in complying with the Marine Authorities instructions to change berth or anchorage.

No tying up to other vessels without Marine Authority permission; no attachment to berths which have not been allocated and no changing of berth without authorisation.

No anchoring in places not authorised by the Marine Authority, the maximum fine being applied should this have caused damage to third parties.

No small craft to be tied up obstructing gangway or quays. Where this is necessary for embarking crew members, passengers, provisions, etc., the small craft must be removed immediately the operation has been completed.

Small craft must not be tied up to buoys or beacons. Vessels must not tie up at buoys or beacons.

Maximum speed of vessels in docks is 4 knots.

Navigation in channels of access to ports is governed as follows:

Maximum speed 8 knots.

Vessels must always keep to starboard.

Vessels must not overtake each other, but where this is necessary they must conform to the International Colregs.

No anchorage in channels.

No fishing in channels.

Vessels navigating in channels must keep a distance of 1,000 m. from each other.

Vessels must not cross in front of each other in the fore-ports.

All vessels entering or leaving the ante-port or docks, changing berths or anchorages must be assisted by a Pilot and tug, unless specifically given exception to this rule by the Marine Authority.

No vessel must enter port with damage to hull, machinery or rudder unless prior inspected by the Technical Commission of the Mercantile Marine Directorate.

Any vessel springing a leak whilst navigating in the access channel, and which the bilge pumps cannot overcome, must go aground as quickly as possible outside the channel so as to leave the channel open.

In case of fire on board whilst navigating in the access channel, Masters must observe usual procedure and give signals accordingly.

The strict use of semaphore signals within port must be observed.

When vessels enter the docks or remain in them, Masters, owners or Agents must request permission from the Marine Traffic Office, and report to the Office of Pilotage, and proceed in whatever form they may instruct. On leaving the same procedure must be followed.

Masters and owners of vessels must see that their vessels do not obstruct or cause harm to port works, beacons, buoys, or semaphores and once tied up they must not slacken ropes without permission of the Marine Authority except under conditions covered by items 1, 2 and 3 of Article 64 of the Port of Montevideo Marine Regulations.

No vessel to have badly stowed cargo, excess weight, or evidence of lists due to bad trimming of cargo.

Only those lines necessary for tying up to be used. When 2 or more vessels tie up alongside to load or discharge they are all obligated to ensure that the handling of their respective cargoes does not prejudice the working of the others.

Vessels must take proper precautions when loading or discharging raw material, i.e. sand, bones, ash, coal, etc., by placing suitable planks of wood close together to prevent any such material falling into the water.

No vessel to enter docks with the gangway already rigged.

During unloading operations, no goods to be thrown on to the quay. This must be done manually or mechanically.

During discharge operations, cargo must be so positioned on the quay as to leave adequate passage for vehicular traffic, i.e. Police, Fire Brigade, Health Authorities, Customs and Port Officials.

Planks of wood — when planks are used for any operation, they must not be placed in contact with mooring bitts or cables. When work ceases all pieces of wood, ladders, small trucks, etc, must be removed from quay, and those belonging to the ship must be taken on board, this so as not to obstruct the public path along the quay.

When cleaning or washing ships tied up at quays, no rubbish, water or cleaning material must be allowed to fall on the quay.

A very serious offence is the throwing into the water of any rubbish, sewage or other material susceptible to polluting the water.

Very serious offences are the lightening of ships carrying petrol, crude oil, or the like, likewise the washing-out of tanks, except in authorised zones. The fine is based on the area spoiled by the wrongful discharge.

All ships should have local Agents, otherwise in the case of offences the Master is held responsible and vessels may be detained.

Vessels are responsible to ensure that no damage is made to quay installations by the cargo they load or discharge, and must always leave berths in a tidy and clean state.

Vessels' auxiliary small craft, launches and the like must not hang over the side of the vessel in port, except during operations of launching and reshipping on board, where such operations are conducted at points indicated by the Marine Authority. Such small craft may only be used for the purpose and at the times authorised by the Marine Authority.

Usual regulations concerning carriage of passengers in vessels and heavy fines are imposable for the carriage of passengers or crew members not listed.

Vessels exceeding their navigation limits shown in their Certificate of Navigability are subject to fine.

All vessels must be cleared to sail by the Marine Authority.

Vessels must use their proper name and this must be painted on in letters of minimum of 15 centimetres height and 8 centimetres wide. Letters must be white on black or black on light colour.

Masters, Owners and Agents must report any crew offence or irregularity on board to the Marine Authority.

Vessels in port must hoist the Uruguayan flag.

N.B. It is recommended that Masters correctly establish the prescribed times for raising and lowering the Uruguayan flag, in order to avoid fines.

Vessels must have their gangway equipped with handrails, and the gangway must be clearly lit at night.

All lines to shore must have rat-guards fitted.

When there are hazardous goods on board or when such goods are being worked, the vessel must hoist the International Code Signal letter "B", and at night show a red light on the bow masthead, must always have engines in a state of readiness in case of danger, keep two-thirds of the crew on board, keep watchmen and firemen available (the number of whom will be determined by the number of holds containing the hazardous material), must only work with incandescent lights, and keep a Port Pilot on board if the Marine Authority so directs.

Vessels moored at quays must not move propellers, except under the direction of the Marine Authority.

Vessels must not moor in the port access channel. There must be no improper use of the International Code Signal. Signal flags must not be interspersed with flags of nationality.

If a vessel wishes to dress flags over all, or fly a flag at halfmast due to a bereavement on board, the Marine Authority's permission must be first obtained.

The use of whistles, sirens or any other audible signal within the area of the roads, bay, ante-port or docks, for any reason other than justifiable for navigation is prohibited.

Any vessel anchored, tied up to other vessels or to the shore or quays, must show a white light from sunset to sunrise which can be seen at a distance of 500 m.

In the access channel to Montevideo, no more than 4 vessels may navigate at one time — 2 entering, 2 leaving.

Maximum speed in the Montevideo ante-port is 6 knots. There must be no anchoring in the Free Zone, reserved for the manoeuvring of vessels entering and leaving.

At Montevideo there must be no anchoring along the route leading from the Free Zone to Channel "A", between the quay and the pier of the same letter. Also on the route leading from Pier "A" along a line to 100 m. to the North of the end of the West Jetty.

No anchoring in any area less than 200 m. from Pier "A" in a semi-circular coverage, taking as middle point a position half way between Quay "A" and Pier "A".

All vessels must keep to the right or to the middle when there are no other vessels in the vicinity.

International Regulations for the Prevention of Collisions apply, plus the following:

Vessels navigating along the routes established in the anteport or which have to pass directly through the passage between Jetties "A" and "B", must keep to the right when another vessel is coming in the opposite direction.

Vessels which have to cross the North, the South route or directly between Jetties "A" and "B", must ensure that they pass any other vessel at a distance not less than 50 m.

Any vessel navigating under her own power must give way to a vessel under tow by a tug.

Vessels with tugs following routes which cross one another, thereby creating a collision risk, the one passing to the starboard of the other is the vessel which must take the precautionary measures to avoid collision. If, however, the risk persists, the vessel passing to port of the other must also take measures to increase the distance between the two vessels.

No vessels to pass in pairs or in opposite direction between Jetties "A" and "B"; the semaphore signals transmitted by Quay "A" must be observed. If the signal is "vessel entering from the ante-port to the docks", the vessel in the docks, ready to sail, must wait until the incoming vessel has entered.

If the signal is "vessel leaving the docks for the ante-port" the vessel in the foreport, moving towards Jetty "A" to enter the docks, must wait in the free zone, stop engines, keeping to the right, and drop anchor if necessary, until the outgoing vessel is outside and well clear of Jetty "A".

The same regulation applies to vessels leaving the River Dock. In this case, the vessel leaving Jetty "A" has priority, coming from Docks I and II the first will wait for the second before starting engines.

All vessels navigating in the same direction in the ante-port must keep a distance of not less than 300 m. from each other stern to bow. They must not pass each other or navigate in pairs.

In the event of offences being incurred whilst an Uruguayan Pilot is on board, at the request of the local ship's Agent, the Marine Authority will determine whether the Pilot is responsible for the offence having occurred, and take measures accordingly.

Vessels which load beyond the appropriate load line will be subject to a fine of 1,000,000 pesos.

DOCUMENTS:

Consular Documents: The Consulate in a foreign port from which merchandise is to be shipped to a Uruguayan port must be presented with the following documents:

(a) Cargo Manifest, original and 3 copies.
(b) Crew List, original and 1 copy.
(c) Passenger List (or no-passenger declaration), original and 1 copy.
(d) Bills of Lading, original and 3 copies.
(e) Commercial Invoice, original and 3 copies.
(f) In the event that the vessel is cleared in-ballast, an in-ballast declaration, original and 1 copy.

One copy of each document is filed at the Consulate, and the following are returned, duly visaed:

1 original Manifest, 1 copy of each Bill of Lading, and 1 copy of the Commercial Invoice, in an envelope addressed to the Customs Administrator of the port of destination.

1 copy of the Manifest, and 1 copy of the Bills of Lading, in an envelope addressed to the National Ports Administration.

1 copy of the Manifest, the original and 2 copies of the Bills of Lading, the original Commercial Invoice, the original Crew List, and the original Passenger List (or no-passenger declaration).

Prior to Arrival:

Notification of Arrival – by Ships' Agents.

(a) Container vessels (minimum load 30 FCL and minimum discharge 30 FCL stipulated) and passenger vessels have berthing priority. Agents must notify the arrival of the vessel 10 days in advance to the National Port Administration (ANP) and confirm ETA 2 days ahead of arrival.
(b) For arrival in Uruguayan ports of all other vessels, agents must notify the ANP 48 hours in advance.

All notifications must be made on special forms from the ANP on request for a berth, presenting original and 6 copies, accompanied by a complete set of cargo manifests in Spanish.

For container vessels, Agents must present lists with details of a complete nature covering the containers to be unloaded in Montevideo (prefix, number, contents, gross weight and tare), whether to be discharged to store or to quay, and final destination in the case of transit.

Request for Port Services:

As has been said in the previous section, the berthing request must be presented to the ANP and acts as advice of arrival.

Each morning at 1000 hrs. the ANP designates berthing crews for vessels for the next 24 hours. In the event of there being no berthing staff available, the ANP appoints a place for waiting berthing in turn in accordance with the order of arrival at the port of Montevideo.

On Arrival:

Type of Document	*Number and distribution of documents*						
Basic forms	*Prefectura*	*Customs*	*Im'gration*	*Police*	*Health*	*Agency*	*Total*
1. General Declaration	1	–	–	–	–	1	2

(a) Visaed by the Uruguayan Consulate.
(b) For the Postal Service.
(c) The Consulate returns 1 envelope to the Customs Administrator, anothe to the National Ports Administration (with a copy of Manifests and Bills o Lading), and a third to the agency, with the required visaed documents.

Other Requirements:

The agency must provide a cargo book (tally book) for each port t the National Ports Administration.

Prior to Departure:

24 hours prior to sailing, the vessel must notify the Maritime Prefectu and Migration. Representatives of these agencies must receive a crew list and check any changes. If the vessel carries passengers, the Inspector of the National Migration Administration must prepare a record of a sailing inspection, similar to that required upon the vessel's arriva

The Maritime Prefecture authorises the clearance of the vessel.

PILOTAGE: Also see "Control". Pilotage is compulsory in all river and port zones, except for vessels coming from the East to ports between La Paloma and Montevideo Roads, or entering Montevideo Roads fo no commercial reason. All coastal vessels either Uruguayan or foreig are also exempt.

Pilotage Zones:

1. RIVER PLATE – Comprises zone between imaginary lines in the East from Punta del Este (Uruguay) and Punta Rasa, on Cape San Antonio (Argentina) and on the West between Colonia and San Isidro (Argentina).
2. RIVER URUGUAY – From 56.5 km. of Farallon Channel t Uruguayan ports on the River Uruguay.
3. PORTS – Pilotage zones, comprises limits of each port includin its Roads.
4. SBM at Jose Ignacio.

In the River Plate, Pilots presently board to the South of the wreck o the *Calpean Star,* approximately 4.5 km. South and lying 70 m. Wes of the dredged access channel.

Several of the pairs of buoys are missing, and only the Mid Channe Buoy indicating the entrance to the Access Channel, 5 miles South fro the port, and the 2 pairs nearest to the breakwaters are operating.

When taking tankers, the port Pilot usually goes out to the 5-mil mark.

There is no more than 30 ft. in the Access Channel at the momen dredging is being carried on, but there are only 2 dredgers operatin between the channel and the port of Montevideo itself.

The current is across the channel, running at about 1 knot, an changes direction more with the wind than the tide.

Vessels awaiting Pilot should anchor on the West of the channel and South of the *Calpean Star;* there is 24 ft. up to 500 m. West of the channel. The zone to the East of the Access Channel has submarin cables and must therefore be avoided.

Pilots are ordered through the Agent, and have an up to da communications system installed in their office on the 11th floor o Custom Building.

Permanent watch is kept on Channel 16 VHF, and operator speaks English. It is possible to call "Practicos Montevideo" and ask to b connected by phone to the vessel's Agent's office for last minut instructions, etc.

Channel	Frequency	Channel	Frequency
9	156.45	11	156.55
16	156.80		

The port is closed when wind force exceeds 43 knots or, at nigh 37 knots, or if visibility is less than 1 km., but otherwise vessels ca enter or sail at any time.

There is also a Telex machine with 24 hour watch, over whic messages can be transmitted to Agents out of office hours, over a weekend, for example. Call sign is DGT 843 Pilot CX. This is particular useful for vessels sailing late from Buenos Aires, and the Office will pas on the message to the corresponding Agency by phone.

All Pilots carry a "walkie-talkie" and can communicate either with the office, the Port Authority or the Semaphore Station, using Channel 9 fo the Port Offices and 11 for the Pilot's Office, 16 being kept for use wi vessels.

Ordering of River Pilots for Sailings from Uruguayan River Por Although Masters can apply directly for Pilots such applications mu be made by telegram addressed to the Practico Mayor Montevideo, i is preferable for them to keep their Montevideo Agent fully informed an leave the latter to order the Pilot.

The opportunity of ordering Pilots at any hour having bee discontinued makes it more essential than ever that Montevideo Agent are kept accurately informed regarding expected readiness to sa Failure to do so will result in unnecessary demurrage being paid to Pilo or delay to the ship concerned.

Pilots for Vessels Proceeding from Sea to a Uruguayan Port on th River Uruguay: A Uruguayan Pilot must be employed to conduct shi from sea to a Uruguayan Port on the River Uruguay.

Vessels must call at Montevideo Roads to embark Pilot and pay the cost of tug to take out Pilot. They can also, alternatively, take an Argentine Pilot at Recalada who will take the vessel to Intersection, where in either case an Argentine River Pilot will board to take the vessel to the Roads of port of destination, where a Uruguayan Port Pilot will come aboard, this being a simpler procedure and all handled by Agents in Buenos Aires (one radio advice).

Vessels from an Argentine Port bound for Uruguayan River Port: Such vessels are normally taken to immediately off port of destination by an Argentine Pilot, but they must be berthed by a Uruguayan Pilot who has to be sent from Montevideo, thus Montevideo Agents must be kept promptly informed of vessel's position to enable them to order a Pilot to berth ship without delay.

Vessels leaving Uruguayan Port for Argentine Ports on the River Parana: Uruguayan River Pilot supplied from Montevideo must be employed for unberthing, and this Pilot takes vessel to the Bravo Channel off Nueva Palmira, where the Argentine River Parana Pilot, who is normally already aboard, takes over.

The Uruguayan Pilot is paid in accordance with tariff to Nueva Palmira plus an unberthing fee and travelling expenses.

HEALTH: In order to be able to enter port and berth without delay, the Authorities accept a radio, cable or telex request, couched in the following terms (messages must be sent in Spanish).

Vessels Arriving from Elsewhere:

Capitan . . . . solicita libre platica
(here the name of the vessel)
informando proceder de Buenos Aires, siendo su escala anterior
. . . .
(here a port in another previous country which could be Santos, Valparaiso, Capetown, etc.)
condicion sanitaria buena . . . . Capitan
(here the name of the Master)

Vessels Arriving from Buenos Aires:

Capitan . . . . solicita libres platica
(here the name of the vessel)
informando proceder de. . . . .
(here a port of origin, say London – Liverpool – San Francisco – Rijeka – Kotka – Tokyo – Oslo, etc.)
siendo su ultimo puerto . . . .
(here say Santos – Valparaiso – Capetown, etc.)
condicion sanitaria buena . . . . Capitan
(here the name of the Master)

There have been cases of delay in delivery of radio messages, even though passed on by phone, but the original message must accompany Agent's request for Free Pratique, hence it is advisable to use cable or telex services if possible. Messages must be sent at least 24 hours ahead, and changes in ETA advised.

Although it is possible to take Pratique in Uruguayan River ports, there is frequently delay there, and since vessels must enter Montevideo to pick up the river port Pilot also, it is advisable in these cases to ask for Pratique at Montevideo as above, and the order from Sanitary Authorities granting Free Pratique will be handed to the Pilot to take on board with him.

In no case, however, does the granting of Pratique by radio modify the inspection in port, where the usual commission must be the first to go on board.

Illness On Board: Any private doctor attending a patient on board must immediately inform the Sanitary Inspector should the disease be contagious.

No patient can be landed without the consent of the doctor of the Health Department with the exception of accident cases that require immediate medical attention, and even in those cases the Health Department Doctor must be informed in order to issue a Sanitary Pass for the Hospital where the man was taken to.

If a Master does not report the existence of illness on board he is liable to fines which are double if patients land without the consent of the Sanitary Authorities.

RADIO:

Notice to Mariners:

Official Uruguayan Notices to Mariners are transmitted in Spanish only preceded by the signal TTT, the number of the Notice, letter R, then contents and are repeated for 15 days. Should there be no Notices to transmit, the wording "no hay avisos para navegantes" will be radioed.

Punta Carreta CWF 2768.5 kHz. A3 0.4 kW. at 0003, 1403 and 1903 hrs. (after the weather forecast).

Cerrito CWA on 4346, 8602,12750, 17208.8 kHz. A1 1.5 kW., also on 421.5 kHz. A1 and A2 5 kW. at 0000, 1400 and 1900 hrs. (after the weather forecast).

Montevideo CX 16850 kHz. A3 10 kW. at 1302 hrs. and 1602 hrs. on working days, at 1700 hrs. on Sundays.

Montevideo	CX 6	659 kHz	A3 2.5 kW.
	CX 26	1050	A3 all transmit Notices to Mariners at 1600 hrs.
	CX 38	1290	A3 5 kW.
	CXA 4	6125	A3 10 kW.
	CXA 6	9620	A3 20 kW.
	CXA10	11900	A3 20 kW.

Weather Forecast: A weather forecast is transmitted in Spanish to cover 3 zones. (See "Plans").

Reference AAA 830 is the Coastal area from Lat. 30° S., Long. 50° W. out to Lat. 30° S., Long. 46° W. and down to Lat. 33° 30′ S., Long. 53° W. and Lat. 35° S., Long. 49° W.

AAA 860, River Plate zone from Lat. 33° 30′ S., Long. 57° W. to Lat. 35° S., Long. 49° W. and down to Lat. 35° 30′ S., Long. 57° W. to Lat. 39° S., Long. 53° W.

AAA 870 Coast of Argentina from Lat. 35° 30′ S., Long. 57° W. to Lat. 39° S., Long. 53° W. and down to Lat. 41° S., Long. 62° W.

Details of all 3 zones are transmitted as follows, valid for 24 hours.

CWA on 421.5 kHz. A1 5 kW. at 0001, 1400 and 1900 hrs.

CWF on 2768.5 kHz. A3 0.4 kW. at 0005, 1405 and 1905 hrs. and in A1 over 4346 kHz, 8602 kHz, 12750 kHz and 17208 kHz.

Time Signals: Are transmitted from 2 stations in Montevideo at 1500 and 2000 hrs. The hour is indicated by 6 dots preceded by a 10 second dash and a 5 second silence. The last dot indicates the hour.

CX 6	on 650 kHz.	A3 25 kW.
CXA 6	9620 kHz.	A3 20 kW.

Standard time is GMT minus 3 hours.

Direction Finding: There are 2 radio beacons specially for maritime navigation. Both operating on circular sweep from the lighthouses at Cape Polonio and Isla de Lobos.

Cape Polonio: Lat. 34° 24′ 00″ S., Long. 53° 47′ 45″ W. frequency 295 kHz. A2 range 380 miles, and 500 kHz. A1 A2.

The signal is "P" repeated 3 times in 10 seconds followed by 18 dashes in 30 seconds, repeat "P" 3 times and 10 seconds silence total period 1 minute. This is repeated 4 times after 5 minutes silence, total 10 minutes.

In good weather transmission must be requested from CWM 21 on 500 kHz. A1 A2. In fog, there is continuous transmission from the hour.

Isla de Lobos: Lat. 35° 01′ 33″ S., Long. 54° 53′ 17″ W. frequency 300 kHz. A2 range 380 miles. The signal "L" is repeated 3 times in 10 seconds, followed by 18 dashes in 30 seconds, repeat "L" 3 times, silence 10 seconds. Total period 1 minute, repeated 4 times, then 5 minutes silence total period 10 minutes.

In good weather this transmission must be requested from CWM 26 on 500 kHz. A1 and A2.

In fog transmission is continuous from 05 minutes in each hour.

There are also the following airbeacons which can be used.

		S.	W.	kHz	
Colonia	COL	34° 27′ 33″	57° 45′ 49″	203	A2 0.075 kW. cont.
Montevideo	CAR	34° 46′ 15″	56° 01′ 28″	380	A2 0.05 kW. cont.
	CRO	34° 48′ 55″	56° 01′ 45″	305	A2 0.05 kW. cont.
	CRR	34° 49′ 50″	56° 00′ 15″	280	A2 0.05 kW. cont.
Gral. Artigas	GA	34° 45′ 00″	55° 58′ 00″	260	A2 0.05 kW. cont.
Punta del Este	CB	34° 55′ 00″	54° 55′ 00″	325	A2 occasional only.

GENERAL INFORMATION:

River Uruguay

Rises in Brazil, and later separates Argentina and Uruguay. Its right bank is generally low, wooded and swampy, the left bank high and hilly. Preparatory work has commenced on a large hydro-electric dam to be built at 332 km., above Concordia, which will take some years but will contribute to a regularisation of the river, which at present rises and falls twice every year, with the varying rainfall seasons in its basin, so that approximately half the year the water is low, usually from January to April and again in August. However, the wind also affects the depth of the water as in the River Plate, so that any seasonal forecast is impossible. A safe year round draft to Concepcion del Uruguay can be taken at 20 ft. 6 in., though vessels from time to time load to 22 ft. 6 in.

The Ministry of Marine publishes fortnightly a bulletin with all information on depths of water in the channels, as well as of changes in buoys, lights, etc.

Two new bridges communicating with Argentina now span the Uruguay River at Fray Bentos and Paysandu. The bridge at Fray Bentos has a clearance of 36 m. over zero, and a main span of 220 m.

CARGO

Movement of Cargo

Once stevedores have come aboard, no cargo, either for the port or in transit, may be handled by the crew, as otherwise the vessel will be called on for high extra wages to stevedores. This also affects the lashing of transit cargo on deck.

Stevedores will not work in the rain, except when loading meat, earning double wages while doing so. They can also be persuaded to handle baggage or mail.

When handling dusty cargo in general, or which gives off ammoniacal, nicotine, or organic emanations, masks must be provided for stevedores' use.

Overcarried Cargo

Cargo for Montevideo is often overcarried to Buenos Aires with the consequent delays in delivery and expenses for the vessel. Holds should be carefully inspected as soon as discharge is said to have been finished to avoid possible overcarrying.

Clean Receipt

Agents will advise if they wish to receive any cargo for which a clean receipt cannot clearly be given, otherwise the cargo should be rejected. Mate's receipts cannot be claused to cover any damage from rain, wetting or other causes which might be sustained after the cargo is received on ship's tackle.

Bulk cargoes falling or drifting into water or on dock

When handling bulk cargoes vessels must place between the vessel and the dock side a wooden scaffolding, with lateral boards, or strong canvas to collect all material which is liable to fall into the water or on to the Dock during handling. There is a heavy fine for non-compliance. This should be remembered when writing charter parties, especially under FIO conditions, as this should be for account of shippers or receivers.

Delivery of cargo from vessels

The cargo is discharged direct to Fiscal Warehouses, to lorries, lighters or wagons. When the cargo is delivered to Fiscal Warehouses, receipt for this is given to the vessel's Agents by the Custom House official in charge of the Warehouse. If discharged to lighters the lighterman obtains receipt from the Custom House official once the cargo is received in warehouse. When the cargo is delivered direct to Consignees' lorries, the receipt is given by special Custom House officials called "Cargo Receivers".

The goods are delivered by the Custom House officials to the Consignees against the presentation of the "transferencia" (transfer ticket) signed by the Agents of the vessel. The Agents sign the "transferencia", extended on stamped paper, against the Original Bill of

Lading, which must be legalised by the Uruguayan Consul at the port of loading.

The steamship Agents must keep a special register of all "transferencias", and are responsible to the Authorities for keeping this register. Agents must retain Original Bill of Lading for cargo discharged, as it must be shown to the Customs Authorities immediately if demanded.

When the Consignees have not received the original documents and they wish to take delivery of the goods from the Custom House they must present a Bank guarantee, drawn up in accordance with the form approved by the Shipagents Association.

Cargo manifested to this country in transit to other countries without documents for Uruguay may not be re-shipped to other countries without government permission.

Marks on goods imported to Uruguay

By a Decree dated 30th January 1939, the Uruguayan Government decided that:

"Packages entering Bonded Warehouse, excepting those containing provisions or beverages, and excepting also 'Barraca' articles, shall be marked with the gross weight, the nett weight and corresponding measurement, in a clear and legible manner. These marks may be either 'fire-branded or printed'.

"The 9th August 1939, the Customs Authorities requested that marks and numbers of cases entering Montevideo warehouses should be placed on the extreme ends".

The Customs Authorities have also made known that it is necessary for the packages entering the warehouse to show their weight and measurement in the decimal-metric system.

The inspection of potato cargoes can be effected on board the carrying vessel, and if found in good sanitary condition, can be discharged direct to shore.

Opening and Closing of Hatches

This can be carried out by either crew or stevedores, and hatches must be kept closed when not in use.

Shipments of Meat

These are controlled by the Ministry of Agriculture, whose inspectors check ships' holds before shipment can commence. Holds must be clean and disinfected and temperature controlled to minus 1° to a maximum of plus 1° Celsius for chilled meat, or minus 10° for frozen meat.

Chilled is to be hung on hooks adjustable for height and space and stow of frozen must give a uniform distribution of weight. Alternatively, special cuts are packed and shipped in cartons.

Containers

Use of containers is very limited, since these must be opened up and emptied on the dock alongside, or even on board the vessel. The container itself is considered as part of the vessel's gear, and must be re-shipped without delay.

On rare occasions the Armed Forces have had containers moved out to their barracks.

Consular Dues

All ships arriving at Montevideo must pay Consular dues, with the following exceptions:

Ships that due to a change en route, or by special call of their Agents in Uruguay, during passage, arrive at Montevideo with the sole purpose of receiving orders, as long as no commercial operations are effected.

Ships arriving in distress and which leave port without effecting operations.

Ships arriving for the sole purpose of landing or embarking Pilot.

The Ministry of Foreign Affairs consider bunkering as an operation, therefore ships calling at Montevideo for bunkers must pay Consular dues.

Consular value of the Uruguayan Peso – For the payment of fees abroad, the Executive Power will fix periodically the respective values of the peso, in accordance with exchange fluctuations.

Hours of Attendance at the Uruguayan Consulates – The Office hours of the Consulates will be those fixed by the Government in agreement with the Consuls in each country, endeavouring in each case to have the same working hours as those of the Custom House and other Public Offices of each City. Outside these hours, overtime is charged.

Consular dues on Bills of Lading – When vessels load cargo for Uruguay at ports where there is no Uruguayan Consulate, these dues are collected when the vessel arrives at Montevideo or at any other Uruguayan port. The Agent then recovers these charges from the Consignees.

CREW:

Deserters – Masters and/or Agents must report any deserters when the vessel sails. The Maritime Authorities give intervention to the Police Department, and if the men are located, the Agents must hand them over to the respective Consuls. However, the Agents continue to be responsible before the Authorities for the ultimate repatriation of the men, which must be done at first opportunity.

Vessels are subject to a fine per man. The Agents have also to pay repatriation expenses, in cases where the respective Consuls will not do so.

They must also deposit a guarantee which can be used for repatriation expenses in case the deserter stays in the country for more than 15 days.

Time limit for getting crew members left behind out of the country – According to law, Agents must arrange that such crew members leave the country within 15 days. This period of grace commences as from the date of vessel's departure in respect of deserters and for those disembarked for medical treatment as from date on which they are medically certified as fit for travel.

Upkeep of men left in hospital or temporarily disembarked and traced deserters – The Agents are responsible for the maintenance of men disembarked for medical treatment, or temporarily with a special Immigration permit, and for deserters, until they leave the Country.

Stowaways – Masters of vessels having stowaways on board m report them to the Authorities, stating their name and port embarkation. The stowaways must be kept on board. If they escape a are found after the vessel sails, Agents will be responsible for th repatriation and upkeep charges until they leave the Country. As w deserters, vessels with stowaways on board are liable to a fine per m if this regulation is not complied with.

Agents must also deposit a guarantee per man, amount to be us for repatriating the stowaway or for conveyance to the port embarkation.

Landing members of crew – Paying off crew for other than med assistance is not permitted, but exceptions are granted in special cas An application must be presented by the Agents to the Immigrat Department, and if the permit is granted, a formal declaration is sign by the Master of the vessel, the Agents, the Immigration Inspector a the person wishing to disembark, setting forth length of time he is go to remain in the Country and conditions of departure. The perso documents of the person allowed to land, remain in charge of Immigration Board.

If any member of the crew is landed for medical treatment or paid without the corresponding permit, the vessel will be fined.

Gangways and Rat-Guards

A gangway must be placed and ready after a vessel comes alongs the quay, but this must not be presented before coming in to the qu Authorities will only come aboard by the gangways.

Gangways must also have a lifebuoy with suitable line attached a handy, and a safety net must be placed under the gangway, otherw shore labour will not board vessels, with consequent delay.

The gangway must also be brightly illuminated at night; an oil la is not sufficient.

As soon as vessel is securely moored, regulation size (not less th 80 cm.) rat-guards must be placed on all ropes, wires, fenders, li and hoses.

Heavy fines are imposed for non-compliance with any of these other regulations.

Overside Discharges

All overside discharges from latrines, bathrooms, gallery, scuppe engine room, etc. must be screened or covered when vessel is alongs the quay, as vessels will be fined if the discharge falls on the dock gangway.

Adjustment of Compasses

Vessels proceeding through Magellan Straits – The disposition issu by the Chilean Shipping Authorities on 13th April 1953, states:

"When a foreign ship arrives at the Magellan Straits and applies a Pilot, official or private, for navigating the Channels, the Pilot must f check the compass for deviations of more than 5°, and if such deviat has been determined more than 6 months ago, especially in a pla with great difference of latitude or different hemisphere, compensat of compass is obligatory when not in true order, and a written declarat to this effect will be made in the pilotage agreement. The Authorities also send an officer to verify that the compass is in satisfactory conditi before entering the Straits".

To avoid probable delays, ships heading for the Straits can make t necessary compensation in the Port of Montevideo or in the ante p whilst waiting for orders for departure. This port is most convenient this class of compensation because at the present moment there is magnetic variation and also because it is a quiet harbour with sufficie depth for turning. A compass adjuster may be obtained at any time.

200 Mile Limit and Fishing

Uruguay has declared sovereignty over 200 miles off shore, reservi all fishing and undersea exploitation rights. A number of foreign f vessels fishing without permits have been seized and heavily fined, th catch and gear being confiscated.

Permits are obtainable, but in no case for vessels over 500 tons gros to operate within 60 miles from shore, while all activity in territorial wate (200 miles) is forbidden in the months of May and June.

Garbage

Garbage is collected every morning by truck. There is a stri prohibition of dumping anything into the port, and oil tanks must not b cleaned within 30 miles of the coast, and on a falling tide.

Old dunnage should not be dumped or sold, without permission fro the Authorities, through Agents.

Ships' Boats

Use of ship's boats is forbidden within the port, unless they are bein lowered, with prior permission, for maintenance or exercises.

Fenders

All vessels must have at least 2 large fenders, to keep them 5 ft. o more off the quay. If the vessel has no fenders, or due to deck carg cannot use them Agents should be warned in advance to rent th necessary equipment and have it ready on arrival.

Dropping Anchor when Berthing

If an anchor is dropped when approaching a dock to berth, to contr the vessel as she moves in, it is essential that the anchor should b hove in again once the ship is moored. Port regulations require this an any damage to other craft, real or imaginary, through fouling anchor o chain, would cause considerable trouble.

SYSTEM OF CONTROL CENTRES AND MARITIME INFORMATIO (COASTAL STATIONS FP-FT-FW, VHF-FM):

Legal Basis

(a) System of Control and Information of Movement of the Port o Montevideo and its zone of influence made operative on 9/4/7 (Maritime Regulation No. 1).

(b) Control Centre and Information of the Maritime Movement of th Port of Colonia and its zone of influence made operative o 23/9/76. (Maritime Regulation No. 3).

(c) Control Centre and Information of the Maritime Movement of th Port of Nueva Palmira and its zone of influence made operat on 1/10/76. (Maritime Regulation No. 4).

(d) Control Centre and Information of the Maritime Movement of the Port of Punta del Este and its zone of influence made operative on 2/1/77. (Maritime Regulation No. 5).

(e) Control Centre and Information of the Maritime Movement of the Western Coast and its zone of influence made operative on 27/4/78. (Maritime Regulation No. 11).

(f) Control Centre and Information of the Maritime Movement of the Port of La Paloma and its zone of influence made operative on 1/11/78. (Maritime Regulation No. 12).

Note: In all the creations of the Control Centres, due account was taken of Programmes 1.09 and 3.08 corresponding to Law 14.106 and Sub-Programmes: "Maritime Police" and "Direction of Mercantile Marine".

(g) Control and surveillance of fishing vessels in the various fishing areas within the waters in the jurisdiction of the P.N.N. – Sources: Laws Nos. 14.145, 14.521 and 14.106 of the P.N.N. – Programme 1.09. (Maritime Regulation No. 2).

(h) Equipment which fishing vessels under the Uruguayan flag must possess when they operate in the common fishing zone between the Eastern Republic of Uruguay and in the Uruguayan fishing areas proper.

Sources: Maritime Regulation No. 2 of the 23/7/76. Decree of Co-ordination of Punta del Este of 27/1/76 (P.N.N. – P.N.A.). (Maritime Regulation No. 6).

(i) Equipment which vessels and/or craft in the coasting trade, pleasure craft, passenger vessels and working boats must carry where they operate in the Ports of the Republic and Navigate in the River Uruguay. (The zone between International Bridges and the Salto Grande).

Sources: Appendix 18 MAR 2 of the Radio communications regulation of the UIT and the Agreement arising from the meeting between Uruguay and Argentina (Buenos Aires 9/76) in respect of the use of VHF and FM channels and Maritime Regulations No. 1 to 6 of the P.N.N. – (Maritime Regulation No. 7).

(j) Law covering the control of pollution: Sources: Law No. 13.833 of the 29/12/69 and in particular articles 2 and 12 of the said Law. Chapter IX Pollution – (Articles 47 to 52) of the Treaty of the River Plate and its Maritime Frontage and Regulation of 28/10/74 of the Prefecture of the Port of Montevideo (Maritime Regulation No. 8).

(k) Zones for lightening ships and complement of cargo: Sources: Resolutions No. 2 and 4 of the Administrative Commission of the River Plate of dates 30/9/77 and 26/10/77 as laid down in Article 28 of the Treaty of the River Plate and its River Frontage and established transitorily in the Article 88 of the said treaty (Maritime Regulation No. 9).

(l) "LASH" – Type Operations: Sources: Resolution No. 1/2/78 of the Administrative Commission of the River Plate, Chapter IV. Articles 24 and 27 (Port Facilities, lightening operations and complements of cargo) of the Treaty of the River Plate and its maritime frontage (Maritime Regulation No. 10).

(m) Agreement on the International Regulation for preventing unauthorised boarding.

(n) The Treaty of the River Plate and its Maritime Frontage.

(o) The Statutes of the River Uruguay.

(p) The International Agreement for the Safety of Human Life at Sea – 1974.

(q) Regulation of Radio-communications of the International Union of Telecommunications (UIT) and nomenclatures.

Particulars of the System

1. AIMS OF THE SYSTEM OF CONTROL CENTRES

(a) To effect positive sovereignty over the Area of the System:
  1. Territorial Sea
  2. River Plate
  3. River Uruguay
  4. Merin Lagoon

(b) To offer support to the National Mercantile Navigation and of third parties, complying with the objectives as propounded by the International Maritime Organisation (IMO) and by the International Telecommunications Union (UIT).

(c) To serve as a chain of Control Towers, effecting control and information of Movement of vessels and Port Operations.

(d) To co-ordinate with Public and Private Institutions who operate within the Ports of the Republic, to facilitate and activate port operations, avoiding delays and inconvenience.

2. GENERAL FUNCTIONS

The General functions of the Centre are:

(a) To maintain real and efficient control of the movement of vessels, in the area of application of the system in order:
  1. To prevent collisions between vessels.
  2. To alert the systems of Search and Rescue and/or Salvage in the event of vessels requiring assistance.
  3. To facilitate BYR operations.

(b) To maintain real and orderly control of the operations in the ports to:
  1. To prevent groundings and collisions with obstacles in port works:
  2. To have prepared emergency plans for cases of disasters and maritime accidents within the Ports and International Bridges (River Uruguay).

(c) To maintain up-to-date information concerning the state of the weather, lighting and all other matters contributing to the safety of navigation and operations in the area.

(d) To maintain up-to-date information for Maritime Agencies and/or Owners, providing such information to facilitate and activate port operations to be effected by vessels, obviating delays and inconvenience at all times.

(e) To serve Public and/or Private Institutions who operate in the Ports, collecting, classifying, analysing, evaluating and disseminating all the necessary information for the better fulfilment of port service.

(f) To comply with all other functions which are specified by the Mandate and to co-operate with Public Authorities and organisations in all matters relating to its functions.

3. CONTROL AND INFORMATION FROM THE CENTRES

The system belongs to the National Navy and is controlled by the National Navy Prefecture. It is directed from the Montevideo Control Centre.

(a) Control of Movement of Vessels – Control of vessels navigating within the Vessel Movement Areas.

(b) Control of Port Operations – Control of vessels manoeuvring within the ports of the Republic, including roads and access channels.

(c) Control of International Bridges – Control of vessels navigating in the International Bridges Zone – Gral. Jose Artigas Bridge at Paysandu, and Gral. San Martin Bridge at Fray Bentos.

(d) Vessel Movement Service – Maritime Mobile Safety Service, between coastal stations and vessels or between vessels, where the messages refer solely to vessel movement.

(e) Port Operation Service – Maritime Mobile Service in a port or in its district, between coastal stations and vessels, where the messages refer solely to vessel operations, movement and safety and, in the event of emergency, to safeguarding persons.

4. ZONES OF CONTROL AND INFORMATION OF THE CONTROL CENTRE SYSTEM

(a) Port of Montevideo (Deep Sea – Coasting – Fishing).
  1. "Alpha" – Control and information of vessel movement.
  2. "Bravo" – Control and information of port operations.

(b) Port of Buceo (Pleasure Craft).
  1. "Oscar" – Control and information of port operations.

(c) Port of Santiago Vazquez (Pleasure Craft – Coasting).
  1. "Papa" – Control and information of port operations.

(d) Port of La Paloma (Fishing Centre).
  1. "Kilo" – Control and information of movement of vessels.
  2. "Lima" – Control and information of port operations.

(e) Port of Punta del Este (Fishing – Pleasure Craft).
  1. "Golf" – Control and information of vessel movement.
  2. "Hotel" – Control and information of port operations.

(f) Port of Piriapolis.
  1. "Tango" – Control and information of port operations.

(g) Port of Colonia (Passage port to Buenos Aires).
  1. "Charlie" – Control and information of vessel movement.
  2. "Delta" – Control and information of port operations.

(h) Port of Sauce (Coasting).
  1. "Uniform" – Control and information of vessel movement and of port operations.

(i) Port of Nueva Palmira (Deep Sea).
  1. "Echo" – Control and information of movement of vessels.
  2. "Foxtrot" – Control and information of port operations.

(j) Port of Carmelo (Pleasure Craft – Coasting).
  1. "Quebec" – Control and information of port operations.

(k) Port of Fray Bentos (Overseas – Navigation – International Bridges).
  1. "India" – Control and information of the movement of vessels.
  2. "Juliet" – Control and information of port operations.

(l) Puerto Paysandu (Overseas – Navigation – International Bridges).
  1. "Mike" – Control and information of the movement of vessels.
  2. "November" – Control and information of port operations.

(m) Puerto Salto (Coasting – Pleasure Craft – Passages).
  1. "Romeo" – Control and information of the movement of vessels.
  2. "Sierra" – Control and information of port operations.

5. COMMUNICATIONS

All Centres maintain permanent listening on Channel 16 (VHF – FM).

(a) *Language:* The language used in communication is Spanish. Vessels who have difficulty in communicating in Spanish may do so in English, and if there are problems in hearing properly they may use the groups of the International Code Signals, Tables of Spelling equivalents and Numbers, or "Q" Code.

(b) *Channels – Frequencies and Usages:* There will be those as defined by Appendix 18 Mar 2, of the Radiocommunications Regulations of the International Telecommunications Union, published by the General Secretary of the UIT in Geneva 1976 and the points agreed in the Uruguay – Argentina Meeting, carried out in the City of Buenos Aires 9/76, use of the VHF Channels (Band 156 – 174 MHz.)

Channel	*Frequencies*	*Usage*
6	156.300 MHz.	Bridge to Bridge.
8	156.400 MHz.	Port Operations.
9	156.450 MHz.	Port Operations.
11	156.550 MHz.	Transmission from the Centres in fulfilment of objectives.
13	156.650 MHz.	Transmission from the Centres in fulfilment of objectives.
15	156.750 MHz.	Meteorological Bulletins and Warnings to Navigators.
16	156.800 MHz.	Calling up and Security.
18	156.900 MHz. Reception	Jose Ignacio Oil Terminal.
	161.500 MHz. Transmission	Jose Ignacio Oil Terminal.

Should problems arise with VHF equipment on vessels (the range of same, out of service, etc.) communications should be effected on MF or on HF with the Safety Coastal Stations of the P.N.N.

The services and frequencies of the Coastal Stations are described in the tables at the end of "Uruguay General" Section.

Vessels who, for some reason or other cannot effect communications by radiotelephone (VHF, HF, MF), should do so by radiotelegraphy through the intermediary of the Coastal Station (open to public correspondence) Cerrito Radio CWA.

Radiotelegrams should be sent in time to the telegraphic address Comopre.

(c) *Listening Out by Vessels:*

1. *All vessels* in Uruguayan judicial waters must maintain permanent listening watch on Channel 16 (VHF – FM) except when they are moored in port. If there are problems on VHF they should listen out on 2182 or 4125 kHz.
2. When a vessel cannot, due to any fault of whatever nature, maintain listening watch on Channel 16, she should pass to Channel 11 or 13, but advise the Control Centre first.
3. In the various zones, the vessels must use as a working channel to communicate with the Zone Centre, the frequency which the Control Centre will indicate to them on Channel 16.
4. In all the ports of the Republic, vessels and/or craft in the coasting trade, pleasure craft (Categories A and B), passenger craft and traffic units (tugs, dredgers, launches, lighters, etc.) must be equipped with a VHF – FM transmitter and receiver for local communications with Port Controls, Appendix 18 Mar 2 of the Radiocommunications Regulations of the International Telecommunications Union.
5. *All vessels or craft* navigating or carrying out operations within 25 miles or more of the coast, must be equipped with a BLU transmitter and receiver (with corresponding frequencies) of 150 watts effective power and A3A and A3J type transmission.

(d) *Services and Frequencies of the FP, FC and FW Dependent on the P.N.N.*

Coastal Station (FC), Station for Port Operation (FP), Station for Service of Vessel Movement (FT), Station which is both for Port Operations and for Service of Vessel Movement (FW).

(e) If in fulfilment of the regulations set out by this System, vessels on calling up the Control Centre cannot obtain a reply, they should immediately make the communication in question to the Director of the System (telegraphic address: Comopre) by radiotelegraphy or radiotelephony via Cerrito Radio (CWA) or Punta Carretas Radio (CWF) respectively.

Communications to Centres:

1. From Vessels in the Zone.
   - (a) Position on entering and leaving each Zone of Vessel Movement (Flag, Name, International Call Sign, Where From, Where Bound, Latitude, Longitude, Course, Speed and Maximum Draft).
   - (b) ETA at next port.
   - (c) Problems with characteristic aspects during navigation.
   - (d) If anchoring or raising anchor at any point in the Control Zone of Vessel Movement, it is necessary to ask for authorisation when this is done within Port Operation Zones, and also whenever any manoeuvre is intended to be carried out, and this authorisation expiring within twenty (20) minutes from its request.
   - (e) Any damage suffered by the vessel.
   - (f) Assistance given to damaged vessels or those in difficulty.
   - (g) Any indications of dangerous obstacles to navigation which are not duly indicated by buoys and lights.
   - (h) Any serious reduction in visibility.

2. Pilotage:
   - (a) Whatever is specified in the General Pilotage Regulations.
   - (b) Time of embarkation and/or of disembarkation.
   - (c) Request of Master concerning change, mooring, etc.
   - (d) Difficulties in pilotage.

3. Concerning the Owner or Agent:
   - (a) Monthly list of expected vessels.
   - (b) Confirmation of arrival of vessels 24 hours in advance.
   - (c) News concerning vessels being delayed or arriving early.
   - (d) Information if the vessels are carrying hazardous cargo (explosives or inflammables) 24 hours in advance of arrival, including any such cargo in transit, mentioning:
     - (i) The amount and location of such cargo.
     - (ii) The correct technical name of the substance (the designation used for transportation purposes), the UNO number (if this is given), classification in the IMDG Code (if this is given), the flash point (if applicable) and quantity.
     - (iii) The presence or otherwise on board of a Certificate which is valid showing the ability of the vessel in respect of the cargo which it is carrying (only for hazardous substances carried in bulk);
     - (iv) The stowage of hazardous cargo on board, indicating those which have to be unloaded and those which have to remain on board;
     - (v) The condition in which the hazardous cargo is and any defect which is known in respect of packages or drums, together with the system of containing and handling of the cargo, of the equipment and instruments used (when hazardous bulk cargo is involved), which may engender excessive risk.
     - (vi) Any known defect which may effect considerably the safety of navigation.

(f) *Communications from the Centres:*

1. To vessels (navigating towards Uruguayan Ports).
   - (a) The quay at which they will berth.
   - (b) The Pilot who will assist the vessel.
   - (c) Any information from the Maritime Agent with regard to future operation.
2. To the Pilot:
   - (a) Tugs and cable launches who will assist him.
   - (b) Defences on the sea wall.
   - (c) Bitts which the vessel will use.
3. To the Owner or Agent:
   - (a) Position of their vessel.
   - (b) ETA.
   - (c) Conditions of cargo.
   - (d) Time at which the Pilot will go on board.
   - (e) Time of berthing.
4. To the Centre Director of the System (Control Centre and Information of the Maritime Movement of the Port of Montevideo) immediately any information is obtained with regard to:
   - (a) A BYR incident or any difficulty which is presented to a vessel.
   - (b) A deep sea or coasting vessel (data concerning Naval Messages in accordance with the Abbreviated Code).
   - (c) A fishing vessel, with the Naval Message data being as follows:
     - Where from, Flag, Name, International Call Sign, Month, Day and Hour of sailing, Position (for Customs Clearance), Month, Day and Hour of Position, Activity (fishing or bound for Port).
     - Arrival, Flag, Name, International Call Sign, Month, Day and Hour of Arrival, Port of Arrival.
     - Fishing or within the Zone, or the Port, Flag, Name, International Call Sign, Position, Month, Day and Hour of Position ETA (if it is within the Zone or the Port).

(5) To the adjacent Control Centre:

When a deep sea or coasting vessel sails from a port controlle by the Control Centre, or when this vessel effects a passage t the Vessel Movement Zone controlled by that Centre, this mus be informed to the adjacent Control Centre (according to the course of the vessel) stating ETA and the Zone of Vesse Movement of this adjacent Centre.

Note: The Control Centres will effect communications by Nava Message. These Naval Messages must be sent immediately after receipt from vessels or when such information comes to hand from other sources.

(Naval Messages in this context will have Priority Precedence)

(6) Command of to the Naval Control of Maritime Traffic i Uruguay (Contramu). Immediately on receipt all informatio specified in item (f) – Number (4).

(g) *Communications from Coastal Stations (Vessel Movements – FT MF-HF)*

1. To the Centre Director of the System (Control Centre and Information of the Maritime Movement of the Port o Montevideo). Immediately on receipt all information specifie in Item (f) Number (4).
2. To the Control Centre with responsibility over the zone t which a message refers.

The same as those quoted in the preceding Number 1.

6. FISHING VESSELS:

(a) All fishing vessels clearing entry or departure from any nationa port towards the different Fishing Areas must communicate to the Maritime Authority the following:

1. On Sailing:
   - a. Flag (FL)
   - b. Name of Ship (SHP).
   - c. International Call Sign (IND).
   - d. Port of Departure (DEP)
   - e. Month, day and hour of departure (TOD).
   - f. Destination (Indicate Fishing Zone and Position) (DST).
   - g. Month, day and hour estimated at arriving at the Fishing Zone (ETA Z/P).
2. On Arrival:
   - a. Flag (FL).
   - b. Name of Ship (SHP).
   - c. International Call Sign (IND).
   - d. Port of Arrival (PORT).
   - e. Month, day and hour of arrival (ARR).

(b) All fishing vessels *navigating* must communicate every 6 hours with the Safety Coastal Station of the National Naval Prefectu of the Eastern Republic of Uruguay which is nearest to them (o to which they are listening) giving the following information:

1. International Call Sign (IND).
2. Position in Latitude and Longitude (POS).
3. Month, day and hour of the position (DHPOS).
4. Port of Destination (DET).
5. Activity: (Fishing – Coming to Port – Going to Zone) (ACT)

(c) *Normal Fishing Zones:*

1. High Seas Zone (Altamar): Zone which is outside the judici waters and within the Common Fishing Area.
2. Common Fishing Area (ZOCOPES): Art. 73 of the River Pla and Territorial Sea Treaty.
3. The Zone of the River Plate (RIPLATA).
4. The coastal Zone of the Atlantic Ocean (COSATLAN): Zone included between our coast on the Atlantic Ocean and a Lin 12 miles out.
5. Zone of the River Uruguay (RIURU).
6. Zone of the Merin Lagoon (LAMERIN).

(d) Uruguayan Fishing Vessels which are *navigating* in the Common Fishing Area (Uruguay – Argentine) within the Sector of Argentine Jurisdiction are obliged to communicate its position to the Argentine Maritime Authority. Communications will be made on frequency 3860.6 kHz. to the Coastal Safety Station of the Prefecture of the Mar del Plata.

(e) *Note:* Information to be communicated: All the communications as specified in (b).
All fishing vessels must *listen out permanently* on Channel 16 (VHF – FM), except when they are moored in port. If they are at a distance from the coast which prevents a safe communication on VHF, listening must be effected on 2721.5 kHz. Those effecting operations 25 miles or more from the coast, must be equipped with a BLU transmitter and receiver (with the corresponding frequencies) with 150 watts effective power and type of transmission A3A and A3J, and also fishing vessels must be equipped with a receiver on 2721.5 kHz.

(f) Vessels, after prior request to the Control Centre covering them, may pass to Channel 6 or 8, and keep on those *only for the necessary time* for Fishing Manoeuvres, after which they must return to Channel 16, and advise the Centre accordingly.

7. HYDROCARBONS: It is prohibited to pour hydrocarbons or residual matter arising from the washing of tanks, clearing of bilges and ballast in general or any other action capable of having contaminary effects in waters within the territorial sea of Uruguay with the exception of the zone which is:
(a) Outside the limits of the River Plate.
(b) Outside 100 miles of the Uruguayan Territorial Waters, i.e. 100 miles out from the Atlantic Ocean coast.
(c) Outside the Prohibition area for contaminatory action (Article 78 of the River Plate Treaty).

8. ZONES OF OPERATION FOR LIGHTENING AND COMPLEMENT OF CARGO:
The zones of operation for lightening and complement of cargo are as follows:
Zone "A": Between the Parallels of Lat. South 35° 04′ and 35° 08′ and between the Meridians of Long. West 56° 00′ and 56° 02′.
Zone "B": Between the Parallels of Lat. South 35° 30′ and 35° 33′ and between the Meridians of Long. West 56° 30′ and 56° 38′.
Zone "C": Between the Parallels of Lat. South 35° 35′ and 36° 06′ and between the Meridians of Long. West 56° 30′ and 56° 38′.
Zone "D": Between the Parallels of Lat. South 35° 04′ and 35° 06′ and between the Meridians of Long. West 56° 11′ and 56° 16′.

9. OPERATIONS OF LOADING AND UNLOADING "LASH" TYPE VESSELS:
The operation of loading and unloading "LASH" type vessels for the national territory, on the one hand may be effected apart from within the lightening and complement of cargo areas in ports, also in the corresponding roads.

10. TRANSFER OF VESSELS:
The transfer of vessels between roads and lightening areas and for complement of cargo purposes, will be effected under pilotage and tug control using the Port Services from which the barges in question have come.

CONTROL CENTRES:

Control **Centre and Information of Maritime Movement of the Port of Colonia.**

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS.
(a) The Centre is controlled from the Prefecture of the Port of Colonia, within the free zone of the Port, located in the main building of the free Port zone of Colonia (Latitude 34° 28′ 28″ S., Longitude 57° 57′ 38″ W.).
(b) The call sign of the Control Centre is CWC 23, and for calling up purposes it is possible to use CONTROL COLONIA PREFECTURE.
(c) The Control Centre of the Port of Colonia is located in the Prefecture of the Port of Colonia.
The Prefecture of the Port of Colonia is a dependency of the National Naval Prefecture (2nd Circumscription).
Telephone No. of the Control Centre – 688.
Address – Boulevard Espana 2054 (Department of Colonia).

AREAS OF CONTROL.
(a) The Control Centre and Information of Maritime Movement, covers:
1. Zone "CHARLIE". The area of the River Plate marked by the Meridians which pass through Martin Chico Point (Longitude: 58° 12′ 30″ W.) and Punta Rosario (Longitude: 57° 21′ W.) and the middle line equidistant from both coasts (Law 14.145/74 – "Treaty covering the Limits of the River Plate"), with the exception of the area of water included between the imaginary line which joins San Carlos Point; Lopez West Island; Farallon Island; the Green Buoy of Vienna, Parallel 34° 30′ S., the Meridian which passes through Riachuelo Point Longitude: 57° 43′ 18″ W., and the coast ("DELTA" AREA).
2. "DELTA" area. Area of the River Plate, limited by the imaginary line which joins San Carlos Point; Lopez West Island, Farallon Island; the Green Buoy of Vienna, Parallel 34° 30′ S., the Meridian which passes through Riachuelo Point Longitude: 57° 43′ 18″ W., and the coast.

(b) The Control Centre and Information of Maritime Movement of the Port of Sauce covers:
1. "UNIFORM" zone. The area of the River Plate included between Meridians 57° 25′ 48″ W. and 57° 33′ W., the coast and the parallel Latitude: 34° 29′ 18″ S.

COMMUNICATIONS TO THE CENTRE.
(a) From vessels.
1. In zone "CHARLIE". The Control Centre must be informed when the following points have been passed:
Punta Rosario
Puerto Sauce
Roca Barriles
Puerto Colonia
Km. 56.5 (Farallon Island)
Km. 71.3 (San Pedro Bar)
Km. 101 (Martin Chico Point)
In both Zones of Control the communications as designated in following tables, must be effected.
(b) From the Director of Hydrographic Studies of the MTOP.
1. The place assigned for berthing or mooring.
2. Guard and order tugs (when these exist).

Control Centre and Information of the Maritime Movement of the Port of Fray Bentos

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS.
(a) The Centre is controlled from the Prefecture of the Port of Fray Bentos (Latitude: 30° 06′ 50″ S., Longitude 58° 18′ 27″ W.).
(b) The International Call Sign of the Control Centre and Information of the Maritime Movement of the Port of Fray Bentos is CWC 25. When calling up it is possible to use CONTROL FRAY BENTOS PREFECTURA.
(c) The Control Centre of the Port of Fray Bentos is located in the Prefecture of Fray Bentos (5th Circumscription P.N.N.).
Telephone No. of the Control Centre is 321.
Address: Luis A. de Herrera 1249 on the corner with 25 de Agosto, Fray Bentos Department of Rio Negro.

CONTROL AREAS.
(a) The Control Centre Information of the Maritime Movement of the Port of Fray Bentos covers:
1. Zone "INDIA" The area of the River Uruguay marked by the parallel 33° 30′ S. (Punta Amarilla Km. 46) and the parallel 32° 50′ S. (Roman Island) navigable areas of the Rio Negro and San Salvador and the middle line equidistant from both coasts; with the exception of the Port of Fray Bentos and the area of water marked by the port and maritime constructions (zone "JULIET").
2. Zone "JULIET". The port of Fray Bentos and the areas of water marked by the port and maritime constructions.

COMMUNICATIONS TO THE CENTRE.
(a) From vessels:
1. In zone "INDIA". The Control Centre must be notified during navigation when the following crossings are made:
Km. 46 (Punta Amarilla)
Km. 61 (Riacho Yaguari)
Km. 83 (Paso Barrizal)
Puerto Fray Bentos
International Bridge "General San Martin"
Km. 122 (Nuevo Berlin)
Km. 140 (Roman Island)
In both Areas of Control the designated frequencies are shown in following tables.

THE BRIDGE ZONE
All vessels of 100 tons or more gross registered tonnage must comply with the following instructions:
(a) Navigation day and night in both directions will be made under the bridges by the marked channel, in the central arch, between piles 10 and 11 in the Bridge "Libertador General San Martin".
(b) It is prohibited to cross or overtake between Km. 100 and Km. 102.5 and for this purpose the following passage priorities are established:
1. Those navigating downstream over those navigating upstream.
2. Convoys with a tug either pulling or pushing have priority over all vessels which include those that are navigating downstream.
(c) The vessel or convoy which has to give way will wait outside the limits indicated in point (b). Between those limits it is prohibited to anchor for any cause, even though the channel is left free.
(d) Between the limits indicated in point (b), speed must be reduced to the minimum compatible with good steering and manoeuvring.
(e) In the zones included between the limits indicated in point (b), it is prohibited to effect any form of dredging operation across the whole width of the river.

Control Centre and Information of the Maritime Movement of the Port of La Paloma

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS.
(a) The Centre is controlled from the Prefecture of the Port of La Paloma (Position: Latitude 34° 39′ 30″ S. and Longitude 54° 08′ 28″ W.).
(b) The International Call Sign of the Control Centre and Information of the Maritime Movement of the Port of La Paloma is CWC 30. For calling up purposes "CONTROL LA PALOMA PREFECTURA" may be used.
(c) The Control Centre La Paloma is located in the Prefecture of the Port of La Paloma (8th Circumscription P.N.N.)
Telephone No. of the Control Centre – 16.
Address – Avenida del Navio (Puerto de La Paloma) – Rocha.

CONTROL ZONES.

(a) The Control Centre and Information of the Maritime Movement of the Port of La Paloma comprises:

(1) Zone "KILO". Zone of the Atlantic Ocean (Territorial Sea) situated between the meridians 50° 50′ and 54° 15′ W., limited by the straight line 128° of the Chuy Lighthouse (lateral maritime limit with the Federal Republic of Brazil – Law 14.163) and to the South by the lateral maritime Argentine–Uruguay limit (Law 14.145/974). – "Treaty of Limits of the River Plate". Art. 70), with exception of the Port of La Paloma, zone situated between the coast and an imaginary line which goes between the end of the breakwater towards the Eastern point of the Costa Azul (Zone "LIMA"). Zone "LIMA".

(2) Zone "LIMA". Port of La Paloma, zone situated between the coasts and an imaginary line which goes from the end of the breakwater to the Eastern point of Costa Azul.

COMMUNICATIONS TO THE CENTRE.

(a) From vessels to:

(1) In Zone "KILO" – The Control Centre must be informed during navigation when the following points are crossed:

The Lighthouse Chuy
The Lighthouse Cabo Polonio
The Lighthouse Santa Maria

(2) In Zone "LIMA"

During navigation in the Access Channel and within the Port when the Port jetty small light is passed.

Also, in both control zones the communications shown in the following tables must be effected.

(b) From the Hydrographic MTOP Directorate:

(1) Place assigned for berthing or mooring.

(2) Guard or order tugs (when they exist).

Control Centre and Information of the Maritime Movement of the Port of Montevideo.

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS

(a) The Centre is controlled from the National Naval Prefecture, located on the Floors 11, 12 and 13 of the General Command Tower of the Navy (Customs Building Lat. 34° 54′ 03″ S., Long. 56° 12′ 44″ W.).

(b) The International Call Sign of the Control Centre and Information of the Maritime Movement of the Port of Montevideo is CWC 39. In calling up it is possible to use "CONTROL MONTEVIDEO PREFECTURA".

(c) The Call Sign of the Control Centre of the Port of Buceo is "CONTROL BUCE PREFECTURA".

(d) The Call Sign of the Control Centre of the Port of Santiago Vazquez is CWC 38.
In calling up it is possible to use "CONTROL SANTIAGO VAZQUEZ PREFECTURA".

(e) The Control Centre of the Port of Montevideo is located in the building of the Navy General Command.
Telegraphic Address – "Comopre" (Control Montevideo Prefectura).
Telephones – 95.51.01 – 95.24.77 – 95.62.53.
Telex UY 929
Address – Rambla 25 de Agosto de 1825.

ZONES OF CONTROL.

(a) The Control Centre and Information of the Maritime Movement of the port of Montevideo covers:

(1) Zone "ALFA". Zone of the River Plate situated between the Uruguyan coast and the meridians 55° 30′ and 57° 21′ W., and to the South to the limit of the River Plate with the Argentine Republic (Law 14.145/74 "Treaty of Limits of the River Plate").

With the exception of the areas of water included:

(a) Between the meridians which pass through Punta Sayago and Punta Brava, the coast and the parallel of Latitude 35° 01′ S. (Zone "BRAVO").

(b) Between the meridians 56° 00′ and 56° 09′ W. and the parallel 34° 57′ S. (Zone "OSCAR").

(c) Between the meridians 56° 20′ and 56° 40′ W. and the parallel 34° 56′ S. and the coast (Zone "PAPA").

(2) Zone "BRAVO". Zone of the River Plate included between the meridians which pass through Punta Sayago and Punta Brava, the coast and the parallel of Latitude 35° 01′ S., including the Access Channel to the Port of Montevideo, Foreport, Docks, Channel or Inflammable Cargo Docks (ANCAP).

(b) The Control Centre and Information of the Port of Buceo includes:

(1) Zone "OSCAR". Zone included between the meridians 56° 00′ and 56° 09′ W. and the parallel 34° 57′ S.

(c) The Control Centre and Information of the Maritime Movement of the Port of Santiago Vazquez includes:

(1) Zone "PAPA". Zone included between the meridians 56° 20′ and 56° 40′ W. and the parallel 34° 56′ S. and the coast. It includes the Port, Anchorages and all areas of water.

COMMUNICATIONS FROM THE CENTRE

(a) To the National Administration of Ports (A.N.P.).

(1) Time of arrival of each vessel (ahead of time or delayed).

(2) Movement of tugs.

(3) Information from Masters of vessels on his cargo or changes in his berth.

(b) To the Argentine Naval Prefecture:

(1) ETA of vessels which are going to Argentine Ports or to Coastal Ports.

COMMUNICATIONS TO THE CENTRE.

(a) From the National Ports Administration (A.N.P.)

(1) Designation of berths prior to 1700 hrs. on the previous da

(2) Tugs and launches for guard and order purposes.

(3) Departures for Deep Sea and Coasting vessels.

(b) From the vessels:

(1) In Zone "ALFA". The Control Centre must be informed during navigation when the following points are passed:

(a) To the West of the Access Channel to the Port of Montevideo

1. By Middle Channel:
The *Graf Spee*
The Panela Lighthouse
The Uruguayan Banco Ortiz Buoy
The Argentinian Banco Ortiz Buoy

2. By North Channel:
The *Graf Spee*
The Panela Lighthouse
The Jesus Maria Buoy
The Arazati Point
The Puerto Rosario.

(b) To the East of the Access Channel to the Port of Montevideo
Punta Brava
Isla de Flores

(2) In Zone "BRAVO".
During navigation in the Access Channel:
The Eje Buoy
The Jetty

In both areas of control the communications as designated on the following tables should be effected.

Control Centre and Information of the Maritime Movement of the Port of Nueva Palmira.

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS.

(a) The Control Centre is controlled from the Sub-Prefecture of Nueva Palmira (Position Lat. 33° 52.7′ S., Long. 58° 25.3′ W.).

(b) The International Call Sign of the Control Centre and Information of the Maritime Movement of the Port of Nueva Palmira is CWC 31 and when calling up it is permitted to use "CONTROL NUEVA PALMIRA PREFECTURA".

(c) The Control Centre of the Port of Nueva Palmira is located in the Sub-Prefecture of Nueva Palmira.
The Sub-Prefecture of Nueva Palmira is a dependency of the Prefecture of Colonia (2nd Circumscription P.N.N.).
Telephone No. of the Control Centre – 139.
Address – Port Area – Nueva Palmira – Department of Colonia

AREAS OF CONTROL

(a) The Control Centre and Information of the Maritime Movement of the Port of Nueva Palmira cover:

(1) Zone "ECHO". Zone of the River Plate and the River Uruguay is marked by the meridian 58° 12.5′ W., (Punta Martin Chico Km. 101) and the parallel 33° 30′ S., (Punta Amarillo Km. 46) and the middle line equidistant from both coasts with the exception of the Port of Nueva Palmira and the area of water limited by the port constructions (zone "FOX-TROT").

(2) Zone "FOX-TROT". The Port of Nueva Palmira and the areas of water limited by the port constructions (official quay, the Bed of the Company Navigen and the Higueritas Dock).

COMMUNICATIONS TO THE CENTRE:

(a) From Vessels:

(1) In zone "ECHO", the Control Centre must be informed during navigation of the following crossings:
Km. 101 (Punta Martin Chico),
Km. 121 (Sola Island).
Puerto Nueva Palmira.
Km. 22 (Punta Arenal Grande).
Km. 46 (Punta Amarilla).

In both Areas of Control, the communications as shown in following tables must be effected.

Control Centre and Information of the Maritime Movement of the Port of Paysandu.

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS:

(a) The Centre is controlled from the Prefecture of the Port of Paysandu, located in the main Customs building (32° 18′ 06″ S. 58° 05′ 08″ W.).

(b) The International Call Sign of the Control Centre and Information of the Maritime Movement of the Port of Paysandu is CWC 32 and when calling up it is possible to use "CONTROL PAYSANDU PREFECTURA".

(c) The Control Centre and Information of the Maritime Movement of the Port of Paysandu is a dependency of the Prefecture of the Port of Paysandu (6th Circumscription P.N.N.).
Telephone No. of the Control Centre – 3099.
Address – Presidente Viera and Avenida Brasil – Paysandu (City).

CONTROL AREAS:

(a) The Control Centre and Information of the Maritime Movement of the Port of Paysandu covers:

(1) Zone "MIKE". The area of the river Uruguay marked by the parallel 32° 50′ S. (Roman Island) and parallel 31° 53′ S. (the mouth of the Malo Stream Km. 257 approximately) and the middle line equidistant from both sides with the exception of the zone included between the parallel 32° 20′ S. (the mouth of the Stream "Sacra") and the parallel 32° 14′ S. and the mouth of the Stream "San Francisco". (Zone "NOVEMBER").

(2) Zone "NOVEMBER". The area of the River Uruguay limited by the parallel 32° 20′ S. which passes through the mouth of the Stream "Sacra" up to parallel 32° 14′ S. which passes through the mouth of the Stream "San Francisco".

COMMUNICATIONS AT THE CENTRE:

(a) From vessels:

(1) In zone "MIKE" – The Control Centre must be notified during navigation when the following crossings are made:

Km. 140 (Roman Island)
Km. 160 (San Javier)
Km. 183 (Concepcion del Uruguay)
Punta "N" Almiron Island
Puerto Paysandu
International Bridge "General Artigas"
Punta Piedras
Arroyo Malo

In both Areas of Control the communications are shown in the following tables.

THE BRIDGE ZONE.

All vessels of 100 tons or more gross registered weight must comply with the following instructions:

(a) Navigation both by day and night in both directions will be made under the bridges by the marked channel, in the central arch, between piles 11 and 12 in the bridge "General Artigas".

(b) It is prohibited to cross or overtake between Km. 208 and 211. For this purpose the following passage priorities are established:

(1) Those navigating downstream over those navigating upstream.

(2) Convoys with a tug either pulling or pushing have priority over all vessels which include those that are navigating downstream.

(c) The vessel or convoy which has to give way will wait outside the limits indicated in point (b). Between those limits it is prohibited to anchor for any cause, even though the channel is left free.

(d) Between the limits indicated in point (b) – speed must be reduced to the minimum compatible with good steering and manoeuvring.

(e) In the zones included between the limits indicated in point (b) – it is prohibited to effect any form of dredging operation across the whole width of the river.

Control Centre and Information of the Maritime Movement of the Port of Punta del Este and Piriapolis.

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS:

(a) The Centre is controlled from the Prefecture of the Port of Punta del Este (Lat. 34° 57′ 48″ S., Long. 54° 57′ 06″ W.).

(b) The International Call Sign of the Control Centre and Information of the Maritime Movement of the Port of Punta del Este is CWC 34.
For calling up purposes it is possible to use "CONTROL PUNTA DEL ESTE PREFECTURA".

(c) The Call Sign of the Control Centre of the Port of Piriapolis is CWC 33.
For calling up purposes it is possible to use "CONTROL PIRIAPOLIS PREFECTURA".

(d) The Control Centre of the Punta del Este is located in the Prefectura of the Port of Maldonado (3rd Circumscription P.N.N.).
Telephone No. of the Control Centre – 4.18.84.
Address – Calle 8 and 13 (Department of Maldonado).

(e) The Control Centre of the Port of Piriapolis is located in Sub-Prefecture of the Port of Piriapolis (3rd Circumscription P.N.N.). The Sub-Prefecture of Piriapolis is controlled by the Prefecture of Maldonado.
Telephone No. – 18.
Address – Avenida Piria and Calle Maipu (Piriapolis).

ZONES OF CONTROL

(a) The Control Centre and Information of the Maritime Movement of the Port of Punta del Este covers:

(1) Zone "GOLF". Zone of the River Plate, Atlantic Ocean (Territorial Sea) situated between the meridians 55° 30′ and 54° 15′ Longitude West, the imaginary line which joins the Punta del Este with Punta Ballena and in the South by the continuation of the limit of the River Plate with the Argentine Republic and the Territorial Sea (Law 14.185/974 "Treaty of the Limits of the River Plate"), with the exception of the extent of water included between meridians which pass through Punta Iman (55° 16′ 08″ W.) and Punta Raza (55° 14′ 00″ W.) and the meridian of 34° 56′ 30″ S. (Zone "TANGO") – Piriapolis.

(2) Zone "HOTEL". The Bay of Maldonado and the Port of Punta del Este.

(a) The Bay of Maldonado: Zone situated between the coast and the imaginary line which joins Punta del Este with Punta Ballena, includes also "Boca Grande" and "Boca Chica".

(b) The Port of Punta del Este: Zone situated between the coast and an imaginary line which goes from the end of the jetty to a point which limits to the North of the Mansa Beach. It includes all the mooring areas.

(b) The Control Centre and Information of Maritime Movement of the Port of Piriapolis comprises:

(1) Zone "TANGO". Zone of the River Plate included between the parallels which pass through Punta Iman (55° 16′ 08″ W.) and Punta Raza (55° 14′ 00″ W.) and the meridian 34° 56′ 30″ S.

COMMUNICATIONS TO THE CENTRE

(a) From Vessels

(1) In zone "GOLF". The Control Centre must be informed during navigation when the following points are passed:
The Isla de Lobos (Wolf Island)
The Punta del Este Lighthouse.

(2) In zone "HOTEL". During navigation in the Access Channel and within the Port:
When the Bajo del Monarco Buoy is passed, and
When the Isla de Gorriti Small Lighthouse is passed.
Also within both Control areas the communications indicated in the following tables must be effected.

(b) From the Hydrographic Directorate of MTOP.

(1) The place assigned for berthing or mooring.

(2) Guard and order tugs (when they are present).

KEY TO LITERAL AND NUMERICAL REFERENCES USED IN THE COASTAL STATION NOMENCLATURE

(a) To transmit meteorological bulletins in accordance with the requirements of List VI of RR of the UIT. Special services which are offered by the FC, FP, FT and FW of the P.N.N.
(b) To transmit Notices to Mariners in accordance with requirements of List VI of the RR of the UIT. Special services which are offered by the FC, FP, FT and FW of the P.N.N.
(c) To transmit medical advice on request of navigators.
(d) To transmit urgent messages to Mariners immediately on receipt and to repeat them 3 minutes past every hour and at the normal times of transmission of messages to navigators.
(e) To participate in operations of Search and Salvage.
(f) To alert the Centre's Co-ordinator of Search and Salvage.
(g) To direct the system of Control Centres and Information of Maritime Movement and Port Operations. (FP, FT and FW).
(h) Receive meteorological observations (SHIP) made on the high seas by Masters of vessels.
(i) To effect special transmissions relating to hydrographic and mareographic Information.
(m) To receive reports from fishing vessels (National, Argentine and third nations who are authorised to operate within the area) and to remit them to the Director of the Control Centre System (CONDI) obligatorily in accordance with Maritime Legislation No. 6 P.N.N.
(n) To effect control and facilitate information within the area, receiving reports from vessels navigating within it (obligatory for vessels in accordace with IMP Uruguay).
(o) Effect control and facilitate the supply of information from the port.
(p) Receive by telex or radio requests for pilotage service.
(q) Radiogoniometric Service on VHF (RG).
1. Call up and listening service on a permanent basis and for announcing in advance the intention to transmit.
2. Frequency used for the transmission of meteorological bulletins and Notices to Mariners in accordance with requirements of List VI of the RR of the UIT. Special services offered by FC, FP, FT and FW of the P.N.N. with prior announcement on frequency 156.800 MHz (Channel 16).
3. Frequency used for the transmission of meteorological bulletins and Notices to Mariners in accordance with requirements of List VI of the RR of the UIT. Special services offered by the FC, FP, FT and FW of the P.N.N. with prior announcement on frequency 2182 kHz (Simplex) and 4419.4 kHz (Duplex C.421).
4. Frequency used for the transmission of radiomedical advice on request.
5. Frequency used for operations of Search and Salvage.
6. Frequency used for reports from national fishing vessels.
7. Frequency for Coastal working purposes.
8. Frequency used in common with the Argentine Republic (Naval Prefecture) for the control of fishing vessels of both nations.
9. Provisional working frequency.
10. Working frequency for control and zonal information (Vessel Movement Service).
11. Working frequency for control and Port information (Port Operation Service).
12. Port operation frequency (tugs, traffic launches, tugs and control centres).
13. Duplex frequency Band from 4 to 23 MHz of the Mobile Maritime Service Section 17 REV. RR of the UIT.
CO – Station open exclusively to official correspondence.
CR – Station open to restricted public correspondence.
H24 – Continuous service, day and night.
HX – Intermittent service, day and night or station which has no fixed operating timetable.

Key:
Key to numerical references used in the nomenclature of radio-determination stations and stations which offer special services.
METEOROLOGICAL BULLETIN
(Forecast of weather within the 4 Maritime Areas)

1. SYNOPIS: Inform in clear Spanish text for the 4 Maritime Areas No. 1, 2, 3 and 4 stating:
   (a) General
      1. Name of Station
      2. Validity
      3. Significant Phenomena
      4. Weather Notices
      5. Synoptic Situation
   (b) By Area
      1. General Conditions (Phenomena or general character of the current weather)
      2. Winds (direction and speed)
      3. Sky
      4. Horizontal visibility
      5. Air temperature
      6. Strength of the sea
      7. Wave height
   (c) Reading of radio messages for Coastal Traffic and Radio Messages for local purposes (Notices to Mariners) per area.
2. Messages concerning water height.
3. Offer on request of a vessel, a weather forecast, height of water and local radio messages (Messages to Mariners).
4. The station transmits at any time meteorological safety messages preceded by the Safety signal (SECURITE) and repeat them after periods of silence and during normal transmission periods.
5. Meteorological bulletins, radio notices for coastal traffic (Notices to Mariners) and local Radio notices (Notices to Mariners), announcing the fact previously on frequency 2182 kHz, 4125 kHz Simplex and 4419.4 kHz (C.421) Duplex.
6. Meteorological bulletins, radio messages for coastal traffic (Notices to Mariners) and local Radio messages (Notices to Mariners) announcing the fact previously on Channel 16 (156.800 MHz).
7. For services being offered, listening and working frequencies see Nomenclature of Coastal Stations.
8. Radiogoniometric station on VHF.
   (Station of Radiodetermination which uses the receipt of radio-electric waves to determine the direction of a station or of an object).

COLONIA: 34.28 S. 57.51 W. (See Plan)

LOCATION: Lat. 34° 28′ 28″ S., Long. 57° 50′ 38″ W.

On the River Plate 92 miles from Montevideo and 27 miles in a straight line E.N.E. of the City of Buenos Aires.

DOCUMENTS: Vessels entering the port must provide the following: Machinery, Hull, Safety, Freeboard and Derat Certificates, Stores List, Crew List, List of Passengers or Negative, Cargo Manifest, Declaration of Transport of Inflammables or Explosives, or where not carried a certificate to that effect.

PILOTAGE: No port or river Pilot is required for coasting vessels.

ANCHORAGES: In the Roads with a depth of 10 ft.

In the foreport with a depth of 8 ft., for shallow draft vessels.

RESTRICTIONS: The port will be closed for all vessels when the wind intensity is 70 knots or more. Also all operations are prohibited in the port shelter area.

The port will be closed for vessels of all kinds when the visibility is 500 m. or less due to fog, squalls, etc. Under these conditions vessels are prohibited to carry out any kind of operation within the shelter area.

HEALTH: Inspection is by a Health Doctor, and is carried out jointly with Immigration, Police, Customs, and Naval Prefecture officials.

RADIO: VHF equipment. Operates permanently on Channel 16.

VHF: All communications are carried out by VHF, the call sign being CWC 23 and that for working Control Colonia Prefecture. Channels used are 6, 8, 9, 11, 12, 14, 15, 16, 25, 26, 68, 69.

The Control Centre listens out permanently on Channel 16, whose frequency is 156.800 MHz.

RADAR: Range 16 miles. Does not give service to vessels.

TUGS: There is no tug service.

BERTHING: Union Quay: Running East to West with a length of 178 m., equipped at its two ends with ramps for landing and shipment of cars and lorries.

Coastal Quay: Running North to South, with a length of 111 m.

Ultramar Quay: Running North to South, with a length of 142 m.

These quays are provided with water hydrants and electricity supply points, the Coastal Quay also having a fuel point for operation of tankers.

Warehouses: For general cargo, the National Port Administration has warehouses within the port area.

CRANES: On the Overseas Quay there are two mobile cranes on rails, with 3 tons and 5 tons capacity.

STEVEDORES: There is no permanent service of stevedores, and such requirements must be applied for in advance by the ships' agents at Nueva Palmira.

MEDICAL: 300 m. from the port is the local hospital with a First Aid room and ambulances.

TANKERS: Operate at the Coasting Quay with a watchman and a fireman on board.

FRESH WATER: Supplied by the National Port Administration.

FUEL: Supplied by road tankers.

FIRE PRECAUTIONS: There is a fire fighting pump with a pressure of 8 kg./sq.cm.

CONSULS: Argentina and Italy.

REPAIRS: Not possible.

GANGWAY/DECK WATCHMEN: There is a watchmen service administered by the Prefecture of Colonia.

CUSTOMS ALLOWANCES: Tourists from neighbouring countries may bring in: 5 kilos of food, 1 carton of cigarettes, 1 litre of alcoholic drink.

No products derived from meat can be brought into the country (cold meats, sausages, etc.), nor any plants or seeds.

REPATRIATION: Only to Buenos Aires.

AIRPORT: Located on Highway 1 linking Colonia with Montevideo, 7 km. from Colonia.

TIME: Local time is GMT minus 3 hours.

HOLIDAYS: 1st and 6th January, Carnival, Touriso, 19th April, 1st May, 18th May, 19th June, 18th July, 25th August, 12th October, 2nd November, 25th December.

POLICE/AMBULANCE/FIRE: Police Tel: 2962; Hospital Tel: 2994; Fire Brigade Tel: 2577; Prefecture 2020.

TELEPHONES: No arrangements for connecting the telephones on board vessels, but there are telephone boxes for communications within and outside the country.

SERVICES: Bureau de Change via a branch of the Banco Republica. There is a bus service with international service, working in conjunction with arriving and departing vessels, connecting Colonia with the rest of the country.

Post Office: 200 m. from the port.

Mooring Gangs: Provided at the request of the ships' Agents by the National Port Administration.

AUTHORITY: See "Montevideo".

FRAY BENTOS: 33.06 S. 58.18 W. (See Plan)

LOCATION: Km. 95 River Uruguay. On the right bank of the River Uruguay from seaward 213 miles by river from Montevideo or 145 miles from Buenos Aires.

PORT LIMITS: A vessel is considered to have arrived when she leaves the channel and goes to the berth.

DOCUMENTS: Same requirements as for the port of Montevideo.

PILOTAGE: Obligatory, except where bilateral national agreements exist concerning navigation of the River Uruguay, and the Pilot must be taken on board in Montevideo.

ANCHORAGE: Between the channel and the port.

RESTRICTIONS: When the port is closed due to bad weather, also the draft depends upon the depths of water in the "El Marques" and "Punta Caballo" passages.

MAX. SIZE: Controlled only by the draft of the vessel and the length of the berth. Max. draft 26 ft. (FW), water depends upon the river conditions.

HEALTH: Same requirements as for Montevideo.

RADIO: The call sign is CWC 25 "Control Fray Bentos Prefectura".

VHF: Port works on the following frequencies:
- (a) Channel 16: frequency 156.800 MHz; Usage: Calling-up and safety.
- (b) Channel 9: frequency 156.450 MHz; Usage: Port operations.
- (c) Channel 11: frequency 156.550 MHz; Usage: Central Control broadcasts on safety.
- (d) Channel 13: Frequency: 156.650 MHz; Usage: Central Control broadcasts on safety.
- (e) Channel 15: frequency: 156.750 MHz; Usage: Meteorological bulletins and Notices to Mariners.
- (f) Channel 17: Usage: P.N.N.: Maritime Safety.
- (g) Channel 68: Usage: P.N.N.: Maritime Safety.

Furthermore, on entering the area between Km. 6 and Km. 165 of the River Uruguay, the vessel must communicate to the Fray Bentos Prefecture Control:
- (a) flag.
- (b) name.
- (c) destination.
- (d) position.
- (e) course and speed.
- (f) max. draft.

And on leaving this area:
- (a) accident or fire occurred on board the vessel.
- (b) whether vessel has given assistance to another vessel which is damaged or in difficulties.
- (c) whether she has sighted any dangerous object to navigation and which is not marked.
- (d) any serious reduction in visibility.

RADAR: None.

TUGS: None.

BERTHING: There are two types, quays for deep-sea vessels and for coasters, both being of cement and wood.

Type	Deep-sea	Coasting
Length	125 m.	250 m.
Direction	East – West	N.W. – S.E.
Average depth	7 m. – 8 m.	5 m. – 6 m.
Signalling lights	Green light – West side Red light – East side	
Fresh water	2 connections	3 connections
Electricity	1 point A.C., 3-phase 220 V. South side quay in shed 3 points 220 V. D.C. (cranes)	3 points 220 V. D.C. (cranes)

Also there is the Anglo Quay with a maximum depth of 26 ft., normally used for meat.

CRANES: There are in the port 3 cranes of 3 tons each and 1 of 5 tons which can move about the port. It is possible to use ship's derricks and shore cranes at the same time.
BULK HANDLING FACILITIES: There is a silo with a conveyor belt, having a storage capacity currently of 14,500 tons, and the conveyor has a loading or discharge rate of 100 t.p.h. See "Developments".
SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: Can be requested in advance or when the vessel arrives in port. The work is controlled by the following time table: order 0630 hrs., commence work 0700 hrs.; order 1230 hrs., commence work 1300 hrs.; order 1830 hrs., commence work 1900 hrs.
MEDICAL: Doctors and hospital facilities available.
DENSITY: 1000.
FRESH WATER: On the Deep Sea Berth there are 2 connections and on the Coasting Quay there are 3 connections controlled by the ANP. Cost of U.S. $1.20 per 1,000 litres.
FUEL: Not available.
FIRE PRECAUTIONS: Fire Brigade present.
CONSULS: Argentina, others at Montevideo.
REPAIRS: Only minor repairs can be carried out.
DRY DOCKS: None.
SURVEYORS: None.
GANGWAY/DECK WATCHMEN: Same as for the port of Montevideo.
HATCHES: If steel, handled by vessel's crew. If wooden, handled by stevedores.
REPATRIATION: See "Montevideo".
AIRPORT: None, only Montevideo.
TIME: See "Montevideo".
HOLIDAYS: The following dates will be used as national holidays of a traditional character:

1st January; 6th January; Monday and Tuesday of Carnival Week; the 6th week following Carnival, which will be called Tourism Week; 1st May; 2nd November; 25th December.

The following dates will be celebrated as national holidays as they are linked with patriotic exaltation and commemoration.

19th April; 18th May; 19th June; 18th July; 25th August; 12th October.

With regard to the holidays of 1st May, 19th April, 18th May, and 12th October, these will follow the undermentioned plan:

(a) If they occur on Saturday, Sunday or Monday, they will be observed on those dates.

(b) If they occur on Tuesday or Wednesday they will be transferred to the immediately preceding Monday.

(c) If they fall on Thursday or Friday, they will be transferred to the Monday immediately following.

POLICE/AMBULANCE/FIRE: National Prefecture: Tel: 321. Police: Tel: 201. Fire Brigade: Tel. 35. Hospital: Tel: 533.
TELEPHONES: Not possible.
SERVICES: None.
SHORE LEAVE: See "Montevideo".
IDENTIFICATION: Seaman's Book sufficient.
DELAYS: Normally there is no delay.
DEVELOPMENTS: Increase in the storage capacity of the silos of the Ministry of Agriculture and Fisheries by 5,500 tons, and increase of the capacity of the conveyor belt to 400 t.p.h.
AUTHORITY: National Port Administration, Herrera and 25 de Mayo, Fray Bentos, Uruguay.

Also see "Montevideo".

JOSE IGNACIO: 34.54 S. 54.43 W.

SBM: Position Lat. 34° 53′ 43″ S., Long. 54° 42′ 45″ W.
PILOTAGE: Compulsory. Pilot boards at the Fairway Buoy in position Lat. 34° 57′ 14″ S., Long. 54° 40′ 06″ W.
RADIO/VHF: Call sign "Control Punta del Este", Continuous watch on VHF Channel 16. Intership working on Channel 6.
GENERAL: ANCAP have installed a Single Buoy Mooring, 3,600 m. from the shore in 16.8 m. (55 ft.) depth of water. Vessels of 150,000 d.w.t. can be handled and the average rate of discharge of crude oil is 5,000 cu.m./hr.

The shore terminal receives, stores and pumps the crude to the refinery at Montevideo.

A River Pilot must be ordered from Montevideo for securing to the buoy, and he remains aboard until the vessel sails.

Five days before arrival, Agents must request Free Pratique from the Health Authorities in Montevideo, and the Customs, Prefecture and Immigration Officials, from Punta del Este.

AUTHORITY: Prefectura del Puerto de Maldonado, Calle 8 y 13, Punta del Este (Maldonado), Uruguay. *Tel:* 41884, 41967. *Contact:* Port Captain.

MONTEVIDEO: 34.55 S. 56.13 W. (See Pla

Also see "General" at beginning of Uruguay section.
APPROACHES: The Roads of Montevideo consist of the Outer Roa situated to the South of the bay and Inner Roads situated outside th Western breakwater.

Both anchorages are very exposed and vessels are recommended t enter the anteport.

The entrance channel has 36 ft.; the channel to Ancap's wharf (La Teja) 30 ft. 6 in. Basins 1 and 2 have a depth of 31 ft., and the Riv Traffic Basin, 15 ft. These depths depend on dredging being maintaine but even so vessels often "drag" when on the higher marks; the botto is fine soft silt.

DOCUMENTS:

Health:
- Maritime Declaration of Health.
- 1 List of Passengers Disembarking.
- 1 List of Crew Members.
- 1 Derat Certificate.
- 1 List of Crew International Vaccinations.

Immigration:
- 1 copy of Crew List.
- 2 Lists of Passengers Disembarking.
- 2 copies of List of Passengers in Transit.

Police:
- 2 copies of List of Passengers Disembarking.
- 1 copy of Crew List.
- 2 Lists of Passengers in Transit.

Prefecture:
- 2 Lists of Passengers in Transit.
- 1 Visaed copy of List of Passengers with Port of Origin.
- 2 Non-visaed copies of List of Passengers.
- 1 Passenger List – or Negative – from all ports visited.
- 1 Non-visaed Crew List.
- 1 Cargo Manifest for Montevideo.
- 1 Manifest for Cargo in Transit.
- 1 List of Inflammable Cargo or Hazardous Goods – visaed straight.
- 1 List of Vessel's Data.

Customs:
- 1 Visaed Manifest
- 1 copy of Ballast loaded at each port.
- 1 Negative discharge statement for each port.
- If there is no Consul in previous ports, the last port where the was one.
- 2 Stores Lists.
- 2 Lists of Cigarettes and Whisky.
- 2 Lists of Personal Effects.
- 3 Lists of Bunkers on Arrival.
- 1 copy of Passenger List for those disembarking, or negative, an their baggage in the same list (drawn up and signed by th passengers themselves).

Agents:
- 2 Lists of Passengers Disembarking.
- 2 Lists of Passengers in Transit.
- 2 Crew Lists.
- 2 Stores Lists.
- 2 Manifests, including Inflammable Cargo.
- 2 Cargo Plans.

NOTE: The manifest must have a special section with all effects in trans or otherwise, for the free zones of Colonia and Nueva Palmi

Crew Lists, amended Crew Lists and Inflammable Cargo Lists mu be visaed at ports of sailing or loading.

ANTEPORT: The Anteport is to the North of the entrance, between th breakwaters, and has a depth of 33 ft. – 36 ft. Sufficient room f 10 vessels, depending on size.

PORT: The port is formed by the North side of the Montevideo Peninsu and the "Dique de Cintura", a breakwater running parallel to the coas about 870 m. distant.

It consists of 3 basins, 2 of which are for ocean-going vessels an 1 for river traffic.

Basins 1 and 2 have a depth of 33 ft., and the basin for river traf 15 ft.

PILOTAGE:

1. The Pilot must be requested via the Agent 24 hours in advanc giving ETA in the roads by W/T (Cerrito Radio – CWA on frequency 500 kHz). It is not possible to elect a Pilot for the area of the port Montevideo, except where the vessel exceeds 10,000 tons.

2. On entering into the system of the Control Centr communication must be made with them, giving the information laid in the "Basic Rules of the System of Control and Information of Marit Movements". See "Control" in General Section before first Uruguay p

3. By VHF on the Channels stipulated in "Basic Rules of the Syst of Control and Information of Maritime Movements".

4. Channel 11 must be used to communicate with the pilot vess The vessel is a powered craft painted reddish orange, with wh deckhouse with the inscription "Practicos". During daylight hours, it fl the pilot flag, HOTEL (white and red), and at night it is necessar have white and red lights indicating "I have a Pilot on board". Where vessel does not have VHF, light signals must be used to communica with the pilots' launch.

Should this launch be out of service, Pilots are transported by tugs A.N.P. and/or BEYLA.

5. The Pilot will await the vessel near the Axis Buoy locate Lat. 35° 00′ S., Long. 56° 14′ W.

6. In the event of bad weather the vessel must anchor near the A Buoy.

7. To take the Pilot on board, the gangway must be positione the side which gives most advantage *vis-a-vis* wind and sea.

ANCHORAGE: Vessels may anchor near the Axis Buoy with a draft of 30 ft. at zero tide. The sheltered anchorage is located in the foreport inside the shelter of the breakwaters. To gain access to it, the Pilot must be on board and the permitted draft will be that specified previously.

RESTRICTIONS:

1. The port is closed when winds are up to 60 km.p.h. However, up to 80 km.p.h. the Prefecture may authorise manoeuvres. The port is also closed when there is fog, channel obstruction or any other problem which may make manoeuvring difficult.
2. Vessels will not be handled when there is serious damage to engines, hull or rudder.

MAX. SIZE:

1. The largest vessels operating in the port, are of the LASH type, with dimensions approx. as follows:

Overall length 272.22 m.; Beam 30.48 m.; Draft 28 ft.

2. Tankers which berth at the inflammable dock A.N.C.A.P.:

Overall length: 241.50 m.; Beam 32.33 m.; Draft 28 ft.

With regard to the dimensions of the vessel, the state of the tide and time will be considered, the Pilot will advise the Master of the best measures to adopt.

Report: March 1982.

Max. draft to reach Montevideo safely is 31 ft.

HEALTH: The procedure is as follows:

1. Request the Owner or Agent to obtain Free Pratique which will be done via Cerrito Radio Station – call sign CWA.

In the event of there being any suspected illness or fever on board, the vessel must anchor in the roads to await instructions, at the same time communicating this to her Agent/Owner.

RADIO: Cerrito Radio Station CWA operating on 500 kHz, 421.5 kHz, 4346 kHz, 6434.5 kHz, 8602 kHz, 12750 kHz, 17208.8 kHz and 22563 kHz.

Timetable for broadcasting information to Mariners:

	Frequency	*Times*
Cerrito	4,346 kHz	1100 hrs.
CWA	8,602 kHz	1600 hrs.
	12,750 kHz	2100 hrs.
	16,871 kHz	
Sodre (CX 6)	650 kHz	0900 hrs.
Coastal Station		
Punta Carreta	2,768 kHz	1103 hrs.
CWD		1603 hrs.
		2103 hrs.

RADAR: Port Radar Control available. Additional coastal radar stations to be installed.

VHF: The Control Centre has a range of 60 miles on VHF. It also effects communications by "Phone-Patch" between the vessel and or Agent or Owner; this, from their office or private address.

All the operations of the Centre of Control and Information of Marine Movement of the Port of Montevideo are set out in the booklet "Basic Rules of the System of Control and Information of Maritime Movements".

On entering waters of port jurisdiction, communication must be made with La Paloma Control, then Punta del Este Control and the Centre of Maritime Control of the National Naval Prefecture.

TUGS: 8 tugs owned by Port Authority, 1×4,000 h.p., 1×1,1950 h.p., 1×1,680 h.p., 1×1,100 h.p. and 4×500–700 h.p. Beyla S.A. (Private) operate 5 tugs of 250 h.p.–750 h.p. Tugs come alongside in the foreport. Lines are to be supplied by the vessel, and this is not optional. In the event that the vessel has no tug cable, this will be supplied by the tug at a cost of approx. U.S. $500 (as per tariff TM/6).

BERTHING: The berth will be allocated by A.N.P. and is to be requested by the Agent. Vessels may berth or unberth at any time of the day or night, except when the port is closed or due to lack of available berths. Generally, there are fenders placed along the berths. In the event that the vessel requires this service, it must be requested in advance via the Agent.

When berthing or unberthing, the gangway must not be in position due to the proximity of the cranes.

Anteport: 7 anchorage berths in 28 ft. depth. However in practice there is rarely room for more than 5 vessels to anchor. Basin No. 1: 7 berths, 28 ft. to 33 ft. depth alongside. Basin No. 2: 4 berths, 28 ft. to 33 ft. depth alongside. La Teja: Ancap Basin with berths for 2 tankers 30 ft. depth in basin and entrance channel.

Berths are allotted by the Port Authorities in the order of arrival of the vessels and according to their category, as follows:

1. Mail vessels.
2. Regular Line vessels carrying immigrants.
3. Cargo vessels.
4. Sailing vessels.

The Authorities allocate the deposit at which vessel must discharge or load.

Port Authorities give preference at Deposit No. 10 to ships operating with refrigerated cargo from this Deposit; and at Deposit No. 11 (Florida Wharf) to tankers discharging to the pipe-line situated there. Conditional that they vacate the berth within 2 hours' notice, to permit berthing a preference vessel, other ships may operate at either berth.

Muelle de Escala: On the pier head, formed by the Southern side of the River Traffic Basin, and running Westwards, a quay has been built, known as "Muelle de Escala", 288 m. long, originally constructed for berthing passenger liners and war vessels, but now used as a container terminal.

The berth is very exposed to wind and swell, and Masters are recommended to take every precaution to ensure their vessels are strongly moored and a lookout kept for changes of weather which, locally, are very sudden.

The depth of water alongside depends on dredging, but generally is over 33 ft.

1×40 tonne container gantry crane installed in 1986.

River Traffic Basin: This basin is situated on the Western side of Pier "A". It is 400 m. long and has a passenger landing station on one side. The opposite side of the basin is used by the Navy.

2 warehouses, called Warehouse "A" and Warehouse "B", have been built on the East side of this basin and are serviced by 3 electric cranes.

These berths can only be used by light-drafted vessels, as depth of water is around 16 ft.

Basin No. 1: This basin is situated between piers "A" and "B". Its entrance between the "Dique de Cintura" and the pier head "A" is about 150 m. wide. It encircles a total mooring space of 1,093 linear metres and 7 vessels can comfortably berth along the quay walls.

Pier "A" is 382 m. long on the West side; 306 m. on the East side, and 50 m. wide at the Northern pier-head.

On this pier 2 brick and concrete warehouses, Nos. 1 and 2, have been constructed, consisting of a ground floor, 3 storeys and a basement.

On the City side of Basin 1, length 493 m., there are 3 brick warehouses, numbered 3, 4 and 5, consisting of a ground floor of between 17,800 cu.m. and 19,600 cu.m. capacity.

On the Western side of Pier "B" facing Basin No. 1, there are 2 brick and concrete warehouses, Nos. 6 and 7, with a ground floor and 1 storey having a capacity of 30,174 and 33,140 cu. m. respectively.

In Basin No. 1, Berths No. 1, 2, 3, 4 and 5 are generally used for the discharge and/or loading of liners running to timetable.

Depths alongside vary, as it depends upon dredging.

Basin No. 2: This basin is situated between Pier "B" and the foot of Florida Street. The entrance to this basin is also about 150 m. wide. It has a total mooring space of 722 m. and it can accommodate 4 vessels.

Pier "B" is 294 m. long on the Western side, 328 m. long on the Eastern side, 148 m. at the Northern pier-head and 13 m. wide on the bend at the Western corner of the pier-head.

At the Northern end of pier-head "B", livestock is embarked. This berth is also used for general cargo operations in times of congestion. Moorings must be strong and carefully watched as the berth is very exposed to wash of passing vessels.

There are 2 warehouses on this pier, numbered 8 and 9, facing Basin No. 2, built of brick and concrete, with a ground floor and 1 storey and with a capacity of 33,320 cu.m. each. Warehouse 11 has 3 cold storage rooms with a total capacity of 26,000 cu.m. for storage of frozen meat, chicken and fish products at −30°C.

Depths of water alongside vary, depending upon intensity of dredging but are generally 28 ft. to 30 ft.

Coasting Quay Wall: From Florida Street to Mole F, which is the end of the Port, and over a distance of 1,900 m., there is a quay used for coastal craft, and on part of which a fish-receiving and industrialising plant is being opened; depth in this zone is 15 ft.

A floating dock is also anchored in the N.E. part of this section.

Basin For Inflammables "La Teja". (Also see "Tankers".)

On the North side of the Bay, the National Administration of Alcohol, Cement and Fuels, known as A.N.C.A.P., has a basin with concrete walls for the discharge of tankers arriving with oil to their consignment. This basin is known as the "Darsena de Inflamables", and has 1 berth for tankers on the North side in 30 ft. 6 in. and for liquid gas discharge on the Southern side, max. draft 22 ft., while on the West or land side there is a berth for coastal vessels. Width of the basin here is 147 m., which is the same as the entrance, while the South berth is 248.75 m. long. On the North berth the jetty protrudes 34 m., and is 96 m. long.

Vessels berth bows to shore, and on leaving turn immediately outside the basin, if draft is less than 22 ft., otherwise they must reverse back down the narrow access channel.

The North berth has separate lines for Crude, 10 in. and 12 in. maximum pressure 105 lbs. Fuel oil, 8 in. and 10 in. with a pumping rate of 300 t.p.h. at temperatures between 40°C and 70°C. Diesel/Gas Oil/ Kerosene 6 in. connections and pumping rate of 300 t.p.h. Naptha 8 in. Lube oils 6 in. lines, 150 t.p.h. and a line for Alcohol 6 in. There is no line for Gas. There are 3×5 ton electric cranes and 1×12 ton diesel crane. Coal and Cement are also discharged at this berth, the coal to Decauville cars and the Cement to trucks, handling 750 tons per 8 hour day, with 5 gangs.

At the South berth the oil lines are identical, and there is also a 6 in. connection for loading or discharging Super Gas, at 200 t.p.h. There are no cranes at this berth.

The Western berth has the same installations except for Super Gas and Alcohol.

There are 3 in. water lines at each berth, and use of 2 tugs is essential for berthing or unberthing. At the North berth, vessels fully loaded often lie up to 15 m. out from the quay, owing to accumulation of mud, and will gradually close in as the vessel lightens. Access gangways are placed by the Port.

Railway Connections: Basins 1 and 2, River Traffic Basin and also Deposits "A" and "B" have railway lines on all sides, belonging to the Port Administration, which are connected with the main lines of the Uruguayan State Railways.

The Port Administration has 2 electric locomotives used exclusively in the port.

Cranes: The Port Administration has 2 heavy-lift floating cranes of 80 tons and 200 tons capacity, a mobile crane of 20,000 kilos, also 46 movable electric cranes of 5,000 kilos each; 5 movable electric cranes of 1,500 kilos each; 1 fixed electric crane of 4,000 kilos; 33 of the aforementioned 5,000 kilos cranes, are placed alongside the quay walls for vessel's operations.

There are also 24 electric trolleys of 1,500 kilos, and one of 1,000 kilos. There is a fixed crane for 200 tons on Muelle Escala.

Fiscal Lorries: The Port Administration has purchased special lorries and 12 auto cranes for receiving cargo, as the railway wagons available are not sufficient to carry all the cargo that is at present being handled at this port.

Loading Operations: Loading is effected from carts, lorries and/or wagons and the cargo is hoisted on board with the cranes. Cargo is also loaded from lighters.

Grain Loading: There are 2 mobile grain vacuvators, each of which can load bulk grain at around 60 t.p.h, also 10 smaller machines that can each load around 20 t.p.h.

Fumigation: Montevideo is the only port in Uruguay at which vessels can fumigate, using the cyanide method. The tariff is per cubic metre fumigated over a basic charge which varies according to n.r.t. There are surcharges for overtime.

Disinfection of Mail Bags: To avoid delay through disinfection mail bags can be fumigated on board in a 10% formalin solution and kept in a closed space for 4 hours before vessel gets into port. The closed space will be opened in the presence of a Health Officer who will verify the use of formalin. When in doubt, fumigation will be carried out again and exposed for 2 hours.

Height of Quay above Water: Tide being very small, the height of quay above water only varies from 8 ft. – 10 ft. at LW to 10 ft. – 12 ft. at HW. Wind influence is felt even in the bay, as a South wind will raise water as much as 5 ft., or a Northerly wind reduce it 2 ft. or 3 ft.

PORT EQUIPMENT: *Shore Cranes:*

Berth No.	*No. of Cranes*	*Capacity tons*	*Type*
Muelle de Escala	2	40	Portainer
A – West	3	5	Demag
A – East (1/2)	7	5	Skoda
3–4–5	9	6	Duro Felguera
B – West (6/7)	2	40	Takraf
	4	12.5	Takraf
B – (Front)	4	5	Demag
B – East (8/9)	9	5	Demag
11 – 12	5	6	Duro Felguera
	1	200	Floating

Mobile Cranes/Fork Lifts:

Type	*Capacity tons*	*No.*	*Type*
Fork Lift	2	56	Komatsu
Fork Lift	1	27	Komatsu
Fork Lift	3	10	Komatsu
Fork Lift	12	2	Komatsu
Fork Lift	2	16	Toyota
Fork Lift	1	10	Toyota
Fork Lift	4.5	2	Clark
Fork Lift	28	5	Kalmar (with spreader)
Fork Lift	12	3	Kalmar
Container Crane	60	4	Bellotti
Mobile Cranes	40	2	Poclain
Mobile Cranes	20	2	Poclain
Mobile Cranes	30	1	Bucyrus
Mobile Cranes	1.5/6	13	
Container Trucks	50	12	

STEVEDORES: Working hours: 1st shift, 0700 to 1300 hrs.; 2nd shift, 1300 to 1900 hrs.; 3rd shift, 1900 to 0100 hrs.; 4th shift, 0100 to 0700 hrs.

Normal capacity per gang per hour: *(a)* Rice – about 80/90 tons per gang/hour. *(b)* Meat – about 60/100 tons per gang/hour.

Overtime is compulsory if port is congested.

Lavatory Conveniences for Shore Labour: Each vessel must furnish conveniences for all shore labour employed on board. Work has been stopped until such conveniences are installed. It is advisable, therefore, for vessels calling at Montevideo to be equipped with 2 spare lavatories, 1 for tally clerks and 1 for stevedores, etc.

MEDICAL: Any urgent case must be advised in advance. In normal cases, the Health Service Doctor in the port will visit. For this purpose there are Clinics and Hospitals with optional assistance. Vaccination Certificates are issued by the Port Health Service. There are also private health and medical services which give on-board treatment.

TANKERS: Dirty ballast can be discharged depending on whether or not there is a berth at La Teja, Inflammable Materials Dock. A.N.C.A.P. have the necessary reducers for any type of operation.

Diameter of pipes: Crude – 12 in.
Fuel oil – 8 in.
Dirty ballast – 8 in.

Berth depths: North Quay – 29.6 ft.
South Quay – 22 ft.
West Quay – 14 ft.

DENSITY: This varies according to wind and tide (1006 – 1002). The degree of salinity (max. 10 gm. per litre) is broadcast daily in the weather reports by radio, and varies from fresh to brackish to sea water. Steady South winds give the highest degree of salinity.

FRESH WATER: Fresh water is supplied by the Port Authorities at all quay berths. Request must be made through the Agents, vessels supplying their own hoses where possible. It is important that the water meter should be read together with the Port official both at connecting and disconnecting to verify the exact quantity. Loading rate 20 cu.m./hr. Water also available by barge (capacity 170 tons) loading rate 18 t.p.h. – 20 t.p.h.

FUEL: This can be taken on board whilst anchored in the foreport via two barges, one of 595 tons delivering at a rate of 250 – 350 cu.m./hr., the other of 310 tons at the rate of 200 to 250 cu.m./hr.

Also available from the Uruguayan tanker "Valiente" (capacity 1,337 cu.m. of fuel, rate of 700 cu.m./hr.) or 196 tons of water at the rate of 70 cu.m./hr. This service can be effected outside the port.

A.N.C.A.P. Information: All grades subject to confirmation, the request being made via the Agent 15 days in advance.

GANGWAY/DECK WATCHMEN: Shore watchmen are compulso Arranged by Agents. 1 required on deck and 1 for each gangwa Vessels carrying dangerous cargo must also employ a guard of th Prefectura.

Vessels calling for supplies only, for orders, in distress or to land sic crew members or to enter dry dock, need not employ Watchme Repairs afloat require a watchman, if they do not carry out commerci operations.

Shifts are of 8 hours, commencing at 0700 hrs. Vessels under repai and those at ANCAP moles may fix 12-hour shifts, paying a shift and half.

If special watchmen are required for goods or working equipment application must also be made to the Union.

If watchmen are needed in the holds, same applies.

Regulations also require a watchmen in the holds wherever the shi has a crew member, cadet or officer permanently on watch to preve pilferage. However, where ship's personnel are in the hold to watch th stowage of the cargo, no extra watchman is required. Masters shou therefore, advise Agents if they intend to place crew membe permanently in the holds during discharge, so that Agents can advis the Association before they make their claims.

Care must also be taken on arrival, since the watchman is on du from 0700 hrs. on, whereas it may be necessary to place the gangwa safety net, etc., before that time, so that Pilot may disembark.

Only those involved in this operation should go ashore. The Receivin Commission may ask for the gangway to be opened before 0700 hrs which is in order, but no one else should use the gangway to avoi claims from the Union.

Vessels lying in the anteport must provide launches for the transpor of watchmen employed.

REPATRIATION: There are facilities for exchanging crews.

AIRPORT: Located 30 minutes away by car. There are various regu services to all parts of the world.

TIME: GMT minus 3 hours. (However changes are possible).

HOLIDAYS: 1st January (New Year); 6th January (Epiphany); 3 days in February (Carnival); 7 days in March or April (Tourist Week); 1st May (Labour Day); 18th May (Battle of the Stones); 19th June (Artigas' Birthday); 18th July (Swearing of the Constitution); 25th August (Declaration of Independence); 12th October (Day of the Race); 2nd November (All Souls'); 25th December (Christmas Day).

On these days, work will always proceed when the Agent or Owner requires it or also if the Port Authority requires it, should there be a number of vessels anchored in the Roads awaiting a berth.

POLICE/AMBULANCE/FIRE: Port Police (Immigration): 95.21.51; Fire Brigade: 91.51.51 to 56 – extensions 139/337. Ambulance: 91.51.51 – extensions 272/382.

Prefecture of the Port of Montevideo: 95.21.27 – 95.21.77, 95.54.05, 95.52.01, 95.22.27, 95.24.27 ext. 07, 91.51.51 ext. 199, 91.93.03, 91.53.71 ext. 199.

TELEPHONES: There are services on all quays. Telephones can be requested by the Agent from the Port Authority.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: The prefecture issues identity cards. Crew not allowed ashore without card.

DEVELOPMENTS: A container park and fish quay have been built alongside the Eastern Quay and in the Mantaras Zone respectively.

A battery of silos will be constructed at C.M.B. (between Warehouses 7 and 8) which will facilitate the loading and unloading of grain.

SHIPMASTER'S REPORT: July 1983 (updated 1990).

Documents: As per "Guide to Port Entry".

Pilotage: Compulsory. Pilot boards at Sea Buoy. 24 hours' notice required.

Anchorages: As per B.A. Chart 2001.

Restrictions: Max. draft 28 ft. Possible to depart/enter 24 hours a day.

Max. Size: Largest vessels using the port are LASH vessels, length 272 m., beam 30 m. – 40 m., max. draft 28 ft.

Health: Inform Agents of vessel's state of health and request Free Pratique.

Radio: Cerrito Radio Station.

VHF: Vessels must abide by Uruguay Regulations as per Radio Signals Volume 6, Part 2 otherwise will be subject to very heavy fines.

As soon as vessel is inside Territorial Waters, i.e., S.W. of a line bearing 128° from Chui Lt. and West of 50° 50′ W., they must report to the appropriate station on VHF.

Pilots and Port operate on Channel 16.

Tugs: Available.

Berthing: Vessel berthed at Darsena/Muella A. Least depth in channel from sea to berth was 30 ft., distance between sea and berth being 6 miles. Mean tidal range at berth is 2 ft. Nature of bottom at berth – mud.

Cranes: Sufficient quay cranes of 4 tons capacity available. One floating crane of 200 tons capacity available.

Equipment and storage available for breakbulk/palletised cargoes.

Stevedores: Stevedores were very helpful.

Medical: Doctor and hospital available.

Density: 1002.

Fresh Water: Available.

Fuel: Bunker fuel and diesel oil available.

Repairs: Can be undertaken.

Dry Docks: Available.

Surveyors: Lloyds' Surveyor based at the port.

Airport: Available.

General: Fresh provisions, meats, groceries and laundry services available.

AUTHORITY: Administracion Nacional de Puertos, Rambla 25 de Agosto de 1825 No. 160, Montevideo, Uruguay. *Tel:* 96-07-34, 95-03-58. *Telex:* Naveanp Uy 22351. *FAX:* 95-85-35. *Contact:* Ing. Euclides Cotignola, General Manager.

NUEVA PALMIRA: 33.53 S. 58.25 W. (See Plan)

LOCATION: Situated on East bank of Uruguay River, 155 miles above Montevideo. Km. 0 on River Uruguay.

DOCUMENTS: The documentation required is as follows:

Cargo or Ballast Manifest.
Negative Passenger List or list of passengers visaed by the Consul.
Crew List.
Stores List.
List of Personal Effects.
Tonnage Register.
Consular Clearance.
Maritime Declaration of Health.

PILOTAGE: The information required from vessels navigating within the area of the Port Control are:

Time of entry and leaving the area.
International call sign.
Name of vessel.
Flag.
Estimated course.
Latitude.
Longitude.
Port of destination.
Estimated time at port of destination or other point of call.

The area appointed for effecting change of Pilots is the Port Roads.

The Pilots arrive at the vessel in a launch 5.53 m. overall length, with cabin, painted orange, owned by the Pilots' Corporation of Uruguay.

ANCHORAGE: The area designated for anchoring is located within the roads and fore-port, depth being between 20 ft. and 24 ft.

RESTRICTIONS: There are no restrictions for berthing in the port, except those imposed by weather conditions (winds, etc.). Vessels berth without the aid of tugs.

MAX. SIZE: With regard to length and capacity of vessels, there is no stipulated limit but due account should be taken of the fact that the depth of water in the port is 24 ft.

HEALTH: The Health Authorities will require a Crew List and Maritime Declaration of Health. In the event of disease being detected on board, the Health Official will proceed to inform the Aid Centre who will arrange for a doctor to attend on board, with the vessel placed in quarantine or the patient will be transferred to hospital, depending upon the illness discovered. To date, no such occurrence has arisen in the port.

RADIO: VHF equipment with permanent listening out on Channel 16.

RADAR: There is no radar equipment.

VHF: All communications are effected by means of VHF equipment. The call sign is CWC 31 – "Control Palmira Prefecture", and the following Channels are used: 6, 8, 9, 11, 12, 13, 14, 16, 25, 26, 68 and 69. The station operates permanently on Channel 16, the frequency being 156.800 MHz.

TUGS: The service of a tug is not necessary for berthing vessels.

BERTHING: The port has the Official Quay and the quay owned by Cia. Navigen.

Official Quay: Length 240 m., length of the head 80 m., width in the centre 40 m.

Navigen Co. Quay: Length 234 m. It has a conveyor belt system 500 m. long, running 15 m. above the level of the water. Electrical operating system with a loading and discharge capacity of between 300 t.p.h. and 700 t.p.h., dependent upon whether cereals or ore is being handled.

CRANES: The Official Quay is equipped with 3 cranes of the National Port Administration. They are mobile cranes on rails. Two are for 3,000 kg., and the third is for 5,000 kg.

STEVEDORES: As soon as the vessel communicates the ETA at the port, the Agent will make all necessary arrangements for stevedoring services to commence work as soon as the vessel has obtained Free Pratique. These services will be made available dependent upon the tasks required to be fulfilled.

MEDICAL: The local Public Health Aid Centre is entrusted with furnishing any medical aid which may be necessary on board.

BULK HANDLING FACILITIES: There are no tanks, but there are warehouses for storing grain and general cargo. These warehouses belong to the National Port Administration and to the Free Zone, and are located within the port area.

FRESH WATER: Fresh water is supplied by the National Port Administration.

FUEL: There is a fuel storage depot within the port area, and should it be necessary to supply bunkers to a vessel, application has to be made to ANCAP who will supply via tanker trucks.

FIRE PRECAUTIONS: There are none, other than those of a routine nature.

CONSULS: There are none at local level. In the town of Carmelo, 21 km. from Nueva Palmira, there is the Consulate of the Argentinian Republic.

REPAIRS: Minor repairs possible.

SURVEYORS: None available.

GANGWAY/DECK WATCHMEN: The service of watchmen is not necessary, unless the vessel is carrying flammable cargo.

HATCHES: Opening and closing of hatches is normally carried out by stevedores.

CUSTOMS ALLOWANCE: Each crew member is permitted to carry out of the bonded ship's store, 5 kg. tobacco, 2 cartons of cigarettes and 2 bottles of wine.

CARGO GEAR: Normally, loading and discharge are effected by means of land-based equipment.

REPATRIATION: There are facilities for changing crews, and to effect any repatriation necessary. In both cases, the arrangements are carried out with the participation of the Immigration Authorities and the Maritime Agency concerned.

AIRPORT: There is the airport of Zagarzazu located between Nueva Palmira and Carmelo, approximately 15 km. from this town.

TIME: Local time is GMT minus 2 hours.

HOLIDAYS: 1st January, 19th April, 1st May, 19th June, 18th July, 25th August, 12th October, 8th December, 25th December. Holidays do not interrupt operations on vessels.

POLICE/AMBULANCE/FIRE: Police: Tel. 42, Ambulance: Tel. 82. No fire brigade.

TELEPHONES: It is not possible to have telephones installed on board vessels.

SERVICES: There are stevedoring services, Maritime Agents and Customs Clearance Agents.

SHORE LEAVE: Once Free Pratique is granted, there are no prohibitions for crew members going ashore.

DEVELOPMENTS: The lengthening of the head of the Official Quay by 200 m. to the North is planned. Grain Silo with capacity of 25,000 tons to be built.

AUTHORITY: El Sub-Prefectura de Nueva Palmira.

Also see "Montevideo".

PAYSANDU: 32.18 S. 58.06 W. (See Plan)

LOCATION: Situated on the East bank of Uruguay River, 380 km. above Montevideo. Km. 204 on River Uruguay.

DOCUMENTS/PILOTAGE/HEALTH/RADIO: See "General" at beginning of Uruguay section.

RESTRICTIONS: River navigation controlled by depth in the passes at Almiron, Vera and Urquiza. Since river conditions vary from season to season, Agents should be consulted beforehand regarding available draft at any particular time.

ANCHORAGE: Off Montevideo.

MAX. SIZE: Up to 15 ft. draft fresh water, depending on river conditions.

TUGS: Available.

BERTHING: Grain Elevator Berth: 20 ft. depth alongside at zero tide. Coastal Berth: Length 300 m. Depth 11 ft. at zero tide.

ANCAP Pier: 1 berth for tankers, 30 ft. depth at zero tide.

There is 1×5 ton crane on the grain quay and 3×3 ton cranes on the coastal berth. Loading on the ANCAP berth is by lorry.

STEVEDORES: Working hours: 0800 – 1200 and 1430 – 1800 hrs. Saturdays: 0800 – 1230 hrs.

MEDICAL: All assistance available.

FRESH WATER: Available at all berths.

FUEL: By negotiating through the intermediary of the Customs Clearance Agent the required quantity is delivered.

REPAIRS: Minor repairs can be effected.

CONSULS: Local representation for Argentina, Brazil, Italy and Paraguay. All other Consuls at Montevideo.

GENERAL: Refer to "Montevideo" for all general information.

NOTES

Please also advise Shipping Guides Ltd.

epublic of Vanuatu

ORT VILA: 17.45 S. 168.18 E. (See Plan)

ORT LIMITS: A line drawn between Pango Point and Devil's Point.

OCUMENTS:

Last Port Clearance.
2 Crew Lists.
2 Passenger Lists.
2 Cargo Manifests.
2 Stores Lists.

Log Book, Derat and usual Ship's Certificates to be available for spection.

LOTAGE: Compulsory for all vessels over 60 m. in length. Pilot boards miles West of the Fairway Buoy, on the leading lights. Pilot launch splays the Pilot (H) flag by day and white over red light at night when gaged on piloting.

24 hours' notice of ETA to be given.

Telegrams/Telex for Pilot should be addressed to Harbour Master, a, or advise through Agents. ETA messages for night arrivals, eekends and public holidays must arrive during office hours, Monday Friday. VHF watch is kept on Channel 16 during working hours. ntact normally made 2 hours before arrival at pilot station.

NCHORAGES: When a vessel has to await a berth or tide, the Master y anchor in the main bay North of the leading lights (1,200 m. from ver lead) and well clear of vessels leaving Pontoon Bay; or as directed the Harbour Master.

ESTRICTIONS: No restrictions except that no services will be provided er 2300 hrs. and before 0500 hrs., unless in emergency or by prior rangements.

AX. SIZE: Governed by berth size and max. LOA 250 m.

EALTH: Pratique messages should be addressed to Harbour Master. vessel not healthy, medical advice should be requested through ents.

Pratique messages will not normally be responded to if the vessel is althy.

ADIO: Messages or communications possible via Port Vila Coastal dio. Call sign YJM.

IF: Port and radio station keep watch on Channel 16 during working urs.

ADAR: No radar services.

IGS: One tug available for berthing/unberthing. 780 h.p., 14 tons llard pull.

ERTHING:

ain Government Wharf: Steel pile and concrete decking construction; h bollards 30 m. from each end of the wharf. Length of wharf 212 m, dth 9 m. and depth 10.7 m. alongside. Loading/discharging by ship's ar.

Transit storage 2,000 sq.m.; open storage 1,000 sq.m. Can take /Ro traffic.

ammadi Wharf: Privately owned. Length 55 m., depth 8.2 m. ongside. Vessels of 150 m. length can berth safely. Ample open orage, but no closed storage.

wn Wharves: 2 small wharves on town waterfront, depth 2.5 m. ongside. Also see "Tankers".

RANES: None available.

TEVEDORES: *Working Hours:* Monday to Friday: 0700 – 1100, 1300 1700, 1800 – 2300. Saturday: 0700 – 1500. Sundays and Public olidays: No cargo work. Gangs to be ordered previous day by Agent.

EDICAL: Government hospital with full facilities. Private doctors and ntists available. Arrangements may be made in advance with Agent telex or on arrival.

ANKERS: Tankers anchor using a "Mediterranean moor" with 2 lines the shore. Due to bar at entrance to bay, entry is made at HW only th controlling draft of 7 ft. plus height of tide. Max. size 1,500 d.w.t.

There is an overhead power cable between Iririki Island and the ainland with a vertical clearance of 19 m.

ENSITY: 1025.

RESH WATER: Available at main wharf at a filling rate of about t.p.h. At the Star Wharf fresh water available at a filling rate of about t.p.h. Water is good quality and potable.

UEL: Fuel can be supplied by Shell, Mobil and B.P. by road tanker.

ONSULS: Australia, France, New Zealand and U.K. are represented.

EPAIRS: Small repairs can be undertaken.

RY DOCKS: None.

URVEYORS: Classification Societies' Surveyors can be brought from ji and New Caledonia at short notice.

ANGWAY/DECK WATCHMEN: Not available or necessary.

PENING/CLOSING HATCHES: Hatches are normally opened and losed by ship's crew.

USTOMS ALLOWANCES: 200 cigarettes or 100 cigarillos or 50 cigars r 250 grammes tobacco. 2 litres of wine and 1.5 litres of spirits.

ARGO GEAR: Ship's gear used for loading/discharging. 11 forklifts rom 2 – 20 tons, 1×22 ton flat-bed truck, 1 flat-bed truck with 19 ton rane, 1×8 ton tipper truck, 1 prime mover, 1×20 ton semi-trailer, ×10 ton tilt trailer, 3×3 ton trucks and 1×20 ton container top lift frame 20 ft. containers) available.

REPATRIATION: Arranged by Agent.

AIRPORT: Bauerfield International Airport in Vila about 5 km. from port. Daily services to Noumea. Regular services to Fiji, Auckland, Sydney, Brisbane, Honiara, Papua New Guinea and Naura.

TIME: GMT plus 11 hours. GMT plus 12 hours from late September to late March.

POLICE/AMBULANCE/FIRE: Police tel: 2222; Ambulance tel: 2100; Fire tel: 2333.

TELEPHONES: Available on board at Main Government Wharf through Agent.

SERVICES: Diver available. Tinned, frozen meat and vegetables available, also bonded stores.

BANKS: Available.

SHIP SUPPLY SERVICE: Tug "Roimata" and pilot boat "Tekoni II" can be used in an emergency for transport of personnel/essential stores. There are various charter boat operators who can be mobilised through the Department for Emergency Operations.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.

REGULATIONS: No special regulations.

DELAYS: Only when more than one ship in port.

DEVELOPMENTS: The privately owned 50 m. wharf to be extended by 40 m. and strengthened for container handling. No date yet fixed for commencement of construction.

GENERAL: *Charts:* B.A. 1493 and 1494 cover this port.

AUTHORITY: Ports and Marine Department, Private Bag 46, Port Vila, Vanuatu, S.W. Pacific. *Tel:* 2339. *Telex:* Vangov 1040 N.H. *Contact:* Captain Leith Nosak, Principal Marine Officer/Pilot. Tel. 3646 (home). Captain P.Peten, Harbour Master/Pilot.

SANTO: 15.31 S. 167.11 E.

The Port of Santo is sometimes referred to by the name of the old town 'Luganville', but nowadays the port and the town are usually called 'Santo'.

PORT LIMITS: The Port of Santo includes that area of the Segond Channel bounded in the East by a line running due North from Black Rock Point on Aore Island (from the 'Black Rock' on B.A. Chart 1736). This is known as Pointe Chapuis on French charts. It is bounded in the West by a line running due East from the Renee River on the island of Espiritu Santo.

DOCUMENTS:

Last Port Clearance.
2 Cargo Manifests.
1 Crew Declaration.
2 Animals Lists (Nil if none aboard).
2 Prohibited and Restricted Goods (Arms and Ammunition).
2 Lists of Ship's Stores (Cigarettes, Tobacco, Alcohol, etc.).
6 Crew Lists.

All the above can be provided on ship's paper.

The following is a Vanuatu form which can be filled in on arrival: Ship's Report and Arrival Declaration (Vessel's Details).

PILOTAGE: Telegrams for the Pilot should be addressed 'Harbour Master Santo' or advice passed through Agents. ETA messages for night-time and week-ends must arrive during office hours Monday to Friday.

Ships calling at Port Vila first, may pass ETA Santo through the Harbour Master at Vila.

VHF watch is kept during office hours on Channel 16 and for 2 hours prior to all advised arrivals. Pilot boat also watches Channel 16.

The pilot boat is a 12 m. boat with white hull and superstructure. She has 'Pilot' in black letters on the cabin and exhibits a pilot jack. She carries a red flashing light with her pilot lights at night.

The pilot station is 1 mile East of Black Rock Point at the Eastern entrance to the Segond Channel. By day and in good visibility the Pilot may board or disembark at the South-Western end of the Segond Channel South of Georges Philippar Pass, though this is not normal and should be by prior arrangement.

Pilot ladder should be rigged in accordance with the S.O.L.A.S. convention.

ANCHORAGES: Vessels may anchor anywhere in the Segond Channel except in the 'Prohibited Anchorage' close off the Main Wharf (which is shown as 'Dock No. 3' on B.A. Chart 1736). There is a patch with a least depth of 14 fathoms 1 mile S.S.W. of the main wharf which is recommended for anchoring, especially for smaller vessels seeking shelter from the S.E. trades. A strong tidal current, normally up to 3 knots, runs in the channel and vessels should give plenty of scope.

RESTRICTIONS: There are no restrictions on entry. However, as stevedores do not work from 2300 hrs. to 0700 hrs., vessels due to arrive between these times are *recommended* to slow down, save fuel and arrive at the pilot station at 0530 hrs. or 0600 hrs. to berth in daylight.

MAX. SIZE: Governed by berth size only.

HEALTH: Pratique messages should be addressed to Harbour Master with ETA message. If vessel is *not* healthy, Harbour Master will advise action to take. Pratique messages will not normally be responded to if vessel is healthy. Vessels arriving from Port Vila do not require Pratique.

RADIO: Message should be sent via Port Vila radio, call sign YJM.

VHF: A port watch is kept on Channel 16 during office hours Monday to Friday and from 2 hours prior to advised ETAs. Call 'Harbour Master Santo'. The pilot vessel also watches Channel 16 VHF when on pilotage duty.

RADAR: No radar service.

TUGS: None, but one may be obtained in emergency from Port Vila.

BERTHING: Salt water Berth 140 m. long with a depth of 10.5 m. at LWS, and this is the maximum draft. Vessels can, and usually do, overhang the ends of the wharf with lines on dolphins or bollards on the shore. Dolphins are situated 22.5 m. East and 35 m. West of the Wharf.

Also see "General".

CRANES: None.

BULK CARGO FACILITIES: Stevedores are currently interested in experimenting with bulk loading of copra (rather than from bags) and various methods are used to suit different ships. All methods, however, require lifting by ship's gear. There is interest in the construction of a small coconut oil mill, storage tanks for which are already constructed.

BRIDGES: None.

STEVEDORES: Stevedores work 0700 hrs. to 1100 hrs., 1300 hrs. to 1700 hrs. and 1800 hrs. to 2200 hrs. Advice given at least the previous day by Agents should be sufficient. Stevedores do not work on Sundays, or if avoidable on public holidays.
MEDICAL: Medical attention can be arranged after arrival and there is a hospital in Santo. However, medical treatment that is not of an emergency nature should be sought elsewhere.
TANKERS: Tankers berth at the main cargo wharf. The discharge line is 8 in. and the rate of discharge is 150 tonnes per hour.
DENSITY: 1025.
FRESH WATER: Vessels can take up to 500 tonnes if 2 working days' notice are given. Otherwise the maximum amount may be as little as 50 tonnes. Water is good though a little hard.
FUEL: Small quantities can be arranged by truck. Large quantities can be delivered by the 8 in. tanker discharge line, but must be by prior arrangement with Shell or Mobil. Santo is not normally a bunkering port.
FIRE PRECAUTIONS: All normal precautions only.
CONSULS: None.
REPAIRS: No shore facilities suitable for larger vessels.
DRY DOCKS: None. Slipway for vessels up to 50 m. length.
SURVEYORS: None.
GANGWAY/DECK WATCHMEN: Not considered necessary.
HATCHES: Hatches are opened and closed by either crew or stevedores. Recommended that crew carry out this operation on copra loading ships.
CUSTOMS ALLOWANCES: (Per crew member) 200 cigarettes or 100 cigarillos or 50 cigars or 250 grammes tobacco. 2 litres of wine and 1.5 litres spirits.
CARGO GEAR: Ship's gear only. Ashore: 5 forklifts (from 2.5 to 22 tonnes), 2×3 tonnes flat trucks, 1×6 tonnes dump truck, 8 tractors, 100×2 tonnes trailers and 1×22 tonnes container carrier are available. No lighters available.
REPATRIATION: Possible from Santo Airport via Port Vila.
AIRPORT: Santo International Airport is about 6 km. from town.
TIME: GMT plus 11 hours. GMT plus 12 hours from late September to late March.
HOLIDAYS: Holidays vary from year to year. It is recommended to seek advice of local Agents. It is not normally possible to work cargo on public holidays or Sundays.
POLICE/AMBULANCE/FIRE: Police tel: 222; Fire tel: 316; Health Officer tel: 419.

Police station is close to the wharf. There is no ambulance service. The fire service consists of 1 fire tender operated by Public Works Department. The Harbour Master has some hoses and a small foam generating machine stationed on the wharf.
TELEPHONES: There is a public telephone in the Post Office near the wharf.
SERVICES: None.
STORAGE: General cargo sheds of 6,000 cu.m.; 9,000 cu.m. of copra storage. Container yard for 200 TEUs. There is a minimum of 1,600 cu.m. of open storage.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not required.
DELAYS: Only for stevedores non-working times or when there is more than 1 ship present in the port.
REGULATIONS: No special regulations.
GENERAL: Tidal stream in the Segond Channel can reach as much as 4 knots, the Westerly flood stream being predominant and the East going ebb stream occasionally absent. The flood stream can set in a North-Westerly direction at the main wharf, thus setting a vessel down onto the wharf and making an apparently simple berthing manoeuvre a little difficult. It is recommended that when S.E. trades are blowing, and a vessel has to berth port side to in order to stem the tide, the starboard anchor should be laid off whilst berthing with about 5 or 6 shackles leading 2 points for'd of the beam. This is to heave the bow away from the wharf on departure.
AUTHORITY: Department of Ports and Marine, Box 148, Santo, Vanuatu. *Tel:* 739 (office); 454 (home). *Contact:* Captain M. Toa, Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

enezuela

ENERAL:

ERTHING PRIORITY: The Venezuelan Ministry of Communications s decreed, through the Directorate General for Transport and the Port ptaincies, the following new docking priority system:

1. Vessels owned by the C.A. Venezolana de Navegacion or artered by that company.
2. Venezuelan vessels belonging to private companies.
3. Vessels of other countries.

Previously, vessels chartered by the C.A. Venezolana de Navegacion d not get priority treatment and it is understood that, with these new orities, the number of vessels with docking privileges has been tripled, us resulting in greater delays for vessels operated by foreign mpanies.

OCUMENTS: *Prior to Arrival:*

Arrival Notice: The Agent must submit 24 hours in advance of the essel's arrival, a letter-notification indicating date and time of arrival, me and nationality, name of Master, length, gross and net registered nnage of cargo for the port, origin, destination, shipper and agency, n 16 copies, with the following distribution:

Captain of the Port, Customs (2), The National Institute of Ports-INP 3), Armed Forces of Cooperation, National Guard, Police Intelligence ervice Bureau-DISIP, National Bureau of Identification and Alien-mmigration, Interpol, Ministry of Health and Social Welfare-Public ealth Unit, Ministry of Agriculture and Livestock-Animal and Plant ealth, Post Office and Chamber of Commerce.

Information on Cargo and Passengers for the Port: The agency must eceive by airmail, sufficiently in advance, the following documents to e submitted to the authorities at least 24 hours before the vessel's rival:

Documents	*Captain of Port*	*Customs*	*INP*	*Agency*	*Total*
Cargo Manifests(a)	–	1	3	3	7
Correction Letter to Manifest	–	1	–	1	2
Bills of Lading	–	–	2	1	3
Stowage Plan(b)	–	–	1	2	3
Cargo List	–	–	10	–	10
Container List	–	–	12	–	12
Dangerous Cargo List	2	–	1	1	4
Passenger List	–	–	–	1	1
Mail List	–	–	1	–	1

(a) As of January 29, 1979, the Cargo Manifest may be submitted on AFTA/OAS Form 2, instead of on the Venezuelan Freight List Sobordo).

(b) The Venezuelan Shipping Association is negotiating to have the owage plan submitted to the National Institute of Ports on the vessel's rival, instead of 24 hours in advance.

Request for Port Services: 24 hours before the vessel's arrival, the gency must submit to the Captain of the Port the request for pilotage, wage and berthing.

At the same time, it must request permission to disembark and embark assengers and cargo and unload merchandise, on a form addressed o the Customs Administrator, with copies to the INP and the National uard.

Additional Requests: The agency must draw up and submit to the ational Institute of Ports, 24 hours before the vessel's arrival, 12 copies f the cargo index, a document corresponding to tally books.

n Arrival:

irearms List	–	2	2	1	–	–	5

e) DISIP, Bureau of Military Intelligence, Interpol, Identification and Tourism.
f) When a vessel returns to the country goods missing in unloading other vessels, it shall submit, in addition to the cargo manifest a return cargo manifest containing the data required for the manifest and the name of the vessels on which the goods were originally manifested (Organic Law of Customs).
g) Eliminated by the Organic Law of Customs.

Prior to Departure:

Clearance Documents: At least 6 hours in advance, the request for the clearance permit must be submitted to the Captain of the Port.

Request for Pilotage: Also 6 hours in advance, or more, the request for pilotage must be submitted to the Captain of the Port.

SHIPMASTER'S REPORT: July 1982 – WARNING.

You may wish to caution all seafarers who may in the future trade to Caripito, and the other similar jungle areas. The problem in this area used to be mosquitoes, but although they are still around, the problem that we have recently experienced is a moth locally known as 'Palometas'. One doctor referred to it as an insect 'Hylesia Canitia'.

My information is limited, due to language difficulties, but the problem is very real, and I cannot caution the unaware strongly enough to take precautions. The vessel has traded to Caripito frequently over the past two years, and this would appear to be the first experience as I can find nothing about these moths in writing and our first warning was given when an Agent saw some of these moths onboard. This type of moth appears suddenly from the jungle with no regular cycle, and like other moths is attracted at night by lights, be they from vessels, homes or berth installations. They are about *one inch* in length, their bodies about pencil thickness and filled with eggs. They flutter in vast numbers around the lights, and it would appear that the dust, pollen, hair or whatever comes off them, falls onto the ship's structure or persons nearby. They do not bite and therefore I assume the dust, breathed in or landing on the skin causes a red pimply rash which gradually spreads over the whole body. It affects everyone differently, some crew were covered in a very heavy bumpy red rash within a few hours of exposure, others only in small patches on the arms which spread over the body taking several days, but in all cases causing extreme discomfort due to the itching and constant desire to scratch. At first it was only crew who were on deck that were affected, but as I assume the dust was brought into the accommodation by clothing, fans and the moths which got past the doors, the engine and catering crew were similarly affected.

Over two thirds of the crew were treated locally within 24 hours, with injections, tablets, lotions & creams but this only brought temporary relief. Rashes picked up 10 days ago with the first incident are now clearing up, but fresh rash areas appeared when we visited the Caripito area 3 days ago. We are on a weekly schedule, and one would hope we will build up a resistance to this problem. The local people also suffer from this rash, but the ones I met only had a very light rash on arms, neck and body. They cannot say how long the moths will be present, varied reports of two weeks to months. However, we are now adopting the following anti-moth measures:

1. Put the air conditioning on recirculation, ensure all openings are closed.
2. At night when underway, blackout the vessel as much as possible. During the San Juan River passage to Caripito, navigation lights only situation if possible.
3. When you anchor in San Juan River to wait for the tide or berth at Caripito, blackout the vessel and allow no one outside if possible at night, anchoring or picking up by torchlight. Having anchor lights on at night is debatable, the local dredger does not.
4. Wash the vessel down completely at daybreak, and sweep all dead moths off the deck.
5. For night mooring/deck operations, have as few lights on as safely possible, all exposed crew should cover themselves completely, particularly around the neck area.
6. After clearing the Maturin Bar (river entrance) wash down the whole ship. The dust off the moths is still active days after leaving the area. Wash all filters of air conditioning units.

Knowing about this problem could have reduced exposure to what is an extremely unpleasant experience, and I have urged the local installation to include a warning in their Port Information Guide.

AMUAY BAY: 11.46 N. 70.15 W. (See Plan)

OPERATORS: Lagoven, S.A.
ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send ETA at least 3 days before arrival at Amuay Bay. During hours of darkness all vessels must identify themselves on arrival either by radio-telephone or Aldis, preferably the former.
2. If a ship originally cleared for another port (including some other Venezuelan port) is diverted at sea to Amuay Bay, certain information must be radioed prior to arrival to avoid heavy fine and/or delays. See "Radio".
3. No dirty ballast may be pumped overside in port or in Venezuelan coastal waters. Ballast disposal facilities are available at Amuay Terminal.
4. The use of Venezuelan Government Pilots is compulsory for docking and for movements inside the bay.
5. The Venezuelan flag should be displayed at the mast-head during daylight hours by ships anchored and berthed in Venezuelan waters.
6. In addition to other clearance documents, 2 copies of an itemised list of articles in the ship's chest must be presented to Authorities on arrival.
7. Emergency fire signal is 5 long blasts on ship's whistle or siren. No other signal is to be given in the case of emergency.
8. Ratguards must be in place on all mooring lines.

LOCATION: The port of Amuay Bay is located on the Gulf of Venezuela, on the West Coast of the Paraguana Peninsula, Venezuela. The sea buoy marking the entrance to the bay is located in Lat. 11° 44′ 25″ N., Long. 70° 14′ 50″ W.

DOCUMENTS: Inward Clearance is effected on board immediately after docking by Government Port Officials and a representative of the Marine Department. It is necessary that the following documents be ready on arrival:

Clearance from Last Port.
Ballast Certificate from Last Port.
Crew Lists (5 copies).
Passenger Lists (5 copies).
Baggage List (3 copies).
Lists of Personnel Effects (3 copies).
Stores Lists (3 copies).
Lists of Slop Chest (3 copies).
Sailing Permit (Zarpe).

Vessels arriving with cargo to discharge, will also require:
Manifest (Sobordo) (1 original and 2 copies from each loading port).
Bills of Lading, 1 original and 5 copies from each loading port.
Tally Books (6 from each loading port).
Commercial Invoices (3 from each loading port).

Although vessels proceed directly to Amuay Bay, clearance documents should be prepared showing the port as Las Piedras, Paraguana (Amuay Bay). Failure to observe this requirement may result in penalties up to a maximum of Bs.2,000.

Admeasurement Certificate: All ships calling at a Venezuelan port for the first time must be measured for tonnage by the Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, or any other certificate with which Venezuela is in agreement, which is used as a basis for recalculating tonnage under the Venezuelan Regulations, and is returned before sailing. The Venezuelan Admeasurement Certificate, when later issued, is forwarded to the owners. A fee is charged for this certificate, which is payable only on the ship's first call. Vessels registered in the following countries are excluded from the above regulations: Denmark, France, Germany F.R., Ireland, Netherlands, Norway, Portugal, Sweden, United Kingdom and U.S.A.

Vessels that were originally cleared for another foreign port, or another Venezuelan port, and were subsequently diverted at sea, should radio the following information to "Lagomar-Judibana" prior to arrival:

Vessel's name	Last port of call
Master's name	Port for which originally cleared
Vessel's flag	
Number of crew	Grade and quantity of cargo to be lifted.
Estimated time of arrival.	

This information is required in order to make in advance special arrangements for Inward Clearance, to avoid payment of fine.

Outward Clearance and cargo documents are delivered on board by the Marine Dispatcher. However, in order to obtain the sailing permit, a special form, delivered on board on arrival, must be completed, not later than 2 hours before sailing time. This form gives cargo and freeboard information by the Captain of the Port.

In the event the berth is required by another vessel, a vessel having completed loading may be required to vacate the berth promptly and proceed to anchorage to await cargo documents.

PILOTAGE: Pilots are employees of the Venezuelan Government and pilotage is compulsory for vessels entering or leaving the harbour. The Marine Department will arrange for Pilots to board all vessels as necessary.

The Pilot acts in an advisory capacity; the Master retains responsibility for the ship at all times. In the event it becomes necessary to disregard the Pilot's instructions in order to ensure the safety of the ship, the Master must forward through the Marine Department a full written report of the circumstances, for delivery to the Captain of the Port.

ANCHORAGES: For vessels awaiting berth, there is a good anchorage about 1 mile N.W. of the sea buoy in 8 to 12 fathoms with a sand and mud bottom. Ship Masters are requested not to anchor at a distance greater than 3 miles from the sea buoy.

RESTRICTED AREA: A restricted fishing area has been established by the Venezuelan Government which is prohibited for mechanically propelled vessels drawing more than 5 ft. This zone lies within the area off the Paraguana Peninsula from Punta Macolla, Lat. 12° 5′ 32″ N., Long. 70° 12′ 55″ W., to Punta Estanques (Los Taques), Lat. 11° 48′ 45″ N., Long. 70° 16′ 45″ W., and a line connecting the positions below indicated: Lat. 12° 07′ 40″ N., Long. 70° 14′ 25″ W.; Lat. 12° 03′ 15″ N. Long. 70° 19′ 23″ W.; Lat. 11° 49′ 25″ N., Long. 70° 21′ 50″ W.

MAX. SIZE: Length 1,000 ft.; draft 43 ft. Also see "Berthing".

HEALTH: *Sanitary Inspections:* A close control of veneral diseases has been put into effect by the Government Sanitary Office.

Immediately after docking a Sanitary Inspector will board the vessel and all Crew members will be checked before going ashore.

Those persons found with infection must be sent to the Government Anti-venereal Clinic for proper medical attention and return to vessel before sailing. 20 Bolivares per ship.

Shore passes will be granted to all healthy persons.

Masters are required to co-operate in this campaign.

RADIO: The cable and telegraphic address for the Lagoven S.A. at Amuay is "Lagomar Judibana". Radio messages to and from ships at sea are routed through "Shipward 2 New York" for retransmittal through Aircon system to Judibana (Amuay Bay).

Radio Notice of Arrival should be sent 72 hours prior to arrival at Amuay.

Ship-to-shore telephone: Radio-telephone listening watches are maintained on a 24-hour basis in the Marine Office on the following frequencies: 2182 kHz.; 156.8 MHz.

International telephone: International telephone calls are routed through Caracas, Venezuela. Telephone number is Punto Fijo area 069-51557 (It is usually difficult if not impossible to complete a call.). Telex: 54193 Lagoven.

Also see "Documents".

TUGS: Tug assistance is considered essential and is afforded all vessels entering, leaving or shifting in the harbour by 2 × 1,600 h.p. tugs. Disposition and manoeuvres of tug-boat are directed by the Pilot, who uses a "walkie-talkie" to convey orders to the tugs.

BERTHING: 4 finger piers provide 8 berths, numbered 1 to 8, from South to North.

Berth	1	2	3	4	5	6	7	8
Max. Arrival d.w.t. (m.t.)	70	92	24	44	16	30	16	30
Max. departure d.w.t. (m.t.)	112	112	48	48	38	38	94	94
Max. Draft (S.W.)	43′	43′	*37.6′	*37.6′	*37.6′	*37.6′	*37.6′	43′
Max. Length Ship	1000′	1000′	650′	700′	700′	700′	856′	856′
Max. Beam	Unl.	Unl.	Unl.	†	†	†	†	Unl.
Bow to manifold distance	495′	495′	300′	320′	330′	330′	340′	340′

Ballast line, fresh water and all grades bunkers at all berths.

*The max. draft will be increased to 40 ft.

†Max. beam permissible varies dependent upon the beam of vessel berthed on other side of the slip.

The use of an anchor when docking is permitted at all berths. It is considered prudent to have the outboard anchor hove-out prior to entering the harbour in order to facilitate speedy release if necessary while docking. The Pilot will advise whether the ship is to be berthed port or starboard side to the dock.

Products handled:

Berths No. 1 & 2: F.O., heating, heavy distillates, TJ-102, topped crudes, all crudes.

Berths No. 3 & 4: Lubes, F.O., LCT asphalts (penetration).

Berths No. 5 & 6: Naphtha, jet fuel, crudes, F.O., heating, MC/RC asphalts, kerosene, TJ-102, topped crudes, LCT (pref.).

Berths No. 7 & 8: Naphtha, kerosene, heating, F.O., jet fuel, MC/RC asphalts, all crudes except TJ-102.

LOADING: Loading rates particulary for low-flash products loaded during the hours of darkness or when topping-off cargo tanks, will be reduced by the terminal to meet existing conditions.

All loading and discharging will be stopped during the passage of an electric storm, and ullage covers must be closed and dogged down. During periods of calm, loading of gasoline or other similar low-flash products may be loaded at reduced rates or loading stopped if the heavy vapours are not being dispersed quickly enough to prevent hazards from accumulated gas pockets. Ship's officers are cautioned to be on their guard during such conditions.

Loading rates will be reduced when topping-off, if requested by the ship's officer.

Some of the fuel cargoes are loaded from fuel reservoirs through certified positive displacement meters, and shipping documents are prepared on the metered figures. All reconstituted crudes are line blended with conditions recording of component rates and quantities. Actual loading rates of both this crude and metered fuel cargoes are available at any time upon request of the standby.

Instructions as to grade or grades of cargo, and the approximate loading rate anticipated, will be given to the Master on completion of Inward Clearance. Supplementary information including number and size of lines and hoses will be furnished to the Chief Officer before loading commences.

If vessel's loading orders from owners or charterers do not agree with the terminal's orders, either as to grades or quantity, the marine representative should be advised immediately. The terminal is authorised to load 10% more or less than the quantity nominated; if the cargo to be lifted will be more or less than this 10% limitation it is necessary to cable New York for confirmation.

A terminal employee is stationed at each pier during the entire time the ship is discharging ballast, bunkering, or loading cargo. Fifteen minutes "stand-by" notice should be given to this man prior to completion of ballast, bunkers, or cargo.

Vessels loading Liquid and Flaked Sulphur: *For vessels loading Liquid Sulphur, the following applies:*

Location: Pier 2, Berth 3 at Amuay Bay.

Draft – 40 ft., length overall – 700 ft., beam – no limitation.

Loading will be at the rate of 400 long tons per hour through a 6 in. line and rubber hose.

Maximum cargo size – 25,000 long tons.

Normal loading temperature is 275°F. (Minimum – 265°F. Maximum – 295°F.). Density at normal loading temperature is 112 pounds per cu. ft. Viscosity at same temperature is 8.5 centipoises.

Safety precautions/provisions: Molten sulphur classified as "Grade E Liquid" by U.S. Coast Guard. No naked light, open flames or sparks should be permitted near any tank openings. Molten sulphur is combustible but is handled at temperatures below its flash point (325-370° F) and ignition temperatures (476-502° F).

For vessels loading Flaked Sulphur, the following applies: Physical characteristics of the loading facilities:

(a) Location: Lat. 11° 44′ N., Long. 70° 14′ W. Anchorage approximately 2,000 ft. South Punta Adaro with a depth of 33 ft. 400 yards offshore and dropping off to 50 ft. 1,000 yards offshore. In the rare event that the wind is Westerly vessel would anchor further offshore.

(b) No draft, length or beam limitation. (Vessels loading up to 24 ft. draft may be anchored inside the bay).

(c) Loaded barges whose overall dimensions are 200 ft. × 42 ft. × 17 ft. will be brought alongside with the aid of tugs and removed when required, barges will be equipped with fenders. The hoppers are 160 ft. × 37 ft. × 14 ft. Loading from barges to ship will be done using ship's gear and clam shells of 1.25 ton capacity. Clam shells will be furnished by Lagoven free of charge. Personnel (stevedores) to carry out the loading operation will be supplied by Lagoven or the ship's crew can be used if this is set forth in the charter party. Loading rate 1,000 long tons per day.

(d) The anchorage is sheltered in the lee of the Adaro Peninsula. Wave heights vary between 1 ft. and 2 ft.

(e) Normal Maximum parcel size – 10,000 tons loaded at a rate of 1,000 tons per day, however, an additional 2,500 tons can be supplied at a loading rate of 500 tons per day.

(f) Flaked Sulphur when stored in large quantities varies in density from 55 to 90 pounds per cu.ft. Average density is anticipated to be 70 lbs./cu.ft. Individual flakes are of irregular shape and are less than 0.5 sq.in. in area and less than 0.0625 in. thick. This size data is not a specification nor guarantee and is provided only to indicate the order of magnitude dimensions.

General:

Fee of Bs. 200 will be charged for trips between the Terminal and the anchorage by launch or tug for delivering personnel.

Method of cargo quantity determination: Barge drafts are marked to the nearest inch and capacity tables prepared by Charles Martin. The draft prior to commencement of and upon completion of discharging are noted. The amount transferred is obtained by consulting the tables. The quantity arrived at by totalling the amounts from the barges used is compared to the ships figures and reconciliation reasoned.

BALLAST: Vessels should arrive with sufficient ballast to permit safe handling. The Pilots require a draft of minimum 8 ft. forward, 18 ft. aft, on a T-2 or similar size tanker, 11 ft. forward and 20 ft. aft on a 26,000 d.w.t. or larger vessel. Ballast should be carried in a minimum number of tanks, and all other tanks stripped, so as to minimise deballasting time.

A relatively small amount of salt water remaining in ship's tanks or lines can contaminate crude and cause operating problems for the refiners. It is important therefore to strip tanks and lines as dry as possible.

Vessels provided with completely segregated ballast system are permitted to discharge ballast and load cargo simultaneously.

Absolutely oil-free ballast may be discharged overside. All dirty ballast must be pumped ashore. A 30 in. ballast line, 2×60,000 and 1×120,000 barrel slop tanks and separator system are available.

A considerable number of vessels are now participating in the programme to eliminate pollution of the seas. Under this programme, vessels may arrive carrying quantities of oil/water emulsion. If it is desired to follow the "load-on-top" procedure in such instances, it is requested that the Marine Representative be informed on arrival.

MEDICAL: Medical treatment and hospitalisation, if required, is provided at a hospital located in the Lagoven concession, operated by the Society of Catholic Medical Missionaries. Several dentists are located in the area.

Italian Crew members covered by Casa Maritime insurance receive medical attention from the appointed medical representative in Punto Fijo.

Authorisation forms for medical and dental treatment are provided, which require Master's signature. Transportation is available at the Marine Office. Please note that if the patient does not speak Spanish or English, an interpreter should accompany him.

DENSITY: The usual density of sea water at the berth is 1025, temperature ranges from 78°F. to 85°F.

FRESH WATER: Fresh water can be supplied if necessary; however, supplies are limited to essential requirements. All fresh water is piped from distant sources. Loading rate is about 10 t.p.h.

FUEL: Ship's requirements specifying grade and quantity desired are to be given to the Marine Representative boarding the vessel on arrival. All grades of bunker fuel, intermediate fuels and Diesels are available except Esso diesel. Bunker delivery rates average 2,500/3,500 barrels per hour. Bunkers are loaded through meters which automatically register quantities on bunker receipts.

It is the responsibility of ship's engineer to give "standby" notice to the terminal employee and advise him when to shut down.

CONSULS: Brazil, Great Britain, Italy, the Netherlands, and Norway have consular representatives in the area.

CUSTOMS: Venezuelan laws are strict in regard to contraband and Masters are requested to instruct their crews not to take cigarettes or other articles ashore. Cigarettes in carton lots, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel) should be collected prior to arrival in port, listed with the items in the slop chest and placed in the custody of the Master for deposit in the slop chest or closet which will then be sealed for the duration of the vessel's stay in port.

Firearms on board any merchant vessel calling at Venezuelan ports must not exceed one per officer, nor can the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be noted on the Stores List. Officers must not carry firearms while the ship is in Venezuelan waters and these side-arms and ammunition should be collected and held in the Master's safe custody. Crew members should be warned against taking knives or other weapons ashore.

While the vessel is in port, Venezuelan National Guard Officials are assigned on board to ensure compliance with Customs regulations. The law requires that meals be supplied to these officials during regular meal hours. Masters are requested to give them the privilege of eating in the officers' mess-room, to avoid difficulties.

TIME: GMT minus 4 hours.

SHORE LEAVE: Also see "Health". Shore passes will be granted to all healthy persons. A representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing and given to the Pilot undocking the vessel. Vessels are not permitted to sail until all Crew members are on board, unless hospitalised or prior arrangements made for disembarking. A letter to this effect is required from the Master.

REGULATIONS: (i) *Pollution:* The laws of Venezuela are very strict in regard to the pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast, oil or bilge slops are to be pumped or allowed to escape overboard. All overboard discharge valves from cargo tanks and bilges are to be secured before loading or discharging commences. Loading is to be conducted with the greatest care and vigilance in order that errors or delays in handling cargo valves may not result in overflows. All deck scuppers should be plugged before loading to avoid harbour contamination should an overflow occur. The Authorities require that a written report be submitted by the ship involved in the event of an oil spill.

(ii) *Gangways:* All vessels using the port of Amuay must provide a safe gangway. The use of rung ladders, pilot ladders, etc., is contrary to Port Regulations, and Port Authorities will not board except by means of a safe gangway or accommodation ladder.

(iii) *Passengers:* Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include advice to this effect in his radio ETA.

(iv) *Visitors:* All visitors to ships are prohibited except those company employees, petroleum inspectors, etc., whose duties require their presence aboard.

(v) *Rats:* Rat guards required at all times.

GENERAL: *(a) Weather Conditions:* There is little rainfall at Amuay Bay; annual precipitation averages 12 in. The so-called rainy season usually coincides with the Caribbean hurricane season, from August to November, although Amuay lies South of the usual hurricane track. During these months calms are often experienced and winds from a Westerly direction may be expected. Normal winds are steady from the N.E., average Force 4, Beaufort Scale, with a max. of Force 8. Temperatures average about 85°F., with little variation from day to night or season to season.

(b) Tides: The normal range of the tide is about 12 in.; however, a 28 in. range has been observed during spring tides.

(c) Lubricating oil: Supplies of Essomarine lubricating oils are available. Requirements should be given in vessel's radio notice of arrival.

(d) Bonded Stores: Cigarettes or other stores in bond are not obtainable in Amuay Bay.

(e) Cash Advances: The local currency is the Venezuelan Bolivar and cash advances are made only in this currency. It is requested that any requirement for cash advances be included in the vessel's ETA radio, to permit delivery on board on arrival.

(f) Charts: No supplies of charts or sailing directions are available at Amuay Bay.

(g) Laundry: A 6 hour laundry service is available throughout each working day. Such service should be requested in the vessel's ETA message.

(h) Mail: Itemised lists are required for ship's mail, to be signed by the Master. Unless other instructions are given, ship's mail received after sailing, or for vessels on which no advice has been received, will be held for 30 days and then returned to Owners or Operators at ship's expense.

(i) Inspection – Petroleum Products: Chas. Martin & Co. and E. W. Saybolt, petroleum inspectors, are available if specified. Telephone numbers, Chas. Martin 44665, 44650 and 44211; Saybolt 44639, 44645 and 44227.

(j) Norwegian Government Seamen Service: A field representative of the above service is stationed at Amuay providing Norwegian and Swedish film exchange and other usual services. His telephone number is 51459.

(k) Personnel – Seamen Left Ashore: In the case of seamen left ashore for hospitalisation, repatriation or other reason, all documents and personal effects are to be delivered to the Marine Office before sailing. A letter is required from the Master advising the maximum advances to be made to the seamen, if any, and instructions concerning his repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account.

It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, Agent or owner, responsible for any seamen left behind in Venezuela.

(l) Provisions and Stores: Provisions and stores in limited quantities are available, the prices and quality of some items, such as fresh fruit, fish, shrimps, vegetables, etc. are competitive; dry stores are considerably higher than in most ports. The Port Steward will assist in filling requisitions.

(m) Radar and Radio: Radar and radio repairs can be effected in Amuay. A service repair man is available, but spare parts are limited.

(n) Repairs: Shore facilities are available only for emergency repairs of a minor nature. The nearest dry docks are those at Puerto Cabello and Curacao, N.A. Several contractors in the area provide labour for hull painting and for tank cleaning. Contracts for these services are made by the ship's Master directly with the contractor.

(o) Surveyors: There are no appointed surveyors to American Bureau of Shipping or Lloyd's in the area. However, with sufficient advance notice, arrangements can be made to have their nearest representatives come to Amuay to attend surveys.

(p) Walport Film Exchange: Subscribers to the Walport Service may exchange films at the Marine Office.

(q) Plimsoll Marks: The Captain of the port requires that the Plimsoll Marks of all vessels using the port be clearly visible. Vessels will be checked on completion of loading, and if the Plimsoll Marks are not readily legible, permission to sail may be withheld.

(r) Landmarks: Three conspicuous radio towers, 350 ft., painted alternate red and white bands, with red flashing aircraft warning lights, are located in the refinery area, 1 mile East of the docks.

ATTENDANCE: Representatives of the Marine Department board vessels immediately on arrival, and it is particularly requested that Masters indicate at that time all ship's requirements. The Marine Office Building is located at the Pierhead Trestle and personnel are available for assistance at all hours. Telephones are located on all docks and the Marine Shift Supervisor can be called on telephone No. 444475 or 444465.

CARIPITO: 10.09 N. 63.02 W.

Also see "General – Shipmaster's Report, July 1982".

OPERATOR: Lagoven, S.A.

LOCATION: Caripito is located on the West bank of the San Juan River in Lat. 10° 09′ 25″ N., Long. 63° 02′ 01″ W.

Also see "General" before first port.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send to Caripito their ETA Guiria at least 3 days in advance followed by confirmation 48 and 24 hours before arrival.

2. If a ship originally cleared for another port (including some other Venezuelan port) is diverted at sea to Caripito, certain information must be radioed to Caripito prior to arrival to avoid a heavy fine and/or delays. See "Radio".

3. No dirty ballast may be pumped overside in port or in Venezuelan coastal waters. Limited ballast facilities are available at Caripito Terminal.

4. Vessels calling at Caripito must obtain Government Pilots at Guiria.

5. The Venezuelan flag must be displayed during daylight hours while vessel is within port limits.

6. The emergency fire signal in Caripito dock area is 6 short blasts and 1 long blasts on ship's whistle or siren. No other signal is to be given in the case of emergency.

APPROACHES: The traffic in San Juan River is restricted to one-way from Marieta Point to Caripito. Therefore, instructions are issued at Guiria to incoming vessels relative to what action to take on arrival at Marieta Point. Outbound traffic is controlled so as not to conflict with these instructions.

1. Guiria: The town of Guiria is located on South coast of Paria Peninsula on N.W. shore of Gulf of Paria. When approaching from East a signal tower will be observed on a bluff slightly to North of town.

2. Maturin Bar: Buoy E-1, marks the entrance to Maturin Bar Channel and is located in position Lat. 10° 18′ 57″ N., Long. 62° 28′ 16″ W. (approx.) and displays a flashing white light every 5 secs.

3. Channel: Maturin Bar Channel is 14 miles in length and 400 ft. in width. The tidal range over the bar varies from 4.6 ft. to 5.7 ft. with currents up 3 knots. The average salinity of water is 1.009; however, this may vary considerably between wet and dry seasons and spring and neap tides dredging of channel to 32 ft. (MLWS) has recently been concluded. Maximum draft permitted by Venezuelan regulations is 34 ft. in fresh water. There is a restriction of 6 in. less for all motor tankers. On leaving Maturin Bar Channel the San Juan River narrows from approximately 1.25 miles in width to about 0.7 miles with slight variations in width up to Marieta Point where it narrows to about 1,200 ft. and varies between 800 ft. and 2,000 ft. up to Caripito. Marieta Point marks intersection of Cano Frances and the San Juan River. It is also at this point that course of San Juan River changes approximately 100° to starboard and it is the beginning of one-way traffic. Frequently, incoming vessels are requested to anchor below this point to await outbound traffic. There are 32 lights marking strategic points in San Juan River between Maturin Bar and Caripito Terminal. These light towers are painted aluminium and are easily visible during daylight hours.

DOCUMENTS: (Also see "Radio").

1. *Clearance (inward and outward).* Inward Clearance is effected at Caripito. The Sanitary Inspector boards vessel at anchor or at berth depending on tidal conditions and/or the availability of a berth. The Customs and other Government officials usually board at the berth. However, should there be a delay awaiting berth or tide, the entry will be granted while vessel is at anchor, in which case accommodation ladder must be rigged.

It is necessary that the following documents be ready on arrival:

Ballast List (1 original).
Passenger List (5 copies).
Baggage List (5 copies).
Crew List (7 copies).
Sailing Permit from Last Port (1 original).
Stores List (5 copies).
List of Personal Effects (3 copies).
List of Contents of Slop Chest (3 copies).
List of Passengers in Transit (5 copies).

Cargo documents. These are normally placed on board prior to departure, but in some cases when it is imperative to leave because of the tide, they are delivered at Marieta Pt. while vessel is at anchor awaiting tide to cross the Maturin Bar.

PILOTAGE: Pilots are employees of Venezuelan Government and act in an advisory capacity. The Master retains responsibility for ship at all times. In the event it becomes necessary to disregard the Pilot's instructions in order to ensure the safety of the ship, the Master must forward through the Marine Department a full written report of the circumstances, for delivery to the Captain of the Port.

Pilots are compulsory and are embarked and disembarked at port of Guiria through a sub-Agent. Vessels should proceed to the Guiria Sea Buoy (position Lat. 10° 33′ 25″ N., Long. 62° 15′ 05″ W., displaying a flashing white light every 5 secs.), and await instructions. If arriving during the hours of darkness, certain instructions are usually transmitted by light signals from the signal tower. Voice radio communications can be established at any time with Guiria or Lagoven Caripito on frequencies 2182 kHz, 2638 kHz and 2738 kHz. The launch which embarks the Pilot will also deliver instructions to the Master relative to the movements of his vessel en route to Caripito, port regulations, facilities, etc. The regular pilotage fees cover the area from the entrance to Maturin channel to and from Caripito. The Pilot is to be provided with sleeping quarters and food, equal to that provided for the officers aboard ship. (A representative from Port Services will assist as interpreter, whenever necessary.)

Note: Complaints or observations concerning the Pilot's handling of vessel should be noted on back of pilotage ticket.

TIDES: The normal range of tide in the dock area is about 12 ft. with currents up to 3 knots during the flood and 4 knots during the ebb in rainy season (May-December). The normal current is 2.5 knots during the flood and 3 knots during the ebb.

ANCHORAGE: For vessels awaiting berth, there is an anchorage about 1,000 m. up-stream from the Caripito Terminal. Vessels awaiting clear channel may at times be requested to anchor at Punta Marieta. Vessels awaiting high tide anchor at Punta Marieta or off Punta Gorda.

MAX. SIZE: Vessels up to 660 ft., 61,000 d.w.t. and max. draft *33 ft. (FW) at Berth No. 2 and LOA 775 ft., 61,000 d.w.t. and max. draft *33 ft. (FW) at Berth No. 3 when vessels are loaded. No restriction on vessel's beam at the berths.

*Safe draft per tide tables.

RADIO: The cable and telegraphic address for Lagoven at Caripito is "Lagomar – Caripito". Messages to and from ships at sea are routed through the Government Radio Station at Maiquetia (La Guaira), call letters "YVG". This station operates on a 24-hour continuous watch, on the following frequencies:

Listening Frequencies: Low frequency, 500 kHz; high frequency, 4178, 6267, 8356, 12534, 16712, 22225 kHz. Transmitting Frequencies: Low frequency, 500, 472, 464, 417 kHz; high frequency, 4322, 4352, 6505.5, 6519.5, 8722, 8730, 12817.5, 17141.6 kHz. Radio Notice of Arrival should be sent 72 hours prior to arrival at Guiria and corrected if weather or other conditions delay the vessel.

Radio telephone listening watches are maintained on a 24-hour basis at Guiria and at Caripito on 2182 kHz. The following frequencies are available for communications after contact: 2638 kHz and 2738 kHz.

All vessels en route to Caripito may also communicate with Amuay or La Salina Marine offices and request that message dealing with corrected ETAs, Pilots and other business be relayed to the Caripito Marine Office.

Vessels that were originally cleared for another foreign port, or another Venezuelan port, and were subsequently diverted at sea, should radio the following information to Lagomar Caripito prior to arrival:

Vessel's name
Master's name
Vessel's flag
Number of crew
Estimated time of arrival
  at Caripito

Last port of call
Port for which originally
  cleared
Grade and quantity of cargo
  to be lifted

This information is required in order to make in advance special arrangements for Inward Clearance, to avoid payment of a fine. It is necessary in such a case that the following documents be ready on arrival:

Crew List (original and 6 copies).
List of Personal Effects (original and 2 copies).
List of Contents of Slop Chest (3 copies).
Stores List (original and 1 copy).

Also required are the original and 2 copies of the radiogram instructing Master to proceed to Caripito. Outward Clearance documents are placed on board the vessel prior to departure from the Caripito terminal.

Masters should bear in mind that while vessels are within Venezuelan territorial waters, Government Authorities do not permit the use of ship's radio equipment. Cables and radiograms should be handed to the company representative for transmittal via shore radio communication system. Caripito has also radio telephone communication with North and South America and Europe. For further information contact Port Services Section in the terminal building, telephone 2335/2336.

BALLAST: Ballast is not required when mooring. Any ballast carried should be in a minimum number of tanks, and all other tanks stripped so as to minimise deballasting time.

A relatively small amount of salt water remaining in ship's tanks or lines can contaminate crude and cause operating problems for the refiners. It is important therefore to strip tanks and lines as dry as possible.

Vessels provided with completely segregated ballast system are permitted to discharge ballast and load cargo simultaneously. All ballast clean or dirty must be pumped ashore. Contaminated residues may be pumped ashore, where facilities are available for receiving up to a maximum of 20,000 barrels.

A considerable number of vessels are now participating in the programme to eliminate pollution of the seas. Under this programme vessels may arrive carrying quantities of oil/water emulsion. If it is desired to follow the "load-on-top" procedure in such instances, it is requested that the Marine Representative be informed on arrival.

BERTHING: The Marine Office Building is located on the West bank of the San Juan River upstream from the berths. Representatives of the Marine Department board vessel immediately upon arrival and it is particularly requested that Masters indicate at that time all ship's requirements. Personnel are available for assistance at all hours.

Lagoven maintains a deep water terminal, consisting of 2 ocean tanker berths, Nos. 2 and 3. These are T-type piers with breasting dolphins located approximately 10 ft. off the face of each pier.

All terminal facilities are under the control of Lagoven, S.A. The port is open for navigation during day and night. All ocean tankers are moored at Berths No. 2 and 3 on the flood tide only. Vessels may sail from Berth No. 3 at any stage of the tide. Sailings from Berth No. 2 are restricted to flood tide only when Berth No. 3 is occupied.

A vessel entering or leaving port must be assisted by the same Government Pilot taken aboard at Guiria. A Custom guard will board at the same time and remain with the vessel. A Lagoven Representative will deliver to the Master his loading and docking instructions together with any other information pertinent to the vessel's call. He will also sign the Notice of Readiness if requested. The vessel will proceed to anchor to await flood tide to dock, to await berth, or will swing to the flood tide in the turning basin and proceed directly to the berth depending on circumstances.

LOADING: Loading rates, particularly for low-flash products loaded during the hours of darkness or when topping off cargo tanks, will be reduced by terminal to meet existing conditions.

All loading and discharging will be stopped during passage of an electric storm, and ullage covers must be closed and dogged down. During periods of calms, loading of gasoline or other similar low-flash products may be loaded at reduced rates or loading stopped if the heavy vapours are not being dispersed quickly enough to prevent hazard from accumulated gas pockets. Ship's officers are cautioned to be on their guard during such conditions.

Loading rates will be reduced when topping off, if requested by the ship's officer.

Instructions as to grade or grades of cargo, and the approximate loading rate anticipated, will be given to the Master. Supplementary information including number and size of lines and hoses will be furnished to the Chief Officer before loading commences.

If vessel's loading orders from Owners or charterers do not agree with terminal's orders, either as to grades or quantity, the marine representative should be advised immediately. The terminal is authorised to load 10% more or less than the quantity nominated; if the cargo to be lifted will be more or less than 10% limitation consultation is necessary.

A terminal employee is stationed at each pier during the entire time the ship is discharging ballast, bunkering, or loading cargo. Fifteen minutes "standby" notice should be given to this man prior to completion of ballast, bunkers, or cargo.

MEDICAL: Medical treatment and hospitalisation, if required, is provided at a hospital located in the concession. Several dentists are located in the town of Caripito. Authorisation forms for medical and dental treatment are provided, which require Master's signature. Transportation is available at the Marine Office. Please note that if the patient does not speak Spanish or English, an interpreter should accompany him.

FRESH WATER: Fresh water is available in any quantity. Delivery is made through 2.5 in. national standard fire hose thread hydrants. Ship's personnel must provide hoses and connect up.

FUEL: IFO-180, IFO-380, Marine Diesel and Gas Oil are available. It is the responsibility of ship's engineer to give "stand-by" notice to the terminal employee and advise him when to shut down.

CONSULS: There are no consular representatives in the area. Vessels bound for U.S.A. or British Caribbean ports will be provided with a letter stating this fact.

REPAIRS: Only minor repairs of an emergency nature can be made. There are no electronic repair services available in the area.

CERTIFICATES: All ships calling at a Venezuelan port for the first time must be measured for tonnage by Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and is returned before sailing. The Venezuelan Admeasurement Certificate, when later issued is forwarded to the Owners. A fee is charged for this certificate, which is payable only on ship's first call. Vessels registered in following countries are excluded from above regulations: Denmark, France, Germany F.R., Ireland, Netherlands, Norway, Portugal, Sweden, United Kingdom and U.S.A.

CUSTOMS: While the vessel is in port, Venezuelan National Guard officials are assigned on board to ensure compliance with Customs regulations. The law requires that meals be supplied to these officals during regular meal hours. Masters are requested to give them the privilege of eating in the officers' messroom, to avoid difficulties.

Venezuelan laws are strict in regard to contraband and Masters are requested to instruct their crews not to take cigarettes or other articles ashore. Cigarettes in carton lots, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel) should be collected prior to arrival in port, listed with the items in the slop chest and placed in the custody of the Master for deposit in the slop chest or closet which will then be sealed for the duration of the vessel's stay in port.

Firearms on board any merchant vessel calling at Venezuelan ports must not exceed 1 per officer, nor can ammunition exceed 18 cartridges per officer. All firearms and ammunition must be noted on the Stores List. Officers must not carry firearms while ship is in Venezuelan waters and these side-arms and ammunition should be collected and held in the Master's safe custody. Crew members should be warned against taking knives or other weapons ashore.

SHORE LEAVE: Shore leave is permitted and a representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing, and given to the Lagoven Despatcher undocking the vessel. Vessels are not permitted to sail until all crew members are on board, unless hospitalised or prior arrangements made for disembarking.

TIME: Local time is GMT minus 4 hours.

GENERAL:

Gangways: Gangways at Berths No. 2 and 3 are provided by the terminal.

Plimsoll Marks: The Captain of the Port requires that the Plimsoll Marks of all vessels using the port be clearly visible. Vessels will be checked on completion of loading, and if the Plimsoll Marks are not readily legible, permission to sail may be withheld.

Surveyors: There are no appointed surveyors to the American Bureau of Shipping or Lloyd's in the area. With 48 hours' notice, non-exclusive surveyors can be obtained from Caracas, or at times from Puerto La Cruz, or qualified Masters or chief engineers may be available for appointment as surveyors when required.

Bonded Stores: Cigarettes or other stores in bond are not obtainable at Caripito.

Cash Advances: The local currency is the Venezuelan Bolivar and cash advances are made only in this currency. It is requested that any requirement for cash advances be included in the vessel's radio ETA, to permit delivery on board on arrival. Cash returns can be accepted only during the normal working day – 0700 to 1600 hrs. Sundays and holidays excluded.

Provisions and Stores: Provisions and stores in extremely limited varieties and quantities are available at prices considerably higher than in most other ports.

Charts: No supplies of charts or sailing directions are available at Caripito.

Personnel – Seamen Left Ashore: In the case of seamen left ashore for hospitalisation, repatriation or other reason all documents and personal effects are to be delivered to the Marine Office before sailing. A letter is required from the Master advising the maximum advances to be made to the seaman, if any, and instructions concerning his repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account. It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, Agent or owner, responsible for any seamen left behind in Venezuela.

Laundry; Laundry service is available.

Lubricating Oil: Supplies of marine lubricating oils are available from Puerto La Cruz. Quantities required should be included in the ETA cable.

Mail: Any pending ship's mail will be delivered on board by the marine dispatcher on arrival at Caripito. At the same time he will receive any ship's mail to be dispatched. The marine dispatcher will accept personal mail only if it carries the proper amount of Venezuelan postage, or if Master authorises postage by signing 7 copies of the Company Post Transmittal form. Masters interested in knowing the individual postage amounts to be paid by each crew member, should provide a list, in duplicate, of the senders, and number of letters sent by each one identified by a number written on each letter. Copy of this will be returned aboard vessel when leaving this port outward bound. If not ready on time, it will be air-mailed to the vessel's next port of call.

Inspection – Petroleum Products and Crude Oil: Inspecciones C.A., AIVEPET, C.A., Caleb-Brett, C.A. and SGS (Redwood), C.A. petroleum inspectors are available from Puerto La Cruz if specified.

Visitors: All visitors to ships are prohibited except those company employees, petroleum inspectors, etc., whose duties require their presence aboard.

Passengers: Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include advice to this effect in his radio ETA.

Pollution of Harbour and Coastal Waters: The laws of Venezuela are strict in regard to pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast, oil or bilge slops are to be pumped or allowed to escape overboard. All overboard discharge valves from cargo tanks and bilges are to be secured before loading or discharging commences. Loading is to be conducted with greatest care and vigilance in order that errors or delays in handling cargo valves may not result in overflows. All deck scuppers should be plugged before loading to avoid harbour contamination should an overflow occur. The authorities require that a written report be submitted by the ship involved in the event of an oil spill. Incidents of this nature should be reported immediately, either by VHF or telephone, to the Port Services Section.

AUTHORITY: Petroleos de Venezuela, S.A., Apartado 169, Caracas 1010-A, Venezuela. *Tel:* 708-4111. *Telex:* 21890, 23489, 24477 PDVSA VE. *Contact:* Lermit Rosell, Marine Corporative Manager.

EL CHAURE: 10.15 N. 64.37 W. (See Plan)

OPERATORS: Corpoven S.A.

LOCATION: El Chaure Marine Terminal is located on the South shore of the head of Bergantin Bay. 1.8 miles N.E. of Puerto La Cruz: Lat. 10° 14′ 50″ N. Long. 64° 36′ 57″ W.

This terminal is also considered to be Berth No. 6 of 'Puerto La Cruz' which also see.

DOCUMENTS: To avoid penalties, ships clearing for Venezuelan Ports must present certain papers herein set forth for arrival and clearance after docking. The Clearance is made by Government officials accompanied by a company representative.

The following documents must be presented:

1 copy of Ship's Register
Clearance from Last Port
1 copy of Ballast Certificate
6 copies of Crew List
5 copies of Passenger and Baggage List
2 copies of List of Passengers in Transit
4 copies of List of Personal Effects
4 copies of Stores List
2 copies of List of Slop Chest
Sailing permit issued by Marine Authority of last port of call.
Dispatch issued by Venezuelan Consul at last port.

PILOTAGE: Pilots are employees of the Venezuelan Government and pilotage is compulsory for vessels entering or leaving the harbour. The Company will arrange for Pilots to board all vessels as necessary. Whenever it might be deemed necessary for the Master to disregard the Pilot's advice in order to ensure the safety of the vessel, a written report must be submitted by the Master to the Venezuelan Port Captain, explaining the reason for such action.

ANCHORAGE: The crossed line portion on the plan is the anchorage zone for all ships after arrival at Pozuelos Bay. The Company will dispatch the Pilot, by launch, to all ships when they are ready to be docked. On entering the Pilot Zone, the Venezuelan flag must be flown from the foremast; it must be flown at all times between sunrise and sunset.

MAX. SIZE: Max. draft 40 ft., max. LOA 750 ft. max. d.w.t. 60,000 tons.
RADIO: El Chaure Terminal Office may be contacted on radio-telephone SSB or AM frequencies of 2738, 2638, 2182 and 2120 KHz. Frequency 2182 kHz should be used for initial contact.
Arrival advice: Masters are required to advise by cable their ETA. Such notice should reach El Chaure at least 48 hours ahead of vessel. In cases of ships being diverted at sea to a Venezuelan Port, or to another Venezuelan Port, Venezuelan regulations require, by cable, prior to arrival, name of Master, number in crew, port of departure, port to which originally cleared, flag of ship and net registered tonnage.
VHF: Channel 16 can be used after arrival at Pozuelos Bay.
TUGS: Tug assistance to moor and unmoor is compulsory at El Chaure installations. Ships over 145 m. long must use 2 tugs having not less than 1,600 h.p. each for mooring and unmooring at El Chaure. 1 launch is required for handling the lines.
BERTHING: The wharf has a length of 100 ft. with dolphins established on each side. The dock accommodates vessels drawing up to 40 ft. Sea conditions are usually very good in the entire area. Waves are almost nil and out of the hurricane path. A chain of small islands makes El Chaure a natural port. Only 1 vessel at a time can be moored for loading or unloading. The normal range of the tide is 1 ft.
BALLAST: Vessels arriving in El Chaure must carry sufficient ballast to ensure safe handling. By Venezuelan Law, all dirty ballast must be pumped ashore into ballast pits. Vessels having separate clean tanks for ballast may pump overboard, after first being inspected and passed by Port Authorities. The Company Terminal facilities include a 16 in. ballast line, which empties into ballast pits about 3,500 ft. from the dock. These pits have an elevation of 32 ft. above the dock and will hold 50,000 bbls. The ballast line will stand a pressure of 100 p.s.i.g. The pressure is recorded at the dock. The vessel will be held responsible for damages to the shore ballast line and spills that maybe occur because of line rupture.
LOADING: Before tying up, blind flanges on the ship's manifold should be removed, hose derrick to be topped and rigged to lift shore hoses along with dock booms. All vessels must dock with starboard side to dock. The Company dock supervisor will inform the Master of the vessel as to characteristics of cargo to be loaded, loading rates and all other information necessary for safe and efficient loading operations. During the ship's stay at the dock, company employees are available at all hours to assist in any manner. After loading is completed, if the dock space is required for another vessel the ship must vacate the berth and wait at anchorage until cargo and sailing papers are completed.
FRESH WATER: Available, rate 10 t.p.h.
REPAIRS: Facilities are limited; any repair work must be requested by Master in writing.
CONSULS: The following are in Puerto La Cruz: Belgium, Brazil, Colombia, Denmark, France, Germany F.R., Italy, Norway, Panama, Spain, Sweden and United Kingdom.
SURVEYORS: Aivepet, Charles Martin & Company and E. W. Saybolt maintain offices in Puerto La Cruz for inspection of cargo if required.
TIME: Local time is 4 hours slow on GMT, year round.
POLLUTION: Pollution of coastal waters is strictly forbidden by Venezuelan Law. The escape of dirty ballast or of cargo either at the dock or in the harbour or in territorial waters will result in heavy fines by Venezuelan authorities. If oil is spilled an estimation of quantity should be made by the Master of the vessel, Venezuelan Authorities and Company personnel, acting jointly. Their joint report must be submitted to the Venezuelan Petroleum Inspector from the Energy and Mines Office, and also the National Guard Headquarters in Puerto La Cruz. The Ministry of Energy and Mines will assess a fine based on the quantity of oil that was spilled. Also the ship is held responsible for the spill and cleaning. Chemicals, equipment, boat and labour used for this purpose are for the ship Owner's and/or operator's account. Each ship must maintain strict supervision on discharging of ballast as well as loading cargo in order to avoid spillage.
CUSTOMS: Venezuelan laws are strict in regard to contraband and Masters are requested to instruct crews not to take cigarettes or other articles ashore.
GENERAL: *Crew:* Passes for shore leave for ship's crew will be given to Master by Company Representative on docking or at anchorage. These passes must be filled out for each Crew member prior to Venezuelan authorities' visit. Passes may be used during the ship's stay but must be returned to the National Guard at the dock prior to departure. Before ship's departure a report must be made to the Dock Master if any Crew member is missing. Crew members left behind will be placed in custody by Venezuelan authorities until deported at vessel's expense. A Crew member requiring medical or dental treatment must submit his request for such aid through the Master to the Dock Master. Arrangements for seamen arriving from other ports, transferring to other ships or being repatriated are handled by the vessel's Agency.

Under the Venezuelan law the vessel is responsible for all seamen in the country during their entire stay. Masters are requested to leave written instructions with the Dock Master for handling seamen left ashore. The Master of the ship must indicate his acceptance of the responsibility for all costs incurred in handling a seaman.
Seaman Left Ashore: A letter from the Master is required advising the amount of cash advance and any other instructions concerning the seaman's repatriation. All expenses incurred by the seaman, including the cost of repatriation are for the vessel's account. The documents and personal effects of seamen left ashore for hospitalisation, repatriation or any other reason, must be delivered to the Terminal Office before sailing. Venezuelan Law holds the Master, ship's representatives and Owners responsible for any seaman left behind in this country.
In Dock: Masters are requested to observe the following regulations while alongside the Company Terminal:

1. – Sufficient number of Crew members must be on board at all times, during discharge of ballast and loading of cargo to ensure proper handling of mooring lines.
2. – Rat guards are to be on all mooring lines during entire stay.
3. – Venezuelan authorities do not permit blowing of heavy smoke from vessel's funnel, while in port. Breaking of this rule may result in Government fine and/or removal of ship from the dock.
4. – Venezuelan National Guard personnel are assigned to guard duty for each ship while it is at the dock. Meals must be furnished for these guards in the Officers' Messroom.

Visitors: All visitors to vessels are prohibited, without written permission of the Port Authorities. Dock Master, Petroleum Inspectors, Dispatchers and Terminal employees handling hoses may board ship in performance of their duties.
Charts: Not available at El Chaure.

AGENCY: All incoming vessels must have a local Agent to render all services required for a prompt and efficient tanker turnaround and to cancel all vessel disbursements.

EL GUAMACHE: 10.52 N. 64.04 W. (See Plan)

SHIPMASTER'S REPORT: October 1978.

LOCATION: The Port of El Guamache is a developing port, located about 1,000 ft. Northward of Pta. Mangle on the Isla De Margarita (see B.A. Chart 230).
DOCUMENTS:
Clearance from Last Port.
Sealed envelope for Customs.
Visaed B/L and Sobordos.
Despatch from last Venezuelan port, if any.
6 Crew Lists.
Vaccination Certificates of Crew.
4 Stores Lists (Deck, Engine, Provisions, Bonded store).
4 Personal Effects Lists.
4 Arms and Ammunition Lists.
4 Passengers Lists.
4 Mail Lists.
PILOTAGE: Pilotage is compulsory. Pilot boards on arrival or at anchorage. Vessels arriving at the anchorage must keep engines on stand-by and wait for shifting or berthing instructions.
Note: As at other Venezuelan ports, vessels must fly the Venezuelan flag at masthead and lower gangway for boarding party – Agents, Customs Officers, Quarantine Officers, Immigration Officers, Pilot and representative of Port Captain, etc.
ANCHORAGE: On the Western side of the Pta. Mangle in Bahia Guamache, depth 8–11 fathoms.
RADIO: As a new developing port, no radio service at Margarita Island, all ETA wireless messages must be sent via ITT or YVG – 72, 48, and 24 hours prior to arrival

The port office is equipped with radio telephone installation, operating 0600-2000 hours, transmitting on VHF frequencies 156.8 MHz (Channel 16.) Vessels calling in Spanish language will be answered promptly; if calling in English will be answered by English speaking person when on duty.
TUGS: Not available.
BERTHING: Length 126 m. with 3 dolphins installed at each end with catwalk to dolphins. Depths of water, 36 ft. at LW and 42 ft. at HW.
STEVEDORES: Arranged by Agents, normal working hours 0700 – 2100, cargo discharged into warehouse.
MEDICAL: Available at Polamar City about 31 km. from the berth.
DENSITY: 1025
FRESH WATER: Not available.
FUEL: Not available.
REPAIRS: No repair facility available.
GANGWAY/DECK WATCHMAN: Necessary, normally engaged by Customs or Police.
OPENING/CLOSING HATCHES: Normally by crew.
AIRPORT: Distance about 15 km. from port. Connections to other cities.
TIME: Local time is GMT minus 4 hours.
HOLIDAYS: As other Venezuela ports.
PROVISIONS: Fresh and dry provisions supplied through ship chandlers from Polamar City and delivered on board.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of wine or spirit.
TELEPHONE: No telephone connection to vessel at present but provided inside warehouse and port office.
SHORE LEAVE: Shore leave permitted. Passes issued by representative of the "Direccion de Marina Mercante" on arrival. Shore passes to be collected prior to sailing and given to Agent.
DEVELOPMENTS: El Guamache has a development programme to construct new wharves Northward from present pier to accommodate 6 ocean-going vessels and expected to complete within 3 years.

All port facilities will be available. Margarita Island is the only free port in Venezuela. Tourism from the mainland and overseas is increasing day by day as Margarita Island has very good weather and beaches.

EL PALITO: 10.29 N. 68.07 W. (See Plan)

OPERATORS: Corpoven S.A.

LOCATION (of El Palito Terminal): The terminal facilities operated by Corpoven S.A. at the port of Puerto Cabello (Punta Chavez), are situated on the Venezuelan coast, 7 miles West of Puerto Cabello. The terminal has a 2,475 ft. pier, part causeway and part trestle, extending out from Punta Chavez along a shallow reef then angling into water 48 ft. deep. 2 tankers can tie up simultaneously at the berths.

WEATHER: Winds are normally from the N.E. with an average Beaufort Scale Force of 2-3. Average temperature about 85°F. The months of January, February and March have the roughest sea and swell, and vessels may not be able to dock due to the weather.

TIDE: The normal range of the tide is 1 ft.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send ETA 72 hours before arrival at El Palito Terminal and another 24 hours before arrival advising any change of ETA.
2. If a vessel originally cleared for another port (including some other Venezuelan port) is diverted at sea to El Palito, certain information must be received prior to arrival, to avoid heavy fine and/or delays.
3. Provided Terminal permission is obtained, segregated clean ballast may be pumped overside in the port. Ballast disposal facilities are restricted at El Palito Terminal.
4. The use of Venezuelan Government Pilots is compulsory for docking and undocking.
5. The Venezuelan flag should be displayed at the mast-head during daylight hours by vessels anchored and berthed in Venezuelan waters.
6. In addition to other clearance documents, 2 copies of an itemised list of articles in the ship's slop chest must be presented to the authorities on arrival.
7. The emergency fire signal is 5 long blasts on the vessel's whistle or siren. No other signal is to be given in case of emergency.
8. Rat guards must be in place on all mooring lines.

APPROACHES: The terminal pier is marked by the following lights: One occulting red light at the top of No. 1 (N.W.) fire fighting monitor tower, 80 ft. above sea level. Lat. 10° 29′ 51″ N., Long. 68° 07′ 13″ W., and one green light, flashing every 3 seconds at the top of No. 2 (S.E.) fire fighting monitor tower, 80 ft. above sea level, located 275 ft. S.E. of No. 1 fire fighting monitor tower. A group of 5 crude storage tanks, painted white, visible 20 miles on a clear day, are located 1.25 miles 200° from the head of the pier.

Three large chimneys from a power plant located about 3 miles West of the Terminal, are very conspicuous in the area. They are painted with broad red and white bands.

When approaching, Refinery installations are clearly visible. On clear nights, tanks, Refinery lights and flares provide best landmarks.

White flashing lights are installed at the top of Refinery chimneys and towers for air traffic warning purposes, for the local airport in Puerto Cabello.

Masters approaching the coast should keep a sharp lookout for fishing boats, nets and small crafts.

DOCUMENTS:

A. Admeasurement Certificates. All vessels calling at Venezuelan ports for the first time must be measured for tonnage by the Captain of the Port. It is the usual practice to take the Ship's Panama Canal or Suez Canal Certificate, which is used as a basis of recalculating the tonnage under the Venezuelan Regulations and is returned before sailing. The Venezuelan Admeasurement Certificate is forwarded to the owners at a later date. A fee is charged for the Certificate which is payable only on the vessel's first call. Vessels registered in the following countries are excluded from the above regulations: Denmark, France, Germany (F.R.), Ireland, Netherlands, Norway, Portugal, Sweden, United Kingdom and U.S.A.

B. Inward Clearance is effected on board immediately after docking by Government Port Officials and a representative of the Marine Department. It is necessary that the following documents be ready on arrival:

Clearance from Last Port (1 copy).
Ballast Manifest from last port (1 copy).
Crew List (9 copies).
Passenger and Baggage Lists (7 copies).
List of Personal Effects (5 copies).
Stores List (3 copies).
List of Slop Chest (3 copies).
Sailing Permit (issued by maritime authority of last port).

Vessels arriving with cargo to discharge, will also require:

Manifest (Sobordo), 1 original and 2 copies from each loading port.
Bills of Lading, 1 original and 5 copies from each loading port.
Tally books; 6 from each loading port.
Commercial invoices: 3 from each loading port.

Vessels originally cleared for another port, and diverted at sea to El Palito, should radio Corpoven Puerto Cabello the following information as soon as the change of sailing orders are received:

Advise diverted.
Name and class of vessel.
Number of crew.
Flag of vessel.
Last port of call.
Port from which originally cleared.
Estimated time of arrival at Pilot station.
Type and amount of cargo vessel will load.
Time required to discharge ballast.
Master's name in full as signature (John Jones, Master).

This information is required in order to make in advance special arrangements for inward clearance to avoid payment of fines.

Outward Clearance and cargo documents are delivered on board by the Marine Dispatcher. However, in order to obtain the sailing permit, a special form which is delivered on board on arrival must be completed, not later than 2 hours before sailing time. This form gives cargo and freeboard information required by the Captain of the Port. In addition, one of the 9 copies of the Crew List specified above, corrected to show any changes made while in port, should be attached to the form.

PILOTAGE: Service available 24 hours. The Pilot's normal working hours are from 0600 hrs. to 1800 hrs. There are no special charges for their assistance during those hours on workdays. On Sundays and holidays they charge overtime. There is also a charge when ship has anchored in the bay as according to the pilotage law each movement (and entering the bay is one movement) requires a Pilot. By special agreement only Pilot's overtime will be charged for anchorage, as anchorage and docking is considered as one movement with respect to Government Pilotage Fee.

Pilotage is a compulsory government service. The government charges the Pilot's assistance according to ship's net tonnage. Vessels under flags of Panama and Liberia are required to have their Venezuelan Tonnage Certificate. The government charges for docking and sailing.

Pilots are employees of the Venezuelan Government and pilotage is compulsory for vessels entering or leaving the harbour. The terminal will arrange for Pilots to board all vessels as necessary. Pilots meet the vessel via launch provided by the terminal. The Pilot may decline to moor the vessel if it is not equipped with satisfactory mooring equipment, lines, gear, etc., or if it is not sufficiently ballasted. It is the responsibility of the Master to notify the Pilot of any special conditions or peculiarities, such as defective navigation equipment, mooring lines, tackle, gear or lack of necessary equipment, which might impose hazards in connection with the handling, mooring, discharging or loading of vessels.

At the berths, vessels must be moored to the entire satisfaction of the Pilot and the Terminal Operators' Mooring Master.

The Pilot acts in an advisory capacity. The Master retains responsibility for the vessel at all times. In the event it becomes necessary to disregard the Pilot's advice in order to ensure the safety of the vessel, the Master must forward a full written report of the circumstances through the terminal for delivery to the Captain of the Port.

ANCHORAGE: Notice of Readiness can be tendered at anchorage. The suggested anchorage for El Palito Terminal is located 0.5 to 1 mile North or West of the seaward end of the pier. The area to the East of the pier is not recommended as an anchorage.

RESTRICTIONS: None. Vessels enter day or night and at any state of tide.

MAX. SIZE: The loading facilities consist of 2 berths. Terminal restrictions and safe drafts are as follows:

	Max. Draft	
	Arrival	*Sailing*
Berth No. 1 (West) (starboard side alongside)	40 ft.	40 ft.
Berth No. 2 (East) (port side alongside)	33 ft.	38 ft.
Maximum displacement	65,000 tonnes	
Maximum LOA	750 ft. (228 m.)	
Minimum LOA	328 ft. (100 m.)	

No limitation is placed on tankers beam.

BALLAST: Due to the exposed location of the oil piers, vessels are required to be ballasted to the following minimum drafts for safe manoeuvring to and from the berths:

Overall Length of Vessel	*Minimum Draft Required*
400 ft. – 480 ft.	Forward 9 ft., Aft 17 ft.
481 ft. – 700 ft.	Forward 12 ft., Aft 20 ft.
701 ft. – 730 ft.	Forward 14 ft., Aft 23 ft.

A total capacity of 25,000 barrel tank and a 20 in. ballast line are available to receive all ballast.

Vessels with separate ballast tanks, lines and pumps may discharge ballast overside. Ballast for entering the harbour should be carried in the minimum number of tanks, and all other tanks stripped dry so as to minimise the time required for discharging ballast alongside berths.

All ships in ballast from abroad are charged for Consular Ballast Certificate.

HEALTH: No Radio Pratique. Health Officers board vessel at berth.

RADIO: Puerto Cabello, Venezuela, Coastal Station call sign YVL, makes radio contact with all vessels "CQ" on 8722 kHz at the following hours: 1130, 1330, 1530, 1830, 2130, 0030, 0200 GMT. Also "CQ" on 17141 kHz at 1630 GMT and "CQ" on 4322 kHz at 0430 and 0630 GMT.

VHF: Master should call El Palito Marine Terminal 3 hours before arrival on Channel 16.

TUGS: Use of tugs compulsory. Usually 2 tugs, from 1,800 h.p. to 2,800 h.p. approximately, assist during docking and undocking.

The terminal will arrange for tugs, which are stationed at Puerto Cabello. Service requested 1 hour prior to manoeuvre.

BERTHING: The use of both anchors is required for docking at both berths. It is considered prudent to have both anchors hove-out prior to entering the harbour in order to facilitate speedy release while mooring. The Terminal will advise whether the vessel is to be moored port or starboard side to the dock.

In the event the berth is required by another vessel, a vessel having completed loading may be required to vacate the berth promptly and proceed to anchorage to await cargo documents.

East Berth: Approach at very dead slow speed along a line parallel to a line formed by the East and the West berth at a distance from it equal to the distance of the North buoy. Drop the starboard anchor at the point of intersection of the ship's fore with a line formed by the two East shore range markers. Continue along same path at very dead slow speed until reaching with the ship's fore the East berth. Drop the port anchor. Allow the ship to drift into position alongside berth. This will be done by tying mooring lines as required by Pilot and with the help of the ship's engines and tugs under Pilot's instructions.

West Berth: Approach at very dead slow speed along a line parallel to a line formed by the East and West berths and at a distance from it equal to the distance of the North buoy. Drop the port anchor at the point of intersection of the ship's fore with a line formed by the two West shore range markers. Continue along same path at very dead slow speed until reaching with the ship's fore the West berth. Drop the starboard anchor. Allow the ship to drift into position alongside berth. This will be done by tying mooring lines as required by the Pilot and with the help of the ship's engines and tugs under Pilot's instructions.

General: Chicksan loading arms with 12 in. connections, 2 for Fuel oil, 1 for diesel products, 1 for leaded and 1 for unleaded gasolines. All dirty ballast to be pumped ashore through the fuel oil loading arms.

LOADING:

Cargo: On completion of Inward Clearance, information regarding the number of hoses and loading rate will be given to the Master and Chief Officer. During ballast discharge supplementary information will be given to the Chief Officer. A 15 minute standby is required prior to finishing any grade.

Contamination of Crude: It has been established that one of the major causes of contamination of crude oil is the small amount of salt water remaining in the ship's tanks, pumps and ballast lines after discharging ballast. This small amount of salt water frequently results in costly damage and downtime to refining equipment and also presents many other problems. Therefore all tanks and lines must be pumped as dry as possible.

Draining of Arms: Arms are drained by gravity on all products and crude. Ship personnel must co-operate with terminal personnel in this operation to ensure complete draining of arms into ship tanks and adequate drip cans must be placed to catch the remaining oil in line. Sand or equivalent must be on standby to clean up any oil leaks.

Loading Rates:

Commodity	*Available at Berths* No.	*Line Size* (in.)	*Estimated Rate* bbls./hr.	*Line Displac.* (bbls.)	*Arms* *No. 1* (in.)	*No. 2* (in.)
Crude Oil	1-2	24	20,000	6,000	2×12	2×12
Fuel Oil	1-2	24	17,000	2,500	2×12	2×12
Diesel-Kerosene	1-2	16	8,000	1,200	1×12	1×12
Gasoline, Unleaded	1-2	16	8,000	1,300	1×12	1×12
Gasoline, Leaded	1-2	16	7,000	1,300	1×12	1×12
Gasoline, Leaded	1-2	8	2,000	350	1×12	1×12
Lube Oil (Disch.)	1-2	8	1,500	240	1×12	1×12
Fuel Oil (Bunkers)	1-2	8	2,000	300	1×12	1×12
Ballast (Disch.)	1-2	20	10,000	2,000	2×12	2×12
Isobutane (Disch.)	1-2	12	4,000	2,000	1×10	1×10
T.E.L.-CB (Disch.)	2	4	70 tons	27 tons	Ship's Hose	

Loading rates will be reduced by the terminal when topping off tanks at the vessel's request.

Scuppers: Loading will not be started till all deck scuppers are properly sealed to the satisfaction of the terminal.

Simultaneous Deballasting and Loading: Vessels equipped with separate and completely segregated ballast tanks, and lines and pumps never used for oil may be permitted to discharge ballast and load simultaneously providing approval has been obtained from the Terminal.

MEDICAL: Medical treatment and hospitalisation, if required, are available at the Seguros Sociales in Puerto Cabello. Several dentists are located in Puerto Cabello. Authorisation for any medical and/or dental treatment must be made by the Master. Transportation is available at the Terminal Office. If the patient does not speak Spanish an interpreter should accompany him.

FRESH WATER: Not available.

FUEL: Bunkers are available only for vessels loading cargo. Disputes as to quantity should be registered by signing the bunker receipt under protest and noting the ship's quantities thereon.

CUSTOMS: While the vessel is in port, Venezuelan National Guard officials are assigned on board to ensure compliance with Customs regulations. The law requires that meals be supplied to these officials during regular meal hours.

Venezuelan laws are strict in regard to contraband and Masters are requested to instruct their crews not to take cigarettes or other articles ashore.

Cigarettes in cartons, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel), should be collected prior to arrival in port, listed with the items in the slop chest and placed in the custody of the Master for deposit in the slop chest which will be sealed for the duration of the vessel's stay in port.

CONSULS: French, Norwegian, Danish, Italian and Panama Consulates are represented in Puerto Cabello. There is no American Consulate. It is necessary for Masters of Panamanian flag vessels to visit the Panamanian Consulate at Puerto Cabello to present documents and receive dispatch as required by law. Regular office hours are from 0800 to 1200 hrs. and from 1400 to 1700 hrs. Mondays through Fridays; any dispatch issued outside of regular office hours is billed at double fees. Agent will arrange transportation to Puerto Cabello upon request.

REPAIRS: Facilities available. Advise Agent in advance of requirements.

REPATRIATION: The documents and personal effects of seamen left ashore for hospitalisation, repatriation or other reason, must be delivered to the Terminal Office before sailing. A letter from the Master is required advising the maximum amount of advances to the seaman and any other instructions concerning his repatriation. All expenses incurred by the seaman, including the cost of repatriation, are for the vessel's account. Venezuelan law at all times holds the Master, Agent or Owner responsible for any seaman left behind in Venezuela.

AIRPORT: Distant about 4 miles.

TIME: Local time is about GMT minus 4 hours.

SHORE LEAVE: Shore leave is permitted and a representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing and given to the National Guard watchmen on board or the Agent.

Vessels are not permitted to sail until all crew members are on board, or special permission has been obtained to sail without a crew member.

REGULATIONS:

Engines: No engine repairs will be made while the ship is in dock. Engines are to be kept at standby at all times while the ship is in port.

Rat-guards: Vessels must use rat-guards on all mooring lines.

Visitors: All visitors to vessels are prohibited, without written permission in each case by the Terminal Authorities (Terminal Supervisor or his Assistants). Mooring Master, petroleum inspectors, dispatchers, and terminal employees may board ship in performance of their duties.

Pollution: The laws of Venezuela are very strict in regard to the pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast or oil is to be pumped or allowed to escape over the side. No engine-room or pump-room bilges may be pumped overboard. All pump-room sea suctions and overboard discharge valves must be secured prior to loading or discharging cargo. Loading must be conducted with the utmost care and vigilance so that errors or delays may not result in spills. All deck scuppers must be plugged tight before loading so that in the event of a spill pollution of the harbour may not result.

Garbage: No garbage is to be thrown over the side while the vessel is in port.

Passengers: Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include this information in his ETA.

Firearms: Firearms on board any merchant vessel calling at Venezuelan ports must not exceed one per officer, nor can the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be noted on the Store List. Officers must not carry firearms while the vessel is in Venezuelan waters and these side-arms and ammunition should be collected and held in the Master's safe custody.

GENERAL:

Bonded Stores: No cigarettes or bonded stores are available at El Palito.

Cash Advances: Cash advances are available in Venezuelan Bolivares only and should be included in the vessel's radio ETA, to permit delivery on board on arrival.

Charts: No charts or sailing directions are available at El Palito.

U.S.S. Club: There is no U.S.S. Club available at El Palito or film exchange service.

Inspection of Cargoes: According to prior arrangements between Owners/Charterers/Suppliers.

Laundry: Laundry facilities are available at El Palito.

Lubricating Oil: Certain types of Corpoven lube oils only are available. Requirements should be sent by radio with ETA to Agent.

Mail: Mail service posted from El Palito has been found to be fair.

Provisions: Provisions are available at El Palito.

Radio and Radar: Arrangements to be made with port Agents prior to arrival.

Gangways: Gangways are provided by El Palito Terminal.

SHIPMASTER'S REPORT: July 1988.

Two tugs are used for berthing, one astern on tug's line and the other to illuminate the forward buoy and push as required.

The aft buoy line is the first line sent away and is used to check the vessel's swing into the berth.

There is a constant swell running, and positioning vessel in the berth is very long and drawn out as the loading arms are restricted in vertical and horizontal movement.

The swell causes the ship to move out of position, all moorings need to be adjusted simultaneously and with the small numbers onboard this was very difficult.

Leaving the berth was fairly straightforward, with one tug on aft main deck to pull vessel off while recovering anchors.

Chart B.A. 1966 leaves a lot to be desired for approaching a port. El Palito Terminal can be identified by 3 towers, each with a high intensity light near the top and a flare. There is a mass of background lights and the navigational lights are completely obscured. Coming from the North, these lights are visible at 20 miles and with the flare make the pattern, light, flare, light, light from port to starboard. The berth is situated right below these lights.

The radar picture shows 2 similarly shaped jetties, so the lights are a good guide to the correct berth.

AUTHORITY: Corpoven, S.A., – Refineria El Palito, P.O.Box 102, Puerto Cabello 2023A, Edo Carabobo, Venezuela. *Tel:* (041) 422627, 421110, 421005, (042) 3111/3115. *Telex:* 28013, 23571. *FAX:* Ext. 44381. *Cables:* Corpoven-El Palito. *Contact:* Jose Perozo Carrillo, Terminal Supervisor.

GUANTA: 10.15 N. 64.35 W. (See Plan)

SHIPMASTER'S REPORT: 1978.

LOCATION: Lat. 10° 15′ N., Long. 64° 35.5′ W. About 5 miles East of Puerto La Cruz.

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists (or negative).
6 Ship's Stores Lists.
6 Crew Personal Effects Lists (well detailed).
1 Declaration of Health.
Clearance from Last Port.
Cargo Manifests.
Full set of Manifests and B/Ls.

Entry Formalities: Normally carried out after docking unless there are no berths available; then vessel can be cleared at anchorage in Bahia Pozuelos, during daytime. At night only in case of emergency.

Accommodation ladder must be rigged.

Hours of entry: From 0700 – 1100 hrs. and from 1300 – 1700 hrs. Overtime outside these hours.

APPROACHES/PILOTAGE: A vessel bound for Guanta has to enter Bahia Pozuelos as she must first call at Puerto La Cruz to embark a Pilot. The anchorage area for waiting berth turn is also in Bahia Pozuelos. This anchorage is in depths of 48 ft. to 80 ft. and is well protected from swell by surrounding islands. No size limitation.

Bahia Pozuelos is the anchorage and Pilot embarking area for 3 ports: Puerto La Cruz, Guanta and Pertigalete.

The use of Government Pilot is compulsory for all vessels docking or undocking. ETA: 48 and 24 hours in advance via the vessel's Agent.

Pilot boarding hours: From 0530 – 1700 hrs. every day. Vessel cannot dock after sunset. Sailing may be arranged at any time.

HEALTH: All vessels boarded by Port Doctor. No automatic Pratique.

RADIO: Curacao Radio PJC. No local station.

VHF: All Agencies maintain radio watch on Channel 16 during office hours. Tugs and launches also equipped with VHF (call: "Ramrey").

TUGS: 3 tugs available: 1×1,700 h.p. and 2×1,200 h.p. All privately owned. Sometimes vessels bound for Guanta or Pertigalete have to wait for 2 or 3 hours as these private tugs have contracts with oil companies in Puerto La Cruz and are available only when no tanker is docking or undocking. Tug's lines used. Normally tugs join the vessel inside Guanta Bay.

BERTHING/MAX. SIZE: One concrete pier on piles, 763 ft. in length where vessels normally dock starboard side to. The apron is 20 ft. wide in centre, 42 ft. at ends.

One modern concrete pier on piles, 1,056 ft. in length where vessels normally dock port side to. The apron is 115 ft. wide in centre and 85 ft. at ends. The piers are well fendered with rubber hoses and used tyres.

Height of piers above HW: 10 ft. Mean tidal range: 1 ft. 6 in. Max. draft alongside small pier: 23 ft. 08 in. Minimum draft alongside long pier: 26 ft. 08 in. Depths varies from a minimum of 27 ft. to a max. of 34 ft. at the Western end of the long pier.

CARGO HANDLING FACILITIES: All cargo normally discharged by vessel's own gear, directly on to truck or trolleys. The piers are not connected to the railroad. No floating crane.

The following mobile cranes are available in the port area: 1 crane max. 120 tons; 1 crane max. 30 tons, with telescopic extension boom, max. 60 ft.; 2 small cranes max. 6 tons with a boom length of 30 ft.

Forklifts: 15 forklifts capacity 3.5 tons; weight 5.2 tons with fixed counterweight. To use these forklifts on board, the hoisting gear should lift over 6 tons.

2 forklifts capacity 5 tons, weight 12 tons; 1 forklift capacity 20 tons, weight 25 tons, specially for containers.

Flatbed trolleys: 30 trolleys capacity 8 tons; 1 trolley capacity 70 tons.

No lighters available.

All discharging gear normally supplied by Agency. For heavy lifts, it is recommended to have special slings on board.

BULK CARGO FACILITIES: On the Eastern side of the Guanta Bay, there is a berth for loading coal by means of a fixed chute. Depth alongside 30 ft.

Grain Cargo: Receivers supply suction machines. There are 2 machines available, capacity 1,000 tons per machine during 24 hours. Grain vessels work round the clock.

Liquid Cargo: Sometimes tallow and liquefied gas are handled. Discharged by vessel's pump into tank trucks. Hoses normally supplied by vessel.

CONTAINER HANDLING FACILITIES: No container berth. No crane. 1 forklift capacity 20 tons. There is a small container stacking area.

STEVEDORES: Normal working hours: 0700 – 1100 hrs. 1300 – 1700 hrs. (Monday to Friday); 0700 – 1100 hrs. (Saturdays).

Overtime: Monday to Friday, 1800 – 2300 hrs. (night shift); Saturday, 1300 – 1700 hrs.

Normally port does not work after 1700 hrs. on Saturdays or Sundays.

Ordering of gangs: For 0700 hrs. requested previous day before 1500 hrs. For 0900 hrs. requested same day at 0700 hrs.

Overtime rates: 50% for the night shift (Monday to Friday); 100% for Saturday afternoon shift.

The gangs consist of 12 longshoremen and 12 stevedores, including 2 winchmen, 1 signalman and 1 checker.

Capable supervision only available from Agency.

Rigging or cleaning gangs are available.

MEDICAL: Private hospitals at Puerto La Cruz. Private doctors generally do not visit ships. If medical attention is required on board, the Port Doctor will attend patient, unless he authorises another doctor to make the visit.

In case of emergency, when the vessel is anchored in Bahia Pozuelos, a launch can be arranged to pick up the sick crew member.

DENSITY: Salt water all the year round.

FRESH WATER: Available at 5 Bolivares per ton at the main pier only. Hoses supplied by ship. Rate: about 5 t.p.h.

Presently there is no water available at Berth No. 3 (Western end of pier).

FUEL: No Bunker "C".

Diesel: Delivered by trucks; arrangement must be made at least 24 hours in advance.

Gas Oil: Delivered by trucks under previous arrangement.

GARBAGE DISPOSAL: No facilities.

CONSULS: See "Puerto La Cruz".

REPAIRS: Only minor engine or electric motors can be repaired.

DRY DOCK: Not available.

SURVEYORS: None.

GANGWAY/DECK WATCHMEN: Not available. No shore gangway available.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 open bottle spirits.

REPATRIATION: Can be arranged. No special requirements.

AIRPORT: At Barcelona, about 15 miles by road. 3 flights daily to Caracas.

TIME: 4 hours slow of GMT, all the year round.

HOLIDAYS: New Year's Day, Holy Thursday, Good Friday, Holy Saturday, April 19th, May 1st, June 24th, July 5th, July 24th, October 12th, November 24th, Christmas. No labour available on these days.

TELEPHONES: No facilities at Guanta. Private calls can be made from the central office at Puerto La Cruz (5 miles) during the following hours: 0700–2100. Long distance calls dispatched quicker from the Hotel Melia at Puerto La Cruz.

SHORE LEAVE: From a ship anchored in Bahia Pozuelos: Allowed if the vessel has been cleared and if every crew member has shore pass. One private launch available but very expensive.

From Guanta berths: Allowed with shore passes.

IDENTIFICATION CARDS: Passes for shore leave are issued by officials of the Port Captain's Office, when boarding the vessel for clearance. These passes should be filled out on board. They are valid for the duration of the vessel's stay in port only and have to be returned before sailing.

In order to comply with Immigration Regulations, crew should be carefully checked before departure and any missing seaman reported to the Agent. The same applies to passengers in transit.

DELAYS: Presently, Guanta is somewhat congested and the waiting time varies from a few days to 15 days, especially during the rainy season.

GENERAL: Venezuelan regulations strictly prohibit the pumping overboard of dirty ballast or throwing garbage or dunnage in territorial waters. Heavy fines are imposed for pollution of waters and sometimes fishermen are quick to report any infringement.

Berthing Turn: On the basis "first come, first served" but Venezuelan vessels have some priority.

Supplies and Laundry: Several private firms based at Pto. La Cruz. Nearly all kinds of fresh provisions are available.

Laundry service available; may be completed in 8 to 10 hours.

General: Guanta is a natural harbour surrounded by mountains which protect the bay completely in bad weather. The port has never been closed for bad weather.

Venezuelan Flag: Upon arrival at Pozuelos Bay ship should display the flag from the foremast at all times. When anchored or docked, the flag should be displayed only between sunrise and sunset.

Warehouses and Cargo Sheds: No transit cargo shed. No refrigerated storage available.

There are 5 warehouses with a total floor space of 75,000 sq.ft.

Open Space: A total of 5.7 acres, mostly covered with asphalt or concrete.

Weather: The rainy season starts in mid-May and ends in November or December. During the rainy season it is usually calm in the early hours of the day followed before mid-day by light Westerly or variable breezes. In the afternoon the breezes change to North-Easterly at about 12 knots until midnight. During the dry season the cycle is similar but the North-Easterly wind may reach 25 knots. This can prevent all communications between anchored vessels and the shore.

AUTHORITY: "INP" Instituto Nacional de Puertos.

SHIPMASTER'S REPORT: 1975.

LOCATION: Lat. 10° 14.7′ N., Long. 64° 35.5′ W.

Guanta is located in the Bay of Guanta. It is a well protected port against currents and winds.

The port is entered between 2 well lighted islets.

DOCUMENTS:

Maritime Declaration of Health (together with inoculation list of crew).
10 Passenger – (or non-passenger) Lists.
10 Transit passenger – (or non-transit passenger) Lists.
10 Crew Lists.
4 Personal Effects Lists. (new clothes, etc., to be mentioned).
4 Ship's Stores Manifests.
Clearance from Last Port.

PILOTAGE: Government pilotage is compulsory. Pilot is embarked and disembarked near the Sea Buoy of Puerto La Cruz, in position: Lat. 10° 15.5′ N., Long. 64° 41′ W.

ANCHORAGE: On the Pto. La Cruz Roads.

RESTRICTIONS: Entering: In daylight hours only: 0600 – 1800 hrs.

Sailing: Day and night.

TUGS: One powerful tug available, compulsory to use when ship's length more than 90 m.

BERTHING: New Pier: Length 322 m. Old Pier: Length 233 m.

Water Depth: According to Pilots information: Old Pier: 29 ft. New Pier: 34 ft.

STEVEDORES: *Working Times:* Monday to Friday: 0700 – 1100 hrs., 1300 – 1700 hrs., 1800 – 2300 hrs. Saturday: 0700 – 1100 hrs., 1300 – 1700 hrs. Sunday: No work is done.

Gangs have to be ordered by 1500 hrs. the day before required.

FRESH WATER: Ships can replenish their fresh water tanks without charge (Included in port charges). Own hoses to be used.

OPENING/CLOSING HATCHES: Opening/Closing hatches, setting derricks: Special Rigger gangs take care of this. It is absolutely forbidden for ship's crew to touch these kind of jobs.

GENERAL: *Waste Water:* Special care should be taken to prevent waste water, from sanitary or engine-room systems fouling the jetty. Heavy fines are made in case this happens and a special shore gang might be ordered to clean same.

Customs: 2 Customs Officers have to be provided with food.

OPERATORS: Servicio Portuario de Guanta.

GUARANAO: 11.40 N. 70.13 W.

SHIPMASTER'S REPORT: January 1983.

LOCATION: The port of Guaranao is located on the Gulf of Venezuela on S.W. coast of the Peninsula de Paraguana, Venezuela. It lies between Amuay Bay to the North and Punta Cardon to the South.
DOCUMENTS: Inward Clearance is effected on board immediately after docking by Government Port Officials and a representative of the Marine Department.

The following documents must be ready on arrival:

Clearance from Last Port.
Crew Lists (7 copies).
Passenger Lists if any (5 visaed copies).
Baggage Lists if any (3 visaed copies).
List of Personal Effects (4 copies).
Stores Lists (2 copies).
Sailing Permit (Zarpe).

PILOTAGE: Compulsory. Vessels have to wait for Pilot about 0.5 miles offshore at anchorage. Ship's can make contact with pilot station by VHF on Channel 16 or 12.

Also see Punta Cardon (Pilotage – Shipmaster's Report dated January 1989).

ANCHORAGE: Generally ships must anchor about 0.5 miles offshore to wait for Pilot. Good anchorage is obtained in depths of 28 ft. (8.5 m.), muddy bottom and depths of less than 18 ft. (5.5 m.) extend up to about 0.25 miles offshore in this bay, and depths of less than 36 ft. (11 m.) extend about 7 cables NNW from Punta Zarobon (Guaranao).
APPROACHES: Masters when approaching the coast should keep a sharp lookout for fishing boats, nets, small craft or sunken wrecks. From Punta Zarobon the coast, which is bordered by cliffs from 85 ft. to 65 ft. (25.9 m. to 19.8 m.) high, trends about 2 miles SSW to Punta Gorda.
RADIO: Arrival notices and radio messages to and from ships at sea are usually transmitted through Curacao (PJC) and routed through Agent's head offices at Caracas, Venezuela. The port radio control is Las Piedras Paranagua.
TUGS: One tug is available to assist with berthing/unberthing.
BERTHING: A pier extends about 3 cables Westward from shore at Salinas, Guaranao, and the Southern half of this pier is for Ro-Ro vessels stern to. A floating pier about 1 cable distance South of and parallel to the former, extends Westward from shore about 810 ft. (247 m.) and is 164 ft. (50 m.) wide.
CARGO HANDLING FACILITIES: There are fork lift trucks of all sizes, 6 mobile cranes at the floating pier, and some towing vehicles.
MEDICAL: Services available.
FRESH WATER: Not available.
FUEL: Available if advance notice is given. Fuel/diesel oil and lubricating oil can be obtained from either Amuay Bay or Punta Cardon.
FIRE PRECAUTIONS: This port is used for discharging general cargo, especially waste paper and timber. Waste paper is considered as dangerous cargo, therefore Masters are called to pay attention to their fire-fighting equipment and to have it ready during discharging waste paper.
WATCHMEN: Not available.
SHORE LEAVE: Permitted, but shore passes must be carried and passes returned before the vessel sails.
GENERAL: *Stores:* Provisions, deck and engine stores available but not bonded stores.
Garbage Disposal: No facilities.
AUTHORITY: Las Piedras-Guaranao Port Captaincy, P.O. Box No. 2, Codigo Postal 4102-A, Edo. Falcon, Venezuela. *Tel:* (069) 451921. *Telex:* 54119. *Cables:* Capipuerto Las Piedras. *Contact:* Captain Oscar Ibarra Lavado, Harbour Master.

—SMR.

JOSE TERMINAL: 10.06 N. 64.51 W.

FLAG: Venezuelan flag must be displayed from the foremast when entering Pozuelos Bay and when manoeuvring or docking, regardless of the hour; however, while at anchor or while moored at berth, it needs to be displayed only between sunrise and sunset.
LOCATION: The Terminal of Jose is located West of Pozuelos Bay at: Lat. 10° 06′ 19″ N., Long. 64° 51′ 10″ W. on the N.E. coast of Venezuela. The usual hurricane path is several hundred miles to the North.

The lighthouse marking the entrance to Pozuelos Bay is located at: Lat. 10° 18′ 18″ N., Long. 64° 41′ 07″ W. Visibility is 20 miles.

DOCUMENTS: Arrival Clearance is effected on board vessel shortly after docking by Government Officials and a representative of the Company. The following documents are required and should be prepared prior to arrival.

Ship's Register.
Ballast Manifest (1 copy).
Crew List (6 copies).
Passenger and Baggage List, if any (5 copies).
List of Passengers in Transit, if any (5 copies).
List of Personal Effects (4 copies).
*Stores List (5 copies).
List of Slop Chests (4 copies).
Sailing Permit issued by Marine Authority at last port of call.

*Store List should indicate separately all deck, engine and cabin stores.
PILOTAGE: The use of Government pilots is compulsory for all vessels docking or undocking. This service will be arranged at all times. If it becomes mandatory for the Master of the vessel to disregard Pilot's order in order to ensure safety of the ship, a written report in Spanish shall be submitted promptly by the Master of the ship to the Government Port Captain.
APPROACHES: Puerto Jose is approached through a channel 150 m. wide, with a minimum depth of 13.6 m. There is a turning area 460 m. in diameter.
RESTRICTIONS: No restrictions are made on arrival/sailing time.
MAX. SIZE: The loading facilities consist of one Berth.
The docking characteristics are as follows:

Max. Deadweight	42,000 tons
Max. Ship Capacity	75,000 cu.m.
Min. Ship Capacity	11,000 cu.m.
Max. Draft	39 ft.
Max. LOA	800 ft.
Max. Lightship weight	22,000 tons

HEALTH: In theory the Government Port Doctor is to board each incoming vessel and board only outgoing vessels which carry passengers. In practice, however, the doctor boards at his discretion.
RADIO: Masters are requested to advise Corpoven Puerto La Cruz by radio 72 hours in advance of estimated arrival giving vessel's name, date and hour of arrival, bunkers, name of Master, port of departure, draft (arrival), Venezuelan gross tonnage, flag of ship and dates that ships' certificates expire. Vessels may contact the terminal of Puerto La Cruz by radio-telephone on 2182 kHz, SSB and VHF Channel 16. There is standby attention 24 hours a day. The terminal also has the frequencies 2080, 2120, 2638, 2738 and VHF Channels 6, 12, 13, 16, 17, 73 and 74.

Ship-to-shore radios are installed on the oil dock and on both tugs.

TUGS: There are 2 tugs at the port for mooring or unmooring and use is compulsory for all vessels. The tugs available are radio equipped and are 3,000 h.p. or more. Generally the Government Pilot will not begin manoeuvers until he is assured that the tugs are on stand-by.
BERTHING: *Arrival at Dock:* While alongside the berth the following rules must be observed:

(a) Master must ensure that mooring lines are properly tended, and that sufficient personnel are onboard at all times to handle lines. Loading will be temporarily suspended upon infringement of this regulation.

(b) Masters are requested to remove the blank flanges from their vessel's loading manifold before docking, so as to expedite the connecting of the shore loading arms by company personel. Vessels are requested to have their derrick and gangway ready for use.
NOTE: Vessels normally dock with starboard side to dock, unless advised otherwise.

(c) While docked, the discharge of sea water, hot water or steam on dockside of ship is prohibited. Hot water or steam may activate the automatic sprinkler system as well as damage piping located under the dock surface.

(d) Rat-guards must be placed on all ropes connected with the shore.

(e) Heavy exhaust smoke from vessel's funnel is not permitted. Any infringement of this rule will result in Government fine and/or removal of ship from dock.

(f) Meals must be provided in officer's messroom for Venezuelan National Guard personnel who may be assigned to the vessel during her stay in port.

(g) Masters are requested to display on top of mast a red flag in day-time and red light at night indicating that ship is handling dangerous cargo.

(h) Unregulated crafts should not be allowed to come alongside ship moored at Terminal without the permission of the Terminal Operator. It will be the responsibility of the ship's Master to ensure that this regulation is obeyed.

LOADING: *Products Handled:* Natural gas, propane, isobutane, normal butane and pentane.
Loading rates:

Propane	12,000 gallons p.m.
Butane	6,000 gallons p.m.
Gas/Pentane	4,150 gallons p.m.

Only one commodity handled at one time.

After the vessel has been cleared, the Company Dock Supervisor on watch will give the Master of the vessel written instructions with respect to the cargo.

During loading operations, company employees are on watch to administer to the needs of each vessel.

Upon termination of loading cargo, cargo lines are displaced at controlled rates prior to disconnecting.

Shortly after completion of loading, company personnel and an independent inspector, together with a vessel's officer, will take ship's ullages and later, deliver cargo and sailing papers to the Master of the vessel.

Ships must vacate berth upon completion of loading and await papers at anchorage in Pozuelos Bay.

For information regarding completion of loading, the dock supervisor can be contacted by telephone from telephone booth at berth.

BALLAST: There are no facilities for deballasting.
MEDICAL: All requests for medical or dental treatment must be accompanied by a written request from the Master to the vessel's Agent.
FRESH WATER: Not available locally.

Fresh chlorinated water is available in limited quantities at an average rate of approximately 2 tons per hour at the Puerto La Cruz Terminal.

FUEL: Bunkers are not available at this Terminal.

Bunker "C" and Heavy Diesel Fuel and a complete range of intermediate fuels are available in reasonable quantities at Puerto La Cruz Terminal, subject to safety and operational restrictions. Delivery rates to the ships are approximately as follows:

Bunker "C"	200 t.p.h.
Heavy Diesel	150 t.p.h.
Intermediate Fuels	100 t.p.h.

Meters are installed in all bunker systems and are calibrated in net barrels; except diesel meters which indicate gross barrels.

The dock valves on the bunker lines on the docks of Puerto La Cruz Terminal will only be opened and closed upon advice from the ship's personnel.

Lubricants and gasoil are available through the vessel's Agent.

USTOMS: Crew members should be warned against taking knives or her lethal weapons ashore, as this is strictly prohibited. All firearms nd ammunition must be noted on Stores List. They cannot exceed 1 er officer and 18 cartridges per gun. No arms may be carried while hip is in Venezuelan waters or tied up at dock. Contraband of any escription will be confiscated. Each man is allowed 1 package of garettes on his person and this package must be opened. No liquor s to be taken ashore. It is prohibited to carry liquor from shore to ship ithout authorisation from Master of vessel. It is further strictly prohibited o consume liquor in dock area.

It is normally forbidden to take photographic cameras ashore. owever, upon written request to the National Guard contingent on the al dock, special permission may be obtained. This is subject to 2 imitations: (1) that the camera is returned to the ship; (2) that no photographs are taken of the petroleum installations.

CONSULS: The following foreign countries have consular offices in the vicinity of Puerto La Cruz:

Belgium
Brazil
Colombia
Denmark
France
Great Britain
Italy
Netherlands
Norway
Spain
Sweden

Vessel's Agent should be appraised of vessel's consular requirements omptly upon docking.

URVEYORS: 1. Saybolt, Caleb Brett, Chas Martin, AIVEPET cargo spectors available at Puerto La Cruz.

2. Lloyd's Register, American Bureau, Bureau Veritas, P & I available t Puerto La Cruz or from Caracas via the ship's agent.

EPATRIATION: Seamen discharged from hospital for transfer to nother port, seamen arriving from another port or those being epatriated are handled by the vessel's Agent, who must comply with l Venezuelan Regulations.

In the case of seamen left ashore for any reason, Masters are equested to furnish a letter accepting responsibility for all expenses ncurred, advances if any, and instructions for repatriation. Venezuelan egulations, at all times hold the vessel responsible for a seaman during is stay in the country. Close contact is maintained by radio with ship owners regarding disposition of their seamen.

IME: GMT minus 4 hours all year round.

EMERGENCY CO-ORDINATION CENTRE: Seccion de Seguridad, Busqueda y Salvamento Maritimo. Telex: 31154. Tel: (02) 513395, 512156.

TELEPHONES: There is a telephone booth on dock. The supervisor on duty may be contacted at any time.

DENTITY CARDS: Passes for shore leave are issued by the officials of the "Capitania de Puerto", who board with the Customs Authorities upon the vessel's arrival at dock. These passes are valid for the duration of the vessel's stay in port and must be returned before sailing to the guard assigned to the vessel.

In order to comply with Immigration Regulations, crews should be carefully checked before sailing, and any missing seamen reported to the vessel's Agent.

Crew members left behind when the vessel sails will be held in custody until deported at the vessel's expense.

EGULATIONS: *Excessive Smoke:* It is absolutely prohibited to exhaust heavy smoke through a ship's funnel while tied up at the Company's dock. It is also prohibited to blow boiler tubes. Failure to comply with this regulation will result in any or all of the following actions:

1. The loading operation will be immediately shut down.
2. Vessel will be subject to fine.
3. Vessel may be removed from dock.
4. Ship's Agent will be advised of infractions of this regulation.
5. Fines, time lost, and other related expenses will be charged against the vessel.

Pollution: Venezuelan laws are very strict on this subject and local authorities quickly enforce existing statutes. For this reason each Master is handed a circular that emphasises the necessity of complying with federal and local laws and customs.

The spilling or discharge of dirty ballast, crude oil or petroleum products into coastal waters is defined as pollution, as is also the throwing overboard of garbage, trash or other unwanted objects while the vessel is at anchor or dockside. Prior to the start of loading operations all discharge valves, bilges and scuppers must be closed and strict vigilance exercised during deballasting and loading operations.

When a spill does occur, the Master, Government officials and a company representative evaluate the quantity and submit a report to the Government Petroleum Inspector. This report becomes the basis for a federal fine that is practically incontestable. An additional expense occurs when local authorities require assistance in cleaning beaches and shorelines after a major spill and can pinpoint the responsible vessel or source.

TONNAGE CERTIFICATE: Due to reciprocal agreements between Venezuela and the following countries, ships flying the flag of any of the below-named countries are exempted from Arqueo compliance and payment of fees: Denmark, Great Britain, France, Germany F.R., Netherlands, Norway, Portugal, Sweden, United States.

Ships bearing the flag of any other nation shall require a Venezuelan Arqueo Certificate. The cost of measuring is contingent on the size and tonnage of vessel. The certificate is usually issued after the ship sails from port. It is then sent to the marine department of the Owners of the vessel by airmail.

GENERAL: *Dockmaster's Office:* Loading and marine personnel offices of Corpoven S.A. are located at the entrance of the dock. Any matter concerning loading and/or bunkering, is handled through this office, which is open 24 hours every day.

The Documentation Section is located at the Puerto La Cruz Terminal. On the dock there is a telephone booth and the supervisor on duty can be contacted at any time.

Cash: The local currency is the "Bolivar". Foreign exchange may be secured from local banks. Local banks are open Monday to Friday 0830 – 1130 hrs. from 1400 – 1630 hrs. except holidays.

Ship's Requirements: All ship requirements such as chandlery supplies, mail, cash advances, medical attention, dental care, consular services, repair work, laundry service, bonded stores, transportation, etc., should be obtained through the vessel's Agent.

No charts or sailing books are available in the Terminal. These should be forwarded by airmail to the vessel's Agent for delivery to the ship.

Movement of Passengers: Inasmuch as the Company's Terminal is not a public port, only bona fide crew members and Corpoven employees are permitted to join or leave ship in Jose.

AGENCY: All incoming ships to lift cargoes at this Terminal must have a local Agent to render all services required for a prompt and efficient tanker turnaround and to cancel all ships disbursements during the port stay.

Corpoven as operator of the Terminal charges a fixed fee for General Services such as:

Complete documentation service.
Preparation of disbursement accounts for the Agent of Vessel.
Dispatch of vessel.
Control over marine units which service vessel.
Assistance and supervision in docking of vessel. Supervision over connecting of loading system and related cargo facilities.

Offices of Corpoven loading and marine personnel are located on the first floor of the building between Berths No. 1 and 2. Any matter concerning loading, bunkering, is handled through this office, which is open 24 hours every day. On the ground floor of this same building is the Documentation Section.

OPERATOR: Corpoven S.A. *FAX:* (081) 603099.

LA GUAIRA: 10.36 N. 66.56 W. (See Plan)

PORT LIMITS: Between the points 10° 37′ 40″ N., 66° 48′ 30″ W. and 10° 37′ 40″ N., 67° 07′ 07″ W. and the coast line.

DOCUMENTS:

Sealed envelopes for Customs.
Visaed B/L and Sobordos not in envelopes.
Despatch from last Venezuelan port, if any, or
Zarpe from last foreign port, if arriving directly from abroad.
Fumigation Certificate.
Bill of Health.
Vaccination Certificates of Crew.
4 Stores Lists (with arms and narcotics).
4 Lists of Personal Effects.
6 Crew Lists.
12 Lists of Passengers for La Guaira, or negative Passenger List.
8 Lists of Passengers in Transit.
2 Lists of Luggage (only for passenger luggage).
1 Master's Declaration.
1 List of Stowaways, if any.
8 Cargo Lists.

PILOTAGE: Compulsory and vessels have to wait for Pilot in the pilotage zone N.W. of the entrance. Ships can make contact with the pilot station by VHF Channel 16 or 12.

ANCHORAGES: Generally ships must anchor in the N.E. area of the entrance, the depth varies from 8 to 20 fathoms. The bottom is sand and occasionally rocks.

RESTRICTIONS: There are no restrictions imposed upon entry.

MAX. SIZE:

Berth	*Length* (m.)	*Depth* (m.)	*Remarks*
01-E	176	10.95	Roll-on/Roll-off
01-D	176	10.95	General Cargo
01-C	176	9.55	12 ton electrical cranes
01-B	176	8.55	12 ton electrical cranes
01-A	176	8.80	12 ton electrical cranes
01	155	9.15	12 ton electrical cranes
02	155	9.75	12 ton electrical cranes
03	160	9.45	Grain Berth
04	136	5.50	General Cargo
05	161	8.50	General Cargo
06	161	8.80	General Cargo
07	136	8.50	General Cargo
08	136	8.50	General Cargo
09	133	5.50	General Cargo
10	168	8.50	6 ton electrical cranes
11	144	8.80	6 ton electrical cranes
12	144	8.50	6 ton electrical cranes
13	144	9.45	6 ton electrical cranes
14	144	8.80	6 ton electrical cranes
15	168	8.80	6 ton electrical cranes
16	160	8.20	Passenger Berth
17	160	9.15	Passenger Berth
18	171	9.75	Passenger Berth
19	171	9.75	Passenger Berth
19-A	72	4.55	Passenger Berth
20	150	3.00	Fishing Berth
21	290	6.10	Warship Berth

HEALTH: Ships from Venezuelan ports obtain Free Pratique. Ships from abroad must send a cable to Health Authorities requesting Free Pratique, or advising illness.

RADIO: In order to enable Agents arrange for quick entry and berthing, Masters should give their ETA message at following intervals, via Curacao Radio (ITT): 72, 48 and 24 hours prior to arrival, indicating in the 48-hour message, the quantity of parcels (or tonnage if bulk cargo) per hatch. This is imperative for applying for the necessary personnel of the Instituto Nacional des Puertos (I.N.P.). Also, draft, passengers, requirements for bunkers, fresh water, provisions, repairs, medical assistance, etc. This telegram the Master to sign with his full name.

VHF: Communication with the Port Authorities and the pilot station are possible by VHF. Ship must make contact on Channel 16 and change after to some Channel between 1 and 70, Channel 12 is normally used for this manoeuvre.

TUGS: The use of tugboats within the port is compulsory, both for entering and leaving port, as well as for manoeuvres in the port area. Ships longer than 139 m. must be assisted by 2 tugboats.

Ship's lines are used in the manoeuvre. The Port of La Guaira has 2 tugboats of 1,800 h.p. each. Normally they join the vessel at the entrance of the port.

BERTHING: Normally a minimum of 24 ocean-going vessels can berth at one time. Berths No. 01-E, 01-D, 01-C, 01-B, 01-A, 01, 02 and 03 are along the Breakwater Pier East-West, parallel to the coast. At Piers No. 01-C, 01-B, 01-A, there are 12 electrical cranes of 12 tons. At Pier No. 03 ships discharge grain directly to a silo by 2 grain towers, average daily rate 2,000 tons. Silo capacity 12,000 tons.

Within the port is a finger pier, parallel to the Breakwater Pier, with 2 Customs warehouses alongside, with berths North and South, 2 each. The main pier is parallel to the coastline, East-West, with Berths No. 10, 11, 12, 13, 14 and 15,, along which piers there is ample Customs warehouse space, including outdoor space on the roofs as well as ample uncovered storage area. There are 15 × 6 ton electrical cranes at this pier.

The Passenger Terminal is on a finger pier, in direction North-East with its land end in the corner of Berth No. 15. There are 2 berths each side, namely Nos. 16 and 17 in the inner basin and Nos. 18 and 19 in the outer basin.

Passenger vessels have priority for berthing and they have to leave port within 24 hours.

BULK CARGO FACILITIES: Bulk carriers only discharge, at Piers 01-D, 01-C and 03. There are no facilities for cargo.

SPECIALISED CARGO HANDLING FACILITIES: The only berth specially equipped for Roll-on/Roll-off traffic is Pier 01-E but Pier Nos. 04, 09 and 16 are also used for this kind of cargo.

There is no fixed equipment for handling containers but the Instituto Nacional des Puertos has some mechanical equipment for handling containers.

This port does not have any other facilities for specialised cargo handling.

BRIDGES: There are no bridges.

STEVEDORES: Supplied exclusively by Instituto Nacional des Puertos at costs per weight of cargo in accordance with governmental decrees.

The Port Agent applies for the necessary number of gangs per ship. Each gang consists of 11 stevedoremen (estiba) and 11 longshoremen (caleta).

Switching of gangs from one hatch to another is not permitted.

There are no longshoremen costs for cargo handled during straight time, but only for that handled during overtime.

(a) *Straight time*
Monday – Friday 0700 – 1100 hrs.
1230 – 1630 hrs.
Saturday 0700 – 1200 hrs.

(b) *Overtime*
Monday – Friday 1800 – 2300 hrs.

(c) *Saturday afternoon* work is not permitted, but if a vessel could terminate operation and sail within a maximum of 3 additional working hours, a special permit would be granted by Customs and Port Authorities. In such a case, the additional working hours are considered as overtime.

(d) *Work on Sunday* is not permitted except for passenger vessels (officially those carrying 69 passengers, but exceptionally vessels with fewer passengers might occasionally obtain same consideration by authorities).

EQUIPMENT:

(a) *Electric Shore Cranes:* Berths 01-C to 01-A have 12 electrical cranes on rails of 12 tons capacity each. Berths 10 to 15 have 15 on rails of 6 tons capacity each. The Instituto Nacional des Puertos allow 2 × 12 tons cranes to lift pieces up to 20 tons or 9 tons weight. At Pier 10 the arms of the cranes reach the roofing of the warehouses.

Use of shore cranes is not compulsory, unless the Technical Board of the Instituto Nacional des Puertos rules to use them. Other piers have no shore cranes.

(b) *Diesel-Driven Rolling Cranes:* There are a considerable number of these cranes which can lift heavy pieces of about 17 tons.

(c) *Floating Cranes:* Not available.

(d) Special lumber carriers of about 20 tons capacity.

(e) Tow trucks, fork-lifts, trucks and trailers up to 10 tons capacity.

LOADING/DISCHARGING: Cargo is discharged on the pier, when free it is taken away by fork-lifts and/or other mechanical equipment supplied by Instituto Nacional des Puertos. The use of such equipment is included in the handling fee for weight.

There are 2 grain towers on Berth No. 3 leading via conveyor belts to storage silos of 12,000 tons capacity. Average daily discharge rate 2,000 tons approximately.

At Berths No. 10 to 15 discharge to the roof of the warehouse or on the pier is possible.

MEDICAL: There are several hospitals in the town and all the medical attention necessary. Should medical assistance be needed on board, contact the Agent.

DENSITY: The average density of water in the port is 1025.

FRESH WATER: Available through pipe-line on the pier, day or night, by water trucks of up to 10 tons capacity in day time only.

CONSULS: The following countries have consuls in La Guaira; Belgium, Germany F.R., Mexico, Norway, Panama and Sweden. The following countries have Vice-consulates; Denmark, Italy, Portugal and Spain.

REPAIRS: All kinds of deck and engine repairs are possible.

DRY DOCKS: There are no dry docks in this port. (The nearest is at Puerto Cabello).

SURVEYORS: All Classification Societies and P&I Clubs are represented in the port.

GANGWAY/DECK WATCHMEN: The watchmen service is not necessary. It is recommended to use a seaman as watchman.

OPENING/CLOSING HATCHES: Not performed by the Instituto Nacional de Puertos but by either the ship's crew, or the assistance labour of the Agent.

REPATRIATION: There are all kinds of facilities for making crew changes and arranging any necessary repatriation.

AIRPORT: The distance to the International Airport at Maiquetia is 10 km., this is served by different regular airlines.

TIME: GMT minus 4 hours. No change.

HOLIDAYS: January 1st, (New Year); February 18th/19th, (Carnival); April 3rd/4th (Easter); April 19th, (Independence Day); May 1st, (Labour Day); June 24th, (Carabobo Battle); July 5th, (Independence Day Declaration); July 24th, (Simon Bolivar's Birthday); September 4th, (Public Funcionary Day); October 12th, (America Discovery); December 25th, (Christmas).

POLICE/AMBULANCE/FIRE: *Police:* 26148, 26347 and 27098. *Ambulance:* 22165. *Fire:* 22165 and 22587.

TELEPHONES: It is not possible to place telephones on board, however calls can be made in the "CANTV" office.

SERVICES: There are no special services available. Radar repairs possible.

SHORE LEAVE: Crew members can go ashore with shore passes issued by the Port Authorities.

IDENTIFICATION: Shore passes are sufficient to go ashore.

REGULATIONS: *Dangerous Goods:*

1. Dangerous goods should be discharged directly to trucks.
2. When goods are grain or powder in bags, these should not exceed 50 kg.
3. Cargo with damaged packing will not be discharged and it should be repacked on board.
4. Cargo should be duly identified and with their dangerous goods labels.
5. Cleaning of the piers after loading or unloading should be done by the importer or exporter, otherwise they should cover the expenses if the INP has to do this cleaning.

OFFICIALS: Once the vessel is anchored at La Guaira, Representatives of Customs, Port Captain, National Guard, Health Service, Immigration and Agency board the vessel.

DEVELOPMENTS: Increase in draft to 35 ft. expected.

AUTHORITY: Harbour Master, Capitania de Puerto, Terminal de Pasajeros de La Guaira.

ZULIA ZONE

Depth Bulletin No. BP – 6-78 Dated: 13-06-78

The following data represents the latest information reported and refer to the date shown for each section of the channel. Depths are expressed in metres and are related to the same level of the local Navigation Charts 1001, 1002, 1003 and 1004 of the M.M.M. Mean Monthly Lowest Low Water.

The controlling depths refer to the centre area of the channel demarked by parallel lines on either side at a distance of 60 m. in the outer channel and 45 m. in the rest of the channel. The Puerto Miranda Channel is of 30 m. The theoretical position of the buoys in the aforementioned navigation charts are located at a distance of 30 m. from the edge of the channel.

Main Channel

Channel	From	To	Date	Depth (m.)	Remarks
Outer Section	B – 1	B – 28	19-05-78	12.8	
Inner Section	B – 28	T – 56	10-05-78	12.8	
SOUTH PROLONGATION	T – 56	B – 59	28-04-78	12.8	Entrance to Puerto Miranda (B – 59)
	B – 59	B – 66	26-04-78	12.8	Entrance to La Estacada (B – 66)
	B – 66	B – 76	10-03-78	12.8	Entrance to the Port of Maracaibo
	B – 76	B – 86	24-05-78	13.1	Entrance to Bajo Grande (B – 86)
	B – 86	B – 96	07-02-78	13.1	Entrance to La Ensenada
	B – 96	Parallel 10° 22′ N	14-02-78	12.8	Entrance to La Salina Channel (B – 97 and 10° 22′ N)
	Parallel 10° 22′ N	M – 1	14-02-78	13.1	Entrance to Lake Main Channel (M – 1 and M – 1)
Puerto Miranda Channel		AP – 2	11-05-78	11.6

Zulia Zone

N.B. Certain information common to all Vessels entering Maracaibo Lake is given below. For specific details of ports/terminals within the Lake, see relative Section as indicated above).

FLAG: Local authorities require that the Venezuelan ensign be flown at vessel's masthead, from the time of entering the outer channel until clear of the outer channel outbound.

DOCUMENTS: *(a) Inward Clearance for Scheduled Vessels:* Vessels arriving in ballast or with cargo in transit require following documents:

1 copy Sailing Permit from Last Port.
2 copies Ballast Certificate.
4 copies Passenger Lists.
4 copies Baggage Lists.
4 copies List of Passengers in Transit.
4 copies List of Slop Chest.
4 copies List of Personal Effects.
4 copies Stores Lists.
5 copies Crew Lists.

Vessels arriving with cargo should have, in addition to the foregoing:

4 copies Sobordos (Venezuelan Inward Manifests).
6 copies Bills of Lading.
2 copies Inward Manifests.

(b) Inward Clearance for Diverted Vessels: Vessels diverted to Maracaibo Lake Ports to load cargo, should submit all documents indicated above, except consular mail, which they will not have.

Vessels diverted at sea to Maracaibo Lake Ports which do not have a Venezuelan clearance on board, must advise loading port via radio to arrival, the name of vessel, Master's name, vessel's flag, Venezuelan net tonnage (if available, if not, the registered net tonnage), last port of call, destination port for which originally cleared, ETA San Carlos Pilot station and grade and quantity of cargo to be lifted. This information is required in order that Inward Clearance may be arranged with government officials in ample time prior to vessel's arrival. Also 3 copies of the Diversion Telegram received by vessel and signed by Master, together with copies of those documents listed under *(a)* should be presented to the Port Authorities upon arrival at Maracaibo. In the absence of this information, or of presentation of each of these documents to the Port Authorities the vessel will be subject to a fine. Please note, that the documents covered under *(a)* have to be presented upon arrival, regardless, if the vessel is not arriving with Consular Clearance or arriving after being diverted at sea.

(c) In Maracaibo 2 Clearances from Custom's authorities are needed: One for proceeding from Maracaibo to loading berth, and another after loading for proceeding from Maracaibo to destination. For this reason Custom Dispatch charges may be incurred twice.

(d) *American Crew List.* All non-American vessels loading for a U.S.A. port should have the American Crew List ready on arrival in Maracaibo to be visaed by the American Consulate in Maracaibo and placed aboard ship before departure. The crew list should be prepared on Immigration and Naturalization Service Form No. I. – 418 (Crew List Manifest) and should contain 2 sections:

Section 1 should list those crew members who are American or who possess individual visa documentation to the United States.

Section 2 should list, in the alphabetical order of their last names, those alien crew men who lack United States visa documentation and therefore require inclusion in the visa of the Crew List.

Only one name may be placed on each line of the Crew List. Two names should not be placed in the space of one line, nor should a full line between two names be left vacant. All copies of the Crew List presented must be legible. Occasionally the names of the crew men included on the carbon copies of some crew lists presented at the consulate are blurred beyond recognition.

The information requested under columns 1, 2 and 3 should be filled in completely. Column 1 should always contain the complete first name and middle initial of the crew man. Column 2 should show the nationality of each crew member and the number of his travel Document. Column 3 should always include the name of the port where the crew man was shipped, not simply the country.

At the time of vessel's first application for a Crew List, the Crew List must be presented in four copies: Original and 1 copy should contain only information requested under Columns 1, 2 and 3. 2 copies must include following information of those crew men to be included on Crew List Visa. Column 4 should list date, city and country of each crew man's birth. Column 5 should show place of issuance of Seaman's Travel Document and name of Government which issued travel document. (It is not necessary to list date of issuance of travel document).

Below is a sample line correctly entered on the Master Crew List.

(1)	(2)	(3)	(4)	(5)
Bello, Tomas E.	Z.23455 Venezuelan	Maracaibo Venezuela	December 8, 33 Caracas, Venez.	Cabimas, Venez

Upon subsequent Crew List applications by same vessel within same year, the Crew List need be presented in duplicate only, and the information in Columns 4 and 5 need be provided only concerning any new crew members who require visa documentation. When twelve months have elapsed since presentation of Original Crew List, a Crew List should again be prepared in 4 copies and should contain all the information required in columns 1 – 5. Such a Master Crew List is required after each 12 months' period.

APPROACHES: Also see "General" above. The channels leading to the Lake of Maracaibo are called the Outer Channel, the Inner Channel and the Lake Channel. The controlling depths of the Outer Channel, Inner Channel and the channel Southward to Buoys M1 and M2 are normally 45 ft. At certain times the controlling depth may be less. At such times suitable notices are published advising mariners of these temporary reductions of controlling depth.

Outer Channel. The Outer Channel starts at the E.M. Buoy in position 11° 13′ 47″ North and 71° 33′ 31″ West. The light characteristics of E.M. Buoy are: flashing white every 5 seconds, visibility approximately 5 miles. The distance from E.M. Buoy to the Southern end of the Outer Channel, marked by Buoys B – 27 and B – 28, is approximately 15.75 miles. The channel is 1,000 ft. wide and has a normal controlling depth of 42 ft. minimum monthly observed lowest water (MMOLW) with tidal range varying about 2 ft. 3 in. This depth is maintained by periodical dredging. Tankers are required to have a keel clearance of at least 2 ft. and dry-cargo vessels a keel clearance of at least 3 ft. Vessels navigating the channel at the maximum allowable draft are confined from 2 hours before to 2 hours after high water. There are no turns in the channel and the course is 189°.

There is a breakwater 0.5 mile East of, and parallel to, the Outer Channel and extending 1.6 miles Northward from the North side of Zapara Island. The end of this breakwater is marked with a skeleton steel tower with a light 27 ft. above sea-level. Light characteristics – flashing white light every 8 seconds; visibility about 3 miles.

On Zapara Island there is a skeleton iron tower with a height of 136 ft. above sea-level.

Cross currents are sometimes encountered near Zapara, San Carlos and Pescadero Islands, especially at low water when the cross currents are strong. Overtaking at these points should be avoided.

There is one anchorage zone in the Outer Channel which is a trapezoid on the port side when navigating inbound near the Buoys B – 14, B – 15, B – 16 and B – 18. All buoys in the Outer Channel are equipped with radar reflectors.

Caution: Masters are warned to keep adequate speed in the Outer Channel even when embarking the Pilot as strong cross currents are encountered near San Carlos and Zapara Island. Pilot boats are fast and fitted with a flying bridge.

Inner Channel. The Inner Channel continues on the same course as the Outer Channel for about 10 miles, whereafter the direction changes to 150°. Entire length of the Inner Channel is about 12 miles.

The beginning of the Inner Dredged Channel is marked by Buoys B – 29 and B – 30. Channel is marked by beacons, and terminates at beacons T – 55 and T – 56. The channel is 800 ft. wide and the normal controlling depth is 43 ft. MMOLW with tidal range varying from 1.5 ft. to 2.5 ft.

The channel from beacons T – 56 to Maracaibo Harbour is a dredged channel, the end of which is marked by Buoys No. B – 73 and B – 74.

About 0.2 mile South of Buoys B – 29 and B – 30, there are located 2 towers – 1 on each side of the channel, and about 1 mile further South are 2 more towers. These 4 towers are marked E – 31 and E – 32 (North) and E – 33 and E – 34 (South). Towers No. E – 31 and E – 32 are of single steel pipe construction on a concrete pile base. Towers No. E – 33 and E – 34 are of skeleton steel construction (former oil-well derricks) each mounted on 4 concrete piles. The characteristics of these towers are:

Tower No.	Height above LWS (ft.)	Light
E – 31	43	Green – Fl.
E – 32	43	Red – Fl.
E – 33	123	Green – Fl.
E – 34	128	Red – Fl.

Vessels are not allowed to overtake each other in the Inner Channel between Buoys B – 29 and B – 30 and Light Beacons T – 25 and T – 26. Vessels may overtake each other in the Inner Channel between Light Beacons T – 39 and T – 40 after having exchanged prescribed signals with the vessels to be passed. This manoeuvre is, of course, allowed only if conditions are favourable and no vessel navigating in the opposite direction is in sight.

Lake Channel. The channel starting at Light Beacons T – 39 and T – 40 and leading to Maracaibo Roads is called the Lake Channel. This is a natural channel 3,000 ft. wide and 11 miles long.

The Main Channel through Maracaibo Lake is approximately 83 miles long, not less than 244 m. wide and with a greater depth than the outer channels.

The access channels to the various ports and terminals branch off from the main channel as described under Section for each port.

CHANNEL NAVIGATION:

(a) Inbound vessels leave to starboard side the buoys and beacons marked with even numbers and to port side the buoys and beacons marked with odd numbers.

(b) Outbound vessels shall leave to port side the buoys and beacons marked with even numbers and to starboard side the buoys and beacons marked with odd numbers.

(c) Vessels should pass as close as possible to the channel's edge on starboard side. Loaded vessels have preference.

(d) Approaching vessels are to reduce speed in order to minimise the suction force of the displacing waters.

(e) Vessels must maintain a distance of 5 ship's lengths by day and 8 ship's lengths by night from other vessels navigating in the same direction.

(f) No vessel should start to manoeuvre to overtake another vessel before having received clearly the affirmative signal from the ship to be passed.

(g) A grounded vessel is not allowed to start any manoeuvre when another vessel is passing.

(h) Dredgers are frequently at work in the channels and caution should be exercised in passing them. Signals used by the dredgers are as follows:

Daytime

Black cylinder hoisted on side of yardarm: You can overtake me on the side on which the cylinder is shown.

Two black balls over the bridge: The channel is blocked.

Night

Green light on side of yardarm (a white light on mast-head helps to show on which side the green light is placed): You can overtake me on the side on which the green light is shown.

2 red lights over the bridge: The channel is blocked.

The tidal range is 4 ft. at neaps.

(i) Maximum speed for vessels navigating in lake channels has been limited to 10 knots. Masters should exercise the utmost care in complying with this regulation as heavy fines may be imposed to offending vessels.

PILOTAGE: (N.B. Maracaibo Pilotage Regulations require that inbound tankers, in ballast, while crossing the Bar, shall not have greater than 8 ft. difference between fore and aft draft. The Government Pilot will not take the vessel if this requirement is not met, unless he is satisfied that the actual draft of the vessel will permit safe navigation through the Outer and Inner Channels).

Every Master of a vessel navigating in Lake Maracaibo who desires to enter the main ship channel in Pilotage Zones No. 1 or No. 2 must first ensure that said Channel is free of traffic.

The limits of the Main Ship Channel in Pilotage Zone No. 1 are from Buoys B1/B2 located at the entrance to the Outer Bar Channel and Buoys B73/B74, of the city of Maracaibo. Pilotage Zone No. 2 begins approximately 1 mile below Maracaibo and extends Southward to Lightfloats M36/M37. All other channels are considered as access channels to their respective port zones and subject to special local rules. Every vessel navigating to or from any port in Lake Maracaibo must follow the prescribed routes through the main and access channels leading to or from such ports, (unless special permission has been granted to do otherwise).

(a) Pilots are employees of the Venezuelan Government and act in an advisory capacity; the Master retains responsibility for the ship at all times. In the event it becomes necessary to disregard the Pilot's instructions in order to ensure the safety of the ship, the Master must prepare a full written report of the circumstances, for delivery to the Captain of the port.

(b) Inbound vessels have the option at present to embark government Pilot at the following areas:

(i) In the channel off San Carlos Pilot Station between Buoys B – 24 and B – 26.

(ii) Anchorage area approximately 5.5 miles N.E. of Pilot station, San Carlos Island. Position 11° 04′ 22″ N., 71° 33′ 48″ W. East of Buoy B – 17. This area is demarcated with green light buoy equipment with radar reflector.

(iii) At the E.M. Buoy.

(iv) At Punta Cardon. See "Note", "Agent's Notice" and "Shipmasters' Reports" – August 1979, July 1981 and August 1981.

(c) The Port Captaincy of Maracaibo is unable to guarantee embarking or disembarking Pilots at the E.M. Buoy or at anchorage area position. For this reason Masters should communicate with San Carlos Pilot Station for necessary instructions as to where to pick up Pilot, who usually embarks between Buoys B – 24 and B – 26. The communication system between San Carlos Pilot Station and vessels will be by Morse lamp and radio-telephone. The stand-by frequency at San Carlos is 2182 kHz. Other existing frequencies are 2120 kHz and 2080 kHz; 156.6 and 156.8 MHz. Each pilot launch has a radio-telephone with 2182 kHz. frequency. The launch that leaves San Carlos Pilot Station with Pilot for ship, takes approximately 20 to 30 minutes to cover distance, and distance between buoys and San Carlos is approximately 6 miles or 10 km.

(d) Pilot Permit to navigate the Outer Channel without aid of a Government Pilot will be granted to those Masters who desire to obtain same. In order to fill the application required, a blank sealed paper and 3 copies should be signed by Master on arrival. Copy of this solicitude duly endorsed by Port Captain of Maracaibo, will serve the Master as temporary permit until the official one has been received. Masters in possession of permits to cross the Outer Channel without a Pilot, have the option to enter channel either at the E.M. Buoy or between any other buoy, taking into consideration the heavy traffic of the channel. Government pilotage through the Inner Channel is compulsory at all times.

(e) Outbound vessels will receive Pilot in Maracaibo, who will Pilot vessel up to San Carlos area approximately between Towers E – 31 and E – 33, where he will disembark. The Port Captain of Maracaibo has instructed that all Masters should always in ample time identify themselves with the San Carlos Pilot Station by radio-telephone regardless of time of day. While inbound – between Buoys B – 17 and B – 19 and sailing outbound – between Markers T – 42 and T – 40. These instructions are obligatory and are required in order for the Pilot service to be aware, at any moment, of any emergencies which may arise, and also to avoid, especially during the night, the launch departing with an official Pilot aboard believing that the ship in sight needs his services, in which case, even though the launch or Pilot services are not rendered, the same will be charged to the company owning the ship, or its representative.

Note: A Master approaching the port for the first time must pick up a Pilot in Punta Cardon before entering Maracaibo Lake Channel. In the case of contravention the vessel will be intercepted by San Carlos Pilot Station and returned to Punta Cardon with a resulting loss of at least 1 day and the Master may also run the risk of a possible fine.

Furthermore, the Master should cable ETA via Curacao Radio 72, 48 and 24 hours before arrival in order to allow sufficient time for Agents at Maracaibo to send a Pilot to Punta Cardon.

Agent's Notice: September 1987.

Subject: Pilot Service from/to Punta Cardon.

Harbour Master's Office has issued new regulations mentioned below.

1. Pilot service from Punta Cardon is only compulsory when Masters are crossing the channel of Lake Maracaibo for the first time. If this is not the case, the pilot should be then embarked at San Carlos.
2. Upon your request this pilot service can be arranged by the agency.
3. On departure, pilot service to Punta Cardon is not required.
4. If official pilot is unable to disembark at San Carlos due to difficulties on board or by Force Majeure, or if you decide to change the instructions given to the agency with regard to Pilot to disembark in San Carlos, a letter addressed to the Harbour Master stating your reasons should be handed to the Pilot before he disembarks in Cardon.

TONNAGE: Venezuelan Port Authorities base part of their pilotage charges on the size of the vessel, i.e.:

(a) On Registered Net Tonnage. Venezuela will accept the tonnage of ships registered in countries with which they have a reciprocal tonnage agreement. As of this date, such countries are:

Denmark
France
Germany F.R.
Great Britain
Ireland
Netherlands
Norway
Portugal
Sweden
U.S.A.

(b) On Venezuelan Nett Tonnage. Ships not registered in countries listed above, when calling at Venezuelan ports for the first time, must be measured for Venezuelan tonnage by the Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and return it before sailing. The Venezuelan admeasurement certificate, when later issued, is forwarded to the Owners. A fee is charged for this certificate, which is payable only on the ship's first call.

(c) In practice, the procedure for stating the tonnage of all ships entering the Lake of Maracaibo is as follows: The inward Pilot boarding the ship presents Master a form on which among others the Master should fill in the tonnage of ship. Pilotage charges are based on this tonnage given by the Master. Master's attention is drawn to the fact that the Venezuelan nett tonnage is usually higher than the International nett tonnage. Care should be taken if an old Venezuelan Nett Tonnage Certificate is on board, because the country in which the ship is registered might later have signed the reciprocal tonnage agreement with Venezuela. If the pilotage charges are made on basis of a higher tonnage than the one that should be applied, it is later very difficult, if not impossible, to get a refund.

CUSTOMS: *(a) Customs Watch.* While vessel is in port, Venezuelan National Guard Officials are assigned on board to ensure compliance with customs regulations. The Law requires meals be supplied to these officials during regular meal hours. Masters are requested to give them the privilege of eating in officers' messroom, to avoid difficulties.

(b) Firearms and Ammunition. Firearms must not exceed one per officer nor may the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be carefully declared on Stores List and should be collected and held in Master's safe custody while vessel is in Venezuelan waters.

(c) Contraband. Strict compliance with the Customs law of the country is enforced by the authorities, and Masters are strongly advised to caution crew members against attempting to smuggle cigarettes. 1 open package per person is allowed to be carried ashore, but greater quantity will result in fine and imprisonment of the offender as well as lost ship's time. Due to very strict enforcement of the Customs regulations, it is recommended that no goods be carried which are not shown on Stores List. Any new articles (clothes, shoes, etc.) should be included in Stores List and marked as personal belongings. If during a check-up by Customs, articles considered as contraband are found, this will not only mean confiscation of these articles, but also hours or days of lost ship's time, while the case is handled at court.

CONSULS: The following nations maintain consular representative in Maracaibo:

Belgium
Chile
Colombia
Costa Rica
Denmark
Ecuador
El Salvador
France
Germany F.R.
Great Britain
Guatemala
Italy
Netherlands
Nicaragua
Norway
Panama
Peru
Portugal
Spain
Sweden
Switzerland
United States of America

TIME: Local time is GMT minus 4 hours.

VISITORS: All visitors to ships are prohibited except those company employees, petroleum inspectors, etc., whose duties require their presence aboard.

POLLUTION: The Laws of Venezuela are very strict in regard to the pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast, oil or bilge slops are to be pumped or allowed to escape overboard. All overboard discharge valves from cargo tanks and bilges are to be secured before loading or discharging commences. Loading is to be conducted with greatest care and vigilance in order that errors or delays in handling cargo valves may not result in overflows. All deck scuppers should be plugged before loading to avoid harbour contamination should an overflow occur. The Authorities require a written report to be submitted by the ship involved in the event of an oil spill.

PASSENGERS: Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include advice to this effect in his radio ETA.

SEAMAN LEFT BEHIND: Sailing may be withheld until all crew members are aboard with exception of those ashore for justified reasons. It is important that Masters bear in mind that the Venezuelan Law will at all times hold the vessel's Master, Agent, or Owner responsible for any seamen left behind in Venezuela.

SHIPMASTER'S REPORT: August 1979.
MARACAIBO/EL TABLAZO AND APPROACHES

Approaches: If making for the "EM" Buoy direct, positions can be a bit vague due to the low lying coast.

A distance off the coast can be obtained before the "EM" Buoy but no real firm position.

Often there is a strong N.E. wind.

Pilot: In the 'Pilot Book', etc., mention is made of picking up the Pilot at Punta Cardon.

From the Pilots and Agent I have a clearer idea of the official viewpoint and requirements.

There is NO compulsion to take a Pilot before San Carlos.

If you are unsure of the area and the visibility is poor from all sources and in my personal viewpoint it is advisable to take a Pilot at Punta Cardon, giving ETA 12 hours in advance.

If vessel is to pick Pilot up at San Carlos send cable 24 hours beforehand through Curacao "PJC" to 'Piloto San Carlos' requesting permission to use Canal Exterior, ETA at "EM" Buoy and at San Carlos. Reconfirm 12 hours before "EM" Buoy and by VHF an hour before arrival on Channel 12.

The difficulty lies in language, although there is meant to be a traffic control system in Canal Exterior it is only in Spanish and the Co-ordinator speaks little English. Little information is required or given if you only speak English.

The Punta Cardon Pilot costs about U.S.$150 extra plus transport charges and entails extra distance of 70 miles from the West and 15 miles from the East.

The San Carlos Pilot boards from a fast launch at "B28" Buoy and usually leaves just before the buoy. He will use hoist, in spite of official regulations which require gangway ladder arrangement, and leaves on port side outward (boards on starboard side inward). This is nearly always the case with situation of pilot station and wind, but may change.

Communications: Venezuelan station La Guaria (YVG – ALRS 6225). Most vessels use Curacao "PJC", very good. Agents reply through "PJC". Telex very good.

VHF: Call 'Piloto San Carlos' on Channel 16 (working Channel 12). Agent at Maracaibo on Channel 16 (works Channel 14, only during office hours). Agent at La Salina on Channel 16 (works Channel 14, 24 hour service but very distorted at El Tablazo).

Canal Exterior: Leads from "EM" Buoy to San Carlos pilot station. A speed of 10 to 12 knots essential to keep vessel in channel on account of strong N.E. winds and currents across channel. Takes about 1 hour 10 minutes from "EM" Buoy to San Carlos.

The least advertised depth at LW is 12.8 m. but shoals quickly at sides of channel. We found 11.0 m. LW to West side of channel at "B18" Buoy.

Buoys "B14", "16" and "18" had shifted about 200 m. to West (August 1979). On the outer section of channel between "B4" to "B8" Buoys a Westerly set right across channel very apparent and near Malecon Breakwater. At "B22" Buoy an Easterly set experienced. Wind N.E. 4 – 5 tide 1 hour before and 1 hour after HW Malecon both cases.

The "E 34" pylon light off Pta. Diablo is very conspicuous. A new dredger 'Wado' works this section with North end Canal Interior. A large suction dredger, pulls to side of channel to let vessel pass. Only Spanish and German spoken. The old 'Zulia' dredger has stopped working. Another dredger is being completed for the Government.

Canal Interior: About 1.5 hours pilotage to Puerto Miranda, speed above manoeuvring. This channel is generally deeper than Canal Exterior. The advertised depth of 12.8 m. seems reliable. Pilot told me they hope to get both channel Interior and Exterior deepened to 15 m. LW in the near future.

Pile Light Beacons "T46" and "T40" have been replaced by buoys.

Pratique: Given on berth.

Notice of Readiness: Can be tendered on arrival at berth. It is finally brought down with Bill of Lading on completion. This is normal practice. As we were cooling down it was received at completion of cooldown. Normally on berthing with lines connected.

EL TABLAZO:

Pilot: A Docking Pilot boards just before berthing and unberthing of vessel.

Tugs: 2 tugs of 1,800 h.p. Secure in "American" style using their lines.

Situation: For all intents and purposes part of Puerto Miranda but operated by different company.

Located just S.E. of Puerto Miranda berths. El Tablazo consists of 3 piers. Bulk, liquid and a small soda pier.

Anchorage: At El Tablazo – off berth, just East of main Maracaibo channel. Good holding – 3 shackles.

Pier: The bulk pier handles bulk and bagged urea fertiliser through 4 shiploaders fed from a conveyor. Three on the South side and 1 on the North side. Two of the loaders on the South side handle bagged urea down corkscrew chutes.

The liquid pier is to the South of bulk pier – berth both sides and handles ammonia, butane, propane, propylene.

Two Chicksans each side. The inshore being of 10 in. both sides and seaward being of 8 in. but fed by 10 in. line. Couplings are 300 ASA but 150 ASA spool pieces generally fitted.

Vapour lines are flexible stainless braided with rubber covering – ship's derrick required, 300 ASA coupling with 150 ASA spool piece. All berths – head IN. On the South side the outer edge of the dredged channel is marked by buoys.

All berths have good rubber fenders. Liquid pier outer end has two full faced mooring dolphins connected to main pier by catwalk. The least depth at all berths at LW is 6 fathoms, except small soda berth which has 2 fathoms at LW.

Moorings: 2-3-1 each end. Ship put alongside pier before moorings out. Plenty of mooring gangs. Very particular on position to within 0.5 m. Gangway no problem.

Fresh Water: At 15 t.p.h. from pipe at manifold amidships. There is a pumped supply at 70 t.p.h. used for loading small tankers to take to outports where supply is limited.

Operations: Language problems. There is one Loading Master who speaks good English. Surveyor on arrival and departure. Very co-operative. Venting allowed up riser.

Vapour return line goes to flare at ship's expense and can only be used if 100% product.

Max. rate ammonia 500 t.p.h., but initially can get plenty of stops. S.G. given at 15°C. The control of the rate is not very fine. You can get down to 20 t.p.h. but increase very broad. Usual notice for completion.

Dock Density: 1003.

Documentation: Carried out at berth inward, sometimes vessel taken off berth outward to local anchorage and clearance given there. Sometimes in the past Inward Clearance done at Maracaibo, NOT NOW.

There is much written in publications and passed around about visaed Crew Lists and deviation cables. I have tried, in talking to the Agent and to the Authorities to clarify the situation.

Visaed Crew Lists are NOT required now. But there is still a requirement that because the ship has no visaed Crew List she must have deviated on passage.

Basically what is required is that the ship should be cleared on sailing for Venezuela to say, Trinidad, for orders or Curacao not Maracaibo, then on passage receive a message deviating her to Maracaibo. If she does not have Deviation Message a fine could be imposed but the Agent says all ships have required cable so do not know of fine being imposed.

Required:
7 Crew Lists.
3 Stores Lists. Victualling only, can include bond.
3 Slop Lists. Could probably combine with above.
2 Ballast Lists. To give amount and cleanliness.
1 Vaccination List.
3 Crew Manifests.
1 Health Declaration.

I cabled in a Pratique message as a matter of practice.

Shore Passes: Given by Agent for each crew member, no photos needed. Not required to be handed back on departure. Valid 3 days. After completion there seems to be a normal documentation delay to obtain clearance of up to 12 hours.

Shore Leave: The Agent will lay on a launch, but not really necessary as at El Tablazo liquid berth vessel is near the boat pier and fast launches run frequently to Maracaibo (takes 15 minutes). Arrange through Loading Master.

Can change sterling or dollars in local hotels, rate 4.3 Bolivars to the U.S. dollar.

Films: Change Walport films at Puerto Miranda. Agent will send launch. Crew member has to go with films to change.

Agent: Only Agent on departure – no officials. Bill of Lading given by Terminal before Agent arrives.

SHIPMASTER'S REPORT: July, 1981.
Experienced following when entered Maracaibo Lake, mid-July, 1981.

Arrived EM Buoy and obtained permission from San Carlos Pilot Station via VHF to enter outer channel and pick up Pilot at Buoy No. 26. During the piloting the Pilot asked asked me whether I had previously entered outer channel, which I confirmed with the remark *many years ago.*

After berthed my Agent informed me that a new regulation required Ship Masters to pick up Pilot at Punta Cardon inward bound, unless the Master with said vessel had actually entered Maracaibo Lake *within the past 6 months,* for which he was automatically permitted to enter outer channel and pick up Pilot at Buoy No. 26.

Fines might be enforced upon Masters neglecting this new regulation.

SHIPMASTER'S REPORT: August, 1981.
If the Master of a vessel enters the channel for the first time, or even if *more than six months* since the last visit, he must embark the Pilot close to Punta Cardon. The distance between Punta Cardon and "EM" Buoy is approximately 80 miles.

If less *than six months* since the last visit, Master is authorised to pick up the Pilot when passing Buoy No. 26.

In the first case 24 hours prior notice should be given to the Pilot, and when approaching Punta Cardon vessel should call "Marina Cardon" on VHF Channel 16.

← SMR

BAJO GRANDE: 10.29 N. 71.38 W. (See Plan)

(1) OPERATOR: Maraven, S.A. Oil Terminal.
(2) OPERATOR: Maraven, S.A. Natural gas liquids processing facilities.

(N.B. For important details of Documentation, Pilotage, etc., see "Maracaibo Lake").

(1) **OPERATORS:** Maraven, S.A.

LOCATION:
Maracaibo: On the North-Western shore of the Lake Maracaibo: Position: Lat. 10° 40′ N., Long. 71° 38′ W.

Maracaibo is the capital of the State of Zulia and seat of all Government and Consular Offices, as well as the port of entry for all vessels loading at terminals in the Lake of Maracaibo. Upon arrival at Maracaibo, a representative of the appointed Agency will go on board to assist vessel.

Bajo Grande: Loading Pier: Position: 10° 30′ 50″ N., 71° 36′ 8″ W., about 8 miles (12.8 km.) South of Maracaibo on the Western shore of the Lake and about 9,000 ft. (2,743 m.) offshore with its centre line North-South. Three vessels can berth simultaneously. Two outside at Berth No. 1 and Berth No. 3, and one inside at Berth No. 2, to load different cargoes. Except for the Boscan Crude, two vessels can load at same time.

DOCUMENTS: The following documents should be presented by the Master:

Clearance from Sailing Port with the following attached:
- Stores List.
- Crew List.
- Slop Chest Inventory.
- Ballast Certificate.

Special ballast report made up by Master.

The Maracaibo Port Captaincy, requires that the Masters of all vessels entering this jurisdiction, deliver to the Maracaibo Port Captain's representative, during his visit to ships in the Port of Maracaibo, a report which must answer the following questions concerning ballast:

(1) Port or place where ballast was taken.
(2) Quantity taken.
(3) Type of ballast and condition of same.
(4) Where deballasting operation was or is to be carried out.
(5) Approximate deballasting time.
(6) Any other pertinent information that may be required.

Crew List.	6 copies
Stores List.	6 copies
Slop Chest Inventory (Deck, engine and cabin stores listed separately).	6 copies
List of Personal effects.	6 copies
Derat Exemption Certificate.	Original
Venezuelan Net Tonnage Certificate.	Original
American Crew List.	4 or 2 carbon copies

(If required: See under "American Crew List").

Boarding Party: The boarding party usually consists of the following persons:
- One Quarantine Official.
- Two Customs Officials.
- One Sanitation Department Official.
- One Port Captain's Representative.
- One Foreign Service Department Official.
- One Vessel's Agent.

American Crew List: All non-American vessels loading for U.S.A. port should have the American Crew List ready on arrival in Maracaibo to be visaed by the American Consulate in Maracaibo and placed aboard ship before departure. The Crew List should be prepared on Immigration and Naturalization Service Form No. 1–418 (Crew List Manifest) and should contain two sections:

Section 1 – Should list those crew members who are American or who possess individual visa documentation to the United States.

Section 2 – Should list, in the alphabetical order of their last names, those alien crewmen who lack United States visa documentation and therefore require inclusion in the visa of the Crew List.

Only one name may be placed on each line of the Crew List. Two names should not be placed in the space of one line, nor should a full line between two names be left vacant. All copies of the Crew List presented must be legible (Occasionally the names of the crewmen included on the carbon copies of some Crew Lists presented at the consulate are blurred beyond recognition).

The information requested under column 1, 2 and 3 should be filled in completely.

Column 1 – Should always contain the complete first name and middle initial of the crewman.

Column 2 – Should show the nationality of each crew member and the number of his travel document.

Column 3 – Should always include the name of the port where the crewman was shipped, not simply the country.

At the time of the vessel's first application for a Crew List, the Crew List must be presented in 4 copies:

Original and 1 copy – Should contain only the information requested under Columns 1, 2, and 3.

Two Copies – Must include the following information of those crewmen to be included on the Crew List visa.

Column 4 – Should list the date, city and country of each crew member's birth.

Column 5 – Should show the place of issuance of the Seaman's Travel Document and the name of the Government which issued the Travel Document. (It is not necessary to list the date of issuance of the travel document).

Cargo documents:

1. *Master's copy of Bill of Lading* – The Bill of Lading form used is the usual Warshipoilvoy form. Masters wishing to use another form should furnish 20 blanks on arrival in Bajo Grande. Master is requested to sign 3 negotiable Bills of Lading (Originals).
2. *One copy of the Certificate of Quantity and Quality* (Q. & Q.).
3. *One copy of the Ullage Report.*
4. *Time Sheet.*
5. *Certificate of Origin.*
6. *Cargo Manifest.*

Outward Clearance:

Following documents are delivered on board by the local Agent before sailing:

1. *Customs Clearance* – Duplicate of "Conocimiento de Embarque" and Duplicate of "Manifiesto de Carga". (Both stamped and signed by Customs) or any other document specifically requested by the consignee or nominating source.
2. *Communication* – A letter from Maracaibo Customs Authorities to Authorities in port of destination.
3. *Zarpe* – Permission to sail signed by Maracaibo Port Captain. This is brought on board in Bajo Grande by the outbound Pilot.

Customs Guard: The Customs Guard will request Master to countersign his time on board the vessel. This is counted from the time the first hose was connected until all hoses were disconnected, regardless of whether the vessel was receiving cargo or not.

Accommodation Ladder: Vessels must provide an accommodation ladder. The use of rung ladders, pilot ladders, etc., is contrary to Port Regulations. Port authorities will board only by means of an *accommodation* ladder. it is recommended to rig this in advance in order to avoid unnecessary delays.

In order to guarantee the security and safeguard the lives of the officers that board the vessel inbound in Maracaibo, it is imperative that Masters strictly comply with the following precautionary measures:

(1) Each of the components and functional parts that holds together or supports the gangway ladder must be maintained in excellent condition.
Therefore, wire ropes, guide blocks and bolts etc., found to be defective or in bad condition must be immediately replaced.
(2) For maximum security, each time that your vessel arrives in this jurisdiction, the above mentioned mechanisms should be thoroughly checked and tested by the personnel aboard vessel before the gangway ladder is used by the boarding party.

APPROACHES:
Channels leading to Lake Maracaibo: The channels leading to the Lake Maracaibo are called the Outer Channel, the Inner Channel and the Lake Channel.

Outer Channel: The Outer Channel starts at the E.M. Buoy position: Lat. 11° 13′ 47″ N., Long. 71° 33′ 31″ W. and ends at the Zapara Island, a distance of about 14 miles. (About 22 km.).

The light characteristics of E.M. Buoy are: flashing white every 5 seconds, visibility approximately 5 miles.

There are no turns in the channel and the course is 189°. The channel is 100 ft. wide and has a normal controlling depth of 44 ft. LWS with tidal range varying about 2 ft. 3 in. Cross currents are sometimes encountered near Zapara, San Carlos and Pescadero Islands, especially at LW when the cross currents are strong. Overtaking at these points is forbidden. There is one anchorage zone in the Outer Channel which is a trapezoid on the port side when navigating inbound near the Buoys B – 14, B – 15, B – 16 and B – 18. All buoys in the Outer Channel are equipped with radar reflectors.

The Southern end of the Outer Channel is marked by Buoys B – 27 and B – 28.

Inner Channel: The beginning of the Inner Channel is marked by Buoys B – 29 and B – 30. The Inner Channel continues on the same course as the Outer Channel for about 10 miles, whereafter the direction changes to 150°, The entire length of the Inner Channel is about 12 miles. Beacons T – 55 and T – 56 mark its Southern end. The normal controlling depth is 44 ft. LWS. The channel is 800 ft. wide. Vessels are not allowed to overtake each other in the Inner Channel between Buoys B – 29 and B – 30 and light beacons T – 25 and T – 26.

Vessels may overtake each other in the Inner Channel between light beacons T – 39 and T – 40 after having exchanged prescribed signals with the vessels to be passed. This manoeuvre is, of course, allowed only if conditions are favourable and no vessel navigating in the opposite direction is in sight. From Beacon T – 56 to Maracaibo harbour the channel is 800 ft. wide, depth 44 ft., its end is marked by Buoys B – 73 and B – 74.

Navigation through Channels:

Inbound vessels leave to starboard side the buoys and beacons marked with even numbers and to port side the buoys and beacons marked with odd numbers.

Outbound vessels shall leave to port side the buoys and beacons marked with even numbers and to starboard side the buoys and beacons marked with odd numbers.

Vessels should pass as close as possible to the channel's edge on starboard side. Loaded vessels have preference.

Approaching vessels are to reduce speed in order to minimise the suction force of the displacing waters.

Vessels must maintain a distance of 1 nautical mile (1,852 m.) by day or night from other vessels navigating in the same direction.

No vessel should start to manoeuvre to overtake another vessel before having received clearly the affirmative signal from the ship to be passed.

A grounded vessel is not allowed to start any manoeuvre when another vessel is passing. Dredgers are frequently at work in the channels and caution should be exercised in passing them. Signals used by the dredgers are as follows:

Daytime: Black cylinder hoisted on side of yardarm:
You may overtake me on the side on which the cylinder is shown.
Two black balls over the bridge:
The channel is blocked.

Night:
Green light on side of yardarm (A white light on mast head helps to show on which side the green light is placed).

You can overtake me on the side on which the green light is shown.

Two red lights over the bridge:

The channel is blocked.

The tidal range is 4 ft. at neaps. Observed squat in the channels is about 1 ft.

Maracaibo Lake Channel Guard Service Corps have had evidence of vessels travelling out of the navigation channel in the vicinity of Buoys B – 3, B – 5 and B – 7; this risky procedure is considered very dangerous to the safety of the channel buoys and its installations.

Masters of all ships are reminded that all vessels inbound or outbound must pass the EM Buoy on the port side. This operation will be registered and controlled by their electronic devices installed at San Carlos Pilot Station.

Violators of this regulation, in addition to being economically responsible for damages to the buoys and related accessories, will be prosecuted in accordance with Article 118, Section I of the Venezuelan Law of Navigation.

In view of the above, and keeping in mind the protection of the interests of your owners, we ask that you comply at all times with this regulation emanated from the Port Captaincy.

PILOTAGE: Compulsory. Vessels proceeding direct to the Bajo Grande Terminal must enter outer channel and embark Pilot between Buoys 25 and 27. After vessel arrives in vicinity of channel entrance, Master must contact *San Carlos Pilot Station* by radio telephone on Channel 16 requesting Pilot at Buoys 25 – 27. The launch that leaves San Carlos Pilot Station with Pilot for ship, takes approximately 20 to 30 minutes to cover distance, and distance, between Buoys and San Carlos is approximately 6 miles (10 km.).

Master must advise Maraven, S.A. and Agent ETA Buoys 25 – 27, 72, 48 and 24 hours prior to arrival there.

Masters of Vessels entering Lake Maracaibo for the first time must cable their Local Agent notifying this fact, in order that the Agent may comply with the Port Regulations. This security measure makes it necessary for the ship to pick up a Pilot at Punta Cardon.

The Master should notify Agent or contact Maraven, Punta Cardon by radio on Channel 12. As no Pilots are available at Punta Cardon, the Local Agent for the vessel requires 48 hours' notice in advance to facilitate making arrangements to fly a Pilot to Cardon and then have Maraven place the Pilot on board the ship.

The co-ordinates of Punta Cardon are approximately Lat. 11° 36′ N., Long. 70° 15′ W. Maraven will charge approximately Bolivares 1100.00 for this service. In addition, the ship will have to pay air fare, hotel expenses, and a higher Pilotage fee for this service. However, if the Master of a ship has previously entered the channel as an officer of a ship, he is not required to pick up a Pilot at Punta Cardon.

Masters are reminded that Pilots are authorised to leave the Jurisdiction, only when they are disembarked in Venezuelan ports. With this understanding, when special circumstances arise in which the Pilot cannot be disembarked at San Carlos and the ship is unable to enter the nearest Venezuelan port to disembark the Pilot, in this case the port of "Las Piedras", it is required that the Agent as well as the Master of the vessel, forward to the Port Captaincy at the earliest opportunity a detailed report giving the reasons that compelled the Master to take the Pilot abroad.

Pilots act in an advisory capacity only, and therefore the Master of the vessel retains full responsibility at all times. In the event it becomes necessary to disregard the Pilot's instruction in order to ensure the safety of the ship, Master must forward to Local Agent a full written report on the circumstances for delivery of same to port authorities.

The Venezuelan Pilotage Law stipulates that Pilots must be provided with the same lodging as is given an officer. In case no extra officer's cabin is available, suggest the hospital be used by the Pilot. Also, Pilot should be seated at the officers' mess for his meals.

In case of accident to Pilot while performing his duty on board, it is the responsibility of the Master to furnish the Pilot with a full written report on the accident before the Pilot leaves the vessel. The Pilot must be able to present such a report in case of a legal claim.

Note: According to new Port Regulations for vessels proceeding to the Bajo Grande Terminal, the Official Pilot (Conduct Pilot) will board to conduct the vessel to Bajo Grande and disembark; vessel will then pick-up the other Official Pilot (Docking Pilot) for berthing manoeuvres.

As a result of accidents that caused the loss of lives, the Maracaibo Port Captaincy issued a Regulation with the view of safeguarding human life at sea and other navigable waters; Official Pilots that must embark on or disembark from undocked ships, must use an automatic-inflated type life vest. This procedure is also compulsory for all persons from private or public entities that are required to go aboard vessels that are anchored, stopped or navigating in the waters of Lake Maracaibo. Likewise, at the side of the boarding ladder where the Pilot boards or disembarks, a hoist or boatswain's chair shall be placed there, and within it a life line and a gas light ready to be used in case it becomes necessary. The Port Captaincy will see to it that this Regulation is strictly complied with.

Docking Pilot: The Government's Pilot will assist in docking operations. It should be borne in mind that Pilot acts as adviser only. The Master retains full responsibility at all times. Any damage incurred to vessel or loading platform which may be deemed to have been caused by the Mooring Pilot's fault or negligence, may be held against the ship.

Undocking: Government's Pilot will assist in undocking. Two tugs will be used as for docking and undocking.

Pilot Ladder: All vessels with a freeboard over 9.0 m. must supply a combination of pilot ladder and gangway (SOLAS 74, Rule 17).

ANCHORAGE: The Pilot will not manoeuvre the ship into anchorage, but will indicate the proper location to anchor. Care should be taken because of small boat traffic.

MAX. SIZE: The following restrictions in size and draft upon loading exists for vessels docking at Bajo Grande:

	Maximum Loading Draft	*Maximum Vessel Size (tonnes)*	*Max. displacement upon Berthing (tonnes)*
Outside Berth (No. 1)	39 ft. 06 in.	*55,000 d.w.t.	42,000
Inside Berth (No. 2)	32 ft. 00 in.	36,000 d.w.t.	20,000
Berth (No. 3)	39 ft. 06 in.	85,000 d.w.t.	105,000

* Vessels up to 61,000 tonnes d.w.t. will be accepted as long as they do not exceed other characteristics.

Also see "Berthing".

RADIO: *Information to be cabled to Local Agents 3 days prior to arrival:*

1. *Flag:* If the vessel has loaded in Bajo Grande before or is listed in the Tanker Register published by H. Clarkson & Company Ltd., London, the nationality of the vessel need not be cabled.
2. *Sailing port and at which other port vessel will call in this area:* For clearing the vessel in and out of Maracaibo, local ship Agents must know beforehand from where the ship comes and which other port it will call in this area. Therefore, it is of importance to inform Agents whether the vessel will load part cargo or bunker, at which terminal, and whether inbound or outbound.
3. *Port for which vessel is cleared:* In case the vessel was diverted *en route* and consequently is not cleared for Maracaibo or one of the terminals in the Lake of Maracaibo, the Local Agents must obtain from authorities special permit for the vessel to enter the Lake of Maracaibo.
4. *Ballast Certificate:* If the vessel arrives in ballast a "Ballast Certificate" is mandatory. A fine against the vessel will issued by the Port Authorities if vessel does not have this certificate.
5. *Estimated Time of Arrival:* Cable ETA San Carlos Pilot Station Buoys 25 – 27 (See "Pilotage") or, if the vessel is taking part cargo or bunkering inbound, cable ETA, bunker or first loading port. Please use local time if possible (4 hours behind GMT).
6. *Tonnage:* If the vessel has not loaded at Bajo Grande before, also cable the Gross and Net Tonnages. To determine whether the International or the Venezuelan tonnage should be mentioned, see General – "Tonnage Applicable".
7. *Master's Full Name:* Please sign your first message with Master's name and surname, which is also needed to clear the vessel in Maracaibo.
8. *Changed ETA:* An additional cable should be sent about 48 hours and 24 hours prior to arrival at pilot station Buoys 25 – 27 stating ETA.

Proper use of Radio Frequencies: We have received several circulars from the Maracaibo Port Captaincy, requesting Terminal Operators to caution all Masters of vessels calling at Bajo Grande Terminal on the improper use of the International Distress Frequency of (2182 kHz) for personal conversations. This procedure is contrary to the security of vessels.

A letter containing such caution will be delivered to the Master of each vessel loading at Bajo Grande by the Agent, requesting that the Master sign a copy signifying his acknowledgement of said letter of notice.

The International Distress Frequency was established specifically and exclusively for emergency calls such as shipwreck, fire and accidents. It is also used by ships and shore stations to make first contact (VHF Channel 16) but immediately after contact is made, the operator should switch to one of the 52 Channels available.

9. *Compulsory use of Single Side Band Radio:* A circular letter from the Venezuelan Ministry of Communications, states that no licence will be granted for the installation of radiotelephone stations of modulated amplitude (A3). The installation and use of Single Side Band radiotelephone equipment is obligatory.

In consequence, the Ministry has requested that the terminal inform all users of Double Side Band (A3) radiotelephone equipment in order that they proceed immediately to install in their ships, launches and all other marine vessels Single Side Band equipment with the same frequencies that are presently in authorised use, which is VHF Channel 16.

The listening and Safety Station YXW – 3 installed at the Venezuelan Nautical School is equipped to answer any calls on the International Distress Frequency with their transmitter of 1 kW.

As a result of the foregoing, a letter containing the above information has been prepared by the Terminal which will be delivered to the Masters of all vessels calling at the Bajo Grande loading terminal. The Masters of all vessels are required to sign a copy of this letter in acknowledgement of receipt.

TUGS: The Venezuelan Government has ruled mandatory the use of 2 tugs for docking and undocking. Vessels over 60,000 d.w.t. will use 3 tugs for docking and undocking.

NOTICE OF READINESS: Masters are free to tender their ships as being ready to load at any place and time which, in their opinion, conforms with the terms of the charter party. Terminal personnel authorised to countersign the Notice of Readiness have been instructed to indicate the time vessel was all fast. This does not imperil in any way the rights of the shipowner in his negotiations with the charterer and it limits the Terminal's liability to the consignee.

BERTHING:

Berth No.	*Dock Length* (ft.)	*Vessel Nominal Length* (ft.)	*Max.Draft Arrival* (ft.)	*Minimum Depth* (ft.)
1	929	751	35.0	40.0
2	929	751	32.0	35.5
3	898	853	39.5	40.0

CARGO OPERATIONS:
Loading Arm System:

Berth No.	*Loading Arm No.*	*Diameter in.*	*Boscan Crude and Products*	*Connection*
1 and 2	1 Black	8	Asphalt Cement (PAS), Boscan Crude, High and Low Viscosity Residuals, Bunker "C", Vacuum Gas Oil, Distillated Oils.	Flange 8 in. 150 ASA
	2 Black	8	Boscan Crude, High and Low Viscosity Residuals, Bunker "C", Cutback Asphalt, Ballast.	Flange 8 in. 150 ASA
	3 Black	8	Boscan Crude, High and Low Viscosity Residuals, Bunker "C", Cutback Asphalt, Ballast.	Flange 8 in. 150 ASA
	1 White	8	Gasoline Leaded, Catalytic Gasoline.	Flange 8 in. 150 ASA
	2 White	8	Gasoline Leaded, Light and Heavy Naphtha.	Flange 8 in. 150 ASA
	3 White	8	Light Gas Oil, Industrial Gas Oil, Jet A-1.	Flange 8 in. 150 ASA
	Bunker	6	Bunker "C", Intermediate Bunker Fuel (IBF), Marine Gas Oil (MGO).	Flange 6 in. 150 ASA
3	1+2	10	Boscan Crude, High and Low Viscosity Residuals, Bunker "C", Cutback Asphalt, Ballast.	Flange 10 in. 150 ASA
	Bunker	6	Bunker "C", Intermediate Bunker Fuel (IBF), Marine Gas Oil (MGO).	Flange 6 in. 150 ASA

Inert Gas System: The use of an inert gas system will be compulsory for all vessels fitted with the system, whilst operating at the Terminal.

Deballasting Facilities: A Circular letter from the Venezuelan Ministry of Communications, Maracaibo's Port Captaincy, states that as of October 1976, no ballast (either clean or dirty) can be discharged into Lake Maracaibo waters. Therefore, all ballast must be pumped ashore to the petroleum terminal on which vessel is to take cargo. Heavy fines are assessed for vessels violating this law and therefore we strongly recommend Masters to be particularly careful in this regard.

Shore deballasting facilities are available at Bajo Grande and are subject to no special regulations and procedures as yet. Tanker ballast water is pumped through 2×8 in. hose connections into 1×24 in. line of about 9,000 ft. in length to a 90,000 bbls. receiving basin situated on shore at a maximum rate of 2,000 tonnes/hr.

The deballasting basin is limited to receiving *only* petroleum hydrocarbons and petroleum hydrocarbons derivates. Emulsifiers, caustics, acids and chemical slops are absolutely unacceptable. Contamination of Lake Maracaibo waters with oily or chemical materials of any nature is strictly prohibited by Venezuelan Laws. The terminal is required to report to the Authorities any such contamination by vessels docked at Bajo Grande. HEAVY FINES ARE THEN ASSESSED AGAINST THE SHIPS. Vessel's cooperation is requested to prevent contamination from tank overflows, bilge oil, line leaks or from any other source.

Tank Cleaning and Drying: Precautions as are common for any heavy oil should be taken to ensure that no ballast is left in any tank. If the cargo is contaminated with water, the water will not separate from the oil. The salt content of the oil will be raised approximately 10 lbs. per 1,000 bbls. for every 0.10% contamination by sea water. All cargo compartments must be stripped extremely dry.

Cargo pipe-line should be drained and or purged of water. On standard T – 2 type vessels, this can be done by draining the fore and aft main cargo lines, both suction and discharge sides, into the pump room bilges followed by opening of main suction valves on each individual compartment, thereby releasing water retained in dead and transverse lines. After this procedure is completed, each compartment should be restripped with stripping pumps and lines, followed by draining the stripping line to pump room bilges. On other ships equipped with looped systems it is possible to blow the system with air and drain water into the bilges. In other situations, fresh water might be used to flush cargo piping systems of salt water and in turn strip salt water and fresh water as outlined for T – 2 vessels. All deck scuppers should be securely plugged and all precautions should be taken to avoid pollution of lake.

Inspection of Tanks: Before loading can commence, tanks and loading system must be inspected and passed. This is usually done by the Terminal's own Cargo Inspector but, if consignee so requests, third party inspection can be arranged.

Inspection Companies available in Maracaibo are the following:
Chas. Martin Venezolana de Inspecciones
E. W. Saybolt & Co., S.A.
Redwood Petroleum and Petrochemical Division
Analistas e Inspectores Venezolanos de Petroleo C.A.
Inspecciones, S.A.
Caleb Brett Venezuela, C.A.

Line Displacement: When a vessel is loading crude and products, it is usually necessary to displace lines once or twice during loading. Masters will be advised of necessary line displacements before loading starts and are required to take note because NOTICE HAS TO BE GIVEN BY VESSEL when pumping should be stopped and tanks changed. Once shore tanks have been changed, it will not be possible to change the quantity of the product already in the ship, as shore lines will then contain a product different from the one already loaded. *Ship's gauges and/or draft should be carefully checked when calculating required quantities.*

Spillage: In case spillage occurs, the Terminal Port Supervisor must be advised immediately, as any spillage must be reported to the Authorities without delay.

There has been considerable discussion in Venezuela concerning oi spillages resulting in contamination of Lake Maracaibo. Considerable pressure is being exerted by Government agencies to eliminate al spillage, and the Terminal is making every effort to avoid contamination of Lake Maracaibo.

While vessel is at Bajo Grande take special precautions to avoid dirty ballast, bilge water or any other contaminant entering the Lake.

If a spill should occur and Terminal representative, the Government's representative of the National Guard observes that the waters of the Lake are being contaminated by any substance from the vessel the Terminal will request that vessel suspends deballasting, loading or discharging operations immediately and all consequences that might arise from this operation such as short loading, the unmooring of your vessel, fines, damages to fishermen, clean up costs, etc., *will be strictly for vessel's account.*

We strongly recommend to Masters to emphasise to the officers on deck to endeavour to avoid spillages and to make certain that the scupper plugs are installed prior to commencement of loading operations in order to withhold on deck any spillage that might occur.

After Loading: All Butterworth plates, tanks tops and ullage plugs should be inspected to ensure against entry of water. Inspection of ullage plugs should follow on completion of temperature readings because of the necessity of taking temperatures en route. Sea suction valves should be secured by positive means until all cargo has been discharged. This may be accomplished by numbered seals, chains and padlocks. The method of securing should be noted on the inspection documents. Regardless of which method is used, appropriate log entries should be made indicating the date, time and method used and under whose supervision, both vessel officer and/or Cargo Inspector, such method was applied.

About 2 hours is required for the preparation of the cargo documents which are normally delivered on board before sailing.

Temperature of Boscan Crude and Boscan Products at Sea: On short voyages, as for instance to the U.S.A., it has proved most practical to maintain the loading temperature. On longer voyages, as for instance to Europe, the temperature may be dropped to 130°F., which does no harm as long as sufficient time is given to bring the temperature up again to that required for discharging. Masters should, however, not expect a temperature rise of more than 5°F. per day, especially if the sea temperature is low. The heat transfer properties of Boscan Crude are very poor as are those of the heavy products made from this crude. Many ships have been delayed in the discharge port due to too low cargo temperature. A temperature of 160°F. is suggested for discharging Boscan Crude, Topped Boscan and Cutback Asphalts.

Discharge Cargo: Boscan Crude has a flash point of 110°F. – 160°F. and a maximum viscosity of 1400 SSF at 140°F. The viscosity at other temperatures follows the pattern of other petroleum products. Boscan Crude has been successfully handled in ships fitted with both reciprocating and centrifugal type pumps with forward and after pumprooms respectively. It is generally found that this crude can best be handled at a temperature which brings its viscosity to about 600 SSF – 160°F. Vessels with forward pumproom should control stern trim so that it does not exceed about 4 ft. while stripping the after tanks. Also a 5° list is very helpful when stripping. Once the cargo gets below heating coils, tanks must be pumped empty as fast as possible. At times it has been found helpful to gather tanks strippings into a single tank for discharge ashore, as it is very difficult to strip against heavy back pressures. Watch reciprocating pumps for vapourlock. Because of high viscosity, proper care should be taken that no oil is left in vessel discharge lines at low temperature.

Tank Cleaning After Discharge Cargo: Many Masters have expressed concern over tank cleaning after discharge. Assuming that the ship proceeds to sea for this operation and has sufficient time for proper execution, vessel may be cleaned quite thoroughly using the Butterworth system. However, it is of vital importance that the system be used at maximum pressure and temperature (not below 160 p.s.i. and 170°F respectively). At these conditions and with 2 machines, it has been found that about 4 hours are required for each tank. It is of importance to keep the tanks well stripped during the Butterworthing. Some prefer to steam out the tanks before Butterworthing. If this course is adopted care should be taken that the steaming does not last more that 1 hour as the heat will drive off the light ends of the oil and leave a rubbery residue that is very difficult to remove.

It has been found helpful to keep the machines in LOW position for about 1 hour and the HIGH – MIDDLE and LOW in order, in the usual manner.

Boscan Crude and Products/Light Products:

Loading Product	*API Gravity*	*Tempera-ture °F*	*Loading Lines used*	*Unloading Rate (bbl./hr.)*
Boscan Crude	10.0 – 11.0	165	2×18 in.	15,000*
Cutback Asphalt	11.0 – 15.0	170	2×18 in.	15,000
Asphalt Cement (Pas)	5.0 – 6.0	300	1×14 in.	5,000
High and Low Visc. Residue	10.0 – 19.0	160	2×18 in.	16,000
Bunker "C"	10.0 – 16.0	160	2×18 in.	16,000
Gasoline	61.0 – 67.0	85	2×12 in.	6,200
Ind. Gas Oil	29.0 – 31.0	95	1×12 in.	6,200**
Light Gas Oil	32.0 – 38.0	95	1×12 in.	6,200
Light Naphtha (LSR)	70.0 – 73.0	85	1×12 in.	6,200
Heavy Naphtha (HSR)	52.0 – 55.0	85	1×12 in.	6,200
Jet A-1	45.0 – 51.9	85	1×12 in.	6,200

* Loading Rate.
** Loading and unloading rate.

DENSITY: 0.977 – 1003.

FRESH WATER: Delivery of boiler and potable water is made by barge *minimum quantity 100 tons.* The barge holds about 160 tons and the pumping rate is about 25 t.p.h. Requirements should be cabled in advance to the Agent of the vessel in Maracaibo.

FUEL:

Advance Notice of Requirement: Should a vessel arriving at Bajo Grande require any bunkers, Owner or Operator must place their nomination with Maraven, S.A. via Telex No. 23535 Mara Vc as much in advance of the delivery date as possible. Telex should indicate name of vessel, ETA at Bajo Grande and quantity and quality of Marine Fuels required. A cash deposit in U.S. Dollars covering the nomination must be made prior to the delivery date into the following account:

Chase Manhattan Bank,
Chase Manhattan Plaza,
34th Floor,
New York, N.Y.
Current Account No. 001-1-992773.

Owner or Operator must also request Chase Manhattan Bank to confirm via Telex to Maraven, S.A. that such deposit has been made in order to cover the cost of bunkers to be delivered to vessel arriving at Bajo Grande at the current ETA. Only after this Telex has been received will delivery actually proceed.

Bunker Facilities: Bunkers are available from pipe-line at Bajo Grande Terminal for vessels loading and unloading cargo at Berths No. 1, 2 and 3. Bunkering rate is about 2,500 bbls.p.h. for Bunker "C", intermediate bunker fuels and marine gas oil.

Marine Fuels and Lubricants Available: Bunker fuel (sometimes called Bunker "C"), intermediate bunker fuels and marine gas oil.

Lubricants are generally available in the Maracaibo area. Should you require any, we recommend that vessel's local Agent be contacted.

Lighterage: Bunker fuel, intermediate bunker fuels, marine diesel and gas oil are also available for ships in the Maracaibo area. 72 hours' advance notice is required for barge deliveries of all products.

CONSULS:

Following countries have consular representation in Maracaibo:

Argentina
Austria
Belgium
Bolivia
Colombia
Costa Rica
Denmark
Dominican Rep.
Ecuador
El Salvador
France
Germany F.R.
Great Britain
Guatemala
Italy
Mexico
Netherlands
Nicaragua
Norway
Panama
Peru
Puerto Rico
Spain
Sweden
U.S.A

REPAIRS: No major repair facilities are available in Maracaibo but small repairs can be undertaken by local machine and electric shops. Shore labour can be furnished if required. Technicians are available for minor radio repairs. Nearest dry docks are at Curacao for vessels up to 30,000 d.w.t. and at Puerto Cabello, Venezuela for vessels up to 18,000 d.w.t.

CUSTOMS: *Contraband:* Strict compliance with the Customs Law of the Country is enforced by the Authorities and Masters are strongly advised to caution crew members against attempting to smuggle cigarettes. 1 open package per person is allowed to be carried ashore, but a greater quantity will result in fine and imprisonment of the offender as well as lost ship's time. Due to the very strict enforcement of the Customs Regulations, it is recommended that no goods be carried which are not shown on the Stores List. Any new articles (clothes, shoes, etc.) should be included in the store list and marked as personal belongings. If during a checkup by Customs, articles considered as contraband are found, this will not only mean confiscation of these articles, but also hours or days of lost ship's time, while the case is handled at court.

SURVEYORS: American Bureau of Shipping and Lloyd's Register have Agents in Maracaibo. Their services may be procured by cabling requests to the local Agent at Maracaibo.

HOLIDAYS: The Terminal office will be closed on the following days. New Year's Day (January 1st); Easter Thursday/Friday (March/April); Declaration of Independence (April 19th); Labour Day (May 1st); Battle of Carabobo (June 24th); Independence Day (July 5th); Birthdate of Simon Bolivar (July 24th); Columbus Day (October 12th); Chiquinquira's Day (November 18th); Christmas Day (December 25th); All Saturdays; All Sundays.

SHORE LEAVE: Shore Leave is permitted at the discretion of the Port Authorities; required number of shore passes will be brought on board on arrival in Maracaibo and have to be returned to the Customs Guard again before the vessel leaves Bajo Grande.

GENERAL:

Tonnage Applicable on Fees: On ships registered in countries which have a reciprocal tonnage agreement with Venezuela, the gross tonnage registered in such countries will be applied for calculating pilotage fees. Such countries are:

Denmark
France
Germany F.R.
Ireland
Netherlands
Norway
Portugal
Sweden
United Kingdom
U.S.A.

On ships registered in countries not listed above, such ships calling at Venezuelan ports for the first time must be measured for Venezuelan tonnage by the Port Captain. It is usual practice to take ashore the ship's Panama Canal or Suez Canal International Gross Registered Tonnage Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and return it before sailing. The Venezuelan Admeasurement Certificate, when later issued, is forwarded to the Owners. A fee is charged for this certificate, which is payable only on the ship's first call.

Firearms and Ammunition: Firearms must not exceed 1 per Officer nor may the ammunition exceed 18 cartridges per Officer. All firearms and ammunition must be carefully declared on the Store List and should be collected and held in Master's safe custody while vessel is in Venezuelan waters.

Guards: Customs Guards are stationed on the platform at Bajo Grande. They must be provided with sleeping quarters on the ship and seated in the Officers' mess for their meals. Non-compliance may cause cargo stoppage and fines. Masters are reminded that these guards are representatives of the Venezuelan Government and any uncourteous action on the part of the crew or passenger will be regarded as a slight against the Country itself.

Gangways: The ship is to supply a safe gangway, which allows easy access to the vessel. The Terminal has a gangway which may be used on request with the understanding that any damage to the gangway or ship or shore personnel through its use may be held against the ship.

Safety: Vessel must be in readiness to move at all times. The attention of Masters of turbine steamers are called to this regulation.

Ship's fire fighting equipment must be ready for instant use while vessel is alongside. Shore personnel will render assistance in an emergency but, since no fireboats are stationed in the immediate area, vessels should be prepared to combat fire without outside assistance. It is necessary to obtain Terminal's approval for repairs of propelling machinery.

Normal safety precautions apply. Smoking is not allowed on the pier. No hotwork is permitted on vessels alongside without *written* permission from the Port Supervisor. *Swimming alongside pier is dangerous and absolutely prohibited.*

Launch Service: The launch is primarily for the use of the port staff.

Taxi: Taxi service will be generally available upon request to vessel's Agent.

Visitors: According to Port Regulations concerning access to ships and loading terminals and in the interest of industrial safety, only persons directly concerned with loading operations will be permitted to board vessel or visit the loading platform at Bajo Grande.

Plimsoll Marks: The Port Captaincy requires that Plimsoll Marks be readily visible. If they are not clearly legible, permission to sail may be withheld and a fine imposed. This is applicable to inbound and outbound vessels.

We therefore, request your full compliance with this Regulation from the Maracaibo Port Captaincy.

Marine Stores/Charts: Marine stores are available in limited supply. Marine charts are not available.

Compass Adjusters: There are no compass adjusters in Maracaibo.

Seamen Left Behind: Sailing may be withheld until all crew members are aboard with exception of those ashore for justified reasons. It is important that Masters bear in mind that the Venezuelan Law will at all times hold the vessel's Master, Agent, or Owner responsible for any seamen left behind in Venezuela.

Crew in Transit: In case a crew member is left ashore for a justified cause, such as hospitalisation, repatriation, etc., his documents and personal effects are to be delivered to the vessel's Agent before sailing. A letter is required from the Master with detailed instructions as to maximum cash advance, etc. All expenses incurred by such members are for vessel's account.

Port Supervisor: Masters or their representatives are invited to call at the Port Supervisor's Office on shore in Bajo Grande or over the telephone on the pier, for any further help, information or complaints.

Terminal: Cable Address: Maraven, S.A., Maracaibo.

NOTICE: Issued by Maraven, S.A., Bajo Grande Refinery, Maracaibo.

PROCEDURE FOR BERTHING AND UNBERTHING MANOEUVRES

To the Masters of all the tanker ships arriving at Maraven's Refinery, Bajo Grande Marine Oil Loading Terminal, Lake Maracaibo, Venezuela.

Instructions concerning approaching and manoeuvres for berthing/unberthing at this Terminal.

With a view to prevent any possibility that your ship may cause damage to our installations, we shall highly appreciate it if Masters pay attention and respect to the following procedures:

1. Entrance Bajo Grande Refinery Terminal (Lat. 10° 30′ 50″ N., Long. 07° 36′ 08″ W.) is between the Main Navigation Channel Marker Buoys B86 – B88 and leaving between the Buoys BG2, BG1 and B86.

2. On ship's arrival at the Terminal Entrance Buoys, the Official Pilot, a Marine Officer, acting as a Liaison Officer of Maraven, will board the ship in order to assist her Master and the Official Pilot in all matters concerning inter-communications and co-ordination with the Terminal and on basis of his technical and local knowledge and experience give advice relative with the vessel's safe berthing/unberthing and safe mooring/unmooring to/from the pier.

3. For best manoeuvrability, ships arriving on ballast or partially laden, must arrive with a draft forward which should not be less than given in the following table and a trim by the stern of about 0.75% of ship's length on ships of 400 ft. length or more.

Length	*Draft Forward*	*Trim by Stern*
400 ft.	10 ft.	3 ft. 00 in.
500 ft.	12 ft.	3 ft. 09 in.
600 ft.	14 ft.	4 ft. 06 in.
700 ft. ideal	16 ft. (nor less than 14 ft.)	5 ft. 03 in.
750 ft. ideal	17 ft. (nor less than 14 ft.)	5 ft. 08 in.

The ship's total displacement in any case should not exceed 42,000 tons for ships mooring at Berth No. 1 and 20,000 tons for ships berthing at Berth No. 2.

4. For more information please consult the instructions and information for the port which will be issued to you opportunely on your arrival for first time to this Terminal, please comply with them, and see that they are complied with.

5. *Mooring Lines:* Prior to arrival at the Terminal, the vessel shall have all the necessary mooring lines ready for use together with a sufficient number of heaving lines and the equipment and the personnel required for mooring. All the lines used for securing the ship to the berth should be of the same material, construction and of approved characteristics.

5A. *Recommended Mooring Lines:*

Forward	Aft
3 head lines	3 stern lines
2 breast lines	2 breast lines
2 springs	2 springs

5B. *Winches:* The use of tension winches is not allowed.

6. *Tugboats:* Minimum 2 twin-screw tugboats of adequate horsepower for the size of ships ordinarily berthing at this Terminal will assist the vessel in the berthing/unberthing manoeuvres. If the Master so request or in the case of the size of vessel and wind and/or current conditions so require, the Terminal may order the use of 3 tugboats for the manoeuvres. The tugboats, on arrival, will come alongside the ship before entering in the Terminal.

The first communication with the tugs is via VHF Channel 16 as first contact and then changed as per instructions.

7. *Berthing:* At Bajo Grande ships berth bow to North.

On approaching the berth, approaching bow to or at any angle with the berth is to be avoided.

No. 1 Berth (Outer Berth): The ship will be put in a position parallel and abeam to the berth at a minimum distance of about 50 m. or more, depending upon the prevailing conditions of wind and current.

Once in this position and with the ship motionless or almost motionless, the Liaison Officer will assist you and the Official Pilot in the manoeuvres to nurse the ship alongside sideways with the tugs which, generally, will be alongside the ship's side opposite to the side the ship will berth, already made fast and ready to push.

When the manoeuvre is carried out for berthing to No. 1 or Outer Berth, the starboard anchor will be in cockabill position ready for use in case needs arise and in such case the aft tugs or both immediately ordered to pull on reverse.

It will be avoided to haul the mooring ropes secured to the North platform bollards in order to pull the vessel forward. If need arises the ship's engines may be used to move the ship.

8. *Unberthing:* The use of spring lines must be avoided in order to veer the ship on the mooring platform for clearing the vessel's bow or stern while unberthing. These spring lines will be only used in case of extreme emergency.

After all the mooring lines have been cast off, the ship will be towed sideways away from the berth to a distance where she can safely proceed under own power.

The Official Pilot for manoeuvres and Liaison Officer will disembark when the ship is safely free away and offering no risk to the dock.

Maraven will not permit berthing or unberthing without a Maraven Liaison Officer being onboard.

Note: According to new Port Regulations for unberthing, 2 Official Pilots will board; for unberthing manoeuvres and to conduct the vessel to the Outer Channel, respectively. The undocking Pilot disembarks at Bajo Grande.

9. *Berth No. 2* (Inner Berth): The same procedure hereinbefore described for berthing at Berth No. 1 will be followed for berthing at Berth No. 2. The ship will be put first parallel to the berth and then the vessel nursed alongside with the tugs. For unberthing, manoeuvres will be the reverse. During berthing and unberthing manoeuvres, ship's engine(s) will be used only when it becomes necessary.

At this berth anchors must not be used because of submarine pipelines laid there. In this berth the distance from it must not be more than 50 m.

10. *Emergency Towing-Off Wire:* Whilst berthed alongside the platform, emergency towing-off wire-ropes should be rigged both on the offshore bow and quarter of the ship, with their loops kept near the waterline at all times where the tugs can easily and quickly pick them up.

The wire-ropes should be in good condition and of suitable strength for the ship's size. The wires should be properly led outboard through the nearest fairleads leaving sufficient wire-rope coiled on deck and free to go when the tug hauls and of adequate length to tow her safely off the Terminal.

The overboard length of rope should be adjusted as the drafts decrease or increase.

11. *Mooring Lines Whilst at Berth:* Mooring lines should be periodically inspected and attended to ensure that they are kept taut in order to minimise and movement of the ship along or away from the berth.

In the case of ships equipped with automatic tension winches, the brakes of the winches should be applied and the mooring lines handled on manual operation when required to take up slack or pull them taut.

12. *Safety Practices:* While the ship is lying at the Terminal the Master will ensure that all the safe practices in loading or discharging oil products and related operations are complied with on his ship and also ensure the maximum co-operation between the vessel's crew and the Terminal personnel in their mutual interests of safe and efficient operations.

AUTHORITY: Maraven, S.A. – Bajo Grande Refinery, P.O.Box 93, Maracaibo, Venezuela 4033A. *Tel:* (061) 202673. *Telex:* 61254, 61161. *Contact:* Captain N. Arceo, Terminal Supervisor.

Head Office: Maraven S.A., Apartado 829, Codigo Postal 1010A, Caracas, Venezuela. *Tel:* 908-2111. *Telex:* 23535, 23536.

(2) OPERATORS: Maraven, S.A.

LOCATION: S.W. of channel Buoys B – 87 and B – 88.

The installations for processing natural gas liquids at Bajo Grande processes liquids for Maraven, S.A., and they are known as Product Owners. The Plant is situated in Bajo Grande, approximately 10 miles to the South of the Port of Maracaibo, on the West bank of Maracaibo Lake.

FLAG: The local authorities require the Venezuelan flag to be hoisted to the top of the vessel's mast from the time it enters the outer channel on arrival, until it leaves the outer channel on departure.

DOCUMENTS: *Customs Clearance for Programmed Vessels:*

Vessels which arrive in ballast or with cargo in transit, require th following documents (with additional file copies if these are required):

(A) Clearance from the last port
2 copies – 1 visaed Ballast Certificate
4 copies – 2 visaed Passenger List
4 copies – 2 visaed Lists of Equipment
4 copies – 2 visaed List of Passengers in Transit
4 copies – 2 visaed List of Mess Equipment and Spares
4 copies List of Personal Effects
4 copies – 2 visaed List of Stores
5 copies Crew Lists.

Vessels which arrive with cargo must have, apart from the foregoing

(B) 4 copies – 2 visaed Venezuelan Entry Manifests
6 copies – 2 visaed Bill of Lading
2 copies visaed Entrance Manifests.

In the absence of a Venezuelan Consul at the last port, the Custom clearance documents must be signed by the Consul of a friendly natior one of the Port Authorities, Notary Public, the Chamber of Commerce or by two recognised signatories.

Clearance Through Customs of Diverted Vessels:

Vessels diverted on the high seas to Maracaibo to load at Bajo Grand must present all the documents indicated in (A) above, except th consular correspondence, which they will not have.

Vessels diverted on the high seas to Maracaibo (Bajo Grande) whic do not have a Venezuelan Customs Clearance on board, must advis their Agents by radio prior to their arrival, the name of the vessel, th name of the Master, nationality of the vessel, net Venezuelan tonnag (if available, if not, the net registered tonnage), last port of discharg port to which it was originally sailing and the ETA at the Pilot station a San Carlos. This information is required to obtain the Entry Permit pri to the arrival of the vessel. Three copies of the diversion telegra received by the vessel, signed by the Master, together with thos documents detailed above, must be presented to the Port Authoritie on arrival at Maracaibo. Non-presentation to the Port Authorities of th documents or the information mentioned will occasion a fine to th vessel.

Inspection by Customs: All vessels arriving from foreign ports destine for the dock at Bajo Grande must anchor in the Port of Maracaibo fo Customs inspection by the Port Authorities before proceeding t Bajo Grande. The vessel's gangway must be in position prior to arriva at Maracaibo.

A member of the National Guard of Venezuela will come on boar every vessel at Bajo Grande to observe the activities in connection wit the operations of loading and unloading. This official is authorised a representative of Customs and is known as the "Vigilante de Aduana" He must be fed and lodged at the same standard as ship's officers.

Loading Documentation: The loading and Customs papers will b delivered to the Master by the Agent of the ship on his arrival at th Port of Maracaibo, on his voyage outwards.

PILOTAGE: Vessels entering currently have the option of taking on th official Pilot at:

(a) The channel in front of the pilot station at San Carlos, betwee the Buoys B – 24 and B – 26.

(b) In front of Amuay Bay or Punta Cardon. However, to arrange th service, Agents must be advised at least 48 hours in advance of th requirement.

The Pilot who boards the vessel in front of San Carlos will take it t Maracaibo, where he will disembark.

Due to weather conditions, the Port Captaincy of Maracaibo canno guarantee the embarkation or disembarkation of the Pilots at the "EM Buoy. For this reason, Masters must communicate with the pilot statio of San Carlos to receive necessary instructions as to where the Pil will be embarked, the latter usually coming on board between Buoys B – 24 and B – 26. The system of communication between the pil station of San Carlos and the vessels will be via radio-telephone. The San Carlos frequencies are: 2182 kHz. and 156.8 MHz. (VHF Channel 16). Other frequencies are: 2122 and 2080 kHz. and 156.6 MHz.

Pilotage to navigate through the inner and outer channels is compulsory at all times. The maximum speed of navigation in the dredged channels is 10 knots.

Vessels leaving will take the Lake Pilot on board at Bajo Grande and on reaching the Port of Maracaibo the Pilot will be changed for another to take the vessel through the channel. The Channel Pilot will pilot the vessel up to the San Carlos Bank, generally between Towers E – 3 and E – 33, where he will disembark. The Port Captain of Maracaib has issued instructions to all ships' Agents so that they may inform the Master and/or Owners of the vessels that all vessels must identi themselves with the pilot station of San Carlos by radio-telephone regardless of the time of day, when they are entering between Buoys B – 17 and B – 19 and when they are leaving between Buoys T – 4 and T – 40.

Every time a launch with an official Pilot on board leaves to attend t a vessel in sight, the costs will be charged to the company which own the vessel or to its representative, even when service has not bee given.

A government Pilot will assist each vessel from Maracaibo to Ba Grande and on the outbound trip to Maracaibo. The government Pil will also assist in the berthing and unberthing operations. The ship' Agent will inform the Master of each vessel, as well as the governme Pilot, the schedule for berthing the vessel.

The Plant Mooring Supervisor will board each vessel prior t approaching the dock. Mooring Supervisor will assist in the mooring a unmooring operations. It should be understood that the Moori Supervisor acts only in an advisory capacity to the Master. The vesse Master retains full responsibility at all times. The Plant assumes n responsibility in connection with any acts or advice given by the Moori Supervisor.

APPROACHES: The buoy which marks the entrance to the outer channel (Buoy "EM") is situated in approximately position 11° 13′ 47″ N., 71° 33′ 31″ W. The characteristics of the light of the "EM" Buoy are: white flash every ten seconds, visibility approximately 5 miles. The distance between the "EM" Buoy to the Southern extremity of the outer channel, marked by the Buoys B – 27 and B – 28, is approximately 15.75 miles. The channel is 1,000 ft. wide and normally has a depth of 42 ft. minimum at low tide observed at the time of neap tides with a tidal amplitude varying 2 ft. 3 in.

There is a breakwater 0.5 miles to the East of and parallel to the outer channel which extends 1.6 miles to the North from the Northern side of the Island of Zupara. The end of this breakwater is marked by a steel frame tower with a light 25 ft. above sea level. Characteristics of the light are: white flash every 8 seconds, visibility about 3 miles.

Commencement of the inner dredged channel is marked by the Buoys B – 29 and B – 30. The length of this channel, which is marked by buoys, is approximately 12 miles, and ends at Buoys T – 55 and T – 56. The channel is 800 ft. wide and the normal checked depth is 43 ft. neap tides with a tidal amplitude varying between 1.5 ft. to 2.5 ft.

The channel from the Buoys T – 56 as far as the Port of Maracaibo is a dredged channel, whose end is marked by Buoys B – 73 and B – 74. It is some 800 ft. wide and has a depth of at least 43 ft. The distance is about 11 miles and the tidal amplitude range is insignificant.

RESTRICTIONS: Bridge clearance at MHHW 146 ft.

MAX. SIZE: The maximum permissible fresh water draft at the dock is 36 ft. and the maximum overall length vessel the dock will accept is 700 ft. Vessels with a berthing displacement up to 20,000 long tons will be accepted, providing the approach velocity can be controlled to 0.3 ft. per second or less.

Vessels with an overall length greater than 700 ft. or with a fresh water draft of more than 26 ft. or a displacement greater than 20,000 long tons will not be accepted for loading at Bajo Grande, unless they have obtained the prior authorisation of Maraven, S.A. If the vessel is not equipped to moor, load and unmoor in a safe manner, the vessel will not be loaded. In such cases, there will be no responsibility on the part of Maraven, S.A.

RADIO: Maraven, S.A. Export Department also has radio-telephones with the following frequencies: 2080, 2120, 2182 (stand-by), 2638 and 2738 kHz and 156.8 (stand-by) and 156.6 MHz. operated in accordance with the following schedule:

Monday – Friday: From 0730 until 1130
From 1300 until 1700
Saturday, Sunday and Holidays: From 0730 until 1030 approx.

Any tanker or vessel bound for Bajo Grande shall cable Maraven, at least 5 days in advance of its scheduled arrival time in Maracaibo, giving notice of its estimated time of arrival, loading capacity, amount and type of product to be lifted and condition of ship's tanks.

At least 48 hours in advance of arrival at the San Carlos Pilot Station, the vessel's estimated time of arrival, nationality, Venezuelan net tonnage (if available, otherwise its registered tonnage), quantity and type of cargo required, condition of ship's tanks, name of Agent, last port, Master's name and all requirements of the vessel while in port should be cabled to "Maraven, Maracaibo" and to the ship's Agent. As the cable office in Maracaibo is not able to communicate directly with vessels at sea, messages to "Maraven, Maracaibo" and to Agent should be routed via PJC Curacao, and should be prefixed "Via AAC" (All America Cables and Radio Inc.). Failure to give such proper notices shall absolve the Plant from any claim for delays or demurrage.

TUGS: 2 × 1,600 h.p. tugs used for mooring and unmooring operations.

BERTHING: The dock proper may be identified by the overwater pipeline trestle that connects the dock with shore.

The dock is located approximately Lat. 10° 30′ N., Long. 71° 36′ W., which is 2 miles off shore from the Bajo Grande Natural Gas Liquids Processing Plant and S.W. of channel Buoys B – 87 and B – 88 on the Maracaibo channel. The dock is single sided and consists of 4 breasting pilings, 4 mooring dolphins and a loading platform.

The dock is equipped with a compressor and auxiliary equipment to assist the ship in compressing and re-condensing the ship's vapours. No liability will be assumed by the Plant Operator for unavailability of the Dock's vapour compressor. The dock is also equipped with a vent system to dispose of contaminated vapours.

A tie-up crew will handle all mooring lines before and after loading.

The Plant tie-up crew will assist the ship's crew in positioning and connecting the cargo loading arms and in removing same on completion of loading. The dock loading arms are equipped with 10 in. ASA 300 lb. RF flanges. It shall be the responsibility of the ship to furnish its own fittings to mate with the dock's 10 in. ASA 300 lb. FR flanges.

Mooring Procedure: Any vessels calling at Bajo Grande must be equipped with mooring hawsers of sufficient length and strength to run a line to each of the 2 bow and 2 stern mooring dolphins and shall use such equipment while at the dock. Vessels equipped with tension winches and cables shall utilise these in addition to the mooring hawsers or alone if the vessel has sufficient cables to meet the minimum requirements of running a cable to each of the bow and each of the stern mooring dolphins. For added security of those vessels not equipped with tension and/or cables, 1 steel cable will be furnished for a bow and another for a stern mooring dolphin by the Plant. It should be recognised by all parties that while the use of these cables is strongly recommended, the Plant accepts no responsibilities for loss or damage to any vessel or to any facility or to any person that may result from the failure of this equipment.

For the convenience and safety of all personnel boarding or disembarking while at Bajo Grande it is recommended that the vessel's accommodation ladder be rigged on the port side, this being the side normally laying against the dock. The ladder should be suspended after the Mooring Master boards and during docking operations to avoid being fouled.

BALLAST: There are installations for unloading dirty ballast. Vessels which arrive at Bajo Grande with dirty ballast must advise 48 hours in advance with regard to any emulsifiers, detergents or chemicals which may be present in the ballast and which are going to be unloaded. If these emulsifiers, detergents and chemicals are not acceptable, Maraven will advise the ship and the latter must arrive at Bajo Grande with clean ballast.

The ballast will be unloaded at a rate of approximately 5,000 bbls.p.h., nevertheless in the case of unexpected damage or malfunction of the system at Bajo Grande, Maraven will give instructions to the Master of the vessel so that he may arrive with clean ballast and Maraven will not be responsible for the delays which may be suffered by vessels in cleaning their tanks prior to arrival.

It is strictly prohibited to discharge into the lake any liquid or solid waste resulting from tank cleaning. Therefore it is recommended that the Master gives instructions to all personnel so that they avoid any possible leak or contamination in the lake.

In the event that the representative of the Plant or the National Guard observe that dirty ballast is being discharged into the lake, or even residues or other contaminatory organisms whilst clean ballast is being unloaded, such operations will immediately be suspended and the consequences will be strictly for the account of the ship.

LOADING: *Notice of Readiness:* On arrival at Bajo Grande and after inspection by the Customs Authorities, and having obtained any other official approval required before loading, the Master of the vessel will notify Maraven in writing that the vessel is ready to load. This notification must include a report of the conditions of the tanks of the vessel, specifying in detail the temperature, pressure, last loading, list of vessel and trim, possibility of contaminatory organisms and any other conditions which may affect the loading.

The Master of the vessel may request any equipment and/or service which he considers necessary for the safe and efficient loading of his vessel and Maraven will make every effort to fulfil this request.

It will be the responsibility of the vessel to provide its own connections to join up with the RF 10 in. 300 ASA flanges of the dock.

It will be the responsibility of the ship's Master to ensure that prior to commencement of loading, the atmosphere inside the tanks, which are to receive products are within the safety limits stipulated. Nevertheless, Maraven reserves the right to inspect at any time, to verify the fulfilment of these safety precautions and to refuse to load any vessel which in the opinion of Maraven does not fulfil the safety requirements stipulated.

LPG refrigerated vessels will not be considered ready to load at Bajo Grande unless all the LPG tanks contain LPG vapours and are sufficiently cooled to permit shipment of the nominated products.

Vessels which receive completely refrigerated products must be capable of receiving at their boiling point from 0.5 to 2.5 p.s.i.g. Such vessels must have a refrigeration system capable of liquefying all the vapours resulting from the shipment at the rate specified and including those vapours which form as a result of the heat gained by the vessels' tanks.

Loading Procedure: The positioning and connection of the loading arm must be effected to the satisfaction of the personnel in charge of the vessel. After approval of the personnel in charge of the vessel, the loading valves may be opened to check that the connections do not have leaks and loading may commence.

The maximum loading rate is 8,000 bbls.p.h. (750 – 775 tonnes p.h for completely refrigerated products and petrol) and a minimum loading rate of 250 bbls.p.h. (23 tonnes p.h.).

The pumps are designed to supply a minimum flow of 250 bbls.p.h. at a pressure of 225 p.s.i.g. and, since the installations at the Bajo Grande Dock do not have facilities for controlling the pressure of LPG which is being loaded, they are not responsible for any damage or delay which may occur due to the request for reduction in flow and pressure of LPG in order to cool or purge the vessel's tanks.

There are no installations for generation of inert gases. LPG vessels which require cooling, purging or any other assistance in Bajo Grande can be accepted after prior request in writing from the Master of the vessel; however, these services will be charged to the vessel. The responsibility for helping to effect purging and/or cooling is charged at 733 Bolivares per hour, during the time that such operation of purging or cooling causes the vessel to exceed the permitted period of stay.

The quantity of products used in such purging or cooling will be for the account of the vessel.

In the event that the dock vapour compressor is operated at the request of the vessel's Master for a purpose other than for purging or cooling, this will be charged at the rate of 500 Bolivares per hour to the ship.

All loading and unloading operations must be suspended whilst there is bad weather and the tank covers of the vessel must be closed and secured. During periods of calm, petrol or other products with a low flash point can be loaded at reduced rates or the loading operation can be interrupted if the heavy vapours are not being dispersed with sufficient speed to avoid dangers of gas accumulation. Officers on the vessel must be alerted so that they may be on watch whilst such conditions apply.

Under normal operational conditions it may be necessary to displace the loading line. This will require the person in charge of the vessel advising the representative of the Plant when the loading is nearing completion in order to complete an equal quantity to the capacity of the loading line.

Permitted Period of Stay: (a) The permitted period of stay, as is defined hereunder, shall commence to be counted from 6 hours after arrival of the vessel at Bajo Grande. The permitted period of stay will be terminated when the final mooring cable has been withdrawn from the quay.

For the purpose of these instructions, the Notice of Readiness, may be delivered after the vessel has tied up at the dock; nevertheless, the arrival at Bajo Grande shall be defined as the time when the vessel passes between Buoys B – 87 and B – 88, which mark the Maracaibo navigational channel and are situated approximately 1,000 m. in front of the Bajo Grande Dock.

(b) In the event that a vessel arrives at a different time to that confirmed in the shipping programme, and unless Maraven has approved a different arrival time, vessel must await mooring of other programmed vessels before arriving and which vessels may have arrived at that time and the permitted period of stay will commence when the loading operation commences, or 6 hours after receiving Notice of Readiness, whichever is the later. It is agreed that a vessel shall be included in the loading programme if it arrives at Bajo Grande between the hours of 12.01 hrs. on the accepted date and 0600 hrs. of the following day.

(c) Except for the provisions in (b) above, all vessels arriving at Bajo Grande will have the right to moor in the order in which they appear in the shipping programme. Maraven at their discretion may change the order of shipment when it may be necessary for reasons of safety or for the purpose of obviating a closure of the Plant or reduction in production.

(d) The waiting time permitted shall be 24 hours, plus one (1) hour for each 6,000 bbls. of product loaded in excess of 114,000 bbls. This waiting time shall be that permitted to load the complete cargo or part of the cargo of the vessel, it being understood that any time spent in deballasting operations will not be taken as waiting time. If the loading operations are delayed or interrupted by *force majeure*, which shall include the closure of the shipping terminal due to bad weather, the time thus lost will not be counted as permitted waiting time.

(e) The loading operations shall be considered as terminated when the loading hoses are disconnected. Every vessel will leave the quay as quickly as may be practically possible after having completed shipment of the cargo and the personnel of the vessel and those on land have arrived at an agreement as to the quantity of products shipped.

(f) In the event that a vessel is moored at the quay for 6 consecutive hours after Maraven has notified the Master of the ship that the installations are ready to deliver the product, if the vessel on completion of this time is not in a position to receive products, then at the discretion of Maraven the vessel may be withdrawn from the quay, to prevent the products burning or a reduction in production.

A vessel may be withdrawn from the quay at any time for reasons of safety.

Verification and Measurement: Determining factors to arrive at the official figures of a shipment:

(A) Petrol and Butane:

(1) Correction factors of the individual meters less than 1%. In this event the terminal shall always use the figures of the meters as official (and not take into account the absolute difference in barrels) taking always the precaution of carrying out a comparison between the figures of the ship and those of the land.

(2) Factor of correction in any of the meters greater than 1%. In this event the vessel's figures will be used, comparing them in all aspects with the figure of the meters without applying the correction factor and with the land tanks.

In those cases in which the vessel's figures are used, it is appropriate to suggest that they check their figures.

(3) In the event of the measuring system not operating, and the vessel cannot give its own figures, as a last recourse the figures of the shore tanks will be used.

(B) Propane:

(1) The vessel's figures will be taken proceeding in exactly the same way as in point (2) of sub-section (a) above.

(2) In the event that the vessel cannot supply figures, the figures of the shore tanks will be used.

All volumes will be adjusted to the volume equivalent to 60°F in accordance with the applicable sections of Standard API 2534 and the corresponding tables of the Measurement Tables of Oil ASTM (latest edition) or other methods or standards selected by Maraven.

If the product delivered is LPG, the content of the ship's tanks will include the quantity of the product in the form of vapour.

All volumes will be calculated in U.S. liquid barrels at 60°F and the adjustments at this temperature will be made in accordance with the Oil Measurement Tables ASTM – 1P, American Edition 1952 (or the ruling tables which may replace these).

In the event of the products being loaded in a vessel whose tanks, pipes and equipment are empty when loading commences, the gross volume of products which may remain in the pipes and equipment on completion of shipment and at the time of final measurement, shall be calculated on the basis of the volumetric capacity of those pipes and equipment, adding the calculated volume loaded in the vessel's tanks and including in the total volume delivered to and received by the vessel at that time. In the event that the procedure described is used to determine the volume of products delivered and if during the time of this delivery vapours from the vessel's tanks be vented then the quantity of vapours vented shall be determined as shall also be the liquid volume equivalent to these vapours in normal conditions and this will be added to the quantity determined in (a) and (b) above.

Permissible Composition of the Atmosphere of the Tank for Purging: Maximum percentage per volume of air or oxygen permissible for the safe shipment of the product when the vessel's tanks are purged with CO_2 or N_2:

	%Air		*%Oxygen*	
Product	(CO_2)	(N_2)	(CO_2)	(N_2)*
LPG	50	40	8	7
Petrol	50	40	8	7

*The percentages of nitrogen do not include the nitrogen of the air in the mixtures.

Example: If a vessel is going to load LPG and it is going to be purged with N_2, it must add sufficient N_2 to ensure that the mixture does not contain more than 40% by volume of air. The other 60% will be N_2.

Ref. Principles & Practices of Purging, 1954. American Gas Assoc. – Chapter 2, page 28.

FRESH WATER: Available at Maracaibo Harbour.

FUEL: Heavy and medium marine diesel, intermediate fuel, and bunker "C" fuel oil are available in the area. Lubricating oils in limited quantities are also available from local contractors. All bunker, lubricating oils, water and other requirements should be cabled to the ship's Agent. For reasons of safety, no bunkers may be taken on the vessel while berthed at Bajo Grande.

MEDICAL: Complete medical services are available in Maracaibo.

CONSULS: The following nations have Consular representation in Maracaibo:

Belgium	France	Panama
Chile	Germany F.R.	Peru
Colombia	Great Britain	Spain
Costa Rica	Guatemala	Sweden
Denmark	Italy	Switzerland
Ecuador	Netherlands	U.S.A.
El Salvador	Norway	

REPAIRS: Maracaibo: No major repair facilities are available, minor repair jobs can be taken care of through local machine and electrical shops. Shore labour can be furnished if required. Radio, radar and gyro compass technicians are available upon request.

Bajo Grande: No repair facilities are available, but when required personnel from shops in Maracaibo will travel to Bajo Grande to effect repairs.

SHORE LEAVE: Launch service for official business purposes and emergencies is readily available in Maracaibo. Launch service for shore leave can be arranged through contact marine service and will be the responsibility of ship's personnel. Arrangements for shore leave transportation can be made through the ship's Agent. No shore leave facilities are available at Bajo Grande.

CLASSIFICATION SOCIETIES: American Bureau of Shipping and Lloyd's Register of Shipping, U.S. Salvage Association, Salvage Association of London, Det Norske Veritas, Bureau Veritas, Registro Italiano Navale, and Germanischer Lloyd have Agents in Maracaibo. Surveyors are available by appointment from any of these Agents.

CURRENCY: The Venezuelan unit of currency is the Bolivar (Bs) and is the only currency recognised as legal tender within the country. Masters desiring a cash advance should make the request to their Agent when advising ETA.

MAIL: Outgoing mail for ship's account may be given to the Agent's representative who boards the vessel on arrival at Maracaibo inbound. Personal mail will be accepted only if carrying the correct amount of Venezuelan postage, or if postage is authorised by the Master for the vessel's account.

GENERAL: *Maracaibo Port Captaincy:* Directive which must be observed by vessels entering and leaving Maracaibo Lake:

OBJECTIVES:

To increase the safety of Human Life at Sea, to take all necessary measures to avoid marine accidents in general and to ensure that vessels are navigated with safety in the navigable channels and waters of Maracaibo Lake.

1. All radio-telephone communications between the Control Offices of Maritime Transit under the control of the Port Captaincy of Maracaibo and vessels, shall be made, for the first contact, via Channel 16 (156.8 MHz) and immediately it shall be agreed that for the transmission of required information they will change to Channels 12 or 14. Also this procedure will be adopted in communication from ship to ship.

2. Any vessel which navigates in the vicinity of the Buoy "EM" of the outer channel being 10 miles from the latter shall call the pilot station at San Carlos, requesting permission to enter the zone and will supply the following information:

(a) Name and type of the vessel.
(b) Nationality.
(c) Draft.
(d) Last port of call
(e) ETA at the "EM" and "B – 26" Buoys.

3. The Port Captaincy will authorise by radio, via the pilot station of San Carlos, to Masters of vessels who have reported to that station request to cross the outer channel, or part of it, with the assistance of the Official Pilot, in accordance with the sequence of arrival.

4. Every 5 miles, the Master of the vessel will call up San Carlos indicating any information which he may have and giving his position within the channel, by reference to the buoys which are on his starboard side.

5. When communication in item 1 has occurred, San Carlos will inform the vessel as follows:

(a) The location of any dredger (mobile or stationary) which is operating in the outer channel, buoys whose lights are out, changes in buoys' positions or where buoys have disappeared, vessels which have sunk, etc.

(b) If there are vessels leaving the port, to give the position of these by reference to the odd numbered buoys.

6. Vessels shall establish radio-telephone communications with the dredger when they are 5 miles from it. In this communication, they will indicate the place they estimate that the vessel will meet the dredger and any other information which they consider necessary for the safety of navigation of both.

7. San Carlos will keep vessels informed of all the circumstances mentioned above, especially the time and place that each of them estimate to pass close to any dredger which is operating in the outer channel, and in order that they do not meet the dredger simultaneously.

8. Masters of vessels will inform the pilot station at San Carlos of any other information which the latter may request.

9. Masters of vessels will keep a watch on Channel 16, on the order of the Official Pilot, until their arrival at port of destination in Maracaibo Lake and on leaving until the Pilot has left the vessel.

10. Pilots, when they are bringing a vessel into the port, at the level of the parallel of Palmas del Norte Point (Buoys T – 55 and T – 56), will call up the Port Captaincy and transmit the following information:

(a) Name of vessel
(b) Time
(c) Port where operations will be effected
(d) Name of Pilot calling.

11. When the vessel continues to navigate to the South of General Rafael Urdaneta Bridge, the Pilot will inform the Control Office of Maritime Transit in Maracaibo, the time at which the vessel will pass Buoy "B – 79".

12. The average speed of vessel in the navigable channels will be ten (10) knots, Masters being authorised as are also Official Pilots, to alter this, when the safety of navigation may require it.

13. San Carlos will check by radio-telephone the transit of vessels from the Entrance Buoy "EM" to the level of the parallel which passes in front of Palmas del Norte Point (Buoys T – 55 and T – 56 and vice versa).

14. Loaded vessels navigating outwards, and being in the outer channel, will have priority over vessels coming in to the same channel, provided that these do not meet with those coming out in the critical zone, included between Buoys B – 21 and B – 22 and E – 33 and E – 34. For this purpose, the San Carlos Pilot Station will inform entering vessels the situation of leaving vessels so that they may take necessary measures to avoid meeting those vessels coming out in the referred zone.

15. The Port Captaincy will check via the office of Control of Maritime Transit, the Navigation of vessels, from the parallel passing Palmas del Norte Point (Buoys T – 55 and T – 56), as far as the terminals and ports to the South of General Rafael Urdaneta Bridge and vice versa.

16. Every Official Pilot navigating outwards when passing the Buoy B – 72, will call up San Carlos by radio-telephone and will supply the following information:

(a) The time that he is passing Buoy B – 72.
(b) The time that he is arriving at San Carlos.

17. When the dredger receives any call from a vessel it will give information as follows:

(a) Location where it is at that time.
(b) Direction of dredging (South North or North South).
(c) The side on which the vessel must pass.
(d) Time necessary to make the manoeuvre indicating on which side of the channel dredging will continue after the manoeuvre.

18. The pilot station at San Carlos will be attentive to all communications made and will take note of them, in the event that their intervention may be required by dredgers or by vessels.

19. Any vessel sailing from any port in the No. 2 Pilotage Area of Maracaibo, will inform the Port Captain as follows:

(a) Type and name of vessel.
(b) Where from and time of leaving the port.
(c) Speed and port of destination.
(d) Estimated time of passing Buoy B – 72.

Signed – Port Captain.

Section B

LA ESTACADA: 10.42 N. 71.32 W.

TERMINAL NOT IN USE. BUOYS HAVE BEEN REMOVED.

(N.B. For important details of Documentation, Pilotage, etc., see "Maracaibo Lake").

OPERATOR: Maraven, S.A.

LOCATION: Loading Terminal in the Lake of Maracaibo at La Estacada, located at Lat. 10° 42′ 30″ N., Long. 71° 31′ 40″ W. Entrance to and leaving this terminal is made between Buoys B-65 and B-66.

DOCUMENTS: As soon as vessel is safely moored Agents' representative will board the ship together with Port Authorities. The following documents are needed on arrival:

1. Clearance from Last Port with the following attached:
    Stores List
    Crew List
    Slop Chest Inventory
    Ballast Certificate
2. Crew List (6 copies).
3. Stores List (6 copies).
4. Slop Chest Inventory (Deck, engines and cabin store listed separately) (6 copies).
5. List of Personal Effects (6 copies).
6. Derat Exemption Certificate (original).
7. Venezuelan Net Tonnage Certificate (original).

See "Tonnage Applicable".

The Health Officer sometimes requests to see the Vaccination Certificates of crew members.

PILOTAGE: (See "Maracaibo Lake"). Pilotage Compulsory.

1. All vessels must call Maraven, S.A. and Agent on VHF Channel 16, when passing the E.M. Buoy and when embarking the Pilot at San Carlos.

2. Reduce speed approaching Inner Channel Buoy B-63; rig accommodation ladder starboard side properly illuminated. Company Cargo Co-ordinator will board between B-63 and B-65.

3. Listen during transit on 2182 kHz and VHF Channel 16.

4. In event of unforeseen circumstances requiring vessels to anchor, area West of Estacada Northern Buoy mooring outside of channel limits will be used.

Vessels proceeding to La Estacada Terminal must enter the Outer Channel and embark the Government Pilot between Buoys B-25 and B-27. After vessel arrives in the vicinity of the E.M. Buoy, Master must contact San Carlos Pilot Station by radio-telephone on frequency 2182 kHz or VHF Channel 16 requesting Pilot between Buoys B-25 and B-27.

Caution: Masters are warned to keep adequate speed in the Outer Channel even when embarking the Pilot as strong cross currents are encountered near San Carlos and Zapara Island. Pilot boats are fast and fitted with a flying bridge. Once the Pilot is on board the vessel will proceed to La Estacada, reducing speed in the vicinity of Inner Channel Buoys B-63 and B-65 where Maraven Cargo Co-ordinator will board. Accommodation ladder must be rigged up on starboard side.

MAX. SIZE: Water depth in both buoy moorings is 40 ft. mean monthly observed lowest water (MMOLW). Because of the depth of the surrounding approaches, 39 ft. (MMOLW), admissible mid-ships maximum draft in No. 1 is 35 ft. 06 in. fresh water. Under certain tidal conditions, however, with vessels over 60,000 d.w.t., it may be necessary to restrict loading to draft. Masters are requested to be guided by the Cargo Co-ordinator in appropriate draft be loaded.

Berth No. 1: Length up to 720 ft. Beam unlimited.

RADIO: *Information to be cabled to Agent, Maracaibo.*

Upon vessel's departure from the last port bound for La Estacada cable 72, 48 and 24 hours ETA at San Carlos Pilot Station, including in this message last port, Master's name, if A.C. current on board and any requirements. If diverted, cable original destination, also have 5 copies of diversion cable ready on arrival. If the vessel is nominated to load a part cargo only at La Estacada, indicate at which port cargo will be completed. All cables should be sent via PJC (Curacao Radio) and via ITT All American Cables.

A separate cable should be sent to Maraven, S.A. Maracaibo indicating ETA at San Carlos only.

TUGS: Use of 2 tugs of at least 1,600 h.p. is compulsory for mooring and unmooring at La Estacada (Government Decree). Use of 2 mooring launches with crew including a diver, who inspects the submarine loading hoses, is compulsory at La Estacada. These mooring launches remain alongside ship during stay in berth order act in any emergency.

BERTHING: *(a) Description:* Marine Oil Loading Terminal, is an offshore installation and consists of two permanent buoy moorings, No. 1 to the South, and No. 2 to the North (out of service).

Berth No. 1 consists of 4×14 ft. cylindrical steel buoys, each fitted with a pelican hook to which ship's mooring lines are attached by contractor's mooring launches. On each buoy there are 2×1.625 in. improved plow steel wirelines to supplement mooring lines in order to provide additional security during strong winds. In Berth No. 1 the plow steel wires are 520 ft. long.

Ships moored heading North or South according to prevailing current.

(b) Deballasting: There are no facilities at La Estacada to receive and treat dirty ballast therefore *same must be clean.* All ballast is discharged ashore through a 16 in. line.

(c) Mooring: All ships should have an adequate supply of stoppers or other special equipment necessary to handle wires attached on mooring buoys. Vessels mooring in berths must be equipped with 4 ropes forward and 4 ropes aft. Vessels are cautioned that good quality ropes are essential and that they will be held liable for any damage occurring through improper or poor mooring ropes or inability to properly handle same.

Vessels in buoy moorings must have deck winches in readiness for use at all times. Method of berthing will be at discretion of the Government Pilot, as weather and other conditions permit.

During berthing and unberthing, ship's engines, tackle and all other gear must be in operative condition and in a state of readiness for use on immediate notice.

Weather permitting, and berths being available, vessels may be berthed at any hour of the day or night. Mooring buoys are properly lighted.

Government Pilots will assist in mooring the vessel in Berth. Loading hoses can be connected both port and starboard side, according to ship's position. The Company Cargo Co-ordinator will remain on board ship to advise on connecting and disconnecting loading hoses, and loading of cargo.

The Government Pilot will later unmoor the vessel and take her out to the channel for departure.

When ship is in position and mooring wires taut, mooring winches such as tension winches must have their manual brakes put on securely, and should not rely on automatic rendering devices.

During time vessel is at the berth, frequent and regular inspection of mooring essential to ensure that mooring lines are kept taut and that movement of ship is kept to a minimum. When tugs are alongside or assisting a tanker, all cargo openings, permanent ballast tanks, lids and pump-room doors must be closed no matter what grade oil is being or has been carried, unless these spaces are gas-free.

The mooring operations are carried out by 2 mooring launches and 2 tugs.

TANK INSPECTION: As soon as all ballast is discharged and hoses connected, production supervisor or cargo co-ordinator will inspect ship's tanks. If same are dry and clean he will sign corresponding certificate.

LOADING: Berth No. 1 has 1×24 in. loading line with the corresponding manifold. 12 in. – 150 lb. marine loading hoses are used. The berth is capable of a max. loading rate of 22,500 bbls.p.h., with an appropriate reduction for topping-off.

However, maximum loading rate entirely at Company's option and will vary according to circumstances and type of tanker concerned. When completing loading, stoppage of cargo will be determined on board, and Masters are requested to inform Cargo Co-ordinator at least 30 minutes in advance in order reduce pumping rate for topping-off. Cargo Co-ordinator will be in continuous contact with pumping station by means of portable radio. Should this means of communication fail, the following signals on ship's whistle will apply:

One long blast = Stand-by
Two long blasts = Commence pumping
Three long blasts = Stop pumping

Upon completion of loading, Cargo Co-ordinator, together with ship's officer, will gauge ship's tanks and later prepare cargo documentation.

DENSITY: 997 – 1003.

FRESH WATER: Must be ordered with first ETA cable to Agents so that arrangement can be made with supplier. A water barge and a tug must be hired.

FUEL: Bunkers and marine fuels supplied by barge before or after loading operation at anchorage. Agent should be given prior notice.

CONSULS:

The following have consular representatives in Maracaibo:

Belgium
Chile
Colombia
Costa Rica
Denmark
Ecuador
El Salvador
France
Germany F.R.
Great Britain
Guatemala
Italy
Mexico
Netherlands
Nicaragua
Norway
Panama
Peru
Spain
Sweden
Switzerland
U.S.A.

REPAIRS: Only smaller repairs can be effected locally; however, technicians available for radio and radar repairs. Contact Agent.

SURVEYORS: American Bureau of Shipping and Lloyd's Register have Agents in Maracaibo.

SHORE LEAVE: Launch is primarily for use of authorities and company staff, but will effect trips for crew if required by Master. Contact Agent who will make necessary arrangements.

GUARDS: One National Guard stationed on board. He must be provided with sleeping quarters and seated in officers' mess for meals.

He is the representative of the Venezuelan Government and therefore any courtesy extended to him will be appreciated.

CLEARANCE: Immediately after termination of loading operations, hoses are disconnected and Government Pilot will proceed to unmoor vessel. In the meantime, cargo documents are prepared by Terminal personnel, and as soon as vessel is cleared, she will proceed to her destination.

CURRENT/TIDE: Current velocity max. 4 knots. Nature of bottom, mud. The tidal range in feet for the Estacada Terminal is Springs 1.5, Neaps 0.5.

GENERAL: *(a) Cash Advance:* Cash advance will be in local currency (Bolivares). Cable in advance any such requirements to Agents.

(b) Mail: Outgoing correspondence may be given to the marine dispatcher. For personal mail (crew) a list should be made, indicating name of crew member, quantity of letters and destinations, and handed to Agents.

(c) Ship Chandlers: 2 ship chandlers in Maracaibo who can supply vessels with fresh meat, fish, vegetables, fruits, etc. Requirements should be transmitted in first ETA cable to Agents.

TONNAGE APPLICABLE:

The Venezuelan Port Authorities base part of their pilotage charges on the size of the vessel, i.e. on registered net tonnage or on Venezuelan net tonnage.

On Registered Net Tonnage:

Venezuela will accept the tonnage of ships registered in countries with which they have a reciprocal tonnage agreement.

As of this date, such countries are:

Denmark
France
Germany F.R.
Ireland
Netherlands
Norway
Portugal
Sweden
United Kingdom
U.S.A.

On Venezuelan Net Tonnage:

Ships not registered in countries listed above, when calling at Venezuelan ports for the first time, must be measured for Venezuelan tonnage by the Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and return it before sailing. The Venezuelan Admeasurement Certificate, when later issued, is forwarded to the owners. A fee is charged for this certificate, which is payable only on the ship's first call.

AUTHORITY: Capitania de Puerto, La Ciega – Maracaibo, Venezuela. *Tel:* 226480, 226880. *Cables:* Caripuerto.

Section C

LA SALINA (Lacustre): 10.22 N. 71.28 W. **(See Plan)**

(N.B. For important details of Documentation, Pilotage, etc., see "Maracaibo Lake").

OPERATORS: All terminal facilities are under the control of Lagoven, S.A.

APPROACH: Entrance and leaving this terminal is made between Buoys B – 97 and B – 98.

LOCATION: La Salina located on Eastern shore of Lake Maracaibo, in Lat. 10° 22′ 18″ N., Long. 71° 27′ 49″ W. about 60 miles from the Entrance Buoy "EM".

DOCUMENTS: These are generally placed on board prior to departure. Vessels whose Master accepts the early departure procedure may sail with documents in blank. Figures are then radioed for inclusion in blank documents. Outward Clearance documents are placed on board the vessel prior to departure.

PILOTAGE: In the event that no contact can be made with San Carlos Pilotage Station, or if there is a language problem, contact should be made with Vensport, at La Salina by voice radio on VHF Channel 16 (156.8 MHz).

The Docking Master boards by tug or launch at the waiting anchorage or in the outer part of the navigation channel leading to the terminal.

ANCHORAGE: The waiting anchorage off La Salina is located immediately Eastward of Buoys B – 97, AS – 1 and AS – 3 (Old numbers M – 1, M – 1a and S – 1); it has a depth of between 40 ft. and 41 ft. and fair to poor holding ground in soft mud.

RESTRICTIONS: None. The port is open for navigation during the day and night, allowing ships to enter and sail at any hour.

MAX. SIZE: Up to 112,000 d.w.t., LOA 900 ft. and max. draft 39 ft. (brackish water) at Berths No. 6N, 6S, 7N and 7S. Max. distance bow to manifold 450 ft.

Pier No. 3 (West Side) LOA 690 ft., draft 26 ft. and 36,000 d.w.t.

Pier No. 3 (East side) LOA 575 ft., draft 26 ft. Max. 18,000 d.w.t.

No restrictions on vessel's beam at any of the berths.

The access channel to La Salina has a least depth of 41 ft.

Special Note: Maximum draft for loading vessels at La Salina Lacustre Terminal is actually restricted to 39 ft. Vessels loading at this maximum draft of 39 ft. must cross the outer bar channel at HW.

RADIO: The cable and telegraphic address for the Lagoven, at La Salina is "Lagoven La Salina". Radio messages to and from ships at sea are routed through the Government radio station at Maiquetia (La Guaira) call letters YVG. This station operates on a 24 hour continuous watch on 500 kHz and 2182 kHz.

Listening frequencies: long wave: 500 kHz; medium wave 2182 kHz short wave Channels 5 and 6.

Working frequencies: long wave 417 kHz and 464 kHz; medium wave 2120 kHz; short wave 4222 kHz, 6351.5 kHz, 8461 kHz and 17141.5 kHz.

Answering frequencies: long wave 500 kHz.; medium wave 2182 kHz

Hours of watch:

4222, 6531.5 kHz	0100 – 1300 hrs. GMT
8461, 17141.5 kHz	1300 – 0100 hrs. GMT

Cables for vessels may also be routed via Curacao Radio, call sign PJC

Radio notice of arrival should be sent 72 hours prior to arrival at La Salina and corrected if weather or other conditions delay the vessel.

Vensport La Salina handle all communications between vessels and Lagoven Terminal control tower. VHF radio-telephone Channel 16 (156.8 MHz) may be used for initial contact. Channels 6, 10, 13 and 14 are also available on a 24 hour basis.

All vessels en route to La Salina may also communicate with Lagoven Amuay or Caripito Marine Offices and request that messages dealing with corrected ETAs, Pilots and other business be relayed to Vensport La Salina.

VHF: Transmit on VHF when passing Aruba or Amuay Bay updated ETA messages to either Lago Marine or Amuay Marine for relay to La Salina. Contact Vensport La Salina on VHF when within reach (normally after passing General Urdaneta Bridge) for latest berthing instructions.

TUGS: Lagoven S.A. maintains one 3,000 h.p. diesel tug and one 1,300 h.p. diesel tug. Tug-boat assistance is considered essential and is afforded to all vessels entering, leaving or shifting in the harbour.

Additional tugs can, in an emergency, be ordered from Maracaibo. The tugs are usually employed in the alongside mode and are made fast using their own ropes (2.5 in. diameter nylon).

BERTHING: At La Salina, Lagoven maintains a deep-water terminal (Lacustre) consisting of an island where are located 2 finger piers, each 1,100 ft. in length and 500 ft. between piers, providing 4 berths to accommodate tankers up to 112,000 d.w.t. Berths are numbered 6N, 6S, 7N and 7S, from North to South. At these berths various products can be loaded simultaneously namely – 6N and 6S – Crude, Naphtha and Butane; 7N and 7S – Crude; Pier No. 3 (West side), Propane and Butane; Pier No. 3 (East side), same as West side but not concurrently with West side. In addition there is an offshore platform (Pier No. 3 where liquefied petroleum gases (Butane and Propane) can be loaded.

Instructions concerning berthing are given by Vensport La Salina by means of radio-telephone.

The use of an anchor when docking is permitted at all berths. It is considered prudent to have the outboard anchor hove-out prior to entering the harbour in order to facilitate speedy release if necessary while docking. The Pilot will advise whether the ship is to be berthed port or starboard side to the dock.

The tugs are made fast on the seaward side, one forward and one aft. Vessels berth under normal circumstances always with head in, which is a relatively simple manoeuvre. Vessels are berthed starboard side alongside Berths 6 North and 7 North; portside alongside at Berths 6 South and 7 South.

When the vessel's bow is between two and three ships' lengths from the head of the pier, the engines are stopped or reversed. The vessel then slowly enters the berth parallel to and about 40 ft. from the continuous fender face. When the vessel's bow is just past the berth's manifold area, the forward spring line is sent in by heaving line. The vessel is then positioned by using its ropes and is pushed alongside by tugs. The current sets mostly in a general Northwesterly direction with a velocity between 0 and 2 knots. This should be taken into account particularly when berthing at the South facing berths where the vessel may be set onto the pier.

Moorings: Mooring bollards spaced with 80 ft. intervals are located on both sides of the pier, and provide the basis for a potentially excellent mooring configuration consisting of:

3 Head lines
3 Stern lines
2 Breast lines
1 Forward, Spring line and
1 Aft Spring line.

BALLAST: Vessel should arrive at La Salina with sufficient ballast to permit safe handling. Government Pilot requirements in this connection under normal weather conditions are interpreted as drawing approximately 8 ft. forward, 18 ft. aft, on a T – 2 or similar type tanker and 11 ft. forward, 20 ft. aft on a 26,000 d.w.t., on larger type vessels the minimum draft required is 14 ft. forward and 22 ft. aft.

Ballast should be carried in a minimum number of tanks, and all other tanks stripped, so as to minimise deballasting time.

It has been established that one of the major causes of contamination of crude oil is the relatively small amount of salt water remaining in the ship's tanks, pumps, and ballast lines after ballast discharge. This very small amount of salt, nevertheless, frequently results in costly damage and downtime to refining equipment, besides presenting many other processing problems.

It is therefore requested that the full co-operation of the Master and Officers of ships loading for Aruba, be given to ensure that all ballast tanks and lines are flushed with lake water and stripped as dry as possible.

Vessels equipped with a separate and completely segregated system of ballast tanks, lines and pumps, will be permitted to discharge ballast and load cargo simultaneously, providing approval of both the pier foreman and Petroleum Inspector is secured.

A Pier Supervisor who is in direct communication with the loading pumphouse is stationed at each pier during the entire time the vessel is discharging ballast or cargo or receiving cargo.

All dirty ballast must be discharged ashore. The terminal has a 100,000 bbl. reservoir connected to two high capacity separator units. Max. ballast discharge is 40,000 bbls./hr. with max. 130 p.s.i. at rail. One or two hard arms (12 in.) are usually connected for ballast discharge.

If it is desired to follow the "load-on-top" procedure it is requested that the marine representative be informed on arrival.

POLLUTION: There are no shore facilities to recover an oil spill. The Venezuelan authorities take a very serious view of oil pollution and heavy fines are imposed for violations of the strict pollution rules. A government representative is stationed at the terminal. It is therefore important that all precautionary measures be taken and spills avoided. In case of a spill, the port services section should be informed immediately by VHF or telephone, which is located on the pier. The use of dispersants or detergents on the water is not permitted.

LOADING: Instructions as to grade or grades of cargo, and the approximate loading rate anticipated, will be given to the Master on arrival. Supplementary information including number and size of lines and Chicksan arms will be furnished to the Chief Officer before loading commences. Loading rates will be reduced as required when topping off.

If vessel's loading orders from owners or charterers do not agree with the terminal's orders, either as to grades or quantity, the marine representative should be advised immediately. The terminal is authorised to load 10% more or less than the quantity nominated.

A terminal employee is stationed at each pier during the entire time the ship is discharging ballast, bunkering, or loading cargo. Fifteen minutes "standby" notice should be given to this man prior to completion of ballast, bunkers, or cargo.

Shut-down controls for all crude oil pumps are available at each loading berth at ship's rail of loading vessels for use in case of emergency only.

LOADING RATES: Loading operations at La Salina Terminal are normally carried out at relatively high pumping rates; up to an average of 40,000 bbls.p.h. Ship's officer will be advised by the pier supervisor at what rate the cargo will be loaded. LPG is loaded up to an average max. rate of 7,500 bbls.p.h. at Platform No. 3.

During periods of calm, loading of gasoline or other similar low flash products may be at lower rates or loading stopped if the heavy vapours are not being dispersed quickly enough to prevent hazards from accumulated gas pockets. Ships' officers are cautioned to be on their guard during such conditions.

Loading rates will be reduced when topping off, if requested by the ship's officer.

Cargo *Handling:* The terminal is mainly a crude exporting facility, but also LPG, bunkers, condensate and gasoline are handled.

The cargo transfer facilities are:

Berth 6 *North and South:*

3 × 12 in. Chicksan arms for crude loading.
1 × 8 in. Chicksan arm for bunkers (located aft of manifold).

Berth 7 *North:*

4 × 12 in. Chicksan arms for crude loading.
1 × 8 in. Chicksan arm for bunkers (located aft of manifold).

Berth 7 *South:*

4 × 12 in. Chicksan arms for crude loading.
3 × 12 in. Chicksan arms for pressurised gas loading (located forward of crude loading manifold)
1 × 8 in. Chicksan arm for bunker (located aft of manifold).

Gasoline, condensate and pressurised butane are handled at Berth 6 at both sides of the manifold.

All connections are standard 150 ASA bolt hole flanges.

The emergency cargo stop button is located in the operators' shelter on both piers.

Crude loading rates up to 50,000 bbls./hr. can be provided.

The loading and discharging of all crude petroleum and its products will be stopped during the passage of an electric storm and ullage covers must be closed and dogged down.

Cautionary *Advice:* Whenever non-matching flange sizes necessitate the use of reducers (spool pieces), Masters should insist that the reducer or hard arm be adequately supported by a proper jack, and should refuse to let cargo transfer operations commence before a satisfactory vessel manifold and hard arm connection has been provided.

MEDICAL: Complete medical, dental and hospitalisation facilities are available at La Salina. Medical treatment is provided at a private clinic.

Authorisation forms for medical treatment are provided which require the Master's signature. Transportation will be supplied by Vensport La Salina.

If the patient does not speak Spanish or English, an interpreter should accompany him.

DENSITY: Average density at the berth is 1002 but varies dependent upon amount of rainfall. The temperature ranges from 82°F. to 86°F.

FRESH WATER: A limited supply of fresh and boiler water is available at La Salina Lacustre Terminal. Delivery is made through 2.5 in. National Standard Fire Hose Thread hydrants. Ship's personnel must provide hoses and connect up.

FUEL: Bunker C fuel oil, marine diesel and intermediate fuels are available at La Salina Terminal Lacustre. Delivery is made alongside Piers 6 or 7 by 8 in. diameter Chicksan hose, located about midships. *Loading Rates:* Bunker "C" and intermediate – 3,000 bbls.p.h. Diesel – 2,000 bbls.p.h.

It is the responsibility of the ship's engineer to give "stand-by" notice to the terminal employee and advise him when to shut down.

Supplies of lubricating oils in drums are available. Delivery will be effected while loading and requirements should be incorporated in the radio ETA.

FIRE PRECAUTIONS: The recognised fire alarm signal is 4 long blasts with ship's or tug's whistle. An 8 in. fire water main line runs alongside all 4 berths with numerous double 2.5 in. outlets for connection to ship's hoses. Four elevated water/foam monitors are located on each pier providing relatively good fire fighting protection for the main deck area.

The 2 tugs are also equipped with elevated fire water/foam monitors, though on board foam storage capacity is relatively limited.

CONSULS: The following countries have consular representatives in the area:

Belgium
Chile
Colombia
Costa Rica
Denmark
Dominican Rep.
Ecuador
El Salvador
France
Germany F.R.
Great Britain
Guatemala
Italy
Netherlands
Nicaragua
Norway
Panama
Peru
Spain
Sweden
Switzerland
U.S.A.

REPAIRS: Vensport's Port Staff will assist with emergency repairs as may be required in each case depending upon availability of competent personnel and equipment. The company's shop facilities while not equipped for extensive ship repairs, may be made available to fabricate or repair items that are urgently required.

The nearest dry docks are those at Puerto Cabello and Curacao, N.A. Several contractors in the area provide labour for hull painting and for tank cleaning. Contracts for these services are made by the ship's Master directly with the contractor.

Radio technicians are available for minor repairs. With sufficient advance notice a radar specialist can be arranged to board the ship at La Salina.

TIME: GMT minus 4 hours.

SHORE LEAVE: Shore leave is permitted and a representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing, and given to Pilot undocking the vessel. Vessels are not permitted to sail until all crew members are on board, unless hospitalised or prior arrangements made for disembarking. No launch service for liberty parties is available while vessel is anchored off La Salina awaiting berth.

GENERAL: Representatives of Vensport La Salina board vessels immediately on arrival, and it is particularly requested that Masters indicate at that time all ships' requirements. The office building is located at the Pier Head Trestle and personnel are available for assistance at all hours.

(a) Bonded Stores. Cigarettes or other stores in bond are not obtainable in La Salina.

(b) Cash Advances. Cash advances are made in local currency, the Venezuelan Bolivare. Cash requirements should be included in the radio ETA.

(c) Charts. On first arrival of each tanker, the Agency Dispatcher will furnish a set of local charts if required. No supplies of U.S. Hydrographic or British Admiralty charts, or sailing directions, are available.

(d) Classification Societies. American Bureau and Lloyd's Register have non-exclusive Agents in Maracaibo, and qualified Masters and Chief Engineers are available for appointment as Surveyors when required.

(e) Gangways. All vessels using the Port of La Salina must provide a safe gangway. The use of rung ladders, pilot ladders, etc., is contrary to Port Regulations and Port Authorities will not board except by means of a safe gangway or accommodation ladder.

(f) Plimsoll Marks. The Captain of the Port requires that the Plimsoll Marks of all vessels using the port be clearly visible. Vessels may be checked on completion of loading, and if the Plimsoll Marks are not readily legible, permission to sail may be withheld.

(g) Port Services. On arrival at La Salina Terminal, a company representative boards vessels, so it is particularly requested that Masters make known to him all ship's requirements. Master should bear in mind that while vessels are within Venezuelan territorial waters, Government Authorities do not permit the use of ship's radio equipment. Cables and radiograms should be handed to the company representative for transmittal via shore radio communication system. La Salina also has radio telephone communication with North and South America and Europe. For further information contact Vensport in the terminal building, Tel. 88491 and 88492.

(h) Rat-guards. By order of the Port Authorities, vessels are required to use ratguards on all mooring lines.

(i) Personnel – Seamen left ashore: In the case of seamen left ashore for hospitalisation, repatriation or other reason, documents and personal effects are to be delivered to the Vensport Office in La Salina before sailing. A letter is required from the Master advising maximum advances to be made to seamen if any, and instructions concerning repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account.

It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, Agent or Owner, responsible for any seamen left behind in Venezuela.

(j) Provisions and stores. Fresh and dry provisions are supplied by various Ship Chandlers in Maracaibo and Cabimas (La Salina). Master should deliver his signed requisition to the Vensport Office representative who boards on arrival. Provisions would then be delivered to the vessel while loading. The prices and quality of some items, such as fresh fruit, fish, shrimps, vegetables, etc., are competitive; dry stores

are considerably higher than in most ports. The Fleet Steward will assist in filling requisitions. It is important that the Master sign the Ship Chandlers invoice as authorisation for the Marine Department to make settlement.

(k) Mail. Any pending ship's mail will be delivered on board by the Vensport Dispatcher on arrival at La Salina. At same time he will receive ship's mail to be dispatched. The Vensport Dispatcher will accept personal mail only if it carries the proper amount of Venezuelan postage, or if Master authorises the postage by signing 7 copies of the Company Postal Transmittal form. Masters interested in knowing the individual postage amounts to be paid by each crew member, should provide a list, in duplicate, of the senders, and number of letters sent by each one identified by a number written on each letter.

Copy of this list will be returned aboard the vessel when leaving this port outward bound. If not ready on time, it will be airmailed to the vessel's next port of call.

(l) Inspection of Petroleum Products and Crude Oil. Chas. Martin & Company and E. W. Saybolt petroleum inspectors are available if specified.

(m) Laundry. Laundry service is available between 0700 hrs. and 1700 hrs. on week-days. No guarantee can be given on time of delivery.

AGENT'S NOTICE: December 1987.

TO ALL MASTERS CALLING AT LA SALINA

We would like to draw your attention to the following:

(a) Terminal of La Salina is an artificial island. For safety reasons during your vessel's call, a permanent (24 hours) taxi service has been arranged to take you and your crew from island to main gate and vice-versa.

(b) This taxi service MUST NOT be paid for by you or your crew.

(c) No idling or walking around the island and/or terminal is allowed.

(d) It is impossible to go through La Salina's main gate without the Harbour Office Shore Pass duly filled in with name, nationality, vessel's name, passport number and date.

(e) Your agent's call name at branch office of La Salina is "Agemar La Salina", standing-by 24 hours on VHF Channel 16, telephone numbers 45665 and 43089, direct line of Lagoven 3235. Agency's call name at main office also standing-by 24 hours on VHF Channels 12, 14 and 16 is "Agemar Maracaibo".

(f) Whenever calling "Agemar La Salina" and no reply is obtained, please contact "Agemar Maracaibo" and leave your message.

(g) If an emergency arises concerning bunkers or cargo, you must contact Lagoven's employee-in-charge of the pier at the small house beside the vessel or call by the telephone of the pier to the Loading Master, Tel. No. 3587, 3304 or 3258.

(h) Launch operator's call name is "Servicios Portuarios" on VHF Channel 16 (24 hours), Tel: 3491 and 3492. In case you need to contact Lagoven, there is always an employee on the pier with a telephone. Bunkers or water facilities are available at this pier.

(i) Water and bunkers are available at Piers No. 7 and No. 6. Water is taken through vessel's hose while bunkers by shore's Chicksan or rubber hose.

(j) Two hours before loading operation finishes, a radio call should be made to "Agemar La Salina", so that arrangements for pilot, tugboats and other sailing procedures can be made. (*)

(k) In case of oil spillage, an immediate call should be made to "Agemar La Salina" or "Agemar Maracaibo", giving the name of your P & Club. We will contact the area representative and request their assistance.

(l) It is recommended that a crew member stands-by on VHF, one hour after vessel finishes loading.

(m) Maximum sailing draft is 39 ft. 00 in. even keel – NOT ONE INCH MORE.

(n) Crew Disembarking – In order to obtain 25% discount on air tickets and to cover IATA Regulations, Master must issue a letter addressed to Agemar requesting the tickets and mentioning name, destination, passport number, nationality, age. If any excess luggage (only 40 kgs. allowed per person), Master has to authorise same and inform agents. Our agent at Maiquetia Airport will take charge of this expense on behalf of Owners. Weighing of baggage should be done onboard and letter must be done on vessel's official paper, signed by Master and with the vessel's stamp on it. Crew members disembarking have to keep their Shore Passes. *All other shore passes must be returned to the Agent and he must be informed whether all crew members are on board.*

(o) Medical Attendance – Call immediately "Agemar La Salina" and send the person that is sick to the hospital, by the taxi, also call Lagoven's Control Tower. Taxi has a visible identification that says "Linea Zulia". Taxi driver will not only take the crew member to the hospital but will also pick up Agemar's agent and service order as well.

(p) No external painting of vessel (hull) is allowed while berthed or anchored. It is forbidden to deballast from cargo tanks (clean or dirty) into the lake. Heavy fines will be imposed on those not complying with these regulations. Smoking is not allowed on all piers.

(*) Please call by VHF Channel 16 to "Agemar La Salina", today at 1800 hours local time, informing the estimated time of completion of loading.

Section D

MARACAIBO: 10.42 N. 71.39 W.

On the N.W. shore of the Lake Maracaibo.

Maracaibo is the capital of the State of Zulia and seat of all Government and Consular Offices, as well as the port of entry for all vessels loading at one of the Terminals in the Lake of Maracaibo. (N.B. For information details of Documentation, Pilotage etc., see "Maracaibo Lake").

Also see "Shipmaster's Report" before Bajo Grande.

ANCHORAGE: The Pilot will not con the ship into the anchorage, but will indicate the proper location to anchor. Care should be taken because of small boats and ferry traffic.

ACCOMMODATION LADDER: Vessels must provide an accommodation ladder. The use of trunk ladders, pilot ladders, etc., is contrary to port regulations. Port Authorities will board only by means of an accommodation ladder. It is recommended to rig this in advance to avoid unnecessary delays.

BOARDING PARTY: The boarding party usually consists of the following persons: One Quarantine Official, Two Customs Officials, One Port Captain's Representative, Two representatives (Agent and Mooring Master).

RADIO: "Radio Marina" transmits information of interest to navigation every day from Monday to Friday from 1000 hrs. to 1015 hrs. and from 1600 hrs. to 1615 hrs. on frequency of 4,420.7 kHz in the 60 m. band, output 1 kW. All bunker, lubricating oils, water and other requirements should be included in the cable giving ETA of the vessel.

TUGS: Service not compulsory, assistance is rendered if required by the Harbour Master.

BERTHING: The manoeuvring area within Maracaibo harbour has a depth of 26 ft.

	Length	*Depth alongside*
Wharf No. 1	106 m.	15 ft.
" " 2	106 m.	15 ft.
" " 3	159 m.	15 ft.
" " 4	159 m.	22 ft.
" " 5	135 m.	25 ft.
" " 6	135 m.	26 ft.
" " 7	135 m.	26 ft.
" " 8	135 m.	26 ft.
" " 9	120 m.	25 ft.
" " 10	120 m.	22 ft.
" " 11	120 m.	22 ft.
National Brewery Wharf	125 m.	19 ft.
Regional "	120 m.	21 ft.
New Pier (2 berths)	—	30 ft. – 33 ft.

STEVEDORES: Normal working hours 0700 – 1100; 1300 – 1700 and 1800 – 2300 hrs.

MEDICAL: Complete medical services are available.

FRESH WATER: All wharves supplied with fresh water by 2 in. hoses. Rate 15/20 t.p.h. Fresh water also available from local contractors with barges.

FUEL: Heavy and medium marine diesel, intermediate fuel, and bunker "C" fuel oil are available at Maracaibo from local contractors with barges. Supplied only by barge at the wharves or anchorage. Lubricating oils are also available.

CONSULS:	Telephone		Telephone
Belgium	3235	Italy	—
Colombia	72232	Mexico	6781
Costa Rica	6511	Netherlands	4621
Denmark	6531	Nicaragua	76703
Dominican Rep.	6511	Norway	78911
Ecuador	74055	Panama	78110
El Salvador	74241	Peru	4545
France	5297	Portugal	80870
Germany F.R.	76061	Spain	71118
Great Britain	6169	Sweden	6511
Guatemala	71193	United States	2123

REPAIRS: No major repairs facilities are available; however, repair work can be done through local machine and electrical shops, and shore labour can be furnished if required. Radio and radar technicians are also available.

AIRPORT: International Airport "Granode Oro" situated N.W. of Maracaibo City served by many national and international airlines. A second airport with cargo and passenger services is situated at Santa Barbara del Zulia, on the banks of the Escalante River.

HOLIDAYS: All Sundays; 1st January; Good Thursday and Friday; 19th April; 1st May; 24th June; 5th July; 24th July; 12th October; 24th October; 18th November; 17th December; 25th December.

POLICE/FIRE/AMBULANCE: Police tel. 3821; Fire tel. 6585; Ambulance tel. 2209.

TELEPHONES: There is no service for connecting telephones on board vessels. Public telephones are situated in the warehouses adjacent to all wharves.

PROVISIONS: Fresh and dry provisions are available through ship chandlers in Maracaibo for delivery at Maracaibo Harbour or at the terminal.

SHORE LEAVE: Launch service in the Maracaibo harbour is readily available for official ship business. For personnel shore leave, depends on launch availabilities on arrival.

SHIPMASTER'S REPORT: 1976

Communication: Considerable difficulty was experienced raising La Guaira Radio Station (YVG) for transmitting the necessary ETAs. Our messages were transmitted via Portishead (GKR). Agents, however, advised that messages are normally transmitted through Curacao (PJC)

Pilotage: Masters making their first visit to the port are to embark the Pilot at Punta Cardon (Paraguana Peninsula). Ample notice must be given to the Agents as the Pilot has to be flown there from Maracaibo. Masters making their first visit to Maracaibo must also disembark the Pilot at Punta Cardon on departure. Masters may thereafter proceed directly to San Carlos pilot station.

Communications can be made through the Harbour Master's Office Punta Cardon.

Delays experienced off Punta Cardon did not occur on this particular occasion. Pilot boards and normally rests in the pilot's cabin until 30 minutes from the "EM" Buoy.

Berthing: 2 tugs are compulsory for vessels berthing/unberthing when the vessel's length exceeds 476 ft. All other vessels 1 tug compulsory.

Stevedoring:

Normal working hours	
(Monday – Friday)	0700 to 1100 hrs.
	1300 to 1700 hrs.
	1800 to 2300 hrs. (Overtime)
(Saturday)	0700 to 1200 hrs.
(Sundays & Public Holidays)	*No work.*

Vessels must be fully rigged and hatches open and ready in all respects to load or discharge at least 15 minutes before stevedores arrive. If necessary shore labour is available to assist.

SHIPMASTER'S REPORT: 1975.

Arrival Messages: Cable Agent – Maracaibo via La Guaira Radio on departure Cristobal with ETA Punta Cardon, draft, cargo stowage, gangs required and requirements. (For subsequent calls vessel will be permitted to proceed to San Carlos pilot station to embark Pilot).

24 hours prior to arrival repeat ETA Punta Cardon, to be sent as described above.

2 hours before arrival at pilot station – Punta Cardon call on Channel 12 VHF to update time of arrival.

Pilotage: Pilot boards at Punta Cardon about 1 mile off the tanker berths from a launch with a "roof landing", therefore the pilot ladder must be about 6 ft. from the water. This Pilot travels from Maracaibo to meet the vessel at Punta Cardon and takes the vessel all the way to Maracaibo. Punta Cardon to "EM" Fairway Buoy – 78 miles. "EM" Buoy to Maracaibo – 35 miles.

Once the vessel has made a call at Maracaibo the Master is then exempt and may take his vessel direct to the "EM" Buoy and negotiate the buoyed channel for 12 miles to San Carlos Pilot Station. The channel is straight, wide and the buoys are well lit and marked. A Westerly set is said to prevail across this channel from the "EM" Buoy to San Carlos Pilot Station but it was not evident on our passage in or out. However, a strong ebb tide was noticed running out to sea off San Carlos Pilot Station. The channel from the "EM" Buoy to Maracaibo is dredged to 41 ft. but off the berths at Maracaibo the maximum draft is 26 ft. There had been a lot of unseasonal rain prior to our call and we noted that the density of the dock water was 1001.

Documents:

1 Health Declaration.
8 Stores Lists.
8 Crew Lists.
6 Passenger Lists (If no passengers these papers have to be entered as "Nil" passengers).
8 Crew Declaration Lists.
2 Venezuelan Manifests (Sent from N.Z.).
2 Sets Bills of Lading (Sent from N.Z.).
12 Sets Tally Books (Sent from N.Z.).

Stevedores: "Servicios Portuarios de Maracaibo".

They have 24 gangs in the port and mechanical equipment to support 16 gangs. Normal working hours are 0700 – 1130 and 1300 – 1630 hrs. Overtime 1800 – 2230 hrs. Saturday 0700 – 1200 hrs. No work on Sunday.

The labour works well but is not accustomed to working refrigerated ships and when the gangs work into the wings the Agent had to supply the men with warm clothing and hot coffee. Their discharge rate for cartons of frozen cream was 18 t.p.h. In hindsight I would suggest that it would be advisable to stow frozen cream for Maracaibo in a hatch square if possible to obviate the need for the labour to go into the wings as the complaint about the "cold" does not arise until this happens. They had 14 open trucks laid on to take the cartons of cream direct to the butter works and they had an unbroken flow so the "hook" was not held up on this account.

Berthing: There are berths for 6 ocean going ships and they say they can berth these ships up to 26 ft. Tugs are available and because of berthing starboard side to we used 2 tugs. The berths are concrete with rubber fenders and there is plenty of working space for the mechanical vehicles. The Pilots speak a little English but sufficient to make themselves understood and are capable. Fresh water is available alongside but I understand if bunkers are required they have to be brought by barge and there is a minimum charge of $1,000 irrespective of the amount of fuel required. They have a repair facility which is in the hands of a local engineering company. Fresh vegetables are available and can be recommended, supplied by the only providore. He maintains a listening watch on Channel 16 VHF and has a liaison with Agents for any messages sent prior to arrival at the berth. His station is called Automercado Venezia.

Section E

EL TABLAZO: 10.45 N. 71.32 W. (See Plan)

(N.B. for important details of Documentation, Pilotage, etc., see "Maracaibo Lake".)

Also see "Shipmaster's Report" before Bajo Grande.

LOCATION: S.E. part of Puerto Miranda. Entrance by Buoys 63 and 64. Distance from San Carlos Pilot Station 16.5 miles.

Heavy Cargo Dock:	196.8	295	—		—	18

Products Handled: 1. Ethylene; 2. Propylene; 3. Propane; 4. Butane; 5. Nat. Gasoline; 6. Anhydrous Ammonia; 7. Urea in Bags; 8. Urea in Bulk; 9. Chlorine; 10. Caustic Soda; 11. Salt; 12. Styrene Monomer; 13. Monovinyl Chloride; 14. Potable Water; 15. Inert Gas; 16. Ballast Water; 17. Methanol; 18. General Cargo.

Products to be handled:

Natural Gasoline at	687 t.p.h.	
Estirene	160 ,,	
Methanol	687 ,,	
Isobutane	687 ,,	
Ammonia	525 ,,	temp. −33.3°C
Propylene	40 ,,	40°/6°C
Butane	160 ,,	7.8°C
Monovinyl Chloride	420 ,,	37.8°C
Ethylene	80 ,,	−104°/−70°C

Cargo Equipment:

North Berth:	One urea in bulk loader Cargo capacity 650/700 t.p.h.
South Berth:	Three urea in sacks conveyors. Cargo capacity 2,400 sacks of 50 kg. each per hour.

DENSITY: 997 – 1003.

FRESH WATER: Available, 8 t.p.h., but expensive.

OPERATOR: Petroquimica de Venezuela, S.A., (Pequiven) – El Tablazo, Apartado 159, Manejo de Productos, Maracaibo, Estado Zulia, Venezuela. *Tel:* 311-388. *Telex:* 23206. *Contact:* Captain Antonio Parcero.

PUERTO MIRANDA: 10.46 N. 71.34 W. (See Plan)

(N.B. For important details of documentation, Pilotage, etc., see "Maracaibo Lake").

LOCATION: Situated at Eastern shore of entrance to Lake of Maracaibo, in position Lat. 10° 46′ N., Long. 71° 34′ W.

OPERATOR: Maraven, S.A.

DOCUMENTS: On arrival the Master must present to the Port Authorities the following documents:

1 copy Clearance (Note: If the vessel was diverted, Master has to present a telegram in which vessel received instructions to proceed to Puerto Miranda).
7 copies Crew List.
3 copies Stores List.
1 copy Vaccination List.
3 copies Personal Effects Lists.

Vessel sailing for U.S. ports requested to have American Crew List ready on arrival so it can be forwarded to U.S. Consulate without delay.

PILOTAGE: Compulsory. On arrival Puerto Miranda under Government Channel Pilot's assistance, the vessel will be boarded by Government Berthing Master, who will assist Master in docking and undocking.

For Channel Pilot see "Maracaibo Lake".

ANCHORAGES: North anchorage area is situated at Northern part of the exit channel and is marked by the Buoys No. B57B, AP1, AP2 and AP4. Maximum depth 10.0 m.

South anchorage area is situated at Southern part of the exit channel and is marked by Buoys No. B59, AP3, AP5 and B63. Maximum depth 10.36 m.

RESTRICTIONS: There are restrictions for docking and undocking when strong currents are running.

MAX. SIZE: Length 910 ft., breadth 147 ft., draft 39.5 ft.

HEALTH: On arrival, when Pratique is requested, all vessels should fly international flag signal "Q", or show a yellow light during hours of darkness. Customs will grant Free Pratique only when they are on board.

RADIO: All information such as ETA, ballast, etc. may be sent through Curacao Radio. Telex No. 1143-6472.

Puerto Miranda can be contacted by Telex No. 61115.

VHF: Channels 16 and 12. Vessels are requested to call Puerto Miranda about 3 hours before arrival at the port. Calls made in Spanish language will be answered promptly, as there is always a Spanish-speaking clerk on duty. Calls in English will be answered by the Supervisor on duty, except when he is occupied, in which case the call should be repeated later. As an alternative, the Master could ask Government Pilot to report in Spanish his arrival to Puerto Miranda.

TUGS: 2 motor tugs of 4,200 h.p. assist all vessels in docking and undocking. Tugs always used as required by pilots.

BERTHING:

Jetties/Berths	*Depth M.M.O.L.W.* ft.	*Maximum Permissible* *Draft* ft.	*Length* ft.	*Displacement* tons
Jetty No. 2				
1 (North Outer)	42	39.5	910	90,000
2 (South Outer)	42	39.5	910	90,000
3 (North Inner)	35	34	†575	62,000
4 (South Inner)	28	27	‡575	62,000
Jetty No. 3				
5 Inshore (North Seaward)	42	39.5	910	90,000
6 Inshore (South Seaward)	42	39.5	910	90,000

Remarks: Alongside UKC for ships up to 700 ft. LOA = 1 ft.
Alongside UKC for ships over 700 ft. LOA = 2 ft.

(†) LOA in Berth No. 3: This can be increased up to 620 ft. whenever vessel on Berth No. 1 has LOA up to 555 ft.

(‡) LOA in Berth No. 4: This can be increased up to 610 ft. if Berth No. 2 or 5 are empty when vessel arrives, then Berth No. 2 has to be temporarily restricted to vessels up to 665 ft. LOA

The alongside drafts are subject to reduction owing to depth in inner and outer channels.

Vessels drawing over 37 ft. 06 in. will proceed according to monthly sailing draft table issued by Maraven, S.A.

MEDICAL: Written request for medical attendance, as well as a shore pass, is always required. Master must inform by telex how many crew members will be sent to Maracaibo through the Agent. Ample hospital facilities available at Maracaibo.

TANKERS: Discharge lines 12 in.

Tank cleaning and dirty ballast facilities up to a maximum of 25% of vessel's deadweight.

Discharge of waxy slops and sewage water is forbidden.
Maximum receiving rate for ballast discharge 1,000 t.p.h.
Maximum loading rate 6,000 t.p.h.
Winds are mainly from the N.E. quadrant.
Vessels of any deadweight must secure with at least:

Forward: 4 headlines; 4 breasting fibre ropes and 1 spring in Berths No. 1 and 2.

Aft: 2 stern lines; 4 breasting fibre ropes and 1 spring in Berths No. 1 and 2.

In Berths No. 3, 4, 5 and 6. Forward: 2 head lines; 4 breasting lines and 1 spring.

A suitable gangway will be provided by the shore installation. When it is out of order vessel's gangway has to be used.

The terminal assist in the event of any vessel spillage; but the Master is obligated to make his own arrangements to control the spillage.

BALLAST: *Agent's Notice:* September 1987.

For your guidance please note Maraven's tariff stipulates an additional charge of U.S.$515.00 per hour for extra berth occupation covering any delays attributable to the vessel (tank cleaning, repairs, etc.).

It is important that vessel arrives with tanks in suitable condition to load as per charter party.

If tanks are not accepted by Inspector, the Terminal will charge additional berth occupancy as per above, and if vessel proceeds to anchorage for further cleaning, Terminal fee (tugs and launch for running lines) will be charged again in full for second docking.

The volume of ballast accepted without extra charge to the vessel is up to 25% of her Summer deadweight.

For vessels over 115,000 S.D.W.T., volume in excess of 28,750 tons ballast also applies.

DENSITY: Density of water at berths 997-1003.
Density of water in outer channel 1015-1025.

FRESH WATER: Available at all jetties at a loading rate of between 20 t.p.h. to 30 t.p.h., depending on number of vessels being supplied at any one time. Approximate cost is U.S.$4.0 per ton.

FUEL: Available ex-wharf: Bunker "C", thin fuels from 200 to 3,500 seconds Redwood, and marine diesel. Delivery rate 400 t.p.h. and 80 t.p.h. respectively.

Gas oil, fuel oil and thin fuels may be supplied by barge ex-Maracaibo, delivered at anchor at a maximum rate of 110 t.p.h. and 140 t.p.h.

Notice in advance is requested for delivery.

FIRE PRECAUTIONS: Any hot work is forbidden whilst alongside the Pier. Terminal approval is compulsory for any special requirements.

CONSULS: On all Italian vessels, the Consul comes on board on arrival. Other Consulates are at Maracaibo: Colombia, Netherlands, Panama, Peru, Spain, Great Britain, Guatemala, Switzerland, U.S.A., Chile and Portugal.

REPAIRS: There are small workshops in the area. Contact Agent on arrival.

SURVEYORS:

(1) Cargo Inspectors:
Saybolt. Telex 61120 Maracaibo. Tel: 76975.
Caleb Brett. Telex 23333 Caracas. Tel: (02) 325875.
Inspecciones C.A. Telex 62292 Maracaibo. Tel: 78642.
AIVEPET. Telex 21050 Caracas. Tel: (02) 9860422.
Chas. Martin. Telex 62451 Maracaibo. Tel: 78651.
S.G.S. Telex 23324 Caracas. Tel: (02) 338569.

(2) Surveyors:
Lloyd's Register, American Bureau, Bureau Veritas and Norske Veritas.

CUSTOMS ALLOWANCES: One opened packet of cigarettes allowed to be taken from vessel by each crew member when going ashore. When a crew member signs off, he must present his personal effects to the Customs.

REPATRIATION: Crew changes and repatriation possible. All the arrangements are made by the Agent.

AIRPORT: An International Airport is situated in Maracaibo City. It is served by National and International Airlines. All arrangements through the Agent.

TIME: GMT minus 4 hours.

HOLIDAYS: Do not affect port operations, port works throughout 24 hours, 7 days a week.

POLICE/AMBULANCE/FIRE: All contact must be made in Spanish language. The supervisor will assist in making contact.

Telephones: Police 169. Fire 166. National Guard 168.

EMERGENCY CO-ORDINATION CENTRE: Port Captaincy at Maracaibo, Tel: 9-0-223279 or VHF Channel 16.

TELEPHONES: Whilst alongside, a telephone is placed on board for operational purposes, emergency and internal communication with Maraven telephones. There is no charge.

SERVICES: Radar repairs, R/T repairs, gyro-compass adjusting and all types of electronic repairs.

BANKS: The nearest bank is located at Los Puertos de Altagracia or at Maracaibo City.

STORING: Vessel can be stored by barge or truck; but it is strictly prohibited by barge during loading or discharging, likewise it is prohibited for truck to proceed alongside the ship during loading or discharging.

SHIP SUPPLY SERVICES: Available in Maracaibo. Contact to be made through the Agent.

SHORE LEAVE: Not granted until shore passes are stamped and signed by Authorities. Passport and shore pass required by all crew members going ashore. Passes must be shown to guards at gangway and gates. Crew members must be properly dressed before proceeding ashore. Master must collect all passes and return them to Agent before vessel's departure.

DELAYS: Delays can be expected during deballasting if the levels in the pits are high.

GENERAL: *(a) Tides:* In view of the changing depth in the channels which allow navigation to vessels up to about 70,000 d.w.t. fully laden at high water, permanent predictions of sailing draft tables have been prepared by Maraven S.A., and they will send these on board ships of over 47,000 d.w.t.

(b) Currents: The tidal current (Lunar tide) at this port can at times be very strong and subject to changes. Usually the outgoing tide runs for 7 to 8 hours against 4 to 5 hours for incoming tide. Direction approx. at right angles to jetty.

(c) Movement of Passengers: Embarkation or disembarkation of passengers through this port is not allowed by Venezuelan Law, as the Terminal is only authorised by the Treasury Ministry (Ministerio de Hacienda) exclusively for exporting crude oil.

(d) Failure to Rejoin Vessel: If any member of crew is not aboard at sailing time, Authorities will not clear vessel although permission may be given to proceed to anchorage if the berth is required. If sailing permission is granted, Master is required to sign letter accepting all costs in connection with this matter being for Owner's account.

(e) Launch Service: Masters who have to go on business to Maracaibo can make use of public service launches. Please contact your Agent.

(f) Guards: Custom Guards (Guardia Nacional) will be posted on all vessels and Masters are reminded that these guards must be accommodated and treated in the same manner as ships' officers. Non-compliance entails not only a fine but will result in delays in clearance and cargo operations.

(g) Visitors: Only persons on business allowed on piers. Visitors, as guest of Master, allowed to board vessels provided a written and signed request presented by Master to Port Services Department. Further particulars covering procedure for obtaining permits for visitors can be obtained from Port Services Office.

(h) Charts – Nautical Publications: On arrival of each tanker the Agency Representative will furnish a set of lake charts if required. No supplies of U.S. Hydrographic or British Admiralty charts or Sailing Directions, Nautical Almanac, etc., are available at this port.

(i) Films Exchange: Films may be exchanged at Maracaibo.

(j) Fire Alarm: Each Thursday morning at 1100 hrs. there will be a test of fire alarms including sirens at the wharves.

(k) Cash Advances: Local currency is Venezuelan Bolivar and cash advances are made only in this currency. It is requested that any requirement for cash advances be included in vessel's radio ETA, to permit delivery on board on arrival.

REGULATIONS: Following regulations should be strictly observed by the vessel's crew whilst alongside or at anchor. Non-compliance with these instructions entails not only a fine but delays in cargo operations.

1. Use of rafts for painting the ship's sides is strictly prohibited.
2. Lifeboats should not be lowered without the special permission of the Government Port Captaincy.
3. Swimming in the harbour is strictly prohibited.
4. Waste water, sanitary or other must not be discharged on jetty.
5. It is strictly prohibited to paint ship's name or others on jetties. When this occurs the vessel will be charged for the cleaning.
6. Painting in ships alongside is strictly prohibited.
7. Before start of cargo operations it is compulsory to execute all requirements established in the Check List.
8. It is necessary to keep a close and constant watch on moorings and to adjust when necessary. When adjusting, call for assistance of tugs before slackening off any mooring lines, if the current is setting the vessel off the pier.

AUTHORITY: Maraven, S.A. Apartado 829, Codigo Postal 1010A, Caracas, Venezuela. *Tel:* 908.2111. *Telex:* 23535, 23536. *Cables:* Maraven Caracas.

Section F

PUNTA DE PALMAS: 10.24 N. 71.34 W. (See Plan)

N.B. For important details of Documentation, Pilotage, etc., see "Maracaibo Lake".)

OPERATORS: Maraven, S.A.

FLAG: The Authorities require the Venezuelan flag to be flown from the mast head from the time the vessel enters the outer channel to come into the port until it leaves again by the same channel.

LOCATION: The terminal is located at Punta de Palmas del Sur, approximately 13 miles South of the Port of Maracaibo on the West shore of Lake Maracaibo. The terminal proper may be identified by a 300 ft. radio tower, having 2 small red lights 200 ft. from the base, and 1 large red light on top of tower. The top light flashes every 2 seconds.

PILOTAGE: Vessels which arrive have the option of taking on the Official Pilot at the following places:

(a) In the outer channel of the Lake of Maracaibo, between Buoys B-24 and B-26.

(b) In the anchorage area, located approximately 5.5 miles to the N.E. of the Island of San Carlos and to the East of the Buoy B-17. This area is identified by a green light buoy, equipped with a radar reflector (position: Lat. 11° 04′ 22″ N., Long. 71° 33′ 48″ W.).

(c) On the "EM" Buoy (i.e. Entrance to Maracaibo), there is also a radar reflector (position: Lat. 11° 13′ 47″ N., Long. 71° 33′ 31″ W.).

The Official Pilot who comes on board at San Carlos will take the vessel to Maracaibo. At times, due to bad weather, the Maracaibo Port Captaincy cannot guarantee the embarkation or disembarkation of Pilots at the "EM" Buoy or in the anchorage at Lat. 11° 04′ 22″ N., Long. 71° 33′ 48″ W. For this reason, Masters must contact the pilots station at San Carlos so that they may give him appropriate instructions as to the place of boarding or disembarkation of the Official Pilot, who, generally speaking embarks between Buoys B-24 and B-26.

The system of communications which vessels use with the pilots station of San Carlos will be the morse lamp, radio-telephone or radio.

The frequencies on which San Carlos listens out are: Radio 2182 kHz. Radio-telephone 156.6 MHz. It also operates with frequencies 2080, 2120, 2638, 2738 kHz R/T and 156.8 MHz VHF.

Vessels sailing from Punta de Palmas will take on the Official Pilot at the mooring where they are located after having terminated their loading operations. This Pilot must be requested one hour and forty-five minutes before the estimated time of being ready to sail. Vessels which embark their Official Pilot at Punta de Palmas to sail to Maracaibo will change their Pilot again on arriving at that port. The Pilot who embarks will guide the vessel to the proximities of the Island of San Carlos, between the towers E-31 and E-33, where he will disembark onto a pilot launch. The Port Captaincy of Maracaibo has given instructions to shipping Agents for the purpose of informing Masters and Owners of vessels that every Master must identify himself in advance to the pilot station at San Carlos at any time of the day, when they are arriving at Buoys B-17 and B-19, and when they are sailing at T-42 and T-40. These instructions are of an obligatory nature in order to keep the Pilots' service informed at all times of any emergency that may arise. Also to avoid an Official Pilot going out unnecessarily from his base, especially during the night in the belief that the vessel which is in sight requires his services; in this case both the service of the launch and that of the Pilotage not given will be charged to the ship's Agent or Representative.

Lake Pilotage: An Official Government Pilot will assist every ship in crossing from Maracaibo to Punta de Palmas and in its exit voyage from Punta de Palmas to Maracaibo. This Pilot will also assist in the operations of mooring and unmooring. The Agent will inform the Master and the Official Pilot of the time determined for berthing the vessel when it arrives at Maracaibo. Vessels which load in Punta de Palmas must request a Pilot for their exit journey at least 1 hour 45 minutes in advance of the time at which they consider the vessel will sail.

CARGO DOCUMENTS: Vessel's clearance and cargo papers will be delivered to the Master on arrival in Maracaibo Harbour outbound. Maraven will accept no responsibility for delay in clearing a vessel due to unavailability of personnel from offices of the Port Authorities.

APPROACHES: The buoy which indicates the entrance to the outer channel ("EM" Buoy) is located in the geographical position: Lat. 11° 13′ 47″ N., Long. 71° 33′ 31″ W. The light of the "EM" Buoy has the following characteristics: white light, with 1 flash every 10 seconds, visibility approximately 5 miles. The distance between the "EM" Buoy and the inner extremity (South) of the inner channel, marked with Buoys B-27 and B-28 is approximately 15.75 miles. The outer channel has a width of 300 m. between the limit on both sides. The navigable portion for loaded vessels is 240 m. wide. The average depth which has been checked at low tide is 13.72 m. (45 ft.) and the tidal amplitude is up to a maximum of 1.49 m. (4.9 ft.). There is a breakwater located a half a mile to the East and parallel to the external channel which extends for 2,574 m. (1.6 miles) to the North from the Northern coast of the Island of Zapara. In its outer extremity there is installed the lighthouse of the steel lattice type construction, with a height of 7.62 m. (25 ft.). The characteristics of its light are: white, with 1 flash every 8 seconds, visibility approximately 5,556 m. (3 miles).

The commencement of the internal dredged channel is marked by Buoys B-29 and B-30. The extension of this channel is 19.31 km. (12 miles) approximately and ends at Towers T-55 and T-56. The channel is 244 m. (800 ft.) wide and its normal checked depth is 13.72 m. (45 ft.) at average low tide, with a tidal amplitude which varies between 0.49 m. and 0.89 m. (1.5 ft. and 3 ft.), at Tower T-66, and from 0.82 m. to 1.46 m. (4.5 ft.) at Buoy B-29.

The channel from Tower T-56 as far as the Port of Maracaibo is dredged and its termination is marked by Buoys B-73 and B-74. It is 244 m. (800 ft.) wide and has a depth of 13.72 m. (45 ft.). Its distance is 17 km. (11 miles).

The depth in all the channels may vary in accordance with the sedimentation to which they are subjected and the formation of sand banks. The Port Captaincy at Maracaibo issues Notices to Mariners keeping them informed as to changes in depths in the channels. Navigators are advised to keep themselves up-to-date with these notices of variations of depth when they calculate their exit draft of their respective vessels.

MAX. SIZE:

Berth	*Max. LOA*	*Max. Draft*	*Max. d.w.t.*
No. 1	835 ft.	38 ft.	80,000 tons
No. 2	835 ft.	37 ft. 6 in.	80,000 tons
No. 3	890 ft.	42 ft.	100,000 tons

Also see "Berthing".

RADIO: *Time of Arrival (ETA):* When a vessel leaves its previous port destined for the Terminal of Punta de Palmas, it must inform both its Agent and Maraven S.A. in Maracaibo as to its best estimate of the date and time of arrival in Maracaibo. Then at least 24 hours prior to arrival at the San Carlos pilots' station, it must send another message to confirm the time of arrival at Maracaibo. The nationality of the vessel, name, nett Venezuelan tonnage (if it does not have this, its registered tonnage), last port, name of Master, permanent ballast or cargo in tanks or both, and any other information which is pertinent must be included in this message. The cable address of Maraven S.A. is as follows: Maraven, Maracaibo, Telex 61126. By virtue of the circumstances that the Cable Office in Maracaibo is not equipped to communicate with vessels on the high seas directly, messages sent to Maraven S.A. and to the Agent of the vessel must be transmitted through "PJC" (Curacao), with the prefix "Via ACC" (All American Cables and Radio, Inc.).

We wish to emphasise that by virtue of the fact that our undertaking rents a part of its equipment which it uses for mooring vessels in accordance with the last message of arrival of the vessel, this message must be compiled with the greatest accuracy possible. Any alteration in the time and date of arrival affecting the vessel before or after the time indicated in its message, will be for the account of the vessel as will be the cost of rental of the equipment used.

Maraven S.A. is in no way obligated to carry out the mooring of any vessel, except at the estimated time of its arrival at Punta de Palmas, although exception is made where the vessel may have been delayed in Maracaibo by virture of reasons beyond the control of the Master.

TUGS: Tug service consisting of 2 tugs of not less than 1,600 h.p. each is provided by the terminal operator for all vessels. Both tugs will assist all vessels in mooring and unmooring operations. Should it be deemed necessary by the terminal operator to require a tug in addition to the 2 terminal tugs for mooring or unmooring vessels exceeding 750 ft. in length, charges for this additional service will be for the account of vessel.

Vessels which exceed 835 ft. overall length, and destined for Berth No. 3, require the assistance of at least an additional tug. This additional tug will remain at the convenience of the Terminal for the time that the vessel remains at the berth.

In all cases where there are adverse weather conditions, without taking into account the size of the vessel, the Operator of the Terminal, at his convenience, may request the services of an additional tug to protect the installations of the Terminal and the ship, which will be for the account of the vessel.

The Terminal Department will make the necessary arrangements through the intermediary of the ship's Agent, for contracting additional tugs. These services will be charged to the ship's Agent by the tug operator who is contracted.

MOORING: *Berth No. 1:* Located approximately 8.85 km. (5.5 miles) from the Terminal and 2 km. (1.25 miles) to the West of Buoys D-95 and D-96 in the Maracaibo Channel. Distance between the bow and stern buoys is 364.90 m. (1,200 ft.).

This berth is equipped, apart from the mooring buoys, with a transversal mooring pile on its Eastern side, submerged, with chain and cable the same as those of the Buoys. This does not interfere with the operations of mooring and unmooring.

Berth No. 2: Located approximately 8.85 km. (5.5 miles) from the Terminal and 2 km. (1.25 miles) to the East of the Buoys D-95 and D-96 and to the N.E. of Berth No. 1. Distance between the bow and stern Buoys is 350.50 m. (1,150 ft.).

This berth is equipped, apart from the mooring buoys with a transversal submerged mooring pile equal to that of Berth No. 1.

Berth No. 3: Located approximately 9.65 km. (6 miles) from the Terminal, 1.2 km. (0.75 mile) to the West of the Buoys D-95 and D-96 and approximately 914 m. (3,000 ft.) to the East of Berth No. 2. Distance between the bow and stern buoys is 365.76 m. (1,200 ft.).

This berth is equipped similarly to Berths No. 1 & 2 with a transversal submerged pile on the Western side of the berth.

Conditions applicable to all berths: (a) Vessels which have a total overall length of 239.26 m. (785 ft.) or more must be equipped with 2 tension capstans at the bow and on the after deck, with sufficient cable to reach the stern and bow buoys respectively.

(b) Every vessel loading at any of the berths must take into consideration that due to Government regulations, the vessel must have a minimum clearance of 0.984 m. (3 ft.) below the keel at any point during its transit through the Maracaibo Channel, without taking into account the limitations of the channel assigned to the 3 berths by the Terminal Operator. In view of this regulation and the constant variations of the depths of the channel, Masters must be guided by the most recent "Depth Bulletins" which are issued by the National Channel Institute, and by the tide tables when they are planning their transit time through the channel, and the maximum draft to which they may load their vessel.

Mooring procedures and rules applicable to mooring points: Every vessel carrying out mooring operations at any of the 3 berths must arrive with a minimum draft of 3.65 m. (12 ft.) forward and respect the following procedure and rules for berthing:

(a) Anchor: Vessels approaching the berths from the East, in the most convenient manner and safely as possible they must drop their starboard anchor in its location once the vessel has been berthed, the chain facing East, with a length of not less than 137.16 m. (450 ft.).

(b) Mooring cables: One of the following alternatives for mooring cables at each side of the vessel must be fulfilled:

1. Two cables of synthetic fibre (Nylon or Polypropylene) with 9 in. circumference and 1 steel cable which has a minimum diameter of 1.25 in.
2. One cable of synthetic fibre (Nylon or Polypropylene) with 9 in. circumference and 2 steel cables also supplied by the vessel and which have a minimum diameter of 1.25 in.
3. One cable of synthetic fibre with a 9 in. circumference and a safety cable of 1.5 in. diameter which will be supplied by the Terminal.

(c) Countertension cables: A countertension cable will be attached to the stern or fore deck. Vessels which have a length exceeding 800 ft. must use countertension cables on both sides of the deck simultaneously.

(d) Transversal cable: The transversal cable which will be supplied by the Terminal will be attached to the after deck on the starboard side. Vessels mooring at Berth No. 3 must also attach an additional transversal cable to the after deck on the port side.

(e) All cables which are attached to vessels must have 6 turns around the bitts, and these must be secured so as to prevent them from unwinding.

(f) The pressure capstans must be secured in the braked position, once all other cables for mooring the vessel have been secured. These mooring cables must be maintained tight as the vessel goes down in the water whilst it is being loaded.

(g) Vessels must be supplied with sufficient cables as spares which can be used as the Terminal may require. All cables must be maintained in good condition and are subject to acceptance by the representative of the Terminal. Vessels must maintain sufficient personnel on deck during the whole time that the vessel is at the berth to attend to the cables for mooring purposes whenever this may be required by the Terminal.

It is understood by both parties that, when the Terminal may require safety cables to be used, and where such are required, Maraven S.A. accepts no responsibility for damages or losses occasioned to any vessel, installation or person due to the use or failure of this equipment.

The vessel's gangway must be in position so that the mooring supervisor or other personnel from the Terminal can come on board the vessel when it arrives at Punta de Palmas.

This gangway must be suspended whilst manoeuvres are being carried out, this for the purpose of obviating any damage to it occasioned by tugs or launches.

Berthing Supervisor: The Berthing Supervisor of Maraven S.A. will come on board every vessel prior to its entrance to the berth to establish radio contact between the vessel, the Marine equipment and the Office at the Terminal.

Mooring gangs and equipment: The mooring equipment will be handled by the launches employed in the manoeuvres. The tug service will be available 24 hours of the day through the intermediary of the Terminal Port.

The mooring gangs will assist the vessel personnel in the operations of hoisting, connecting and disconnecting the 2×12 in. diameter loading hoses. The approximate weight of the loading hoses is 4 tons.

The launches used for the manoeuvres will place on board equipment to facilitate the work of connecting the hoses. This equipment will be at the disposal of the vessel's personnel when required as are also the launches to transport personnel.

Responsibility: The Master may request any equipment or service which he may consider necessary for a safe and efficient operation of his vessel and the Terminal Operator will do everything within his power to fulfil this requirement. Therefore all owners and operators of vessels arriving at Punta de Palmas will accept the responsibility of the safety inherent in the manoeuvring of their vessels and their movements to and from the Terminal. Maraven S.A. will accept no responsibility for losses or damages occasioned to the ship, its installations and others unless such loss and damage be occasioned due to the faults in the installations belonging to the Terminal or operated by the Terminal with the exception of the security equipment.

Operational check list: At the time when the vessel is moored and the hoses are connected, prior to the commencement of the operations of loading, the representative of Maraven S.A. on board will deliver to the Master an operational Check List. The Master is required, or whomsoever he may appoint to carry out this work together with Terminal representative, to check very carefully that all the safety regulations have been fulfilled.

Berthing Supervisor: The Berthing Supervisor will have charts and plans which will be at the disposal of the Master and his advice if he should require it. The representative will also be available to inspect the vessel's tanks and to act as liaison between the Master of the vessel and the Agent or with the Terminal of Punta de Palmas, to transmit any information relative to the ship. This supervisor must receive lodging and treatment at the same level as the ship's officers.

Unmooring procedure: When the loading operations are completed, the launches will proceed to remove all mooring cables from the buoys under the supervision of the official entrusted with the vessel or the Official Pilot, assisted by the Berthing Supervisor of Maraven S.A.

Documentation: The departure and loading documents will be delivered to the Master by his Agent or his representative, when he passes through the Port of Maracaibo.

BALLAST: *Deballasting:* It is understood that it is not permitted to discharge ballast in the lake, even though this may come from tanks used solely for ballast. Ballast will be discharged with the pumps of the vessel to the deballasting system which exists at the Terminal. As soon as the loading hoses are connected, the personnel of the Terminal will align the system with its respective valves. Once these operations are completed the Berthing Supervisor on board will inform the Master that he may commence deballasting and in turn will keep him informed as to the pressures which will be used in the operation. Once the deballasting operation has been completed, the personnel of the Terminal will align the system again and its valves so that the vessel can receive cargo through the same hoses which are used for unloading ballast and simultaneously the personnel of the vessel will align their systems on board to receive cargo. The personnel of the vessel responsible for receiving the cargo will inform the Representative of Maraven S.A.(Berthing Supervisor) when the vessel is in a condition to receive and he in turn will inform the personnel of the Terminal that they may commence pumping.

LOADING: *Oil leakage:* In order to obviate contamination of Maracaibo Lake and possible legal actions, we recommend strongly that Masters of vessels emphasise to their deck officers in order to obviate leakage that they make sure that all necessary measures have been taken on board to this end prior to commencing the loading operations. The purpose of this is to maintain on deck any leak or wastage which may occur in the vessel.

Guarantee of responsibility: In the event of an oil leakage or any other contamination or any other damages to installations caused by a vessel, the operator of the Terminal, prior to the vessel sailing, will require the Agent to deposit bond in favour of Maraven S.A. to cover the fine or other charges which may be incurred in collecting, cleaning, repairing the installations of the Terminal and also to cover any claims from third parties.

Loading procedure and pumping rates: The position of the loading hoses, supports and connections must be to the satisfaction of the personnel on board. The valves of the hoses for loading purposes will be opened in order to test the connections, detect leaks and then ultimately to commence operations.

The responsibility and custody of the cargo passes to the personnel of the ship from the moment when the cargo arrives at the connection which is the property of the ship.

The minimum loading rate at Berths No. 1 and 2 is 4,000 b.p.h. The average pumping rate, under normal conditions is 13,000 b.p.h. Sudden stoppages in loading will not be permitted during loading except in cases of emergency.

Personnel on board, responsible for the loading operations, must notify the Terminal representative, not less than 30 minutes in advance of the completion of loading. This will enable the representative to instruct the operator to reduce the rate of pumping or to continue loading by gravity as he sees fit.

For reasons of security, loading may be suspended and the hoses disconnected from the vessel's manifold when weather conditions are not favourable or at any time that the Terminal considers it convenient to do so due to *force majeure* or other reasons.

Displacement of the line: Sometimes it will be necessary to displace the submarine line in combination with the loading operation. To carry out this operation it is required that the personnel responsible for receiving the cargo notify sufficiently in advance the Berthing Supervisor when the amount of cargo lacking is equal to the capacity of the line.

The capacity of the line is a fixed quantity. Therefore it must not be considered with shortcomings or excesses.

Therefore when it is necessary to effect a displacement, the loading must be calculated carefully by the vessel personnel responsible for this operation.

It is understood that any error or negligence on the part of the vessel personnel in calculating the initiation point of the displacement of the line, will require a land pump to correct the displacement. Due to the submerged manifold it will be necessary to employ a diver to operate the valves and this operation may result in a fairly costly procedure and involve a lot of time. All costs involved in fulfilling this operation, together with the time lost will be for the account of the vessel.

Increase in pumping rates: At the request of the Master and subject to the approval of Maraven S.A., it is possible to suppy a pumping rate of 17,000 b.p.h. up to a maximum of 30,000 b.p.h., provided the operations of the Terminal permit this to be done.

MEDICAL: *Maracaibo:* Complete services are available.

Punta de Palmas: Emergency cases only will be transferred to Maracaibo for treatment, at the request of the official in charge of the vessel.

FRESH WATER: Available from local contractors with barges. Pumping will be affected during daylight hours and with prior permission of the Terminal.

FUEL: Heavy and medium marine diesel, intermediate fuel, and bunker "C" fuel oil available. Lubricating oils also available. Pumping will be affected during daylight hours and with prior permission of the Terminal.

STORES: Fresh and dry provisions procurable through ship chandlers in Maracaibo for delivery at the Terminal.

CONSULS: See "Maracaibo".

REPAIRS: *Maracaibo:* There are no facilities available for carrying out major repairs. Nevertheless, repair work may be carried out through local workshops and labour can be supplied if this is required. Technicians in radio, radar, gyro compass repairs are also available.

Punta de Palmas: No type of repair will be effected here, which may prevent the unmooring of the vessel without the authority of the Marine Supervisor. Neither may boiler tubes be "blown" whilst the vessel is moored.

SHORE LEAVE: Launch service for business purposes and emergencies is readily available. Launch service for shore leave can be arranged through contract marine service and will be responsibility of ship's personnel. Arrangements for shore leave transportation can be made through Loading Master on board.

CUSTOMS: All vessels entering from foreign ports and bound for Punta de Palmas Terminal are required to anchor in Maracaibo Harbour for formal customs clearance and visit of government port authorities prior to proceeding to destination.

The vessel's accommodation ladder should be rigged prior to the vessel's arrival at Maracaibo. A member of the National Guard will board each vessel at Punta de Palmas to observe all activities connected with loading or unloading operations. This official is authorised as the customs representative, and is referred to as Customs Watch. Food and accommodation similar to officers should be made available to him by vessel.

GENERAL:

Transportation: Transportation will be supplied by launch between vessel and Punta de Palmas to the following persons, without exception:

1. Master of the vessel or the Chief Engineer, to attend to matters relating to the ship.
2. Sick personnel who require emergency medical attention.
3. Official Pilot.
4. Members of the National Guard and other Government Officials whose services relate to the tanker.
5. Doctors, when these may be required by Master, in the event of emergency only.
6. Inspectors of the oil industry.

Consular representatives, ship's suppliers, engineers, naval experts, representatives of the oil companies, suppliers of fuel and water and any other person who requires to come on board tankers when they are in Punta de Palmas must make their own arrangements for transportation to and from the ship through the intermediary of the ship's Agent. Also Agents must make their own arrangements for their own transportation.

Personnel of the ship with licence to disembark: The transportation of personnel with licence, when this is required by the Master, must be arranged through the intermediary of the Agent. Also passengers must embark and disembark at the Port of Maracaibo.

Personnel with licence are not permitted to go ashore at the Terminal of Punta de Palmas.

Classification Societies: American Bureau of Shipping, Lloyd's Register of Shipping, Salvage Association of London, Det Norske Veritas, Bureau Veritas, Registro Italiano Navale and Germanischer Lloyd have Agents in Maracaibo or in Caracas. There are experts available through the intermediary of the Agents mentioned above.

Monetary System: The monetary system of Venezuela is the Bolivar (Bs.), and is the only money legally recognised in the country. A Master who requires a cash advance must request same from his Agent when he notifies his ETA. Payment of all invoices for Terminal charges must be made in Bolivares at the Office of Maraven S.A. in Maracaibo, unless other instructions are given.

Mail: Mail for the vessel can be delivered to the representative of the Agent who comes on board the vessel at the time of its arrival or sailing from Maracaibo.

AUTHORITY: Maraven S.A.

Capitania de Puerto, La Ciega – Maracaibo, Venezuela. *Tel:* 226488.

Section G

SAN LORENZO: 09.47 N. 71.05 W.

OPERATOR: Maraven, S.A.

LOCATION: S.E. side of Lake Maracaibo.

APPROACHES: Vessels have to arrive at Maracaibo Roads through a dredged channel with controlling depths of 45 ft. in outer bar, inner channel and Punta Palmas area. In vicinity of terminal the controlling depth is 36 ft.

PILOTAGE: It is compulsory from San Carlos to Maracaibo. Pilot normally boards vessel at Buoy B–26 (Position Lat. 11° 01′ N. Long. 71° 35′ W.). It is also compulsory for all vessels which have to load at any terminal located South of the bridge Rafael General Urdaneta. This bridge has a horizontal clearance of 656 ft. and a vertical one of 148 ft. at 45 ft. MMOLW level. Pilots have to embark and disembark at Maracaibo.

When Masters have no Pilot exemption Certificate for crossing outer bar, permission has to be requested by VHF or 2182 kHz prior to arrival, which is being granted on request.

ANCHORAGES: Masters may use the following:

(a) Near E.M. Buoy, (not recommended because of the distance from San Carlos. The pilot launch never reaches this point).

(b) At Maracaibo Roads.

(c) At terminal approaches, in accordance with depths available in the area, and ship's draft.

LIGHTENING POSITION: In the Southern lake Area, arrangements have to be made in advance. Also at Maracaibo.

HEALTH: Quarantine officials board vessels at Maracaibo Roads. Pratique cannot be granted by radio.

RADIO: San Carlos Pilot Station on VHF Channels 12 and 16. Emergency call 2182 kHz. Terminal has VHF Channel 12.

TUGS: Compulsory. When vessel is over 25,000 d.w.t. a second tug is required, which is available in the area, 1,200 h.p. each. There is also a launch to assist the vessel during manoeuvring.

BERTHING: Continuous wharf 2,340 ft. in length with dolphins. This terminal is only for handling crude and its products. Maximum berthing displacement: 20,000 tons.

	Berth No. 1	*Berth No. 2*	*Berth No. 4*
Max. LOA	560 ft. 00 in.	665 ft. 00 in.	
Max. Depth	24 ft. 06 in.	35 ft. 06 in.	Out of Service
Max. Draft	23 ft. 06 in.	34 ft. 06 in.	
Loading Rate	1,450 t.p.h.	2,000 t.p.h.	

These depths are referred to the minimum monthly observed lowest water level (MMOLW).

DENSITY: At berths 998 and at outer bar between 1020 and 1025.

FRESH WATER: Available ex-barge at Maracaibo Roads.

FUEL: Any grade. In case vessels require grade not available at berth it may be supplied ex-barge at Maracaibo, which has mixing equipment able to supply the grade involved. Rate 20 – 140 t.p.h.

MOORING-UNMOORING: Carried out by Official Pilots. Mooring is Head-out to facilitate departure.

DEBALLASTING: Installations have ballast pit with capacity 650 cu.m. Max. discharge rate 600 t.p.h.

TANK CLEANING FACILITIES: Carried out by outside contractor.

REPAIRS: Minor repairs only, including electronics.

LA CEIBA: 09.28 N. 71.04 W.

SHIPMASTER'S REPORT: 1979.

BERTHING: There is a cement loading installation about 2 cables South of the 160 m. long pier at La Ceiba suitable for vessels up to 120 m. in length.

The approach channel is dredged to 9 m.

END OF MARACAIBO SECTION.

MORON: 10.32 N. 68.11 W.

This Terminal finished operations in 1981. All installations are being dismantled.

Vessels loading/discharging operations are now performed at El Palito Marine Terminal operated by Corpoven, S.A.

ORINOCO RIVER

Including Section A – MATANZAS
Section B – PALUA
Section C – PUERTO ORDAZ
(CVG Ferrominera Orinoco)
Section D – PUNTA CUCHILLO
(Lagoven S.A.)
Section E – VENALUM TERMINAL

IMPORTANT: VHF compulsory. Vessels without at least a VHF radio aboard will not be attended to by the Pilots at the Barima pilot station and so will not be allowed to enter the Orinoco River.

GENERAL:

1. As early as possible, advise Puerto Ordaz Radio Station, (Radio Marina) call letters YVM, giving ETA at Buoy 0.1 of South (dredged) Channel.

Shipmaster's Report: October 1982 (Updated 1988).

Contact with YVM was made 48 hours before arrival Buoy 0.1; accordingly, 72 hours ETA sent via Curacao Radio.

2. 24 hours prior to arrival, send another ETA to YVM.
3. Upon arrival, adhere to following procedure:
   - *(a)* Request permission to enter from "Barima Pilot", via Channel 16. *Do not enter* until granted permission; while awaiting, lay to or anchor at least 1 mile outside of Buoy 0.1.
   - *(b)* All vessels must also communicate with the Point Barima pilot station, call sign "Barima Pilot" 2182 kHz HF or 43.18 VHF to be informed of traffic.
4. While navigating waterway, inbound or outbound, report position to YVM hourly on the hour.
5. No Pilot required nor available for navigation along channel at the Boca Grande of the Orinoco River.
6. The International Rules for Preventing Collisions at Sea apply outside of Buoy 27.
7. Anchoring in channel is forbidden.
8. Throughout Orinoco waterway, the down-bound loaded vessel is the privileged vessel.
9. It is compulsory to fly Venezuelan ensign inside of Buoy 0.1.
10. Vessels can only carry clean ballast within Orinoco Waterway.
11. Pilotage compulsory within Pilotage Zones No. 1 and No. 2 of the Orinoco. Pilots board at outer boundary of said pilotage zone in upstreamward vicinities of Buoy 27 up to Mile 128.1. Zone No. 2 is from Mile 128.1 up to Matanzas.
12. Regulations for the Pilotage Zone No. 1 of the Orinoco apply inside of Buoy 27.

APPROACHES: (Also see "Radio" – paragraphs *(b)* and *(c)*).

1. *The Waterway*

A Radio Direction Finder (non-operational October 1982), located at Lat. 08° 03′ 45″ N., Long. 60° 28′ 28″ W., transmits following signal continuously: YV – AYV. The transmitter has an output of 500 watts with a range of about 200 miles and operates on a frequency of 305 kHz. While navigating the waterway, ships should favour the shore on their starboard side to the extent possible, giving preference of manoeuvre to loaded vessels in all cases. Ships navigating upstreamward (inbound), upon approaching narrow channels should await the passing and give way to downbound vessels. It follows, therefore, that downbound loaded vessels are the privileged vessels.

2. *The Boca Grande (Barima Bar) Channel*

There is 1 navigable channel across the Boca Grande (Barima Bar). Vessels navigating the dredged channel are privileged, regardless of the direction in which they travel.

The Dredged Channel

The channel is a 400 ft. wide dredged channel. Depths therein accommodate the maximum draft authorised by the Port Captain. The approach from the sea is marked by a battery-operated electric flashing black buoy, identified with the number 0.1. This buoy is located in 45 ft. of water at Lat. 08° 55′ 52″ N., Long. 60° 11′ 17″ W. Its characteristics are: colour of light, white; flash, 0.5 seconds; eclipse, 11.5 seconds; height above water, 25 ft.; visibility, 11 miles. From Seabuoy 0.1, the channel develops along 4 different courses over a total distance of 27.7 Miles to Buoy 27. The course reduces by about 7° True at each of 3 turning points, located at Miles 9, 15 and 21 respectively. The initial course of 234° 18′ True continues to Mile 9 where it changes to 227° 07′ True. Upon reaching Mile 15, the course again changes to 219° 51′ True to Mile 21. At Mile 21, the course changes to 212° 45′ True to Buoy 27 at Mile 27.7. The centreline of the channel on all courses is visually marked by range structures fitted with green flashing, directionally beamed lights. The West (right ascending) side limit of the channel through Mile 21 is also visually marked by range structures fitted with amber flashing, directionally beamed lights; the alignment given by the side ranges develops 200 ft. to the West and parallel to the centreline of the channel. Battery operated electric flashing navigation aids are located along both sides of the channel. All navigation aids along the East (left ascending) side of the channel are located 325 ft. from centreline or 125 ft. outside of the channel lateral limit. White flashing navigation aids are located at 1 mile intervals through Mile 25.1; all aids along this side are black buoys, except Beacons 8.1, 9.1, 14.1, 15.1, 20.1, 21.1, 22.1, 23.1, 24.1, 25.1, 27.1 and 27.7 (Buoy 27). All navigation aids along the West (right ascending) side of the channel are located 200 ft. from centreline or on the exact lateral limit of the channel. Red flashing buoys painted red are located at 1 mile intervals from Mile 1.6 to Mile 11.6. From Mile 11.6 to Mile 27.7, there are only 2 aids; red buoys 13.6 and 26.0.

3. *The River Channel*

From Mile 27.7, the navigable channel develops upstream. The river channel is generally deep and wide, except for the following 12 reaches which require periodic dredging: Miles 27.7 to 36.5; Miles 37.3 to 38.6; Miles 53.1 to 54.2; Miles 99.0 to 106.5; Miles 109.1 to 111.0; Miles 131.7 to 131.9; Miles 136.6 to 139.0; Miles 141.2 to 145.8; Miles 146.2 to 149.4; Miles 167.6 to 170.8; Miles 178.4 to 182.4; Miles 183.5 to 184.1. Dredged channels are normally 300 ft. in width, but occasionally can be restricted to a minimum of 250 ft. The depth maintained therein can accommodate the maximum draft authorised by the Port Captain. By Notice to Mariners, the Port Captain has instructed all Masters and Pilots to reduce speed and to proceed with caution while navigating the aforesaid reaches, especially during the low water season.

4. *River Stages*

In response to the cycle of wet and dry seasons, the flow of the Orinoco River follows a relatively regular pattern of rise and fall each year. The river normally begins rising in late March or early April and continues to rise until it peaks at crest in late August. In September, the river begins a fairly steady recession until the extreme low-water stage is reached, generally in March. The amplitude of stage variation above the low water plane of reference (0.0 ft.) at Palua (Mile 181.7) averages about 35 ft. with min. variations of 31 ft. and max. variations of 39 ft. The effects of the flood rise decrease progressively below Palua and practically vanish in the upstreamward vicinities of the Boca Grande.

5. *Tides and Currents*

- *(a)* The indicated mean tidal range is 5.4 ft. Tidal influence is not experienced above Mile 60 during high river stages. At low river stages, a tidal effect can be observed throughout the waterway, although it progressively diminishes, moving upstreamward. However, the tidal effect is still significant at Puerto Ordaz, Mile 184, where a max. semi-diurnal change of 1.7 ft. has been recorded.
- *(b)* The strength of river currents is generally commensurate with flow, the strongest currents occurring at high river stages. The velocity of currents at any one time generally decreases moving downstreamward. However, in certain locations, this pattern is affected by particular characteristics of river width and shape as well as by bottom gradient. Max. velocities of about 6 knots have been recorded.

6. *Navigation Aids*

- *(a)* The navigation aids installed along the waterway consist of buoys, beacon and ranges. All aids are lighted. Identification is provided by means of numbers representing the approximate mileage of each aid, to the nearest one-tenth of a mile. The last digit of numbers identifying green lighted aids is odd, while the last digit of numbers identifying red lighted aids is even. Green lighted aids mark the left ascending limit of the navigable channel, while red lighted aids mark the right ascending limit. Aids are placed as to be intervisible, to the extent that — when abreast of any one aid — the preceding and following ones can be sighted. Consecutive aids always carry different light characteristics. Buoys are normally placed on the exact lateral limit of the channel (except for black buoys along the South Channel at the Boca Grande); beacons, instead, are located at variable distances outside of the channel.
- *(b)* During the execution of dredging along any of the reaches which require periodic maintenance, buoys are generally moved 100 ft. outside the channel lateral limits. This information is made available to ships by YVM.
- *(c)* The Ministerio de Comunicaciones, Direccion de Transporte Aguatico, publishes semi-annually a complete list of navigation aids. Monthly lists of changes are also published so that the complete current list can be maintained up to date.
- *(d)* Upon encountering damaged, inoperative, or misplaced navigation aids, vessels should immediately notify YVM.
- *(e)* Vessels are forbidden to make fast to any navigation aid.

7. *Dredging Aids*

Range structures, generally located close to shore or over the bank, are normally used to mark the lateral alignments of the channel along the reaches which require periodic dredging. These ranges are generally fitted with amber flashing, directionally beamed lights. The lights are extinguished except during execution of dredging. Dredging ranges are *not* to be used for navigation.

8. *Navigation Charts*

Navigation charts of the Orinoco Waterway should be aboard vessels for use by the Master. These charts are sold by the Instituto Nacional de Canalizaciones and are also available for purchase from the CVG Ferrominero Orinoco. If requested, CVG Ferrominero Orinoco will, if possible, arrange to make the charts and latest revisions available through the Pilot who boards at Punta Barima, provided such request is received by radio (YVM) at least 48 hours in advance of the Pilot's boarding. A set of navigation charts, corrected to latest revisions, is maintained in the office of the Traffic and Ships' Agency of CVG Ferrominero Orinoco in Puerto Ordaz. Masters may use this facility to keep their charts up to date.

Report: 1986.

Deficient Navigational Aids:

The deep draft New Barima (South) dredged channel is officially a 400 ft. wide dredged channel, but in reality it is considerably less in portions. Many of the red buoys showing a flashing red light which should be placed 200 ft. from the centre of the channel or exactly on the lateral limit, are either missing, out of position or unlit. The light on the black buoy which marks the entrance of the channel is inoperative. Several of the gauge structures fitted with green, flashing, directionally beamed lights, are inoperative. This makes it hazardous for a deep draft vessel to navigate the narrow and shallow channel during the hours of darkness. During the rainy period the authorised drafts declared by the Port Captain are in excess of the depths in certain portions of the channel.

We have been informed that about 20 vessels grounded in this area during the first 6 weeks of this year (1986).

DOCUMENTS: (Clearance, documentation and other requirements).

1. *Consignment of Inbound Vessels*

The official documents of all vessels proceeding to Puerto Ordaz and Palua should show the following consignment: to: CVG Ferrominero Orinoco, Ciudad Guayama.

2. *Customs Requirements*

Vessels bound for Venezuela in ballast, without passengers, from foreign ports outside the West Indies or Guianas, require the following documentation:

The vessel must have a Clearance Certificate (Certificade de Zarpe) or sailing authorisation issued by the Customs Authorities of the port of departure, representing the government of the country the vessel is departing from. No consular certification need be placed upon this document.

Spare Parts List (Lista de Repuestos). It must contain a note of all the spare parts and objects for the service of the vessel, including fuel. To be signed by the Master and to be current as of the day of entering the Venezuelan port.

List of Effects for use of Captain and Crewmen (Lista de efectos personales de la dotacion). To be signed by the Master and to be current as of the day of entering the Venezuelan port. The Customs are very strict and will confiscate any article that appears new.

3. *Health, Immigration, and Police Requirements*
Vessels bound for Venezuela in ballast, without passengers, from foreign ports outside the West Indies or Guianas, require following documentation.

(a) Current individual International Vaccination Certificates for each member of the crew.
(b) Derat Exemption Certificate.
(c) Crew Lists (original and seven copies).
(d) Panama or Suez Canal or any comparable type measurement certificate.

Contraband: The Venezuelan law is very strict on this subject. It cannot be emphasised too strongly that all new articles, clothing, cigarettes, liquor, etc., must be declared and sealed-up upon arrival.

Meals for Pilots and Government Officials. It is requested these men be granted the privilege of eating in the officers' dining salon.

N.B. Masters of vessels calling at Trinidad for bunkers before proceeding to Venezuela must also have the documents stamped by the Venezuelan Consulate at Port of Spain.

PILOTAGE: In order to expedite the movement of shipping in the waterways, Masters are requested to establish contact with YVM station as soon as possible, giving ETA Seabuoy 0.1. At the same time a radio-telegraph message must be sent to Agents giving ETA Barima and cargo required. When vessels is 24 hours from pilot station, send another ETA via YVM.

After reporting the ETA in advance of arrival, try to contact directly, by VHF, "Barima Pilot" when the ship approaches Seabuoy 0.1 off the bar entrance (about 2 hours before arrival at the pilot station). (It is possible to contact Pilots 100 miles before arrival Seabuoy 0.1.)

After taking the Pilots aboard, report to Radio Marina (YVM) and continue giving the ship's position according to the mile, up-river, at exactly every hour on the hour, and receive from Radio Marina the pertinent information concerning the traffic in the river waterway. If no communication can be established by voice radio aboard, comply by radio-telegraph by way of the YVM station. See "Ship's Officer's Reports" in 1st Section – "General".

Ship's Officer's Report: July, 1980.

Hourly position reports are made on W/T to YVM when the Pilot is aboard (He writes the telegrams in Spanish).

Pilots are the employees of the Venezuelan Government and act in an advisory capacity. The Master retains responsibility for the ship at all times.

(1) Pilotage is not required and Pilots are not available for navigation outside the pilotage zone. Masters will take charge of inbound and outbound navigation on the South Channel outside Buoy 27 at the Boca Grande, without Pilot's assistance.
(2) Pilotage is mandatory within the Pilotage Zones No. 1 and No. 2 of the Orinoco. Inbound vessels will embark the government River Pilot in the upstreamward vicinities of Buoy 27. It is important that vessels pass Buoy 27 and be in sight of the pilot station at Barima in order to avoid any delay, as Pilots may not proceed until vessel is sighted. The government River Pilot will pilot the vessel while navigating the waterway; a special government Docking Pilot will generally take the vessel into and out of the Puerto Ordaz harbour.

Signals
(1) All signals used outside of the Pilotage Zone No. 1 (that is to say, seaward of Buoy 27 – Mile 27.7) shall conform to the International Rules for Prevention of Collisions at Sea.
(2) Within the Pilotage Zones (that is to say, inside of Buoy 27 – Mile 27.7) the signals used shall be in accordance with the "Regulations for the Pilotage Zones No.1 and No. 2 of the Orinoco". It should be noted that these signals are peculiar to the Orinoco Waterway, and are not necessarily in conformance with the International Rules.
(3) Within the Pilotage Zone, special signals are used for passing dredgers at work along the waterway.

Speed
The Captain of the Port has the authority to impose speed restrictions. By means of "Notices to Mariners", the Port Captain has ordered that all vessels reduce speed while navigating by the following locations: San Felix Dock, Mile 179.8; El Toro, Miles 95.4 to 96.6. It is recommended that speed be also reduced while navigating by the Palua Dock (Mile 181.8), Barrancas (Mile 143.2), and Curiapo (Mile 60.4). At the inception of the low water season each year (generally in early January), the Port Captain has in the past issued a "Notice to Mariners" instructing all vessels to reduce speed and proceed with caution while navigating the following river reaches: (1) Miles 184 to 178, (2) Miles 171 to 167, (3) Miles 150 to 141, (4) Miles 140 to 137, (5) Miles 133 to 131, (6) Miles 112 to 109, (7) Miles 106 to 98, (8) Miles 55 to 53, (9) Miles 39 to 36.

ANCHORAGES:
(1) No ships are permitted to anchor in the South Channel at the Boca Grande. Vessels are to anchor at least 1 mile outside of Buoy EO or Buoy 0.1.
(2) Within the Pilotage Zones, no vessel is allowed to anchor in narrow channels, nor close to a turn.
(3) Between Buoy 27 — Mile 27.7 and Mile 137, vessels which need anchoring may do so by coming as close as possible to shore on the ship's starboard side.
(4) Between Mile 137 and Mile 184, the Pilotage Regulations provide for 3 permanent anchorages and 1 seasonal anchorage, as follows: Area No. 5 (permanent); Miles 139.3 to 140.4. Area No. 6 (permanent): Miles 150.1 to 151.7. Area No. 7 (permanent): Miles 178.0 to 179.0. Area No. 8 (seasonal): at the junction of the Caroni and the Orinoco. It should be observed that Area No. 7, as determined in the Pilotage Regulations, partially encroaches on the narrow (dredged) channel and on shore. Vessels are to anchor in the naturally deep and wide part of the area.
(5) The low-water anchorage (for 1 ship only) previously established by the Port Captain between Miles 182 and 183 is no longer in use. This area is currently used as the turning basin for vessels exiting the Palua Channel, upon sailing from the new Palua dock at Mile 181.8.
(6) If due to emergency a ship is required to anchor in places other than the designated areas, it should do so in such a way as not to obstruct the channel and by taking the necessary precautions to avoid swinging around.
(7) Upon anchoring vessels should notify YVM.

MAX. SIZE:
(1) *Max. permissible draft.* The Port Captain of Ciudad Guayama can establish the permissible draft for the Orinoco waterway to a maximum of about 44 ft.

(2) *Controlling Depths and Authorised Draft*
The draft authorised by the Port Captain for the Orinoco Waterway is made public by means of a "Daily Bulletin of Depths and Draft" (Boletin Diario de Profundidades y Calado). Each daily bulletin issued by the Port Captain carries the following information, in Spanish and English:
(a) Controlling (minimum) depth between Miles 194 and 0, and corresponding location.
(b) Authorised draft, in feet and decimals of feet.

The controlling depths given for locations comprised between Miles 184 and 42 are actual depths, and reflect depth conditions as of the date of the bulletin. The controlling depth given for locations comprised between Miles 42 and 0 is referred to MLWS and does not include the height of tide at high water.

The authorised draft may be predicted either on the controlling depth existent between Miles 184 and 42 or between Miles 42 and 0, dependent upon whichever is the least.

When the controlling depth between Miles 184 and 42 is the significant factor, the permitted draft authorised is at least 2 ft. less than the controlling depth in this sector.

When the controlling depth between Miles 42 and 0 is the significant factor, the permitted draft authorised is generally less than the mean low water springs controlling depth but occasionally can be equal to the mean low springs controlling depth.

Whenever the MLWS controlling depth existing between Miles 42 and 0 does not provide sufficient clearance under the keel of the vessel at low water, the Master is expected to navigate by the site where the controlling depth is located only at times when the height of tide will assure a safe passage.

(3) *Variations in authorised draft:*
(a) The authorised draft is generally increased or decreased by multiples of 6 inches.
(b) Throughout the year the authorised draft is susceptible to variations, according to the conditions of the depth and width existing in the channel at any one time. On the basis of average river stages it is estimated that the authorised draft should be about 33 ft. in the dry season from December to May.

During the rainy season, from June to November, the max. permissible draft may be as high as 44 ft.

HEALTH: Radio Pratique may be obtained by sending a message, after picking up Pilot, to the Port Health Officer, advising that there is no sickness on board, name of last port, ETA, number of crew and nationality of vessel and name and nationality of Master (This does not apply at Palua).

RADIO:
(a) Communications: Communications are generally handled through the radio-telegraph station at Puerto Ordaz, call letter YVM. This station is operated on a 24 hour basis. The operating frequencies are: 440 kHz; 472 kHz; 4322 kHz; 6505.5 kHz. The GMT — CQ times and frequencies are: 0900 hrs., 4322 kHz; 1200 hrs. 6505.5 kHz; 1430 hrs. 8722 kHz; 2000 hrs. 8722 kHz; 0030 hrs. 8722 kHz; 0300 hrs. 4322 kHz.

There is no charge for messages from ship to shore or from shore to ship handled directly through YVM. A VHF frequency modulated radio system provides voice communications along the Orinoco Waterway. Master sets for the system are installed in the Puerto Ordaz Radio-telegraph Station (voice call: "Master Radio"); Marine Radio handles shipping matters exclusively, The system consists of a high-band VHF frequency modulated voice radio network. To ensure a more efficient and satisfactory coverage, this system operates on dual frequencies alternating according to location, so that ships can either transmit on 161.700 MHz receiving on 159.000 MHz, or transmit on 161.150 MHz receiving on 159.850 MHz. For best results, ships should select frequencies according to the following: From sea to Mile 50: transmit on 161.700 MHz, receiving on 159.000 MHz; From Mile 50 to Mile 112: transmit on 161.150 MHz, receiving on 159.850 MHz; From Mile 112 to Mile 159: transmit on 161.700 MHz, receiving on 159.000 MHz; From Mile 159 to Mile 184: transmit on 161.150 MHz, receiving on 159.850 MHz.

Pilot station at Barima Bar, Palua and Matanzas are equipped with this system. For the Puerto Ordaz area, ships will transmit to Marine Radio on a frequency of 43.02 MHz and to others on a frequency of 43.18 MHz, receiving in both cases on a frequency of 43.18 MHz.

Ship's Officer's Report: July, 1980.

The VHF Channels listed are not available on standard marine sets. All VHF work is done on Channel 16 (Pilot to Pilot), and reporting on W/T to Radio Marina.

(b) Control of Navigation:
(i) Navigation on the Barima Channel at Boca Grande is free. However, vessels are requested to notify the Port Captain, Ciudad Guayama, via "Barima Pilots" on Channel 16, upon arrival at Buoy EO, giving ETA at Buoy 27, Mile 27.7.

(ii) Simultaneous navigation in opposite directions by 2 or more vessels is not permitted on the South (dredged) channel at the Boca Grande. The restriction is placed on inbound traffic, to the extent that any vessel wishing to enter the South channel requires prior authorisation from the Port Captaincy of Ciudad Guayama. The request for permission to enter the South channel is to be addressed to the Port Captain, Ciudad Guayama, via "Barima Pilots" on Channel 16. and is to be transmitted before the vessel reaches Buoy 0.1. Upon receipt of the request, the Port Captain will notify the vessel via "Barima Pilots" on Channel 16, whether permission is or is not granted, indicating, in the latter case, the approximate waiting time. Until permitted to enter, vessels are to anchor at least 1 mile outside of Buoy 0.1. Once that authorisation has been granted, vessels are to enter the South channel at the earliest opportunity.

(iii) While navigating the Orinoco Waterway inbound or outbound vessels are to report their position to YVM hourly on the hour. Seaward of Punta Barima, to "Barima Pilots".

(c) Accident, Stranding, etc.

(i) Should a collision, stranding or other accident occur in the waterway, or should it be found necessary to take control of the vessel away from the Pilot for any reason, the Venezuelan law requires that a written report be made to the Captain of the Port by the Master of the vessel involved within 24 hours. The report is to be addressed to the Captain of the Port and may be handed to the Pilot or the ship's Agent for delivery. The Master need not appear in person before the Captain of the Port unless specifically ordered to do so.

(ii) Slight groundings or touching of banks and bottom may simply be noted on the reverse side of the receipt for pilotage signed by the Master.

(iii) In case of collision, stranding, slight grounding, touching of banks and bottom, or other accidents, vessels should immediately notify YVM.

SHIPMASTER'S REPORT: January 1989.

Vessel proceeding to Matanzas.

Apparently the entrance to the River Orinoco at Boca Grande had been upgraded.

All the buoys now have solar energy cells as well as photo-cells to activate them at dusk.

The North entrance no longer exists, only the South Dredged Channel is used. A Racon had been installed on Mile 0.1 (Sea Buoy). Current entrance information is given by Puerto Ordaz Radio Station (YVM), with which vessels should make contact as soon as possible. As usual, pilots board the vessel between Miles 27-28. It is advisable to reduce speed beforehand, to be able to embark the pilot before Mile 28, as pilot boat is not fast and there is a considerable bend at Mile 28. Also it is advisable to familiarise yourself with the buoys and ranges up to Mile 30 while entering, as the down-bound pilot usually disembarks between Mile 30-31 and there are 3 short distance bends before Mile 28. On our passage as many as 4 buoys were out of position, one buoy was unlit at the first range, and Sea Buoy (0.1) Racon was inoperative.

Section A

MATANZAS: 08.17 N. 62.52 W. (See Plan)

N.B. See "Orinoco River" for all important entry requirements.

LOCATION: At Mile 195 from sea on Orinoco River.

ANCHORAGES: Between Miles No. 195 and 197, Orinoco River.

MAX. SIZE: Length 600 ft., breadth 74 ft., distance between rail and hatch coaming 23 ft., max. draft 41 ft. in rainy season May to November, and 28 ft. in dry season.

Note: A vessel with LOA 738 ft. has berthed at Matanzas.

RADIO: See "Orinoco River". Cables address of Matanzas terminal operators is "Sidor Matanzas – Telex 86366" and cables may be routed through Caracas, Curacao or Trinidad Radio.

TUGS: Every vessel over 2,000 registered tons is required to use a tug when berthing. Tug is 1,600 h.p.

BERTHING: Reinforced concrete structure consisting of 3 different sections running in a straight line, bearing 065°.

From West to East, 3 sections should be pointed out:

The first section, some 320 m. long, is used mainly for unloading bulk cargoes. Depth 10 m. below MSL.

The second section, 400 m. long, is for handling steel products. Depth 11 m. below MSL.

The third part, some 280 m. long, is for general cargo. Depth 11 m. below MSL.

The level of the river fluctuates from 0.6 m. over MSL at low river water in the dry season (February – March) to 14 m. over MSL at high river water in the rainy season (July – August).

The river bed drops sharply from the edge of the pier to the navigation channel where the depth reaches 30 m. below MSL.

Berth No. 1: Runs from bollard No. 1 to No. 7, length 155.30 m.
Berth No. 2: Runs from bollard No. 7 to No. 14, length 176.38 m.
Berth No. 3: Runs from bollard No. 14 to No. 24, length 204.25 m.
Berth No. 4: Runs from bollard No. 24 to No. 33, length 182.75 m.
Berth No. 5: Runs from bollard No. 33 to No. 39, length 160.45 m.
Berth No. 6: Runs from bollard No. 39 to No. 44, length 158.85 m.

In addition there is another berth, length 149 m., South of No. 6, with 24 ft. of water under MSL, that runs from bollard No. 38 to No. 44.

The reinforced concrete platform is 25 m. wide at the first section and 20 m. at the second and third sections. The surface of the pier is 15.5 m. over MSL.

CRANES: Berths No. 1 and No. 2 are served by 2 "Ceretti Tanfani" bulk unloaders of 22 tonnes capacity, able to handle clamshells of 4.5 cu.m., for iron ore, lime stone and other heavy bulk, 10 cu.m. clamshells for coke and other light bulk and orange peeler and magnets for unloading scrap iron.

The reach of these cranes is 10 m. from the pier edge. The working field is from bollard No. 2 to bollard No. 13.

Berths No. 3 and No. 4 are served by 6 "CMI" gantry/trolley cranes fitted with 2 hoists of 15 tonnes each, with a total capacity of 30 tonnes with the 2 hoists in tandem. The working field is from bollards No. 15 to No. 31.

Berths No. 5 and No. 6 are served by 3 "Ansaldo" gantry/trolley cranes of 16 tonnes capacity. The working area is from bollards No. 35 to No. 44.

At bollard No. 34 there is a stationary rotary derrick of 400 tonnes capacity and a reach of 18 m.

In addition, there are 3 "Grove" auxiliary moving cranes, of the telescopic type, with a rated capacity of 80 tonnes able to work at any part of the pier.

WAREHOUSES: From bollard No. 14 to bollard No. 29, running along the South edge of the pier, there are 10 adjoining warehouses, 30×100 m. each, 3 of them open at either end and the four in the middle roofed. All of them are provided with 1 gantry crane of 25 tonnes each.

STEVEDORES: Operations are round the clock, 7 days a week.

MEDICAL: Private hospital and several doctors available.

FRESH WATER: Available at rate of 12 t.p.h.

FUEL: Available ex-barge.

REPAIRS: Local workshops undertake minor repairs.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle spirits allowed per crew member for personal consumption.

AIRPORT: Matanzas is served by Puerto Ordaz Airport with several daily flights from Caracas.

POLICE/AMBULANCE/FIRE: The entire length of the pier is fitted with fire hydrants and at the steel mill, about 6 km. away, there is a well equipped fire brigade with firetrucks, ambulances and rescue vehicles.

A first aid centre is located close to the fire station.

TELEPHONES: No telephones or telex services are available at Matanzas for the use of vessel's personnel. Local telephones only available at the pier and dock supervisor's office. Recommend vessels use their VHF to communicate with their Agents while at anchorage and when alongside.

IDENTIFICATION CARDS: Provided by authorities, and necessary if crew going ashore.

REGULATIONS:

Pollution: Venezuelan law and Sidor's port regulations are very strict on air and river water pollution, the following restrictions being in force:

1. No smoke to be ejected from vessels' funnels while moored at Sidor's pier.

2. No waste, refuse or garbage to be dumped in the river while in the river channel, at Matanzas roads or laying alongside the pier.

3. All waste, refuse or garbage kept on deck, to be sprayed with anti-vermin and kept covered.

4. No salt water ballast, bilge water, oils, refuse water from galleys and lavatories, etc., to be pumped into the river.

In addition to whatever penalty the vessel shall incur under Venezuelan law, Sidor reserves its right to place the offending vessel "off hire" until she has complied with the regulations.

Safety: Under Sidor's security norms, every person which, for whatsoever the reason or business, has to transit or stand on the pier's platform is bound to use a hard hat. People doing any kind of work on the pier have also to use safety shoes.

GENERAL: Sidor's pier will discharge and/or load cargoes for other industries of the area provided a berth is available and no Sidor vessels are waiting. Permission for such operations must be requested prior to vessel's arrival.

Sidor require Agents to provide stowage plan and cargo documents prior to vessel's arrival otherwise Notice of Readiness will not be accepted.

SHIPMASTER'S REPORT: January 1990.

Approach: The approach is through Boca Grande South Channel from Buoy 0.1 without a pilot, to the Barima Pilot Station which is up-stream of Buoy No. 27.1.

Prior to arrival call "Amacuro Pilot" on VHF Channel 16 when within range, up to 100 nautical miles.

Vessels only enter the channel after having been granted permission by the pilot station.

The Racon on the Fairway Buoy is inoperative.

B.A. Chart No. 3322, addition 1971, last correction 1170 of 1988 is not up-to-date.

When proceeding inward the buoys on the port side are red and those on the starboard side are green. All buoys have solar panels.

The green buoys on the starboard side are numbered 0.1, 1.1, 2.1 up to 21.1 and are spaced one nautical mile apart.

The red buoys on the port side are numbered 1.0, 2.0, 3.0, etc. up to 21.0. Buoy No. 3.0 was missing.

Buoys No. 22.1 – 25.1 are the only red buoys on the port side. On the starboard side Buoy No. 26.0 is the first buoy on the starboard side and the next buoy after that is Buoy No. 27.1, which is on the port side. The buoys are opposite each other in the channel and this is the point where the pilot boards.

The numbers on the buoys indicate the distance in miles from the entrance of Matanzas (Mile 194.5).

The pilot who boards the vessel at Buoy No. 27.1, takes the vessel to Matanzas where he hands over to the harbour pilot.

Loading: Gangs are available throughout 24 hours.

The working hours are 0730 – 1100, 1200 – 1500, 1500 – 1800, 1830 – 2230 and 2300 – 0630 hrs.

We worked with 2 gangs and the rate was 300 tons – 500 tons per shift gang. We loaded bundles of re-bars which weighed about 1.8 tons each. The tally is carried out ashore and vessel has to ask for copies of the tally sheets.

Garbage: Garbage has to be stored on board in bags and can be removed by lorry via the Shipchandler.

Stores: Stores are available but it is advisable to get quotations. There are department stores and shopping centres in the vicinity.

Transport: Taxis are available to take personnel to the town, but only licensed taxis are permitted to enter the plant.

OPERATOR: C.V.G. Siderurgica del Orinoco C.A., Codigo Postal 8016, Matanzas, Ciudad Guayana, Estado Bolivar, Venezuela. *Tel:* 991111 and 991118. *Telex:* 86366 and 86229 (Sidor). *Cables:* Sidor Matanzas. *Contact:* Superintendent, Port Services.

Section B

PALUA: 08.21 N. 62.41 W.

N.B. See "Orinoco River" for all important entry requirements. Specific details, relevant to Palua only, are as follows:

SUPPLIER: The ore supplier is CVG Ferrominera Orinoco C.A., cable address "Ferrominera". Their Palua office is fitted with VHF radio-telephone on 161.150/159.850 MHz and 2182 kHz (call).

CLEARANCE: Agent will secure the Clearance dispatch.

Note: The Palua dock and facilities are the private property of CVG Ferrominera Orinoco C.A. All Company regulations must be obeyed by vessels and vessels' personnel.

The Bill of Lading will be prepared by CVG Ferrominera Orinoco C.A., also the Commercial Invoice on the Consular Invoice form 138. The Inward Foreign Manifest, U.S. Customs form 7527–B, should be prepared by Master after sailing from Palua.

MAX. SIZE: Max. d.w.t. 100,000 tons. Max. LOA 274.32 m. Max. beam 33.53 m.

HEALTH: The vessel will be boarded by the Public Health Doctor after docking at Palua; unless instructions to the contrary.

In the event that the Authorities have to board the vessel anchored out in the stream, an accommodation ladder should be rigged, preferably on the starboard side, to keep the port side clear for docking. Venezuelan authorities and workmen will not use Pilot ladders.

RADIO: Should a vessel receive radio advice at sea to proceed to Palua, and the clearance is to another port, it is requested to send following information to "Ferrominera" at earliest convenience. i.e. Master's full name and nationality, vessel's nationality, port and number of register, net and gross tonnage, type of vessel M/V or S/S, vessel's overall length and width, last port of call, original port of destination. This is necessary in order to comply with the Venezuelan Custom Law.

BALLAST: To provide the best manoeuvring trim on docking, it will be at the discretion of the Master to properly ballast the vessel. But in order to lose no time on loading operations, as well as to prevent short loading, the ballast should be pumped out as soon as possible, using utmost caution not to pump oil or sludge overboard in the port area.

APPROACH AND DOCKING IN PALUA: After passing the village of San Felix, and before reaching the turn off from the main channel, 2 tugs and a Docking Pilot will meet the vessel and will assist in the docking manoeuvre. Although the Master will always be responsible for the vessel's movements either in the case of docking or undocking, the Docking Pilot will actually pilot the vessel to, and dock the ship at Palua.

At Mile 180.5 the ship should leave the main channel, turning to the left to follow the new dredged entrance channel of approach which is marked by 2 flashing buoys: white on the port and red on the starboard side. Diamond-shape range marks of 6 ft. side, painted white with black diagonal cross, indicate the centre line of the approach channel. The front range, fastened on the ore loading pier, shows flashing green light, and the rear range, set on a tower shows flashing green light, and the rear range, set on a tower approximately 2,000 ft. away, has fixed green light.

The docking shall be port side to in all events; and please stow all hatch boards, or pontoons, or steel battens, etc., on the starboard side of the hatch as this will keep the gear cleaner and lessen the work of the ore handling gang.

Vessel's accommodation ladder is used. Nothing should overhang the port side of the vessel on docking.

If the loading berth is not available the arriving vessel would be instructed to anchor at an anchorage just below the entrance to Palua approach channel at Mile 178.

LOADING DOCK: The ore loading port is located at Mile 181.5 of the Orinoco waterway, along the left bank going up-river. The steel dock here is aligned up and down stream in the general direction of the current. It is 907 ft. long between its pointed heads, with 791 ft. of boarding side along, the deck fixed at about 6 ft. over the maximum rise of the river in the flood season. It has a strong fender system of steel structure covered with timber overhanging the side, down to near the lower river stage; and is fitted with 14 bollards plus 2 more, one on each head, for proper docking and securing the vessel.

Once the vessel is moored alongside the new ore loading dock, there shall be no further shifting necessary to load, as the loading tower moves along the dock on rails to facilitate the loading through the various hatches.

LOADING: The ore handling and loading equipment for Palua has a max. capacity to load 3,000 metric tons of ore per hour, for the time being. With this capacity, the vessel's mooring lines should be tended during the operation.

The boom of the loading tower is so designed as to allow free movement in any direction, fore and aft. The gantry and boom travel along the dock for a distance of 518 ft., and can place the ore at a distance horizontally out from the dock fenderline of 23 ft. minimum and 62 ft. maximum at the highest water stage, and from minimum 29 ft. to maximum 67 ft. horizontally out at the lowest stage.

Care must be taken during the course of loading to avoid piling the ore too high in the holds, as this necessitates hand trimming before the hatch covers can be properly secured, and incurs unnecessary trouble.

UNDOCKING: The Master, assisted by a Docking Pilot, if required, will handle the vessel on leaving the dock, going upstream from the dock not less than 0.75 miles distance to the turning basin in the same heading as when the ship moored alongside. Two tugs will go alongside the ship prior to undocking and will assist the vessel until it is headed downstream in the main Orinoco Channel. The amber lights at the heads of the dock form a range to mark the shoreside boundary of the local dredged channel. A red light high up on the loading gantry will come in the same range as the 2 amber lights. In the turning basin a tug-boat will assist the vessel swinging downstream.

When the ship is in the main channel, properly headed downstream, the Docking Pilot will leave on the tug, and the River Pilots (2 of them) will assume the navigational direction. Report to Radio Marina by voice radio and give ETA at Mile 27.

Report again to Radio Marina giving position every hour, and try to contact Barima Pilot Station sometime before arrival at Mile 31, where the Pilots will disembark.

If voice radio communication is not possible, comply by radio-telegraph by way of the YVM station.

REGULATIONS: The Venezuelan law is very strict on the subject of contraband. It cannot be stressed strongly enough that all *new* articles, clothing, cigarettes, liquor, etc., must be declared and sealed up on arrival.

Concerning passes, the regulation states that "members of the crew who are not officers of the vessel, in order to go ashore and return aboard, have to be supplied with an identification card to be issued by the Purser of the vessel or his substitute, which card will contain the name of the vessel, the name of the crew member and the date of issue. This card will have to be signed by the person issuing same and has to be authorised by the respective officer of the Port Captain's office for the district".

GAS-FREE CERTIFICATE: Vessels reporting to Palua to load ore should have the holds and cargo compartments swept clean and ready to receive cargo. Also, any combination ore/tanker vessel tendering to load iron ore at Palua shall present, along with the Notice of Readiness, a Gas-free Certificate if said vessel has in the past been employed in the carriage of petroleum products. Such certificate shall be dated subsequent to the discharge of the vessel's last petroleum cargo. But they are advised that around Palua in Venezuela there is no chemist available for granting such a Gas-Free Certificate. It may be secured before arriving at Venezuela by calling at Trinidad, reporting to cable address: Harriman, Port of Spain.

In case of necessity, or for convenience, it could be arranged for the chemist to travel to Venezuela to meet the ship in Palua, advising Harriman (Port of Spain) at least 3 days before arrival at Palua.

If the vessel is equipped with a gas-indicating meter (explosimeter), CVG Ferrominera Orinoco C.A. will accept the Master's certification in writing that the vessel is gas-free. However, they reserve the right to check the vessel with their own equipment prior to acceptance.

MEDICAL: There is a medical dispensary at Palua, and a hospital of the Company at El Pao, where seamen may be admitted when requiring hospitalisation in emergency cases.

CONSULS: See "Puerto Ordaz".

REPAIRS: Minor emergency repairs of mechanical, electrical and electronic types may be carried out in the shops by the personnel of the Iron Mines Company of Venezuela. The American Bureau of Shipping has a surveyor at Puerto Ordaz, near Palua.

FLOOD SEASON: The port experiences a yearly flood season from the middle of June to the middle of November, to a max. of about 38 ft. at the last days of August, above the lowest stage (during the first days of April) in the dry season that occurs from the middle of November to the middle of June.

TIDE: The wind in the locality blows generally upstream, and on exceptional occasions during the dry or low-river season, when the current is weak, does overcome the current and cause the anchored ships to tend with stern upstream.

FRESH WATER: Drinking water is available at the dockside in limited quantity of about 100 tons every 24 hours. Small amounts of fresh provisions may be obtained in the locality.

FUEL: All grades of bunker fuel are available at Palua, delivered by barge.

Section C

PUERTO ORDAZ: 08.21 N. 62.43 W.

OPERATORS: CVG Ferrominera Orinoco.

LOCATION: The operations of the CVG Ferrominera Orinoco are centred in the State of Bolivar in Eastern Venezuela and iron ore is loaded into ocean-going vessels at Puerto Ordaz (08° 21′ N., 62° 43′ W.), at the junction of the Caroni and Orinoco Rivers, approximately 184 nautical miles from the open sea.

GAS-FREE CERTIFICATE: Any combination ore-tanker vessel tendering to load iron ore at Puerto Ordaz shall present, along with the Notice of Readiness, a Gas-Free Certificate if said vessel has in the past been employed in the transportation of petroleum products. Such certificate shall be dated subsequent to the discharge of the vessel's last petroleum cargo. Gas-Free Certificates can be obtained through an approved surveyor in Puerto Ordaz.
APPROACHES: See "Punta Cuchillo".
MAX. SIZE: Max. d.w.t. 115,000 tons. Max. LOA 289.56 m. Max. beam 39.01 m.
HEALTH: Vessels could be boarded by the Public Health Doctor in the stream off Puerto Ordaz. He will not come up a Pilot ladder and will insist on an accommodation ladder which should be rigged and ready when he approaches. In order not to delay docking, this accommodation ladder should be rigged on the port side during low river stage, and starboard side during high river stage. If vessel moves directly to berth, Health Doctor will board vessel at dock.
RADIO: Should a vessel receive radio advice at sea to proceed to Puerto Ordaz, and the clearance is to another port, the Master must radio station YVM Puerto Ordaz, and advise the name of the vessel, flag, port of embarkation, original port of destination, Master's name and number of members in the ship's crew. This is necessary in order to comply with article 17 of the Venezuelan Customs Law.
TUGS: All vessels touching at Puerto Ordaz will be assisted by a tug in docking and undocking manoeuvres. Line-handlers are available on the dock to secure mooring lines on vessel's arrival, and to release them on vessel's departure.
BERTHING:

1. **The Harbour:** The Puerto Ordaz Harbour extends from Mile 183.5 to Mile 184.1 of the waterway. The harbour consists of a natural basin formed by the mouth of the Caroni as it flows into the Orinoco. The width of the turning area within the basin varies from a min. of about 1,600 ft. at low water to a max. of about 2,000 ft. at high water. The lighted buoys marking the navigable limits on either side of the harbour are moved to different positions according to river stages in order to achieve full utilisation of navigable waters. The bottom of the harbour is generally rock, with scattered layers of sand overburden deposited as sediment by the river. This sand is regularly removed by dredging in order to maintain depths which will accommodate the maximum draft authorised by the Port Captain. The bottom configuration across the harbour consists of a rocky shelf extending about 900 ft. from the face of the dock. Beyond this shelf the bottom slopes steeply into a deep gorge, then rises to form a sandy beach along the opposite shore. The velocity of river currents at this site varies according to stage levels. A slower current is generally experienced over the rocky shelf adjacent to the dock, with velocities averaging about 1.5 knots at flood stages and about 0.5 knots or less at reduced river stages. The velocity of the current over and along the deep gorge averages about 3.5 knots at flood stages and 1.5 knots or less at reduced river stages. During extreme low water, the basin is subject to tidal influence and the velocity of currents is minimal, although there is no reversal of flow. The direction of the current is aimed slightly toward the face of the dock at its S.E. end but deflects away from the pier about 500 ft. downstreamward. Access to the harbour is by way of a naturally deep and wide fairway which is the continuation of the gorge as it enters the Orinoco River.

2. **The Dock:** The Puerto Ordaz Dock is located along the right ascending side of the harbour and extends outward from shore on a S.E. by East alignment. The all-steel fixed-height dock is 1,885 ft. long;. its elevation is 41 ft. above low water plane (0.0 ft. stage). This dock is fitted with a strong fender system and with a sufficient number of accessible bollards for proper docking and securing.

3. **Arrival:**

(a) Notice of Readiness: When completely ready to receive cargo, vessels will submit "Notice of Readiness" to CVG Ferrominera Orinoco. Vessels will normally be loaded in the order in which Notices of Readiness are accepted by CVG Ferrominera Orinoco. The Company will advise when the vessel may proceed alongside the dock.

(b) Docking: Special Docking Pilots are provided for the docking and undocking of vessels at Puerto Ordaz. These Pilots are qualified River Pilots, thoroughly familiar with local conditions. All vessels will dock starboard side to. During the low water stage, which is from the middle of November to the middle of June, no gangway should be rigged and nothing should overhang the starboard side of the vessel. When the river is sufficiently high which is from the middle of June to the middle of November vessels are requested to have starboard gangway or accommodation ladder rigged and ready to lower immediately after docking in order to expedite the commencement of loading. Venezuelan authorities and workmen will not use Pilot ladders. Vessels reporting to Puerto Ordaz to load ore should have holds and cargo compartments broom clean and ready to receive cargo. Considerable time will be gained if this requirement is met prior to reporting.

(c) Hatches: On arrival at Puerto Ordaz all hatch boards or pontoons, beams, tarpaulins, steel battens, wedges, etc., should be stowed on the port side of the hatch. This will keep the hatch gear cleaner and lessen the work of the ore handling clean-up gang.

(d) Ballast: In order to lose no time with the loading operations, as well as preventing short-lifting, all ballast should be pumped out before arrival at the dock. Use utmost caution not to pump oil or sludge overboard in the port area. CVG Ferrominera Orinoco Ships' Agency Representative will contact vessel on arrival and will assist in every way possible.

4. **Departure:** All vessels which have completed loading at Puerto Ordaz and have received the latest river information from the port offices, and are ready for their river transit in every respect, will proceed outward via the Orinoco Waterway, disembarking the Pilot at Mile 27. Once the Pilot has disembarked, vessels shall proceed over the South (dredged) Channel to Mile 0, and exit the waterway.

MEDICAL: There is a hospital at Puerto Ordaz which will admit seamen requiring hospitalisation.
TANKERS: See "Punta Cuchillo".

FRESH WATER: Drinking water is available alongside the dock.
FUEL: Bunker "C" and diesel oil is available.
CONSULS: An Italian consulate Agent at Puerto Ordaz, nearest consu for other countries at Cuidad Bolivar or Caracas.
REPAIRS: Minor emergency repairs may be carried out in the shops o CVG Ferrominera Orinoco.
TIME: The legal time of Venezuela, which is 4 hours behind GMT, sha be used in Pilotage Zones No. 1 and No. 2 of the Orinoco River.
SHORE LEAVE: Permitted, but it is mandatory that all crew membe should report back to their respective ships before sailing time.
GENERAL: 1. *Ore Loading Equipment:* The ore handling and loadin equipment installed on the pier has a speed ratio of 6,000 metric ton of ore loaded per hour. Due to this great loading capacity the vessel mooring lines must be tended at all times.

2. *Handling Facilities:* A movable 110 ton, rail mounted stiff-leg derric is installed on the dock for the handling of general cargo.

3. *Provisions:* Small amounts of fresh provisions are available.

4. *Surveyor:* The American Bureau of Shipping has a non-exclusiv surveyor in Puerto Ordaz. Lloyd's has an Agency in Ciudad Bolivar wi a branch office in Puerto Ordaz, and will appoint surveyors upon reques

SHIPMASTER'S REPORT: October 1986.
Terminal: Interalumina Terminal.
Location: Lat. 08° 18.7′ N., Long. 62° 49.0′ W.
Local Time: GMT minus 4 hours.
Approaches: Vessel can anchor 3 miles North of Sea Buo (Lat. 08° 56′ N., Long. 60° 10.4′ W.). Contact Punta Barima Pilots o Amacuro Pilots on VHF Channel 16. After obtaining permission, vesse must proceed to inbound buoyed channel without Pilot for 27 miles u to Buoy No. 27.1. Channel of sufficient depth, variable width becomin very narrow at times. One way transit only. Current sets are various.
Pilotage: River Pilot boards at Buoy No. 27.1 and continues till 2 mile before berth. There are various buoyed channels enroute with dredgin in progress. Several bends in the river, requiring close watch on steerin at all times. For outbound pilotage, River Pilot and Berthing Pilot boar at berth with River Pilot disembarking at Buoy No. 32.1.
Berthing: Berthing Pilot boards 2 miles before berth. Length of bert over 300 m. One tug available. Multi-purpose berth for alumina loadin by chute and bauxite discharge by grabs. Sufficient depth alongside.
Loading: Cargo worked throughout 24 hours. Loading by conveyor-fe telescopic chute, capacity about 1,000 t.p.h. Chute reaches all holds.
Density: About 995 alongside berth.
Fresh Water: Available at berth, good for washing water but unsuitab for drinking.
Bunkers: HFO and DO can be supplied by barge.
Provisions: Fresh provisions and bonded stores can be supplied b Puerto Ordaz Ship Chandlers.
Shore Leave: No restrictions. Shore passes required. Puerto Ordaz Ci is 30 minutes by car.
Radio: For messages addressed to local Agents in Puerto Ordaz, it i better using some nearby foreign coast stations. YVG (Maracaibo Radi provides unreliable service on HF. YVM (Puerto Ordaz Radio) does no accept public correspondence and controls all inward bound an outward bound transitting traffic only. Necessary that vessel gives tim of passing Entrance Buoy and ETA at Buoy No. 27.1. Vessel is als required to give hourly position at the beginning of each hour until arrivin at berth or anchorage and at the same time will obtain informatio concerning the changes of channel buoy positions and the transittin traffic for the vessels in the channel from the station.

For outward bound vessel, vessel to keep the same watch unt passing Entrance Buoy.

The following are the paired frequencies for communicating with YV (Puerto Ordaz Traffic Control): 468/472; 4192/4322; 6320/6372; 838 8453 kHz.

SHIPMASTER'S REPORT: September 1988.

The following information is to be read in conjunction with th 1987/88 Edition of the "Guide".

1. The information that advises Masters to pump out all ballast befor berthing should be amended.

At the end of September (1988) the river level was 2 ft. less than th highest predicted range. The actual depth at Puerto Ordaz Mineral Qua was measured at 53 ft. and the permitted air draft was 46 ft.

Ship's Masters may adjust their ballast condition through computin the relationship between their draft/air draft and actual depth at the jett which is subject to seasonal river level.

In addition to our regular ballast we took 1,100 cu.m. of ballast in th cargo holds in order to reduce our airdraft to the requested 46 f whereas we could have pumped out all ballast before going alongsid

2. The officially declared depth is 44 ft. and the permissible draft a Boca Grande Bar in late September was 42 ft.

3. The depth through the Boca Grande Bar Channel and its extensio up to the 40 mile Buoy may not conform to the declared depth, an despite the pilot's statement, the part of the Channel on the Bar betwee Buoys No. 30-20 is the shallowest part of the passage and ships spee is reduced to half speed, instead of the section between Buoy 13.1 – 15.1.

4. The actual position of the Fairway Buoy is Lat. 08° 55.55′ N., Lon 60° 11′ W. and on our visit the buoy was unlit.

5. Many of the channel marking buoys (especially the red buoys) ar unlit or have very weak flashing lights.

6. The rate of the river flow averages 3 knots – 4 knots.

7. It is suggested that deep draft vessels, outward bound, adjust the ETA at Buoy No. 44 in order that the vessel may be at Buoy No. 13 at daylight, taking into account that the vessel's speed will be reduce to half speed whilst navigating through the Boca Grande Channel fro Mile 30 to Mile 13, due to the effect of the flood tide and mud under th keel.

The following figures may be of guidance to other vessels:

Declared depth:	44 ft.
Permitted draft:	42 ft.
Vessel's draft:	39 ft.
Vessel's sea speed:	12.5 knots
Passed Buoy 44:	1400 hrs.
Dropped Pilot at Buoy 32:	1530 hrs.
Arrived Buoy 13.6:	1820 hrs.
Vessel's average speed over the Bar between Buoy 30 – Buoy 13.6:	6 knots
High water time at Buoy 13.6:	1730 hrs.
Height of water at H.W. time:	2.0 m.
Date:	27th September 1988.

8. It is suggested that whilst navigating through the Boca Grande Channel, fuel oil is used in order to reach a high speed as quick as possible.

9. Nett ore loading rate experienced was 3,500 tonnes p.h.

10. The boarding officers were very co-operative and polite and were at all times courteous to the ship's officers and the Master.

The only documents requested were 8 copies Crew List, 3 copies Crew Personal Effects List and 3 copies of the Stores List (indicating fuel, narcotics, arms and ammunition, bonded stores and usual ship's stores).

AGENCY: Mailing Address for Puerto Ordaz: CVG Ferrominera Orinoco C.A., Agencia de Barques, Puerto Ordaz. Telex: 86472 Fmopu.

CVG Ferrominera Orinoco acts as ship's Agent for all vessels consigned to load iron ore at Puerto Ordaz. This function is performed by the Superintendent, Traffic & Ship's Agency and his staff, whose offices are located adjacent to the loading dock at Puerto Ordaz.

AUTHORITY: Capitania de Puerto de Ciudad Guayama. *Tel:* (86) 229268. *Contact:* Captain Lino Garcia Ibarra, Port Captain.

Section D

PUNTA CUCHILLO, (Puerto Ordaz Terminal): 08.20 N. 62.47 W. **(See Plan)**

N.B. See "Orinoco River" for all important entry requirements. Specific details relevant to Punta Cuchillo only are as follows:

OPERATORS: Lagoven S.A.

LOCATION: The terminal and dock is located near Mile Post 192 on the South side of the river.

PILOTAGE: Government Pilot will pilot vessel to Puerto Ordaz. In some cases this same Pilot will act as Mooring Pilot and dock vessel at the terminal. If River Pilot does not also act as Docking Pilot, the River Pilot will disembark at Mile 178 during LW, and Mile 183, in HW, and a Docking Pilot will embark and take the vessel to mooring.

Pilots are obtained at Buoy 27 of the old channel, which is the same as Buoy 27.7 of the new channel and is located 5 miles West of the old lighthouse at Punta Barima at Lat. 08° 36′ 00″ N., Long. 60° 30′ 40″ W. It is important that vessels pass this buoy and be in sight of the Pilot Station (1 mile E.S.E. of Punta Barima Lighthouse), as Pilots will not proceed to the vessel until it has been sighted.

APPROACHES: *Shipowners Report:* 1982.

Cautionary Advice: Due to several wrecks located in the approaches 6 miles North and 13 miles N.W. of the Fairway Buoy, extreme caution is necessary when approaching.

The coastline is difficult to pick up on radar and the Fairway Buoy is detected within a distance of only 3.5 miles. Contrary to the chart, it is currently not fitted with a racon. The buoy is not 25 ft. high as described in pilot books. It is, in fact, a small black buoy with a lattice construction with the radar reflector missing. In clear weather the channel buoys can be visually sighted and detected on radar at about 5 miles.

From the Sea Buoy 0.1 to position Mile 9, a strong N.W. set is experienced and an average of 5° set to channel course can be expected. After position Mile 9 set decreases and becomes variable in direction until arriving at Pilot Station Mile 27 position.

From August until the end of the year the river current can attain a rate of 5 knots, making it necessary for an outbound vessel to reduce speed when approaching river bends in order to ensure bends can be safely negotiated. Due to the strong currents of the Orinoco River, recent experience indicates that, if a vessel goes aground, the Master when attempting to lighter the vessel should drop an anchor prior to discharging ballast.

All stretches of the river have range markers which mark the centre of the channel. While manoeuvring in the river, the vessel tends to steady up when rudder is put midship without any counter rudder. This does not affect the manoeuvrability of the vessel but Master and Pilot should be aware of this so as not to take rudder off too fast when turning.

Buoys are NOT on the edge of the channel from the Sea Buoy to Mile 27.0. White buoys are 125 ft., Red buoys are 75 ft. outside the edge of the channel. Buoys are located at the point where the channel starts to slant downward to the deeper water. The main dredged channel is 400 ft. wide. The ranges are on the centre of the channel.

Masters must refer to the sailing directions for additional information.

MAX. SIZE:

Gauge Reading	*Maximum Draft*	*Tide Required at Bar*
12 ft. – 14 ft.	33 ft.	None
14 ft. – 17 ft.	34 ft.	None
17 ft. – 20 ft.	35 ft.	None
20 ft. – 23 ft.	36 ft.	None
23 ft. – 26 ft.	37 ft.	None
26 ft. – 29 ft.	38 ft.	None
29 ft. – 32 ft.	39 ft.	None
32 ft. – 35 ft.	40 ft.	None
35 ft. – 38 ft.	41 ft.	half of high tide
38 ft. – 41 ft.	43 ft.	half of high tide

HEALTH: Vessel will be boarded by the Public Health Doctor in the stream off San Felix or Puerto Ordaz or occasionally at the Terminal. If he boards before docking, an accommodation ladder should be rigged and ready when he approaches, as he will not come up a pilot ladder.

RADIO: Vessels diverted at sea to Punta Cuchillo which do not have a Venezuelan Clearance on board, must advise Lagoven by radio as soon as they receive their orders to change destination. The following information must be given: Master's name, vessels flag, net tonnage, last port of call, port to which originally cleared and ETA. This information is required in order that inward clearance may be arranged with government officials in ample time prior to vessel's arrival. In absence of this information, vessel will be subject to a fine.

TUGS: The use of tugs is necessary in docking and undocking manoeuvres of boats at this Marine Terminal. Alcoa has a 2,100 h.p. tug available for this service. A tie-up launch will be provided to assist in the mooring of the vessel, and will handle all the mooring lines before and after loading.

BERTHING: The dock at the terminal consists of a docking platform, 2 breasting dolphins and 2 mooring dolphins. The docking platform is connected to shore by a 10 ft. causeway capable of carrying a light truck.

At mean low river stage, water depth at the face of breasting structures is 40 ft. The bank rises sharply from face of dolphins toward shore. The 40 ft. depth contour extends parallel to shore for a considerable distance upstream and down stream from the dock, allowing a flat approach angle.

Current is negligible during low river stage and is approximately 6 knots at midstream at high river stage. Current runs generally parallel to the face of the dock at the dock site.

Top of dock elevation is 45 ft. above low water stage. Buffering system extends from a point below low water stage to a point immediately below top of dock. Nothing should overhang the shoreward side of the vessel when docking during the lower stages of the river. The buffering system is designed to accommodate forces exerted by a vessel of 47,000 tons displacement, approaching the dock with a velocity component perpendicular to the dockface, of 0.5 ft. per second.

Bollards for vessel's lines are provided at the mooring dolphins and at the breasting structures. Mooring dolphins will safely withstand 200,000 lb. of mooring line tension.

The facilities include a 24 in. diameter submarine pipe-line which crosses the river a short distance down-stream of the dock. The crossing is marked by triangular-shaped signs on both banks of the river. Masters are cautioned against use of vessel anchors in this area.

The terminal pumps are capable of loading oil aboard ship at the rate of approximately 14,000 bbls.p.h.

INWARD CLEARANCE FOR DIVERTED VESSELS: Vessels diverted to Puerto Ordaz to load cargo should submit all documents, except consular mail, which they will not have. In lieu of this, they should submit 4 copies of the cable to divert, leaving enough space for the translation in Spanish. Vessels diverted at sea to Puerto Ordaz (Lagoven Terminal) which do not have a Venezuelan clearance on board must advise Lagoven at Puerto Ordaz, by radio as soon as they receive their orders to change destination. The following information must be given: Master's name, vessel's flag, net tonnage, last port of call, port to which originally cleared and ETA. This information is required in order that inward clearance may be arranged with government officials in ample time prior to vessel's arrival. In absence of this information, vessels will be subject to a fine.

MEDICAL: Medical assistance can usually be arranged, particularly in the case of an emergency.

SAFETY: The following is a condensation of the safety precautions that should be observed when the vessel is alongside the dock:

(i) All passageway doors leading to the cargo deck areas are to be kept closed during cargo-loading operations.

(ii) Ship's firefighting equipment must be kept ready at all times while berthed at Lagoven dock.

(iii) Smoking or carrying lighted or unlighted pipes, cigars or cigarettes on the weather decks of the vessel, or on the dock, is strictly prohibited under all circumstances. Masters are requested to instruct their crew not to throw lighted cigars or cigarettes over the side or out of the portholes.

(iv) An efficient watch must be maintained on deck and in the engine-room on the vessel, and a sufficient number of men must be on board at all times to move the vessel any time, in case such is required.

(v) If the galley is located near oil-handling operations of any nature, the skylight lids should be kept down and secured to prevent the galley being sprayed with oil in the event of a burst hose.

(vi) Ventilators in the vicinity should be turned away from the scene of operation.

LOADING: Monagas Crude is the only cargo available at the Puerto Ordaz Terminal. This crude has an API gravity of 11.9° to 12.5° F. (6.490 – 6.517 U.S. barrels per long ton). This cargo must be heated to approximately 140° F. in order to attain normal discharge rates.

Loading is accomplished through 3×10 in. hoses provided with 10 in., 150 lb. ASA flanges. Hoisting gear is provided for handling the hoses. A dock crew will connect the cargo hoses and disconnect them on completion of loading. Some adapters and other tools are available on dock. The oil will be loaded at an elevated temperature.

Precautions, as are common for any heavy oil, should be taken to ensure that no ballast water is left in any tank to be filled with this oil. If the cargo is contaminated with water, the water will not separate from the oil. The salt content of the oil will be raised approximately 10 lb. per 1,000 barrels for every 0.10% contamination by sea water.

All cargo compartments must be stripped dry. Cargo pipe-lines should be drained and/or purged of water.

There is no provision at the Puerto Ordaz Terminal for disposal of dirty ballast or tank washings. Tankers bound for Puerto Ordaz for loading must dispose of all dirty ballast and tank washings before entering the Orinoco River.

Prior to proceeding to sea, all Butterworth plates, cargo tank hatch covers and ullage plugs should be inspected to ensure against entry of salt water.

FRESH WATER: Fresh water is available ex-barge; cable advice of 24 hours is required. Dry provisions may be obtained in very limited quantities.

FUEL: Bunker fuels are available at all hours from Astilleros Orinoco C.A., who operate a floating storage and blending facility in the Orinoco River. Bunker fuels may be received at Lagoven dry dock while loading crude. Full cargoes can be made available.

REPAIRS: No major repair facilities are available. However, small repairs can be taken care of through local machine and electrical shops, and shore labour can be obtained if required.

TIME: GMT minus 4 hours.

SHIPMASTER'S REPORT: June 1987.

Location: The Terminal at Punta Cuchillo (Puerto Ordaz Terminal) lies some 192 miles up the Orinoco River.

Approaches: The buoyed channel was picked up at a distance of 15 miles, and we made contact with Barima Pilot 2 hours prior to arrival. Pilot Station instructed us to anchor 1 mile East of Buoy "0.1". No vessel may enter Boca Grande Channel without permission from the Pilot or local Radio Station "YVM". We anchored for a few hours and then proceeded up the dredged channel to Buoy 27.1 to the pilot station. The Pilot boarded from a fast launch using the pilot ladder on the starboard side. We continued up the river at 90 r.p.m. making an average speed of 10 knots. The Pilot was competent, but spoke little English. The vessel finally anchored off San Felix, 179 miles up river at 2324 hrs.

BA. Chart No. 3322 is not really adequate, so we obtained the local river charts through the Agent. In the lower reaches the leading lights are poor in daylight, being hard to pick out. The Boca Grande dredged channel is said to be 400 ft. wide, with red buoys with red lights marking the starboard side of the channel inwards and black buoys with green lights marking the port side. At times of dredging, buoys are displaced some 100 ft. outwards from the channel.

Communications: Throughout the river passage, the Radio Officer is in contact with "YVM" on the hour, giving the ship's position; they in return give positions of other ship movements, and navigational information with regards to shifting of buoys and where the dredger is working.

Berthing: We remained at anchor for 10 days, after which we picked up anchor in the afternoon and sailed the last 14 miles to the berth. It is of modern construction, fendered with wooden sheaving, with dolphins for the head and stern lines, which were long leads. Two tugs were used for mooring, tug ropes, close alongside "American style". The after tug was of conventional type, whilst the forward was a powerful flat bottom pusher type boat. The tugs kept the vessel in position whilst moorings were run.

The headlines were taken first, followed by the stern lines, run by a mooring boat, 3 lines at a time, springs by heaving line. Ending up with 3 lines and 2 springs each end. Ship's gangway used.

Cargo Operations: The independent surveyor spoke good English. Vessel loaded Morichal Crude (described as Asphalt) but not what I know as asphalt, being much thinner. API 12.5, loading temperature 132°F. To be kept at loading temperature. Flashpoint 192°F.

A loading rate of 2,467 t.p.h. was achieved using 2 × 10 in. hoses. Shore stop at end of loading.

On completion of cargo operations 3 hours should be allowed for paperwork. The cargo documentation is brought on board by the Agent,who signed for the Notes of Protest on behalf of the suppliers (Lagoven SA).

Officials: The vessel was boarded at San Felix anchorage by the Agent and 5 officials, and everything proceeded smoothly.

The following documents were required:

5 copies Crew List
3 copies Crew Personal Effects List
3 copies Bond List
Clearance from Last Port

The Ship's Certificates were inspected.

Departure: The Docking Pilot took the ship off the berth, using the same 2 tugs. Pilot departed once the ship was swung. We carried 3 river pilots, two were there for the journey only, although they all did a spell on the bridge. The vessel anchored at Buoy 44.3A for 5 hours, awaiting tide. The pilots left at Buoy 32.5. At 90 r.p.m. we made 8.5 knots until we were clear of the channel.

The maximum sailing draft allowed on this occasion was given as 38 ft. 6 in. (F.W.) which, to say the least, was optimistic.

AGENCY: Lagoven handles all papers and documentation connected with the ship's business. Lagoven will also help the ship's Master in providing required land transportation, limited provisions, or any other assistance that may be required for the operation of the ship's normal business. Alcoa will also assure that the ship's requirements are met in regard to Sanitary Inspection, Customs Inspection and Guardia Nacional.

VENALUM TERMINAL: 08.18 N. 62.50 W.

SHIPMASTER'S REPORT: February, 1981.

LOCATION: Mile 194 on Orinoco River. See "Matanzas – San Felix" in "Plan Section".

ENTRY: See "General, etc." under Orinoco River.

TUGS: Are summoned by Pilot when required.

BERTHING: Modern quay built on piles parallel to the bank with access by two piers, one at either end of the general cargo quay, allowing a one way system to be operated.

Length of general cargo quay – 215 m.
Length of bulk cargo quay – 85 m.
Depth alongside at lowest state of river – 12 m.

CRANES: The general cargo quay has two container cranes o 35 tonnes S.W.L. each. Aluminium ingots are the main cargo but other cargoes are handled. Container spreaders are available and also electro-magnets for use with the cranes.

BULK CARGO FACILITIES: Also see "Berthing".

The bulk cargo quay is served by an elevator with two suckers and is used exclusively for the discharge of alumina. An average rate o 200 tonnes/p.h. is claimed.

STEVEDORES: Working hours – 24 hours a day, 7 days a week.

AUTHORITY: Industrias Venezolanas de Aliminio C.A., Zona Industria Matanzas, Puerto Ordaz – Edo Bolivar. *Tel:* 086-993605 (also Fax) *Telex:* 86463. *Contact:* Captain Pedro Cabrera.

Industrias Venezolanas de Aluminio C.A., Av. La Estancia, Edificio Torre Las Mercedes, Piso 09, Urbanizacion Chuao, Caracas 1060 Venezuela. *Telex:* 23444. *Contact:* Luis Suarez, Terminal Operator.

END OF ORINOCO RIVER SECTION

PERTIGALETE: 10.15 N. 64.34 W. (See Plan)

LOCATION: Situated in a sheltered bay about 2 miles East of the port of Guanta, or about 4 miles from the pilotage zone situated in the North

PILOTAGE: The pilotage zone in Pozuelos Bay is the same as for Guanta, i.e. an area situated between the islands of Borracha and Chimana, in the Bay of Pozuelos (formerly called Bergantin Bay).

From the pilotage zone for the port of Guanta/Puerto La Cruz, the private pier Pertigalete is to be approached by sailing between the Isla de Plata and the island of Cachicamo. Pilotage is compulsory in and out and is performed by well-trained government Pilots. The navigation is considered very safe.

MAX. SIZE: The depth of water for ocean-going vessels alongside the Pier is 20 ft. (shore side) to 40 ft. (sea side).

TUGS: Available from Inward Clearance port at Guanta/Puerto la Cruz

BERTHING: The private pier in Pertigalete for berthing ocean-going vessels is up to 150 m. (492 ft.) long. The apron is ample and allows easy manoeuvre of trucks with cement. On the same pier the cement factory is regularly receiving raw material and machinery, but the berthing is along the West side of the pier for coastal trade, so does not interfere with operations for ocean-going vessels. There are chutes conveyor belts from the nearby silos. No cranes available.

STEVEDORES: Loading operations are performed exclusively by the personnel of the cement factory. All costs, including overtime, are for account of the cement factory.

Under normal conditions on Saturday afternoon there is no work, but almost without exception the cement factory works overtime on Saturdays if by doing so the vessel can be despatched that day. On holidays, if circumstances call for urgent operation, the cement factory has the option to work overtime.

TANKERS: Berth at private wharf at Pamatacualito, operated by Baro de Venezuela SA. Length of berth 113.60 m., depth alongside 10 m.

LOADING: The cement factory is able to deliver to the pier 600 tonnes per hour (cement in bulk).

OPERATOR: Private pier of C. A. Venezolana de Cementos is under the jurisdiction of Customs and Harbour Master of Guanta/Puerto La Cruz, Eastern Venezuela. All charter business and general administration is covered by Caracas Headquarters of C. A. Venezolana de Cementos.

Local address: Venezolana de Cementos, Apartado 4141, Puerto La Cruz. *Tel:* 95421-28. *Telex:* 81154 Vencemos.

AUTHORITY: Capitania de Puerto La Cruz, Paseo Colon, Sector Los Cocos, Puerto La Cruz, Venezuela. *Tel:* 660378. *Telex:* 8138 *Contact:* Captain Asisco Hernandez, Harbour Master.

AGENT: Servicios Navieros Tisa (Sernatica), P.O.Box 4356, Puerto La Cruz, Venezuela. Tel: (081) 95710-713. Telex: 81390. Fax: (081) 957

PUERTO CABELLO (inc. Borburata): 10.29 N. 68.01 W. (See Plan)

DOCUMENTS:
Last Port Clearance.
6 Crew Lists.
6 Passenger Lists.
3 Stores Lists.
3 Narcotics Drugs Lists.
2 Lists of Personal Effects.
1 Vaccination List.
Derat Certificate.

PILOTAGE: Pilotage is compulsory, but vessels must first anchor in roads 1 mile North of Punta Brava to await entry formalities and berthing orders.

MAX. SIZE: Bulk Cargo Pier: Up to 32 ft. draft.
Inner Port: Up to 28 ft. draft.
Also see "Tankers".

TUGS: The use of tug-boats within the port is compulsory both for entering and leaving port, as well as for manoeuvres in the port basin, for foreign flag ships over 300 tons.

BERTHING: The port entrance is 100 m. wide in direction West to East. Berth No. 1 and half of Berth No. 2 are along the same entrance channel, where ships are berthed only as an exception or when the port is rather congested. The total length of the North (main) Pier for the berthing of ocean-going vessels is 1,025 m., room enough for 6 to 8 vessels. For administrative reasons the pier is divided into 8 berths of about 128 m. each. Between Berths No. 2 and 3, the pier turns Southwards. Along the pier there are warehouses which under normal circumstances provide sufficient indoor space.

Along the East Pier, of 350 m. length, there are no warehouses. This pier gives berthing facilities to 3 or 4 middle-sized vessels.

Along the South Pier, of 500 m. length, there are 2 warehouses. This pier is exclusively used for coastwise shipping, fishery and small craft in general.

The dredged channel along the East Pier is only 80 m. wide. This is the only channel which connects the main basin of the port with the South basin of the port, the latter served through the South Pier.

Ro-Ro facilities available.

BULK HANDLING FACILITIES: 400 m. long new pier, designed exclusively for the handling of bulk cargoes.

This bulk cargo pier has an apron of about 25 m. and allows ships with a draft of 10 m. at any time.

Ships moored along this new pier are not able to take water there, but have to be shifted to the general cargo piers in the port of Puerto Cabello.

There is no telephone installation on the new pier.

Tug-boat service and assistance of Pilots is compulsory to negotiate the distance to and from the bulk cargo pier.

General cargo is not allowed to be handled at this pier. There are no cargo handling facilities whatsoever and no kind of rolling equipment either. All the vessels, unless they have up-to-date discharging equipment of their own, have to provide derricks of minimum 5 tons capacity to support the SKT discharging equipment of receivers. The cargo is discharged in bulk cargo trucks, fully closed and with only rather narrow manholes for the SKT arm.

The new grain terminal has been opened. The wharf is 400 m. long and allows 2 vessels to berth. Max. depth 30 ft. Average discharge rate 1,500 tons per day.

TANKERS: *Borburata:* The Maraven Terminal lies about 2 miles East of the port entrance.

Berth No.	*Max. length*	*Max. beam*	*Max. draft*
1	400 ft.	—	20 ft.
2	575 ft.	72 ft.	31 ft.

No. 1 Berth is used for bunkering only.

No. 2 Berth is used for the discharge of refined products and bulk chemicals. It is fitted with 4×8 in. Chicksans and a range of hoses from 4 in. to 8 in.

A Pilot is compulsory, and boards at Puerto Cabello. If the vessel is cleared outwards at Borburata, the Pilot may return to the pilot station by road.

Berthing and unberthing in daylight only.

Also see "Shipmaster's Report".

Lagoven Terminal: The buoy mooring is used for the discharge of petroleum products. Max. length 198 m. Max. beam 28 m. Max. draft 34 ft., will be increased to 38 ft. Max. Tonnage 40,000 d.w.t. Vessels berth using 5 shackles on the port anchor, and 6 stern lines to 3 mooring buoys.

Terminal Marino Holanda: Consists of 3 buoys situated in a depth of 45 ft. near Guaguaza Lighthouse. Used for loading/discharge of Chemicals.

STEVEDORES: *Straight Time:* Monday to Friday: 0700 – 1100 hrs. and 1300 – 1700 hrs.

Overtime: Monday to Friday: 1800 – 2300 hrs. Normally overtime beyond 2300 hours is not permitted.

Relief Gangs: Obtainable, if there are not too many ships working in the port at a time, from 1100 – 1300 hrs. and 1700 – 1800 hrs.

Work on Sunday: Not permitted except for passenger vessels, and considered as such are those carrying more than 60 passengers, and with a medical doctor on board.

Saturday Afternoon Work: Not permitted. But if a vessel can terminate operation and sail with a maximum of 3 additional hours' work, a special permit can be obtained from Customs and Port Authorities. In such case, the additional working hours are considered straight time work.

FRESH WATER: Available by tanker trucks only.

The drinking water in Puerto Cabello is tropical treated, well-filtered and wholesome.

Every vessel of over 600 nett tons calling at Puerto Cabello, and other ports in Venezuela, should arrange to take water only at Puerto Cabello in order to avoid double water dues.

REPAIRS: The adjacent Naval Yard, the entrance to which is within the main port, opposite the North Pier, is equipped for minor repairs both on engine and hull. For emergency purposes, the dry dock could be used. Its capacity is for ships up to 30,000 to 35,000 tons. All repairs on the hull are effected by a special crew transferred from the Naval Yard.

At the dry dock there is 1 crane of 15 tons capacity. Within the Naval Yard there are 2 slipways for ships of 125 ft. length and 210 ft. length max. respectively.

Venezuelan Navy ships always have priority.

WATCHMEN: A very careful watch must be maintained in and around the accommodation as ships' safes and cabins have been broken into.

OPENING/CLOSING HATCHES: Is not performed by the National Port Services, but instead either the ship's crew or hired assistance labour must be used. Recommended that ship's crew open and close hatches.

REGULATIONS: Port regulations referring to contamination of the port waters will be strictly applied and fines for contravention will be imposed.

No maintenance to bridgehouse, hull or deck should be carried out whilst in port unless special permit issued by the Port Captain has been obtained.

SHIPMASTER'S REPORT: November 1984 (see "Plans").
Vessel: LOA 170 m., beam 26 m.
Berth: Maraven Berth at Borburata.
Pilot: Pilot boards off Puerto Cabello during daylight hours only.
Max. Draft: 32 ft.
Tugs: When berthing, 2 tugs are made fast on the Main Deck fore and aft.

When unberthing 2 tugs are used, 1 tug tows aft and the other stands by forward.

Charts: B.A. 1523 and 1966.

SHIPMASTER'S REPORT: October 1985.

Depth within the port received from Agent:

Entrance to the Harbour	31 ft. 6 in.

SHIPMASTER'S REPORT: February 1989.
Documents:
1 copy Health Declaration.
2 copies Drugs List.
3 copies Stores List.
2 copies Crew Declaration.
5 copies Crew List.

The port officials are generally relaxed and easy going, ship's standard papers are accepted.

A Ministry of Transport and Communications Inspector will board, probably after clearance has been given, and will fill in a long questionnaire about the vessel and equipment and also inspect all the certificates. An Inspection Certificate is issued and is required by the Port Captain before the Clearance Outward can be issued, however, the Agent had never heard of this before.

Pilotage: The Pilot boards at the anchorage from a large launch. Pilots leave just in the entrance channel.

Approaches: Charts: B.A. Charts No. 1966 and 1523, USDA Chart No. 24450.

Buoys were found to be as charted with lights working.

In February 1989 dredging was being carried out in the entrance with cranes on a barge moored to the North shore of the channel and blocking about half the width. Two buoys (Fl. Red) are moored approximately mid-channel, marking the work, with vessels passing to the South. The channel is still adequate.

Communications: Contact with pilots and Port Captain's office can be made on VHF Channel 16.

Shortly after anchoring, a launch came alongside with an Arrival Information Form to be completed.

When calling on VHF, a number of stations will answer, most of them are ship chandlers but do not identify themselves as such.

We were advised that the vessel should anchor in Anchorage 'C' and when we asked who was calling they said that it was the Pilot station calling, it was in fact a ship chandler.

Agents can be contacted on VHF Channel 16 and usually use Channel 11 for working, during office hours only.

Tugs: The Pilot advised that tugs are compulsory, one tug used for vessels under 125 m. in length and 2 tugs for vessels over 125 m. LOA.

The tugs join the vessel just inside the harbour entrance and if making fast use their own lines.

Berths: Berths No. 13 to 21 have not yet been completed and work does not appear to be continuing at the present.

Berths No. 31 and 32 are served by a fixed grain elevator supplying a grain silo on on the dockside.

Berths No. 25 to 30 are used for discharge of grain by portable elevators and also for containers.

The area of the dock from Berths No. 25 to 32 is known as El Granel.

Dockside cranes are not provided at any of the berths but a quantity of mobile cranes of various capacities are available.

There are good fenders on all the completed berths.

Cargo Working: On the bulk berths working hours are:

Weekdays: 0700 – 1200, 1230 – 1800, 1830 – 2300.

Saturdays: 0700 – 1200.

Sundays and holidays: No work.

Overtime is possible on Saturday afternoons to finish, also at other times if all parties agree.

Grain is discharged with a two stage chain conveyor elevator, each stage requiring a crane for support, i.e. 2 cranes at each hatch working.

Two elevators were used throughout, requiring 3 ship's cranes and one shore crane.

Shore crane hire rates are variable, depending on the shift, but were quoted as approximately 4,000 Bolivars per 3 shift day, exchange rate is 37 Bolivars to U.S.$1.00.

Discharge rate is quoted as 1,500 tonnes per elevator but this is entirely dependent on the availability of trucks to take the cargo away.

The distance the trucks have to go is also important, as some of our cargo was reported to have a destination 10 hours away, with a result that each truck could only make one round trip in a day. Each truck carries approximately 40 tonnes.

It was unfortunate that the vessel arrived just before Carnival, as heavy transport is not allowed on the roads during this time and other holidays, in an effort to reduce accidents, due to the many drivers on the roads.

Delays during discharge were due to shortage of transport with some short delays for rain and breakdowns.

Elevator hours available	161.3 hours.
Elevator hours used	74.17 hours.
Gross rate for 8,000 tonnes	49.6 t.p.h.
Net rate for 8,000 tonnes	107.9 t.p.h.

The nett rate gives 1,618.5 tonnes per day for each elevator.

Of the 74.17 elevator hours used, 2 elevators were working simultaneously for 14.7 hours. If discharging had been carried out with only one elevator it would have required at least another day alongside to complete.

Priority for trucks is given to completing vessels.

First four days of discharge 11 shifts (48.45 elevator hours) were used, average of 4.4 hours per shift.

Last two days of discharge 5 shifts (25.72 hours) were used, average of 5.14 hours per shift.

Medical: The Agent must be pre-advised of any medical attention required. The office car will pick-up crew for the doctors at 0800 hrs. and 1330 hrs. at the gangway. A note is required from the vessel by the driver.

Fresh Water: Fresh water is delivered alongside by tank trucks, each carrying about 20 tonnes, order well in advance as delivery is slow. The trucks provide the necessary hoses.

Repairs: The Port Authority only allow chipping and scraping alongside on the bridge front, funnel and decks, provided that no chippings fall overside.

Hull painting is forbidden.

Permits are required for Plimsoll and draft mark painting, the permits are arranged through the Agent.

Engine repairs and check-ups require permits from the Port Authority prior to work starting, permits are often refused.

All repair work requires the advance permission of the Port Captain.

Repatriation: Prepaid tickets are a condition as airline agents cannot guarantee Seamen's Rebate and will give preference to full paid tickets.

Shore Leave: Shore passes are issued and stamped by Immigration and Port Captain, the blank passes are brought on board by the Agent with the visit and have to be completed before the Officials stamp and sign them.

Oil Spillage: The spillage of oil and garbage into the dock is prohibited, and this also covers overflowing of ballast tanks, washing dust from the docks and washing down.

Ship Chandlers: About ten ship chandlers will present themselves as soon as the clearance visit is completed, with widely varying prices.

We found Perdomo Shipchandlers to be professional, with reasonable prices and also provided a good service.

Captain's Car Service: The Agent will send the office car at 0900 hrs. and 1500 hrs. for transport to the office for communications with the Owners if required, or at any time if requested by VHF.

Flags: The Venezuelan flag must be hoisted every morning at 0600 hrs. and lowered at 1800 hrs. every evening whilst alongside.

Lifeboats: Vessels are not allowed to lower liferafts or boats for painting or maintenance work without a permit, whether alongside or at anchor.

Ratguards: Ratguards must be in position on all ropes in order to avoid fines.

PUERTO DE HIERRO: 10.38 N. 62.05 W.

DOCUMENTS:

Last Port Clearance.
6 Crew Lists.
6 Passenger Lists.
6 Stores Lists.
6 Narcotic Drugs Lists.
2 Health Declarations (forms provided and filled by doctor on arriva
Derat Certificate.

PILOTAGE: Pilot boards at Sea Buoy, Lat. 10° 37′ N., Long. 62° 06′ W
If no pilot boat meets vessel on arrival, ship must anchor to wait order
Send 7 day, 48 and 24 hour ETAs to cable address "Transterm Guiria"
Vessels should anchor in the vicinity of Sea Buoy. No radio-telephone available.

ANCHORAGE: Vicinity of Sea Buoy. Good holding ground.

RESTRICTIONS: Vessels may have to wait at anchorage until slac water for docking when tide/current is strong.

MAX. SIZE: Dock, East berth: 30 ft. at LW; 33 ft. at HW; 690 ft. lengt 90 ft. beam.

Dock, West berth: 19 ft. at LW; 32 ft. at HW; 600 ft. length, 60 ft. bea
Also see "Berthing".

HEALTH: Doctor boards at berth and grants Pratique. Any suspecte disease or fever to be reported at that time. Vessels arriving from Venezuelan port do not require Pratique.

RADIO: La Guaira, Venezuela.

TUGS: None available.

BERTHING: Berthing at times limited to slack water period dependin on strength of tides. Pilot will advise.

Bauxite Terminal: Max. draft 37 ft. Depth alongside 40 ft. Max. 40,00 d.w.t. Loading rate 3,000 t.p.h.

STEVEDORES: Bulk cargoes: Discharging rate 700 – 800 t.p.h., loadin rate 800 – 1,000 t.p.h. No facilities available for handling general carg

MEDICAL: No notice required. Venezuelan Navy Hospital with limite medical assistance.

TANKERS: No oil carriers.

DENSITY: LW – 1020. HW – 1023.

FRESH WATER: Available in limited quantities at berth. Rate of deliver 30 t.p.h.

FUEL: In an emergency. Diesel fuel medium, specific gravity at 60°F 0.85, API gravity at 60°F 35, viscosity SSU at 100°F 37, viscosity engle at 20°C 1.40.

REPAIRS: None. Small company workshop.

CONSULS: None.

CUSTOMS ALLOWANCES: Two cartons of 200 cigarettes each o equivalent in tobacco. Two 0.75 litre bottles.

AIRPORT: Nearest airport (1 hour voyage on launch) is Guiria wi 2 weekly flights to Caracas and the same number to Port of Spain Trinidad. Next nearest (1 hour launch plus 2 hours car) is Carupano wi 4 daily flights to Caracas.

TIME: GMT minus 4 hours all year round.

HOLIDAYS: Cargo worked 24 hours a day, 365 days a year.

IDENTIFICATION CARDS: Issued locally by Navy on arrival.

DEVELOPMENTS: Possibility of increasing draft to 42 ft. at loadin berth, and to 30 ft. at discharging berth.

GENERAL: The whole of Puerto de Hierro is a Venezuelan Navy Supp Base. The dock and cargo installations are operated by Puerto de Hierr S.A., a subsidiary of Caribbean Steamship Company, S.A. Only bu cargoes transhipped by Caribbean Steamship are handled.

AUTHORITY: Puerto de Hierro, S.A.

PUERTO LA CRUZ, (Puerto La Cruz Terminal): 10.13 N. 64.38 W.

(See Pla

FLAG: Venezuelan flag must be displayed from the foremast whe entering Pozuelos Bay as well as in docking operations regardless o the hour. At all other times the Venezuelan flag must be displaye between sunrise and sunset.

LOCATION: Puerto La Cruz located on Pozuelos Bay on the N.E. coas of Venezuela. Its harbour is well protected by numerous islands again sea currents. The hurricane path is several hundred miles to the Nor and has never affected the flow of navigation in the Puerto La Cruz are

The lighthouse marking the entrance to Pozuelos Bay is locate Lat. 10° 18′ 18″ N., Long. 64° 41′ 07″ W. Visibility is 20 miles.

DOCUMENTS: Arrival Clearance is effected on board vessel short after docking by Government Officials and a representative of th Company.

The following documents are required and should be prepared pri to arrival:

Ship's Register.
Ballast Manifest (1 copy).
Crew List (6 copies).
Passenger and Baggage List, if any (5 copies).
List of Passengers in Transit, if any (5 copies).
List of Personal Effects (4 copies).
Stores List* (5 copies).
List of Slop Chests (4 copies).
Sailing Permit issued by Marine Authority at last port of ca (Original).

*Stores List should indicate separately all deck, engine and cab stores.

PILOTAGE: The use of Government Pilots is compulsory for all vessels docking and undocking. The Company will arrange for this service at all times. If it becomes necessary for the Master of the vessel to disregard Pilot's orders in order to ensure safety of the ship a written report from the Master shall be submitted promptly to the Government Port Captain in Spanish. Meneven will assist in translation, when necessary.

The zone for Pilot to board or to anchor awaiting Pilot is delineated by the following 3 lines: South by parallel 10° 15′ N., East by meridian 64° 40′ W., and West by an imaginary line from Punta Puinare on Isla Chimana del Oeste to the North point of Morro de Barcelona.

When ready to dock, a Pilot will be despatched by launch to ship.

RESTRICTIONS: No restrictions on arrival or sailing time.

MAX. SIZE: No limitation is placed on width of tankers. Ships up to 1,000 ft. in length can be turned around in the inner harbour area. Max. safe draft alongside (Berth No. 5) is 55 ft. (Also see "Berthing".)

HEALTH: In theory the Government Port Doctor is to board each incoming vessel and board only outgoing vessels which carry passengers. In practice, however, the doctor boards at his discretion.

Ships cleared between the hours of 1700 – 0800. Mondays through Fridays and all day Saturday, Sundays and holidays are charged by Immigration Service for the issuance of shore leave passes. There is no charge for this service from 0800 – 1700 hrs. Mondays through Fridays. Transportation and immigration clearance fees on movement of seamen are billed at cost.

RADIO: Masters are requested to advise Corpoven Puerto La Cruz by radio 72 hours in advance of estimated arrival giving vessel's name, date and hour of arrival, bunkers, name of Master, port of departure, draft (arrival), Venezuelan gross tonnage, flag of ship. Vessels may contact the terminal by radio-telephone on 2182 kHz and VHF Channel 16. There is standby attention 24 hours a day. The terminal also has the frequencies 2080, 2120, 2638, 2738 and VHF Channel 13.

Ship-to-shore radios are installed on the oil dock and on both tugs. A 350-watt AM transmitter-receiver is monitored 24 hours a day.

TUGS: The use of 2 tugs is compulsory for all vessels over 145 m. LOA. The Company has available 3 tugs (2×3,000 h.p. and 1×1,600 h.p.).

BERTHING: The loading facilities consist of 6 berths. Products available and safe draft are as follows:

	Berth 1	*2*	*3*	*4*	*5*	*6**
Crudes	×	×	×	×	×	×
Heavy fuel oil					×	
Refined products		×	×	×		×

Max. safe draft (ft.)	38	38	38	55	55	40
Max. d.w.t. (thous.)	45	45	45	110	110	60
Max. LOA (ft.)	750	750	750	950	950	·750

*El Chaure Terminal – Now Pier No. 6. Also see "El Chaure".

Jose Terminal is Berth No. 8 – See "Jose Terminal".

Upon arrival at dock the following rules must be observed:

(a) Masters must ensure that mooring lines are properly tended during the discharge of ballast and loading of cargo, and that sufficient personnel are on board at all times to handle same. Discharging or loading will be temporarily suspended upon infringement of this regulation.

(b) Masters are requested to remove the blank flanges from their vessel's loading manifold before docking, so as to expedite the connecting of the shore hoses by company personnel. Vessels using Berth No. 5 are also requested to have their derrick and gangway ready for use.

Note: Vessels normally dock with starboard side to dock, unless otherwise advised.

(c) While docked, discharge of sea water, hot water or steam on dockside of ship is prohibited. Hot water or steam may activate the automatic sprinkler system as well as damage piping located under the dock surface.

(d) Rat-guards must be placed on all ropes connected with the shore.

(e) Heavy exhaust smoke from vessel's funnel is not permitted. Any infringement of this rule will result in Government fine and/or removal of ship from dock.

(f) Meals must be provided in officers' mess-room for Venezuelan National Guard personnel who may be assigned to the vessel during stay in port.

LOADING: After the vessel has been cleared, the Company Dock Supervisor on watch will give the Master of the vessel written instructions as to grade or grades of cargo, loading rates, information on size of hoses and lines, and other information pertinent to the loading of the vessel.

During loading operations, company employees are on watch to administer to the needs of each vessel.

Upon termination of loading cargo of crude or fuel oil, hoses are normally displaced with air at controlled rates prior to disconnecting. If the ship's officers request that the alternate procedure of draining hoses be effected, shore personnel will be happy to comply provided the following steps are observed by ship's officers:

1. Advice be received prior to termination of loading cargo.
2. Ship's receptacles be situated to receive oil drained on board. It should be noted that heavy fines are imposed for spills or overflows which contaminate the bay.

Shortly after completion of loading, company personnel together with ship's officer will take ship's ullages and, later, deliver cargo and sailing papers to an officer of the vessel.

Ships must vacate berth upon completion of loading and await papers at anchorage if the berth is needed for another vessel. The Dock Supervisor on duty will advise ship's officer on this matter.

BALLAST: Although climatic conditions in Puerto La Cruz are relatively mild, vessels should arrive with sufficient ballast to permit safe handling. Venezuelan regulations strictly prohibit the pumping overboard of dirty ballast in territorial waters. All ballast must be pumped ashore with the exception of vessels especially equipped with clean segregated systems which are reserved for ballast only. Vessels so equipped will be permitted to pump overboard after first being inspected and approved by shore personnel. Heavy fines are imposed for pollution of waters and industrial fishermen are quick to report any infringement. Max. discharge pressure to shore installations is 90 p.s.i. through the 16 in. line which dumps into ballast lakes approximately 300 m. South of dock.

No vessel will be allowed to discharge ballast if any of the following conditions exist:

(a) Last previous cargo was sour crude/product and/or could result in unpleasantness to area inhabitants.

(b) Ballast has lead gasoline, naphtha and/or other volatile residue which may cause an explosive atmosphere at the open ballast pit.

(c) Last previous cargo had to be heated and/or pour point was higher than 80°F. This will be verified by the laboratory.

MEDICAL: All requests for medical or dental treatment must be accompanied by a written request from the Master to the vessel's Agent.

FRESH WATER: Fresh chlorinated water is available at an average rate of approximately 2 t.p.h. Total volume of water that can be supplied during the normal period alongside averages about 150 tons. As water is not held in special reserve for vessels' requirements but supplied from terminal water system, availability may be limited dependent on time of year and other conditions.

FUEL: The terminal is not a general bunker station. Only ships loading petroleum or its products may take bunkers.

Bunker "C", heavy diesel fuel and complete range of intermediate fuels are available in reasonable quantities. Delivery rates to the ships are approximately as follows: Bunker "C", 200 t.p.h.; heavy diesel, 150 t.p.h.; intermediate fuels, 150 t.p.h.

Bunkers are delivered concurrent with the cargo and should be taken as soon as clearance is granted.

Meters are installed on all bunker systems and are calibrated in nett barrels; except diesel meters which indicate gross barrels.

The dock valves on the bunker lines will only be opened and closed upon advice from the ship's personnel.

Lubricants and gasoil are available through the vessel's Agent.

CONSULS: The following foreign countries have consular offices in the vicinity of Puerto La Cruz:

Belgium	France	Netherlands
Brazil	Great Britain	Norway
Colombia	Italy	Sweden
Denmark		

Vessel's Agent should be appraised of vessel's consular requirements promptly upon docking.

REPAIRS: Request for repair work by local contractors must be accompanied by a written request from the Master of the vessel.

SURVEYORS: 1. Saybolt, Inspecciones and AIVEPET cargo inspectors available at the Terminal Office.

2. Lloyd's Register, American Bureau, Bureau Veritas, P & I available locally or from Caracas via the ship's agent.

CUSTOMS: Crew members should be warned against taking knives or other lethal weapons ashore, as this is strictly prohibited. All firearms and ammunition must be noted on Stores List. They cannot exceed 1 per officer and 18 cartridges per gun. No arms may be carried while ship is in Venezuelan waters or tied up at dock. Contraband of any description will be confiscated. Each man is allowed 1 package of cigarettes on his person and this package must be opened. No liquor is to be taken ashore. It is prohibited to carry liquor from shore to ship without authorisation from Master of vessel. It is further strictly prohibited to consume liquor in dock area.

It is normally forbidden to take photographic cameras ashore. However, upon written request to the National Guard contingent on the oil dock, special permission may be obtained. This is subject to 2 limitations: (1) that the camera is returned to the ship; (2) that no photographs are taken of the petroleum installations.

REPATRIATION: Seamen discharged from hospital for transfer to another port, seamen arriving from another port or those being repatriated are handled by the vessel's Agent, who must comply with all Venezuelan Regulations.

In the case of seamen left ashore for any reason, Masters are requested to furnish a letter accepting responsibility for all expenses incurred, advances if any, and instructions for repatriation. Venezuelan regulations, at all times hold the vessel responsible for a seaman during his stay in the country. Close contact is maintained by radio with ship owners regarding disposition of their seamen.

TIME: GMT minus 4 hours all year round.

EMERGENCY CO-ORDINATION CENTRE: Seccion de Seguridad, Busqueda y Salvamento Maritimo. Telex: 31154. Tel: (02) 513395, 512156.

TELEPHONES: There is a telephone booth on each dock. The supervisor on duty may be contacted by calling number 308 or 906.

BANKS: Banco Royal Venezolano. Tel: (081) 691921.

Cash: The local currency is the Bolivar.

Foreign currency may be exchanged at local banks. Local banks are open Monday to Friday from 0830 – 1130 hrs. and from 1400 – 1630 hrs., except holidays.

STORING: See "Prelims".

1. Vessel can be stored by truck.
2. No need for barge storing while ship is alongside.
3. Trucks can proceed to the berth gate only. Distance from gate to ships berth 200 ft.
4. Fork lift trucks cannot be permitted inside the berth while the ship is either deballasting or loading.
   No fork lift trucks whatsoever permitted alongside LPG ships.
5. No Customs regulations in force regarding storing.
6. Local riggers can be employed to assist with storing through ship's local Agent.

IDENTITY CARDS: Passes for shore leave are issued by the officials of the "Capitania de Puerto", who board with the Customs authorities upon the vessel's arrival at dock. These passes are valid for the duration of the vessel's stay in port and must be returned before sailing to the guard assigned to the vessel.

In order to comply with Immigration Regulations, crews should be carefully checked before sailing, and any missing seamen reported to the vessel's Agent. Crew members left behind when the vessel sails will be held in custody until deported at the vessel's expense.

REGULATIONS:

Excessive Smoke. It is absolutely prohibited to exhaust heavy smoke through a ship's funnel while tied up at the Company's docks. It is also prohibited to blow boiler tubes. Failure to comply with this regulation will result in any or all of the following actions:

1. Vessel's discharge of ballast or loading of crude or products will be immediately shut down.
2. Vessel will be subject to fine from authorities.
3. Vessel may be removed from dock.
4. Ship's Agent will be advised of infractions of this regulation.
5. Fines, time lost, and other related expenses will be charged against the vessel.

Pollution. Venezuelan laws are very strict on this subject and local authorities quickly enforce existing statutes. For this reason each Master is handed a circular that emphasises the necessity of complying with federal and local laws and customs.

The spilling or discharge of dirty ballast, crude oil or petroleum products into coastal waters is defined as pollution, as is also the throwing overboard of garbage, trash or other unwanted objects while the vessel is at anchor or dockside. Prior to the start of loading operations all discharge valves, bilges and scuppers must be closed and strict vigilance exercised during deballasting and loading operations.

When a spill does occur, the Master, Government officials and a company representative evaluate the quantity and submit a report to the Government Petroleum Inspector. This report becomes the basis for a federal fine that is practically incontestable. An additional expense occurs when local authorities require assistance in cleaning beaches and shorelines after a major spill and can pinpoint the responsible vessel or source.

TONNAGE CERTIFICATE: Due to reciprocal agreements between Venezuela and the following countries, ships flying the flag of any of the below-named countries are exempted from Arqueo compliance and payment of fees: Denmark, Great Britain, France, Germany F.R., Netherlands, Norway, Portugal, Sweden, United States.

Ships bearing the flag of any other nation shall require a Venezuelan Arqueo Certificate. The cost of measuring is contingent on the size and tonnage of vessel. The certificate is usually issued after the ship sails from port. It is then sent to the marine department of the Owners of the vessel by airmail.

GENERAL:

No charts or sailing directions are available in the terminal. Same should be forwarded by airmail to the vessel's Agent for delivery to the ship.

All ship requirements such as chandlery supplies, mail, cash advances, medical, dental, consular requirements, repair work, laundry service, bonded stores, transportation etc. should be obtained through the vessel's Agent.

Local authorities strictly forbid the throwing overboard of garbage, trash or any objects while anchored or docked, and they also forbid the exchange of articles between crew members and the occupants of adjacent small craft.

Corpoven as operator of the Terminal charges a fixed fee for General Services such as supervising the docking and undocking manoeuvres, hose connections, loading and documents required by the cargo buyers or consignee. Handling of Telexes, documents and air postage will be charged at cost.

Offices of Corpoven loading and marine personnel are located on the first floor of the building between Berths No. 1 and 2. Any matter concerning loading, bunkering, is handled through this office, which is open 24 hours of every day. On the ground floor of this same building is the Documentation Section.

DEVELOPMENTS: Tanker terminal for VLCCs to be built.

SHIPMASTER'S REPORT: February 1979.

Documents:

3 copies of List of Passengers or "nil" passengers.

3 copies of a letter by Master stating that vessel was diverted after sailing from previous port and explaining why clearance destination is wrong.

3 copies of cable ordering diversion.

Anchorages: Good holding ground in N.W. part of anchorage area, thick mud.

Restrictions: Maximum height of manifold about 18.95 m., so necessary for vessels of 140,000 d.w.t. to load some cargo before completion of ballast.

Max. Size: If draft less than 30 ft. on arrival vessel can approach berth direct from West, and use 2 tugs. If more than 30 ft. draft then vessel must use channel to the North of berth and use 3 or 4 tugs. This for vessels of 140,000 d.w.t.

VHF: Tankers call "Corpoven" on Channel 16, then change to Channel 12 or 13. Also call Agents on Channel 16.

Berthing: Back springs to bollards on jetty. Breasts and heads and stern lines to hooks on dolphins. These hooks are secured to bollards by wire of circumference 19 cm. or diameter 6 cm.

Consuls: No U.S. Consul available and Agents will give Master letter to this effect for U.S. Immigration.

General: Ballast, if clean, may be pumped overside. If dirty, advise Corpoven prior to arrival of quantities to be pumped ashore. They will also accept slops if not sour crude or smelling too badly.

Notice to Shipmasters:

We wish to advise the Masters of all vessels calling at this port that it is strictly prohibited to take photographs.

It is likewise contrary to regulations to carry ashore a camera. Same is liable to be confiscated by the Government Authorities.

Signed S. A. Corpoven.

SHIPMASTER'S REPORT: January 1989.

Berth: Berth No. 4, starboard side alongside.

Vessel: 89,000 d.w.t.

Gangways: Shore gangways at Berths No. 1 – 5.

Tugs: 2 tugs used, port bow and starboard main deck aft. Tugs lines used.

Mooring: 2 head/stern lines, 2 breast lines and 2 springs at each end. Head lines sent first, then breast lines and finally springs. From aft, springs first, then breast lines and finally stern lines.

The pilot boat takes all the forward lines. After springs sent away by heaving line if possible, otherwise ali after moorings by pilot boat on completion of forward moorings.

AGENCY:

All incoming ships to lift cargoes at this Terminal must have a local Agent to render all services required for a prompt and efficient tanker turnaround and to cancel all ships disbursements during the port stay.

AUTHORITY: Capitania de Puerto, Guanta, Puerto La Cruz. *Tel:* 081-660534, 081-660367. *Telex:* Capipuerto 81386. *Contact:* Captain A Hernandez, Port Captain.

Operator: Corpoven S.A. *FAX:* (081) 603099. *Contact:* Jesus Narvaez, Terminal Supervisor.

PUERTO SUCRE (Cumana): 10.28 N. 64.12 W.

(See Plan)

SHIPMASTER'S REPORT: August 1980.

DOCUMENTS: As for Guanta. Entry formalities, normally after berthing but if at anchor will board about 0900 hrs.

PILOTAGE: Pilotage is compulsory for berthing and unberthing. Pilot will anchor vessel if required.

APPROACHES: Approaching Puerto Sucre at night, the lights of the city are visible for many miles, but the light indicated at the end of the pier is non-existent, also the water tower marked on the chart with red lights is non-existent.

Two vessels were alongside when this vessel approached so the pier was clearly visible with the lights of the ships, otherwise there are no lights on the pier.

The pier indicated on the chart just North of the main pier is no longer there although at low water parts of the supports are still visible. Further North there are 3 piers, approximately half cable long, used by fishing boats. They start approximately 1 cable North and 1 cable between each, also there are car ferry terminals before the mouth of the river South of Pta. Carenero. This river mouth is undergoing extensive work which is apparently to be a fishing harbour.

A tall white building is situated in approximate position Lat. 10° 27.8′ N., Long. 64° 11.1′ W., it has a fixed red light and an occulting red light at night. A silo is situated in approximate position Lat. 10° 26.7′ N., Long. 64° 11.25′ W., this has 3 red lights in a horizontal line at night. There is an air light on the control tower at the airport alternating white and green every 5 seconds, but this is only lit when an aircraft is due.

ANCHORAGE: Anchorage is limited in pilotage area "A". This vessel anchored 3 cables off the shore line and 3 cables off the pier in 30 fathoms of water, vessels also anchor 2.5 to 3 miles S.W. of pier in 25 fathoms, however Pilots prefer vessels to use nearer anchorage.

VHF: Pilots occasionally on Channel 16, but very little English spoken. The ship's chandler has a VHF set and can be very helpful as he speaks very good English.

TUGS: One tug is available to assist with berthing/unberthing.

BERTHING: Vessels use both sides of the pier and Ro/Ro vessels tie up stern to the head of the pier. Soundings were taken around the pier (See "Plan").

CARGO HANDLING FACILITIES: There are numerous fork lift trucks of all sizes, 4 mobile cranes and some small towing vehicles. This vessel had a cargo of bagged fertiliser which was discharged onto lorries and there was no shortage of these, even when working 2 ships with 10 gangs no delays were caused due to lack of transport. Ship's gear is used at all times but the mobile cranes can be hired if required.

MEDICAL: Services available.

FRESH WATER: Available using ship's hoses.

FUEL: Diesel oil is available but difficult to obtain as it has to be brought from Puerto la Cruz by road tankers.

WATCHMEN: Not available, one member of National Guard on board requires a cabin if one available. This vessel had no spare accommodation but the guard must still be fed.

SHORE LEAVE: Permitted, but shore passes must be carried and passes returned when vessel leaves.

GENERAL: *Provisions and Laundry:* Available.

Garbage Disposal: No facilities.

PUNTA CARDON: 11.38 N. 70.14 W.

PORT LIMITS: The area enclosed by the parallels of Lat. 11° 38′ 00″ N. and Lat. 11° 36′ 38″ N. and the meridian of Long. 70° 14′ 25″ W.

FLAG: It is compulsory to display the Venezuelan flag at the foremast starboard yardarm during daylight hours for ships anchored or berthed in Venezuelan waters. The ship's Services will provide a Venezuelan flag at any time for ship's account.

LOCATION: The port of Punta Cardon is located on the Gulf of Venezuela, on S.W. coast of Paraguana Peninsula, Venezuela. Punta Cardon is an open sea port with practically no swell, due to the Easterly winds prevailing almost all year from the shore side.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send ETA at least 3 days before arrival at Punta Cardon.
2. If a ship, originally cleared for another port (including any other Venezuelan port) is diverted at sea to Punta Cardon, certain information must be radioed prior to arrival in order to avoid heavy fine(s) and/or delays.
3. No dirty ballast may be pumped overside in port in Venezuelan coastal waters. Ballast disposal facilities are available at Punta Cardon Terminal.
4. The use of Venezuelan Government Pilots is compulsory for berthing and unberthing.
5. In addition to other clearance documents, 5 copies of an itemised list of articles in the ship's slop chest must be presented to the authorities on arrival.
6. The emergency fire signal is 5 long blasts on the ship's whistle or siren. No other signal is to be given in cases of emergency.
7. Rat-guards must be placed on all mooring lines.

DOCUMENTS: Clearance (inward Pratique). Inward Clearance is effected on board by Government Port and Customs Officials and a representative of the Oil Movements Department immediately after berthing. The following documents must be ready on arrival:

(1) In ballast:

- *(a)* Clearance from Last Port (1 copy).
- *(b)* Ballast Manifest from Last Port (1 copy).
- *(c)* Crew List (7 copies).
- *(d)* Steward's Stores List (all foodstuff, liquors, tobacco, etc.), to be declared on a separate and independent sheet (5 copies, see note (2)).
- *(e)* Deck and Engine Stores and Spare Parts List (paints, varnishes, chains, ropes, etc.), to be declared on a separate and independent sheet (5 copies, see note (2)).
- *(f)* Medicine Chest Lists (including narcotics accurately itemised) (5 copies).
- *(g)* Slop Chest Lists (5 copies).
- *(h)* Personal Effects Lists (4 copies).
- *(i)* Sailing Permit (issued by Maritime Authority at Last Port of call) (1 copy).
- *(j)* Passenger and Baggage Lists (if any) (2 copies).
- *(k)* List of Passengers in transit (if any) (4 copies).

(2) Both the Steward's Stores List, the Deck and Engine Stores and Spare Parts List may be prepared on board prior to the vessel's arrival. The Steward's Stores List must be comprehensive and accurate, especially with regard to cigarettes and liquor. All new clothing, gifts, souvenirs, etc. are to be clearly marked. All personal effects of the crew are to be collected and placed in the Bonded Stores Locker, ready for sealing by the Customs Authorities on arrival.

Although vessels proceed directly to Punta Cardon, clearance documents should be made out showing the port as "Las Piedras, Paraguana (Punta Cardon)". Failure to comply with this requirement may result in fines up to a max. of U.S. $600.00.

(3) Clearance documents out-bound: Outward Clearance and cargo documents are delivered on board by the Ship's Services Representative.

In the event that the berth is required by another vessel, a vessel having completed loading may be required to vacate the berth promptly and proceed to anchorage to await cargo documents and clearance.

PILOTAGE: Pilots are employees of Venezuelan Government and pilotage is compulsory for vessels entering or leaving harbour. The Ship's Services Office will arrange for this service at any time. If it becomes necessary for Master of the vessel to disregard Pilot's orders in order to ensure safety to the ship, the Master must promptly submit a written report to the Harbour Master on the matter, via the Ship's Services Representative, stating reason for this action.

Pilots sustaining injuries: It is compulsory to submit a full report in cases where a Pilot is injured while performing duties on board vessels.

Agent's Notice to Masters: Dated July 1986.

Subject: Pilot Service from/to Punta Cardon

Harbour Master's Office has issued new regulations. Here below are mentioned regulations:

1. Pilot service from Punta Cardon is only compulsory when Masters are crossing the channel of Lake Maracaibo for the first time. If this is not the case, the Pilot should be then embarked at San Carlos.
2. Upon your request this Pilot service can be arranged by the Agency.
3. On departure, Pilot service to Punta Cardon is not required.
4. If Official Pilot is unable to disembark at San Carlos due to difficulties on board or by *force majeure*, or if you decide to change the instructions given to the Agency with regard to Pilot disembarking San Carlos, a letter addressed to the Harbour Master stating your reasons should be handed to the Pilot before he disembarks in Cardon.

Master's Note: With regard to the above, on reflection the content of the letter from Agent may not be too clear to those not familiar with this area. At risk of stating the obvious, what this Notice is saying is that pilotage inwards from the "EM" Buoy, to the San Carlos Pilot Station is only necessary on the Master's first visit to a Lake Maracaibo Port. Thereafter he may navigate the Outer Channel without a Pilot. The Outer Channel Pilot is taken at Punta Cardon on the inward passage, and disembarked there on the outward passage, should a Pilot be so required.

Shipmaster's Report: January 1989.

Punta Cardon is no longer a pilot station. The new station is Guaranao Pilot Station. The embarkation/disembarkation zone is located between the following 4 points:

A.	Lat. 11° 40.0′ N.	Long. 70° 15.5′ W.
B.	Lat. 11° 41.5′ N.	Long. 70° 15.5′ W.
C.	Lat. 11° 41.5′ N.	Long. 70° 16.5′ W.
D.	Lat. 11° 41.0′ N.	Long. 70° 16.5′ W.

ANCHORAGE: The anchorage at Cardon roads within a radius of 2 miles from end of jetties has depths varying from 54 ft. to 100 ft. (LWS) and a bottom consisting of mud with some patches of small stones, sand and shells. There are no known obstructions from West to N.W. of the Piers and there is ample water for a clear approach when coming from West and N.W., but the anchorage is limited on the South by a sandspit projecting 1 mile S.W. off Punta Cardon Cape. A beacon is located on this Sandspit in position: Lat. 11° 36′ 03.4″ N., Long. 70° 14′ 15.6″ W. Fl.R. ev. 1 sec. 17 ft. 5 miles (U).

APPROACHES: Restricted Fishing Area. Masters when approaching coast should keep a particularly sharp lookout for fishing boats, nets and small craft.

Mechanically propelled vessels drawing more than 5 ft. are prohibited from navigating in the restricted fishing area that extends off Paraguana Peninsular from Punta Macolla, Lat. 12° 05′ 32″ N., Long. 70° 12′ 55″ W. to Punta Estanques (Los Taques), Lat. 11° 48′ 45″ N., Long. 70° 16′ 45″ W., and a line connecting the position indicated below:

(a) Lat. 11° 37′ 12″ N., Long. 70° 14′ 25″ W.
(b) Lat. 11° 37′ 30″ N., Long. 70° 19′ 23″ W.
(c) Lat. 11° 37′ 36″ N., Long. 70° 21′ 50″ W.

Leading Lines:

	Position			*Height in Metres*
Jetty	*Latitude* N.	*Longitude* W.	*Colour*	*(LWS)*
I	11° 37′ 19.2″	70° 13′ 54.6″	Green	4.70
	11° 37′ 23.1″	70° 13′ 47.6″	Green	14.20
II	11° 37′ 32.0″	70° 14′ 02.0″	Red	4.83
	11° 37′ 35.9″	70° 13′ 55.1″	Red	14.30
III	11° 37′ 08.1″	70° 13′ 53.5″	White	3.06
	11° 37′ 09.1″	70° 13′ 50.6″	White	14.94
IV	11° 37′ 41.9″	70° 14′ 12.0″	Blue	5.10
	11° 37′ 42.4″	70° 14′ 09.4″	Blue	21.54

Navigation Aids:

A light is located on the outer radio tower.

Position: Lat. 11° 38′ 03″ N., Long. 70° 13′ 56.2″ W.

Characteristics: Fl. White and Red, ev. 10 sec. Height 205 ft. (62.5 m.) 21 miles (U).

Sectors: Red 340° – 009°, White 009° – 202°, Eclipsed 189° – 340°. (All bearings are true from seaward).

2 large chimneys are very conspicuous in the Refinery Area. The North chimney is situated Lat. 11° 37′ 54.6″ N., Long. 70° 13′ 10.8″ W. Height above MLWS 399.6 ft. (121.8 m). The South chimney is situated Lat. 11° 37′ 52.9″ N., Long. 70° 13′ 09.8″ W. Height above MLWS 396.3 ft. (120.8 m.). For daylight distinguishing marks, both are painted with broad red and white bands and at night both have a string of all round fixed red lights at the top and the same at the middle height.

MAX. SIZE:

	Jetty/Berth		*Depth LWS* (ft. in.)	*Draft* (ft. in.)	*Length* (ft.)	*Displac.* (tons)
No. 1	North Outer	(3)	42 00	39 06	710	25,000
	South Outer	(4)	42 06	40 00	710	25,000
	North Inner	(1)	31 06	30 00	575	25,000
	South Inner	(2)	32 06	31 00	575	25,000
No. 2	North Outer	(3)	43 00	40 06	710	25,000
	South Outer	(4)	41 06	39 00	710	25,000
	North Inner	(1)	21 00	19 06	424	25,000
	South Inner	(2)	23 00	21 06	424	25,000
No. 3	North Outer	(3)	47 00	44 06	900	62,000
	South Outer	(4)	48 00	45 06	900	62,000
No. 4	North Outer	(3)	47 06	45 00	900	54,000
	South Outer	(4)	47 06	45 00	900	54,000

TUGS: 2 tugs of 2,700 h.p. are available, and their assistance is compulsory for berthing. Number, disposition and manoeuvres of tugboats are directed by the Pilot. The following tug signals in practice in this port are listed below for Master's guidance:

Short blasts are used to give orders to the tug situated ahead.

Long blasts are used to give orders to the tug situated aft.

1 blast means *push* tug engine, ahead (if it is stopped); *stop* tug engine, stop (if it is moving).

2 blasts, *pull* tug engine, astern.

1 long, 1 short, 1 long and 1 short whistle, "Calling tugs".

2 long and 2 short whistles, "Tugs Dismissed".

RADIO: Arrival messages (ETA). Master of vessels bound for or diverted to Cardon are requested to radio the following information to "Maraven. Caracas" via La Guaira Radio, call sign YVG, 72 hours in advance of estimated arrival, or as soon as possible.

- *(a)* Name of vessel
- *(b)* Flag
- *(c)* ETA
- *(d)* Last Port.
- *(e)* Master's name
- *(f)* Number of crew and passengers
- *(g)* Port for which the vessel is cleared
- *(h)* Quantity of clean ballast on board
- *(i)* All requirements

This information is of the utmost importance to the Harbour Authorities in facilitating the entry of vessels in general, and in case of diversion.

VHF Radio Telephony. The radio and communication centre is located in the Oil Movements Office Building situated at the foot of Pier No. 2 at a height of 50 ft. above sea level. The roof of the building is painted black and the word "Marine" painted across in large white letters.

There is an R/T set operating 24 hours a day on the following frequencies, and manned by English speaking operators:

156.6 MHz	FM	VHF	(Channel 12)	Range limit	25	miles
156.8 MHz	FM	VHF	(Channel 16)	,, ,,	25	,,
2120 kHz	AM	HF		,, ,,	150	,,
2182 kHz	AM	HF	(Channel 1)	,, ,,	150	,,
7620 kHz	(SSB)	HF	(Channel 3)	,, ,,	300	,,

Call sign: "Marine Cardon".

Vessels not equipped with radio telephone may call the installation by signal lamp (Aldis lamp) whereupon the service launch will be sent out to vessel to pick up any message it may have.

BERTHING: Without exception ships always moor head-in on all berths. It is considered prudent to have the outboard anchor hove out prior to approaching piers to facilitate speedy release while docking if necessary. Vessels are to be moored to satisfaction of the Port Services Superintendent or his deputy; mooring lines must be tended regularly and kept hove taut to prevent surging and possible damage to ships, docks or hoses. When adjusting mooring lines, the assistance of harbour tugs should be requested before slackening off any mooring line.

BALLAST: It is suggested that vessels nominated to load at this installation arrive with the minimum of ballast on board, necessary for the safe handling of the vessel under normal conditions. In this connection experience has shown that, under normal weather conditions, vessels can be safely berthed and unberthed with a quantity of ballast of approximately 25% of their respective Summer deadweights. Clean ballast can be pumped into the sea, but Masters are reminded that pollution of the sea incurs heavy fines. Dirty ballast can be received ashore. Maximum discharge pressure to shore installation is 150 p.s.i. in the 20 in. ballast line of Jetty No. 2; Jetties No. 1 and 4 have a 24 in. ballast line, and Jetty No. 3 has a 16 in. line. Masters are requested to endeavour to arrive at this port with 20% SDW ballast.

MEDICAL: Facilities are available for medical and dental treatment, vaccination and hospitalisation in a private clinic.

Emergency cases will be attended to at all times.

Masters requiring medical or dental service or vaccination for their crew members should call Ship's Services by dialling 2105. Our representative will make the necessary arrangements with the clinic and arrange for transportation to pick up the crew members on the pier and to take them to the clinic and back. Any crew member who is sent ashore for medical or dental treatment, and who does not speak English or Spanish, must be accompanied by a crew member who speaks one of these languages.

Doctors do not attend patients on board. In serious cases where the patient is unable to walk an ambulance will be provided to take him to the hospital.

FRESH WATER: Fresh water is available at all berths. Loading rate is 30 t.p.h.

FUEL: Available if advance notice given. Funds at to be remitted to Chase Manhattan Bank, One Chase Manhattan Plaza, New York, 24 hours in advance to Maraven S.A. (Account No. 001-1-992773).

REPAIRS: Shore facilities are available for emergency repairs of a minor nature. The nearest dry docks are located at Puerto Cabello and Curacao, N.A. Request for repairs should be mentioned in the ship's ETA message.

CUSTOMS: Venezuelan National Guards are stationed at the piers to ensure that vessels in port comply with regulations.

1. *Smuggling.* Strict compliance with the Customs laws of the country is enforced by the Authorities and Masters are strongly advised to caution crew members against attempting to smuggle ashore cigarettes in carton lots, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel) or other articles. A maximum of twenty cigarettes per person for personal use is allowed to be carried but a greater quantity will result in the imprisonment of the offender with possible heavy fines and delay to the vessel.

2. *Bar.* On Customs Authorities instructions vessels maintaining a "Bar Service" on board for the use of officers, crew, passengers and visitors, must keep the bar closed during the vessel's stay in port.

3. *Firearms.* Firearms on board any merchant vessel calling at Venezuelan ports must not exceed one per officer, nor can the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be declared on Stores List. Officers must not carry firearms while ship is in Venezuelan waters. Said arms should be collected together with the ammunition and held in the Master's safe custody. Crew members should be warned against taking knives or other weapons ashore as these will be confiscated and the bearer fined.

CERTIFICATES: All ships arriving in Venezuelan ports for the first time must be measured by the Maritime Authorities for issuance of a Venezuelan Tonnage Certificate, known as "Certificado de Arqueo". This document gives the measurements and weight of the vessel in accordance with existing laws. The cost of measuring and issuing of the Certificate is contingent on size and tonnage of vessel.

It is usual practice to take ashore the ship's "General Arrangement" and "Capacity" plans, which are used as a basis for calculations. These plans and the Venezuelan Tonnage Certificate are later forwarded to ship's Owners.

Vessels registered in following countries are exempt from above regulations, due to existing reciprocal agreement with Venezuela: Denmark, France, Germany (F.R.), Great Britain, Ireland, Netherlands, Norway, Portugal, Sweden, U.S.A.

The Venezuelan Tonnage Certificate is used in calculating Venezuelan Government Port charges, such as Port Captain Habilitation for entry and despatch of vessels and Pilotage Dues, for all vessels except those registered in the countries mentioned above, in which case the Lloyd's Registered Tonnage is used.

TIME: Local time is GMT minus 4 hours.

HOLIDAYS: By order of the local Port Authorities it is requested that all ships in port be fully dressed on the following national holidays: January 1st, April 19th, July 5th, July 24th, October 12th, December 25th.

TELEPHONES:

Communications Office (General and Port Information, 24 hours service), 2604. Ship's Service Office (All services to ships: mail, doctor, taxi, papers, etc., 24 hours service), 2105. Agents' Office (Weekdays) (0700 to 1200 – 1300 to 1600 hrs.), 2125. Loading Supervisor (Re cargo and bunkers), day, 0700 to 1600 hrs., 2821/2133; at night, after 1600 hrs., 2133.

SHORE LEAVE: Shore leave is permitted and Harbour Master's representative who boards vessel on arrival issues the required number of shore passes. These passes must be shown when proceeding ashore to the Government and Company Guards at the gangway and refinery gates. They are to be collected by Master prior to sailing and handed to Pilot unberthing the vessel. Masters are reminded that in accordance with the instructions of local police, crew members be properly dressed before leaving the vessel, i.e. long trousers and shirts.

Masters are requested to have shore leave expire at least 2 hours before expected departure. Men then found missing should be reported to the Ship's Services Office, Tel. 2105, who will endeavour to locate them. An officer must accompany shore personnel in order to identify the missing crew member.

Vessels are not permitted to sail until all crew members are on board, unless said crew members are hospitalised or previously signed off by the Master through the Ship's Services representative. If any crew member is missing at sailing time and cannot be found, his passport and other personal documents must be handed to the Ship's Service representative, as well as written instructions as to his repatriation, when found. All costs and expenses of a crew member so left behind will be for ship's account.

GENERAL:

1. *Animals:* The importation and transit of all birds belonging to the genus parrot or parakeet is prohibited. For other birds a valid health certificate is required. For so-called "small animals" e.g. dogs, cats, monkeys, rabbits, etc. a valid health certificate and a valid rabies vaccination certificate are required.

2. *Bonded Stores:* Stores in bond are not obtainable in Punta Cardon. The nearest port with bonded stores facilities is Curacao.

3. *Board of Trade Gangway:* A safe gangway must be provided by the vessel and should be rigged as soon as possible after mooring to allow the Port Authorities to board, and should not be taken in until Pilot has boarded to unmoor vessel. The use of rung ladders, pilot ladders, etc. is contrary to Port Regulations and Port Authorities will not board except by means of a safe gangway or accommodation ladder.

4. *Damage during Manoeuvres:* When a vessel or the pier sustains damage during manoeuvres with an official Pilot on board, it is the responsibility of the Master to submit to the Ship's Services representatives, immediately after the accident, a report in quintuplicate, for presentation to the Harbour Master. Such reports should give full details of the accident and of all engine movements as ordered by the Pilot, as well as a sketch in triplicate of the ship's manoeuvring position at the time. These will be translated by the Agents into Spanish and forwarded to the Harbour Master.

5. *Cash Advance to Masters:* Cash advances to Masters are made only in Venezuelan currency, which is the Bolivar. Cash requirements should be included in the vessel's ETA message. Foreign currencies are accepted in the United Seamen's Service Club.

6. *Rat-guards:* By order of the Port Authorities rat-guards must be fitted to all mooring lines. Non compliance entails a fine of 200 Bolivares for each unguarded line.

7. *Kerosene, Motor Gasoline, Gas-Oil, Solvents:* Supplies for ship's purposes are available in drums. The return of empty drums ashore is prohibited by Customs regulations. Therefore the cost of each drum will be billed to the vessel in the Port Disbursement Account.

8. *Lubricants, Oils and Greases:* Supplies of products are available. Vessels arriving at Punta Cardon on Saturday or Sunday or on a holiday should give ample notice of their requirements by cable in order that the necessary labour arrangements for delivery can be made. This procedure also applies to the delivery of white oils mentioned under 7 above, when required outside working days.

9. *Laundry Service:* Laundry service is available throughout each working day. Such service should be requested in the vessel's ETA message.

10. *Wireless Transmitters in Port:* It is strictly prohibited to use vessel's wireless transmitters in the Port of Cardon. Non-compliance with this regulation may result in a fine being imposed on the vessel by the authorities.

11. *Mail:* On vessels' arrival, blank Mail List Forms will be handed to the Master to be completed in sextuplicate and duly signed by him, when sending ship's and crew mail ashore for posting. Ship's mail received after ship has sailed, or for vessels on which no advice has been received, will be held for 15 days and then returned by airmail to the owners or operators or senders, at ship's expense unless specific instructions have been received beforehand.

12. *Marine Surveyors:* Both the Lloyd's Agents at Maracaibo and Norske Veritas at Caracas have a representative in Punta Cardon who acts on their behalf when a surveyor is requested. However, in the case of continuous or classification surveys, advance notice of 4 days should be given in order to arrange for an appointed surveyor to come from Caracas. There is also a representative of the American Bureau of Shipping in this area (Caracas).

13. *Miramar Club:* Masters, chief engineers and their wives can visit the Miramar Club. For this purpose entrance passes should be requested from the Ship's Services Office, tel. 2105.

14. *Manaure Bathing Beach:* The above mentioned bathing beach is open to all ship's staff and crew members.

15. *Navigation Charts:* Navigation charts are not available at this port.

16. *Passengers:* Movement of passengers over Cardon Piers is subject to restriction under terms of agreement with the government

Passengers will not be permitted to disembark unless in possession of the required Venezuelan visa and travel documents. If passengers are carried, Master should so advise in his radio ETA so that arrangements can be made for Immigration Authorities to visit vessel on arrival and thus facilitate clearance.

17. *Petroleum Inspection:* Charles Martin & Co., and E. W. Saybolt, petroleum inspectors, are available in this area. Contact can be made through the Loading Supervisor (tel. 2821).

18. *Personnel – Seamen Left Ashore:* In the case of seamen left ashore for hospitalisation, repatriation, desertion or other reasons, all documents and personal effects are to be handed to the Oil Movement Department's representative before sailing. A letter is required from the Master advising the maximum advances, if any, to be made to the seamen, and instructions concerning his repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account. It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, or Owner responsible for any seamen left behind in Venezuela.

19. *Photographing:* The taking of photographs within the boundary fence of the Cardon Refinery is prohibited. Taking cameras ashore is likewise prohibited.

20. *Provision and Stores:* Provisions and stores are available. Requisitions should be conducted through the Ship's Services Office. Telephone number 2105 or the Ship's Services representative when he calls on board with the authorities on arrival. Ships' chandlers are not permitted to visit ships, unless specifically instructed to do so by the Agents.

21. *Radar and Radio Repairs:* Repair and maintenance services for radar, radio, gyro compass, radio direction finder, echo sounder, etc. are available. The repair man should be contacted through the Ship's Services Office, telephone number 2105.

22. *Safety of Personnel:* It will be appreciated that persons intoxicated by alcoholic drinks can create risks of accidents; therefore we ask the Master's co-operation to ensure that these persons do not enter the refinery gates and/or board their vessel unless accompanied by sober members of their crew. In this connection we will advise the Master or one of his officers, so that measures can be taken to ensure the safety of the forementioned person(s) e.g. by sending one or more of the crew to the gate to accompany him (or them) to the ship.

23. *Visitors:* Visits to ships are prohibited except from those company employees, petroleum inspectors, etc., whose duties require their presence on board.

24. *Staff and Crew Changes:* No staff and/or crew should be engaged or discharged without consulting Ship's Services (telephone 2105). In case of discharge, identification documents must be handed to the Ship's Services representative or the Norwegian Consular Officer in the case of Norwegian vessels.

25. *Tank Cleaning and Mopping:* Several contractors in the area provide labour for tank cleaning and mopping. Masters in need of this service should submit their requirements to the Ship's Services Office (telephone 2105), who will contact and request a contractor to go on board to discuss details and estimate costs of work to be effected. It must be pointed out that the Master of the vessel is solely responsible for the proper fitness of the ship's tanks for loading his next cargo, and will therefore be held liable for any contamination of the cargo after loading, due to inadequate tank cleaning. Therefore it is up to him to decide the degree of tank cleaning necessary. He may, of course, seek advice from the installation representative in this respect, whenever there is any doubt.

26. *Turnaround:* To promote the economical operation of their vessel, Masters are requested to co-operate with installation representatives in minimising their in-port time. Any delays which are considered unnecessary or extensive should be reported to the loading Supervisor (tel. 2133) so that corrective measures can be taken.

AUTHORITY: Las Piedras – Guaranao Port Captaincy, P.O.Box. No. 2, Codigo Postal 4102-A, Edo. Falcon, Venezuela. *Tel:* (069) 451921. Telex: 54119. *Cables:* Capipuerto Las Piedras. *Contact:* Captain Oscar barra Lavado, Harbour Master.

Operator: Maraven, S.A., Apartado 829, Codigo Postal 1010A, Caracas, Venezuela. *Tel:* 908 2111. *Telex:* 23535, 23536. *Cables:* Maraven Caracas.

NOTES

Please also advise Shipping Guides Ltd.

Socialist Republic of Vietnam

GENERAL:

The following ports are open for international trade:

1. Campha
2. Hon Gay
3. Haiphong
4. Ben Thuy
5. Danang
6. Quy Nhon
7. Nha Trang
8. Saigon
9. Vungtau

The following small ports are also open to international trade, and information on these ports will be included in a latter edition of the Guide.

Thanh Hoa Port: Pilot Station at Lat. 19° 40.6′ N., Long. 105° 57.8′ E. Contact: Vosa Haiphong.

Vinh Thai and My Tho Ports, located on the rivershore at Tien Giang. Pilot Station at Lat. 09° 26′ 23″ N., Long. 106° 30′ 48″ E. Contact: Vosa Vung Tau or Vosa Saigon.

My Thoi and Can Tho Ports, located on the rivershore at Hau Giang. Pilot Station at Lat. 10° 20′ 40″ N., Long. 107° 03′ 00″ E. Contact: Vosa Saigon or Vosa Vung Tau.

Hon Chong Port: Pilot Station at Lat. 10° 02′ 06″ N., Long. 104° 34′ 07″ E. Contact: Vosa Saigon.

Nam Can Port: Pilot Station at Lat. 08° 42′ 08″ N., Long. 105° 17′ 08″ E. Contact: Vosa Saigon.

DOCUMENTS: (All ports).

Arrival Procedure:

(a) Arrival documents to be filled in or signed:

Clearance from Last Port.
2 copies Declaration of Arrival.
8 copies Crew Lists.
8 copies Passenger Lists.
2 copies Health Declaration.
Crew Personal Effects (individual declaration).
Passengers Personal Effects (individual declaration).
5 copies Dangerous Cargo Declaration.
5 copies Cargo Manifest.
5 copies Cargo Plan.
8 copies List of Articles Forbidden to be Used in Port.
Zoological Quarantine Declaration.
Ship's Stores Manifest.
Phyto Sanitary and Fumigation Certificates.
Veterinary Certificate.
Phyto Quarantine Certificate.
Application for Crew Members and Passengers Shore Passes (to be returned before Ship's Departure).

(b) Arrival documents to be submitted to Port Authority:

Ship Safety Construction Certificate.
Ship Nationality Certificate and Navigation Certificates.
International Load Line Certificate.
International Tonnage Certificate.
Safety Radio Telephony Certificate.
Safety Equipment Certificate.
International Certificate of Vaccination for Passengers and Crew.
Ship's Derat (or Exemption) Certificate.
Seamans Passports or Seaman's Books of Crew and Passports of Passengers.
Transit Cargo Manifest.
Zoological and Botanical Transit Cargo Manifest.
Certificates of Competency of Officers and Engineers (for all Officers onboard).
Certificates of Proficiency in Manoeuvring Lifeboats.
Foreign Currency Declaration and Invoices.
International Oil Pollution Prevention Certificate.

Departure Procedure:

2 copies Declaration of Departure.
3 copies Health Declaration.
6 copies Outward Cargo Manifest.
6 copies Crew Lists and Passenger Lists (if changes).
6 copies Personal Effects Declaration.

PILOTAGE: Pilotage is compulsory for all vessels entering or leaving Vietnamese Ports, as well as when mooring, unmooring and shifting berths in harbour.

Request for Pilots at every port by international signal code for sea pilots and on VHF Channel 16.

RADIO: All communications for ship movements through radiotelephones of Harbour Offices on VHF Channel 16.

Agents, receivers, etc. can be called through Coastal Radio Stations, this includes Vosa, who are located at every port.

Notice of Arrival: ETA message to be given 48 hours prior to ship's arrival, including particulars of vessel and cargo on board. 4 hours prior to arrival send correct time of arrival.

HEALTH: Usual international health regulations are to be observed. Any vessel, which is suspect, should inform Harbour Office and Medical Office.

Medical assistance, if required, is available, including vaccinations and inoculations, as well as dispensary and hospital treatment in all ports.

International code quarantine signals to be shown on arrival at port limits. No person, except Pilot and Port Authorities, may board or leave the ship until Free Pratique is given after port health inspection.

TIME: Local time in Vietnam is GMT plus 7 hours.

HOLIDAYS: New Year's Day (last day of December, 1st and 2nd January); Day of International Worker's Solidarity (1st May); National Day (2nd and 3rd September).

AGENCY: All foreign vessels upon arrival at Vietnamese ports are attended by the Vietnam Ocean Shipping Agency (Vosa).

There are Vosa branches at every port. Cable address of any branch is "Vosa":

Vosa Hongay, Vosa Campha, Vosa Haiphong,
Vosa Ben Thuy, Vosa Danang, Vosa Quynhon,
Vosa Nhatrang, Vosa Saigon, Vosa Vungtau.

All branches of Vosa work round the clock, including Sundays.

GENERAL: Commercial vessels may call at all ports officially declared open, if permission from Ministry of Communication and Transpor obtained at least 7 days in advance of arrival. The arrival should be re-confirmed at least 24 hours before entering territorial waters.

Emergency calls are allowed, but the Maritime Administration shoul be notified immediately.

Vessels only allowed to leave the Pilot Station when all formalities such as Free Pratique, Customs, Clearance, etc., have been performed.

Crew members and officers are not allowed to have contact with other than Pilot and Port Authorities during arrival and sailing formalities.

SEARCH AND RESCUE: Maritime Search and Rescue Committee of Vietnam is located at 80 Tran Hung Dao Street, Hanoi (Ministry of Communication and Transport).

There are Search and Rescue Centres at every port (Harbour Office). The Head Office of the Rescue and Salvage Company is located at Ho Chi Minh City, and there are branch offices at Danang and Haiphong Ports.

AUTHORITY: Ministry of Communication and Transport, 80 Tran Hung Dao Street, Hanoi, Vietnam.

Maritime Law and Inspection Section, Genmadept, 11 Vo Thi Sau Street, Haiphong, Vietnam. *Contact:* Nguyen Cong Duc, Director.

BEN THUY: 18.39 N. 105.42 E.

PORT LIMITS: The seaward boundaries of Ben Thuy Port are the Lat. 18° 50′ N. in the North, the Lat. 18° 45′ N. in the South and the Long. 105° 49′ E. in the East.

DOCUMENTS: See "General" before first port.

PILOTAGE: Compulsory for entering and leaving. Pilot Station at "Zero Buoy" (Lat. 18° 48′ N., Long. 105° 48′ E.), depth 14.0 m.

ANCHORAGE: Anchorage Area: "Zero Buoy", and discharge area at position Lat. 18° 49′ N., Long. 108° 45′ E. (N.W. of Hon Ngu Island), depth 11.0 m.

RESTRICTIONS: Maximum draft to enter 4.5 m. (15 ft.). Vessels exceeding 4.5 m. draft discharge cargo into self-propelled barges at discharge area (See "Anchorage"). Pilot boat may only arrive at "Zero Buoy" in conditions of weather with wind not exceeding Force 5. Pilot boards during daylight only.

MAX. SIZE: At berth, LOA 100 m., max. draft 4.5 m.

HEALTH: See "General" before first port.

RADIO: There is no radio contact with Ben Thuy Port. Notice of Arrival messages sent via Haiphong Radio XVG or Danang Radio XVT.

VHF: Ben Thuy Harbour Master on Channel 16 from 0800 – 1400 hrs and 1600 – 2000 hrs. local time.

TUGS: 2 tugs, 305 h.p. each available.

BERTHING: 3 small berths in Ben Thuy area for ships with draft 4.0 m.

CRANES: There are 5 mobile truck cranes, capacity 3 – 6 tons each.

BRIDGES: None.

STEVEDORES: Stevedores work 2 shifts. 0800 – 1800 hrs. and 1800 – 0600 hrs. with one meal interval between 1130 – 1230 hrs.

One gang average for day (24 hours).

Grain and Bulk Cargo: 300 tons.
General Cargo: 150 – 200 tons.

DENSITY: 1,000 at low tide.

MEDICAL: Doctors and hospital facilities available through Agent – Vosa at Ben Thuy Port.

FRESH WATER/FUEL: Fresh water and fuel oils are available at Ben Thuy.

AIRPORT: International Airport at Noi Bai, about 340 km. from the port.

REPAIRS: Can be performed on request.

SURVEYORS: Cargo Surveyors: Vina Control have branch office in Ben Thuy.

Ship Surveyors: Vires have branch office in Ben Thuy.

EMERGENCY CO-ORDINATION: S.A.R. Centre of Ben Thuy Port based at Harbour Office, call on VHF Channel 16.

SHIPMASTER'S REPORT: July 1982.

Location: 10 miles upstream from the entrance of the Song Ca River. Vessels exceeding 4.5 m. draft discharge cargo at anchor off the entrance to the river into self-propelled barges which transport the cargo to Ben Thuy.

Pilot/Anchorage: Vessels anchor in position: Lat. 18° 47′ N., Long. 105° 47′ E. 1.5 miles S.E. of Hon Niem Island in 14 m., soft grey mud and sand. Pilot and officials board at this position. After Clearance granted, vessel shifts to discharge anchorage in position Lat. 18° 49′ N. Long. 105° 45′ E., 1 mile N.W. of Hon Niem Island in 10 m. This anchorage was approached by rounding Hon Niem Island to the Eastward, not less than 0.5 miles off, there is a dangerous rock awash at LW in position Lat. 18° 50.7′ N., Long. 105° 46′ E. It is prudent to approach the port in daylight due to the large amount of unlit fishing craft in the vicinity.

Documents/Officials:

Officials boarding with Pilot on arrival:

3 Security Officers.
2 Customs Officers.
2 Immigration Officers.
2 Quarantine Inspectors.
1 Agricultural Inspector.
1 Agent.
1 Harbour Master.

To be accommodated and victualled during stay of vessel in port:

3 Security Officers.
2 Customs Officers.
1 Agent.

Agent is the only person who speaks/understands a limited amount of English.

Documents required:
6 Crew Lists.
2 Stores Lists (deck, engine and cabin).
2 Stores Lists (provisions).
1 Health Declaration.
2 Crew Customs Declaration Lists.
2 Currency Lists (foreign monies in crew's possession).
2 Bonded Stores Lists.
4 copies Cargo Manifests.
4 copies of Bills of Lading.
2 Cargo Stowage Plans.
3 Forms (supplied) for Sextants, Binoculars, Cameras, etc.
3 Forms (supplied) for Arrival details and times.
1 Form (supplied) Report concerning where water taken during the voyage, drinking and ballast in tons and tank being used at present for drinking water.

Certificates of Registry, Radio, Load Line, Safety Equipment and Derat sighted, also Clearance from last port.

All Passports/Seamen's Identity Cards collected and taken ashore, require to see each crew member and compare with Passport photo. Discharge Books were not required. All Vaccination Certificates sighted and returned. Inspection of all crew cabins and each crew member's foreign money counted at the same time.

Restrictions: Main switch for Radio Transmitter/Receiver sealed.

All Cameras sealed. Bond and beer lockers sealed. (Release of bonded stores available at any time from Customs Officers on board).

General: There is no Radio or VHF contact with Ben Thuy. ETA/Health messages, etc, via Haiphong Radio XVG to VOSA Haiphong.

No fresh water or oil fuels are available at the anchorages off Ben Thuy.

Limited quantities of fruit and vegetables are available when in season.

There are no facilities for sending or receiving mail.

Draft survey is carried out at commencement and completion of cargo, 3 surveyors attend from Hanoi, a journey of approximately 10 hours by road.

Bulk cargoes are discharged by ship's gear using shore grabs (which are in poor condition) each grab capacity approximately 1.5 tons (bulk wheat) also burlap savealls, sewn on to cargo nets are used.

Cargo loaded into self propelled barges, each carrying 40/50 tons bulk grain, approximately 20 barges are available when none are under repair, which is quite frequent, journey to discharge wharf takes 3 hours, 6 hours to discharge and 3 hours to return to the ship.

Stevedores work two shifts 0600 – 1800 hrs. and 1800 – 0600 hrs. with one meal interval between 1130 – 1230 hrs.

1 gang's average discharge per day (24 hours) 250/350 tons.

AUTHORITY: Ben Thuy Port Director and Harbour Master, Ben Thuy Harbour Office.

AGENT: See "Ho Chi Minh City".

DANANG: (Tourane): 16.04 N. 108.13 E. (See Plan)

DOCUMENTS: See "General" before first port.
PILOTAGE: Compulsory for all vessels that enter or leave port. Pilot Station at "Zero Buoy" (Lat. 16° 10′ N., Long. 108° 11′ E.), depths at Pilot Station 14.0 m.

Pilot boards from a tug during daytime only. Ships arriving at night should anchor in a position close to the Pilot Station.
ANCHORAGE: In Danang Bay (Bay of Tourane), depths up to 14 m.
RESTRICTIONS: No restrictions in the Bay and anchorage.
MAX. SIZE: Permissible LOA 190 m. Beam 26 m. and max. draft 11 m.
HEALTH: See "General" before first port.
RADIO: Danang Radio, call sign XVT, works 24 hours everyday (except 0530 – 0700 hrs., 0900 – 1230 hrs., 1630 – 2200 hrs.). Contact by telephone or telex through Vosa Danang.
VHF: Contact Pilot, Harbour Master and Vosa Danang on VHF Channel 16. Pilot and Harbour Master listen all day, and Vosa listen daytime only.
TUGS: 3 Tugs available. 1×1,250 h.p. and 2×800 h.p.
BERTHING: There are 2 areas:

Tien Sa area: 2 quays with 4 berths (one with length 182 m.), depth 9.5 m.

Song Han area: One quay 750 m. long with depths of 3.0 m. and 7.0 m.
CRANES: There is one heavy lift floating crane of 100 tons capacity and mobile truck cranes.
STEVEDORES: Ordered by Agent work continuous throughout 24 hours except for meal breaks.
BRIDGES: None.
MEDICAL: 6 hours notice required for medical assistance. There is a hospital in town.
TANKERS: Two submarine hoses of 8 in., all kinds of white spirits discharged through both lines. Maximum back pressure 8 kgs. Average discharging rate 200 tons per hour per line.
FRESH WATER: Available by barges, arrange with Agent.
FUEL: Fuel oil, diesel oil and lubricating oil available, arrange with Agent.
REPAIRS: Can be undertaken on request to Agent.
DRY DOCKS: One dry dock for vessels up to 5,000 d.w.t.
SURVEYORS: Cargo Surveyors: Vina Control.

Ship Surveyors: Vires Danang, Branch No. 4, 114 Bach Dang Street, Danang City.
AIRPORT: There is an airport about 7 km. from the city with local flights only.

Airports for international flights at Hanoi and Ho Chi Minh City.

TIME: GMT plus 7 hours.
HOLIDAYS: There are no special holidays.
POLICE/AMBULANCE/FIRE: Contact Harbour Office and Vosa Danang on VHF Channel 16.
EMERGENCY CO-ORDINATION: S.A.R. Centre of Danang Port based at Harbour Office. Contact with S.A.R. Centre on VHF Channel 16.
SERVICES: Shipchandler available at all times.
SHORE LEAVE: Permitted via local Agent.

SHIPMASTER'S REPORT: 1976.
Documents: On arrival usually dealt with immediately by the Immigration Service, Police Service, Customs Service, Agency and Health Service. Ship's Documents: Certificate of Registry, Radio Certificate, Load Line Certificate, Safety Equipment Certificate, Port Clearance from last port. Cargo Documents: Bill of Lading (8 copies), Cargo Manifest (8 copies), Stowage Plan (5 copies), In Transit Cargo Manifest (if any). Immigration: Crew List (7 copies), Stores List (2 copies), Crew's Effect Declaration (2 copies), Passports of the crew.
Health: Vaccination List (2 copies), Provisions List (2 copies), International Vaccination Certificates.

All documents to be ready on arrival. Cameras and binoculars to be collected and placed in a locker, to be sealed. Bonded stores not sealed.
Pilotage: Pilot station at a position Lat. 16° 10′ N., Long. 108° 11′ E. Pilot boards from a tugboat and moves the ship to a position about 1 mile West of Phare de l'observatoire. Pilot boarding during daytime only. Ships arriving at night should anchor in a position close to the pilot station. Pilot will board the ship at 0600 hrs. ETA should be given 48 hours and 24 hours prior to arrival at the pilot station.
Restrictions: There are no restrictions for entering the bay.
Health: A 24 hours cable should be sent to the Agent, stating that all crew are fit and healthy. If any sickness on board cable 48 hours in advance.
Radio:

Call sign	Frequency	Working hours GMT
XVT	500 kHz	0001 – 1200 hrs.
XVT 2	417.5 kHz	0001 – 1200 hrs.
XVT 2	8,570 kHz	0130 – 0145 hrs. 0830 – 0845 hrs. 1200 – 1315 hrs.

VHF: There is no VHF station.
Radar: There is no radar post.
Tugs: There are 3 tugboats available, 1×1,200 h.p., 2×800 h.p. each. Tug's lines are used if necessary.
Berthing: There is one finger pier of 250 m. and another under construction. The latter to be ready towards the end of 1976. A tanker berth is situated in position Lat. 16° 04′ N., Long. 108° 15′ E., called My Khe. Tankers proceed to this position, after clearance, with Pilot rounding by the peninsula. (See "Plan"). At the cargo pier all discharging is done by ship's gear.
Cranes: There are no cranes available. There is 1 heavy lift floating crane of 100 tons capacity.
Bulk Handling Facilities: Bulk cargoes are sometimes handled at the port (i.e. maize) but there are no special facilities.
Bridges: No bridges.
Stevedores: Ordered by the Agent. No ETA necessary. Working hours 0001 – 0400 hrs., 0800 – 2400 hrs. Approx. discharging rate general cargo 400 tons/gang.
Medical: Six hours' notice required for medical assistance. There is a hospital in town. Inoculations required for cholera and yellow fever.
Tankers: Two submarine hoses of 8 in., all kinds of white spirits discharged through both lines. Maximum back pressure 8 kg. at ship's manifold. Average discharging rate 200 t.p.h. per line.
Density: Cargo pier brackish depending on the season. At the tanker berth salt.
Fresh Water: Available by barge, rate of delivery 50 t.p.h.
Repairs: Repairs taking longer than 2 hours are not permitted unless permission is granted by the Port Master. Small repair facilities can be carried out ashore. There are no drydocks at this port.
Deck Watchmen: Cargo ships alongside the pier are provided with a gangway watch. Tankers discharging at My Khe will have two security guards on board during the stay in port.
Hatches: Old type hatches opened and closed by shore labour. Special patent hatches by crew.
Customs Allowances: The bonded stores are not sealed. There are no restrictions for quantity of spirits, cigarettes, beer, etc. It is strictly prohibited to supply any bonded stores to shore personnel.
Cargo Gear: There is 1 floating heavy lift crane of 100 tons.
Repatriation: Possible, but takes some time and can be very difficult. Haiphong is a better place for crew changes.
Airport: There is an airport about 7 km. from the town. Air services to Ho Chi Min City and Haiphong, local flights only, twice a week.
Time: GMT plus 7 hours (no Summertime) is kept along the whole coast.
Holidays: There are no special holidays.
Police/Ambulance/Fire: Via local Agent, telephone number 21161.
Services: There are laundry facilities (2 days ashore) with a 24 hour service. Shipchandler available at all times. Good fresh vegetables and fruits, depending on the season. Also good sea food.
Shore Leave: Permitted via local Agent with 6 hours' notice. Persons with invalid Passport are not allowed to go ashore.
Regulations: It is strictly prohibited to throw any garbage into the bay, heavy fines. Garbage collected by barge.
Delays: Remittance has to be granted by Owners or Charterers before sailing. Without a sufficient remittance the vessel does not receive a clearance.

Alongside the pier berthing and unberthing only between sunrise and 1400 hrs. due to strong winds in the afternoon. At any other time when strong winds are experienced berthing and unberthing not allowed. The fore mentioned also for the tanker berth at My Khe, here berthing is normally carried out during the morning hours, when there are weak winds. During a strong monsoon it is sometimes necessary to stop discharging operations and unberth the ship.

General: Ships calling for the first time at Danang port should give their ETA and call sign, nationality, all other necessary particulars so that the ship can be identified by the Navy. Ships, chartered by the Vietnamese Government should state this also and whether time or voyage charter. Ships carrying general cargo should also give all particulars about the stowage of the cargo, whether any deck cargo, heavy lifts etc.

Agent: Vietnam Ocean Shipping Agency, 1a Quang Trung, Danang. Cable: OSA Danang, telephone 21161.

SHIPMASTERS' REPORT: September 1980.

Documents: See "General".

Pilotage: Compulsory. Pilot boards in position Lat. 16° 10′ N., Long. 108° 11′ E. Notice required 24 hours. Daylight only for berthing except in cases of emergency.

Anchorage: In the Bay of Tourane; depth up to 19.0 m.

Restrictions: No restrictions in the bay and anchorage, depth of water up to 19.0 m.

Radio: Danang Radio.

VHF: Pilot on Channel 16.

Tugs: Two tugs available; 1 of 1,200 h.p., the other being used for barge work only.

Berthing: Location Lat. 16° 07.1′ N., Long. 108° 12.6′ E. Two piers available. Distance from sea to berth 4 miles. Max. size permissible: LOA 190 m., beam 26 m. and deepest draft 11 m. Least depth of water in channel from sea to berth 13.0 m. Mean tidal range at berth 0.5 m. Nature of bottom at berth – mud and sand. Average density 1016.

Cargo Handling Facilities: No bulk handling facilities or quay cranes available. There is a quarter ramp for Ro/Ro vessels and a 50 ton floating crane. Security is good as armed police are on duty throughout the vessel's stay. There is adequate storage space for break bulk and palletised cargoes. No container handling facilities. Stevedore gangs are available as required and work throughout 24 hours except for meal breaks.

Barges: There are steel barges of various sizes which are towed by tugs.

Services: The following are available: Fresh water; fresh provisions; minor repairs facilities; airport with internal flights only; laundry services; bunker fuel oil; diesel oil; lubricating oil; doctor and hospital; groceries and meats.

General:

Officials Boarding on Arrival with Pilots:

Two armed police who remain aboard during vessel's stay at anchor.

Officials Boarding when Vessel Anchored:

Agent and assistant.
1 Customs Officer.
1 Immigration Officer.
1 Agriculture Inspector.
2 Quarantine Inspectors.
2 Security Officers.

Documentation:

8 Crew Lists.
2 Stores Lists – Deck, Engine and Provisions.
2 Crew Customs Declaration Lists.
2 Currency Lists for foreign money in Crew's possession.
2 Bonded Stores Lists.
1 Health Declaration.
2 Crew Vaccination Lists.
All Vaccination Certificates.
4 copies of Bills of Lading.
7 copies of Cargo Manifest.
2 copies of Cargo Manifest – Cargo in Transit.
1 Form (Supplied) for Ship's Sextants, Binoculars, Cameras, etc.
1 Form (Supplied) for Arrival Details and Times.
All Discharge Books (Passports of Officers' wives collected for safe keeping ashore).

Restrictions:

Main and Emergency Transmitters sealed.
Stornos (Walkie Talkies) sealed.
Cameras sealed.
Bond sealed.
Inspection of all cabins on arrival.

General:

Vessel on 4 hours' notice at all times for sailing or shifting berth. Although bond sealed release of spirits available at any time from Customs.

Very strict on cigarettes with issue of only 200 per week per person. Shore passes issued to all personnel. Shore leave very restricted but bus service available to Seaman's Club nightly from 1800 – 2130 hrs. accompanied by a guard.

Maximum of 20 cigarettes per person for shore leave.

Seaman's Club takes Sterling (£5 notes and above only) and U.S. Dollars.

One sight seeing tour was to have been arranged this call but cancelled due to adverse weather conditions. (Limited number of cameras would have been available on this occasion).

Remittances from Owners take at least 1 month before any cash is made available.

One typoon warning received this call when vessel had to vacate berth and proceed to anchorage.

One emergency vacation of berth at 0300 hrs. this call when heavy swell built up alongside pier.

On departure full inspection of cabins and personnel, discharge books (passports of Officers' wives returned). Shore passes collected. No mail received this call due 1 month delivery time. No restriction on bond for coastal passage Danang to Haiphong.

AUTHORITY: Danang Harbour Office, 20 Bach Dang Street, Danang City. *Tel:* 22.652. *Contact:* Harbour Master.

AGENT: See "Ho Chi Minh City".

HAIPHONG: 20.52 N. 106.41 E.

PORT LIMITS: Seaward boundaries of Haiphong port limits within 3 miles of "Zero Buoy" (Lat. 20° 42′ 01″ N., Long. 106° 57′ 08″ E.) toward sea.

DOCUMENTS: See "General" before first port.

PILOTAGE: Pilotage is compulsory for all vessels that enter and leave ports. Pilot boat arrives at "Zero Buoy" at correct arrival time (CTA). Pilot Station on VHF Channel 16.

ANCHORAGE: To Pilot's advice.
There are 3 anchorage areas:
Ninh Tiep Anchorage Area with max. draft 7.00 m.
Bach Dang Anchorage Area with max. draft 6.0 m.
Ha Long Bay Anchorage Area with max. draft 10.0 m. at low tide.

RESTRICTIONS: Max. draft to enter 25 ft. on lower tide time. Ships have to operate lighterage at anchorage areas.

MAX. SIZE: At berths, LOA 200 m. Breadth 26 m. Draft 7.0 m.

HEALTH: See "General" before first port.

RADIO: Haiphong Radio handles vessel traffic. Call sign XVG, frequency 500 kHz and 8364 kHz.

VHF: Harbour Office on Channels 16 and 6.

TUGS: Tugs available of 500 h.p. and 600 h.p. A larger tug of 3,200 h.p. is used for rescue, salvage and towage.

BERTHING: Port central area has 12 berths available.
Berths No. 1 and 2: Ore and coal cargo.
Berths No. 3, 4, 5, 6, 7, 8: General cargo.
Berths No. 9 and 10: Grain cargo.
Berth No. 11: Refrigerated cargo and general cargo.
Doanxa Area: 2 berths for Ro/Ro and container ships.
Chua Ve Area: 2 berths for passenger ships and cargo ships.
So Dau Area: 1 pier and mooring buoy for tankers.
Vat Cach Area: 1 quay for barges.

CRANES: Port Central Area and Doanxa Area have shore cranes with capacities of 5 tons, 6 tons, 7 tons, 10 tons, 16 tons, 25 tons and max. 40 tons.

Floating cranes 60 tons to max. 200 tons available.

BRIDGES: None.

STEVEDORES: Ordered by Agent (Vosa Haiphong), 4 gangs/24 hours continuously. Loading and discharging rates stipulated by charter party.

Particular advice: See "General" – "Radio" – "Notice of Arrival".

MEDICAL: Doctors and hospital facilities available through Vosa Haiphong.

DENSITY: Low tide 1000.

FRESH WATER: Available.

FUEL: Diesel oil and fuel oil can be supplied through Vosa Haiphong.

FIRE PRECAUTIONS: Safety Regulations for tankers and other ships with dangerous cargo.

REPAIRS: Any deck and engines repairs can be performed on request.

DRY DOCKS: Available at Pha Rung Ship Repair Yard. Dry dock available for ships with max. length 150 m. and 10,000 d.w.t. There are other small shipyards at Haiphong Port.

SURVEYORS: Cargo surveyors: Vinacontrol, branch in Haiphong City. Ship surveyors: Vietnam Register of Shipping (VIRES), Branch No. 10 at Haiphong City.

CUSTOMS ALLOWANCES: No restrictions for spirits, cigarettes and beer for crews use, but strictly prohibited for commercial purposes.

REPATRIATION: To Agent's advice.

AIRPORT: Catbi Airport for local services only. Noi Bai International Airport situated about 130 km. from Haiphong Port.

TIME: GMT plus 7 hours.

POLICE/AMBULANCE/FIRE: Contact Harbour Office or Vosa on VHF Channels 16 or 6.

EMERGENCY CO-ORDINATION: S.A.R. Centre of Haiphong based at Harbour Office, contact can be made on VHF Channel 16.

SERVICES: Shipchandler available.

SHORE LEAVE: No restrictions.

SHIPMASTER'S REPORT: 1976.

Documents:

8 Crew Lists.
2 Ship's Stores Manifests.
2 Crew Personal Effects Declaration (especially: cameras, binoculars, and Foreign Currency).
2 Vaccination Lists: cholera. All International Vaccination Certificates. All Passports (are taken into custody by Security Officials).

Special Documents: Special forms which are handed to vessel on arrival.

Health Dept:

1 Declaration of Health on arrival.
1 List of Provision Store (incl. vegetables, fruits, fish, shellfish, meats etc. and where taken).
1 Report of water taken on board: (Drinking — or Ballast water, tons, ports where taken) — tank now being used to supply drinking water.

State Security Dept.:

4 Copies List of Articles forbidden to be used in port: ie. radio transmitter/receiver — Numbers and power; radar; VHF; radio direction finder; echo sounder; sextant, signal gun, signal rockets, flare signals, arms, ammunition, cameras, binoculars, tape recorders, band recorders.
Note: The radio transmitter, VHF, radar, binoculars, cameras are sealed.
2 Copies Declaration of Arrival.

Note: Cameras, binoculars of the crew have to be collected and placed in a locker which is sealed. Bond is *not* sealed, and consumption is free.

Pilot: Boards at "Zero Buoy".

Note: There is no VHF radio contact possible and there is no signal station available, ETA should be given as exact as possible.

Restrictions: Max. draft to enter: 25 ft. (HW).

If ship's draft is more than 25 ft. ship has to lighten into lighters. This is done in Baie d'Halong. The procedure is that after embarking the Pilot at "Zero Buoy", the ship is brought to this bay (in daylight hours only) via Bai de Lan Ha – Entree Profonde – Rade du Crapaud – Chenal du ota – Chenal de la Cathedrale.

In our case we anchored in Chenal de la Cathedrale; Lat. 20° 52′ N. Long. 107° 03′ 06″ E. and discharged our gas oil cargo into tanker barges varying in size from 125 – 400 long tons. Some coastal tankers (1,500 – 2,000 long tons) are also available for accepting the cargo.

When discharging into lighters ship should provide suitable hoses.

General:

1. Ship was cleared by Authorities at this anchorage. In view of the distance to Haiphong – 5 hours by motorboat – this clearance is only given in daylight hours. Often the ship's Agent stays on board during cargo operations.
2. Because the radio transmitter is sealed, no direct contact with the outside world is possible. All messages for the Agents at Haiphong should be given to the lighters going there.
3. Medical assistance: A doctor and Hospital is available in Hon Gay – on the other side of the Baie d'Halong. The doctor inspects the patient on board before permission to go ashore is given.
4. Outward clearance: Same procedure as Inward Clearance. Authorities come by motorboat from Haiphong (boat leaves there at about 0600 hrs. and arrives in Halong Bay at about 1100 hrs.). Passports are handed back to crew.
5. On inward as well as on outward clearing, crew has to stay in their cabins for inspection by Customs and security officials.

SHIPMASTER'S REPORT: April 1979.

Pilotage: Boarding position: Lat. 20° 41′ N., Long. 106° 58′ E.

The pilot boat is a 25 m. long steel vessel with white hull and superstructure. A Vietnamese flag is printed on the white funnel.

The Pilot boarded without notice, also the Agent (VOSA) did not reply to any cables requesting information. Pilotage carried out during night time only in the Winter.

Two soldiers board with the Pilot and if vessel is to anchor for lightering the Pilot and soldiers remain onboard.

Buoys: The marking of the channel by buoys is good, but for day time only. At night the lights are poor and vessels have to keep a good lookout for them.

Customs: Bond is sealed when the vessel is alongside. Very strict allowance for cigarettes.

SHIPMASTER'S REPORT: October 1980.

Documents: See "Shipmaster's Report" for Danang dated September, 1980.

Pilotage: Compulsory. Pilot boards in position Lat. 20° 41′ N., Long. 106° 58′ E. 24 hours' notice required.

Anchorage: The inner anchorage is between the outer bar and the channel cut, depth at LW 8 m.

Restrictions: It is not advisable to enter or leave during hours of darkness as there are only a limited number of lights and buoys.

Max. Size: Max. LOA 200 m., beam 26 m., draft 7.5 m. Lightening facilities are available at Baie d'Halong for vessels with draft of up to 10 m.

Health: Quarantine Authority require 24 hours' notice of arrival.

Radio: Haiphong Radio handles vessel's traffic.

Tugs: Available. 1×600 h.p., 1×500 h.p.

VHF: The Agency (Vietnam Ocean Shipping Agency – VOSA) on Channels 6 and 16. They will forward messages to the Pilot.

Berthing: Berth situated in position Lat. 20° 52′ N., Long. 106° 43′ E. The berth was built in 1976 and is down river from the town berths. In all there are 12 berths available. Our berth was 18 miles from the entrance. Max. size acceptable at the berth, LOA 200 m., beam 26 m. and deepest draft 7.4 m.

Cargo Facilities: No bulk handling facilities; no cranes at this berth but some were sighted at the town berths; no Ro-Ro facilities visible. There is a floating crane with a capacity of 60 tons (approx.). Security is good as armed guards stay aboard the vessel throughout. No container facilities of any kind sighted. Labour works around the clock in 3 shifts.

Barges: Wood and steel barges available, some have engines.

Consuls: None, nearest are in Hanoi.

Services: The following are available: Fresh water; fresh provisions (depending on time of year); minor repair facilities; airport; laundry service; diesel oil; lubricating oil; doctor and hospital; small amounts of groceries and meats.

General: Any vessel intending to remain at the port for a long period of time should have onboard sufficient stores and fresh water prior to arrival, as if vessel at anchor, stores and fresh water can take up to one week to arrive.

SHIPMASTER'S REPORT: November 1981.

Pilot Station: The Pilot boards the vessel at the anchorage which is about 2 to 3 miles S.S.E. from Zero Buoy. Pilot boat is a metal boat about 20 m. length. The funnel is painted buff with a red stripe and a yellow star.

Restrictions: There are 2 mud banks up river. One after the buoyed channel and one after the ship-canal about 1.5 miles before the berths. River draft depends on the tide which varies from 6.4 m. to 7.2 m. at HW. Haiphong port draft about 6.9 m.

Pilotage: The channel from Zero Buoy to Haiphong has buoys but no lights visible and the buoys are often out of position. The channel is very narrow having only a few centimetres' bottom clearance. Pilots are good.

Anchorage: For deeper draft than 6.9 m., ships are lightened at Halong Anchorage. Pilots, Security Officers and Customs Officer board at Zero Buoy and the vessel proceeds to the anchorage via Passe Henriette. Depths are 18 m. to 21 m. and good holding ground. The place is sheltered from all winds except North.

Documents: 1 more copy of Crew List and Money Declaration necessary than stated in "Shipmaster's Report", September 1980 for Danang.

Also see "General".

Security Police: At Halong Anchorage 2 security policemen remain on board, requesting accommodation and food.

Agency: During the vessel's lightening, Agent's clerk remains continuously on board requesting accommodation and food. Any communication with the Agency at Haiphong is done by telegram. Ship's transmitter is unsealed by Security Officer, message sent, and then resealed. Whilst alongside, Agent visits every day and they are quite efficient.

Stevedores: At Halong Anchorage, a barge with quarters for the stevedores comes alongside the vessel. Chief Stevedore is always available speaking efficient English. Discharging performed by vessel's derricks with shore grabs. Rate about 1,500 metric tons per day. At Haiphong berth discharging performed by shore cranes with a rate of about 1,800 – 2,000 metric tons per day. Haiphong Port has a berth accommodating ten large ships. There are about 25 shore cranes from 10 to 15 tons capacity and we have seen 1 floating crane of about 200 tons.

Ship Chandler: Fresh provisions are poor quality and only small quantities available. Low prices. Also ship chandler takes care of sick crew members for hospital and doctors.

Shore Leave: From Halong Anchorage crew are not allowed to go ashore. At Haiphong berth shore leave allowed from 0700 – 2300 hrs. All foreign currency, rings, watches, must be declared at the gate.

Repatriation: Agent assures Master that repatriation is very easy, however the need of formalities and permissions will take a long time.

Health: Quarantine doctor will revaccinate any crew member with expired certificate.

Communications: VOSA Agency has VHF Channel 16 and it is possible to contact them from Zero Buoy. Communication with Owners is very slow and the cable needs 2 to 3 days to reach the destination. Crew mail requires more than 40 days to reach the vessel.

Density: Halong anchorage 1020. Haiphong port 1000.

General: A lot of people visit the vessel claiming that they are Harbour Officers, Chief Stevedores, Receivers, Surveyors, Stevedores, Customs Officers, Security Officers.

Important: Stevedore's barge which is alongside the vessel at Halong Anchorage is full of rats, which come on board via ladders and other ropes, with result that the vessel becomes infested with rats.

Ships must have on board, from their previous port of call, sufficient quantity of rat poison to kill them after sailing from Vietnam.

DEVELOPMENTS: *1st Phase:* Construction of graving dock (150 m.×25 m.×6.3 m.) and 200 m. length berth with depth 6.5 m.

2nd Phase: Construction of Dry Dock (180 m.×30 m.×7 m.) and small piers length 100 m. and 150 m.

AUTHORITY: Haiphong Port Office, No. 3 Hoang Dieu Street. Harbour Master's office in port area.

AGENT: See "Ho Chi Minh City".

HO CHI MIN CITY (Saigon Port): 10.50 N. 106.45 E.

DOCUMENTS: See "General" before first port.

PILOTAGE: Compulsory for all vessels entering and leaving port. Upon arrival at Pilot Station, the pilot service should be informed by cable of the exact position of anchorage, draft and length of the vessel, and the maximum speed the ship can do in the river.

Every evening from 2000 hrs. to 2200 hrs. (local time) radio watch should be kept with Saigon XVS on the frequency of 500 kHz. The Pilot service will make contact with the Master by cable or VHF to advise the exact hour of departure from Cape St. Jacques (Vung Tau) for proceeding up the river.

The Pilot Service will not send any Pilot to ship that does not give the information as to draft, speed of vessel and exact position of ship at the anchorage station at Cape Vung Tau (Cape St.Jacques).

Pilot Station at Vung Tau: Tel. 2295, VHF Channels 6 and 16.

Pilot Station at Saigon: Tel. 90151-90152, VHF Channels 6 and 16.

Pilot boards at Vinh Dua (Golf of Coco Trees).

ANCHORAGE: Vessels anchor in approach of "Zero Buoy" (position Lat. 10° 20′ 40″ N., Long. 107° 03′ E.) with depths of about 40 ft.

RESTRICTIONS: River transits, berthing and unberthing are effected in daylight hours only. Vessels should arrive 2 hours before daylight HW. At least 1 ft. keel clearance required. Least depth in channel, 25 ft. below Chart Datum.

MAX. SIZE: Length 754 ft. Vessels can proceed with draft 31 ft., depending on daily tide.

HEALTH: See "General" before first port.

Port officials board at Vung Tau if vessels call at Vung Tau. Free Pratique will be obtained from local authorities. For vessels calling at Saigon port, port officials will board upon docking alongside at Saigon port. Free Pratique will be granted at Saigon.

RADIO: Saigon Radio, call sign XVS.

TUGS: Available up to 2,600 h.p. Tankers berth at Nhabe Oil Terminal with the assistance of 1 or 2 tugs.

BERTHING: Depth at quays 26 ft. to 36 ft.

MEDICAL: Doctors and hospital facilities available.

TANKERS: Discharge at Nhabe Oil Terminal (Ex-Caltex Terminal), narrow pier with mooring buoys, depth in berth 27 ft. Ex-Shell Terminal, "T" jetty with mooring buoys, depth in berth 40 ft. No slop disposal facilities.

DENSITY: About 1005 at berths.

FRESH WATER: Can be supplied at pier by hose for ships alongside, and by barge, but subject to advance notice of 24 hours.

FUEL: Diesel oil and fuel oil can be supplied.
REPAIRS: Any deck and engine repair can be performed on request.
DRY DOCK: Available at Bason Shipyard.
SURVEYORS: Cargo surveyors: Vinacontrol.
Ship's surveyors: Vires, Branch No. 6, 22 Nguyen Hue Sreet, Ho Chi Min City.
AIRPORT: Tan Son Nhat Airport is situated about 5 miles from the port. International services.
SERVICES: Shipchandler available at all times.
POLICE/AMBULANCE/FIRE: Contact Harbour Office or Vosa Saigon on VHF Channels 6 or 16.
EMERGENCY CO-ORDINATION: S.A.R. Centre of Saigon Port is based at Harbour Office. Contact with S.A.R. Centre can be made on VHF Channels 16 or 6.

SHIPMASTER'S REPORT: January 1989 (Updated 1990).

Approaching from South, Mui Vung Tau (ex-Cap St. Jacques) observed on radar from about 15 miles with all details.

Anchorage extends from Lat. 10° 19′ N., Northward to Buoy No. 2. If anchoring South of Lat. 10° 19′ N., vessel will be requested to come closer in order to be boarded and cleared by Authorities.

Anchorage well protected during N.E. monsoon, no swell.

Pilot boarding ground at position Lat. 10° 20.4′ N., Long. 107° 03.2′ E. However, vessels are requested to enter and anchor at Vung Tau without the pilot. Pilot Station can be contacted on VHF Channels 16 and 6.

Watch on VHF Channel 16 should be maintained from 1000 hrs. – 1200 hrs. and 1400 hrs. – 1600 hrs. (local time), usually notice is given when vessel is to leave Vung Tau for proceeding up the river.

Buoy No. 1 is in position Lat. 10° 18.7′ N., Long. 107° 03.8′ E.
Buoy No. 2 is in position Lat. 10° 22.4′ N., Long. 107° 02.7′ E.
Buoy No. 3 is in position Lat. 10° 19.5′ N., Long. 107° 04.1′ E., but is liable to drift.
Buoy No. 7 is in position Lat. 10° 20.25′ N., Long. 107° 03.8′ E.
Buoy No. 8, formerly in position Lat. 10° 21.55′ N., Long. 107° 02.05′ E., no longer exists.

No other buoys observed in this area.
All existing buoys are unlit.
Buoy No. 2 is the Northern limit of the area where pilot not required.
Lighthouses on shore reliable and working.
Distances and bearings, taken by radar, reliable.
There are numerous fishing traps, extending from, or in the vicinity of the shore, but not obstructing navigation.

Previous information concerning the maximum size and draft is still valid.

From Vung Tau Anchorage to Saigon Port, most of the river is without any marks. Inbound or outbound ships transit the river during the day time only.

Authorities from Vung Tau board the vessel on anchoring, but only North of Lat. 10° 19′ N.

There are about 5 – 6 officials, representing Immigration, Customs, Port Authorities and Port Health. In addition ship's agent and 2 port police officers board (and stay onboard for security reasons). Vessels bound for Saigon (Ho Chi Min City), if waiting at anchorage, are also cleared by Authorities and one set of documents remains on board to be handed to Authorities in Saigon by ship's agent.

Whilst at anchor and alongside in port, crew must keep sharp lookout and keep watch duties as Port Rules require.

In addition to the numerous forms given on arrival by Authorities to be filled in, following documents are required:

Clearance from Last Port.
7 copies Crew List.
1 copy Crew Personal Effects Declaration.
1 copy Ship's Stores Declaration.
1 copy Arms and Ammunition Declaration.
1 copy Medical Narcotics Declaration.
1 copy Crew Vaccination List (if expired, crew will be revaccinated).
1 copy Foreign Currency Declaration (crew and vessel's).
6 copies Cargo Manifest.
6 copies Cargo Plan.

All ship's certificates checked by Port Authorities.

Crew Passports/Seaman's Books usually taken ashore to obtain shore passes in Saigon.

Radio room sealed, if necessary to operate, permission must be obtained from Police Officer on board.

Fresh water available by barge (250 tons) at Vung Tau on advance notice of 24 hours, and by barge (250 tons), or by pier hose connection at Saigon Port.

Fresh fruit, vegetables and any kind of food can be obtained, prices low and negotiable, medium quality.

The cargo fumigation can be performed at Saigon Port.

The ship's derating can be performed at Saigon Port.

AUTHORITY: Saigon Harbour Master, No. 03 Nguyen Tat Thanh Street, Ho Chi Min City. *Contact:* Truong Van Cac, Harbour Master.

AGENT: Jardine Pacific Ltd., 4 Dong Khoi Street, 4th Floor, District 1, Ho Chi Minh City, Vietnam. Tel: 22340. Telex: 811284. FAX: 84-8-90148.

(2) HON GAY PORT

DOCUMENT: See "General" before first port.
PILOTAGE: Compulsory for all vessels.
Pilot Station: Lat. 20° 44′ 12″ N., Long. 107° 10′ 30″ E.
ANCHORAGE: In Halong Bay, depths 18 m. to 21 m. (low tide) and good holding ground. The anchorages are sheltered from all winds.
Anchor places: For LASH vessels: Lat. 20° 49′ 50″ N., Long. 107° 08′ 02″ E.
For tankers: Lat. 20° 50′ 25″ N., Long. 107° 07′ 48″ E. or Lat. 20° 50′ 50″ N., Long. 107° 07′ 35″ E.
For dangerous cargo: Lat. 20° 52′ 15″ N., Long. 107° 05′ 00″ E. or Lat. 20° 52′ 15″ N., Long. 107° 04′ 30″ E.
For discharging/loading cargo: Lat. 20° 56′ 55″ N., Long. 107° 03′ 34″ E. or as instructed by Harbour Master.
RESTRICTIONS: Vessels can proceed with draft of no more than 23 ft. or draft to Pilot's advice.
MAX. SIZE: Coal Berth: Length 130 m., draft 8.5 m.
Tanker Berth: Length 185 m., draft 10.5 m. (located at Lat. 20° 57′ 47″ N., Long. 107° 03′ 30″ E.).
Cailan Berth: Length 160 m., draft to Pilot's advice.
HEALTH: See "General" before first port.
RADIO: Contact Haiphong Radio.
VHF: Harbour Office (Pilot) of Hon Gay Port and Vosa Hon Gay (Agent) on Channel 16.
TUGS: 1×1,200 h.p., 1×305 h.p. and two small tugs.
BERTHING: Coal Berth: One pier of length 150 m.
Tanker Buoys: For tankers of 20,000 d.w.t., depth 15 m.
General Berth: One pier with length 166 m. and depth 9 m.
CRANES: Shore cranes available.
MEDICAL: Doctors and hospital facilities available through Vosa at Hon Gay.
FRESH WATER: Fresh water supplied from small barge through Vosa at Hon Gay.
FUEL: Diesel oil and fuel oil can be supplied by barge through Vosa at Hon Gay.
AIRPORT: International Airport Noi Bai, situated about 140 km. from the port.
REPAIRS: Can be performed on request.
DRY DOCKS: Available at Pharung Shipyard for 10,000 d.w.t., and Halong Shipyard for 5,000 d.w.t.
SURVEYORS: Cargo Surveyors: Vinacontrol branch.
Ship's Surveyors: Vires, Hon Gay branch.
BRIDGES: None, but tankers going into and out of mooring berth must contact Harbour Master, to get permission to pass under high voltage electric line at Hon Hay (Baichay).
EMERGENCY CO-ORDINATION: S.A.R. Centre of Hon Gay Port based at Harbour Office. Tel: 5394 or call on VHF Channel 16.
AUTHORITY: Hon Gay Harbour Office. *Tel:* 5394.

SHIP'S OFFICERS REPORT: July 1986.
Pilotage: Compulsory. Pilot will board at pilot station between 0600 hrs. and 1800 hrs. (daylight hours). Pilot will bring vessel to either Quarantine Anchorage or Inner Harbour, via Vung Ha Long Buoyed Channel, for Customs and Immigration clearance.
Pilot Station: Lat. 20° 44.2′ N., Long. 107° 10.5′ E.
Anchorages:
Quarantine Anchorage: Lat. 20° 52.2′ N., Long. 107° 06.2′ E.
Inner Harbour Anchorage: 0.8 miles S.S.W. off Hon Gay.
Restrictions: 1. Transit from Pilot Station to Quarantine Anchorage in daylight hours only.
2. Vung Ha Long Buoyed Channel dredged to 7.0 m. Draft restriction according to tides. Approximate max. draft 10.0 m.
3. Height restriction through Cua Lu to tanker berth 39.0 m. (air draft) at Chart Datum.
Radio/VHF: Hon Gay Pilot and Vosa Hon Gay (Agent) on VHF Channel 16.
Tankers: Tanker berth in position Lat. 20° 58.0′ N., Long. 107° 03.7′ E. Vessel tied up to buoys and discharged via flexible hose of 6 in. Vessel can expect delays. Average discharge rate 180 t.p.h.
Density: Between 1009 and 1017, according to tidal stream.
Agent: Vosa is sole government Agent. Agent acts as interpreter.

SHIPMASTER'S REPORT: September 1988.
Hon Gay: Radio contact direct through Haiphong (XVG) is possible for sending cables, but working hours are unreliable.

Not a single cable was acknowledged by Vosa Agent at Hon Gay. However queries were received from Vosa Haiphong via Haiphong Radio.

VHF contact after arrival was also difficult, due to frequent electricity shutdown in Hon Gay.

No draft restriction from Pilot Station (Lat. 20° 44.12′ N., Long. 107° 10.3′ E.) to Lightering Anchorage (Lat. 20°50.3′ N., Long. 107° 07.7′ E.).

The main channel to reach Hon Gay is marked by 10 unlit buoys and dredged up to 6.3 m. at low water. When crossing the channel with 9.0 m. draft and 3.3 m. of high tide, the echo sounder indicated a clearance of 2.0 m.

All movements in the channel during daytime.

The Sea Berth is just after passing the electricity high tension overhead cables. Air draft required to pass under the high tension cables with high tide of 3.3 m. was 33 m.

Mooring and unmooring during daylight hours and during slack water.

One tug available for mooring and unmooring.

Sea Berth consists of 5 buoys (3 forward and 2 aft). The hoses are rigged on the port side, we were given 2×6 in. hoses for discharging Gas Oil. The rate of discharging was 200 tonnes per line per hour. Shore capacity is around 15,000 tonnes.

Shore start/stop of cargo operations is by flag signals during daytime and by light signals during night time. During rain and blackout at night time, the signal arrangement is inadequate and unreliable.

During the stay at Sea Berth, lightering is allowed.

At all times, 3 policemen reside onboard. Accommodation and meals are to be supplied.

Fresh water is available.

Shipchandler service is minimal. Most essentials out of stock or out of season.

AGENT: See "Ho Chi Minh City".

QUY NHON: 13.46 N. 109.14 E.

DOCUMENTS: See "General" before first port. Additional copies of documents may be required.
PILOTAGE: Compulsory. Pilot boards on correct arrival time at "Zero Buoy" (Lat. 13° 44′ 19″ N., Long. 109° 15′ 16″ E.). During bad weather Harbour Master will advise by VHF the anchorage position where Pilot may board in safety.
RESTRICTIONS: Pilot boards during daylight only.
ANCHORAGE: In "Zero Buoy" area with max. depth 10.00 m. If draft exceeds 9.00 m. vessels anchor in the Southern port limits.
MAX. SIZE: LOA 140 m. Draft 7.0 m.
HEALTH: See "General" before first port.
RADIO: Contact Quy Nhon Radio, call sign XVH.
VHF: Harbour Master on watch: 0630 – 1100 hrs. and 1330 – 1700 hrs. on Channel 16.
TUGS: One tug of 800 h.p. available.
BERTHING: Two quays with length 350 m., depth 7.0 m. (low tide) available.
CRANES: 5 shore cranes with capacities 15 tons, 12 tons, 10 tons and 2 shore cranes of 8 tons available.
BRIDGES: None.
STEVEDORES: Stevedores work 3 shifts: 0600 – 1400 hrs., 1400 – 2200 hrs and 2200 – 0600 hrs.
TANKERS: One floating pier for tankers with max. draft 9.0 m. Pipes and hoses of diameter 200 mm. and 159 mm. (6 in.).
DENSITY: 1020.
FRESH WATER: Available at berth.
FUEL: Not guaranteed.
FIRE PRECAUTIONS: Tanker regulations apply and fire service available on wharf.
REPAIRS: Machine shop in port. Minor repairs possible.
DRY DOCKS: 500 tons capacity for small ship construction.
SURVEYORS: Cargo surveyors: Vinacontrol, branch office at 228 Tran Hung Dao Street, Quy Nhon City.
Ship surveyors: Vires, branch at Quy Nhon Port.
AIRPORT: Pha Chat Airport 35 km. from port. Local flights only. International flights from Tan Son Nhat Airport of Ho Chi Minh City or Noi Bai Airport of Hanoi City.
POLICE/AMBULANCE/FIRE: Contact via Harbour Office or Vosa Quy Nhon on VHF Channel 16.
EMERGENCY CO-ORDINATION: S.A.R. Centre of Quy Nhon Port based at Harbour Office. Contact S.A.R. Centre on VHF Channel 16.
AUTHORITY: Quy Nhon Harbour Office. *Tel:* 2221.

AGENT: See "Ho Chi Minh City".

VUNG TAU: 10.21 N. 107.04 E.

DOCUMENTS: See "General" before first port.
PILOTAGE: Pilotage is compulsory for all vessels that enter or leave the Port of Vung Tau.

General Pilot Station for Saigon/Vung Tau Ports and Mekong River is at "Zero Buoy" in position Lat. 10° 20′ 40″ N., Long. 107° 03′ 00″ E.
ANCHORAGE: In Vung Tau Bay, with anchorage well protected during N.E. monsoon, no swell at waiting area.
(1) All vessels waiting to enter Saigon Port must fly signal flag No. 1 at top of foremast.
(2) All vessels waiting to transit Mekong River must fly signal flag No. 2 at top of foremast.
(3) All vessels waiting to enter Saigon Port may be inspected by Vung Tau Harbour Master (if requested by Master).

HEALTH: See "General" before first port.
RADIO: Contact Saigon Radio, call sign XUS.
VHF: Contact with Pilot Station, Harbour Master and Vosa Vung Tau on Channel 16.
TUGS: Available from 1,000 h.p. – 7,000 h.p.
BERTHING: Vung Tau Port consists of three ports:
1. No wharf. Port for export of the crude oil. Pilot Station at position Lat. 9° 11′ N., Long. 107° 35′ E., for tankers with LOA 250 m., breadth 40 m., draft 15.0 m. and 80,000 d.w.t.
2. Petroleum and gas service port in position Lat. 10° 23′ 36″ N., Long. 107° 05′ 58″ E. There are 9 quays. Quay No. 6 for ships with LOA 160 m., breadth 28 m., max. draft 9.0 m. and 12,000 d.w.t. Other berths for ships less than LOA 120 m., draft 6.0 m. and 6,000 d.w.t.
3. Cat Lo Port in position Lat. 10° 24′ 48″ N., Long. 107° 08′ 00″ E. Length of quay 250 m. For ships with LOA 135 m., breadth 20 m. and 6,000 d.w.t.

CRANES: There are 3 shore cranes of 10 tons, 3 floating cranes of 300 tons and 400 tons and mobile truck cranes.
MEDICAL: Doctors and hospital facilities available through Vosa Vung Tau or Vosa Saigon.
FRESH WATER: Can be supplied by pier hose connection for berthed ships (Cat Lo Port) and by barge, generally subject to advance notice of 24 hours.
FUEL: Diesel oil and fuel oil can be supplied at Vung Tau Port.
REPAIRS: Any small deck and engine repairs can be performed on request.
SURVEYORS: Cargo Surveyors: Vinacontrol, branch at Vung Tau City.
Ship's Surveyors: Vires, branch at Vung Tau Port.
AIRPORT: International service via Tan Son Nhat Airport at Ho Chi Minh City.
SERVICES: Shipchandler available at all times.
POLICE/AMBULANCE/FIRE: Contact through Harbour Office and Vosa Vung Tau on VHF Channel 16.
EMERGENCY CO-ORDINATION: S.A.R. Centre of Vung Tau Port based at Harbour Office. Contact S.A.R. Centre on VHF Channels 16 and 6.
AUTHORITY: Vung Tau Harbour Office, No.2 Quang Trung Street, Vung Tau. *Tel:* 2270 – 2272.
AGENT: See "Ho Chi Minh City".

NOTES

Please also advise Shipping Guides Ltd.

Virgin Islands

FREDERIKSTED, St. Croix: 17.43 N. 64.53 W.

DOCUMENTS: All forms are standard U.S. Government Forms:
Passenger List (I-418) – 3 copies.
Crew List (I-418) – 3 copies.
Clearance from Last Port.
Inward Customs Manifest (1302) – 4 copies.
Ship's Stores Declaration – Customs Form 1303 – 2 copies.
Crew Effects Declaration – Customs Form 1304 – 1 copy.
Also see separate headings – "Health" – "Customs" – "Immigration").

PILOTAGE: Services available day or night. Payment for Pilot services is mandatory whether Master uses Pilot or not. (Vessels commissioned by the U.S. or foreign government, yachts and vessels under 100 gross tons are exempt from pilotage fees, except when the services of a Pilot are requested).

ANCHORAGE: Open roadstead on the lee (West) side of St. Croix, providing a good anchorage with no significant tide.

HEALTH: See "Health Regulations" before first U.S.A. Port (Albany).

Garbage should be disposed of beyond the 3-mile limit. On passing the 3-mile limit all garbage disposal units which open to the sea should be closed. All garbage should then be placed in covered cans and retained on board until the ship is again beyond the 3-mile limit.

RADIO: (a) Vessels may communicate with Island via:

Mackay Radio, Amagansett, New York	Call Letters WSL
Chatham Radio, Massachusetts	Call Letters WCC
Lantana Radio, Florida	Call Letters WOE
Barbados Radio, Barbados	Call Letters VPO
Destrellan Radio, Guadeloupe	Call Letters FFO
Fort de France Radio, Martinique	Call Letters FFP

All stations maintaining 24-hour service. These radio stations then relay the messages by cablegram to Frederiksted via either ITT World Communications Inc., Cable and Wireless or Western Union International.

(b) Master of every vessel arriving Frederiksted is required to give at least 24 hours advance notice of arrival to Captain of the Port, U.S. Coast Guard – San Juan, Puerto Rico, by wireless on 500 kHz or by radio telephone 2182 kHz. Call Letters for U.S. Coast Guard, San Juan, Puerto Rico – NMR.

(c) Masters are requested to advise Agent their expected time of arrival as far in advance as is possible, vessels arriving from ports other than U.S. or Caribbean Islands should give at least 7 days' notice, and vessels arriving from U.S. ports should give at least 4 days' notice. In addition, a message should be sent verifying arrival at least 48 hours in advance, with delays reported as necessary. Arrival messages should include information regarding repairs, stores, number of crew and passengers on board. If cash is required, a minimum of 7 days' (prior to date of arrival) notice is mandatory.

(d) While vessels are in Frederiksted the Authorities do not permit the use of the ship's radio transmitters.

(e) Vessels equipped with VHF equipment should commence radio watch on Channel 16 when vessel is 100 miles from St. Croix. Contact with Agents and shore facilities can be made direct or via Virgin Islands Marine Operator – Station WAH – Call Letters WAH.

(f) Masters of vessels arriving at Frederiksted Pier are required to contact V.I. Port Authority through their Agent or by Fax No. (809) 778 1033, 24 hours in advance of arrival.

VHF: Port Authority on Channel 16.

TUGS: None readily available – tugs can be arranged with 48 hours advance notice.

BERTHING: A government-owned pier with a 1,400 ft. long approachway, bridging Maritime Zone to a pier-head 240 ft. long by 60 ft. wide. Vessels 600 ft. and over with a max. forward draft of 25 ft. have been accommodated.

FRESH WATER: Available at dock, arranged by Agent.

SHORE GANGWAYS: Available.

LAUNCHES/TENDERS: Not available.

CUSTOMS: Customs Officers will board at anchorage or wharf berths, and will require an accommodation ladder.

Vessels required to enter and clear through Customs House:
Vessels loading or unloading cargo;
Vessels embarking or disembarking passengers;
Vessels remaining in port over 24 hours;
Vessels requesting permission for their passengers to go ashore during the stay of the vessel in port.

Vessels in above categories must present following documents:
Clearance from Last Port;
3 copies of Crew List (Form I-418) or substantially similar form – see note*
3 copies Passenger List (Form I-418) or substantially similar form – see note*
4 copies Inward Foreign Manifest covering all cargo for discharge at St. Croix, V.I., showing weights or measurements (of basis of how cargo is freighted) on all items (Customs Form 1302).
2 copies Stores List (Engine-Deck-Commissary-Narcotics).
1 copy Crew Effects Declaration (Custom's Form 1304).

*List of passengers and crew shall be on Customs and Immigration Form I-418 or on a substantially similar form, except that where no steerage passengers are aboard upon arrival, the listing of the passengers may be in the form of a vessel "Souvenir List" or similar list, in which the names of the passengers are listed alphabetically by class.

Sealing of Stores: Upon arrival of a vessel from a foreign port, or a vessel engaged in foreign trade from a domestic port, sea stores and ship's stores not required for immediate use of consumption on board while vessel is in port and articles acquired abroad by officers and members of crew, for which no permit to land has been issued, shall be placed under seal, unless Customs Officer is of the opinion that circumstances do not require such action. Customs Inspectors in charge of vessel, from time to time, may issue stores from under seal for consumption on board by passengers and crew.

Passengers disembarking must present personal baggage declaration if from foreign.

IMMIGRATION: Recommended that Masters who are unfamiliar with U.S. Immigration Procedure should seek clarification from Agents as far in advance as is possible.

If a vessel arrives direct from a United States mainland port or from Puerto Rico no Immigration inspection will be performed. If a vessel arrives direct from a foreign port the vessel shall undergo Immigration inspection.

Vessels arriving without a visaed Crew List, may be able to obtain a waiver from Officer in Charge of U.S. Immigration & Naturalisation Service, by making application on Form I-193. A fee of $10.00 is required to obtain a waiver.

In order to expedite the clearing of the vessel, it is suggested that prior to arrival all passengers subject to inspection should be assembled where the inspection is to be performed.

Stowaways must be reported in ETA Message and listed on a Passenger Manifest (Form I-418) and on Form I-94, and must be reported to the U.S. Immigration Officer as soon as he boards.

All non-resident alien crew members, whether shore leave is required or not, are required to have in their possession valid Passports, Seamen's Book or Identification Card (with photo) and Form I-95 (crewman's Landing Permit) or Form I-184 (Alien Crewman's Permit and Identification Card) on arrival. All resident alien crew members are required to have in their possession Alien Registration Receipt Card (Form I-151) on arrival.

AIRPORT: Distant 8.5 miles.

TIME: GMT minus 4 hours. Atlantic Standard Time.

HOLIDAYS: The following are legal holidays: Sundays; January 1st (New Year's Day); The third Monday in February (President's Day); March 31st (Transfer Day); Holy Thursday; Good Friday; Easter Monday; Whit Monday; Last Monday in May (Memorial Day); June 22nd (Organic Act Day); July 4th (Independence Day); July 3rd (Emancipation Day); Last Monday in July (Supplication Day); The first Monday in September (Labour Day); The second Monday in October (Columbus Day); The fourth Monday in October (Veterans' Day); The fourth Thursday in November (Thanksgiving Day); December 25th (Christmas Day); December 26th (Christmas Second Day), and such other days as the President or the Government may by proclamation declare as holidays. The port remains open on holidays.

REGULATIONS: The U.S. Coast Guard strictly enforces the Harbour Pollution Act of 1924, prohibiting discharge of refuse and oil in navigable waters of the U.S. Virgin Islands. Local Port Regulations are similar to those applying in U.S. Mainland Ports.

AUTHORITY: Virgin Islands Port Authority, Marine Division, P.O.Box 1134, Christiansted, St. Croix, Virgin Islands, U.S.A. 00820. *Tel:* (809) 778-3131 (St. Croix). *FAX:* (809) 778-1033. *Contact:* Larry Finch, Marine Manager.

LIMETREE BAY, St. Croix: 17.41 N. 64.44 W.

(See Plan)

LOCATION: The facilities of Hess Oil Virgin Islands Corp. (HOVIC) are located in Limetree Bay on the South coast of the island of St. Croix, U.S. Virgin Islands. St. Croix is 32 miles South of St. Thomas and St. John Islands and 50 miles S.E. of the island of Puerto Rico. It is the largest of the U.S. Virgin Islands being 27 miles long and averages 5 miles in width.

The Sea Buoy "No. 2" marking the entrance to Limetree Bay Channel is located in 80 ft. of water on the East side of the channel at Lat.17° 40′ 27″ N., Long. 64° 44′ 18″ W. The Sea Buoy is painted red and is equipped with a quick flashing red light with a visibility of 5 miles.

On approaching the Sea Buoy, Mariners are advised to stay to the South of the 100 fathom curve to avoid fish traps and shoal areas which have not been completely surveyed.

A vessel is considered to be "Arrived" when it is on the Pilot Station, that is South of the Sea Buoy (see "Pilotage").

Charts: Virgin Islands (including Saint Croix) U.S.C. & G.S. Chart No. 905, U.S. Naval Oceanographic Office Chart No. 25246, and British Admiralty Chart No. 485.

DOCUMENTS: Vessels arriving are to have the following documentation:
Last Port Clearance.
Master's Oath (Form 1300) – 1 copy for entry, 1 copy for clearance.
Crew Lists (Form I-418) – 4 copies.
Cargo Declaration (Form 1302) – 2 copies for clearance.
Ship's Stores/Provisions List (Form 1303).
Crew Personal Effects List (Form 1304).
General Declaration (Form 1301) – 1 copy for entry and 2 copies for clearance.

Vessels calling to discharge cargo or having cargo in-transit onboard should advise the Agent of their cargo figures in barrels and long tons and load port and discharge port of each grade in order to prepare the necessary documentation.

PILOTAGE: Service is available 24 hours a day. All vessels entering Limetree Bay must comply with the Navigation Safety Regulations per 33 CFR, Part 164 and an entry denoting this should be made in the vessel's logbook. A HOVIC Pilot is mandatory for all vessels entering, shifting, or leaving the facilities at Limetree Bay. Pilots will assist the Master in the docking and undocking of the vessel; however, the Master of each vessel retains *full* responsibility for the vessel at all times.

The Pilot can be contacted by VHF Channel 11.

Pilot boarding area is 2.5 miles South of the Sea Buoy for vessels up to 125,000 d.w.t. and 3 miles South of the Sea Buoy for vessels over 125,000 d.w.t. Vessels over 100,000 d.w.t. are restricted to daylight dockings. Vessels are to remain in the Pilot boarding area until boarded by the Pilot, unless otherwise instructed. The Pilot will be placed aboard by a Company tug.

Masters shall contact the HOVIC Marine Port Captain on VHF Channel 11, 3 hours and 1 hour prior to arrival at the Pilot Station in order to avoid docking delays.

ANCHORAGE: There is no suitable anchorage for deep draft vessels off the port. Normal practice is to stop engines and wait 6 to 8 miles South of the Sea Buoy if required, when awaiting berthing instructions. In bad weather it is possible to proceed to Fredericksted on the West end of the island and anchor in 30 ft. to 60 ft. of water. Vessels shall have their anchors ready to let go upon entering the channel into Limetree Bay.

APPROACHES: The harbour entrance is marked by a red Sea Buoy "No. 2" equipped with a red quick flashing light with a 5 mile visibility. The channel is 500 ft. in width and 60 ft. in depth at Mean Low Water (MLW). This depth extends into the VLCC Berths No.3 and No. 4. Docks No. 5 and No. 6 have 50 ft. at the face. Docks No. 1, No. 2, No. 8 and No. 9 have 45 ft. at the face of MLW. Dry Cargo Berth has a draft restriction of 34 ft. without fenders and 38 ft. 06 in. with fenders. Draft restriction for Berths No. 3 and No. 4 is 55 ft., for Berths No. 5 and No. 6 is 47 ft. 06 in., and for Berths No.1, No. 2, No. 8 and No. 9 is 42 ft. 06 in. Berth No. 7 is currently out of service. The turning basin opens up Eastward from the channel line and is approximately 1,200 ft. long and 1,000 ft. wide. The West Turning Basin is 1,500 ft. × 1,200 ft. A breakwater extends out from the head of the East Basin to the coral reef which forms the Southern harbour limit.

RESTRICTIONS: Navigation is permitted 24 hours a day, except for vessels over 100,000 d.w.t. Vessels over 100,000 d.w.t. are handled on a daylight basis inbound only. The Port Captain will check and report on each vessel's draft before a Pilot is dispatched.

Ballast draft restrictions are as follows:

Vessel d.w.t.	*Forward* (ft.)	*Aft* (ft.)
Under 30,000	10	16
30,000 – 50,000	12	18
50,000 – 70,000	15	21
70,000 – 100,000	18	24
100,000 – 150,000	28	32
150,000 – 200,000	32	36
Over 200,000	40	40

MAX. SIZE: At Mean Low Water (Salt).

Berth No.	*LOA* (ft.)	*Draft* (ft.)	*Beam* (ft.)	*D.W.T.*
*DC	650	34.0	Unlimited	45,000
		38.5	With fenders	
1	900	42.5	Unlimited	80,000
2	900	42.5	"	80,000
3	1,200	55.0	"	300,000
4	1,200	55.0	"	300,000
5	900	47.5	"	100,000
6	900	47.5	"	100,000
**7	500	40.0	"	35,000
8	900	42.5	"	100,000
9	900	42.5	"	100,000

*Dry Cargo.

**Currently not in Service.

HEALTH: Pratique is granted after the vessel has met on-board inspection regulations of the U.S. Customs Service, Immigration Service and Department of Agriculture. Deratisation Certificates should be valid and can be renewed with advance notice to the vessel's Agent. If there is an illness on board of a suspicious nature, it must be reported together with the symptoms prior to arrival. All trash and refuse kept in drums on deck must be in closed plastic trash bags and the drums must have securely attached lids. No plastic bags laid upon the deck nor open containers on and/or below decks will be acceptable. No garbage collection or disposal service is allowed or available. No trash or refuse will be allowed to be deposited in the harbour. Failure to comply with any of the aforementioned items results in immediate and large fines.

TUGS: Tug assistance in the harbour limits for docking, shifting or undocking is mandatory and is provided by 3 × 3,000 h.p. diesel tugs and 2 × 7,200 h.p. diesel tugs that are stationed in the port to provide this service. All tugs are under the orders of the HOVIC Pilot or the HOVIC Port Captain and are equipped with fire pumps and monitors to assist in fire fighting. Tug lines are used.

RADAR: No Port Radar Service or Vessel Traffic Management System exists in the port.

RADIO: Masters must advise HOVIC-MARINE St. Croix (Call Sign KFL-984) and their agents by radio or telex 72 hours, 48 hours and 24 hours in advance of their ETA, giving the vessel's name, date and hour of arrival (Local time) and the name of their last port of call, otherwise delays may result in berthing the vessel. In addition a radio call on VHF Channel 11 to HOVIC MARINE (KFL-984) 3 hours and 1 hour prior to arrival is required. A vessel will be considered as "Arrived" when it reaches the Pilot Station 2.5 miles to 3 miles South of the Sea Buoy.

Telex communication with vessels so equipped is possible by telexing HOVIC MARINE, Telex No. 3473013.

VHF: VHF radio communications in the harbour facilities are as follows.

HOVIC Port Captain – Channel 11.

HOVIC Pilots – Calling Channel 11 and working Channel 65.

Agency – Channels 10 and 11.

For Ship to Shore calls at Sea, Virgin Islands Radio has Marine Operators available and can be contacted on Channel 16.

BERTHING:

HOVIC Terminal (Hess): A shore gangway is provided. For berth limitations due to size see "Maximum Size". All berths are for the handling of petroleum products with the exception of Dry Cargo (DC) Berth which has in addition the capability of loading sulphur pellets in bulk. There are no other facilities for handling any other cargoes beside petroleum at the HOVIC Terminal. No shore steam/power is available.

Port Alucroix: Situated to the West of the HOVIC Terminal. The port is entered via the Krause Lagoon Channel with a controlling depth of 35 ft. at Mean Low Water and a width of 300 ft. At the head of the Lagoon is the Martin Marietta Alumina Terminal which is currently idle. Pilot boards approximately 2.5 miles South of the Krause Lagoon Channel Sea Buoys.

Container Port: Situated close to the West of the HOVIC Terminal. The port is entered via the Krause Lagoon Channel (300 ft. wide and 35 ft. depth) and the Container Port Cross Channel (400 ft. wide and 35 ft. depth). Length of the pier is 1,200 ft. with 35 ft. depth. 1 × 30 ton Paceco container crane is available with a telescopic spreader to handle 20 ft., 35 ft. and 40 ft. containers. Also a berth at the head of the pier can handle Ro/Ro cargoes.

BALLAST: United States laws prohibit the pumping overboard of dirty ballast while a vessel is within U.S. coastal waters. All ballast must be pumped to facilities available ashore. However, if a vessel is especially equipped with clean segregated systems which are reserved for ballast use only, it is permissible to pump the segregated ballast overboard at the dock after first being inspected and approved by the Port Captain.

In pumping dirty ballast ashore, it is received into 2×10 in. hoses connected to 1×16 in. line into another 1×36 in. shore line at a max. discharge pressure of about 100 p.s.i. on the dock. The ballast is pumped into a ballast facility about 1 mile North of the dock. Due to the limited facilities and the possibility of more than one vessel deballasting at a time, it is requested that vessel arrive with a minimum amount of ballast consistent with Pilot's ballast draft restrictions, and include the amount to be discharged on their ETA advices to their Agents.

The U.S. Oil Pollution Act of 1924 applies to the Pollution of Coastal Waters. Violators are subject to fines and possible imprisonment.

NOTICE OF READINESS: Notice of Readiness to load or discharge is a warranty that the vessel is in all respects ready to load or discharge and that all of the ship's equipment, including, but not limited to, tanks, pumps, valves and pipelines, are ready and fit to load or discharge petroleum or petrochemical products. Notice of Readiness will not be accepted unless the vessel is in all respects ready to load or discharge as appropriate. Vessel will not be deemed ready to load or discharge and pumping will not commence until the Senior Deck Officer shall have executed and delivered to HOVIC a "Declaration of Inspection Prior to Bulk Cargo Transfer" as required by U.S. Coast Guard Regulations.

LOADING: The Petroleum docks are serviced by the following shore lines: 1×42 in. crude line, 1×36 in. crude line, 1×36 in. No. 6 oil line, 1×36 in. ballast line, 1×30 in. VGO (Catfeed) line, 1×24 in. No. 6 oil line, 1×24 in. VGO (Catfeed) line, 2×20 in. gasoline lines, 1×20 in. Jet Kerosene line, 1×16 in. gasoline line, 1×12 in. line for each of the following: Paraxylene, Xylenes, Benzene and Toluene, 1×8 in. Caustic Soda line and bunker lines of 1×18 in., 1×12 in. and 1×8 in. All hose connections are 10 in. diameter, there are 4×16 in. loading/discharge arms at Berths No. 3 and No. 4 for crude oil, 2×16 in. arms for No. 6 oil/crude at Berth No. 6, and 2×16 in. arms for VGO (Catfeed)/Crude at Berths No. 8 and No. 9. Chemical grades are handled via 1×10 in. hose with Caustic Soda handled by 1×6 in. and balance grades via 2×10 in. hoses. Facilities are available to handle dirty slops/tank washings.

BRIDGES: There are no bridges that affect harbour movements.

MEDICAL: Medical requirements are arranged through the vessel's Agent. Hospital and dental facilities are available; however, the vessel's Agent should be advised of any medical requirements prior to arrival. Standard United States health requirements apply. Inoculations and vaccinations are available.

DENSITY: 1025.

FIRE PRECAUTIONS: Standard fire precautions for tanker safety apply including but not limited to: Smoking is prohibited on the weather decks of tank vessels, on docks, and in the general dock vicinity. All doors and portholes from the quarters facing outside must be kept closed while transferring cargo at the dock. No portable cables connected to an electrical source shall be used while transferring cargo or ballast. When illumination is needed, approved explosion-proof lights are to be used. Boiler cleaning, tank cleaning, gas freeing, welding, burning or hot work is not allowed at the dock. Tank mopping is permitted on an individual basis. Vessel's main engines should not be out of service while the vessel is in port. It is not permitted to shut down both main boilers of a steam vessel or pull the cylinder heads from the main engine of a motor vessel. In the event a stack or engine exhaust emits live sparks the transfer of cargo must be stopped. The main radio transmitter is not to be used while transferring cargo or ballast. The transfer of cargo and ballast must be stopped during electrical storms, or when lightening appears in close vicinity. A fire towing wire should be led out forward and aft on the offshore side of the vessel and lowered to the water's edge, made fast to the deck and tended to maintain them at the water's edge. In the event of fire on the vessel, dock or waterfront area, the transfer of cargo will be suspended and the vessel made ready for immediate departure if the danger is imminent. Furthermore, should an emergency or accident occur, vessel and terminal personnel must take immediate action in order to protect life and property. Contact the HOVIC Port Captain on VHF Channel 11 and the terminal dockwatch to inform them of the nature of the emergency.

FRESH WATER: The Island of St. Croix is dependent almost entirely on rainfall for its supply of fresh water. There are wells but many of them are rather saline in nature. As a result fresh water is scarce and expensive. In conjunction with its refinery operation HOVIC operates a desalination plant and limited quantities of fresh water are available providing at least 48 hours' notice of these requirements is given prior to the ship's arrival. All fresh water is metered aboard ship. Costs are as follows: 1st 50 tons = U.S.$5.00 per ton, between 50 tons and 100 tons = U.S.$10.00 per ton, and over 100 tons = U.S.$15.00 per ton.

FUEL: No. 6 fuel oil (Bunker C), 1500 Redwood, 3500 Redwood and light marine diesel are available by prior arrangement and with 72 hours' notice. Credit must be cleared by Amerada Hess Corporation in Woodbridge, New Jersey, USA. Advice concerning quantities and quality of fuel desired should be given in the ETA advices sent to the vessel's Agent.

CONSULS: Denmark and Netherlands.

REPAIRS: In general no repair work is authorised, except for emergencies while the vessel is at the dock.

DRY DOCKS: No dry docks are available in the port.

SURVEYORS: Cargo Inspectors are available at Limetree Bay as follows: SGS Inspectorate, Chas. Martin and Caleb Brett. E. W. Saybolt is available from San Juan, Puerto Rico.

Representatives of the American Bureau of Shipping, Lloyd's Register and other maritime classification societies are available from San Juan, Puerto Rico on 24 hours' notice. The ship's Agent will assist the Master in soliciting their services.

GANGWAY/DECK WATCHMEN: Vessel to provide personnel at manifold and gangway.

CUSTOMS ALLOWANCES: Crew members are permitted to hold out of bond 1,500 cigarettes and 1 litre of alcohol per crew member.

REPATRIATION: Facilities exist for effecting Crew changes and arranging repatriation.

AIRPORT: HOVIC Terminal at Limetree Bay is located 15 minutes via highway from the airport. Daily flights direct to Miami, Fla., New York, N.Y., Newark, N.J. and numerous flights to San Juan, Puerto Rico with worldwide connections are available.

TIME: The U.S. Virgin Islands use Atlantic Standard Time (A.S.T.) which is Greenwich Mean Time minus 4 hours.

HOLIDAYS: The refinery and terminal operates 24 hours per day all year round.

POLICE/AMBULANCE/FIRE: The refinery and terminal have their own ambulance and fire department. Contact the HOVIC Port Captain on VHF Channel 11. Local police may be contacted via the Agent.

TELEPHONES: No arrangements are available for placing telephones aboard ship.

SERVICES: Following services are available: Radio/Radar repair, Ship Chandler, Liferaft Service/repacking, ship classification societies surveyors (from San Juan, P.R.), and charts, publications or Notice to Mariners in very limited supply.

BANKS:

The Bank of Nova Scotia, Christiansted (809-773-1013).
Banco Popular, Christiansted (809-773-0077).
Chase Manhattan Bank, Christiansted (809-773-1200).
First Pennsylvania Bank NA, Christiansted (809-773-0440).

STORING: Vessels can only be stored by truck delivery to the pier. Trucks may approach the vessel no closer than 150 ft., where goods are pushed/pulled alongside using vendor's wheeled carts. A shore crane is capable of lifting light weights to the vessel from the apron. Forklifts are not allowed on the dock. Local riggers are available for assistance provided a minimum of 24 hours' notice is given to the Agent.

SHORE LEAVE: Crew members are granted shore leave consistent with standard U.S.A. requirements and procedures. Crew members desiring shore leave are not permitted to walk through the refinery. Bicycles are not permitted either. Taxi cabs are available as required for transportation through the refinery and to Christiansted and Frederiksted. Crew members should await pickup at the dock approach or walk to the taxi stand located alongside the Marine/Terminal building at the head of the docks.

IDENTIFICATION CARDS: Agency representative will supply Master with Refinery Gate Passes.

TIDES AND CURRENTS: The tides are small and diurnal, the mean range being about 0.5 ft. and the diurnal range less than 1 ft. depending upon wind and weather conditions. Normally there is a drift of 0.5 knots to 1.0 knots moving along the South shore of the island in a Westerly direction. H.O. Sailing Directions and U.S. Coast Pilots No. 5 can provide additional details.

REGULATIONS: Vessel will be held responsible for the cost of labour and material required to clean up any oil spill caused by the vessel in Limetree Bay. Slick booms are available to isolate spills and contingency plans are in force for oil spills. The U.S. Coast Guard will be notified of any oil spills, no matter how minor, also vessel's cargo transfer operations will be suspended pending U.S. Coast Guard investigation.

AIR POLLUTION: It is unlawful to permit emission of smoke darker than No. 2 on the Ringlemann Scale. Violation of this law in Limetree Bay may result in fines to the vessel from local authorities.

SWIMMING: Swimming in the Harbour is not permitted as sharks and barracudas frequent the area.

COMMUNICATIONS:

Communication with U.S. Navy at Frederiksted: Arriving at or departing from Limetree Bay, all vessels passing the Western end of St. Croix are to monitor VHF Channel 16 for radio traffic from the U.S. Navy Weapons Tracking Station at Frederiksted. Vessels may be requested to alter course to avoid interrupting naval activities that are being conducted with aircraft, ships and submarines.

DELAYS: Due to the multiple capabilities of the harbour, infrequent delays are encountered in the transfer of petroleum or petrochemical products.

DEVELOPMENTS: Currently there are no planned revisions to the harbour.

GENERAL:

Liquors: The transportation of alcoholic beverages inside HOVIC's property is strictly prohibited; consequently, no liquor or beer may be removed from vessels, the only exception to the foregoing is in the case of bonded stores ordered by the Master.

Visitors: No visitors are permitted in the dock area. Only persons on official ship's business are permitted on the piers.

Laundry: Only limited facilities are available to handle ship's laundry.

Mail: Official and personal mail will be delivered on board by the ship's Agent when vessels are being cleared inwards. Mail received for vessels while in port will be delivered on board prior to sailing. Outgoing mail is accepted from Master, provided it is accompanied by a mail transmittal slip to support disbursements.

Supplies and Repairs: Limited supplies of provisions and marine hardware are available on the island. There are no facilities for major repairs closer than San Juan, Puerto Rico. Machine shops in Christiansted and Frederiksted can assist in making minor repairs.

Overloading: Masters are advised that the international laws are strictly enforced with regard to overloading and should be guided accordingly. In cases where overloaded cargo has to be discharged, all expenses incurred, including ship delay, will be for the vessel's account.

Weather Conditions: The loading and discharging of all crude petroleum and its products will be stopped during any electrical storm. Ullage screens or ullage plugs must be in place. Loading of gasoline or other similar low flash products will be stopped during periods of calm when the heavy vapours cannot be dispersed quickly enough to prevent hazards from accumulated gas pockets. Ship's Officers are cautioned to be on their guard during such conditions. In the event of abnormal weather conditions in the area, such as a hurricane, vessels will be notified that additional moorings are required. If the situation so demands, Masters will be told to suspend all operations and proceed to sea until normal weather conditions return.

Demurrage: Vessels are required to vacate the berth promptly upon completion of cargo handling operations. Permission to lay alongside at any time the vessel is not engaged in cargo handling operations must be granted in writing by the Marine Manager. The Port Captain will keep vessels advised of other vessels awaiting berth. If any vessel fails to vacate its berth upon completion of cargo handling operations and expiration of free laytime for dock usage as outlined below, the vessel will be responsible for penalties and demurrage as follows:

(1) To pay dock demurrage at the rate of U.S.$1,000 per hour or a pro-rata share thereof for a fraction of an hour.
(2) To hold HOVIC harmless for any demurrage and consequential damages incurred as a result of any other vessels suffering berthing delays or for any other events resulting from the vessel's failure to properly vacate the berth.

The following rules shall govern the determination of demurrage:

(1) 1 hour of free laytime will be allowed after completion of cargo loading operations. This free time will start at the time cargo hoses are disconnected from the ship's manifold on completion of cargo transfer operations.

Vessels awaiting cargo papers and/or Customs Clearance must vacate the berth within the 1 hour period and move outside to await their papers.

(2) 6 hours free Laytime will be allowed for ballasting after discharge operations are completed.
(3) Ballasting times for VLCC's will be handled on an individual basis for each ship.
(4) Delays caused by the terminal are excepted.

AUTHORITY: Hess Oil Virgin Islands Corporation (HOVIC), P.O.Box 127, Kingshill, St. Croix, U.S. Virgin Islands 00850. *Tel:* 809-778-4000. *Telex:* 3473013. *Contact:* Andrew B. Koski, Port Captain. John H. Frederick, Marine Manager.

Virgin Islands Port Authority, P.O.Box 1707, St. Thomas, Virgin Islands, U.S.A. 00801. *Tel:* (809) 774-2250 (St. Thomas), (809) 778-1180 (St. Croix).

ROAD HARBOUR & PORT PURCELL, Tortola, British Virgin Islands: 18.25 N. 64.37 W.

PORT LIMITS: All the area of water North of an imaginary line drawn from Burt Point to Hog Point (see B.A. Chart 2020).

DOCUMENTS:

Clearance from last port.
1 Declaration of Health Certificate.
4 Crew Lists.
2 Crew Store Lists.
2 Ship's Stores Lists.
2 Passenger Lists.

PILOTAGE: Only compulsory for vessels of 200 g.r.t. and over, unless a vessel is in possession of a valid Exemption Certificate issued by the Ports Manager. Pilot boards at Port limits after receiving advice from Agents preferably 12 hours prior to arrival. Link calls made through Tortola Radio, Channel 27 in daytime and Channel 16 at night.

Vessels arriving ahead of ETA sound "G" on whistle if unable to advise Agent.

No inward pilotage at night, unless emergency, night Pilotage outwards by special arrangement.

ANCHORAGES: Between Buck Island and Beef Island or immediately South of Port limits, approximately 12 fathoms.

RESTRICTIONS: Anchorage within Port limits prohibited unless authorised by Ports Manager. Max. draft alongside Port Purcell 21 ft.

HEALTH: Customs issue Pratique for vessels with clear bill of health, otherwise request doctor to board on arrival alongside or at anchor.

RADIO: Call sign "Port Purcell" – can be reached by VHF Channel 16. Cable and Wireless maintain a Public Coast Station on Tortola, call sign "Tortola Radio", with an approximate range of 50 miles and provides linked telephone calls between ships and any shore based telephone subscriber. From 0700 hrs. – 1900 hrs. watch is kept on Channel 16, at night for emergencies only.

For distances in excess of 50 miles any other convenient shore station, (eg. Barbados, St. Thomas) that will accept messages for onward cabling or telephoning to Tortola.

TUGS: None available.

BERTHING: Port Purcell quay is 800 ft. long, max. draft 21 ft. at any state of tide, salt water. Ships discharge with own gear.

CRANES: Port Purcell has 1 mobile shore crane, max. lift 8 tons. Prior advice required for use.

MEDICAL: Hospital facilities available, no routine inoculations, etc., required unless specially notified.

DENSITY: Entirely salt water within port limits.

FRESH WATER: Available in limited quantities at Port Purcell, approx. delivery 20 t.p.h. and costs U.S.$14.00 per 1,000 gallons.

FUEL: Diesel only for small vessels delivered by road tanker to Port Purcell, 2 hours' notice.

REPAIRS: Minor repairs only.

SURVEYORS: Available.

HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCES: No sealing of tobacco, wine or spirits.

AIRPORT: Beef Island, 7 miles, regular local flights to St. Thomas, Puerto Rico, Antigua which connect with several main lines to Europe and the Americas.

TIME: GMT minus 4 hours.

HOLIDAYS: Port Purcell closed Christmas Day, Good Friday and 1st Monday in August.

POLICE/AMBULANCE/FIRE: Dial 999 (emergency). Police station 43422.

TELEPHONES: Telephones available for use on board ship.

SHORE LEAVE: No restrictions for crews.

IDENTIFICATION CARDS: None required.

DELAYS: None should be expected. Cargo working is geared to ship's arrival, irrespective of time and 24 hours continuous working if required.

AUTHORITY: Ports Manager and Harbour Master, Road Town, Tortola, Virgin Islands.

ST. THOMAS: 18.20 N. 64.56 W. (See Plan)

St. Thomas is situated on South side of Island of St. Thomas. It is 1,434 miles from port of New York. Northern side of Island borders on Atlantic Ocean, and Southern side on Caribbean Sea. The Harbour is one of the best in the West Indies, being almost landlocked.

WEATHER: The weather is usually mild with little wind. Squalls when they occur, usually come from the N.E.

DOCUMENTS: *Quarantine, Customs and Immigration* – see "Frederiksted".

Agent:

1 Copy Crew List (Form I-418).

1 Copy Passenger List (Form I-418).

PILOTAGE: Compulsory and available day and night. Pilot Boat has letter "P" on deck house and flies International Code flag "P". Pilots will meet vessels 1 to 3 miles outside harbour, boarding via Jacob's ladder.

ANCHORAGE: Outer Harbour Anchorage located beginning at Scorpion Rock Lighted Buoy No. 1 (Lat. 18° 19′ 25.6″ N., Long. 64° 55′ 08″ W.) thence 180° 1,580 yards; thence 263°, 2,490 yards; thence due North 1,255 yards; thence due East to the Southerly tip of Sprat Point, Water Island; thence to Cowell Point, Hassel Island, and thence to point of beginning. This anchorage is considered good and is about 8 fathoms with sand bottom.

RADIO: The St. Thomas Marine Operator will guard the following from 0600 to 2100 hrs.: Channel 26, 16 VHF, 2009 – 2506 and 2182 kHz AM, and the upper side band (2010.4 – 2507.4 kHz) of the same frequency. The Harbour Master's Office maintain a 24 hour watch on VHF Channel 16 (working on Channel 12).

(b) Master of every vessel arriving at St. Thomas is required to give at least 24 hours advance notice of arrival to Captain of the Port U.S. Coast Guard – San Juan, Puerto Rico by wireless on 500 kHz or by radio telephone 2182 kHz.

(c) Masters are requested to advise Agents their ETA, at least 36 hours in advance. Arrival messages should include cash requirements (local currency U.S. Dollar) and advice regarding repairs, stores, etc. This information is particularly necessary in the cases of vessel arriving on weekends or holidays. For cruise vessels the arrival messages should also include the number of passengers and crew on board.

(d) While vessels are in St. Thomas Harbour, the Authorities do not permit the use of the ship's radio transmitters.

(e) U.S. Coast Guards: This organisation maintains a small Marine Safety Detachment in St. Thomas to observe, service and effect repairs to navigation aids in vicinity of St. Thomas. An 82 ft. Coast Guard Patrol Boat "Point Whitehorn" (82364) is attached to the station for primary purpose of search and rescue work. Maintains watch on VHF Channel 16. Radio telephone marine information broadcasts, including Notices to Mariners, will be made on 2670 kHz, after first making a preliminary announcement on 2182 kHz. Radio telephone urgent and safety broadcasts or Marine Information will continue to be made on 2182 kHz.

TUGS: Normally not considered necessary for docking, however tugs are available for docking and undocking ships.

BERTHING: Wharf of the West Indian Company Limited, located on Eastern shore of harbour basin. Wharf is bulkhead type, 2,234 ft. long, running N.E./S.W., and is well protected to seaward. Mooring bitts are spaced at intervals of 50 ft. There is a "cut out" in the wharf 950 ft. from N.E. corner, which is 22 ft. wide and approximately 3.5 ft. above low water. This ramp is slanting from 8.3 ft. to 3.5 ft. over a distance of 20 ft. Similar type of ramp located on West Corner of wharf. Safe depth alongside from 27 ft. near N.E. end to 30 ft. on S.W. end. Bulwark is 8.3 ft. above mean tide. Average difference between high and low tide is 11 in.

Dockage dues are payable to the West Indian Company Limited, as per tariff.

In the Crown Bay area (access via East or West Gregerie Channels) the V.I. Port Authority maintains facilities which include a pier extending 800 ft. from shore with 500 ft. of berthing space on South side and 200 ft. on North side, where ships up to 25,000 g.r.t. can moor. Controlling depth presently 38 ft. This pier is used for berthing tourist and tanker vessels only. A curved bulkhead at top of Crown Bay, approximately 900 ft. long, is used for Ro/Ro, container and break bulk cargo. Controlling depth 15 ft. 24-hour arrival notice is required.

Phase II-A of the development at Crown Bay will include a 650 ft. berth for cargo vessels.

CARGO HANDLING: Containers are handled at the West Indian Company and the Crown Bay area (V.I. Port Authority), but no special gantry cranes are available. Ro/Ro cargo handled at these facilities as well. No liquid chemicals facilities exist here but there is a small privately-owned LPG plant limited to 20 ft. draft and 250 ft. length. Shell uses this facility for gasoline and light diesel. The "T"-pier in Crown Bay is used for the V.I. Water and Power Authority for movement of fuel and water, and Texaco has its own pipe-line on the same pier for their products.

STEVEDORES: Discharging and/or loading arranged by the West Indian Company Limited for account and risk of vessels.

Rates of discharging and/or loading dependent on vessel's equipment and stowage. However, following may be considered average:

General Cargo 6 weight tons per gang hour.
Bagged Goods 8/10 weight tons per gang hour.
Lumber 10/12 weight tons per gang hour.

Each stevedore gang normally consists of 12 stevedores (10 on board and 2 ashore), 2 winchmen, 1 signalman, 1 foreman.

MEDICAL: Local hospital is the Knud-Hansen Memorial Hospital, which is equipped with facilities for operations, etc.

FUEL: Bunkers are not available except for small craft.

FRESH WATER: Mostly rain water which when available is supplied by the West Indian Company Limited. This supply is limited and is on an emergency basis only. Water may also be requested from the Government of the Virgin Islands in cases of emergency only. Delivery effected by pipe alongside wharf. Water can be delivered by barge.

HEALTH, CUSTOMS, IMMIGRATION: Refer to Frederiksted.

CONSULS: Following countries have consular representatives in St. Thomas:

Belgium
Denmark
Dominican Republic
El Salvador
France
Haiti
Netherlands
Norway
Panama
Sweden
United Kingdom

AIRPORT: Distance 2 miles. Connections with International flights from Puerto Rico and direct flights from New York, Dallas/Fort Worth and Miami.

TIME: Official St. Thomas time is Atlantic Standard Time, which is 4 hours behind GMT.

HOLIDAYS: The following are legal holidays in St. Thomas: Sundays; January 1st (New Year's Day); January 15th (Martin Luther King); January 30th (Roosevelt's Birthday); February 12th (Lincoln's Birthday); The third Monday in February (Washington's Birthday); March 31st (Transfer Day); Holy Thursday; Good Friday; Easter Monday; Whit Monday; The last Monday in May (Memorial Day); June 22nd (Organic Act Day); July 4th (Independence Day); July 25th (Supplication Day); The first Monday in September (Labour Day); The second Monday in October (Columbus Day); The fourth Monday in October (Veterans' Day); November 1st (Liberty Day); The fourth Thursday in November (Thanksgiving Day); December 25th (Christmas Day); December 26th (Christmas Second Day), and such other days as the President of the Government may by proclamation declare as holidays.

Whenever any holiday falls upon Sunday, the Monday following is a legal holiday.

POLICE/AMBULANCE/FIRE: Police 915; Ambulance 774-1212; Fire 921. Port Authority 774-2250, 774-2333.

REGULATIONS: The U.S. Coast Guard strictly enforces the Harbour Pollution Act of 1924, prohibiting discharge of refuse and oil in navigable waters of the U.S. Virgin Islands.

Local Port Regulations are similar to those applying in U.S. Mainland Ports.

GENERAL: *Gangway:* One aluminium gangway available which is 34 ft. long and 2 ft. 6 in. wide – made with skidding prevention strips only and therefore not recommended for use as a passenger gangway. There is a similar gangway that is owned and used on V.I. Port Authority facilities. Since these are the only gangways; they are made available to vessels on first-come-first-served basis.

Stores: St. Thomas should not be depended upon for large quantities of provisions or deck and engine stores, as practically all commodities are imported making prices higher than United States mainland ports and Puerto Rico. No regular Ship's Chandlers established in St. Thomas, V.I.

Storage Facilities: The West Indian Company Limited undertakes ordinary storage for a limited period of time in 8 transit warehouses, all 14 ft. high with a total floor area of 80,000 sq. ft., plus an additional 9,600 sq. ft. roof covered area. There is also a large uncovered area available for outside storage. Only limited cold storage facilities are available on The West Indian Company's Dock.

Ice: Small quantities may be obtained.

Laundry: Modern laundry service is available.

AUTHORITY: Virgin Islands Port Authority, Office of the Marine Manager, P.O.Box 2216, St. Thomas, Virgin Islands, U.S.A. 00801. *Tel:* (809) 774-2250, 774-2333. *Contact:* Harry Magras, Marine Manager.

Western Samoa

APIA: 13.50 S. 171.45 W. **(See Plan)**

PORT LIMITS: The Customs Act defines the port of Apia as follows: The limits of the said port of Apia shall be a circle of 2 miles radius from the Custom House now existing in Apia and the said port shall include all land, river, and sea included within that circle. The Shipping Act defines the limits of the port in similar terms using the Export Wharf as the centre of the 2 mile radius circle. Both of these features are shown on Chart 2211.

DOCUMENTS:

1 Clearance from previous port of call.
3 Crew Lists.
3 Passenger Lists.
2 Health Documents.
1 Manifest.
Bills of Lading.
Ship's Papers (stores and poisons).
List of Dangerous Goods.

PILOTAGE: 72 hours ETA is required, confirm 24 hours before arrival. Pilotage is compulsory for merchant vessels. Pilot boards 1.5 miles outside harbour on line of leading beacons. Pilot boards from harbour tug.

By night, in addition to usual navigation lights, Pilot boat carries standard identification, i.e. a red light on foremast with all-round visibility. Exemption from pilotage may be granted to Masters of vessels trading regularly to Apia, but pilotage dues are still payable.

ANCHORAGES: In 20 fathoms outside a line drawn between the 2 reefs and preferably on line of leading beacons. Bottom is coral.

RESTRICTIONS: No night-time or tide restrictions. Turning basin dredged to 36 ft. in 1972, extending to 1,200 ft. from each end of the wharf. Arrivals preferred during daylight hours.

MAX. SIZE: Shore bollards to take stern and bow lines for vessels up to 800 ft. in length. Max. draft 35 ft.

Buoy mooring for tankers up to 32,000 d.w.t. consists of 3 buoys with black and red vertical stripes, 1 ahead and 2 astern. Vessel also uses starboard anchor.

HEALTH: Doctor boards vessel on arrival alongside.

RADIO: ETAs should be sent 72 hours before arrival, and confirmed 24 hours before. Signals to incoming ships by radio or radio-telephone from Apia radio station 5WA. For radio, ships should call on 500 kHz and operate on 483 kHz. For radio-telephone, ships should call on 2182 and operate on 2162 or other available frequency as may be arranged once contact has been established. Call sign "Apia Radio" repeated.

Apia Radio maintains continuous service, and the Harbour Master can be called on Channel 16 during normal working hours. The tug and pilot launch also operate on Channel 16.

TUGS: 2 tugs available, *Pualale,* 425 b.h.p. (7 ton pull) and *Savaii,* 175 b.h.p.

BERTHING: Export Wharf – reinforced concrete wharf 604 ft. in length on the East side of inner harbour. Max. depth alongside 36 ft. All loading and discharging is carried out with ship's gear. No wharf cranes available. This wharf and all surrounding areas enclosed by fence is Customs area and all vessels trading to or from places outside Western Samoa must depart from or arrive at this wharf.

New wharf 604 ft. long, vessels up to 800 ft. may be berthed.

There is 250 ft. of berthing alongside the inner face of the Southern arm of the wharf for small ships in deep water.

There are no special Ro/Ro facilities.

Shore equipment: One 15 ton mobile crane. 2×20 ton forklifts. About 10×3 to 5 ton forklifts.

STEVEDORES: Arranged by ship's Agents.

MEDICAL: Advance notice to Agents preferable. Doctors and good general hospital where seamen may be admitted.

There is a private medical clinic and a private dental clinic. Both high standard.

TANKERS: Shell, Mobil, and B.P. operating in Samoa, and have own discharging facilities. Tanker terminal situated on West Reef. Discharge line is 6 in. diameter. Launch service may be provided between ship and shore at a small charge.

DENSITY: 1025 – but may alter considerably during rainy season.

TIDES: Mean high water intervals 6 hours 27 minutes, Spring range 3.8 ft., mean range 2.6 ft. Tidal stream normally slight, but after heavy rain outflow from rivers and streams can cause it to become quite strong.

The current across the harbour entrance about 600 m. off the reef can be variable, but is predominantly Westerly and velocities up to 4 knots have been reported but this is not normal.

FRESH WATER: Available at wharf from shore installation.

FUEL: Only light diesel fuel available.

FIRE PRECAUTIONS: Fire services available on wharf, station is 0.5 miles distant.

CONSULS: The New Zealand High Commissioner represents all British subjects; French Consul, Australian High Commissioner, Embassy of the Chinese People's Republic, South Korean Consul, German Consul, United States of America Consul.

REPAIRS: Minor repairs only.

SURVEYORS: None.

GANGWAY/DECK WATCHMEN: Recommended and available.

OPENING/CLOSING HATCHES: Opened and closed by stevedores.

CUSTOMS ALLOWANCES: No enforcements.

AIRPORT: 25 miles from Apia on Western side of Island. Regular and frequent mail and passenger services. Direct to Auckland or U.S.A. via American Samoa.

TIME: GMT minus 11 hours. No alteration to clocks.

HOLIDAYS: No cargo on Sundays between 0300 and 2100 hrs. The recognised holidays are Christmas, New Year, Boxing Day, Good Friday, Easter Monday, Whit Monday, Anzac Day and Independence holidays from 1st June to 3rd June.

TELEPHONES: Police and public telephones near wharf and provisions are available for telephone connection to tourist vessels berthed at the wharf.

POLICE/AMBULANCE/FIRE: Hospital 21.212; Police 22.222; Fire 999 emergency or 20.404.

EMERGENCY CO-ORDINATION CENTRE: U.S Coast Guard, Pago Pago, American Samoa, 80 miles East of Western Samoa.

BANKS: Bank of Western Samoa, P.O.Box 189, Apia, Western Samoa. Tel: 22 422. Telex: 258.

Pacific Commercial Bank (Affiliate Bank of New South Wales and Hawaii), P.O.Box 192, Apia, Western Samoa. Tel: 22 781. Telex: PCB 231.

STORING: See "Prelims".

1. Truck only.
2. N/A.
3. Yes.
4. Yes.
5. No regulations.
6. Yes.

SHIP SUPPLY SERVICE: The Marine & Shipping Division of the Ministry of Transport provides tug-boat services which are available for ship-to-shore transport of personnel and/or essential ship stores, sick crew members, etc., on application to the Secretary, Ministry of Transport.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not needed.

GENERAL: *Supplies:* Provisions available. Deck and engine room supplies can be obtained in limited quantities.

Divers: No divers other than scuba divers are available, and skin divers may be recruited for up to 50 ft. diving.

Oil Pollution: The pumping of bilges, etc., within harbour limits is not permitted and *heavy penalties will be imposed for any breach.*

Garbage Disposal: The dumping of refuse of any kind within harbour limits is strictly prohibited. Properly covered receptacles will be made available and rubbish disposal vans will clear them as necessary. A small charge will be made for this service.

Charts: B.A. 1730 – Samoa or Navigation Islands.
B.A. 1339 – Plans in Samoa.
B.A. 2211 – Apia Harbour.

AUTHORITY: Government of Western Samoa, Ministry of Transport, P.O.Box 1607, Apia, Western Samoa. *Tel:* 23 700, 23 701 and 23 702. *VHF:* Channel 16. *Telex:* 21 Malo Sx. *Cables:* Mot Sam Govt. *Contact:* The Secretary, Ministry of Transport. N. Vaaelua, Assistant Secretary Marine and Shipping, and Acting Harbour Master.

Yemen, Republic of

GENERAL:

CIRCULAR: Extract from the Circular dated 21st June, 1975 from the Hodeidah Port General Corporation.

Information and General Condition:

1. *Payment of Tolls and Dues:*

All charges imposed herein are payable in cash, in advance except in the circumstances in which the General Manager of the Hodeidah Port General Corporation exceptionally agrees otherwise.

2. *Definition to Certain Terms:*

(a) "Vessels" shall deem to refer in the Regulations to every floating craft made to sail on water by its or without its own means, whether or not fit for navigation.

(b) "Working Day": Commences at 0600 hrs. and ends at 1800 hrs. Night: Commences 1800 hrs. ends 0600 hrs. following day. Weekend: Commences Thursday 1200 hrs. and ends Saturday 0600 hrs.

3. *Public Holidays:*

The following occasions are observed as Public Holidays, which commence from 1200 hrs. on the preceding day and end at 0600 hrs. following the holiday:—

1. Weekly Holiday: Friday.
2. Al-Hijra (Moslem New Year): *1st Muharram.
3. Maulid-El-Nabi (Prophet's Birthday): *12th Rabia Awal.
4. Al-Meiraj (Prophet's Ascension Night): *27th Rajab.
5. Al-Shaabania: *15th Shaaban.
6. Idd-El-Fitr (4 days): *1st to 4th Shawal.
7. Idd-El-Adha (5 days): *9th to 13th Dulhijja.
8. Revolution Anniversary: 26th September.
9. 13th June (National Holiday).
10. Labour Day (1st May).
11. Revolution Day (14th October).

*N.B.: For Hijra Calendar dates, the corresponding Georgian Calendar dates will be those proclaimed by the Government of the Yemen.

CIRCULAR: To Owners/Masters.

We quote below text of a Circular dated 21st January, 1979, issued by the General Corporation for Ports and Marine Affairs, Hodeidah, for your information and necessary compliance:

"No vessel, having no workable derricks or winches of her own, shall be received or accepted.

Agents shall be responsible for said obligations and without any liability to the Port General Corporation, in all Yemen Ports.

Due to non-availability of discharging means of floating cranes at anchorage and non-guarantee of available shore cranes, advisable you ensure that all ships calling under your Agency should be fully equipped as required."

PILOTAGE: Pilotage is compulsory on all vessels irrespective of their size, on entry and departure.

NOTICE: The following notice was handed to a Master on arrival at Hodeidah.

Re: Formalities, Restriction, Breaches & Penalties at Yemeni Ports:

We are very pleased to welcome you and the vessel under your command at Hodeidah/Raskateeb/Saleef/Mokha, and request you to note and comply with the following formalities/restrictions to avoid payment of penalty.

1. Call Pilot only when you are fully ready in all respects. If Pilot is called to take the vessel out, and the vessel fails to depart after boarding of the Pilot, the vessel will bear all the consequential expenses of (a) Pilot waiting time, (b) Launches assistance charges, (c) unmooring charges, including any other expenses.
2. Fine of Y.Rials 500 to 2,000 is imposed, if Yemen flag is not hoisted on the highest mast.
3. Fine of Y.Rials 500 is imposed, for arrival at Port without prior notice, notifying actual time of arrival of the vessel.
4. Fine of Y.Rials 10,000 to 20,000 is imposed for attempting entry to berthing quay, without prior permission from the Management and without Pilot on board. Same penalty imposed for attempting departure without permission and Pilot, from the quays or inner basins.
5. Fine of Y.Rials 500 to 1,000 is imposed for draining water onto the quays. Vessel also to bear responsibility for losses caused therefrom.
6. Fine of Y.Rials 1,000 is imposed for throwing garbage, cargo remains, food remains, oil, etc. into inner harbour or onto quay.
7. Fine equivalent to 100% of the loss in income to the Corporation is imposed, in the event the vessel submits inaccurate statements on ships particulars and drafts.
8. Fine of Y.Rials 5,000 is imposed, if the vessel leaves anchorage after registration without clearance from the Corporation.
9. Fine of Y.Rials 500 is imposed, if Rat Guards are not provided to avoid rats escaping to the quays.
10. Fine of Y.Rials 2,000 is imposed, if vessel uses her own boats within Port limits without prior permission.
11. Fine of Y.Rials 2 is imposed per hour per metre of LOA of the vessel, for delay in completion of discharging during the duration set out by the Corporation.
12. Fine of Y.Rials 1,000 is imposed on whoever obstructs Corporation's staff/employees in carrying out their duties or insults them.
13. A shore crane will be compulsorily deployed at 100% surcharge to a vessel over 100 m. LOA.
14. Corporation reserves the right of removing any vessel from the quays for any reason in the general public interest.
15. Photography of the Port area is prohibited.

(Notes from Tariff – 1/82 published by Ports & Marine Affairs Genera Corporation).

Please note that the Port Limits (for Hodeidah) are 14° 55′ 34″ N, 53° 37′ E.

"Pilotage Point" for entrance and departure is Buoy No. 2.

We trust that you will find the above information very helpful to promote cordial relations with all officials and relevant authorities, and at the same time contribute towards reducing expenses of our mutual Principals.

PLEASE NOTE: All the foregoing information was in effect prior to the unification of the country and may have been superceded in recen months.

ADEN, (including Little Aden): 12.48 N. 44.54 E.

DOCUMENTS:

5 Crew Lists for Ship's Agent, Police and Immigration.
5 Passenger Lists for Ship's Agent, Police and Immigration.
2 Lists of Bonded Stores.
1 Health Form to be shown to Pilot on boarding and handed to Ship's Agent.
Manifests, Bills of Lading if landing cargo only.
Ship's Register to be sighted by Pilot.
Arrival Declaration to be filled in by Ship's Agent after arrival.
Dangerous Material Declaration to be handed to Pilot on boarding.

PILOTAGE: Compulsory for all vessels proceeding to and from Inner Harbour and Oil Harbour at Little Aden which exceed 200 g.r.t. To call Pilot fly International Code Flag "G" or red/white/red lights at night. Call "Harbour Control" on VHF Channel 16, or R/T 2182 kHz. 48 hours' notice of ETA with draft to Harbour Office.

Pilot boat will meet ship at the Fairway Buoy in all weathers. Pilot boat is 50 ft. launch painted red, flying Pilot flag by day or white/red lights at night. Pilot will board on lee side of ship by pilot ladder only. Vessels waiting Pilot can anchor anywhere in Outer Harbour except in a Prohibited Area of 2,000 ft. around the Fairway Buoy. All Pilots are Yemenies with foreign-going Master's certificates.

ANCHORAGES: Ample anchorage area available with in Outer Harbour depths from 18 ft. to 54 ft.

(a) Anywhere North of Fairway Buoy clear of Main and Little Aden Channels and clear of Prohibited Area mentioned above.

(b) Deep water anchorage anywhere to S.W. of Fairway Buoy clear of Little Aden Channel and Prohibited Area mentioned above.

MAX. SIZE:

Aden:

(a) Max. length 900 ft., breadth no restriction, depth 38 ft. at datum for vessels taking bunkers from A.B.C. (Aden Bunkering Co.).

(b) Vessels taking bunkers from Y.K.T.C. (Yemen-Kuwait Terminal Co.), max. length restricted to tankers of 750 ft., breadth no restriction, depth 39 ft. at datum.

(c) Larger vessels can be considered on application to the Port Officer. Longest vessel to enter 940 ft.

Little Aden Refinery:

Max. length 760 ft., breadth no restriction, depth 40 ft. at datum and max. deadweight 65,000 tons.

A new jetty 45 m. in length has been constructed on the North side of the oil harbour by Agip Oil Company for use by oil rig supply tugs. Vessels up to 90 m. LOA and 6.1 m. draft can berth on the jetty.

Note: In both harbours vessels manoeuvring require 2 ft. water under keel, and vessels of draft 37 ft. and above require 4 ft. water under keel.

Ballast Draft for Tankers: All tankers when manoeuvring within the port shall be ballasted properly to a mean ballast draft which shall not be less than half the Summer draft and the trim by the stern not exceeding 6 ft. These figures are the minimum for normal conditions and may be increased when conditions necessitate at the discretion of the Pilot.

HEALTH: Vessels requiring Pratique fly International Code Signals or 3 red lights at night. This signal to be exhibited until Pratique has been granted by the Pilot or Port Health Officer.

Control of quarantinable and infectious diseases is direct responsibility of Port Health Officer. All passengers from infected local areas except children under age of one year are required to have valid international certificate of vaccination or revaccination against yellow fever and cholera.

RADIO: All ships landing passengers are boarded by Assistant Port Health Officer unless Radio Pratique has been given. Pratique may be obtained by radio to Port Health Authorities no earlier than 12 hours and no later than 4 hours before arrival, in accordance with international procedure. All landing passengers medically inspected and vaccination certificates checked on board before Free Pratique granted. Ships having infectious diseases on board are also boarded; after examining the case and taking any necessary precautions the Assistant Port Health Officer grants Restricted Pratique. Ships also inspected for issuing Derat Exemption Certificates. Deratting carried out when necessary and derat certificate issued.

Yemen Telecommunications Company: Mercury House, Ras Borad (Tel. 22223/5).

Wireless telegraphy:

Medium wave	*GMT*	*kHz*
Working frequency		476
24 hour watch on international calling and distress frequency		500

14 Out		Anchors & buoy	350	18
14 In		Anchors & buoy	350	18
15 Out		Anchors & buoy	350	18
15 In		Anchors & buoy	350	18
Dolphin Berths				
6 Out	C	Dolphin & breast buoys (oil)	900	39
6 In		Dolphin & breast buoys (oil)	800	38
7 In	T	Dolphin & breast buoys (oil)	750	39

The capital letters in column two denote alternative designation of mooring buoys/dolphins.

New Quay: New quay with length 750 m. and depth 11.0 m. for vessels up to 36,000 d.w.t. Two berths for container vessels and 2 berths for general cargo vessels. The quay will be equipped with 1×40 ton container crane and 6×6 ton semi-portal cranes.

Ro-Ro Terminal: Length 150 m., depth 7.6 m.

Home Trade Quay (H.T.Q.): 800 ft. long with depth of 6.7 m. Max. size of ships that can berth there are restricted to 122 m. LOA and max. draft 5.5 m.

Free zone. Initial Stage 525,420 sq. ft. open space and 162,000 sq. ft. covered space. Import and export industrial facilities. No restrictions, no taxes. Transhipment storage free for unlimited period.

STEVEDORES: ETA advice to Agent at least 48 hours before arrival.

MEDICAL: Advance notice for medical attention not normally required except for serious cases requiring doctor's attendance on board, or ambulance cases. Vaccination certificate required for landing. Hospital facilities available.

TANKERS: Tankers carrying dangerous petroleum (flash point below 73° F) and those not gas free or carrying more than 3 tons of category one cargo (explosives) cannot enter Aden Harbour during hours of darkness. They can enter Little Aden day or night. Slop (residue) discharge facilities available at Little Aden. 4 tanker berths for discharge/loading at Little Aden with max. datum depth of 40 ft.

Berthing at Oil Harbour: Functions of Oil Harbour Little Aden to receive crude oil in bulk for oil refinery and to export refined petroleum products. Vessels carrying cargo for refinery, other than oil, discharge at Inner Harbour.

Oil harbour has finger jetty and 2 T-head jetties which provide berths for 4 tankers. Tankers of up to 65,000 tons Summer deadweight with 55,000 tons of cargo can be accommodated.

Berth	Type	Normal maximum length of ship (ft.)	Datum depth (ft.)
1	Dolphin & mooring dolphins	750	40
2	Dolphin & mooring dolphins	750	40
3	Dolphin & mooring dolphins	750	40
4	Dolphin & mooring dolphins	See "below"	

Berth No. 4: Max. size 110,000 d.w.t. Max. LOA 264 m. Width of channel 220 m., depth 14.75 m. Depth alongside 15.85 m. Daylight berthing on flood tide. Daylight unberthing on suitable tides.

BALLAST: Notice: Port Authority require vessels arriving or saililng in ballast to have mean draft 50% of Summer draft and maximum trim of 6 ft. by stern. However, should the vessel have segregated ballast tanks then ballast condition must comply with regulation 13 of International Convention for Prevention of Pollution 1973, Protocol 1978. Total deballasting time allowed being 6 hours only. Vessels should have maximum possible ballast clean and capable of being pumped overboard. Dirty ballast and slops can be received ashore at maximum rate of 500 t.p.h.

Signed: Marine Superintendent.
Aden Refinery Company.

DENSITY: Salt water at all times.

FUEL:
(a) A.B.C. (4 berths).
Marine fuel 2500 sec., 1000 sec., 600 sec., 200 sec.
Diesel oil and gas oil.
(b) Yemen-Kuwait Terminal Co.
Marine fuel – all grades below 3,500 sec.
Diesel oil and gas oil.
All supplies done on a Nomination basis through the Company's Head Offices, with the vessel giving at least 48 hours' notice to Aden.

FRESH WATER: Ample available, delivered by barge in Aden at about 50 t.p.h. Ordinary water in Little Aden supplied by pipe-line at about 40 t.p.h. and condensate at about 2 t.p.h.

FIRE PRECAUTIONS: As per the Refinery regulations (International Standard). Tug wires to be rigged and check list to be furnished.

REPAIRS: Workshops are equipped to carry out: Boiler repairs; Plating and sheet metal work; Galvanising work/moulding work; Welding and blacksmith's work; Main and auxiliary machinery repairs; Carpentry and joinery work; Electrical and plumbing work; Refrigeration repairs; painting, cleaning and chipping. Repairs afloat to vessels up to 80,000 tons are undertaken; repairs to the largest vessels carried out mostly in Outer Harbour.

Radio engineering section with fully qualified personnel giving round-the-clock service of repairs and maintenance to radar and radio equipment.

During repairs, maintenance and painting – no rubbish to be thrown overboard, precautions to prevent pollution to be taken. No painting overside to be carried out without written permission from Port Authority. Chipping and/or scrapping overside strictly not permitted.

DRY DOCK: 1 sideways slipway taking 1,500 tons and floating dock lifting capacity 4,500 tons. Length 137 m., breadth 31 m. Max. draft 6.0 m.

GANGWAY/DECK WATCHMEN: It is recommended watchmen are employed; they can be supplied by Ship's Agent. Safety net to be rigged.

OPENING/CLOSING HATCHES: Normally carried out by stevedores, derrick-topping by ship's crew. Vessels not to move in harbour with beams off.

CUSTOMS ALLOWANCES: Tobacco/Wine, Spirit allowance. No restriction at the moment. Bonded stores not allowed to be supplied more than 1 hour before ship sails.

REPATRIATION: Arranged through Ship's Agent and Immigration.

AIRPORT: About 5 miles from port. Flights to U.K. via Beirut (Middle East Airlines), Air France, Kuwait Airways, Air India, Ethiopian Airlines, Saudi Air and Alyemda also call.

TIME: GMT plus 3 hours. No alteration of clocks.

HOLIDAYS: Most holidays are religious which have movable dates. National holidays are 14th October and 30th November. Cargo work usually carried out during all holidays. Friday is a public weekend holiday.

POLICE/AMBULANCE/FIRE: Ambulance at Crater 53232; Harbour Police 22851; Port Health 22626/7; Fire 22222.

TELEPHONES: No connection to ships but link calls can be made on VHF through Yemen Communications using Channel 16 to call and working on Channel 26. Some Agents have private VHF Channels.

SHIP SUPPLY SERVICE: There are no firms specialised in this field in Yemen. However, the Yemen Ports Authority has a large fleet of tugs and launches at Aden, and will, in 1985, have 2 Voith Schneider propelled tugs, 1 fast pilot launch and 2 mooring launches at the newly constructed port of Mukalla-Khalf. These craft are available at all times for rendering assistance to sick persons on board ships in the vicinity of the ports and are also available for crew changes, mail and spare parts delivery.

As to helicopter services, the Yemen Army and Air Force make their helicopters available for rescue at sea whenever possible.

SHORE LEAVE: *Regulations:* In accordance with Art. 8 of the Immigration Rule No. 28 of the year 1969, all crew members coming ashore will be excused from obtaining visa provided they surrender their Passports to the Immigration Officer-in-Charge. These Passports will be given back to the holders before they return to their particular vessels. Any crew member unable to comply with these instructions will not be permitted to visit the town.

Ships' crew are not allowed to stay ashore after 0000 hrs.

IDENTIFICATION CARDS: Shore pass to be carried at all times when ashore.

REGULATIONS: Vessels must fly the National flag of Yemen at foremast. No movement of "dangerous petroleum" at night. Vessels must vacate oil berths on completion of bunkering. Main engines must not be immobilised in an oil berth. Sufficient crew must remain aboard vessel at all times to move her.

Ships carrying dangerous cargoes calling at Yemen Ports must inform the Port Authority concerned not less than 48 hours prior arrival. IMO Class 1 dangerous cargo to discharge at Outer Harbour Anchorage, if IMO Class 1 in transit vessel will manoeuvre during day time only.

Immobilisation of main engines should not be executed at any berth before obtaining written permission from Port Authority, through ship's Agent. Same procedure applies for overside hull painting. Application to be through ship's Agent in duplicate. Main engine immobilisation in oil berths and Home Trade Quay not allowed.

GENERAL: Outer harbour contains ample anchorage area for vessels requiring datum depths up to 54 ft. Inner harbour approached by 2.7 mile dog-leg channel, dredged to 38 ft., from Fairway Buoy in Outer Harbour where Pilots board. Inner harbour protected by breakwater at Steamer Point and by rubble mound. It provides 24 buoy or anchor-and-buoy berths, including 13 with oil bunkering facilities. Majority of these berths have a datum depth of 30 ft. or 38 ft., with max. length of ship ranging from 275 ft. to 750 ft. In addition 3 dolphin berths, with bunkering facilities, of 39 ft. datum depth and normally accommodating ships of 750 ft. – 900 ft. max. length; vessels of greater length can be accommodated with the approval of the Port Officer. Quays and wharves cater for shallower-draft vessels and lighters.

Oil harbour, serving refinery at Little Aden, reached by 38 ft. channel from Fairway Buoy, provides facilities for tankers of up to 750 ft. All berths and anchorages are under the jurisdiction of the Port Officer.

In order to facilitate berthing arrangements for ships calling at Aden, Masters are requested to furnish the Port Authority with the necessary information, such as, LOA, max. draft, g.r.t., type of ship, object of call, dangerous cargoes on board and IMO Classes, ETA and any other information Master thinks may be useful.

SHIPMASTER'S REPORT: 1976

Documents:

Pilot: Sights Ship's Register to check tonnages.

Customs: 2 Crew Lists; 1 Bond List.

Immigration: 2 Crew Lists.

Doctor: 1 Health Form; 1 Vaccination List.

Note: Crew List should have consecutive numbers as well as Agreement numbers.

Agents: 2 Crew Lists; Arrival information sheet; Statement of Owners full address also Cable address; 2 Arrival Declaration for Yemen Ports Authority; 2 Aden Port Log; 1 Charges sheet for Mail; 1 Sailing information sheet; 1 Currency refund sheet.

Agent brings these Forms on board and will assist with filling in the information.

Communications: It was found impossible to make Radio Contact with Aden prior to 5 days before arrival. Best time seems to be after Aden sends its Traffic List. VHF contact was made at 12 miles as the hills around Aden appear to blanket signals when further away. Channels 16, 13, 8 or 6.

Approach: This is straightforward. The B.A. Charts appear to be well up-to-date. The Fairway Buoy is easily seen at 8 miles. Pilot boards here. Pilot ladder required. Authorities will not allow the accommodation ladder to be used.

Mooring: There was a trainee Pilot with both the inward and outward Pilot.

Ship was swung using starboard anchor and 1 tug aft. Berthed at No. 4 Berth. Forward: 3 ropes to buoy on inside plus starboard anchor 5 shackles. Aft: 1 rope from port quarter and 1 from starboard quarter taken to outside buoy, then 2 ropes, 1 from each quarter taken to inside buoy. Ship then hove to be centred between the 2 after mooring buoys. When ship in position oil pipe-line, on floats is towed alongside.

Visit: Agent boarded with Doctor. At first Doctor was insisting all had to have Cholera vaccinations but is not really necessary. Immigration and Customs boarded. All pleasant and helpful. Bond was sealed.

Port Facilities: 2 fairly powerful tugs. Numerous mooring boats, 1 floating crane seen but as to lift capacity this was not ascertained. Port is run by The Yemen Ports Corporation. Like the Agency it is State owned.

Watchmen: Agents automatically provide 2 watchmen. Seemed to be alert.

Regulations: Masters are requested to assist the Port Authority by not allowing Bumboatmen or fishermen to board without written permission. The Port Authority advises Masters to be most careful if they do issue written permission. There were no bumboats about and no one seeked permission to come aboard to do business.

One half hour prior to sailing the Pilot signal red-white-red in a vertical line or "G" to be hoisted also call Port Control on VHF 16.

Use of ship's whistles or sirens is very controlled.

Bunkering: Ship's crane used to hoist pipe-line aboard. The bunkering operation went smoothly and the Oil people seemed co-operative.

Walport Film Exchange: Agents were cabled but it is necessary for an Officer to go with the Agent to make the exchange.

Mail: Mail posted in London on 22nd March or 23rd March was stamped as having arrived Aden 28th or 29th March.

General: It would seem that the Port Authority, State, etc., are very keen to build up a thriving Port. It would also seem that they endeavour to give a good efficient service. I gather there is a special duty free shop ashore for the purchase of souvenirs, goods, etc.

SHIPMASTER'S REPORT: March 1985.

Documents: See "Fuel".

Pilotage: Harbour Control was called on VHF Channel 16 two hours before arrival and again 4 miles off the Fairway Buoy. Information given from the Harbour Control regarding Pilot and berthing gave the impression of a well organised port. Night signal for a ship requiring Pilot is following: vertical lights, red-white-red.

Radio: From one week before arrival, radio messages were sent via Aden Radio (7OA) to Aden and Ethiopia. Radio Officer told me that Aden Radio proved to be easy and efficient to work with.

Fuel: Bunkering commenced immediately on arrival even before ship cleared by the Authorities. Authorities came on board just before departure to collect Crew Lists and Stores Lists. Crew's cabins were not searched and stores not sealed.

2 men from the Agents were on board to handle ship's matters.

Repatriation: 7 crew members were repatriated to Denmark, and 7 new crew members joined. Tickets for those to be repatriated were brought from Denmark with the joining crew. Crew change went smoothly.

Notices: Yemen Ports Authority – Port of Aden:

Masters are requested to assist the Port Authorities in controlling bumboat traffic as follows:

Bumboatmen and fishermen selling fish *may not* board ships without the written permission of the Master. Disregard of this rule renders the men liable to police action *after* the ship has left when evidence cannot be obtained from the ship. Masters can greatly assist the Authorities if they will ensure that they give written approval to bumboatmen and fishermen whom they have allowed to board the ship.

Port Officer, Aden.

To: All Masters of Vessels in Aden Port – From National Shipping Agency.

The undermentioned information is for your kind attention and guidance:

Immobilisation of Ship's Engines:

Please note that it is an offence to immobilise ship's engines WITHOUT written permission being obtained from the Yemen Ports Authority. To avoid heavy penalty, Masters are advised to forward their requests to us in duplicate, as ship's Agents, and should NOT immobilise ship's engines unless they are in possession of the written permission of the Yemen Ports Authority for the period approved.

Garbage Collections:

Appended below are extracts from Circular No. G/3/128 dated 25th January, 1984, of the Port Officer and Director of Marine Affairs, Yemen Ports Authority, Aden:

(a) Collection and removal of garbage from vessels is entrusted to persons authorised and licensed by the Yemen Ports Authority, Aden, and who work on a rota system.

(b) It is compulsory for a vessel staying in the harbour for a period exceeding 24 hours to avail itself of this service and fees will be collected per day **whether garbage has been collected or NOT.**

(c) Similarly it is compulsory for garbage collectors to call on vessels allocated to them daily unless other arrangements have been agreed with the Master of a ship. Any garbage collector who does not call on vessel allocated to him daily without prior agreement of the Master will not receive his fee that day if reported.

Note: Masters requiring special service for collection of extra garbage i.e., refuse/wastes, etc., emanating from the cargo holds/engine room, etc., must put their written request in duplicate to us, as Agents, to arrange for the garbage collector to call on their vessel. The Master should also notify us in writing the charges agreed upon for the extra garbage with the Collector. This does not apply to U.S.S.R. vessels who are required to comply with the procedures below.

For Masters of U.S.S.R. Ships: Before applying for the collection of extra garbage, please first submit your written request in *4 copies* through the Agent for *approval* of the Resident Representative for U.S.S.R. ships. Please *do NOT* employ collection of the extra garbage before receiving this approval.

Scraping, Chipping and Painting in the Port:

Please note that as per instructions from Yemen Ports Authority scraping, chipping and/or painting are *NOT ALLOWED* during vessel's stay in the port, unless prior permission is obtained from the Port Officer through us, as Agents. Any requests for the above must be forwarded to us in duplicate.

Shore Leave – Immigration Regulations:

All shore leave expires at 2300 hrs. and, therefore, all Masters, Ship's Officers, crew and passengers should be on board by this time. Overnight stay ashore is *not permitted.* Infringement of the above will be subjected to penalty and also delay to the ship.

Cash Advance to Master in Yemeni Dinars:

Cash advances required by Masters for payment to their crew in order to enable the crew to avail themselves of purchases from *Tax Free Shop* require the following procedures to be complied with:

(a) Masters are required to render their requisitions in duplicate to the Agents during working hours together with 2 copies of Crew List.

(b) Either the Master or Chief Officer or Purser in person should have the requisition attested, stamped and signed by the Customs Officer before handing them to National Shipping Co. (the Agents).

(c) Together with the cash to Master the Agents will issue Purchase Certificates on Tax Free Shop.

(d) After completion of the purchases and 24 hours before vessel is due to sail, the Master should obtain *Purchase Clearance Certificate* from Tax Free Shop and hand it over to the Agents. This is most essential as against these Certificates only and after reconciling with the actual cash advanced, the Agents can accept the balance cash refund from Master.

Under the Exchange Control Regulations, it is an offence *not* to return the *UNUSED* Yemeni Dinars prior to sailing. Masters of vessels who received Cash Advance in Yemeni Dinars are advised to return ALL Yemeni Dinars remaining in their possession, to our representative who boards to clear the vessel, and ensure to obtain from him *on the spot* an official receipt of the National Shipping Company for the amount refunded, prior to departure of the vessel.

Victualling Allowance:

Free meals to Stevedores' Personnel/Watchmen.

Free meals are normally given by vessels by mutual arrangement between Masters and the Stevedores, to save time of the following persons who otherwise would have to go ashore for their meals:

One Tally Clerk per hatch working.

One Foreman.

One Cargo Supervisor.

It is left entirely to your discretion to supply free meals to the above mentioned personnel and the watchman or not. Kindly, therefore, note that we do *NOT* countersign or vouch expenditures.

Contacts on VHF: Masters of vessels can contact Agents on VHF (Channel 16) at any time during the *DAY* or *NIGHT* for any inquiries or services required. The Harbour Control also can be contacted on the same Channel.

Authorities: All in all the Port Organisation, Pilots, tugs and the Authorities gave us a good impression of the port.

AUTHORITY: Yemen Ports Authority, P.O. Box 1316, Tawahi, Aden, Yemen. *Tel:* 22666. *Telex:* 2278 Mawany Ad. *Cables:* Mawany. *Contact:* Director General.

HODEIDAH: 14.48 N. 42.55 E. (See Plan)

Also see "General" before first port.

FLAG: It is essential that from the time they enter Yemen territorial waters all vessels fly the Yemen flag and this should be flown continuously until they leave these waters on sailing. Failure to observe this courtesy may result in a heavy penalty. The design of the flag is red, white and black horizontal stripes of equal size with green star in centre of white stripe.

DOCUMENTS: On arrival 16 copies of Manifests of cargo for discharge are required and each must be endorsed with the word *Correct* by the *Customs Authorities* at the Port of Loading. It is imperative that at least 2 of the 16 copies of Manifests on board the ship should be freighted copies, otherwise 2 additional copies, showing freight details should be airmailed to Hodeidah separately to arrive in advance of the vessel. The Master should also be in possession of 1 copy of each Bill of Lading and certificate to show vessel is not blacklisted.

PILOTAGE: Pilotage is compulsory and as the entrance of the Channel giving access to the Port cannot be observed from the port area itself it is essential that accurate ETAs be given to the Agent in order to avoid delays waiting for a Pilot.

Vessels will be piloted down a dredged channel of about 8 miles in length. The channel, which is buoyed with black starboard and red port buoys, is 7.5 m. deep and 100 m. wide.

Pilot boarding position: Lat. 14° 56′ N., Long. 42° 54′ E.

ANCHORAGE: Masters are also recommended to ensure that on arrival they anchor off the entrance to the new port to await the Pilot and do not anchor off the old port opposite the town some 5 miles to the South and which is still shown as being the Port of Hodeidah on some charts. Vessels anchoring in the wrong area may suffer some delay before they can be contacted and asked to proceed to the correct area. Masters should be advised to anchor at the outer anchorage in the following position: Lat. 14° 55′ N., Long. 42° 54′ E. Also see "Shipmaster's Report - May 1982".

RESTRICTIONS: The approach channel is dredged to 9.5 m.

MAX. SIZE: Max. draft 31 ft. (September 1990). Also see "Shipmaster's Report", dated May 1982 and "Late Reports".

Shipmaster's Report: January 1985.

Entrance channel is buoyed differently to that shown on B.A. Chart (See "Plan"). Pilot suggests that max. draft at LW is approximately 8.0 m., especially if there is a swell at the entrance.

HEALTH: All members of the crew must be vaccinated against yellow fever and cholera, otherwise permission will not be given to disembark.

RADIO: Masters should also ensure that a radio watch is kept to receive calls from the Port Authorities. The Hodeidah Radio Station is operative between 0600 and 1800 hrs. daily, the call sign is: 4WD or 4WD3 (short).

TUGS: 6 tugs, 375 h.p. – 1,800 h.p. Pilot launch 250 h.p. also available to assist.

BERTHING: The quay is 540 m. in length with 4 berths, the first 70 m. long, depth 6 m., the second, third and fourth are of 150 m. length and 8.5 m. depth. *Officially, ships berthing are restricted in length to 180 m.*

The quay is of concrete construction and is well founded, vessels being secured to bollards in the normal manner. Use of rat-guards is recommended. The quay is equipped with 7 electric cranes having a max. capacity of 5 tons and one crane having a max. capacity of 10 tons. Floating crane of 75 tons capacity available.

There is also a dolphin berth for discharging of petroleum products, which is connected by submarine pipes to storage tanks near the port area. The depth alongside is 6 m.

Also see "Report" and "Developments".

STEVEDORES: All labour is provided by Agent's representative including winchmen and tally clerks, but winchmen are provided entirely at ship's risk.

Rates of discharge vary but are quite satisfactory and with bagged cargo the average obtained is 30 tons per hatch per hour. Night work is possible.

Vessels are expected to supply food on board to cargo supervisors, foreman, and tally clerks. It may be left to Master's discretion whether this is supplied, but if not the Agency will have to supply same and the cost will be debited to the vessels.

Working Hours: Normally from 0600 hrs. to 1100 hrs. and again from 1300 hrs. to midnight. Additional work outside these hours, including after midnight can usually be arranged if necessary, although this cannot be guaranteed. Any work after midnight is overtime.

MEDICAL: Hospitals at Hodeidah and Sanaa-Taiz.

FRESH WATER: Available; pumping rate 10 t.p.h.– 15 t.p.h.

FUEL: Small quantities of diesel oil available from Yemen Petroleum.

CONSULS: (and Embassies):

Algeria
China
Egypt
Germany F.R.
Ethiopia
France
Italy
Iraq
Korea
Kuwait
Lebanon
Libya
Saudi Arabia
Syria
U.S.S.R.
United Kingdom
U.S.A.
Yugoslavia

REPAIRS: Light repairs can be carried out.

SURVEYORS: Lloyd's Agency available.

AIRPORT: Flights to Sanaa. Also flights from the new Hodeidah International Airport.

TIME: GMT plus 3 hours.

HOLIDAYS: Friday is the weekly day of rest, Sunday being a normal working day. There are also a number of Moslem holidays. Work is usually possible on such days but cannot be guaranteed. Holidays for special occasions are also liable to be declared at short notice. Friday if worked 50% and public holidays 100% surcharge. During the Moslem fast period of Ramadhan lasting about twenty nine days, which again varies from year to year, work is slower.

Also see "General" before first port.

SHORE LEAVE: Allowed. The Master should prepare a list of persons wishing to go ashore as Agent has to issue I.D. cards.

REGULATIONS: It is strictly forbidden for crew and passengers on board to take photographs while a vessel is in the harbour approaches or secured to the jetty in harbour.

Any vessel which permits oil and/or water to be discharged into the harbour will be liable to a minimum penalty of U.S. $500.

DEVELOPMENTS: A second container berth with length 300 m. and depth 11.0 m. and 1×40 ton container gantry crane has been completed.

Vacuators to be installed for grain handling, giving average daily discharge rate of 5,000 tonnes – 6,000 tonnes.

Also see "Report" below.

REPORT: August 1979 (Updated 1986).

Hodeidah Port is situated 5 km. away from the old town, built in 1961, the population of which is about 200,000. It was built on the Red Sea Coast, S.E. of Khour Ras Alkatheeb, 4 km. away from the town of Hodeidah.

Hodeidah port is built at a location safe from storms and strong winds. The port is under the administration of the Ministry of Public Works, managed by the Hodeidah Port General Corporation. It has a direct connection with the capital city of Yemen, Sana'a, by a modern highway and another connecting Taiz.

The official characteristics of the port are given as an external pool, 10 m. in depth, where ships can anchor. A channel, minimum 45 m. wide, about one km. long and 7.9 m. to 8.3 m. deep, enters into the inner pool. Maximum draft allowed is 25 ft. at HW. Buoy markings and signals for safe entry and departure are available The dimension of the inner pool is irregular, about 500 m.×400 m. Overall depth is 7.6 m. at LLW, except for 100 m. wide strip along the 300 m. berth where the depth is 8.5 m.

The port consists of a quay for loading and discharging and one special jetty for tankers. The total length of the quay is 570 m. forming 4 berths of 120 m., 150 m., 150 m. and 150 m. respectively. The quay can receive vessels up to 180 m. in length with a draft of 25 ft. at HW. The quay is equipped with 4 electric shore cranes of 5 tons maximum lifting capacity each and two mobile cranes each of 30 tons capacity.

Discharging speed for bagged cargo is between 250 tons and 300 tons per hatch per day. For general cargo the discharging speed is about 150 tons per hatch per day.

At present, there are 21,660 sq.m. of cargo storage floor space:

Shed No. 1	45 m.×60 m.	2,700 sq.m.
2	96 m.×60 m.	5,760 sq.m.
3	50 m.×60 m.	3,000 sq.m.
4	50 m.×60 m.	3,000 sq.m.
5	25 m.×60 m.	1,500 sq.m.
6	45 m.×60 m.	2,700 sq.m.
7	50 m.×60 m.	3,000 sq.m.

and several open storage yards for heavy machinery and equipment. There are fuel tanks with a storage capacity of 16,000 cu.m. connected to the oil jetty by means of a pipe-line system. A wireless station for communications, from ship to shore and vice versa, is also available.

Future Development: The development of Hodeidah Port includes:

1. Dredging:
   - a. Deepening of the approach channel to 9.0 m. below MLW (Mean Low Water) with the provisions of a passing bay and deepening of the port basin to 9.0 m. below MLW. (Completed 1980).
   - b. Deepening to a depth of 9.5 m. MLW alongside Berth No. 2 and No. 6 (completed).
   - c. An area to the West of Berth No. 1 to a depth of 4.0 m. MLW.

Hodeidah Port has the following:

Berth No. 1, length 110 m., dredged to 8.0 m.
Berth No. 2, length 150 m., dredged to 9.5 m.
Berth No. 3, length 150 m., dredged to 9.5 m.
Berth No. 4, length 166 m., dredged to 10.0 m.
Berth No. 5, length 195 m., dredged to 10.0 m.
Berth No. 6, length 195 m., dredged to 10.0 m.
Oil berth for 15,000 d.w.t tankers dredged to 10 m.

2. Berth No. 6: 195 m. long berth with a 40 m. wide apron. (Completed 1982). Berth No. 6 is designed for container ships of: 22,500 d.w.t., length 204.0 m., breadth 31.0 m., draft 9.2 m., container capacity 1,522 units.

One container crane of 30.5 tons capacity is installed on Berth No. 6 and is able to load and unload between 30/40 containers per hour.

3. Slipway (completed 1981): 500 ton slipway next to the mechanical workshop. Slipway able to handle vessels 32 m. in length, 10 m. wide and 3.2 m. draft.

4. Paved Storage Areas (completed/available 1981): The concrete paving of open storage areas behind the 40 m. wide apron has approximately 80,000 sq. m.

5. Buildings and other services (completed/available 1981): Construction of service buildings include offices of the Port Corporation, Customs, Labour, First-aid with canteens, wash places and toilets.

6. Oil Terminal (completed/available 1981): 2 new breasting dolphins and 2 mooring buoys for handling tankers up to 15,000 d.w.t.

7. Floating Craft (completed/available 1981): A new 75 ton self-propelled floating crane has been provided.

8. Cargo Handling Equipment (completed/available 1981): 4 high level boom cranes, 1 port type mobile crane, 10 forklifts, 10 tonne trailers with tractors, 3 Ro/Ro tractors with goosenecks and Ro/Ro trailers.

9. Grain Silo Complex: The project under construction in Hodeidah port consists of a 20,000 ton Silo and a 14 stall bagging plant which has a bagging capacity of 200 per hour. The whole installation has a through put of 160,000 tons per year.

10. Water Mains (completed 1982): Extended to Berth No. 6 and fire mains will be from sea water and maintained with a 70 m. head by hydraulic accumulator.

Special Uses:

Berth No. 4 – grain unloading (40% berth occupancy).

Berth No. 6 – containers (with 30.5 ton container crane).

Container capacity will exceed 300,000 tons per year but will depend on the capability to empty containers and create an equivalent to that of the shipping.

Cargo must be carried by ships with a draft less than 9.2 m.

Arrival at Hodeidah/Ras Alkatheeb Ports:

Vessels arriving at Hodeidah Roads should anchor in the following positions inside Buoy No. 2.

Lat. 14° 55′ 58″ N., Long. 42° 53′ 53″ E.

Masters should radio or cable Agent the following information at least 24 hours in advance:

(i) Exact ETA.
(ii) Draft – fore and aft.
(iii) Quantity of cargo on board and distribution.
(iv) GRT, NRT and LOA (When vessel is calling for the first time).

Through Hodeidah Radio Station, Calling Sign: 4WD 500 kHz. (Frequency from 0500 hrs. up to 1700 hrs. GMT). 72 and 48 hours prior notice of arrival can also be given through Aden Radio.

Pilotage on entry and departure is compulsory. Normally, no pilotage is allowed after 1630 hrs., or before 0600 hrs. Hence vessels arriving in Hodeidah Roads after 1630 hrs. may not be piloted in until 0700 hrs. the following morning. Likewise, vessels which do not sail before 1630 hrs. may not be piloted out until 0600 hrs. the following day.

Supply of fresh water and shipchandlering is available.

Documents:

4 copies of Cargo Manifest.
2 copies of Freight Manifest.
1 copy of Bill of Lading.

(These should be airmailed to Agent after departure of vessel from port of loading.)

11 copies of Cargo Manifest.
1 copy of Freight Manifest.

(To be handed over to Agent by Master on arrival of vessel.)

Port Formalities:

1. Doctor.
2. Immigration.
3. Customs.

FOLLOWING TO BE STRONGLY OBSERVED BY ALL MASTER/CREWS OF VESSELS CALLING AT HODEIDAH:

1. Sale of wines and spirits prohibited.
2. Discharging water onto quay and dismantling ships' engines at berth not allowed.

In addition to above, Masters/Crews should be advised to take serious note of all prohibitions stipulated in the Port Tariff, see "General" before first port – "Fines".

SHIPMASTER'S REPORT: May 1982.

I came in and berthed at No. 6 Berth at 8.5 m. draft and discharged via vacuvators direct into lorries and managing a rate of 3,000 t.p.d. Pilot reckoned 29 ft. maximum can be taken in.

Other points in "Guide" seem accurate, but with the Chart B.A. 3050 being too small I cannot see many Masters bringing a large ship into the recommended anchorage position. I anchored 3 cables N.N.E. of the No. 2 Buoy in better water.

PURSER'S REPORT: August 1982.

Requirements:

1 Maritime Declaration of Health. (Any country's (preferably Arab) is accepted suitably amended).
1 Vaccination List (ship's form).
10 Crew Lists (ship's form).
2 Bonded Stores Lists (ship's form).
1 Crew Effects List (ship's form).

Sundry Customs and Agent's forms were brought aboard on arrival. These required the usual information regarding draft, fuel, water, and tonnages, etc.

Customs and Port Authorities were very particular that cargo tonnages were accurate as per Manifest when completing forms.

Customs sealed both bond and beer rooms, but placed no restriction on quantities in bars and cabins with the proviso that alcohol was not sold or given to locals. An additional quantity of bonded items was allowed to be removed before sailing.

Courtesy Ensign: Supplied in the U.S.A. and not marked to show which was top. It should be flown with the red stripe uppermost.

Mail: The Agent advised that mail both in and out of the country was slow and unreliable.

Laundry and Chandlery: Both services available but not used.

Navigation: The Master advises that navigational marks could well change due to berth extensions and port improvements. A container crane is at present under construction.

SHIPMASTER'S REPORT: April 1984.

Pilotage: Ships can enter or sail out of harbour at anytime, if Agent makes strong request. All the buoys in the channel as well as the approaches including the Sea Buoy are lit.

Berthing: Observed a ship entering with 30 ft. draft and Pilot confirmed that vessels can enter up to 30 ft. draft.

Stevedores: Bagged cargo discharging rate increased to up to 30 t.p.h. provided that receivers are able to supply sufficient trucks in time.

The stevedores no longer request drinking water from the ship, as they drink bottled water supplied from shore.

SHIPMASTER'S REPORT: April 1990.

1. There is no Fairway Buoy (Fairway Buoy is indicated on B.A. Chart No. 1990).
2. There is no Buoy No. 2 (Port Authorities instructed vessel to anchor inside Buoy No. 2 in Lat. 14° 55′ 44″ N., Long. 42° 53′ 42″ E. for registration).
3. Authorities/Agent instructed vessel to anchor by Buoy No. 2, but this was unsafe as the depth is 7.7 m.
4. Due to shallow water in anchorage position (inside Buoy No. 2), 2 vessels collided when one of them was trying to anchor.
5. A vessel anchored in the position indicated and ran aground.
6. Our vessel, which berthed port side to at Berth No. 4, grounded forward with a draft of 32 ft. 5 in.
7. The maximum depth in the anchorage position, which was checked was 9.8 m., 3 hours after high water.
8. No ship's certificates were requested by the Port Authorities or the Agent on arrival.
9. No written permission given by Port Authorities for painting ship or load line or for boat drill.
10. Two crew members required cholera vaccinations, but these were not done.
11. A vessel was given verbal permission to paint ship's marks, and after painting was fined U.S.$ 3,000.00.
12. The Master of a vessel was jailed for refusing to instruct his crew to discharge bulk cement from the hold, which were the remains of bags torn by the stevedores.
13. The cook on a vessel was shot by the gangway watchman, for refusing to prepare him food at 2300 hrs.
14. The Port Authority/Agent debited the vessel for one or two shore cranes daily, even though the shore cranes were not working.
15. The evacuator for discharging bulk wheat was damaged by the stevedores, due to bad handling, and the vessel was delayed 32 hours, until a bank guarantee of U.S.$ 200,000.00 was given (actual cost of damage was about U.S.$ 5,000.00).
16. Attention of all Masters and Owners is drawn to the permissable arrival draft which is 32 ft. (salt water). For every inch over 32 ft. the vessel is fined U.S.$ 3,000.00.
17. This vessel was penalised for 5 inches, and had to pay a fine of U.S.$ 18,000.00 without official receipt from the Port Authorities.
18. For further fines and restrictions, please see "General" before first port – "Notice".

AUTHORITY: Ports and Marine Affairs Corporation, P.O.Box 3183, Hodeidah, Yemen. *Telex:* 5565 Mawani Ye. *Contact:* Captain Ali H. Elhabory, Chairman, Captain Ali H. Sharaf, Director-General, Captain Abdullah A. Rajab, Harbour Master.

AGENT: The Hodeidah Shipping & Transport Co. Ltd., P.O.Box 3337, Hodeidah, Yemen. Tel: 2403/4/5. Cables: "Hodship". Telex: 5510 (Hodeidah) and 2218 (Sana'a). Answerback: "Hodship". Branches at Mocha, Saleef, Taiz and Sana'a.

MOCKA: 13.17 N. 43.10 E.

Also see "General" before first port.

Mocka New Port opened in June 1979, with equipment for loading and unloading.

TUGS: 2 available.

BERTHING: 350 m. of quay for vessels of up to 26 ft. draft (Depth 27 ft. Vessels may berth simultaneously. Cargo is discharged direct onto trucks or onto open area. New sheds are under construction.

CRANES: 1×18 ton mobile crane.

FUEL: Not available.

TIME: GMT plus 3 hrs.

REPORT: August 1979 (Updated 1986).

The project of constructing Mocka Port has been in execution since April 1978. The construction was completed during April 1979 and the port was officially opened to International traffic in June 1979.

Location: Mocka is connected to Hodeidah by a road of 240 km. out of which 45 km. is asphalt surfaced. Mocka is also connected to the twin capital of the Republic, Taiz, by a road of 110 km.

Jetty: The port consists of a jetty of 150 m. in length and 35 m. wide with a draft of 8.5 m. during low tide. This jetty can accommodate 2 vessels at a time, each of 150 m. length, on both sides and a Ro/Ro vessel at the head. A protecting jetty for breakwaters is also constructed for controlling the force of strong waves. It is 750 m. in length and 15 m. wide with various depths from 5 m. to 3.5 m. This jetty is constructed for the purpose of protecting the main jetty and can receive coasters and lighters of aforesaid drafts.

Anchorage: The dimension of the manoeuvring area, for vessels securing at berth and departing from the main jetty, is 420 m. The length of the channel leading to the manoeuvring area is 2,000 m. with a draft of 28 ft. 5 in. during low tide, whereas the draft during high tide is about 30 ft. Vessels calling at Mocka should anchor at the following position Lat. 13° 20′ 01″ N., Long. 43° 13′ 02″ E.

Storage of Cargo: The reclaimed area for storage of discharged goods consists of 300,000 sq.m. 4 storage sheds (60 m.×50 m.).

Future Developments: There are plans for building other jetties together with protecting jetties in the near future.

Bunkers: Bunkers, at present, are not available at this port. Any vessel calling at this port is required to supply fresh water for drinking purposes to all labourers during stevedoring operations.

Radio: Vessels calling at Mocka are advised to contact Agent through Hodeidah Radio Station, call sign, 4WD, 500 kHz (frequency from 1500 hrs. up to 1700 hrs. GMT), as, at present, this port is not equipped with a wireless station. It is proposed to establish one during 1979.

SHIPMASTER'S REPORT: August 1980.
Vessel: 6,000 d.w.t., 104.0 m. LOA. Discharged 2,000 tons of RBD palm oil.
Port Limits: None defined, however vessel is in port limits and 'arrived' once anchored within the anchorage marked on B.A. Chart 1955.
Documents: 1 copy Personal Effects Declaration, 1 copy Stores List, 1 copy Inoculations and Vaccinations and at least 10 copies of Cargo Manifests, 3 copies of Crew List.
Anchorages: Vessel anchored safely in a position with the North Fort Barge 103° True −1.74 miles. Vessel's max. draft was 20 ft. and there was 30 ft. of water below the keel at 1 hour before low water. It is inadvisable to proceed further South, especially at night due to the placing of unlit channel marking buoys by the port.
Pilotage: There are presently two berths, one on either side of a finger wharf. The Pilot boards at the anchorage and brings the ship alongside one of these berths. There are 3 Pilots in Hodeidah and 1 in Mocka.
Max. Size and Restrictions: Max. permissible draft is 26 ft. salt water and max. LOA permissible is 500 ft.
Radio: None. The port operates VHF on Channels 16 and 14. There are no fixed hours and the port radio is in operation only when the port wishes to communicate with the vessels.
Radar: None.
Tugs: 2 tugs assist vessels for berthing and unberthing. We were assisted by the 'Markaron' (2,000 h.p.).
Cranes: None. There are mobile cranes available with the prior arrangements of the ship's Agents. Otherwise ship's gear is mainly used.
Stevedores: None in the strictest sense. Labour is recruited by the Agents and made available on board.
Tankers: There is no facility for discharging petroleum cargo.
Density: 1025.
Fresh Water: Not available.
Fuel: Not available.
Fire Precautions: None.
Consuls: None.
Repairs: Not available.
Dry Docks: None.
Surveyors: None.
Watchmen: None.
Customs Allowances: Bonded stores are not sealed. Master is verbally informed not to make any issue from the bonded stores without the Customs permission. All officers and crew who declared their quota were allowed to keep same.
Repatriation: Possible, but local Agent has no knowledge of how to effect it.
Airport: None.
Time: GMT plus 3 hours.
Shore Leave: Allowed. The town is situated about 4 km. from the jetty. There is no entertainment that seamen can find in this town and it is not advisable to be ashore after dusk.
ID Cards: None are issued but ship's personnel going ashore have to carry their Seaman's Book or Passport.

AUTHORITY: Ports and Marine Affairs Corporation, Hodeidah, Yemen.
Contact: Abdelkader Abyadh, Manager of Mocka Port.
AGENT: See "Hodeidah".

MUKALLA (Khalf): 14.31 N. 49.09 E. (See Plan)

SHIPMASTER'S REPORT: August 1984. (Updated 1989).

PORT LIMITS: See "Gulf of Aden Pilot" (No. 64).
DOCUMENTS: See "Aden".
PILOTAGE: Compulsory for all vessels proceeding to and from the Port of Khalf. Call Pilot on VHF Channel 16. Vessels to display international signals day and night.
ANCHORAGES: Pilot Book as mentioned above gives sufficient information. A good practice during July each year (when S.W. monsoon is at its strongest) is to drop a second anchor in the morning and to heave it home again at about 1900 hrs. To keep second anchor out during the whole time of port stay is inadvisable as direction of turning on wind/tide is unpredictable and thus might end up with chains fouled.
APPROACHES: The lighthouse is visible at 18 miles.
RESTRICTIONS: Entering/leaving:
Anchorage: None.
New Port: Daytime only. During S.W. monsoon only between 0600 hrs. and 1100 hrs. and max. LOA 75 m.
MAX. SIZE: Ship's normally accommodated at Khalf Port up to 145 m., drawing max. draft of 8.5 m. Larger ships could be accepted if permission granted in advance by the Port Authority.
HEALTH: As ship arrived from Aden, no formalities whatsoever.
RADIO: All communication before arrival/after departure Aden and Mukalla via Aden Radio (70A). This radio station is working satisfactorily.
Once in port (either at anchorage or alongside) it is forbidden to use ship's radio and/or telex.
Sending cables/telexes via the Agency is time-consuming.
TUGS: At least 1 tug, and probably 2 when port is open for shipping.
BERTHING: 2 alongside berths for up to 10,000 Summer d.w.t. 2 alongside berths for coasters, depth up to 5.0 m.
CRANES: 14 mobile cranes, 3 – 10 tons capacity.
STEVEDORES: Work throughout 24 hours.
MEDICAL: Local hospital available but only a few facilities.
DENSITY: 1026.
FRESH WATER: Will be available in 1989.
FUEL: Will be available in 1989.
REPAIRS: Not available.
CONSULS: None.
SURVEYORS: Available.
FRESH PROVISIONS: Not available.
GANGWAY/DECK WATCHMEN: Not required, no reports of pilferage of cargo and/or ship's stores.
HATCHES: Once open, not necessary to close again except for sailing. Climate: Warm/humid but no rainfall.
CUSTOMS ALLOWANCES: Bonded stores were sealed on arrival, no specific rules, no search parties of Customs.
On departure: No check of seals.
REPATRIATION: *Crew Change:*
Out-going: Via Mukalla Airport to Aden (6 times a week except Fridays) then either via Jeddah or Dubai/Kuwait to ultimate destination.
In-coming: Very difficult as visa required and not easy to obtain.
Note: Flights Mukalla-Aden and vice-versa may differ from printed timetables.
AIRPORT: Located at Rayan, 29 km. East of Mukalla.
BANKS: National Bank of Yemen. Local currency: Dinar.
On presentation of passport-receipt, U.S.$ (and only this currency) can be exchanged for Dinars (approximately U.S.$3 for 1 Dinar).
It is very difficult to obtain U.S. dollars in exchange for Dinars.
STORES: Not available.
SHIP SUPPLY SERVICE: See "Aden".
SHORE LEAVE: In Mukalla (as well as in Aden) when passing Customs Gate, Passport is exchanged for receipt by the Immigration Officer on duty. When returning from shore leave this receipt is again exchanged for Passport.
Note: It is difficult to make Officials understand that crew members and/or visitors from abroad are not in possession of a receipt, which makes a crew change extra time consuming (Charterer had to wait 3 hours before he was allowed to proceed to the ship).
DELAYS: At present congestion may occur during the S.W. Monsoon period.
In future congestion may occur as infrastructure of the new port leaves much to be desired (Roads to/in/from the port, direct delivery etc.).
GENERAL: *Transit Time Airmail Post:*
Mukalla-Europe: Minimum 2 weeks, maximum 3 weeks.
Europe-Mukalla: Minimum 2 weeks, maximum 3 weeks.
Agency: National Shipping Co., P.O.Box 8039, Mukalla, Yemen. Cables: "Natship Mukalla" (via Aden Radio).
Importer: National Company for Home Trade, 5th Government Branch, Mukalla.

SHIPMASTER'S REPORT: April 1985.

PORT LIMITS: The port limits extend in a 270° direction from Ras Marbat for 2.5 miles, thence 000° along Long. 49° 07′ E. to the coast.
PILOTAGE: Pilot boards from launch, off the breakwater.
ANCHORAGE: For vessels over 10,000 d.w.t. all cargo is handled at the anchorage which may be closed from May to October due to its exposure to the S.W. Monsoon. Holding ground is reported to be variable. Reasonable anchorage obtained in 27 fathoms in position Lat. 14° 30.8′ N., Long. 49° 08.3′ E. approximately 5 cables due South of rocky projection on which part of town is built. Requests will be made to anchor closer to the shore to reduce barge transit time.
APPROACHES: Charts B.A. 3784 and 10.
Prominent terrain affords reasonable radar positions. Careful consideration should be given to night-time arrival if without radar due to the total absence of navigational aids at both the port and adjacent coastlines. The white house at Point Ras Marbat and the 4 tower ruins above the town are charted and conspicuous from seaward.
RESTRICTIONS: Berthing during daylight hours only.
MAX. SIZE: Max. size 10,000 d.w.t. Max. draft 8.5 m.
VHF: Channel 16 for Port Authority, call sign "Mukalla Harbour Master".
Agent can be contacted by calling Mukalla Harbour Office on Channel 16.
TUGS: One Voith Schneider tug of 2,000 h.p. Reportedly to be replaced by 2×1,000 b.h.p. tugs shortly.
BERTHING:

Berth	*Length* (m.)	*Depth* (m.)
No. 1	177.25	9.15
No. 2	184.00	9.15
Fisheries	160.00	4.50

Turning Basin: Width 250 m. Depth 10 m.
Harbour Entrance: Approx. width 200 m. Depth 11 m.
Lighters: 4×200 tonnes, 4×60 tonnes and 2×400 tonnes, all plus or minus 10% subject to swell conditions. Lighters are discharged either at Khalf Harbour or at town quay located on West side of town, rocky projection in position Lat. 14° 31.5′ N., Long. 49° 08.2′ E. Town quay is restricted in size and served by mobile cranes.
Stevedores: Labour is available 6 days a week, Saturday to Thursday inclusive.
Morning shift: 0700 – 1230 hrs. Afternoon Shift: 1300 until lighters are full.
The afternoon shift is unpredictable and subject to lighters being available.
Medical: Local hospital affords basic medical requirements.
Fresh Water: Not available.
Fuel: Not available.
Shore Leave: Restricted by curfew to between 0800 – 1200 hrs. and 1600 – 1900 hrs. All persons going ashore are required to exchange Passport for local pass at Immigration.

GENERAL:
Harbour: Khalf Harbour, recently completed and as yet uncharted (see "Plan") provides 2 commercial jetties and a fisheries jetty.
Swell: Reportedly maximum 20 cm. in S.W. Monsoon.
Provisions: None available with the exception of individual purchases of fruit or poor quality vegetables available from market stalls ashore. Fishing good from ship's rail and crayfish, etc. obtainable from local fishing boats.
Launch: By prior arrangement with Agent only. Special dispensation can be obtained from Harbour Master to utilise ship's lifeboat. Barges can be used if other arrangements do not materialise.
Communications: By cable only. Telephone system is reported to be unreliable.
Port Officials: Immigration and Customs Officials board on arrival. Passports or Seaman's Cards are sighted. Bond Locker and Beer Room sealed but sufficient released for shipboard consumption.

Usual port papers required.

Agency: The National Shipping Co., Mukalla, Yemen. Cables: "Natship, Mukalla". Telex: None, but reported to be planned.

NISHTUN: 15.50 N. 52.12 E. (See Plan)

DOCUMENTS: See "Aden".
PILOTAGE: Compulsory. Manoeuvring during day time only. There is a lighthouse, range 28 miles, flashing 10 sec. in position Lat. 15° 49.0′ N., Long. 52° 12′ E. Also the breakwater tower has a flashing green light.
ANCHORAGES: Ships waiting for berthing normally anchor 4 – 5 cables S.E. of the breakwater tower and clear of the harbour entrance.
MAX. SIZE: Maximum size of ship that can be accommodated is up to 3,000 d.w.t., 90 m. LOA and 5.0 m. draft. For ships over such size special permission should be obtained from Port Officer and Director of Marine Affairs.
VHF: Vessels approaching Port of Nishtun can communicate with Port Authority by using Channel 16 for calling during official working hours 0700 – 1400 hrs. (local time) .
BERTHING: Length of quay 220 m.
CRANES: 2×3 tons – 17.5 tons mobile cranes.
MEDICAL: Limited facilities available.
FRESH WATER: Available in small quantities.
FUEL: Not available.
AIRPORT: Located at Al-Gaidah, 40 km. to the East of Nishtun.
WEATHER: *Monsoon:* During S.W. Monsoon waves may break over breakwater. Swell is created in basin so extra precautions by ships' Masters regarding mooring and securing the ship against the quay are required and extra ropes or wires are necessary.
AUTHORITY: See "Aden".

RAS ALKATHEEB: 14.55 N. 42.53 E.

Also see "General" before first port.

The Port of Ras Alkatheeb is situated 14 km. from the main city of Hodeidah and connected by a gravel road which is in the process of being resurfaced and broadened with two traffic lanes on the same alignment, thus providing a first class road transport link between Hodeidah and Ras Alkatheeb. Also see "Hodeidah".
BERTHING: The port has a berth 270 m. in length and 27 m. wide, pontoon type, with ships berthing on either side. This port can receive vessels with a max. draft of 26 ft. at high tide. Vessels can be secured to barges and coasters with a draft of 14 ft. which can be connected to the shore, thus enabling ships to discharge directly onto waiting trucks. Said pontoon is mainly used for bagged cargo on direct delivery basis.

Presently, this port does not have shore crane facilities and all unloading is done with ship's own gear.

Storage and Delivery: Due to lack of storage facilities at this port, delivery at present, is given directly under the hook.
GENERAL: The port is not a commercial port.

SHIPMASTER'S REPORT: November 1980.

1. Port does not accept Vessel's Registration until vessel is anchored between Buoy No. 1 and No. 2. This as per the Port Radio VHF station.
2. Buoy No. 2 is placed about 6 cables N.N.W. of charted position.
3. Do not attempt entry at night since buoys are unlit and there are many uncharted stranded wrecks visible only during daytime.
4. Tugs available: 4×700 b.h.p. and 3×1,800 b.h.p. Pilotage only during daytime.
5. Vessel berthed at Ras Khatib pontoon. Max. draft 8.0 m., total effective length of pontoon 270 m.
6. Port issues a directive to Agents giving estimated time to discharge. If not completed, port charges at the rate of 4 Rials/per metre/per hour of stay extended.
7. Distance from Ras Khatib berth to town 15 km. Only 10 to 15 shore leave passes given to vessel, regardless of number of crew.
8. No chipping and scraping permitted but painting is allowed.
9. Fresh water inside port is $4/– per ton, at Ras Khatib $20/– per ton by barge.
10. Provisions available but expensive.
11. Repatriation possible but very difficult due to having to obtain permission from Saana.
12. Cargo work is fast, 260 tonnes of cement per gang per day. Normal shift 0730 – 1200 hrs. and 1500 – 2330 hrs.
13. As per "Pilot", there will be dredging carried out soon and also lighted buoys will be placed.
14. Ras Khatib light Fl. 3 sec. of very low power.
15. Yellow fever inoculation not compulsory unless coming from infected area.

RAS ISA MARINE TERMINAL: 15.08 N. 42.36 E. (See Plan)

LOCATION:

a. The Floating Storage and Offloading Terminal (FSO) "Safer" (400,000 d.w.t.) is located approximately 4.8 nautical miles offshore from Ras Isa in position: Lat. 15° 07′ N., Long. 42° 36′ E.
b. An area designated as the Holding Anchorage for vessels waiting to load at the Ras Isa Marine Terminal is located to the Southwest of the Terminal and is a circle of 1 mile radius centered on position: Lat. 15° 05.5′ N., Long. 42° 34.5′ E.

Yemen Hunt Oil Company (YHOC) is the only operator of the Ras Isa Marine Terminal.
Also see "Notice".

NOTICE: B.A. Notice – Week No. 8/88
Issued by Port and Marine Affairs Corporation, Yemen.

Ras Isa Storage and Offloading Terminal is situated 3.5 miles SSE of Rashshah (11.53). The terminal consists of the 400,000 d.w.t. tanker "Safer" moored permanently to a tanker mooring buoy. A *restricted area*, 2 miles in radius, is centred on the tanker.

A waiting anchorage, whose limits can be seen on the chart, is situated 6.5 miles South of Rashshah.

Before proceeding to the anchorage or terminal, vessels must contact the terminal and Al Hudaydah Port Authority on VHF for anchoring and Pilot boarding instructions.

PILOTAGE: Vessels proceeding to and leaving the Ras Isa Marine Terminal (except for small launches and other craft regularly plying within the Marine Terminal Area) must utilise the service of a licensed Pilot provided by the General Corporation for Ports and Marine Affairs in Hodeidah, which the Terminal will arrange.

Masters of ships coming from sea may anchor or if proceeding to sea may leave from the Holding Anchorage without the assistance of a Pilot.

Masters must sign the Pilot's Indemnity Certificate before the vessel gets underway or manoeuvring commences. Ships using Ras Isa Marine Terminal will be liable for any damage caused by the ship to the Terminal or to any of YEPC's property or to any other vessel lying therein, whether or not a Pilot was assisting at the time.

Pilot Embarking/Disembarking: For ships not located alongside the Terminal the Pilot shall embark or disembark by means of a pilot ladder when the freeboard does not exceed 9 m. (30 ft.), when the freeboard exceeds such measurement, by a combination of accommodation ladder and pilot ladder. It is the responsibility of the ship to ensure that ladder arrangements shall conform to the requirements of SOLAS 1974 Chapter V, Regulation 17. A Pilot may refuse to board a ship if the means of access does not conform to the above.

If the Pilot agrees, a pilot hoist may be used in lieu of an accommodation ladder and pilot ladder but a standard pilot ladder shall be immediately available in the event of a failure of the pilot hoist. Ship's engines must be stopped while the Pilot is transferring from the tug or launch to the ship or vice versa. As a general rule, the Pilot will board the vessel about 2 miles off the Ras Isa Marine Terminal.

Emergency Pilot Ladder: As soon as vessel is berthed, a pilot ladder should be rigged over her starboard side just forward of the poop and end must be kept just above water level throughout the stay alongside so that in an emergency which makes boarding from the Terminal impossible, the Berthing Master could board the ship.

NOTICE OF READINESS: The ship's Notice of Readiness (N.O.R.) will be signed by the Loading Master upon mooring of the export tanker, for acceptance if the time tendered is consistent with the time the Pilot embarked, and for receipt only if an earlier time is tendered.

If it is subsequently found that the export tanker was not, in all respects, ready to load due to, for example, high O_2 readings in inert gas in cargo tanks or due to excessive deballasting time or other preparation for the nominated cargo a Note of Protest will be delivered to the export tanker which will automaticaly cancel operator's initial acceptance of the Notice of Readiness. In such cases, the export tanker must prepare a revised N.O.R., cancelling the first one and stating a time tendered in accordance with its actual readiness.

APPROACHES: *Permission to Enter Ras Isa Marine Terminal Area:* No ship, tug, barge, launch or other craft shall enter the Ras Isa Marine Terminal Area, including the Holding Anchorage, without first obtaining the permission of the Oil Movements Control Centre aboard the Terminal (call "YHOC Marine" on VHF Channel 16).

ANCHORAGE: A water depth of about 20 fathoms (37 m.) is available at the Holding Anchorage. Should "YHOC Marine Sana'a" by cable telex or "YHOC Marine" by VHF advise the export tanker or any other vessel to anchor on arrival, the ship shall anchor only in the Holding Anchorage. The Holding Anchorage may, with the prior agreement of YHOC, be used to carry out repairs requiring shore labour or the attendance of shore representatives or surveyors and for ships storing.
RADIO: *ETA Requirements:* Export tankers shall advise their ETA upon departure from their last load or discharge port or other port or if at sea as soon as orders are received to proceed to Ras Isa and repeat at 72 hours, 48 hours and 24 hours in advance of arrival via Hodeidah Radio Station to the Cable Address "YHOC Marine Sana'a" or Telex No. 4013 Vessels equipped with INMARSAT Satellite Communications may address their telex(es) to "YHOC Marine" INMARSAT Telex No. 873-1104125 and shall call the Terminal on VHF Channel 16 when within range.

See "Pre-Arrival Information Required" on cargo and ballast operations below.

If a ship seeking to enter the Terminal has received damage and/or is leaking oil, this must be advised in the ETA advice so that the ship can be inspected by YHOC before entering the Terminal Area.

Pre-Arrival Information Required: All export tankers scheduled to load at the Ras Isa Marine Terminal will receive the following telex:

Telex to Master

Master ______________
We hold your nomination for approximate ______________
bbls. at 60° ALIF Crude for discharge ______________
Approximate API ________
Following information needed:
AAA Cargo quantity you able to load.
BBB Last cargo carried and if crude, source of origin.
CCC Quantity and grade of any transit cargo on board.
DDD Quantity of dirty ballast to pump to terminal and estimated time to deballast via 1×16 in. hose (max. pressure at rail 70 p.s.i.)
EEE Quantity and type of slop onboard to lot, segregate on board or pump to terminal.
FFF Maximum acceptable loading rate.
GGG Arrival draft (trim not to exceed 10 ft. or 3 m. by stern).
HHH Deepest sailing draft.
III Advise ability to simultaneously load and deballast with double valve separation throughout.
JJJ Confirm latest edition of I.S.G.O.T.T. Safety Guide and OCIMF Ship to Ship Transfer Guide are onboard.
Repeat your ETA 72, 48 and 24 hours in advance of arrival via Hodeidah Radio to "YHOC Sana'a" or to "YHOC Marine" via INMARSAT.
Satellite to Telex No. 873-1473102. When within range contact YHOC Marine on VHF Channel 16.
On arrival have your pilot ladder ready on starboard side for Berthing Master boarding and your port boom (SWL rating of minimum 10 tons) rigged for 16 in. hoses handling purposes.
Confirm your Inert Gas System is in good working condition, maintaining O_2 content less than 8% by volume in cargo tanks.
Operational/Safety Check Lists as per OCIMF Ship to Ship Transfer Guide will be followed when VHF contact is established.
Terminal requires readiness of 4×16 in. ASA manifold connections.
Signed
Ras Isa Terminal

Ship's Master should radio the requested information as promptly as possible and comply with Terminal's instructions accordingly.

TUGS: Tugs are provided by the Terminal and their use, when required by the Pilot, is compulsory. Towlines are provided by the tugs. Before the tugs are made fast, Masters must sign the Tug Services Report and Agreement presented by the Pilot on boarding.

Communications Between Ships and Tugs: Communications between ships and tugs during manoeuvring are normally carried out on VHF Channel 12, the English language being used.

In case of a loss of VHF contact the following signals can be made on the ship's whistle or siren:

Forward Tugs (alongside or on hook):
1 short blast –
Tug alongside the starboard side – push against the hull
Tug on hook – pull bow to port.
2 short blasts –
Tug alongside starboard side – pull on beam (backing)
Tug on hook – pull to starboard.

3 or more short blasts – stop tug engines.
Aft Tugs (alongside, or on hook):
1 prolonged blast followed by 1 short blast –
Tug alongside starboard quarter – push against the hull
Tug on hook – pull stern to port.

1 prolonged blast followed by 2 short blasts –
Tug alongside starboard side – pull on beam (backing)

1 prolonged blast followed by 3 or more short blasts –
Stop tug engines.

It is emphasised that whistle signal form of communication between ship and tugs is for emergency use only and that, if possible, manoeuvres should be aborted or suspended until VHF contact is again possible.

BERTHING: *Use of Anchors:* The anchors will not normally be used in the berthing/unberthing manoeuvring operation. The anchors should be ready to the extent that the "at sea lashings" are removed but riding pawls remain engaged on the anchor chains and the windlass/wildcat brakes are hardened up tight.

Berthing Operations: The export tanker will moor with its port side alongside the starboard side of the Terminal. For this purpose the Terminal has been fitted with 5 large heavy duty pneumatic fenders and may also use smaller secondary fenders positioned forward and aft of the large size fender string. The mooring method is of conventional design with the ship passing its own lines to the Terminal. See "Plan" for a typical mooring diagram.

Prior to berthing, the Terminal Loading Master will inspect the export tanker's mooring equipment and jointly with the Pilot discuss the berthing and mooring operations with the Master and ascertain that the export tanker is fully manoeuverable. Mooring wires fitted with 10 m. length synthetic tails connected to the wires by means of a Mandal or Toensberg type shackle are preferred. An all synthetic mooring line arrangement may be accepted subject to an assessment of rope elasticity, strength characteristics and wear and tear. The vessel shall have heaving lines ready, including at least 1×4 in. circumference messenger line on the portside foredeck and on the poop.

After ensuring that the manoeuvring area is clear of other traffic and that weather and sea conditions are suitable, the export tanker will be manoeuvred for approach to the Terminal. The heading of the export tanker will normally be such that she will have the wind ahead but tidal current effects may have to be taken into account. 2 tugs of about tons and 40 tons bollard pull will normally assist in the berthing/unberthing manoeuvres.

Safety of Moorings: The export tanker must be securely moored to the satisfaction of the Terminal. No cargo/ballast hoses will be connected until the export tanker is securely moored. Moorings on winch drums shall be securely braked off; self-tensioning devices are not allowed. Export tankers which use self-stowing mooring winches must ensure that the wires are correctly reeled to assist the brake. On split drum winches the number of layers or wire on the working drum shall not exceed 2, when the wire is taut and the export tanker in a fully loaded condition. Moorings of a different type (e.g. one wire line and one synthetic line) shall not be sent out to the same set of bollards because of the different elasticity. Moorings shall be monitored and kept taut by the export tanker crew and the export tanker maintained in her correct position and in contact with the berth fendering throughout deballasting/loading operations. The Terminal Loading Master is fully authorised to stop operations and disconnect cargo hoses if moorings are seen to require attention or if the export tanker is not kept in position and in contact with the fendering or if the export tanker violates any other safe mooring practices.

Emergency Towing Off Wires: On completion of mooring alongside the Terminal, the export tanker shall provide 2 towing wires of adequate strength and condition.

The towing wires will be secured to the offside bow and quarter bollards respectively, with eyes run out and maintained at or near the waterline.

Synthetic ropes are not acceptable as replacement for emergency towing-off wires.

Gangway and Accommodation Ladder: The Terminal may supply a gangway of approximately 18 m. length and a safety net which will be rigged to provide safe access between the Terminal and the export tanker.

The export tanker should have its starboard side accommodation ladder ready for lowering out and use for both the embarkation of the Pilot on arrival in conjunction with a pilot ladder where the freeboard exceeds 9 m. and for contingency use while alongside the Terminal.

The Operator will not be liable for accidents to ship's personnel and visitors while using the Terminal gangway. If, for any reason, the Terminal gangway is not available, the ship may be required to use her gangway or accommodation ladder. This requires close consultation between the export tanker and Terminal Loading Master.

State of Readiness of Export Tanker and Any Other Ship Alongside: No repairs or work which will make the export tanker and or other ship unable to move under its own power may be commenced without the written consent of the Terminal Loading Master or his authorised deputy. In general, such consent will be refused as, for the safety of the terminal, it is essential that the export tanker and any other ship maintain their propulsion, steering and other equipment required for unmooring and manoeuvring fully operational throughout their stay alongside. In cases where, through Force Majeure, a ship becomes immobilised while alongside, the Master must immediately advise the Terminal Loading Master and "YHOC Marine" by VHF or UHF of the facts so that a decision may be made on the advisability of continuing with cargo operations and so that special precautions can be taken.

Ship/Terminal Communications While Alongside: The Pilot or the Loading Master on boarding before berthing, will bring with him a portable UHF radio set (walkie talkie) which he will use during the mooring operation and, before leaving the ship, will place it under the care of the export tanker Master. This set will remain on board throughout the export tanker's stay alongside and must then be handed back to the Pilot who sails the ship.

The UHF set is to remain open so that the export tanker and the Terminal can make radio contact on a dedicated radio frequency at all times. The set can also be used to advise time ballast is discharged, tank inspection is required, standby or stopping loading pumps, etc. The set must not be used for communicating with other parties and must be used responsibly. Should the set be damaged or lost while under the care of the ship, the cost of a replacement will be billed to the ship's owner. The export tanker should call the Terminal Loading Master if there is evidence that the battery is getting low or the set is operating unsatisfactorily.

LOADING: *Manifold Requirements:* Ships whose cargo manifolds conform to the OCIMF "Standards for Tanker Manifolds and Associated Equipment" should have no difficulty at the Marine Terminal. Basic requirements for manifolds at the Marine Terminal are 4×16 in. ASA steel cargo manifolds.

Note: All bolted flange connections shall be fully bolted. Skip bolting is not permitted.

Connecting Hoses/Cargo Boom Readiness: The port side cargo boom (derrick or crane) with a SWL rating of at least 10 tonnes shall be rigged and centered over the manifold prior to berthing alongside. The ship's crew shall connect the hoses assisted by Terminal hose handling personnel. The FSO "Safer" has a 25 tonne SWL rating crane which will lift up to 3×16 in. hoses.

Cargo Meeting: Upon the export tanker's arrival alongside the Terminal, a cargo meeting will be held between Terminal representative and ship's Master (or his appointed representative) and the Chief Officer on deballasting/cargo operations procedures, tanks inspection before/after deballasting, cargo calculations and preparation of documentation involved.

No deballasting/cargo loading should start until both parties agree on items discussed in this meeting.

Tank Inspection Before Loading: Before loading or before deballasting overboard, tanks will be inspected by a Marine Terminal representative, who, with the assistance of ship's personnel, will dip the tanks, check for water content and calculate the ROB (Remaining on Board).

The Marine Terminal representative will fill in the appropriate forms, which will be submitted to the ship's Master for acceptance and signature. Copy of such documents will be left onboard the vessel.

No Dry Certificate will be issued by the Terminal representative.

OBO Ships – Precautions in Cargo and Ballast Handling: Because of the frequently encountered large free surfaces of cargo tanks (holds) onboard combination carriers, particular care should be exercised when loading cargo or discharging ballast, in order to ensure that total free surface effect of cargo/ballast tanks is kept within safety limits.

Stability data on loading and deballasting instructions should be available onboard and discussed upon vessel's arrival between ship's Master and Terminal Loading Master.

In addition to the above, a pre-arrival plan of trim and transverse stability during cargo and ballast operations should be prepared by the Master and cabled to "YHOC Marine" upon request by the Terminal.

Plan of operations should include data on loading rate limitations, manifolds size and characteristics, deballasting rates and IGS operability.

It will be ship's Master's responsibility to maintain the vessel with no list while loading cargo/discharging ballast.

Safety conventional measures for combination carriers are applicable and Ship's Master should refer to the I.C.S./O.C.I.M.F. "International Safety Guide for Oil Tankers and Terminals", Chapter Eleven.

Loading Operations: All loading operations are conducted using pumps, therefore ship's Masters are warned of the serious consequences of closing or partially closing valves against the incoming oil flow.

At all times during loading operations, a responsible officer shall be in charge of operations onboard the export tankers, either on deck or in the cargo control room. On export tankers with a cargo control room, the deck must be continuously patrolled by a watchman in contact with the cargo control room.

When the export tanker is in all respects ready to receive cargo, the Terminal should be notified. Cargo loading will start at low rate until ship's officer will confirm that cargo is flowing into the appropriate tanks. At this time the flow will be increased until the agreed rate is reached.

Cargo oil transfer will not be started unless the export tanker and the terminal manifold stations are manned.

Maximum Loading Rate that may be Reached: FSO "Safer" pumping via 3×16 in. hoses – 100,000 bbls./hour.

The actual loading rate will depend on the agreed maximum rate, the quantity of cargo to be loaded and other operational factors such as the export tanker cargo tank venting capacity.

The loading rate can be reduced at any time (i.e. during topping-off of tanks or any other circumstance). At least a 10 minute "stand-by" notice should be given by the export tanker when loading nears completion.

Emergency Stopping of Pumps: During loading operations, upon request from export tanker personnel, if an emergency arises, Loading Master will stop pumping. Terminal pumps, in emergency, can be stopped almost immediately.

During deballasting operations, the export tanker should be able at any time to immediately stop her pump(s) in emergency, upon request by the Terminal or when situation warrants.

As communications between the parties involved are extremely important, UHF radio contact should be frequently checked.

If contact between Terminal and export tanker is lost, all operations should be stopped until corrective action is taken and communications restored.

Cargo Measurement:

(a) The Terminal uses the measurement standards published in the:
 Manual of Petroleum
 Measurement Standards
 Chapter 17 – Marine Measurement
 Section 1 – Guidelines for Marine Cargo Inspection
 Second Edition, January 1986
 American Petroleum Institute
 The guidelines presented in the above publication are intended to encourage the use of uniform petroleum cargo measurements for crude export cargoes through the Ras Isa Marine Terminal.

(b) The Terminal will use Table 6A – API Standard 2540 (equivalents: IP200, ASTM D1250 and ANSI/ASTM D1250) for calculations of measured quantities of crude pumped into the export tanker. Export tankers should have the following publication available onboard:
 Manual of Petroleum
 Measurement Standards
 Chapter 11.1 Volume Correction Factors
 Volume 1
 Table 5A
 Table 6A
 API Standard 2540
 First Edition, August 1980
 American Petroleum Institute

(c) Immediately after completion of loading, the export tanker's cargo figures should be calculated by the ship's officer-in-charge.

(d) A Marine Terminal representative will witness such operations (i.e. ullaging, temperature control, etc.) and he will fill in all documents involved. Copy of such documents will be left onboard.

Logging Times of Operations: All operations will be logged and a "time log" sheet will be filled in before the export tanker's departure and signed by the Master and the Terminal representative. Both parties will keep a copy of such "time log".

Early Departure Procedures: At present Early Departure Procedure will not be carried out. It is however the Terminal's intention to use this service, which provides a quick departure and permits a faster turnaround, in the near future.

BALLAST: *Ballast and Loaded Draft Requirements:* Export tankers in ballast or in partly laden condition shall arrive, for safe handling in all normal weather conditions, with sufficient draft for full immersion of the propeller(s) and a trim not exceeding 10 ft. (3.0 m.) by the stern. Any angle of list will not be accepted. Export tankers sailing with a part cargo are also recommended to conform to the above draft and trim condition.

In special circumstances and in very good weather conditions it may be possible to safely handle export tankers with less draft and/or a different trim than those recommended above. In these cases Masters should consult with the Ras Isa Marine Terminal Oil Movement Control Centre by VHF call to "YHOC Marine".

Deballasting Facilities: After February 29th, 1988, all dirty ballast must be discharged into the Terminal dirty ballast reception tanks or retained aboard; however the capacity of the reception facilities is limited to about 50,000 metric tons maximum. All clean, oil-free ballast should be discharged overboard; the responsibility for avoiding oil pollution rests with the export tanker. The ballast in cargo tanks and segregated ballast tanks for overboard discharge will be inspected and sampled by the Terminal representative before permission is granted for deballasting to commence. The ballast samples will be checked for oil in water content and the findings advised to the ship's Master. An oil in water content exceeding 15 p.p.m. will result in a "Dirty Ballast" Declaration with no overboard discharge permitted. YHOC will not entertain any claims for deadfreight so caused. Export tankers may be required by their operators/charterers to arrive with clean ballast and consolidated slops.

Inert Gas Systems: All export tankers loading crude oil at the Marine Terminal must have an effectively working Inert Gas System in compliance with SOLAS 1974 Convention, Chapter II, Part D and the Master shall confirm before berthing that the Inert Gas System is working correctly, i.e. maintaining positive pressure on all tanks with the oxygen content of the inert gas less than 8% by volume. On arrival alongside export tankers will be asked to depressurise tanks sufficiently to allow up to 3 ullage ports to be open at any one time for the purpose of gauging, sampling, waterfinding, temperature taking, tank inspection, etc., but ullage ports must be re-secured before cargo or ballast handling is commenced.

Export tankers equipped with Vapour Lock tank dipping/sounding devices are not required to depressurise the tanks when gauging, temperature taking and water finding. During deballasting, the IGS must be capable of producing sufficient inert gas of 8% or less oxygen quality to prevent air from entering the tanks.

If the IGS is not operable, deballasting from cargo oil tanks will not be allowed to commence. If during deballasting, the IGS fails, the deballasting must be stopped until the plant is again operational; if this repair is likely to take more than 24 hours, the ships' owners and/or charterers must be contacted and a safe deballasting/loading plan should be agreed by both parties, before operations are resumed.

When loading or deballasting into an inerted tank, the inert gas displaced must be vented through the ship's vent system and not the ullage ports.

Maximum Allowable Pressure: The export tanker must never exceed the maximum allowable pressure on its cargo piping system and make sure the loading rate is fully agreed. While discharging ballast to the Terminal, the export tanker should not exceed 70 p.s.i. at its manifold.

MEDICAL: No doctor or clinic, however, in emergencies, Terminal will attempt to assist.

Also see "Helicopter".

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: None locally.

REPAIRS: No facilities available.

REPATRIATION: No facilities available.

SHORE LEAVE: Not permitted.

HELICOPTER: *Helicopter Operations/Precautions:* Helicopter service for embarking/disembarking a Pilot or any other personnel from the export tanker and any other vessel is not available.

Transfer of personnel by helicopter from ships located within the Terminal area may be carried out only in emergency (i.e. evacuation of injured crew member) and subject to availability of a helicopter. The helicopter service will be for account of the export tanker.

The ship's Master requesting helicopter service for emergency evacuation of injured crew member should:

1. Contact the Terminal Oil Movement Control Room by UHF/VHF and ask for emergency medical evacuation.
2. Give to Terminal the information listed under "Addendum A" hereto. The Terminal will pass this to the doctor located ashore.
3. Provide continuous radio watch on VHF Channel 16, VHF-FM (156.8 MHz) or 2182 kHz. Voice contact with helicopter should be established as soon as helicopter approaches the area.
4. Ensure the selected hoist area onboard the vessel is clear, advise the helicopter of the pick-up area before it arrives.
5. If alongside the terminal, stop all deballasting/loading operations upon previous agreement with the terminal, before the helicopter approaches.
6. If the hoist is at night, light the pick-up area as well as possible. Do not shine any lights on the helicopter because they will blind the Pilot.
7. Ensure all operational requirements on deck are as per guidelines issued by the "International Chamber of Shipping – Guide to Helicopter/Ship Operations".

"Addendum A"

Information on patient needed for medical evacuation.

1. What are the symptoms of the illness? (Or give a description of injury).
2. When did they start (or occur)?
3. Can the patient walk?
4. Temperature or pulse readings?
5. Any vomiting or diarrhoea?
6. Any swelling or pain? (Give location).
7. What medication have you given?
8. What is the general condition of the patient?
9. What have you done for the patient and what first aid equipment medicine do you have onboard?
10. Age, name and nationality of the patient.

SECURITY: *General:* The Terminal will take prudent and reasonable security measures consistent with security threats and risk inherent in each particular situation.

Security Area: The security area covered is indicated by the encircled area on the map, (see "Plan").

Access Control: Access to the Terminal, the export tanker(s) or any other vessel will be controlled by:

1. Employee and visitor pass system.
2. Property pass system (spare parts, stores, provisions and other material).
3. Random search of personnel and vessels if necessary.

Communications: In addition to the use of the ship-to-shore radio telephone system, the Terminal will utilise walkie talkies for communications with the YHOC shore staff and local law enforcement authorities.

Responsibilities of the Export Tanker: The responsibilities of the export tanker or any other ship should at a minimum be along the following lines:

The Master of the export tanker is responsible for gangway access control to the vessel, surveillance onboard the vessel and surveillance of the water surrounding the vessel. It is his responsibility to provide the Terminal Manager with a manifest of crew members and list of authorised visitors to the vessel. The Master should also institute a system of package control to include the issuance of appropriate property passes for items authorised to leave his vessel.

Throughout the vessel's stay alongside, a gangway watch should be maintained. The gangway security watchmen should ensure:

(a) Unauthorised persons are excluded from the vessel.
(b) Authorised persons are logged on and off the vessel.
(c) If necessary, conduct checks of baggage and packages being brought on to or taken off the vessel.

Responsibilities of the Terminal: The Manager of the Terminal is responsible for all Security activities in the Terminal area. The Terminal will advise the Master of the vessel of his responsibilities.

It is important that the Terminal advise the Master as soon as possible of any special circumstances which might necessitate special Security precautions. Conversely, the Master of the vessel should also inform the Terminal of the Security status procedures onboard in accordance with the Vessel Security Guidelines.

GENERAL: *Services:* The Terminal is located offshore, and the only means of transportation available to the shore is by Terminal Support Craft to the Port of Hodeidah situated about 30 nautical miles to the South. Therefore, the Terminal can offer no logistical support. At present there are no facilities for providing provisions, stores or spare parts.

Only authorised personnel are permitted to board export tankers and any other ship while berthed.

Export tankers requiring urgent services (Owner's items) should establish contact with local Port Agents at the Port of Hodeidah for delivery offshore and at the Holding Anchorage, which if the latter is utilised should be reported to "YHOC Marine" via VHF radio telephone for clearance to use this anchorage.

Charts: Charts covering the approach to and from the area of the Ras Isa Marine Terminal are: British Admiralty Nos. 141, 542, 548 and U.S. Hydrographic Office Nos. 62285, 62290, 62292.

Tides and Current: It is suggested that vessels consult the British Admiralty Pilot Book N.P. 64, Twelfth Edition 1980, with supplements.

Weather and Sea Conditions: It is suggested that vessels consult the British Admiralty Pilot Book N.P. 64, Twelfth Edition 1980, with supplements.

Strong Winds: When mean speeds exceed 30 knots on the Marine Terminal anemometer, ships will, depending on the wind direction and general weather synopsis, be alerted that cargo/deballasting operations may have to be suspended and hoses disconnected. The Terminal has the responsibility of determining when wind conditions are reaching the limit of the design criteria for continued operations.

Inspection: Any authorised representative of YHOC shall have the right to board any vessel within the Marine Terminal Area at any time, for the purpose of ensuring that Regulations are being observed.

Ship to Vacate Berth on Request by YHOC: As a condition of entry into Ras Isa Marine Terminal Area, the export tanker and any other ship must agree to vacate the berth promptly on being requested by YHOC.

SHIPMASTER'S REPORT: May 1988.

Ras Isa Terminal is an offshore loading port located in the Yemen at the Southern end of the Red Sea, East of the Zubair Islands and a little North of Hodeidah (See B.A. Chart No. 143).

The Terminal consists of a purpose-converted Floating Storage and Offloading (FSO) vessel, FSO 'Safer'. This vessel is 400,000 tonnes d.w.t. (ex-'Esso Japan'), and permanently moored in position Lat. 15° 07′ N., Long. 42° 36′ E. The 'Safer' is under the Yemen flag, and permanently connected by pipeline to the production field via a turret-mooring (6 anchors), and submarine line to shore at Ras Isa, 4.4 miles to the N.E. Production Field is some 420 km. inland, in the Marrib area of Yemen, and production is understood to be some 150,000 barrels per day. 'Safer' takes production on a continuous basis and supplies export vessels as required.

Product is Yemen Alif Crude; typical API, 39.0 to 41.0, typical temperature at loading, 30°C to 38°C, dependent on local sea temperature. The 'Safer' is on a swivel mooring system and will normally lie head to wind, with some influence from tide. Terminal is operated by a Yemeni/American combine, the Yemen Hunt Oil Corp. (YHOC), and vessel is operated (at time of writing) with Italian officers, Yemeni crew, together with American supervisors and Yemen Government representatives. Product suppliers are Yemen Oil and Mineral Resources Corporation. (YOMINCO).

Communications/ETA: (See Appendix "A").

On receipt of instructions to proceed to Ras Isa, then 72 hours, 48 hours and 24 hours prior, advise ETA and other details as listed. Hodeidah Ports and Marine Affairs Corporation (Hodeidah Port Authority) *must* be advised via Hodeidah Radio (4WD), in addition to any telex contact, as they advise the Yemen military authorities, who maintain a radar watch on all vessels entering or leaving Yemen waters. Likewise on departure, vessel must advise Hodeidah Port Authority (per format supplied by Pilot) to be marked-up on military radar screen – otherwise vessel may be intercepted; also via 4WD on 500 kHz.

'Safer' Sat. Telex 1473120 Safa-X (IOR); after initial and 72 hour messages, only requires updated ETA. On approach use VHF Channels 16 and 74.

On receipt of ship's message, 'Safer' will respond with nomination and request ship's details (See Appendix "B").

YHOC Marine: Telex 4013 or via 4WD to YHOC Marine Sanaa.

Port Authority: Telex 5565 and via 4WD.

YHOC Marine, Port Authority and Agents require message per Appendix "A" to be repeated in each ETA notice.

Approaches and Anchorage: See B.A. Charts No. 143, 548, 542 and Appendix "C" and "Plan".

Approach to Ras Isa Terminal is straightforward and clear of dangers. However, due to lack of soundings and age of survey, it would be prudent to approach from seawards rather than coasting.

From North: Follow usual courses down Red Sea, to position 15° 30′ N., 41° 45′ E., 4.5 miles S.W. of Jabal at Tair. Thence course 120° T., distance 52 miles gives a clear run to the Holding Anchorage, passing 7 miles N.E. of Quoin and Haycock Islands in the Zubair group. Once into soundings, least depths are 40 m. – 49 m. Clematis Shoal will lie approximately 11 miles to the North of track when some 17 miles N.W. of Terminal.

Rashshah Island, 4 miles North of Terminal, is low and sandy and has a light (3M) Fl. 10s. 8 miles; both island and light are very poor, both visually and as a radar echo and will not be sighted until within 6 miles of terminal, if at all. Terminal ('Safer'), is well lit and a good radar target, and was located at 14 miles. There is a disused SPM to the East of 'Safer', which may have a tug lying close-by, these echoes tend to confuse the actual terminal position.

From South: Leaving Abu Ail Channel, course should be made to position 14° 25′ N., 42° 30′ E. (avoiding Avocet Rock), before turning North towards Holding Anchorage. Least depths on this approach appear to be 31 m., but survey soundings are old. On approach good fixed positions are necessary, due to Penguin Shoal to West, and S.E. Patches to East, the latter being actually in vicinity of anchorage.

Holding anchorage is established approximately 3.2 miles to S.W. of 'Safer'; vessels may enter and leave from/to sea without pilot, but the total area from shore, out to anchorage is restricted, and vessel must be under pilotage within this area. Depths in anchorage average 38 m. to 44 m., mud/sand bottom, holding-ground good.

Berthing and Operations: See "Plan".

Pilots (2) are British. There are 2 Smit tugs (1×40 ton and 1×60 ton bollard-pull), and tugs lines are used. Tugs are not ideal as they are primarily salvage tugs. Berthing daylight only, unberthing any time, dependent on weather conditions; if wind speed above 20 knots terminal is usually closed for berthing. Any size of vessel up to 400,000 tonnes d.w.t. can be accommodated. Depth at terminal is 33 m.

Berthing is vessel's port side to 'Safer' starboard side. Terminal prefer all wire moorings, but accept rope headlines and sternlines. Tails must be removed from wires. Moorings are 4 headlines/wires, 2 breast wires, 2 spring wires, 4 sternlines/wires, 2 aft breast wires, 2 aft spring wires, – usual firewires required. Usually springs first, followed by breasts, followed by head/stern lines. 'Safer' then supplies 2 'shore' wires to fo'c'stle, and one 'shore' wire to poop. Messengers are required. Tugs make fast in 'push-pull' position on starboard forward main deck and aft main deck for berthing, and on long lines starboard bow and starboard quarter on sailing. Tugs lines are very heavy.

While alongside, vessel must maintain starboard accommodation ladder in lowered position. Current international safety rules, Check Lists, Regulations and procedures are in use, and practised. IGS must be positive and always less than 8%. Vessel must arrive with clean ballast, and ballast samples are laboratory tested before deballasting allowed. Portable radio is supplied by Terminal for inter-ship communications.

'Safer' will normally supply 2×16 in. hoses, using combination of ship's lifting gear and her own crane. Her max. rate is 70,000 barrels per hour. 'Safer' provides inter-ship gangway and connects/disconnects hoses.

'Safer' has cargo metering equipment, but this is still at proving stage, and vessel will 'ship-stop'. She will also in future be able to accept up to 50,000 cu.m. of dirty ballast, but this system is still to be commissioned.

Documentation usually takes 3 to 4 hours after completion. Pilot and any surveyors will stay aboard vessel loading. Tugs stand-by while operations are in progress.

Ras Isa commenced operations in December 1987 and 'Safer' came on stream in March 1988. There are currently an average of 6 export liftings per month from the terminal. As at present time, there are no port or customs or health formalities; ship's Agent requires 2 copies Crew List, and pilot asks of state of health. It is understood that the usual formalities will be instated in the near future, in which case the usual rules for entry into Muslim Arab countries are expected to apply.

The Yemen flag must be flown. It consists of red-white-black horizontal stripes with green central star, flown with red stripe uppermost.

There are no facilities or services available. No bunkers or water or repairs. It is apparently possible in urgent cases to obtain services via ship's Agent from Hodeidah, to the holding anchorage, with terminal permission. This would be very expensive as Hodeidah is some 30 km. away down the coast. Transport to/from 'Safer' is by launch or helicopter, Agent boards vessel on arrival. Pilot issues Port Clearance and takes off any timesheets and arrival/sailing figures for Agent if requested. Terminal will do their best to assist if urgent medical attention required, but in general vessel must be totally self-sufficient in this port.

'Safer' has 5 large Yokohama fenders and sundry smaller fenders and protection is good. Vessel's berthing (ballasted) trim must not exceed 3.0 m., with propeller immersed.

A comprehensive port-information book is issued to each arriving vessel. On boarding, Pilot will require Master to sign an indemnity absolving Pilot/Terminal from almost everything, and also pilotage timesheets, port log and tugs time of hire.

APPENDIX A:

Export tankers shall advise their ETA upon departure from its last load or discharge or other port or if at sea as soon as orders received to proceed to Ras Isa and repeat at 72, 48 and 24 hours in advance of arrival via Hodeidah Radio Station to the cable address "YHOC Marine Sanaa Telex No. 4013". Vessels equipped with Inmarsat satellite communications may address their telex(s) to "YHOC Marine" Inmarsat Telex No. 1473120 (IOR) and shall call the terminal on VHF Channel 16 when within range (then VHF Channel 74 for working).

For your information Ports and Marine Affairs Corporation, Hodeidah requires the following information from vessels stemed for Ras Isa Terminal to be sent to them either by telex (5565 Mawani YE) or via Hodeidah Radio (4WD) 72/48/24 hours prior to vessel's arrival:-

AA ETA Ras Isa Terminal.
BB Nationality of ship.
CC Summer deadweight.
DD Length overall.
EE Number of crew and state of health.
FF Cargo required.
GG Arrival draft – fore and aft.
HH Name of Agents.

Master tanker to adhere to these requirements, under copy to Agent to avoid imposition of fines.

APPENDIX B:

We hold your nomination for approximate .... bbls at 60° F. Yemen Alif Crude approximate API 40.5.

Following information needed:

AAA Cargo quantity you able to load.
BBB Last cargo carried and if crude, source of origin.
CCC Quantity and grade of any transit cargo on board.
DDD Quantity of ballast and estimated deballast time.
EEE Quantity and type of slop onboard to lot of segregate on board.
FFF Maximum acceptable loading rate.
GGG Arrival draft (trim not to exceed 10 ft or 3 m. by stern).
HHH Deepest sailing draft.
III Advised ability to simultaneously load and deballast with double valve segregation throughout.
JJJ Confirm latest edition of I.S.G.T.T. Safety Guide and OCIMF Ship-to-Ship Transfer Guide are onboard.

Repeat your ETA 72, 48 and 24 hours in advance of arrival to:

YHOC Terminal (via Inmarsat Indian Ocean Telex No. 1473120 Safa X).

Port Authority (Telex 5565 Mawani YE).

When within range contact YHOC Marine on VHF Channel 16 working Channel will be 74.

On arrival have your pilot ladder ready on starboard side for Berthing Master boarding and your port boom (SWL rating of minimum 10 tons) rigged for 16 in. hoses handling purposes.

Confirm your inert gas system is in good working condition. Maintaining oxygen content less than 8% by volume in cargo tanks.

Operational/Safety Check List as per OCIMF Ship-to-Ship Transfer Guide will be followed when VHF contact will be established. Please report also full name of Master.

Signed........................../Cargo Custody Transfer Coordinator
Ras Isa Marine Terminal

APPENDIX C:

On arrival vessel has to anchor at the holding anchorage. The area designated as the holding anchorage for vessels waiting for loading at Ras Isa Marine Terminal is located to the Southwest of the terminal in following position: (N.B. Vessels may only enter this area from sea, or sail to sea, without Pilot. Any other movement must be under pilotage.)

15° 05′ N. 42° 32′ E. 15° 03′ N. 42° 32′ E.
15° 05′ N. 42° 36′ E. 15° 03′ N. 42° 36′ E.

The permanent floating storage and offloading terminal (FSO) "Safer" (400,000 d.w.t.) is located approximately 4.8 nautical miles offshore Ras Isa in position:

Latitude 15° 07′ North Longitude 42° 36′ East
in the Red Sea territorial waters of the Yemen.

SHIPMASTER'S REPORT: June 1989.

General: Ras Isa Marine Terminal is similar to ship-to-ship oil transfer, so no documents (i.e. Stores List, Bonded Store List, etc.) were requested. However 4 copies of the Crew List are required. Repairs, fresh water, crew repatriation and shore leave are not possible.

When vessel arrives at the Pilot boarding station (Anchorage area), the Pilot, Loading Master and Agent come on board by helicopter by launch. The Pilot and Agent remain aboard until ship's departure. Two British Pilots employed and one on duty. Two tugs assisted with berthing and unberthing operations.

Information required prior to arrival: ETA upon departure from last port and repeat 72/48/24 hours in advance of arrival via Hodeidah Radio Station to the cable address "YHOC MARINE SANA TLX4013". Vessels equipped with Inmarsat communications may address their telex "YHOC MARINE Inmarsat No. 873-1104125" and shall call the terminal "SAFER" on VHF Channels 16/74.

The Agent requests the following information to pass to the terminal, this may be sent 3 days in advance.

1. Cargo quantity able to load (we loaded Marib Light crude oil, API 41.1, temperature 96°F.).
2. Origin of last cargo.
3. Quantity of dirty ballast, and deballasting time (if any need to pump to shore, estimate time via 1 × 16 in. hose, maximum 70 p.s.i. discharge pressure, shore tank capacity 50,000 tons).
4. Quality and quantity of slops.
5. Maximum acceptable loading rate (storage tanker able to transfer 20,000 tons per hour).
6. Arrival draft (trim not to exceed 10 ft. or 3 m. by stern).
7. Maximum sailing draft.
8. Advise ability to simultaneously load and deballast with double segregation throughout.
9. Confirm latest editions of ISGOTT (International Safety Guide for Oil Tankers & Terminals) and OCIMF Ship-to-Ship Transfer Guide are onboard.

and additional items as follows:

Distance bow to manifold.

Helicopter landing area (helicopter has two engines and is large, takes about 20 persons).

Rig pilot ladder on starboard and 16 in. hose pick-up derrick on port side (SWL 10 tonnes).

I.G.S. works properly and all tanks including ballast tanks oxygen less than 8 percent by volume.

Mooring wires: Take off rope tail, this is extra ordinary request due to bad weather, the terminal had experienced rope tails breaking.

The Agent is requested to pass the following to the Port Authority:

1. ETA Ras Isa.
2. Vessel nationality.
3. Summer deadweight.
4. LOA.
5. Number of crew and confirm all healthy.
6. Quantity of cargo request for loading.
7. Arrival draft.
8. Name of Agent.

AUTHORITY: Yemen Exploration and Production Co., (Yemen Hunt Oil Company, as Operator) P.O.Box 481, Sana'a, Yemen. *Tel:* Hodeidah Office: 967-3-217994, Sana'a Office: 967-2-216080. *Telex:* 4013 YHOC YE. *FAX:* 967-2-216079. *Cables:* YHOC Sana'a, Yemen.

SALEEF (Salif): 15.18 N. 42.41 E.

Also see "General" before first port.

Saleef Port is a natural port on the Red Sea, approximately 80 km North of Hodeidah Port. Two routes, one round the North end of Kamaran Island and the other around the South end provide suitable access to the harbour.

As prevailing winds are generally Southerly or Northerly, vessels are able to approach the berth from downwind. This is important as vessels will probably have to berth without tug asistance. Initially, mooring facilities are designed for 50,000 d.w.t. vessels and consists of a wharf head 20 m. wide, 93 m. long with two dolphins. A 10 m. wide trestle connects the wharf head to the shore. Facilities are designed to absorb the berthing impact of a ship approaching with a velocity component of 15 cm. per second perpendicular to the berth face and for a 50 tons mooring line pull.

Future developments: A French consulting firm has been awarded the contract to submit a report on future developments of this port.

SHIPMASTER'S REPORT: December 1979.

Acknowledgements: Most of the information has been gleaned from local Agency representatives and Capt. A. Saeed, Harbour Master.

Reference has been made to Red Sea Pilot and various BA Charts. Local written information is unavailable for the area concerned.

General: Salif lies some 60 km. North of Hodeidah, it is a natural deepwater harbour sheltered by Kamaran Island.

Since 1976 the port has enjoyed moderate expansion and can now boast a modern jetty capable of berthing ocean going vessels; other pontoon type berths are available, these being linked to the shore by small stone jetties. At present the port can accommodate two vessels of up to 200 m. length with a draft of 12 m.

Salif is geared for the export of bulk salt and the import of grain and some general cargo. In the near future a further pontoon type berth is due to come into operation to be used solely for the import of bulk cement. A bagging plant and silo have been constructed to handle the additional cargo.

This report is mainly directed to the facilities associated with the import of grain, however where possible relevant information has been included which could prove useful to other vessels trading in the area.

Documents:

6 Crew Lists with Passport numbers.
2 Bonded Stores Lists.
2 Personal Manifests.
2 Vaccination Lists.
3 copies Cargo Manifest.
Local inward forms made out on arrival.

Approaches: (BA Charts: 543 and 548). Recommend approaching around the North end of Kamaran Island, as mentioned in Red Sea and Gulf of Aden Pilot, page 390.

The lighthouses stand out well, but at night they are not lit (December 1979). The only difficulty in making Salif, in daylight, is passing to the South of N.W. shoal light, the channel at this point being about one mile wide. At night the lighthouses prove quite good radar targets, and the various islands etc. show up quite well. Once around the top of Kamaran Island course can be set down Kamaran Passage to the anchorage area off Ras el Salif. Charterers frequently advise that passage is possible South of Kamaran Island, however this is not advisable; the leads mentioned on the chart are very difficult to see and there is no room for error.

Anchorage: No specific area designated but anywhere in the vicinity of Salif Jetty. For vessels waiting for the wheat berth it is best to anchor about 0.75 miles West of Ras el Salif. Good holding ground in about 14 fathoms of water. For vessels with poor radar it would be best to anchor outside Kamaran Island until daylight, when passage can be made in safety.

Weather: See "Red Sea Pilot" for information. At Salif the wind usually picks up during the day and this can delay berthing if the strength is above Force 4.

Pilotage: Pilot boards in anchorage area from medium sized launch. Yemenese Pilot with limited English.

Daylight pilotage only.

Berthing: Vessels berth, at the bagging plant pontoon, head to wind. The pontoon consists of a flat topped barge made fast to a small stone jetty; it is well fendered with car tyres. The offshore anchor is used whilst coming alongside and a launch runs various ropes ashore to posts set on the land. Five ropes are required either end and it is necessary to join the first few together as considerable lengths are initially run. The bagging pontoon can only accommodate one vessel at a time. See "Shipmaster's Report – May 1982".

The general cargo and salt exporting jetty lies some distance to the South of the bagging plant. This pier can take one vessel of up to 200 m. in length. Facilities at this berth are an improvement over the pontoon, however for the import of grain type cargoes, it is not so efficient, it being necessary to bag the cargo by hand. Both berths can take vessels with up to 39 ft. draft.

Buoys are at present being laid to the North of the bagging pontoon and these could prove an obstacle for vessels berthing. The moorings are being laid to assist vessels making fast to the new cement pontoon (see "Projects").

Quarantine/Health Regulations: Doctor boards on arrival, either at anchorage or alongside. No health forms as such. Certificates not required unless vessel from infected area when Yellow Fever and Cholera certificates are needed. No derat facilities.

Customs: Usual Islamic laws in force. Bond not sealed and apparently no objection for crew to consume spirits/beer on board. On no account must alcohol be given/sold to local Yemenese.

Immigration: Passports are inspected on arrival. (Harbour Master acts as translator for Immigration Authorities.) Shore leave granted with passes for Salif area only. Special permission has to be given to proceed outside local area, i.e. Hodeidah.

For crew repatriation, passports are taken to Sanaa by Agent for necessary visas to be arranged.

Medical Facilities: One doctor resides in Salif, Yemenese and speaks English. He will attend the ship rather than the patient visiting him. The nearest hospital is in Hodeidah.

Port Operations (Bagging Plant): Foremen and workers are hard working. The foremen reside in caravans close to the bagging plant whilst most of the stevedores come from Salif.

The method of discharge is to load a number of diesel driven evacuators on deck and by various pipelines, these are connected to a storage hopper situated on the pontoon/barge. The hopper is connected to a small bagging plant and by means of conveyors the sacks are loaded onto road transport.

Discharge rates per 24 hours worked between 1,600 tonnes and 1,850 tonnes. Charter Party rate indicated about 750 tonnes per day. The takeaway rate from the hopper appears to be adequate with plenty of road trucks available. The grain is shipped immediately to different parts of the Yemen.

It is usual to carry sufficient bags to enable the complete discharge of the grain to go unhindered. The bags are baled and discharged onto the pontoon at regular intervals.

Ship's gear is required at each hold to sling the pipes that lead from the evacuators into the hatch. It is also required for discharging the gunnies and for loading the evacuators (1.5 tonnes). The evacuators appear reliable but spillage of diesel results during re-filling etc.

Fresh Water: Available but expensive. Supplied by road tanker at 15 tonnes a time, it is necessary to use ship's pump for pumping the water aboard. Agents require ample notice prior to supplying water.

Fuel: Heavy oil and diesel oil not available unless barged from Hodeidah.

Stores: Not readily available; fresh stores difficult to obtain.

Agency: The main Agency lies some 60 km. away by track, and the ship is attended by a runner who commutes between Hodeidah and Salif. Considerable delays result before ship's business can be completed and it is necessary for everything to be in writing; repatriation, in particular, is difficult for the organiser as well as the traveller.

Communications between Salif and Hodeidah are non-existent, a telephone line exists, but this is out of order. It is however possible to communicate directly through Portishead Radio and sometimes the only way to get messages out.

Local currency and American Dollars are obtainable from the Agents. It is difficult to obtain the money from the Agents and generally it is best to arrive with sufficient cash on board to cover any expenditure.

To arrange repatriation it is necessary to allow at least 6 days. Visas have to be obtained from Sanaa and tickets arranged. If pre-paid tickets have been sent from U.K., then they must arrive in ample time. The airport at Hodeidah has regular connections with Sanaa which in turn is linked into most air routes via Paris. Transportation from the ship to Hodeidah is by Land Rover or similar four wheel drive vehicle.

Port Regulations: Nothing in writing. The Harbour Master is the person to approach if anything required. Apparently Salif is designated a military zone and this is the reason no written information is available.

Gangway: The vessel only lies alongside for a distance of about 80 ft. amidships and consequently a pilot ladder is used instead of a gangway or brow. If this causes any difficulty, ship's lifeboat can be used as a ferry between gangway and shore.

Watchmen: Supplied by local Police/Army. They remain aboard during vessel's stay and keep pilferage to a minimum. They also keep close watch on any alcohol that may be obtained by local Yemenese.

Shore Leave: See "Immigration".

Garbage: No facilities for taking garbage away from the ship; best to dump waste food etc., whilst retaining cardboard boxes, and plastic containers.

Repairs: Possible to immobilise main engines, as once on the berth it is unlikely to shift. No repair facilities ashore.

Time: GMT plus 3 hours (no change).

Flag: Yemen Flag must be flown at all times. Red, white, black horizontal stripes with a black star in the white section.

Consuls: Situated in Hodeidah or Sanaa. Harbour Master available for Noting Protest, etc.

Tugs: None available for berthing though frequently tugs operate in the area towing barges, pontoons, etc.

VHF: Situated in port office but hours of working very flexible. The Harbour Master normally calls any vessel up shortly after anchoring.

Fire/Ambulance: None available.

Projects: A new pontoon berth, similar to the grain berth, is being constructed about 0.25 miles to the North. Silos have been erected close to the shore and are capable of storing 9,000 tonnes of finished cement. A bagging plant has also been constructed next to the silos. It is intended that cement be shipped, in bulk, and with evacuators discharged into the silos.

SHIPMASTER'S REPORT: May 1982.

I was in Saleef recently with 39,127 tonnes wheat – ship 182.08 m. long. The following are changes to information in the Guide.

The barge – pontoon berth with bagging plant no longer exists and apart from cement boats all ships now berth at jetty by Salt terminal.

Minimum water I found there in 18 days' stay was 18.5 m.

Ship's gear must be used and grain is dumped on wharf and bagged in situ, being taken away by lorries. Rate erratic, between 900 t.p.d. and 2,000 t.p.d.

Vessel has to vacate berth for car carriers and salt loaders.

No shore leave permitted.

Bond is now sealed. No restrictions on what is kept out.

NOTES

Please also advise Shipping Guides Ltd.

Yugoslavia

BAR: 42.05 N. 19.03 E. (See Plan)

PORT LIMITS: Seaward limits of the port defines a line drawn between "Voluica" Light and Ratac Point.
DOCUMENTS:
On Arrival:
2 copies Health Declaration.
1 copy General Declaration.
5 copies Crew List.
5 copies Passenger List.
5 copies Crew Personal Effects.
3 copies Stores Lists.
1 copy Animal Pets Aboard.
1 copy Certificate of Financial Insurance on Civil Liability for Oil Pollution – only foreign ships carrying more than 2,000 tons of oil.
3 copies List of Hazardous Cargoes loaded on board and Cargo Plan for Hazardous Cargo (1 copy).
On departure:
5 copies Crew List, if any change.
List of Hazardous Cargoes, if loaded and Certificate of Stowage.
PILOTAGE: Advance notice 24 hours through ship's Agent. Pilot boat blue hull, white deck house, with letter "P" on each side. Pilot boards off West Breakwater. Use international signals to call Pilot. Pilot may be contacted on VHF Channel 16, working on Channel 6.
ANCHORAGE: Safe anchorage West and N.W. off West Breakwater. Anchoring not allowed nearer then 0.5 mile off Breakwater.
RESTRICTIONS: Vessels enter/leave port by day and night. Tankers allowed only during daylight. Depth entrance 14 m.

No restriction on LOA and beam. Foreign nuclear ships enter only with special permission. Leaving or entering port for foreign tankers not allowed if not having said Certificate.
MAX. SIZE: Fully loaded vessels up to 12.5 m. draft.
RADIO/VHF: Bar Radio, call sign YUW, 500 kHz and 447 kHz. Radio telephony on 2182 kHz on 2 metre band and on Channel 16.
Agents can be contacted through Bar-Radio on VHF.
Port Authority on VHF Channels 16 and 14.
Tugs on VHF Channel 14.
TUGS: 2 tugs with twin 594 kW engine.
BERTHING: Berth assigned at Agent's request or Receiver's/Shipper's, both for liners or tramps, at the daily meeting of the Harbour Board.

3,500 m. of berthing space and able to accommodate up to 20 ocean-going vessels.
CARGO HANDLING FACILITIES: Available for all kinds of general cargo, containers, pallets, Ro/Ro, bulk, fuel oil and chemical cargoes. Regular passenger service to Italy and from May – October to Greece.

Grain silos with 30,000 tons capacity with covered Vacuvator.
STEVEDORES: The Port Enterprise "Luka Bar" is the sole stevedoring company. Work is done in 2 shifts: first 0600 – 1400 hrs., second 1400 – 2200 hrs. Third shift can be ordered at daily meeting, paid as overtime.
MEDICAL: Medical care available at Medical Centre at Bar.
TANKERS: New oil berth can accommodate tankers up to 80,000 d.w.t., draft limit 12.5 m. Bunkers from local bunker station. Tank cleaning, pumping of slops and gas freeing not permitted in port.

Tankers must be ready to leave port at 30 minutes' notice, at any time and at request of Port Authorities.
DENSITY: Sea water.
FRESH WATER: Available from hydrants on quay.
FUEL: Can be obtained from local bunker station. All grades available. A fuel barge may be available in the near future.
CONSULS: Same as "Rijeka".
REPAIRS/DRY DOCKS: Dry Docks at Shipyard "Veljko Vlahovic", Bijela, 36 miles from Port of Bar, capacity of about 130,000 d.w.t. and 35,000 d.w.t., available for all types of deck and engine repairs. Minor damage can be repaired while loading/discharging.
SURVEYORS: Representative of Yugoslav Register of Shipping at Tivat (80 km.). Bureau Veritas at Dubrovnik and Lloyd's Register at Split.
GANGWAY/DECK WATCHMEN: Available at Master's request.
OPENING/CLOSING HATCHES: Normally performed by crew, or as per Charter Party.
CARGO GEAR: Mobile Shore Cranes: 6×5 – 6 tons, 3×3 tons, 3×8 tons, 2×20 – 30 tons, 1×40 tons. Fork-lifts capable of handling containers, Vacuvators, 3 cranes for bulk cargoes. 1×40 ton container crane. If not agreed in C/P, loading and discharging is by shore cranes.
CUSTOMS ALLOWANCES: Yugoslav Customs Regulations apply.
REPATRIATION: From Bar by bus, train (International Lines), and ship. From Airports Tivat, Titograd and Dubrovnik by plane.
TIME: Central European Time, GMT plus 1 hour. Summer time kept from March to October (date fixed annually).
SERVICES: Compass adjuster at Bijela (100 km.), RDF adjuster at Dubrovnik. Other electronics repairs via Split.
HOLIDAYS: January 1st and 2nd, May 1st and 2nd, July 4th and 13th, November 29th and 30th. Work can be arranged on Sundays and 2nd day of two-day holiday.
POLICE/AMBULANCE/FIRE: Police Tel. 92; Ambulance Tel. 94; Fire Tel. 93.
SHORE LEAVE: Allowed.
STORING: See "Prelims".
1. By truck.
2. Yugoslav Federal Regulations apply.
3. Yes.
4. Yes.
5. Yugoslav Customs Regulations apply.
6. Yes.

DUBROVNIK (Gruz Harbour): 42.38 N. 18.07 E. (See Plan)

DOCUMENTS/HEALTH/HOLIDAYS: Same as "Rijeka".
PILOTAGE: Compulsory. Pilot boards at a point situated approximately in centre of triangle formed by Kolocep Island, Daksa Island and Greben Rocks. Pilot boat is painted blue with large while "P" on hull, Length o boat about 13.0 m. Pilot boat may be contacted on VHF Channel 16.
ANCHORAGE: In about 22 fathoms in channel between Daksa Island and mainland. This anchorage is exposed to strong N.N.E. winds i Winter time.
Old Dubrovnik Harbour: Between Lokrum Island and the mainland. Depth in approaches 40 m. Diameter of anchorage 0.5 miles. Distance to the shore 0.5 miles.

The anchorage is used by large cruise ships only. It is exposed t strong Southerly winds in Winter time.
RESTRICTIONS: Only port of Gruz is open to commercial traffic, the old port of Dubrovnik (within the city walls) can accommodate only yachts and small craft drawing under 9 ft.
MAX. SIZE: Max. length 230 m., max. draft 32 ft., no limits on beam.
RADIO: Dubrovnik Radio: *Telegraphy:* Call sign YUX, working o 500 kHz and 447 kHz, (working 24 hours). Traffic list 0030, 0430, 0830, 1230, 1630, 2030 hrs.
Telephony: Working on 2182 kHz and 2615 kHz, (working 24 hours). Traffic list every odd hour + 20 minutes.
VHF: Listening Channel 16 throughout 24 hours and working on al Channels. Duplex Channel 23 with connection to national and international telephone network. All times are GMT.
TUGS: No permanently stationed tug boats, but can be ordered whe necessary from other ports.
BERTHING:

Berth No.	*Length* (m.)	*Depth* (m.)
7	100	3.50
8	100	7.00
9	100	7.20
10	100	7.50
11	100	6.50
12	90	6.80
13	95	7.00
14	110	7.00
15	119	7.50
16	180	11.00
17	54	4.50

CARGO HANDLING FACILITIES: The port handles general cargo. 6 cranes with capacity 1.5 tons-25 tons.
STEVEDORES: The port enterprise "Luka Dubrovnik" is the sole stevedoring company. Work is done in 2 shifts: first 0600 – 1300 hrs. second 1400 – 2100 hrs.
MEDICAL: General hospital and medical facilities available.
FRESH WATER: Available from hydrants on quay, rate 20 t.p.h. Order through Agent.
FUEL: Not available. Only oil for diesel engines in limited quantities. Heavy fuel can be delivered by coastal tankers from Split.
CONSULS: Sweden: Konzulat Kraljevine Svedske, Zeljarica 7, Dubrovnik. Tel: 23144. Cables: Svensk.
Netherlands (Vice-Consul): Vicekonsulat Kraljevine Holandije, Gruska Obala 46, Dubrovnik. Tel: 24947.
United Kingdom: Pile 1, Dubrovnik. Tel: 27333.
REPAIRS: Small repairs only.
SURVEYORS: Bureau Veritas, Rijeka. Tel: 051-39324.
At Dubrovnik Ing. Lasic Srdan. Tel: 25723.
Lloyd's Register Surveyor available from Split. Tel: 058-42773.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: Performed by crew.
CUSTOMS ALLOWANCES: About 40 cigarettes and limited amou wine/spirits per man per day.
CARGO GEAR: Operations are usually performed with ship's gear. Shore cranes with 25 tons SWL are available at Quay No. 16 only.
AIRPORT: Airport "Cilipi" 25 km. from the Gruz Port. Served by regular airlines.
TIME: GMT plus 1 hour. Summertime. GMT plus 2 hours.
POLICE/AMBULANCE/FIRE: Dial 985 for all emergency matters.
TELEPHONES: Can be placed onboard. 72 hours' notice required.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Issued by local police.
DEVELOPMENTS: A new berth is to be constructed on the site of Berth No. 17. The new berth will have a 25 ton multi-purpose crane and a depth of 15.0 m.

KOPER: 45.31 N. 13.44 E. (See Plan)

PORT LIMITS: The seaward boundaries of the port are between "Debeli Rtic" (Punta Grossa) and Rt. Vilizan.

DOCUMENTS:
5 Crew Lists.
5 Passenger Lists.
8 Cargo Manifests.
2 Freighted Manifests.
2 Bills of Lading.
2 Stores Lists.
1 Crew Effects List.
1 Cargo Gear Certificate.
1 Derat Declaration.
1 Health Certificate.

PILOTAGE: Pilot station may be contacted on VHF Channels 16 and 8 throughout 24 hours. Pilot boards 1 mile from entrance in roads or at anchorage. Definite notice to be sent by telex 24 hours before vessel's arrival in port area through its Agent in Koper. In case of bad weather, ship must wait for a Pilot at anchorage.

ANCHORAGES: Port area, depth 17 m., sandy bottom. Safe anchorages in case of S.E. wind near Rt. Vilizan and in case of N.E. wind near Debeli Rt. (Punta Grossa).

RESTRICTIONS: Vessels enter port by day and night, tankers can also enter during daylight hours and at night.

MAX. SIZE: General cargo and container vessels drawing up to 32 ft. and tankers with 40 ft. draft. No length restrictions.

HEALTH: Ship must have Health Declaration and in this case Pratique is automatic. In the event of any suspected disease or fever on board, Master must advise Harbour Master or Agent by VHF Channel 16 or by telegraph. Harbour Master's Office on VHF Channel 16 continuously.

RADIO: Communication on MW and SW through Rijeka Radio.

VHF: Communication on Koper Roads on Channel 16 (Channels 8, 10, 12 and 14 can also be used).

RADAR: No service available.

TUGS: 2 tugs available (1×750 h.p. and 1×1,500 h.p.). If additional tugs required, they can be ordered from Trieste.

As per Harbour Master's Regulations, the following number of tugs are compulsory:
For vessels up to 500 g.r.t. – no tug needed.
For vessels up to 3,000 g.r.t. – one tug compulsory.
For vessels from 3,000 to 20,000 g.r.t. – 2 tugs are compulsory.
For vessels from 20,000 to 30,000 g.r.t. – 3 tugs are compulsory.
For vessels from 30,000 to 50,000 g.r.t. – 4 tugs are compulsory.
For vessels over 50,000 g.r.t. – 5 tugs are compulsory.

BERTHING:

Terminal for General Cargo: Quays 833 m., depth from 7 m. to 12 m. Number of Berths 6. Roofed warehouses 140,000 sq.m., of which: air-conditioned warehouses, with a possibility of moisture and temperature regulation from 0°C to 20°C, 7,500 sq.m. Refrigerated rooms (freezing to –20°C) 23,502 cu.m. Special warehouses for cotton and hides 12,500 sq.m. 2 shore cranes, 1×20 ton mobile crane, 1×30 ton mobile crane, 1×40 ton mobile crane, 170 forklifts. Terminal capacity 750,000 tons annually.

Terminal for Timber: Quays 250 m., depth 6 m.–12 m. Number of Berths 2. Terminal area 25 ha., sheltered storage area 36,120 sq.m., 1 shore crane, 1 bridge crane, 22 forklifts, 21 towing units.

Terminal for Container and Roll-on/Roll-off Traffic: Quays 480 m., depth 12 m. Two berths for container vessels, 3 Ro/Ro ramps. Terminal area 20 ha. Closed warehouses 10,800 sq.m. Railway tracks 2×562 m. 178 electric connections for reefer containers. 3 container cranes (450kN). 5 straddle carriers. 4 transtainers. 11 forklifts. 21 towing units. Terminal capacity 135,000 TEU annually.

BULK HANDLING FACILITIES:

Terminal for bulk and liquids:
Cargoes handled:
Ores, coal and coke
Cereals and oilseeds
Liquid cargo (wine, edible oils, molasses, latex, phosphoric acid, oil and oil derivatives)

Capacities for ores, coal and coke: (Max. granulate size 150 mm.) Length of quay 200 m., depth at the quay 17 m. Number of berths 1, open storage 300,000 tons, 2×20 tons capacity shore cranes (at outreach 36 m.). Yearly throughput of the terminal 1.5 million tons. Unloading capacity on the quay 1,000 t.p.h. Loading capacity from the ship or from depot 5,000 tons/day. Possibility of berthing vessels up to 130,000 d.w.t. Daily despatch per railway 5,000 tons.

Capacities for phosphates, fertilisers, borates and bauxite: Length of quay 273 m., depth at the quay 14 m. Number of berths – 1, sheltered warehouse (ground floor) 30,000 tons, 2×20 tons capacity shore cranes (15 tons at 24.0 m.). Silo for borates 1,100 tons and silo for bauxite 20,000 tons. The quay is equipped with moving belts and connected to the warehouse with a closed conveyor system.

Capacities for cereals, oilseeds and oilseeds after industrial output/silo: Length of quay 183 m., depth at the quay 14 m. Number of berths – 1, storage capacity (24×2,250 tons and 11×580 tons) 60,000 tons. Discharging/loading capacity for vessels 500 t.p.h., discharging/loading capacity for vehicles 500 t.p.h. The grain silo is a technological closed system with its own quay, rails, wagon loading/discharging station and the corresponding road connections.

Capacities for other bulk cargoes: Depth at the quay 7.0 m.-14.0 m. Number of Berths 3, open storage area 12,000 tons (2×6,000 tons). In addition to the special quay equipment with conveyor systems the Port of Koper has 3 additional berths for dispatching of bulk cargoes direct.

Capacities for liquid cargoes: Wine 2,492 cu.m., edible oil and molasses 24,500 cu.m., chemicals 12,350 cu.m., phosphoric acid 7,500 cu.m., latex 1,320 cu.m., oil and oil derivates 114,900 cu.m.

BRIDGES: None.

STEVEDORES: Gangs ordered from "Luka Koper" who are stevedores, by Agents and forwarding Agents in Koper.

MEDICAL: Medical assistance and hospital available.

TANKERS: Tanker berth for crude oil with max. draft 40 ft., equipped with 3×8 in. arms.

FRESH WATER: Available from any pier. Rate of delivery about 15 t.p.h.

FUEL: Not available.

FIRE PRECAUTIONS: Usual precautions.

CONSULS: Italy.

REPAIRS: Small repairs can be carried out at Koper. In Izola, 2 miles from Koper, is wharf "2nd October". The repair service for containers is in the Port.

DRY DOCKS: In Izola for vessels up to 16,000 d.w.t.

SURVEYORS: In Koper – Jugoregister. In Rijeka or Trieste all representatives.

GANGWAY/DECK WATCHMEN: Available at ship's request.

OPENING/CLOSING HATCHES: If not performed by crew, then by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes for each member of crew and 1 bottle of spirits per week and reasonable quantity of wine per man per day.

REPATRIATION: By bus, by railway from Koper or by air from the airports.

AIRPORT: Ljubljana (Brnik) – 120 km. Rijeka – 100 km. Pula – 100 km. Ronchi (Italy) – 80 km.

TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Days (1st, 2nd January), 27th April, May Days (1st and 2nd May), 4th July, 1st November, Republic Days (29th, 30th November), 25th December.

POLICE/AMBULANCE/FIRE: Police No. 92, Ambulance No. 94, Fire No. 93.

TELEPHONES: From anchorage it is possible to telephone through Rijeka Radio or Trieste Radio.

SHORE LEAVE: Allowed after clearing inwards (Free Pratique).

IDENTIFICATION CARDS: Shore pass issued by local police (without photograph).

REGULATIONS: None.

DEVELOPMENTS: *Bulk Terminal:* (2nd stage) Extension of the quay by additional 200 m., depth of the whole basin 18.0 m., 2 unloading bridges, capacity 2×1,200 t.p.h. Enlargement of depot also to be undertaken.

SHIPMASTER'S REPORT: October 1979.

Stevedores: Port works 5 days a week in 2 shifts; 1st shift 0600 hrs. to 1300 hrs.; 2nd shift 1400 hrs. to 2100 hrs.; a third shift may be worked from 2200 hrs. to 0530 hrs. Also possible to work 1st, 2nd and 3rd shifts on Saturdays and Sundays.

Pilotage: Pilot station contacted on VHF Channel 16 from 0600 hrs. to 2200 hrs. Vessels berthed alongside during these times. Pilots board about 1 mile from the entrance to the port or at the anchorage. Pilot vessel painted blue in colour and displaying large white 'P' on the bow. Pilots speak very good English.

General: The use of cameras is prohibited within the port area.

SHIPMASTER'S REPORT: June 1981.

According to Pilot they do not have VHF in their office but use the set in the Harbour Master's Office. We found we could not contact the Pilots until after anchoring and when the Pilot boarded he said it was only because he happened to be in the Harbour Master's Office at the time.

Tankers always berth port side to and do not normally sail after dark as they have to move out of the channel stern first and then swing.

Moorings usually 4 head ropes and 1 backspring with similar aft. After ropes go to 2 buoys and require lashings. After backspring and forward moorings go to bollards ashore.

There is a telephone, for local calls, in the office on the jetty.

Use tug's lines berthing and ship's lines sailing.

Vessel is inspected by Harbour Master and they are very particular about ship's documents especially the Certificate of Insurance or other financial security in respect of civil liability for oil pollution damage.

If wishing to visit Consul it is apparently easy to cross the border to Trieste but best to allow boarding Immigration Officer to examine your passport. A long gangway is required (no shore gangway) as jetty is low.

AUTHORITY: Luka Koper, Vojkovo nabrezje 38, Yu-66000 Koper. *Tel:* (3866) 34–141. *Telex:* 34-110 and 34-168 Yu Luka. *Contact:* Commercial Department.

AGENT: Jadroagent – Koper. Cesta JLA 27, P.O. Box 70, 66000 Koper. Tel: 066-24262, 22884. Cable: Jadroagent Koper. Telex: 34234, 34228 Yu Jadrag. Fax: 066-24062.

PLOCE (Kardeljevo): 43.03 N. 17.26 E. (See Plan)

DOCUMENTS/HEALTH/HOLIDAYS: Same as "Rijeka".

PILOTAGE: Compulsory for vessels over 500 g.r.t. Pilot boards vessel at entrance of the channel within a circle of 3 miles radius from Point Visnjica. Pilot station on VHF Channel 16.

ANCHORAGES: Vessels are allowed to anchor West of the line which connects Kunova Cove on peninsula Peljesac with point Lat. 43° 03′ N., Long. 17° 24′ E. on land coast. Depth over 25 m.

RESTRICTIONS: Ship entering channel between Visnjica Point and embankment of right hand bank must keep in middle, leaving buoys to starboard. Recommended speed 5 – 8 knots. Also see "Tankers".

MAX. SIZE: Draft limited to max. 34 ft. 6 in. Length limited to 220 m.

RADIO: Nearest Radio Station Split Radio YUS – 2182 kHz and 2574 kHz. Radio station Dubrovnik Radio YUS – 2182 kHz and 2615 kHz.
VHF: Channel 14 and 16.
RADAR: No Port Radar service.
TUGS: One tug of 850 h.p., and one of 1,200 h.p.
BERTHING: Bosanska Obala (Berths No. 7 and 8): Length 227 m., drafts up to 31 ft. – no shore cranes.

Biokovska Obala No. 1 and 2 (Berths No. 4, 5 and 6): Length 368 m., drafts up to 32 ft., 7×5 ton cranes.

Gat Oslobodenja: North Side No. 3 (Berths No. 1, 2 and 3): Length 410 m., drafts up to 32 ft., 1×7 ton crane and 3×5 ton cranes. Head: Length 250 m. South Side No. 5 (Berths No. 20, 21 and 22): Length 507 m., drafts up to 34.5 ft., 5×10 ton cranes.

One floating crane up to 100 tons capacity.
BULK CARGO FACILITIES: Grain, ores and minerals by shore cranes equipped for grab discharge at Quays No. 3 and 5. Grain through feeders to railcars. Alumina silo (capacity 20,000 tons) at Quay No. 1 – length 140 m., draft 30 ft., with loading facilities. Coal handled by 5×10 ton travelling cranes, average discharge rate 250 tonnes p.h.
SPECIALISED CARGO HANDLING FACILITIES: No berth specially equipped for handling containers, only by floating crane.
BRIDGES: No bridges to pass through.
STEVEDORES: Port Enterprise "Luka Ploce", is the sole stevedoring company. Work in 2 shifts: 0600 – 1400 hrs. and 1400 – 2100 hrs. Overtime possible.
MEDICAL: Medical service available. Nearest hospital at Mostar (64 km.), Dubrovnik (110 km.) and Split (110 km.).
TANKERS: Oil Terminal – Channel Vlaska: one berth: vessel's length – no restriction, max. vessel's beam – 27 m., max. draft – 9.20 m. No slop/deballast facilities. When wind blowing over 10 knots direction North-South, and over 14 knots East-West, vessels are not allowed to sail through Channel Vlaska to oil terminal. Navigation through Channel Vlaska is allowed only during daylight with assistance of 2 tug boats. It is not allowed to berth or anchor vessels less than 41 m. out of marked line, while other vessels sailing through the channel.

Storage:

6 tanks × 10,000 tons each for crude oil and heavy fuel oil,
3 tanks × 5,000 tons each for natrium hydroxide,
1 tank for special chemical products,
2 tanks × 2,500 tons each and 2 tanks × 1,300 tons each for petrol.

DENSITY: 1010 – 1030.
FRESH WATER: Available from quay. Rate 15 t.p.h. – 20 t.p.h.
FUEL: Gas oil only. Delivery by tank trucks. Advance notice required.
REPAIRS: Only small repairs.
DRY DOCKS: None.
SURVEYORS: Lloyd's, A.B.S., B.V. and Yugoregister at Split (110 km. from Kardeljevo).
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: May be done by crew, otherwise by stevedores with extra payment.
CUSTOMS ALLOWANCES: About 40 cigarettes and reasonable amount wine/spirits per man per day.
CARGO GEAR: Although the port is equipped with shore cranes and a floating crane of 100 tons capacity, ships must have efficient cargo gear and relative certificates.
REPATRIATION: Possible by train or bus. By plane from nearest airports, Split (110 km.), Dubrovnik (110 km.) and Mostar (64 km.).
TIME: GMT plus 1 hour. Summertime (from last Sunday in March till last Sunday in September) GMT plus 2 hours.
POLICE/AMBULANCE/FIRE: Police, Tel: 058/79006; Ambulance, 058/79702; Fire, 058/79143.
TELEPHONES: Not possible to place telephones onboard.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Shore pass issued by local Immigration Office.
DELAYS: Only occasionally for bulk carriers.
GENERAL: Lloyd's sub-Agents: Jadroagent Ploce.
DEVELOPMENTS: Terminal for grain cargoes with capacity of 40,000 tons to be completed in 1990 at Berth No. 5. Average rate 400 t.p.h., bagging capacity of 1,000 bags per hour, with possibility of automatic weighing.
AUTHORITY: Lucka Kapetanija Ploce, Lucka Kapetanija, 58340 Ploce, Yugoslavia. *Tel:* 058/79008. *Cables:* Lucka Kapetanija Ploce. *Contact:* Captain Busurelo Aleksandar, Harbour Master.

RIJEKA (including Bakar, Omisalj, Urinj, Sepen and Rasa): 45.19 N. 14.26 E. **(See Plan)**

PORT LIMITS: Outer line of Anchorage area.
DOCUMENTS:

5 Crew Lists
5 Passenger Lists
3 Manifest of Dangerous Cargo (send cable before arrival with description)
3 Stores Lists
2 Private Declaration
2 Narcotics Lists
9 Cargo Manifests
3 Freight Manifests
2 Transit Manifests
2 Cargo Plans
2 Copies of Bill of Lading

Cargo and Freight Manifests and Cargo Plan with Hatch List if possible should be mailed to Agent from loading port.
PILOTAGE: Compulsory for vessels over 500 g.r.t. Pilot boards in the roads within anchorage area limit. Pilot on VHF Channels 8, 12 and 16.

For oil terminal at Omisalj, Pilot boards 5 miles south of Rijeka Main Light. On request, Pilot will board tankers over 200,000 d.w.t. in the Northern part of Kvarner at Lat. 45° 02′ N., Long. 14° 14′ E. approx.

Pilot available 24 hours. ETA to be sent 72 hours, 48 hours and 24 hours prior to arrival
ANCHORAGES: All vessels with exception of those loaded with dangerous or hazardous cargoes, must anchor in the zone enclosed by the following points:

a) Lat. 45° 20.0′ N., Long. 14° 22.7′ E.
c) Lat. 45° 15.1′ N., Long. 14° 27.1′ E.
b) Lat. 45° 17.5′ N., Long. 14° 20.0′ E.
d) Lat. 45° 18.4′ N., Long. 14° 28.5′ E.

Tankers and vessels with dangerous cargoes must anchor in the following zone:

a) Lat. 45° 17.8′ N., Long. 14° 28.0′ E.
c) Lat. 45° 14.1′ N., Long. 14° 29.4′ E.
b) Lat. 45° 15.1′ N., Long. 14° 27.1′ E.
d) Lat. 45° 16.1′ N., Long. 14° 31.8′ E.

APPROACHES: The access entrance to the Rijeka Port Basin is 270 m. wide and that of the Susak Port Basin is 45 m. wide.
HEALTH: To obtain Free Pratique 24 hours before arrival advise following details: number of crew and passengers, health conditions and possible infectious diseases. No person allowed to leave vessel un Free Pratique obtained.
RADIO: Rijeka Radio, call sign YUR 500 kHz, Radio telephone on 2 metre band covering area of North Adriatic or by VHF Channel 16.

VHF: Port Authority on Channels 16 and 20. Tugs on Channels 16 and & Pilot on Channels 16, 8 and 12.

TUGS: 1,400 h.p. to 3,000 h.p. available.

BERTHING: General Cargo Facilities:

Rijeka Basin:

Gat Otokar Kersovani (The Otokar Kersovani Pier):

East: Length 150 m.
Depth alongside 7.30 m.

Head: Length 80 m.
Depth alongside 6 m.

West: Length 135 m.
Depth alongside 6.30 m.

The 32 ton crane has been installed for loading/unloading heavy lifts with the possibility of using grab for loading/unloading smaller quantities of bulk cargo in direct operation.

Equipment: 1×32 ton "Ganz" crane (east side)
1× 3 ton "Ganz" crane (west side)
for handling small lots of general cargo.

Ljubljanska Obala (The Ljubljana Quay):

Length 246 m.
Depth alongside 9.60 m. (31 ft. 6 in.)

By fitting appropriate quay fendering, this quay can accommodate vessels with maximum length of 200 m. and maximum draft 32 ft. 10 in. It is mainly used for direct or indirect loading/discharge operations of larger lots of general or bulk cargo.

Equipment: 7 × 3 ton dockside cranes.

Gat Vladimir Nazor (The Vladimir Nazor Pier):

East: Length 195 m.
Depth alongside 8.50 m.

This quay is mainly used for direct or indirect loading/discharge operations of larger lots of bulk or general cargo.

By fitting appropriate fendering vessels of max. length 195 m. and max. draft 31 ft. 6 in. can be accommodated.

Equipment: 3×5 ton dockside cranes.

Pier Head: Length 84 m.
Depth alongside 7.5 m.

West: Length 169 m.
Depth alongside 8 m.

This quay is mainly used for direct or indirect loading/discharge operations of general cargo or smaller lots of bulk cargo by means of ship's cargo gear.

Gat Vladimir Gortan (The Vladimir Gortan Pier):

East: Length 120 m.
Depth alongside 7.30 m.

Head: Length 79 m.
Depth alongside 7.20 m.

West: Length 120 m.
Depth alongside 7.30 m.

The Pier is mainly used for direct or indirect loading/discharge operations of smaller lots of general or bulk cargo.

Equipment: 6 × 1.5 ton dockside cranes (three cranes on the East quay and three on the West quay).

Zagrebacka Obala (The Zagreb Quay):

East: Length 161 m.
Depth alongside 7.30 m.

This quay is mainly used for direct or indirect operations of general or bulk cargo lots.

West: Length 200 m.
Depth alongside 7.50 m.

This quay is normally used for loading/discharge of larger lots of general or small lots of bulk cargo by grabs (2×6 ton cranes). By fitting appropriate fendering a ship with max. length 180 m. and max. draft 31 ft. 6 in. can be accommodated.

Equipment: 4×3 ton and 2×6 ton "Ganz" dockside cranes.

Splitska Obala (The Split Quay):

Length 158 m.
Depth alongside 6.25 m.

This quay is mainly used for direct or indirect/discharge operations of smaller lots of general or bulk cargo.

Gat "1 Maj" and Gat "29 Novembar" (The "1 May" Pier and the "29 November" Pier): These two piers within the Rijeka Port Basin, with the total quay length 450 m. and max. depth about 6 m., are used for the accommodation of passenger ships, car-ferries, fishing vessels and other smaller craft.

Trscanska Obala (The Trieste Quay):

Length 189 m.
Depth alongside 6.50 m.

This quay is mainly used for loading/unloading smaller volumes of general cargo, and is used occasionally for berthing and handling smaller Roll-on/Roll-off vessels.

Lukobran Rijeka (The Rijeka Breakwater):

Length 1,768 m.
Depth alongside 5.50 m. – 7.20 m.

A 10,000 d.w.t. floating dock is berthed along the breakwater quay. On the quay there is a port control centre with pilot station. The operational part of the quay is 700 m. long and is used for loading/unloading smaller lots of general cargo and for direct operations with bulk cargo and timber. A part of the quay is used for ship derat and for occasional minor repairs on ships.

Equipment: 4 × 5 ton dockside cranes.

Note: Almost all the quays and breakwaters are rail and road connected.

Susak Basin:

Obala 10.Rujna (The 10 Rujan Quay):

Length 240 m.
Depth alongside 6.50 m.

This quay is mainly used for direct or indirect operations of general cargo and timber.

Equipment: 7 × 3 ton dockside cranes.

Supilova Obala (The Supilo Quay):

Length 132 m.
Depth alongside 7.50 m.

Mainly used for loading timber by means of the ship's own cargo gear.

Gat Barcic (The Barcic Pier):

North: Length 106 m.
Depth alongside 8 m.

South: Length 106 m.
Depth alongside 7.80 m.

This pier is mainly used for the loading/discharge of smaller lots of general cargo or timber and for unloading smaller volumes of liquid cargo (wine, latex, etc.).

CRANES: Shore cranes with lifting capacities from 1.5 to 5 tons available at respective berths except at Gat V. Nazor – West side, Splitska Obala, Trscanska Obala, Supilova Obala and Gat Barcic where vessel's own gear must be used. Floating cranes of 30 and 100 tons. At shipyard "3.Maj" berth (20 ft.) 1 bridge crane of 300 tons.

CONTAINER FACILITIES: *Kontejnerski Terminal "Brajdica" (The Brajdica Container Terminal):* The Brajdica Container Terminal is located in the Eastern part of the Susak Port Basin at the mouth of the river Rjecina. It includes a quay with 2 berths (244 m. and 163 m.) with depth alongside 12 m. and 10 m. respectively and a 60 m. wide Ro-Ro ramp. Max. draft 11.0 m.

Equipment: 2×40 ton container cranes, straddle carrier, side loader, trailers, tugmasters, fork lift trucks, etc.

The terminal has about 100,000 sq.m. stacking area and a special container repair workshop.

Total annual capacity of the terminal is 100,000 TEUs. The terminal area is being constantly extended.

Ro/Ro vessels handled at Bakar (see below).

BULK CARGO FACILITIES:

Rijeka Basin:

Beogradska Obala (The Beograd Quay):

East: Length 110 m.
Depth alongside 7.8 m.

The quay is mainly used for working vessels carrying general or bulk cargo.

West: Length 257 m.
Depth alongside 12.95 m.
Max. draft 42 ft. 6 in. (even keel).

The silo located on this quay has a 57,000 tons storage capacity for grain and oleiferous seeds and is equipped with 2 ship loaders/unloaders with a total capacity of 600 t.p.h.

Vessels of maximum length of 250 m. can be accommodated, provided that the ship lies 8 m.–10 m. distant from the quay, berthed by dropping port bow anchor, stern line being moored to the buoy.

Gat Lole Ribara (The Lola Ribar Pier):

Length 160 m.
Depth alongside 7.90 m.

This pier includes a covered storage for fertilisers, single storage capacity 15,000 tons, and is equipped with the handling and bagging facilities for all types of fertilisers.

By fitting appropriate fendering vessels with max. length 180 m. and max. draft 32 ft. can be accommodated.

Susak Basin:

Lukobran Susak (The Susak Breakwater):

Length 320 m.
Depth alongside 6.50 m.

The breakwater quay is mainly used for loading/discharge of dry bulk cargoes and ships with max. length 180 m. and max. draft 31 ft. 6 in. can be accommodated. The ship must be berthed at a distance of 5 m. – 6 m. from the quay by dropping the port anchor with stern line moored to the breakwater.

Equipment: 6 × 5 ton dockside cranes.

Bakar:

Obala Podbok (The Podbok Quay):

Length 400 m.
Depth alongside 18.50 m.

Vessels with max. length 300 m. and max. draft 17.50 m. can be accommodated (170,000 d.w.t.). The quay is used for loading/discharging bulk cargoes such as iron ore, bauxite, coal, etc., rate up to 2,000 t.p.h. Max air draft 16.0 m.

Equipment: 3 ship unloaders (1 × 45 ton and 2 × 16 ton capacity). The stockyard storage capacity is 400,000 tons. An additional area for 200,000 tons has been reclaimed from the sea. A special conveyor system connects the bulk cargo terminal with the nearby Coke Plant on the West coast of the Bay of Bakar for unloading and delivery of coal to the Coke Plant.

Obala Goranin (The Goranin Quay):

Length 84 m.
Depth alongside 9 m.

This quay is used for loading coke into smaller vessels and for loading/unloading operations with general cargo stored in the Back-up Storage Facility "Skrljevo".

Ships of 160 m. length and max. draft 29 ft. 9 in. can be accommodated. To the West of the quay a new Roll-on/Roll-off berth is being constructed.

Equipment: 2 × 5 ton dockside cranes.

Also see "Shipmaster's Report" dated November 1979.

SPECIALISED CARGO HANDLING FACILITIES:

Sepen:

New terminal for gas and liquid chemicals carriers at Sepen-Krk Island (about 8 nautical miles S.S.E.'ly from Rijeka port) operated by Dina – Petrokemija. It consists of three berths: 2 "T" concrete jetties and one concrete multi-purpose berth. Jetty "A" is for gas carriers up to 15,000 cu.m., max. draft 10.5 m. Jetty "B" is for chemical tankers up to 60,000 d.w.t., max. draft 15 m. Length of multi-purpose quay is 90 m., max. draft 6 m., no shore cranes. Loading arms (8 in.) for ethylene liquid, ethylene vapour, VCM liquid and VCM vapour are on Berth "A". Loading arms (8 in.) for fuel oil, caustic soda solution and EDC liquid (plus EDC vapour 3 in.) are on Berth "B".

Srsica: Near Urinj tanker terminal. At Srsica there is a berth for loading LPG. Length of berth 68 m., depth alongside 10.0 m. Max. size 4,500 d.w.t. Loading rate 200 t.p.h. through 1×6 in. flexible hose.

Rasa:

Bazen Rasa (The Rasa Port Basin): The Rasa Port Basin is located some 30 nautical miles S.W. of Rijeka in the naturally protected bay of Rasa which is 5 km. long, with the navigable channel about 40 m. deep.

The port facilities in the Bay include:

165 m. long quay, with 11 m. depth alongside, used mainly for loading/unloading sawn timber. The quay area includes about 150,000 sq.m. of open space and 40,000 sq.m. of covered storage space for timber.

Equipment: 3 × 5 ton dockside cranes.

Separate pier with a berth, 25 m. long and 7 m. deep enabling the accommodation of ships up to 100 m. in length; it is exclusively used for loading livestock. The livestock terminal also includes a stable for the acceptance of about 1,400 head of cattle at a time.

STEVEDORES: Port Enterprise "Luka" Rijeka is the sole stevedoring company. Working 2 shifts: 1st from 0630 to 1430 hrs., 2nd shift from 1430 to 2230 hrs. Saturdays, Sundays and holidays may be worked on overtime. Unloading of bulk cargo at the basin of Bakar during the first shift on Saturday is considered to be an ordinary working shift. Timber operations normally performed during first shift only.

MEDICAL: Three hospitals and all kinds of medical assistance.

TANKERS: At Bakar Basin, berths for tankers up to 80,000 d.w.t. stern to shore and up to 40,000 d.w.t. alongside quay (draft 32 ft.) loading refined oil products.

At Urinj – 5 miles East of Rijeka – 1 berth for tankers up to 200,000 d.w.t. discharging crude oil. Also used for loading of virgin naphtha shipments. Tankers moor stern to quay using both anchors. Depths of 17 m. marked by 2 buoys. Cargo hoses: 1 flexible floating hose of 20 in. with 2 ends of 12 in. each. For connecting hoses on ship's manifold a derrick or crane of minimum 5 tons S.W.L. required. Also see "Shipmaster's Report" dated February 1980.

At Omisalj (Krk Island) (Lat. 45° 13.4′ N., Long. 14° 32.2′ E.) – 7 miles S.E. of Rijeka – new oil terminal for tankers up to 350,000 d.w.t. (minimum size 40,000 d.w.t.) and with draft up to 27 m. Two "T" shape piers (steel platforms) for alongside berthing. Each berth is equipped with four unloading arms of 16 in. for crude oil discharge and 2 arms of 12 in. for bunker delivery. Fresh water available, rate 25 t.p.h.

DENSITY: 1020 to 1025 depending on place, season and weather.

FRESH WATER: Available from quay in any quantity.

FUEL: All grades of bunker available by barge – advance notice required.

FIRE PRECAUTIONS: If 2 tankers moored side by side in Bakar, tug required to stand-by. Tankers moored stern to quay must have towing line ready.

CONSULS: Netherlands, Sweden and Denmark. Others at Zagreb and Belgrade.

REPAIRS: All kinds available.

DRY DOCKS: 3 Floating Docks: 5,600 tons, 12,000 tons and 25,000 tons lifting capacities.

SURVEYORS: Lloyd's Register, Bureau Veritas, American Bureau, Jugoregister.

GANGWAY/DECK WATCHMEN: Service available.

OPENING/CLOSING HATCHES: May be carried out by crew, otherwise by stevedores for extra payment.

CUSTOMS ALLOWANCES: About 40 cigarettes and 0.5 litre wine and a reasonable amount of spirits daily per man.

CARGO GEAR: Although operations usually by shore cranes, ship must have efficient cargo gear and relative certificates.

REPATRIATION: Possible by train, bus and air.

AIRPORT: At Krk Island (28 km. from Rijeka).

TIME: GMT plus 1 hour. Summertime is GMT plus 2 hours.

HOLIDAYS: January 1st and 2nd, May 1st and 2nd, July 4th and 27th, November 29th and 30th. Work can usually be arranged on Saturday, Sundays, January 2nd, May 2nd and November 30th from 0700 to 1400 hrs. on extra payment. If a holiday falls on Sunday the next working day becomes a holiday.

TELEPHONES: Connection possible upon special request.

SERVICES: Facilities for discharge of tank-washings at Bakar, compass adjusting.

IDENTIFICATION CARDS: Shore passes issued.

GENERAL: Lloyd's Agents, Jadroagent – Rijeka.

DELAYS: Waiting for some specialised berth occasionally experienced.

SHIPMASTER'S REPORT: Bakar: November 1979.

Approaches: Entry to Rijeka Bay is made between mainland (Istra) and the island of Otok Cres. A small ferry runs between the two from a landing stage just North of Rt. Prestenice and another connects with Rijeka. A very conspicuous, red and white horizontal striped 700 ft. high chimney is situated about 1.5 miles West of Bakarski Zaliv and makes a good steering guide for the run across as the actual entrance is difficult to pick out being very narrow and blending in with the hills behind.

Anchorage: Initially we were ordered, by Port Authorities, to anchor 1 mile S.W. of the chimney but later requested to move closer to Rijeka for convenience in servicing vessel. Second anchorage 1.5 miles South of main breakwater. Depth of water both places 32 fathoms and we used 10 shackles cable on port anchor. Bottom is glutinous mud and despite Force 8, gusting 9 winds we held our position although many cargo ships dragged quite alarmingly. The normal winds for this time of the year (November) are the "bora", a cold strong N.E. wind which funnels down the mountains and can develop suddenly to gale force. We had unusually strong and prevalent S.E. winds during 10 days at anchor.

Communications: Pilot station listens on VHF Channel 16 and works Channel 8. Rijeka Radio was very easily contacted on VHF and proved of great help in connecting with Agents, Owners and Charterers. Rijeka Radio not quite as good for contact on W/T as does not seem to follow the times for listening as laid down. R/T proved difficult as well, due to his frequencies being same as other main radio stations.

Port Officials: Agent and boarding party boarded morning after arrival and cleared ship with very little difficulty, only normal representation required. Shore passes, made out by Agent, sent on board later same day. Permission to immobilise engines and lower lifeboats given by Harbour Master on arrival although this later cancelled due to approach of storm after 24 hours.

Shore Leave: It is possible to arrange for shore launches while at anchor to give shore leave but the service can be curtailed due to bad weather and in Winter could result in crew being stranded ashore. Last boat from the port being 2200 hrs. At the berth, no restriction on shore leave exists and there is an excellent bus service into Rijeka from the village of Bakar. Prices are comparable with U.K. and quality of goods similar. In Bakar itself is an excellent restaurant, family owned, which serves first class food in very nice surroundings. The Owner speaks perfect English.

Fresh Water: At anchor, limited water is available by tug but very expensive. On the berth, good quality water is readily available in any quantity required.

Bunkers: Both intermediate and diesel oil is available by barge, price unknown but thought to be above average. Normally ships taking large quantities of bunkers would bunker at Augusta, Sicily.

Stores: Storing poses a problem due to several points. The access to the ship on the berth is difficult for large lorries as the extension to the wharf carried out over the past 3 years has wrecked the approach road to the face of the wharf and also the lorries if they make it to the wharf cannot get close alongside due to the conveyor belt and rails.

Storing at the anchorage also poses problems as there are no barges suitable for carrying large amounts and launches were used to bring the stores out to the ship but these can only carry a small quantity at a time. We had to load some large and heavy pieces of engine spares which had been sent from UK by lorry and these were transferred to a pontoon barge for delivery to the ship.

Crew Changes: Personnel were routed through Zagreb* mainly and this entailed a 4 hour drive from the airport to the ship, although it is possible to send people via Trieste which is a bit nearer. On arrival at Rijeka they have to see Immigration and are issued with shore passes. Wives and children should be entered on a passenger list and not included on the crew list as they get a special pass for 90 day entry.

*Whether this is normal routeing or was Company's choice is not known.

Cargo Handling: Berth has been extended and depth alongside increased to allow vessels drawing 17.5 m. to safely lie alongside although the 48 ft. 6 in. rock which was found previously at the Eastern end of the berth is still there according to the Pilot. (Approximate position of rock about 50 ft. off wharf and about 250 ft. from Eastern end). Berth is left in a very broken down looking state and lacks decent mooring posts at the Western end. Cargo is handled by 3 grabs (although only 2 were in use this call) 1 very large and the other 2 much smaller. Discharge rate on this call was averaging 30,000 t.p.d. with the major share being done by the larger grab which is at the Western end of the wharf. Cargo is either taken directly away by ore trains (if iron ore) or dumped onto back of wharf, or, if coke is taken direct to a coking factory on the other side of the bay by a covered conveyor belt. Storage or dumping facilities are very limited and this has a controlling effect on the discharge. When discharging iron ore, if insufficient trucks arrive and the stockpile is full, then discharge is on a stop/go basis and slow and also fully dependent on the trucks arriving regularly. This ship discharged 149,320 tonnes in 6 days as against a previous call experienced when 118,100 tonnes were discharged in 6.7 days. Maximum air draft 16.5 m. on berth.

Stevedores were good and co-operation was good. Any damage caused was repaired before departure without causing any delay to the ship and the standard of repair was good.

Repairs: Besides the "3 MAJ" shipyard, there are quite a few smaller yards and workshops where repair work can be arranged.

Medical: There is a special clinic for seamen which opens at 1200 hrs. In attendance at that time is a general doctor who refers patients to the different specialists and usually entailed a visit next day to see those people.

Customs Allowances: On arrival, each man allowed 200 cigarettes and 0.5 litre wine/spirits during stay. Customs would allow an issue every 5 days of 200 cigarettes per man and 8 bottles of spirits for the ship.

SHIPMASTER'S REPORT: Urinj: February, 1980.

INA Petroleum Co. Berth: See "Plan".

Office: The Port of Urinj, telephone 761.011 ext. 250. Can be contacted via Rijeka Radio at any time.

Berth: The petroleum berth of Urinj (Lat. 45° 17′ N., Long. 14° 31.7′ E.) is situated 5 miles E.S.E. from the Port of Rijeka. Its position is marked by a buoy whose characteristic is Fl.W. 3 sec. It is open 24 hours a day for commercial activities. The depth of water at this berth varies from 45 m. to 20 m. below the level of mean tides. The bottom is mud. Because of this it can accept tankers up to 200,000 d.w.t.

Documents on Arrival: The following documents are required on arrival:

5 copies of a Crew List (full personal data, including birth place, date of birth, etc., are necessary).
5 copies of Passenger List – if any
2 copies of List of Ship's Stores
2 copies of Manifest of Dangerous Goods – if any
2 copies of Customs Declaration List
2 copies of Transit Cargo Manifest
1 Cargo Manifest with extra copy for Customs.

Notice of Arrival: Vessels should give notice of arrival to their Agents via Rijeka Radio 48 hours and 24 hours in advance.

Approaching Directions: After passing Cape Jablanac a course of 06 leads safely to the tanker anchorage. The Pilot will board at anchorage area from a tug if the vessel is to proceed to the berth immediately.

VHF: Vessels equipped with VHF radio telephone should contact "Rijeka Pilot" on Channel 8 or "Rijeka Radio" on Channel 16 for berthing instructions.

Tugs: For berthing of a vessel the use of tugs is obligatory.

Gangway: Vessels should use their own port side gangway.

Manoeuvring: When the Pilot boards the vessel and forward tug is secured, both anchors (with one shackle in the water) should be ready for use. The stern mooring lines are carried toward the shore by a mooring boat. Usually 9 to 10 lines are used (6 from the vessel, and 4 from shore).

Connecting Hoses: After mooring operations have been completed, the connecting hoses will be brought alongside the starboard side of the vessel by a workboat. There are 2×12 in. hoses available, one for crude oil and one for products. Connecting and disconnecting of the hoses will be done by INA personnel, supervised by the Port Captain. The assistance of the ship's crew in operating windlasses, winches, etc. is required.

Note:

(a) A minimum S.W.L. of 5 tons is required for the 12 in. hoses.

(b) The vessel is responsible for good condition and effectiveness of the equipment.

(c) Vessels are required to keep main engine on stand-by all the time during their stay in berth, therefore no repairs to the main engine of the vessel may be undertaken during berthing. Power must be kept on for possible adjustments of mooring lines, anchors, and derricks.

Discharging: When the connecting of the hoses is completed, and the Ullage Report completed, Chief Officer will report the readiness of the vessel for discharging operations. The vessel is required to discharge the cargo as quickly as possible. Max. discharging rate is about 6,000 t.p.h.

Sailing: After the discharging operation is completed, the vessel should leave the berth as soon as possible. The Master should keep in touch with the Port Captain who will despatch a Pilot and Authorities on time.

Deballasting: After arrival at anchorage or berth and Free Pratique has been granted, the Loading Master will take samples of the ballast water for quality checks. Permission to discharge ballast water overboard will be granted by the Port Captain only. If laboratory analysis is not accepted by the Port Captain, vessel must shift to the slop-discharging installation at Bakar. The "not accepted ballast water" must be discharged there through stern discharge line only. After tank cleaning and line-flushing, vessel will be returned to Urinj with or without ballast at Master's option.

Loading: INA Refinery produces several kinds of products.

Cargo Loaded: Clean unleaded virgin naphtha.

Density at 15° Centigrade −0.74.

Loading rate – average 1,500 cu.m.p.h.

Documents on Sailing: The following documents are required on sailing:

4 copies of Crew List.
4 copies of Passenger List.
2 copies of List of Ship's Stores.

Free Pratique: To obtain Free Pratique by radio, vessels should send the following information to their Agent 48 hours in advance via Rijeka Radio:

The number of crew and passengers,
Health conditions and possible infectious diseases.

Note: No one is allowed to leave the vessel until Free Pratique is granted.

Medical: There are 3 well equipped hospitals in Rijeka whose medical staff is capable of giving full medical protection.

Fresh Water: There is an unlimited supply of fresh water available. It is supplied by a floating pipe-line attached to the Eastern signal buoy.

Fuel: All grades of bunker are available. Order must be placed 48 hours in advance.

Laundry: Laundry service has to be ordered immediately after arrival in order to ensure delivery of the clean laundry in time.

General: All kinds of repairs available by shipyard "Viktor Lenac".

There is a floating crane capacity up to 100 tons.

Dry docks accepting ships up to 60,000 d.w.t. also available.

Ship Supplies: In order to ensure timely supply of food and groceries vessel should place an order through the authorised stores (ship chandlers) immediately after or before arrival by radio.

Shore Passes: Shore passes are required for personal identification and serve as an entry permit to the terminal. Shore passes must be returned to the Immigration Office before sailing.

Transportation: During the time at the berth transportation of the crew and passengers from the vessel to the terminal is arranged by a shore launch from 0800 hrs. – 2400 hrs.

Lights: Manifold and poop mooring areas should be adequately lit to enable night mooring and discharging operations to be carried out with safety. Sea area around the ship also has to be properly illuminated.

Deck Watch: Deck watch must be maintained at all times while the vessel is in berth. In addition to its normal duties, the watch must inspect the hose connections and area around the ship against oil spillage, pollution, and to prevent unauthorised persons from boarding the vessel.

Action in Case of Emergency: In the event of a fire, oil spillage, or other emergency on the vessel, the emergency signal is 3 or more blasts of not less than 10 seconds duration each on whistle or siren supplemented by a continuous ringing of the general alarm bells.

SHIPMASTER'S REPORT: Rasa: October 1984.

Location: Lat. 45° 01.6′ N., Long. 14° 03.2′ E.

Documents: Same as Rijeka.

Pilotage: 48 and 24 hours' notice of ETA must be given to Agent. Pilot boards vessel off Traget Point (Lat. 45° 01′ N., Long. 14° 03.5′ E.). Sometimes Pilot boards off Ubas Point (Lat. 44° 56′ N., Long. 14° 04′ E.) by special arrangement. Pilot on VHF Channel 16.

Approaches: For obtaining Pilot off Traget Point, necessary to navigate through Zaliv Rasa Strait. This passage is easy during daytime, using the middle of the channel.

Anchorages: Off Traget Point with good sandy bottom and depths from 10 m. to 12 m.

Tugs: Not available.

Berthing: For berthing Pilot uses the starboard anchor for turning the vessel. There are 2 berths, 1 for loading livestock and 1 for loading general cargoes and special lumber from Austria. This berth is about 200 m. long with a depth of 10 m.

Cranes: 3 shore cranes of 5 tons and other equipment is available.

Stevedores: Port Enterprise "Luka" is the sole stevedoring company. Working 2 shifts from 0730 – 1400 hrs. and 1500 – 1900 hrs. Saturdays, Sundays may be worked on overtime. Loading rate 2,500 cu.m. of lumber per day. (approx.)

Fresh Water: Available from quay.

Cargo Gear: Stevedores use shore cranes and ship's gear together.

Repatriation: Possible by bus to Rijeka or Pula and then by air or train.

Airport: Nearest airport at Pula.

Time: GMT plus 1 hour.

Identification Cards: Shore passes issued.

Telephones: Near to the berth through telephone centre.

SHIPMASTER'S REPORT: Sepen: August 1987.

Port: Omisalj Products Terminal, Port Dina, Sepen Bay.

Chart: B.A. Chart No. 2719.

Location: The Terminal is located at Pt. Zaglau in Sepen Bay on Krk Island (near Rijeka).

Documents:

6 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest.
1 copy Health Declaration.
1 copy Arms and Ammunition List.
1 copy Drugs and Narcotics List.
1 copy Passenger List.
3 copies Cargo Manifest.
All passports.

Shore passes are issued and have to be returned before departure. The Stores Declaration is required on departure showing stores used during vessels stay in port. The bond is sealed.

Anchorage: Vessel anchored in the pilot boarding area in a depth of 20 fathoms.

Pilotage: Pilotage is compulsory and available throughout 24 hours. Pilotage outward is optional but has to be paid for even if not used. Terminal personnel advised us that pilotage is rarely used outward as vessel has to wait a long time.

Pilot boards from a mooring boat in approximate position Lat. 45° 12.4′ N., Long. 14° 31.6′ E. Pilot may be contacted on VHF Channel 8.

Approaches: Two red buoys mark the shallow water to the South of Omisalj Peninsular.

Two green buoys are positioned about 3 cables to the South of the red buoy marking a 13.0 m. shoal.

Approach is made between the 2 sets of buoys. Departure can be made between the berths and the green buoys.

Tugs: Tugs available from Rijeka, but not normally used.

Berthing: There are 2 product berths. Berth A handles gases, maximum draft 11.5 m. (12.5 m. CD) and Berth B handles products, maximum draft 15.0 m. This berth being the most Southerly.

There is also 1 general cargo berth with a depth of 6.0 m. Length of quay 90.0 m.

Berth A has a total flat face length of 60.0 m., being made up 45.0 m. of pier face and 1 dolphin. The pier is of concrete construction and has good fendering. The mooring arrangements are good with dolphins each side of the pier. Moorings consisted of 2 head lines/stern lines and 2 springs each end. Mooring boats are used to run the lines. The pier is some 10.0 m. above the water level so the gangway is steep.

Vessel always berths port side to at both berths. Ship's gangway used.

There is a shore hydraulic crane with 2 tonnes capacity which is available for handling stores, etc.

Berth A is about 2 years old and is an extension of Omisalj Tanker Terminal and can handle vessels up to 20,000 d.w.t. and a length of 110 m.

The berth is very exposed to Northerly winds.

Cargo: Vinyl Chloride Monomer (VCM) is exported. Two arms (most Northerly) are available (8 in. 300 ASA) for liquid and vapour. Arms are nitrogen purged on completion. Storage consists of 3 tanks with a total capacity of 10,000 tonnes. 2 pumps are available to load at a rate of 120 tonnes per hour.

VCM is produced on site in a new plant. Ethylene is mixed with chloride to produce ethylene dichloride, this is then used to produce VCM. Production is about 450 tonnes per day.

Ethylene is imported. The 2 arms for vapour and liquid (8 in. 300 ASA) are located to the South of the VCM arms. Arms are nitrogen purged on completion. Storage capacity is 16,000 tonnes in 2 tanks. The plant requires 1,000 tonnes every 2 days. Most ethylene comes from Porto Maguerra.

Vapour recovery is by 2 old compressors.

At present they require discharge temperature of −101° C. Vapour is also returned to the vessel for recovery on board.

Two new compressors are being installed which will enable plant to handle at around −98° C to −99° C.

First foot samples taken when loading VCM. Samples take at least 3 hours to analyse.

On completion of loading VCM it is normal to allow 5 hours before sailing.

Fresh Water: Fresh water is available at both piers. They can supply at 9 Bar pressure if required.

Stores: The State ship chandler in Rijeka has a good range of stores at moderate prices.

General: The airport at Rijeka is about 5 miles away. The village of Omisalj is about 30 minutes walk from the Terminal main gate (transport is compulsory to the gate from the pier). There is a bank in the village which is open late in the Summer. European currencies and dollars may be exchanged.

Boris Pricard, Publicity Adviser.

AGENT: Jadroagent – Rijeka, Obala J.R. Mornarice 16, 51000 Rijeka, Cable: Jadroagent Rijeka, Telex: 24100Yu Jadrag, 24268 Yu Jadrag.

SIBENIK: 43.44 N. 15.53 E.

DOCUMENTS/HEALTH/HOLIDAYS: Same as "Rijeka".

PILOTAGE: Compulsory for vessels over 500 g.r.t. Pilot Station located in position Lat. 43° 41.5′ N., Long. 15° 52.3′ E.

Pilot Station for vessels with dangerous cargo is in position Lat. 43° 38.7′ N., Long. 15° 52.5′ E.

ANCHORAGE: Small vessels coming from the West can anchor between Prvic Island and the shore.

Anchorage for Sibenik Port is within the following area:

(a)	Lat. 43° 40′ 30″ N.	Long. 15° 52′ 45″ E.
(b)	Lat. 43° 41′ 25″ N.	Long. 15° 52′ 45″ E.
(c)	Lat. 43° 40′ 40″ N.	Long. 15° 53′ 30″ E.
(d)	Lat. 43° 40′ 00″ N.	Long. 15° 53′ 30″ E.

RESTRICTIONS: All vessels over 50 g.r.t. must apply for permission to enter St. Ante Channel by using International Code Signal "Z" by flag during daylight hours and a white light above a red light visible 2 miles all round or a sound signal (letter "Z" of morse code) during night hours. Vessels may enter channel only when authorised by a signal, 2 black balls vertically disposed by day or 2 green lights vertically displayed by night, made by the signalling station at Jadrija. Signal Station on VHF Channel 71.

MAX. SIZE: Only draft limited. 33 ft. alongside in deepest berth.

VHF: Pilot has VHF available and maintains listening watch on Channel 14. Harbour Office on Channels 10 and 16.

RADIO: None. Vessel may call Agent through Rijeka Radio and Split Radio.

TUGS: 1 of 750 h.p.

BERTHING:

Obala JRM: Length 274 m., draft up to 7 m. – no shore cranes.

Gat Vrulje: East side length 132 m., head 114 m., West side length 101 m., draft up to 9 m. – no shore crane. Equipped with conveyor belt for loading bulk fertilisers.

Obala Dobrika: Phosphate Terminal, length 225 m., depth 10 m.

Obala Rogac: Length 432 m., depth 10 m. Cranes: 2×7 tons, 3×5 tons.

Obala Sipad: Length 294 m., draft up to 7 m. – no shore cranes.

Obala Crnica: Length 120 m., draft 7.5 m. – 1 shore crane – 8 tons.

BULK CARGO FACILITIES: Ores and minerals (phosphate) at quays Rogac and Dobrika.

Obala Dobrika: Phosphate handling, capacity 400 t.p.h., storage capacity 120,000 tons.

STEVEDORES: Port Enterprise: "Luka" Sibenik and timber stevedoring company "Sipad".

Port works in two shifts: 0700 – 1500 hrs. and 1500 – 2300 hrs. Overtime possible 2300 – 0700 hrs.

Timber operations normally performed during first shift only.

MEDICAL: Medical service available including hospitalisation.

DENSITY: 1005 – 1025, depending on place and weather.

FRESH WATER: Available from quay.

FUEL: Diesel and Gas oil in small quantities.

REPAIRS: Small repairs only.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: If not performed by crew, can be done by stevedores at additional charge.

CUSTOMS ALLOWANCES: About 40 cigarettes and 0.5 litre of wine/spirits per man per day.

CARGO GEAR: General cargo and timber are handled using ship's gear. Ore and minerals by shore cranes fitted with grabs.

REPATRIATION: By train or bus and by air from Split Airport nearby, or from Zagreb or Zadar.

TIME: GMT plus 1 hour. Summertime – GMT plus 2 hours (March-September).

POLICE/AMBULANCE/FIRE: Police, 92; Ambulance, 94; Fire, 93.

TELEPHONES: No facilities for placing telephone on board.

IDENTIFICATION CARDS: Shore passes given by local police.

GENERAL: Lloyd's Sub-Agents – Jadroagent Sibenik.

SHIPMASTER'S REPORT: July 1986.

Pilotage is compulsory and available day and night. Pilot boards the vessel in the vicinity of red pillar light buoy (RF. 12s. 4M.) in approximate position Lat. 43° 42.8′ N., Long. 15° 51.1′ E. Pilots operate on VHF Channels 16 and 14.

The best anchorage is inside the South part of Sibenski Canal. We anchored in approximate position Lat. 43° 40.7′ N., Long. 15° 53.1′ E. The bottom is gravel, sand and algae.

There is a phosphate pier with silos on the quay (only one pipe available at present, plans to build another pipe during the next year) whose capacity is 6,500 tonnes per day. Maximum permissible draft for this pier is 32 ft. but it is especially important for Master and Chief Officer to know that on this pier, owing to insufficient depth, a vessel even with a draft of 30 ft., cannot be berthed alongside. Vessel normally 2.0 m. – 3.0 m. from the quay. Berthed vessel is partly aground so draft survey will show signifiantly less cargo than that actually loaded. It is therefore recommended that draft is checked before Pilot boards and thereby check the actual quantity of cargo on board. Also Masters and Chief Officers must bear in mind that water is very brackish and density varies, so during draft survey density must be checked at various depths (recommended to check the density at depths 2.0 m., 6.0 m. and 9.0 m.) and at different locations.

Draft survey is made by official control house (Jugoinspekt or Jugokontrola or Zik) on arrival and on departure and is very rigorous.

Fresh water is available at the pier.

AUTHORITY: Lucka Kapetanija Sibenik, Obala Oslobodjenja 8, 59000 Sibenik. *Tel:* 059-24261, 22071, 22088. *FAX:* 27378. *Cables:* Kapetanija Sibenik. *Contact:* Captain Janes Lakos, Harbour Master.

AGENT: Jadroagent – Sibenik, Obala Oslobodjenja 9, 59000 Sibenik Cable: Jadroagent Sibenik. Telex: 27323 Yu Jadrag. Tel: 22-570, 22-571 (After hours) 25-544.

SPLIT: 43.31 N. 16.26 E. (See Plan)

DOCUMENTS:

5 Crew Lists.
5 Passenger Lists.
2 Stores Lists.
3 Personal Effects Lists.
3 Cargo Manifests.
3 Bills of Lading.
1 Health Declaration.

PILOTAGE: Compulsory for vessels over 500 g.r.t. If vessel bound for Split, Dugi Rat or Trogir, Pilot will normally meet vessel 0.5 miles off the City Port Entrance, day or night, but on request Pilot will board a vessel S.W. of Razanj Lighthouse (Lat. 43° 19′ N., Long. 16° 25′ E.).

A vessel bound for Trogir may also take a Pilot 0.5 miles off Galera Light (Lat. 43° 28.4′ N., Long. 16° 11.5′ E.).

It is advisable to contact pilot station on VHF Channel 12, or via Split Radio on Channel 16, prior to arrival.

A vessel awaiting a Pilot can anchor South of City Port Breakwater.

ANCHORAGES: Vessels can anchor S.E. of City Port Entrance, 0.5 miles off the breakwater, in 40 m. depth, muddy bottom.

In case of very strong S.E. wind it is recommended to anchor in Southern part of Luka Milna (Lat. 43° 20′ N., Long. 16° 26′ E.) in 25 m. to 30 m. depth, sandy bottom.

RESTRICTIONS: Large tankers are handled in and out of the harbour during day time only. LPG carriers also enter port in day time only.

MAX. SIZE: No restrictions except draft. Maximum permitted draft for passenger ships in City Port (Southern Basin) 8.8 m.; in Northern Port for general/bulk cargoes 10.6 m. but for grain (Silo Quay) 11.3 m. and for oil tankers 11.9 m.

HEALTH: To obtain Pratique, Health Declaration required. In event of any disease or fever contact Agents.

RADIO: All messages to Agent via Rijeka Radio (on HF), or via other Yugoslavian Coast Stations on MF radio telephony or MF radio telegraphy and VHF.

Answers to messages via Rijeka Radio only.

VHF: Split Radio on Channel 16 (permanent watch). Pilot station on Channel 12 (listening watch from 0700 hrs. to 2000 hrs. local time), Port Authority on Channel 10, tugboats on Channel 14.

TUGS: Only low power tugs available (500 KW declared by owner). Normally ship's lines used. If tug's lines used 10% extra is charged.

BERTHING:

Northern Basin:

Northern Port: Continuous quay of total length 870 m. divided into 5 berths with the following permissible ship drafts: Berth No. 1, 8.5 m. Berth No. 2, 9.7 m., Berth No. 3, 7.3 m., Berths No. 4 and 5, 10.3 m. where general and bulk cargoes handled, mostly by shore equipment.

Cement factory "Partizan", Kastel Sucurac, length of quay 222 m. draft 9.7 m., cement in bulk mostly loaded.

Cement factory "Prvoborac" Sv. Kajo, quay length 274 m. draft 8.2 m., cement in bags only loaded.

"Jugovinil" factory Kastel Sucurac, quay length (dolphins) 80 m. draft 9.7 m., for LPG carriers only.

Silo Quay, Vranjic, length 110 m., draft 11.3 m., discharging/loading grain by multiport.

A. Vucicic factory, Vranjic, quay length 262 m., draft 7.3 m., where discharging asbestos and loading asbestos products. Shore crane and ship's gear used.

Southern Basin (City Port):

Breakwater Quay, length 230 m., draft up to 8.3 m. Ro–Ro ramp available.

Gat Spanjolskih Boraca (ex-Sv. Duje), total quay length 465 m. draft up to 7.9 m.

Gat Proleterskih Brigada, total quay length 350 m., drafts from 3.9 m to 7.0 m.

City Port serves passenger ships and car ferries only.

CRANES: *Northern Port:* 2×7 tonne bridge cranes and 4×5 tonne gantry cranes. Floating crane of 60 tonne lifting capacity also available.

BULK CARGO FACILITIES: One quay (Silo Quay, Vranjic), length 110 m., draft 11.3 m. Max. height of discharging gear above sea level is 8.0 m. Max. loading/discharging rates 3,000 – 5,000 tonnes.

SPECIALISED CARGO HANDLING FACILITIES: One berth for LPG carriers (Jugovinil Factory Berth).

STEVEDORES: "Lucki prekrcaj i skladista" is the sole stevedoring company. Work in two shifts from 0600 – 1300 hrs. and from 1300 – 2000 hrs.

MEDICAL: No advance notice except in case of serious illness to be included in arrival cable. Hospital facilities available.

TANKERS: Two discharging berths alongside the quay. Discharge lines 6 in., 8 in. and 10 in.

Berth for small tankers, length 80 m., draft up to 7.0 m.

The other quay, length 150 m. (dolphins) and permitted draft 11.9 m.

Depending on type of cargo, average load/discharge rate is from 300 – 600 tonnes per hour.

DENSITY: Average density 1025.
FRESH WATER: Available at all berths. Order through Agent.
FUEL: Obtainable. Advance notice required.
CONSULS: Denmark, Finland, Italy, Netherlands and United Kingdom.
REPAIRS: All types of deck and engine repairs possible.
DRY DOCKS: One floating dock at Trogir, length 180 m. and one at Northern Basin, length 116 m.
SURVEYORS: Jugokontrola, Jugoinspekt, Jadroinspekt (Cargo Inspectors).
Lloyd's Register, American Bureau, Bureau Veritas and Jugoregister representing DNV, NKK and GL, Panama, etc.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally by ship's crew.
CUSTOMS ALLOWANCES: About 40 cigarettes and reasonable amount of wine/spirits for each crew member daily.
CARGO GEAR: Load/discharge mostly effected by shore gear.
REPATRIATION: All facilities available for crew changes.
AIRPORT: City centre to airport 23 km. 5 flights daily to Zagreb and 3 to Belgrade. Also direct flights to Rome, Paris, London, Munich, Hamburg and Zurich.
TIME: GMT plus 1 hour. Last Sunday in March clocks advanced 1 hour. Last Sunday in September clocks retarded 1 hour.
HOLIDAYS: January 1st, 2nd; May 1st, 2nd; July 4th and 27th; November 29th, 30th.
POLICE/AMBULANCE/FIRE: Police, 92; Ambulance, 94; Fire, 93.
SERVICES: Compass adjusting, radio/radar services and calibration of DF, divers for surveys/repairs, Lloyd's Sub-Agents (Jadroagent-Split), ship's laundries.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Shore passes issued.
AUTHORITY: Lucka Kapetanija, Obala Lazareta 1, 58000 Split. *Tel:* Spilt 48-062. *Telex:* 26496 (Yu Kap St).
"Luka Split", Gat Spanjolskih Boraca, 58000 Split, Yugoslavia. Tel: Split 589-299.

ZADAR: 44.07 N. 15.14 E. (See Plan)

DOCUMENTS/HEALTH/HOLIDAYS: Same as "Rijeka".
PILOTAGE: 48 and 24 hours' notice of ETA must be given to Agent. According these notices Agent arranges for Pilot to board on arrival. Pilot boat blue motor launch with large "P" on bow and "H" flag. Pilot contacted on VHF Channel 12 or 16.
ANCHORAGES: About 0.5 mile, 245° from green port light, (Fl. G. 2 sec.) on the North part of Zadar Peninsular. Average depth about 40 m.
MAX. SIZE: Multi-Purpose Terminal (Berth No. 2): Max. draft 8.5 m.
Cereals Terminal: Max. draft 12.5 m.
Also see "Tankers" and "Berthing".
RADIO: Rijeka Radio, "YUR" or Split Radio "YUS".
VHF: Zadar Radio listens on Channel 7, Port Captain on Channel 10 and Pilot on Channels 12 or 16.
TUGS: 1 tug 1,200 h.p. Large vessels use 2 tugs, with the additional tug coming from Split. Tugs normally join 200 m. – 300 m. from breakwater, vessel's lines usually used.
BERTHING: *Zadar Old Passenger Port:* Mainly used by coastal passenger traffic and cruise ships.
Zadar – Gazenica Cargo Port: Berth No. 1: Length 160 m. Draft from 6.6 m. fore to 11.0 m. aft.
Berth No. 2: Length 145 m.
Soya Bean Berth: Length 140 m. 1 berth for discharge of soya beans and grain, rate 150 t.p.h.
CRANES: Heavy lift shore crane, capacity 100 tons.
STEVEDORES: Number of gangs required to be stated in usual notice of ETA.
MEDICAL: Advance notice not necessary, hospital facilities available.
TANKERS: Gazenica Port: 1 tanker berth, max. draft 10.35 m. (34.1 ft.) forward, 15.0 m. (49.2 ft.) aft. Length of the ship is not restricted.
Floating barriers/booms compulsory for vessels loading/discharging mineral oils.
DENSITY: Average density in the port – 1026.
FRESH WATER: Connections on piers, rate of delivery 8 – 15 t.p.h.
FUEL: Fuel available for coasters only.
CONSULS: None.
REPAIRS: Deck and engine repairs possible.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally, but not compulsorily, carried out by stevedores.
CUSTOMS ALLOWANCES: 200 cigarettes per person. Tobacco and liquor sealed in bond.
REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriations.
AIRPORT: Zadar Airport served by regular daily flight for Zagreb with connection on all international flights.
DRY DOCK: 2 floating docks, 8,500 and 2,000 tonnes lifting capacity on Ugljan Island.
TIME: GMT plus 1 hour. Summertime kept.
POLICE/AMBULANCE/FIRE: Police, 92; Ambulance, 94; Fire, 93.
TELEPHONES: There are facilities for placing telephones on board.
IDENTIFICATION CARDS: Needed. Issued by police.

SHIPMASTER'S REPORT: September 1987 (Updated 1990).
Port: Gazenica
Charts: B.A. Charts No. 2775 and 2771.
Documents:
6 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest.
1 copy Health Declaration.
3 copies Cargo Manifest.
Shore passes are issued and have to be returned before departure.
A Stores Declaration is required prior to departure showing stores used whilst in port.
Approaches: Approaches are through deep water down Zadar Kanal.
Most of the island passages are well charted and the navigation aids are good. The depths are as shown on the chart.
There is a shallow bank off the North Breakwater Buoy off Zadar/Gazenica cargo port.
Anchorage: Vessels bound for the industrial port of Gazenica (2 miles South of Zadar City) normally anchor and wait for clearance or berth off the old city as per anchorage indicated on B.A. Chart No. 2775 (position Lat. 44° 0.6′ N., Long.15° 12.6′ E.) in about 20 fathoms with mud bottom.
An alternative anchorage is off Gazenica in position Lat. 44° 05.2′ N., Long. 15° 15′ E.
Pilotage: Berthing is carried out in daylight hours only. Unberthing takes place between 0600 hrs. and 2400 hrs., depending on wind. Berthing does not take place if there is a southerly wind in excess of Force 5 blowing.
Pilot normally boards off the town from a launch. Pilot may be contacted on Channels 16 and 12, however VHF is not continously monitored.
Rimini in Italy also use VHF Channel 12 so some confusion can arise.
Tugs: Normally 1 tug is used for berthing using a ship's line from the stern. One tug comes from Japlenicki Shipyard on Ugljanisl Island. Additional tugs if required come from Split. Pilot advises that use of tugs is costly.
No tugs used on departure.
Berthing: Vessel berthed on No. 3 Berth in Gazenica which is on the South side of the harbour. Oil and VCM handled at the berth.
Vessel berths stern first with the aid of a tug. Occasionally anchor is required when berthing port side to. If it is very windy the starboard anchor is dredged along the bottom.
Berth No. 2, the most Northern berth in the port, is for grain handling. The hulk indicated on B.A. Chart No. 2775 is for storing soya bean oil. The products berth, Berth No. 3, and a small berth for oil rig supply vessels, Berth No. 4, are both on the South side.
Berth No. 3 (for VCM) has a flat face of 60 m. The fendering is fair but widely spaced. Maximum draft permitted if berthing head out, which is normal, is 38 ft. or 42 ft. if berthing head in. It is normal to berth port side to. The water depth shoals to 29 ft. on Berth No. 4. Moorings at No. 3 Berth consist of 2 head/stern lines, 2 breast lines and 2 springs forward and aft. The pilot boat assists with running of moorings.
Berth No. 3 is very exposed to southerly winds but pilot reports that the berth is fairly sheltered from Northerly winds (Bora).
Cargo: Vinyl Chloride Monomer (VCM): No discharge takes place between 2200 hrs. and 0500 hrs. due to Port Fire Regulations.
3 × 4 in. rubber hoses are used from the shore manifold to the "pig" bolted on to the ship's manifold. Rate of discharge about 250 tonnes per hour to 300 tonnes per hour. Generally speaking, the shore authorities do not allow the vessel to "hot gas" to shore upon completion of cargo.
There are 2 shore tanks numbered R301 with capacity of 4,038 cu.m. and R302 of 5,225 cu.m. The tank working pressure is −10° C to +50° C at 2 to 3 kg/sq.cm. Maximum pressure 4.9 kg./sq.cm.
Samples take 45 minutes per sample to analyse.
Shore personnel connect and disconnect hoses.
Fresh Water: Fresh water available from shore hydrant at a rate of about 30 t.p.h. Shore hose and meter are used. Cost of water is U.S.$ 1.7 per tonne. The water man is ordered by the shore watchman and he attends quite quickly. Quality of water is good.
Ship Chandlers: The national chandler JTP Tankerkomerc gives good service at reasonable prices. Tel: 057-436888. Telex: 27251. Fax: 057-311897.
General: The old passenger port is a picturesque tourist town. All commercial ships except ferries use this port.
There is a daily ferry service in the Summer to Ancona and a twice weekly service to Rimini and Trieste. In Winter there is a twice weekly service to Ancona and a weekly service to Rimini and Trieste.
The airport which is about 7 km. to the East of the town provides regular flights to Zagreb and Belgrade.
There is a new berth/basin at Gazenica for timber and oil rig vessels (position Lat. 44° 05.4′ N., Long. 15° 16′ E.). There is a new yacht/fishing harbour at Uvala Kalovare (position Lat. 44° 05.8′ N., Long. 15° 15′ E.).
The red buoy near Rt. Vitrenjak has been moved to position Lat. 44° 07.48′ N.,Long. 15° 12.69′ E.

AUTHORITY: Lucka Kapetanija – Zadar. Radnicka Obala 8, 57000 Zadar, P.P.182. *Tel:* 223-44, 433-778, 433-758. *Telex:* 27163 Yu Kap Zd. *FAX:* 437-825. *Cables:* Lucka Kapetanija Zadar.

AGENT: Jadroagent, N. Nodila b.b., 57000 Zadar. Tel. 23210, 23215. Telex: 27129 Yu Jadrag. Telegrams: Jadroagent Zadar. Fax: 430-464.

ZELENIKA: 42.27 N. 18.35 E.

DOCUMENTS/HEALTH: Same as "Rijeka".
PILOTAGE: Pilot boards at entrance of the Bay of Kotor, near point Punta Ostro. In bad weather Pilot boards at anchorage.
ANCHORAGE: Good ground for anchorage S.W. of Zelenika, about 0.25 miles off port light in about 27 fathoms.
MAX. SIZE: Port of Zelenika damaged by earthquake and temporarily closed, vessels berth at the passenger quay at Herceg-Novi.
HEALTH: Radio Agent requesting Free Pratique, 24 hours before arrival. For vessels over 500 g.r.t. Pratique is given at the anchorage. For small ships and yachts, Pratique is given at Herceg-Novi.
TUGS: None. In cases of necessity can be ordered from shipyard at Bijela.
BERTHING: The berth is assigned through the Agents giving notice 24 or 48 hours in advance. At present there is berthing for small ships only at the passenger port at Herceg-Novi.
STEVEDORES: State stevedoring company.
MEDICAL: Nearest hospital at nearby town of Herceg-Novi.
FRESH WATER: Available from hydrant on the passenger quay at Herceg-Novi.
FUEL: Nearest bunker station is at Bar.
CONSULS: None.
REPAIRS: Any kind of repairs including dry docking at nearby shipyard at Bijela.
DRY DOCKS: Floating dock lifting capacity 10,000 tons, LOA 184 m., length over keel blocks 165.6 m., inside free breadth 25.5 m.

Floating dock lifting capacity 33,000 tons. LOA 252 m., length over keel blocks 235 m., inside free breadth 44 m.

The yard is about 4 miles East of Zelenika. The yard has 1,300 m. of fitting pier.
OPENING/CLOSING HATCHES: If not performed by crew, can be done by stevedores.
CUSTOMS ALLOWANCES: About 40 cigarettes and 0.5 litres wine/spirits per man per day.
CARGO GEAR: Loading, unloading performed with ship's gear.
REPATRIATION: By bus to Dubrovnik, and from there bus, plane or ship to main cities in Yugoslavia.
TIME: Central European Time. GMT plus 1 hour. Summertime kept.
HOLIDAYS: January 1st and 2nd; May 1st and 2nd; July 4th and 13th; November 29th and 30th. Work can be arranged on Sundays and on 2nd day of two-day holidays.
POLICE/AMBULANCE/FIRE: No direct connection, in case of necessity call Agency, Tel. (082) 81-456 Jadroagent or (082) 81-261 Jugoagent.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Shore passes issued by local police.
AUTHORITY: Lucka Ispostava Zelenika.
AGENT: Jadroagent, Medunarodna pomorska i saobracajna agencija, Poslovna jedinica, Bijela. Tel: (082) 81-456. Telegraphic address: Jadroagent Bijela.

NOTES

Please also advise Shipping Guides Ltd.

Zaire Republic

GENERAL:

ETA: It is essential that any change of vessel's ETA should be transmitted sufficiently in advance in order to avoid short shipments of cargo.

Matadi is only a transit port where cargo is not stored in order to avoid congestion.

Imported cargo is immediately re-forwarded to the interior while export cargo is only brought to Matadi a few days before the ETA of the vessel for which it has been booked.

Therefore, in order to make the cargo available at Matadi, shippers need a notice varying according to the cargo concerned, but which cannot be less than 2 weeks as is the case for coffee.

Agents at Matadi and Boma have been instructed to inform Port Authorities latest 4 days before berthing of inward cargo tonnages.

Non compliance with this provision may result in berthing delay.

PILOTAGE: Vessel should cable ETA 24 hours before arrival to the Harbour Master. Cable address: "Maritime Banana" via Banana Radio.

Pilotage compulsory for all vessels over 500 g.r.t. bound for Boma and Matadi.

Ships bound for Matadi and/or Boma must take a Pilot at the pilot station at Banana (at the mouth of the Zaire River). Pilot station at Banana can be contacted directly by radio (VHF).

In order to increase the safety and to facilitate the navigation on the river the Regie des Voies Maritimes have decided that in case a vessel is not equipped with a VHF installation the Pilot will bring one on board, for which a charge is made.

The following rules must be observed at the request of the Regie des Voies Maritimes for embarking and dis-embarking of Pilots.

If gangway is rigged astern on the port side it is compulsory to use the pilot ladder.

If gangway rigged amidships on port side it is recommended that the pilot ladder is used in combination with the gangway.

Pilots requesting only the gangway do so at their own risk.

Theoretically sailing from Matadi/Boma is only authorised if vessel can reach Banana by 1800 hrs. at latest since navigation on the Zaire river is normally limited to daylight hours.

With regard to the trim the pilotage services ask Masters to comply with following rules:

Maximum draft 12 ft. aft; 2 ft. forward.

DOCUMENTS: *Ship's Documents required on arrival:*

Clearance from last port.
7 Crew Lists.
3 Lists of Arms and Ammunition.
7 Passenger Lists.
1 List of stowaways.
2 Crew Declarations.
3 Lists of Ports of Call.
2 Stores Lists.
1 International Tonnage Certificate.
1 International Load Line Certificate.
1 Derat Exemption Certificate.
1 Cargo Ship Safety Equipment Certificate.
1 Certificate of Registry.
1 Radiotelegraphy Certificate.
1 Construction Certificate.
1 Certificate Form on Board.
Free Pratique.

Documents required for disembarking passengers and discharging cargo:

A. To be received by mail at least 8 days before ship's arrival:
(1) Cargo:
  3 Freight Manifests
  8 Cargo Manifests
  5 copies of Bills of Lading
  6 copies of Stowage Plans.
(2) Passengers:
  1 Accountancy
  3 Passenger Lists, for passengers for the port/or in transit.
B. To be received by ship's bag at ship's arrival at quay:
(1) Cargo:
  1 Freight Manifest
  4 Cargo Manifests
  3 copies of Bills of Lading.
(2) Passengers:
  1 Freight Manifest
  4 Passenger Lists for passengers for the port and/or in transit.

It is most important that stowage plans be available before vessel's arrival. Vessel's operations are indeed delayed to the next shift if same are only remitted upon arrival.

DRAFTS AND CURRENTS: Drafts on River Zaire are presently as follows (September 1989):

Inwards: High Water: 25 ft. 00 in.
Outwards: High Water: 26 ft. 00 in.

The authorised drafts are notified regularly by the Port Authorities.

The currents of the river and from berth to berth as well as in Matadi and Boma vary and depend upon the high and low levels of the water sometimes with adverse currents and still waters.

For proceeding to Matadi and according to the season vessels must have a speed of at least 10.5 to 11 knots, especially to pass the "Devil's Cauldron" about 3 miles before Matadi. 12-13 knots or greater sometimes requested for a 10-15 minute period.

HEALTH: Ship's crew must have an International Certificate of Vaccination against yellow fever and cholera.

RADIO: Banana Radio, 9PA.

Telegraphy – medium wave: 0430 – 2030 UTC.
500 kHz.
Working frequency: 489 kHz.
Listening frequency: 480 kHz.

512 kHz.
Traffic list each hour + 00 of each hour during service hours.

Telegraphy short waves: 0500 – 2000 UTC.

Traffic list at:
0500/0700/0900/1100/1600/1900: 8445.0 kHz
0600/0800/1200/1400/1700 : 12660.0 kHz
1000/1300/1800 : 22431.0 kHz
1500 : 17184.8 kHz

Reserve frequency for medium wave: 6491.5 kHz

Remarks: This frequency is used for traffic when QRN appears on 489 kHz.

Reserve frequency: 8546 kHz.

Listening on 8, 12 and 16 MHz, Channels 5, 6 and 15. On 22 MHz, Channels 3, 4 and 9.

Each Channel is monitored during 1 minute in a scanning system and this, during 15 minutes following traffic list (same frequency band as traffic list) after 15 minutes, the receiver is blocked on Channel 6 (4 on 22 MHz) until next traffic list.

Telex on Request

Paired frequencies:

Code 34646 (This is not definite since it must be allocated by UIT).

9PA:	8714 kHz	Ship:	8353 kHz
	13078.5 kHz		12498.5 kHz

Telephony: 0430 – 2030 UTC

Listening:	2182 kHz	2182 kHz
	4125 kHz	4125 kHz
	6215.5 kHz	6521.9 kHz
	8257 kHz	8780.9 kHz
	12392 kHz	13162.8 kHz

Telephony Short Wave: 0430 – 2030 UTC.

Traffic list at:

0430/0630	on 6521.9 kHz	– listening 6215.5 kHz.
0530/0830/1030/1530	on 8753 kHz	– listening 8257 kHz.
0730/0930/1430/1930	on 4419.4 kHz	– listening 4825 kHz.
1130/1630	on 13162.8 kHz	– listening 12392 kHz.
1230/1730	on 17294.9 kHz	– listening 16522 kHz.
1330/1830	on 22658 kHz	– listening 22062 kHz.

Telephony VHF: 0430 – 2030 UTC.

Channel 16. Simplex Channels. Duplex Channels.

Remarks:

1. Telephone connections are possible and Agent accepts telegrams in telephony.
2. Other available frequencies for telephony:

Banana Radio/9PA	*Ship*
4357.4 kHz	4063.0 kHz
4382.2 kHz	4087.8 kHz
8777.8 kHz	
8762.3 kHz	8238.4 kHz
13181.4 kHz	12410.6 kHz
17350.7 kHz	16577.8 kHz

3. Radio beacon continuous.

Frequency: 315 kHz.
Call Sign: BAN.
Position: Lat. 05° 53′ 24″ S., Long. 12° 17′ 48″ E.
Power: 1kW.
Antenna: Omni-directional.
Range: 350 miles (daylight).

BRIDGES: *Bridge on River Zaire:* It is advisable to sound whistle on approaching bridge, to warn small canoes in the fairway.

FUEL: Must be ordered from Petrozaire at least 48 hours before required. Normally supply of gasoil, light and heavy fuel is effected at Banana between Buoys 12 and 14 ex-barges with: minimum quantity – 250 tons; maximum quantity – 800 tons (total barge quantity).

Smaller quantities can also be supplied in Matadi or Ango Ango.

STEVEDORES: The ONATRA (Office National des Transports) – public institution, has the monopoly of the handling, stevedoring and transit operations at the ports of Matadi and Boma.

At each berth the responsible "Pier Master" remains in constant contact with the Chief Officer during the whole operation.

Working shifts are as follows: 1st. shift: 0630 – 1430 hrs.; 2nd shift: 1430 – 2230 hrs. overtime; 3rd shift: 2230 – 0630 hrs. overtime.

Work must be ordered the day before vessel's arrival. However, if gangs are available, work can still be ordered the day of vessel's arrival but latest at 0930 hrs. during week days.

In principle no work is done on Sundays, holidays and during the night. If required same has to be ordered by writing 1 working day in advance before 1000 hrs. Port Authorities will then decide according to the situation at that time.

According to the situation of the Port, the Authorities can also order labour 24 hours per day Sundays and holidays included.

At Boma there is no third shift – however on special request, work can eventually be granted until 2400 hrs.

At Matadi work during third shift will only be ordered upon special request from vessel.

For all stevedoring operations the use of shore cranes/dock labourers is compulsory. It is only in particular cases such as handling of containers/"heavy lifts" or prolonged (electrical) breakdowns that Port Operators can authorise use of vessel's equipment.

GENERAL: *Quay Practices:*

The Zaire courtesy flag must be hoisted by foreign ships during daytime.

In view of the proximity of the town, the use of whistles, sirens and similar signals is forbidden, except on special occasions.

Safety nets must be put between ship and quay at each of the working hatches and beneath the gangway.

No rubbish whatsoever may be thrown overboard.

Official Language:

The official language used by the Port Authorities and Administration is French.

Cargo plans:

According to ONATRA's instructions, stowage plans of ships calling at Matadi/Boma must be issued in such a way that they show clearly where all goods loaded for Matadi/Boma in several ports are located. This enables ONATRA to have, at once, a clear view of each vessel and to study, before ship's arrival, the discharging/loading possibilities.

Those stowage plans must reach Agent before ship's arrival.

Vessel's loading/discharging operations will only start during the next shift if stowage plans are remitted upon vessel's arrival. A request can be made to shift the vessel to a more convenient berth depending upon the cargo concerned.

With regard to cargo loaded, ONATRA does not issue stowage plans and Masters should consequently be instructed to draw up stowage plans themselves for transmission to corresponding discharging ports.

It is customary not to moor ships at Matadi/Boma between 2200 hrs. and 0600 hrs. They remain at anchor.

Important Notices:

In connection with manifests for Matadi/Boma cargo:

1. Liner Terms Cargo:

According to the General Rules and Tariffs stowing, unstowing, loading, discharging rates are applied on weight/measurement, whichever is the highest irrespective of the freight unit.

The Port Authority ONATRA instructs therefore that:

(a) The Freighted Manifest remitted to them must show three columns detailing respectively weight and volume and freight unit (freight tons) of each cargo/bill of lading.

(b) At the bottom of each page a summing up of tonnage/weight, tonnage/volume and freight units (freight tons) should be mentioned.

(c) The last page of the manifest shall contain a separate recapitulation of weight tons, volumes and freight units (freight tons) showing thus the respective totals of each item.

Corrections or additionals added by the Agent at Matadi/Boma by hand or with typewriter are not accepted by ONATRA.

ONATRA is fully implementing the regulations and, for vessels whose manifests are incomplete or incorrect, a penalty, which may reach 1,000% of the stevedoring costs (or 10 times) is charged.

2. F.I.O. Cargo:

The same information is to be supplied as for Liner Cargo but, in addition, the manifest and B/L must clearly mention that cargo is carried on free out terms.

BANANA: 06.01 S. 12.25 E.

DOCUMENTS: See "General" before first port.

APPROACHES: In view of the strong current, and in view of the fact that the lights of the navigation buoys on the river do not always work properly, night navigation is practically impossible. Tankers, therefore, arriving at night, or in times of congestion, are recommended to anchor approx. 5 miles West of Moita Seca Light in approx. 10 fathoms, about 12 miles from Stella Buoy.

PILOTAGE: River can be entered direct from sea in deep water. Pilot (not compulsory) will board vessel from 0600 hrs. with Authorities at Pilot Station located one mile South of Banana Point.

The position of the flare of the SOCIR Refinery at Moanda is:

Lat. 5° 57′ 51″ S.
Long. 12° 25′ 07″ E.

The flare is visible during day and night and may be a good bearing for vessels approaching river.

Sailing from "Stella Buoy" at 0600 hrs. vessels with a speed of up to 14 knots must pass Bulabemba before 1400 hrs. and vessels with speed in excess of 14 knots by 1500 hrs.

MAX. SIZE: Tankers up to 35 ft. draft may discharge at buoy moorings. Also see "Berthing – Commercial Port".

HEALTH: Quarantine Officer boards at sea buoy. Free Pratique usually granted as soon as Maritime Health Declaration completed. Valid cholera and yellow fever inoculations required for all crew members.

RADIO: *Tankers:* At least 3 days' notice required to Agent (ETA and draft only) and to Harbour Master, "Maritime Banana" (ETA only). It is necessary to transmit these notices via another shore station (e.g. Cape Town Radio, Libreville Radio, etc.), as the Banana Radio Station can only be reached 2 days prior arrival. Close advice on changes in ETA necessary to prevent delays in waiting for Pilot and lighters.

Radio Banana (9PA) – see "General" before first port for details.

BERTHING:

Commercial Port:

The commercial port consists of a landing space of approximately 2,000 sq.m. in front of a warehouse with approximately 2,500 sq.m. storing room.

ONATRA, the Port Authority, has no cranes and the port equipment is extremely limited. Any discharging and/or loading must therefore be done by ships' gear.

With a draft of more than 17 ft. (indicative) cargo operations to be performed at anchor between Buoys No. 12 and No. 14. Barges and gangs are then supplied on request.

With a draft of less than 17 ft. (indicative) vessel can berth at ONATRA wharf inside Banana Bay.

Length of the wharf: 75 m.

DENSITY: Brackish to salt.

FRESH WATER: Not available.

FUEL: Must be ordered 48 hours in advance from Petro-Zaire. Bunkering takes place between Buoys No. 12 and 14. Gasoil, light and heavy fuel oil available. Barge capacity 800 tons, minimum order 250 tons.

MEDICAL: Doctor available for emergency only. No dental or hospital facilities.

TANKERS: Tankers remain at anchor between Buoys No. 12 and 16 on the river, anchorage being agreed upon by the Master and the local suppliers' representative who will have received the advice of the Pilot. Since there is no mooring buoy and in view of the strong currents it is recommended to use both anchors while main engine to remain on standby.

Cargo Operations: Tankers discharge into/load from cargo barges moored alongside either side. These barges (three in total) have a capacity of 1,650 long tons or 2,050 cu.m. and can receive the cargo at a rate up to 400 t.p.h. Under normal conditions the refinery will handle these barges per shift of 12 hours. Cargo operations are effected continuously day and night during Sunday and holidays, in shifts from 0600 – 1800 hrs. and from 1800 – 0600 hrs.

Sailing: Tankers sail without Pilot and may leave any time.

Moanda Terminal: To notify his arrival, Master to call M.V. "Afran Zenith" by radio. Vessel will then proceed to single buoy mooring berth with following particulars:

Depth: 57 ft.
Position: Lat. 5° 57′ 50″ S.
Long. 12° 08′ 19″ E.

where loading will take place.

The storage tanker is moored in position:

Lat: 05° 57′ 30″ S.
Long: 12° 06′ 00″ E.

No tank-cleaning facilities. Barge available for dirty ballast reception limited to 2,000 cu.m. per trip which occasionally and on special request can be put at disposal by the refinery.

Also see "Shipmaster's Report".

REPAIRS: No facilities.

HOLIDAYS: See "Matadi".

SHORE LEAVE: Shore leave is presently not allowed due to lack of communications; only in urgent cases may a crew member join one of the refinery tugs. There is no entertainment whatsoever ashore.

GENERAL: During stay of tankers at anchorage the discharge and/or loading operations are constantly supervised by representatives of the refinery, who are to be accommodated on board and to be provided with meals.

SHIPMASTER'S REPORT: September 1985.

Location: Moanda Oil Terminal is operated by the Zaire Gulf Oil Company. It is located about 10 miles offshore from Zaire. It consists of a SPM in position Lat. 5° 57′ 50″ S., Long. 12° 08′ 19″ E. in about 75 ft. of water. Crude oil is transferred to the export tanker at the SPM from the storage tanker "Afran Zenith" of 95,185 d.w.t.

Wind and Swell: Wind and swell are mostly from a Southwesterly direction with a heavy swell from March to September. The tidal range in the vicinity of the berth is 6.9 ft. The current in the area is a composite of the effect of the general Northwesterly drift and the outflow of the Zaire River. This results in a current of 3 – 4 knots or more in a Northerly at Westerly direction. In view of the foregoing, Masters of vessels calling at the terminal are advised that under no circumstances are engine repairs permitted within terminal limits.

Communications: Vessels bound for Zaire are required to advise their ETA:

(a) Via COMSAT to Master m.v. "Afran Zenith" GZOL 1242403; or

(b) Via telex or radiogram to the main office of the vessel's Agent in Kinshasa who will pass over the information to Zaire Gulf Oil Company (ZAGOC) and to their local office at Moanda.

ETA messages to be sent 72, 48 and 24 hours before arrival at the terminal and should contain the following information:

(a) Name of vessel.
(b) ETA in GMT (Zaire time is GMT plus 1 hour).
(c) Name of Master.
(d) Estimated arrival draft, fore and aft and displacement.
(e) Time for discharging clean ballast, if any.
(f) If vessel proceeding to any port(s) prior to Moanda and if so delays anticipated.

A 24 hour watch is maintained on VHF Channel 16 on "Afran Zenith" and contact is usually possible at a distance of 20 – 30 miles.

Dirty Ballast: No facilities exist for receiving dirty ballast and all tankers must arrive with clean ballast.

Cargo Information: Oil loaded at the Moanda Terminal is Zaire composite crude with an average API of 31.5. The loading temperature will vary from 80°F – 85°F and is fairly steady throughout the year. The loading rate is about 30,000 bbls.p.h.

Approach to Anchorage/Mooring Master Boarding Area: If vessel is required to anchor, the recommended tanker anchorage is within a circle 0.5 miles in diameter and its centre is located in a position 5 miles due West of the SPM. Owing to the presence of oil wells and submarine pipe-lines vessels should not enter into the area bounded by lines joining the following positions:

(a) Lat. 05° 46.5′ S., Long. 12° 12.5 E.
(b) Lat. 05° 49.5′ S., Long. 12° 09.0 E.
(c) Lat. 06° 00.0′ S., Long. 12° 09.0 E.
(d) Lat. 06° 00.0′ S., Long. 12° 18.0 E.
(e) Lat. 05° 53.5′ S., Long. 12° 18.0 E.

The ZAGOC Mooring Master Boarding Area is 3 miles due West (Lat. 05° 57.30′ S., Long. 12° 06′ E.) of the storage tanker "Afran Zenith" or boarding will be at the anchorage as appropriate.

Accommodation: During vessel's stay at the terminal the Mooring Master, Loading Master, Agent, Surveyor and 4 men for the hose gang will stay on board.

Mooring Arrangements: Mooring operations are only undertaken by day under normal weather conditions. Unmooring operations can be undertaken at any time. The following preparations are required on the export tanker:

(a) 4 mooring ropes, minimum length 220 m. and size 9 in., buoyant lines if possible e.g. polypropylene, in good condition.
(b) 2 suitable heaving lines of appropriate length.
(c) 2 mooring lines aft for securing a tug to realign the vessel to the buoy if necessary.

Hose Connections: 1×16 in. hose is connected to the ship's manifold.

Bunkers: Not available.

Fresh Water: Not available.

SHIPMASTER'S REPORT: April 1987.

Vessel discharged at Banana and Ango-Ango.

Approaches: Wide open with very deep water approach. Vessels can anchor at either side of the river mouth in 20 fathoms. Pirates do not appear to be a problem. The very small amount of traffic using the Congo indicates that there will be no problems with regard to crowded anchorage.

Pilotage: River passage is during daylight hours only. The Pilot boards off the Banana Creek Channel, and the lightening anchorage is between Buoys No. 12 and 14, however No. 12 Buoy is missing. A secondary anchorage is between Buoys No. 16 and 18, abeam of Crique Ariel Beacon. Both anchors with about 7 or 8 shackles will be used in either anchorage. The current is always out-flowing, so there is no fear of a fouled hawse on this visit. This vessel tried to anchor in the first anchorage, (vessels normally try the first anchorage, so as to be that much nearer to Banana for the lighters). Vessel started dragging anchors, so we hove up and moved into the second anchorage.

Officials: 14 officials boarded the vessel.

Documents:
8 copies Crew List.
6 copies Passenger and Mail List.
6 copies Stowaway List.
4 copies Cargo Manifest.
4 copies Ullage Report from Last Port.
6 copies Kroo Boy List.
6 copies Arms and Ammunition List.
6 copies Narcotics List.
6 copies List of Ports Visited.

Discharge: Lightering only at Banana.

The amount of lightering depends on the water available in the dredged sections further upstream, (all the cargo lightened has eventually to be taken up to Ango-Ango by the lighters).

On this occasion, we had to off-load into 5 lighters, to come up to 23 ft. draft (max. permissible draft up-river at this time). Only 1 tug was available so this meant 3 trips. No unloading took place between midnight and 0800 hrs. the next morning.

One pump was used, discharging to 1 barge each side simultaneously. The tug takes 2 barges at a time back to banana.

Passage to Banana and Ango-Ango: The passage to Banana takes 6 to 7 hours, and if vessel cannot arrive at Ango-Ango before 1700 hrs., then vessel will anchor at Boma. All passages take place during daylight hours.

The continuous outgoing river current can vary from 3 knots up to 6 – 7 knots, depending on rainy or dry season.

From Banana to Buoy No. 24, there is plenty of water and room to manoeuvre, etc. although it should be emphasised that here are very few aids to navigation which can be relied upon. The buoys throughout the river passage are very doubtful as to their position (they may have been moved as the channel moves, but no Notice to Mariners issued). The strength of the river current must make the mooring of these buoys very difficult, also many of them consist of oil drums fastened together.

There is a narrow channel section (dredged in parts) from Buoy position No. 46 to Buoy No. 78. Part of the new channel veers away from the dotted line on the chart, and goes off to the West of "Archipel des Tortues", up what appears on the chart to be a narrow creek. From here on there is no visual chart indication of where you are going. In the narrow parts there may be 2 buoys (oil drums) to go between, but even so there are quite a few severe turns. so there are quite a few severe turns.

From Buoy No. 86, you are back in soundings and there is plenty of water up to Boma. The Pilot changes at Boma.

We anchored overnight at Boma. The anchorage is opposite Boma town and is in a quiet stretch of water out of the current. Only one anchor is used (4 shackles), and as the current flow is always in the same direction, there is no reverse of heading, so although you are close to the South side of the river, the only problem will be if there is a sudden change of wind during one of the passing tropical downpours.

The passage from Boma to Ango-Ango is all in deep water, and is comparatively wide, although there is the occasional whirlpool, and navigation aids are sparse with a rocky shoreline.

Ango-Ango Berth Approaches: The approach is straightforward, although there are no mooring launches or tugs. The berth itself is in slack water. Normally, the vessel is put slightly ahead and off the berth, and the port anchor is dropped, with 3 shackles. The bow is then manoeuvred into the berth using engines and anchor, then head lines are sent ashore via shore messengers (the headlines may look like breast lines, and the breast lines like half springs), but be sure to get the correct lines as per plan (see "Plan"), they appear to have set messengers for each shore bollard, no springs are allowed on to the pontoon. The after lines are also sent via messengers, so be sure to organise with the Pilot as to which sequence is required, especially the springs being sent from aft, and the breast lines from the main deck.

Documents at Ango-Ango: The same number of documents as required at Banana are again required in Ango-Ango.

Discharge: The discharge is made via 2 sets of 2 × 6 in. lines connected via shore supplied "Y" pieces connected to ship's 8 in. manifolds. Both jet fuel and MOGAS were discharged simultaneously.

The departure is fairly straightforward, heaving off on the anchor, and there is plenty of room to swing vessel round in, especially with the bow being out in the current, and the stern in comparatively slack water.

The passage down river is, of course, much quicker with all the current with you.

AUTHORITY: Office National des Transports, ONATRA.

AGENT: See "Matadi".

BOMA: 05.51 S. 13.03 E.

DOCUMENTS: See "General" before first port.

PILOTAGE: Port is situated on the right bank of river, about 44 miles above pilot station at Banana.

Radio "Maritime Banana" 24 hours prior arrival giving ETA at Banana and requesting Pilot. Sailing for Banana from 0600 hrs. till 1600 hrs. Sailing for Matadi from 0500 hrs. till 1600 hrs.

RESTRICTIONS: Depth at bar 30 ft. Permissible draft for navigating river varies between 20 ft. to 27 ft. according to local conditions and should be checked with Port Authority in advance.

HEALTH: Quarantine Officer boards on arrival. All crew members require valid cholera vaccinations and yellow fever inoculation certificates.

TUGS: 2 tugs of 200 and 300 h.p. available to assist berthing.

BERTHING: Total quay length 450 m. with 3 berths alongside. Depth of water at the quay, 8 m. at low water. Maximum current at the berths is 3 knots.

STEVEDORES: See "General" before first port.

Port Equipment:
6 electric cranes on rails, capacity 3 – 6 tons.
2 steam cranes on rails, capacity 7.5 ton at 6 m. (5.0 ton at 10 m.).
5 banana conveyors.
1 electric crane, capacity 6 tons.
8 forklifts.
5 tractors and 40 trailers and carts.
1 Palm kernel elevator.
1 Automatic grab.
2 Hyster carry cranes.
7 barges, capacity 100 tons.
1 pontoon, capacity 75 tons.

FRESH WATER: Available from quays, suitable for drinking.

FUEL: See "General" before first port.

MEDICAL: Doctors and hospital facilities available.

REPAIRS: No facilities.

HOLIDAYS: See "Matadi".

GENERAL:

Exports: Logs and timber, plywood, veneerwood, coffee, cocoa, rubber, bananas, palm kernels, oils, cakes, about 8.8% of the total exports of the Zaire.

Imports: Various. About 2.5% of the total tonnage imported into Zaire.

Current at Quays: The currents of the river vary from berth to berth and depend upon the low and high level of the water with sometimes adverse currents and still waters.

Maximum speed at high level: 3 knots.
Minimum depth at the lowest level: 8 m.

AUTHORITY: Office National des Transport – ONATRA.

MATADI, (including Ango-Ango): 05.49 S. 13.27 E.

(See Plan)

DOCUMENTS: 7 days before arrival of vessel the following must be in the hands of the Agent:
4 Manifests (detailing explosives, general cargo, heavy lifts).
3 Stowage Plans.
6 copies of Bills of Lading.
1 Freighted Manifest.

On arrival:
Maritime Declaration.
Ship's Register.
3 Crew Personal Effects Lists.
2 Stowage Plans.
1 Freighted Manifest.
3 Lists of Ports of Call.
7 Passengers Landed.
7 Passengers in Transit.
5 Crew Lists.
5 Kroo Boys Lists.
2 Provisions Lists.
4 Individual Manifests.

PILOTAGE: Compulsory for vessels over 500 g.r.t. Radio "Maritime Banana" 24 hours prior arrival giving ETA at Banana and requesting Pilot. Pilot boards at Banana Pilot station. Distance from Banana to Matadi about 75 miles. Sailing for Banana from 0600 hrs. – 1300 hrs./1400 hrs., depending on vessel's speed. Deadline for passing Boma 1600 hrs. Sailing for Boma from 0500 hrs. – 1600 hrs.

RESTRICTIONS: Depth at bar 30 ft. Permissible draft for navigating Zaire River varies between 20 ft. and 27 ft. according to local conditions and should be checked with the Port Authority 3 days in advance. Berthing at Ango-Ango up till 1800 hrs. only.

MAX. SIZE: Controlled by draft in river. Max. draft Berth No. 1 is 23 ft. – 24 ft.
HEALTH: Quarantine Officer boards on arrival. All crew members require valid cholera and yellow fever inoculation certificates.
TUGS: "Viva" 1,700 h.p., "Inga" 850 h.p., "Boma" 250 h.p., "Banana" 600 h.p. and "Soyo" 220 h.p.
BERTHING: At Matadi. Total length 1,728 m.

Pier 1 – 149 m.
Pier 2 – 161 m.
Pier 3 – 155 m.
Pier 4 – 158 m.
Pier 5 – 156 m.
Pier 6 – 176 m.
Pier 7 – 188 m.
Pier 8 – 149 m.
Pier 9 – 167 m.
Pier 10 – 143 m.

Piers No. 5, 6 and 7 for full container vessels.
Minimum depth at Piers 8 and 10 is 10 m.
In addition there is a berth length 400 m. for barges.
At Ango-Ango: Length of pier 150 m. Presently used for discharging and loading flammable goods and explosives.
UNLOADING RATE: 800 tons to 1,000 tons of general cargo per day of 3 shifts.
CRANES:

44 Cranes (Electric and hydraulic) on rails	3 – 6 tons
1 Derrick Fixed	*50 tons (Pier 4)
1 Bridge Crane	5 tons
6 Electric Cranes	3 – 6 tons
2 Electric Cranes	10 tons
3 Electric Cranes	6 tons
1 Floating Crane	14 tons

*Actual capacity 34 tons.
BULK HANDLING FACILITIES: Palm oil is stocked by 4 companies in Matadi, 3 of which have pipe-lines to a main quay. The palm oil installations of CCP are at Ango-Ango where ships must berth at Sep Zaire pier. Vessels handling Sep Zaire cargoes are given priority at this pier and in case of unavailability of berth, palm oil would be loaded by barge of 260 tons capacity at Matadi.

Palm kernel oil is also loaded at Berths No. 2 – 9 and Palm Oil at Berth Nos. 2 – 8 in Matadi.

P.L.Z. (Plantations Lever au Zaire) capacity	13,450 tons
AMATO-Freres	3,700 tons
MADAIL	2,340 tons
C.C.P.	3,627 tons

Cereals discharged by suction at Berth No. 9. Rate 1,000 t.p.h.
BARGES/EQUIPMENT:
Barges:

2 Pontoons N.T. 41 tons each
8 Pontoons N.T. 75 tons each
1 Lighter N.T. 91 tons
2 Lighters N.T. 99 tons each
1 Tankbarge N.T. 279 tons
19 Lighters N.T. 339 tons each
1 Lighter N.T. 438 tons
11 Lighters N.T. 487 tons each
1 Lighter N.T. 514 tons
1 Lighter N.T. 522 tons
10 Lighters N.T. 557 tons each
2 Landing craft 875 tons each

Equipment:

28 Tractors and 242 trailers and carts
71 Forklifts with a maximum capacity of 2,500 kilos
2 Roller bridges 30 tons
3 Fork conveyors
34 Platforms × 20 ft.
6 Platforms × 40 ft. (Unilock)
1 Pushwagon tractor
Grain Elevators (Midema)

DENSITY: Fresh water.
STEVEDORES: See "General" before first port.
MEDICAL: Doctors and hospital facilities available.
TANKERS: Discharge at Sep Zaire pier at Ango-Ango or Matadi. If lightening necessary before berthing, this can be effected at Ramler Buoy, 17 miles above Banana. No tank-cleaning facilities. No fresh water.

Also see "Shipmaster's Report" dated September 1990.
FRESH WATER: Delivery aboard the ship through valves and at each pier. Maximum daily capacity 200 tons. Delivery takes place according to the quantity asked for and usually during night.

Delivery cannot be done at the loading berth of Sep Zaire at Ango Ango.

Suppliers need 48 hours' notice. It is therefore highly recommended that Masters cable their needs well in advance to Agent and/or through Owners.
FUEL: See "General" before first port.
GANGWAY/DECK WATCHMEN: Recommended.
Piracy: Acts of piracy have taken place in the port.
REPAIRS: Small repairs possible at railway workshop.
HOLIDAYS: *Legal Holidays in Zaire – 1989:*

1st January	New Year's Day
4th January	Martyrs of Independence
1st May	Labour Day
20th May	Anniversary of the M.P.R.
24th June	Money Day
30th June	Independence Day
1st August	Parents' Day
14th October	Zaire Youth Day
27th October	Zaire Day
17th November	Army Day
24th November	Anniversary of the New Regime
25th December	Christmas

GENERAL: *Currents at the quays:*

The currents of the river vary from berth to berth and depend upon the high and low levels of the water with sometimes adverse currents and still waters. Difference between high and low level of the river is approximately 5.50 m.

Maximum speed at high level: 6 knots.

Minimum depth at lowest level: Minimum 8 m. at low water and
minimum 10 m. at low water at the new Kala Kala quays.

Exports: Logs and timber (plywood, veneerwood), coffee, cocoa, rubber, copal, bananas, manioc, groundnuts, palm kernels, oils, cakes, fibres, cotton and copper.

Port Equipment and Accommodation: Matadi is the only Zaire port handling the despatch of export products originating from the interior and the import of products destined to Zaire (excluding Boma which is of minor importance and only serves the Mayumbe area).

About 90% of the tonnage in – and outward goes through Matadi at the head of the S.N.C.Z. railroad from Matadi to Kinshasa. The latter locality being a handling and concentration centre of the goods directed to or coming from Matadi.
SHIPMASTER'S REPORT: September 1990.
Ango-Ango: Vessel discharged refined oil products.

There was no attempted theft whilst in this port. The people are as friendly as one could wish to meet, and having been ashore over the weekend, the "run ashore" could be described as excellent without any risk of violence, to any crew member. The Port Authorities and Officials though numerous, were efficient and helpful, as were the Agent and the plant personnel. The plant itself was well run and efficient.

On arrival off Zaire, the vessel had to wait 5 days whilst cargo payment was finalised. This problem is, I believe, not uncommon.

Due to entries in the Pilot Book supplement, the vessel stayed offshore, in case of piracy. This is in fact wholly unnecessary, and on confirmation of entry we went into anchor.

I anchored about 2.5 miles West of Moita Seca. It is the end of the dry season at present. I estimated current was running at between 3 knots and 4 knots in the river, but at this anchoring position, there was little or no current. Good holding ground was found here in about 50 ft. of water.

Pilot boarded off Banana Creek at exactly 0600 hrs. There were no formalities conducted here. Vessel berthed at 1500 hrs. Our charts were corrected up-to-date, but the rapid changes of the river meant that the channel, as shown on B.A. Chart No. 634, has altered completely, and is doing so all the time. The channel was well buoyed, Pilots are Belgium trained and of good standard. Pilots change at Boma both inbound or outbound, but, I believe, will do the entire pilotage when a shortage of pilots exists.

The Ango-Ango Terminal is managed by a former Belgium ship's master, who is friendly and very helpful. Having read the entry in the "Guide", he informed me that he can supply all grades of bunkers. The pontoon system at the berth is the same, there is little strength to the current at the berth, though a counter current exists, causing sets of the berth. Berthing was much easier than I anticipated, though the ropes had to be tied together to reach the shore. The boatmen have a winch system to pull the vessel's ropes ashore, two at a time. Vessel made fast with 2 head ropes, springs, and 2 stern lines and springs. There was no problem with the vessel whilst alongside, due to the strong current in the river.

Fresh water was available by meter from the shore, but we were advised that it had to be boiled prior to drinking.

Pilotage is only by daylight. On departure, vessel must leave the berth by 1300 hrs., or wait till daylight the following day.

Fresh stores were abundant, other stores were available, including meat of a good standard. However, a lot of items are expensive. A chandler is available, but if there is time, I would suggest purchase of stores direct from Matadi market.

Discharge of oil products was about 300 tonnes per hour, but lube oil was slow with a high back pressure, and a discharge rate at times of only 80 cu.m./hr. was obtained.

Communications are poor. We had to keep owner's informed by the ship's telex. At no time were we, prior to arrival, able to communicate with Zaire by telephone or telex.

ETA, arrival details, etc. were passed by telegram to Banana Radio on 500 kHz., this station seeming only to be in range 3 days prior to arrival. However, this route seemed to be successful. I am informed that any telephone contact with Europe is impossible. Banana Radio will only pass messages.
Agent's Notice:
1. *Documents required from Master on Arrival:*
   - (A) Clearance of the last Port of Call.
   - (B) 7 copies Crew List.
   - (C) 5 copies Arms and Ammunition List.
   - (D) 7 copies Passengers List.
   - (E) 5 copies Crew Declaration (Personal Effects).
   - (F) 5 copies Ports of Call List.
   - (G) 5 copies Stores List.
   - (H) 4 copies Narcotics List.
   - (I) Ship's Certificates:
     - Load Line Certificate.
     - International Tonnage Certificate.
     - Cargo Safety Equipment Certificate.
     - Register Certificate.
     - Safety Construction Certificate.
     - Radio Certificate.
     - Derat Exemption Certificate.
   - (J) Loading/Discharging Documents.
2. *Documents required from Port Authorities on Arrival/Departure:*
   - Free Pratique.
   - Clearance.
3. *To be filled/signed by Master:*
   - 1 set of the Harbour Master's Declaration.
   - 1 set of "Arrival Conditions".

AUTHORITY: Office National des Transports – ONATRA, Port of Matadi. *Telex:* 21017 Onatra ZR. *Contact:* Port Director.
AGENT: Socopao Zaire, Avenue de la Fontaine 50, B.P. 338, Matadi, Zaire. Tel: 2109, 2111. Telex: 20361 Freight ZR. Cables: Freight Matadi.

Socopao Zaire, Avenue des Macons 1089, B.P. 5259, Kinshasa 1, Zaire. Tel: 77869, 77931, 78566. Telex: 20026 Freight ZR. Cables: "Freight Kinshasa".

BULLEN BAY

CURACAO OIL TERMINAL

THROUGHPUT:	Transhipment	1,200,000 barrels per day
	Refinery import	250,000 barrels per day

JETTIES:
1 – 500,000 DWT tanker jetty
1 – 350,000 DWT tanker jetty
1 – 250,000 DWT tanker jetty
2 – 100,000 DWT tanker jetties
1 – 70,000 DWT tanker jetty
2 – Tugboat jetties

TOTAL TANK CAPACITY – 17,750,000 barrels

1 –	1,000,000 barrels capacity –	1,000,000
16 –	750,000 barrels capacity –	12,000,000
6 –	375,000 barrels capacity –	2,250,000
38 –	Small tanks capacity –	2,500,000

PIPELINES: Main track consists of 5 strings of 36″ pipe. The jetties carry 2 strings of 36″ pipe in a loop. The loading rate is up to 12,000 tons per hour. Tankers' discharge rate is up to 25,000 tons per hour.

DEBALLASTING: Capacity 4,000 tons per hour per jetty. Ballast treatment produces affluent of less than 20 parts per million (20 ppm) oil content.

TUG SERVICE: Two tugs of 4,500 h.p. with 50 tons bollard pull each. One tug of 2,500 h.p. with 35 tons bollard pull.

WELLINGTON

HELICOPTER PILOTAGE

SHIP MANOEUVRING FOR THE TRANSFER:

In deciding what heading the vessel should be on, several factors have to be taken into account. These include..

- clear areas
- ship movement
- area of vessel visible to helicopter during transfer (for the hover reference)
- relative wind

THE RELATIVE WIND IS MORE IMPORTANT THAN THE TRUE WIND DURING TRANSFER

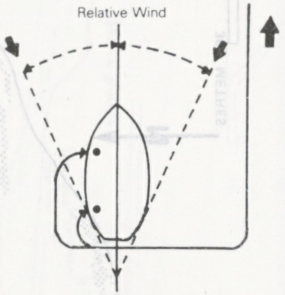
The helicopter Pilot flies and the winching takes place from the starboard side of the helicopter. The helicopter always positions itself for the transfer so that it is hovering into the relative wind (or nearly so).

Ideally, and **in general terms,** the best direction for the relative wind is (but depending on the other factors listed above) either with the wind 0-20 degrees on the port bow or 0-20 degrees on the starboard quarter.

By way of example, two common situations are described.

A container vessel arriving - wind from northerly quarter (ignoring ship movement factors).

1. Communications established
2. Winching zone selected
3. Heading and speed is selected so relative wind is 0 to 20 degrees on port or starboard bows
4. Helicopter will circuit vessel and come up on vessel's port side.
5. with relative wind on port side, helicopter is operating in 'clear' air and winching zone can be selected forward or aft.

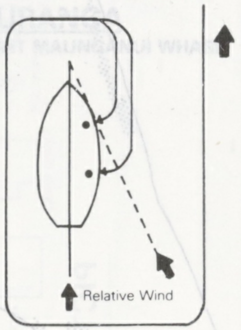


Relative Wind

NOTE: If the area selected is in the forward port part of the vessel a RELATIVE wind from ahead to 20 degrees on the starboard bow may be requested as this will allow the helicopter to hover with his tail rotor clear of the ship. If the helicopter is working on the port side aft, then the relative wind should be on the port bow.

Vessel arriving with wind in southerly quarter (ignoring ship movement factors).

1. Communications established
2. Winching zone selected
3. Heading and speed selected so that relative wind is 0 to 20 degrees on starboard quarter.
4. Helicopter approaches vessel, may do a circuit and will approach from ahead.
5. With relative wind on vessel's starboard quarter, helicopter is in 'clear' air and helicopter can select areas on fo'c'sle or on vessels starboard side.



Relative Wind

With smaller vessels a course is usually selected which has the wind and sea conditions from astern to reduce ship movement.

This also applies in strong wind conditions with larger vessels, as it also reduces the strength of the relative wind.

IN ANY CASE, THE HARBOUR AND HELICOPTER PILOT WILL CONFER WITH THE SHIP'S MASTER TO SELECT THE BEST POSSIBLE HEADING

NOTE:

1 No anchors to be used within shaded area (Except in emergency situations)

2 Discuss method of approach with Harbour office (Channel 14)

POLLUTION: A submersible oil boom has been installed enclosing the oil pier. Normally, the boom rests on the sea-bed, but when needed it will be raised to the surface using compressed air.

The oil boom and its system of anchorage will be damaged by vessels' anchors. In order to ensure that the oil boom is operable at all times, and to avoid expensive repairs, which will be charged to the ship responsible for the damage, great care should be taken in connection with manoeuvres along the Slagen pier, which will require the use of anchors.

The drawing of the pier shows the position of the oil boom and the anchorage system. Except for emergency situations, anchors should not be used within the shaded area.

All manoeuvres to and from berths should be discussed with the Harbour office (Slagen Harbour Radio, Channel 14). The Harbour Office will give you information regarding current strength and setting.

Approach to Berth 2, and Berth 3 if Berth 2 is not occupied, is facilitated by the fendered sliding front shown on the drawing.

Before anchoring tankers should contact Fahal Control on VHF 12 for a designated anchoring position.
In all cases tankers are required to anchor at least 2 miles West of Fahal Island and at least 2 miles clear fo the Omani coastline.

Note 1. Pilot will advise boarding position on V.H.F. radio prior to arrival.
2. Vessels should not enter prohibited area unless accompanied by Pilot. If proceeding to anchorage pass northward of Fahal Island.

PUERTO ARMUELLES

STAINLESS STEEL SHACKLE
FOR LINES WITH TAILS

Tails, if used, should preferably be made of nylon line (3 strand construction should not be used) about 11 m. long overall, and have a breaking strength at least 25% greater than the MBL of the wire to which they are attached. They should be replaced at least every 18 months unless experience and/or inspection indicates more or less frequent replacement is necessary.

CONTAINER GANTRY CRANES

TIDAL RANGE – FROM QUAY EDGE
J to Mean Low Water 4.31 m.
K to Mean High Water 2.55 m.

Cranes are self-sustaining i.e. fitted with electric generators
Cranes can be fitted with 20 ft. and 40 ft. detachable spreaders

A Max. height of lift from quayside rail level to underside of 40 ft. Spreaders 20.715 m.
Rail level to underside of 20 ft. spreaders 19.624 m.
B Max. outreach from waterside rail to centreline of spreader 35.000 m.
C Max. travel from waterside rail to inside of rear rail 18.000 m.
D Min. portal clearance above rail level 10.700 m.
E Distance from waterside rail to quay edge 2.000 m.
F Distance between rails 20.000 m.
G Clearance between crane legs – waterside 14.300 m.
H Buffer to buffer distance 22.000 m.
Capacity under spreader 30.5 tonnes.

Cranes are fitted with telescopic 20 ft. to 40 ft. spreaders

No repairs to main engines allowed while vessels are alongside the pier.

Mooring ropes shown above are the safe minimum number for average weather conditions.

If necessary, additional mooring ropes may be required by the Pilot of ASESA Harbour Master.

Nylon ropes may be supplied by ASESA if any vessel does not have a sufficient quantity of suitable ropes for safe mooring.

Mooring ropes must be carefully tended to hold the vessel close to the dolphins at all times.

NOTES

1 Ropes number 1 & 4 forward and ropes number 1 & 2 aft are the main departure ropes. Ensure that these can be cast off last.

2 If ropes number 8 forward and number 7 aft cannot be used then rope number 4 forward and number 2 aft will have to be doubled up.

3 The mooring lay-out shown is the minimum requirement.

SEA OF MARMARA

For vessels proceeding to Istanbul, or any other ports within the Sea of Marmara or Gulf of Izmit, pilotage is compulsory from the southern entrance. The same applies for vessels proceeding outwards. Pilotage is not compulsory for vessels proceeding from Gelibolu to Darica, but is compulsory within the Gulf of Izmit. For through traffic pilotage is not compulsory for the Bosphorous and Dardanelles.

All pilot stations monitor V H F channel 16

CHAIN STOPPERS MUST NEVER BE USED ON SHORE MOORINGS

5 Under no circumstances are any moorings to be adjusted other than at the slack water period after consultation with the berthing master.

6 Communication alongside – A VHF radio is provided for a direct link to the control room and berth operator.

IMMINGHAM OIL TERMINAL INFORMATION SHEET 2

MOORING REQUIREMENTS – VESSELS 40,000-79,999 TONS SUMMER DEADWEIGHT

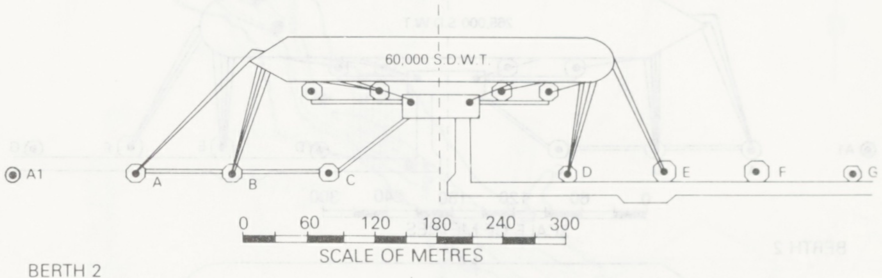
THERE MAY BE AN ALTERATION TO THE MOORING PATTERN DUE TO THE POSITION OF THE SHIPS EQUIPMENT

MOORING ARRANGEMENT

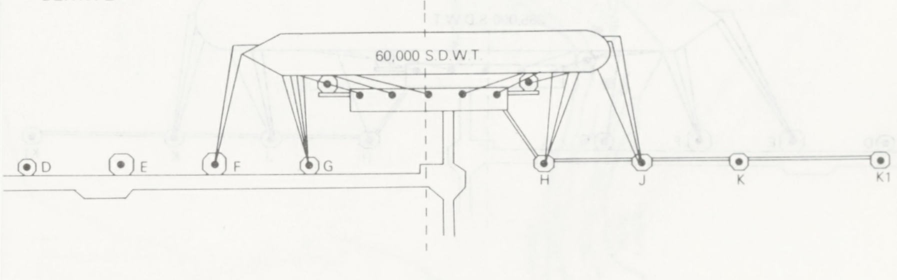
2 Headlines	2 Sternlines
4 Forward Breastlines	4 After Breastlines
3 Forward Springs	3 After Springs

2 shore breast moorings (80 mm. diameter nylon tail) are available from:-
B(1), C(1) & E dolphins for Berth One F & J dolphins for Berth 2.
A forward and after spring is available at each berth. Shore moorings will be used where practcable.
MIXED MOORINGS ARE NOT TO BE USED EXCEPT BY PRIOR AGREEMENT
(Position of vessel, assuming Bow/Manifold is half the length overall)

BERTH 1



BERTH 2



1. Normal sequence of mooring (one or two mooring launches)

Forward	Aft
a) Offside headlines	After breastlines
b) Nearside headlines	Stern lines
c) Forward breastlines	After shore moorings
d) Forward shore moorings	

Fore & aft springs passed by heaving line as soon as possible at the same time as the headlines

2. Tension winches – must have the brakes screwed up hard and be left out of gear.

3. Ropes & wires – on bitts must be turned up in a figure of eight.
Ropes left on winch drums must be backed up on a suitable set of bitts.

4. Shore moorings must be led aboard through a nearside fairlead.
CHAIN STOPPERS MUST NEVER BE USED ON SHORE MOORINGS

5. Under no circumstances are any moorings to be adjusted other than at the slack water period after consultation with the berthing master.

6. Communication alongside – A VHF radio is provided for a direct link to the control room and berth operator.

MOORING REQUIREMENTS – VESSELS 150,000 TONS AND OVER SUMMER DEADWEIGHT

THERE MAY BE AN ALTERATION TO THE MOORING PATTERN DUE TO THE POSITION OF THE SHIPS EQUIPMENT

MOORING PLAN — QUEEN'S DOCK

For 12,000 tons (and upwards) deadweight tankers berthed at Jetties 2, 3, 4, 5

These are the minimum requirements which may be varied at the discretion of the Docks Supervisor/Berthing Master to suit the size of ship and existing or impending bad weather conditions.

Rope messengers are attached to the shore wires and are passed on board from the Jetty or attendant mooring boat.

Shore stern wire must not be shipped through the centre fairlead

NOTES

SHIP MAY BE MOORED HEADED IN EITHER DIRECTION.

MOORING LINES USED DEPEND ON SHIP'S POSITION.

BEAM UNLIMITED.

LENGTH LIMIT: 850 FT. SHIPS AT OIL DOCKS 4, 7 & 11 AT THE SAME TIME. LONGER SHIPS MAY BE BERTHED WHEN ADJACENT SLIP IS NOT BEING FULLY UTILIZED.

DOCK ELEVATION IS 16 FT. ABOVE MEAN LOW TIDE.

MISSISSIPPI RIVER
KEY PLAN

Mississippi River Crossing Channels

The project depth for crossing channels is 45 ft. for a width of 500 ft. to mile 150 AHP and 40 ft. above.

The controlling depths are published in Navigation Bulletins issued periodically by The New Orleans District Corps of Engineers, New Orleans, Louisiana.

Crossing channels may be marked by buoys during Low Water.

Pollution Reports

Report all spills of oil and hazardous substances to The National Response Center via 800-424-8802 (toll free), or to the nearest U.S. Coast Guard facility if telephone communication is impossible (33 cfr 153).

Warning

The Prudent Mariner will not rely solely on any single aid to navigation, particularly on floating aids. See U.S. Coast Guard Light List & U.S. Coast Pilot for details.

Caution

Mariners are warned that logs and other floating debris are constant dangers to navigations. Night travel by small craft is not recommended because of the hazard of floating obstructions.

MOORING ARRANGEMENTS FOR
50,000 DWT VESSELS & ABOVE

NOTE: Due to tidal currents, near proximity of passing vessels, and exposure of your vessel to Westerly winds, particularly in light condition, the following mooring arrangement is required.
Double spring lines to be used both forward and aft. Both forward and aft springs may lead through the same chocks at their respective locations, however, each spring line should be secured to a separate bollard on the dock.
The bow breast line deadman is approximately 137 m. from the vessel. A manila or synthetic line must be used as it is impossible to pull a wire to the shoreline here.
A shore messenger will be used to pull this line to the deadman.

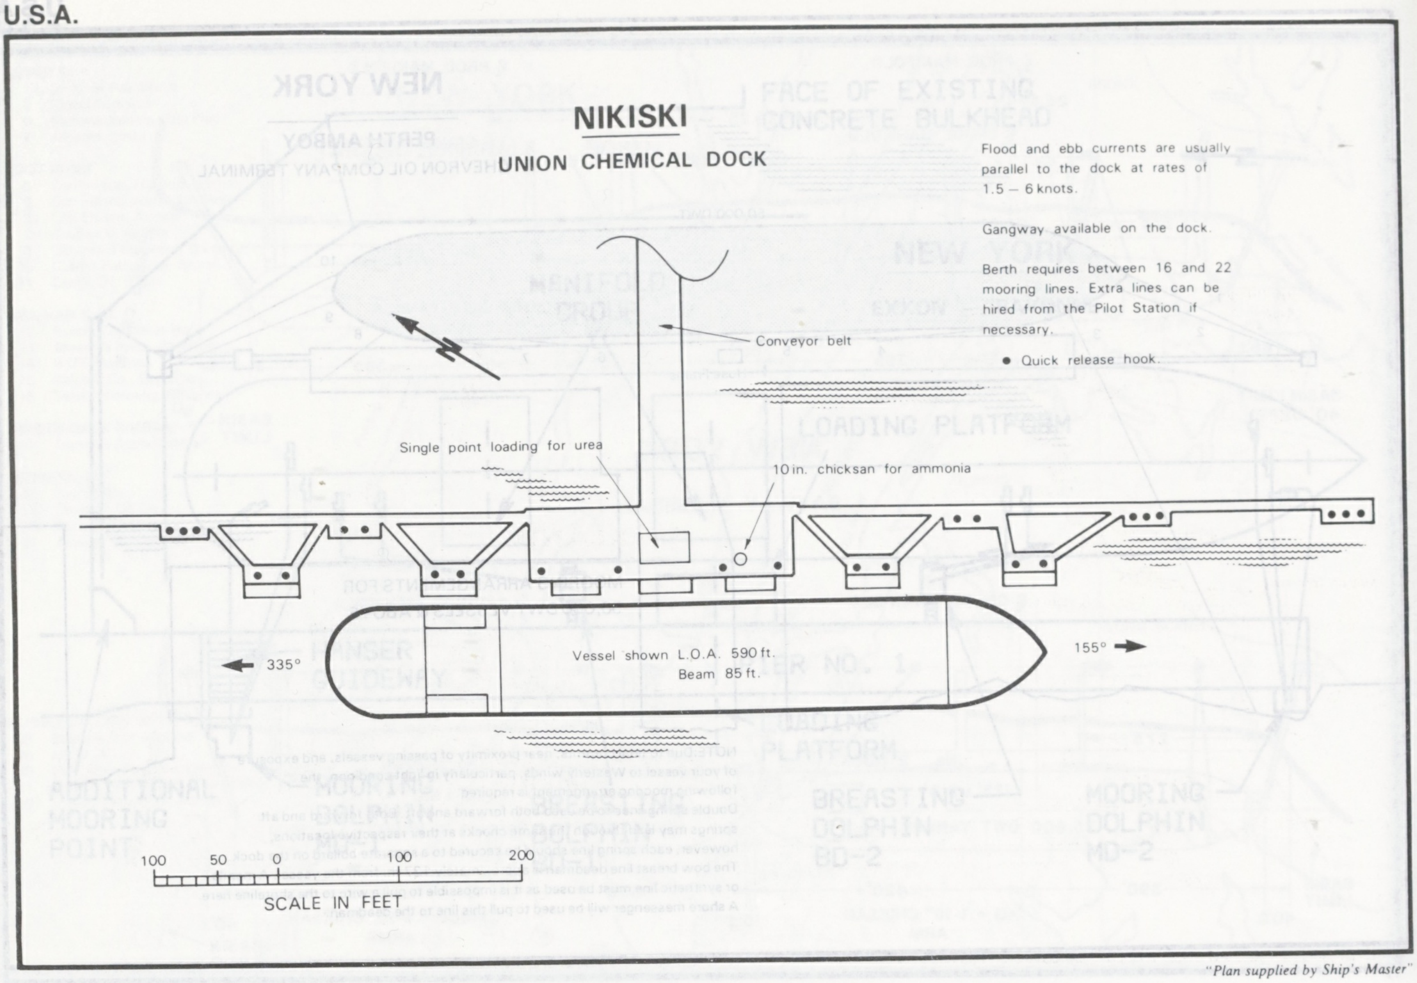
NOTE: Lines, numbered 1,2,3 from foremost isolated mooring cell and, lines, numbered 4,5,6 from the isolated mooring cell positioned southward of the jetty, are shore based polypropylene moorings. All other lines have to be provided by the vessel.



NIKISKI

UNION CHEMICAL DOCK

Flood and ebb currents are usually parallel to the dock at rates of 1.5 – 6 knots.

Gangway available on the dock.

Berth requires between 16 and 22 mooring lines. Extra lines can be hired from the Pilot Station if necessary.

- ● Quick release hook.

PALM BEACH

Legend:
The Port of Palm Beach is located on a saltwater sound known as Lake Worth and lies 1⅓ miles from the 37-foot contour of the Atlantic Ocean, to which it is connected by an artificial cut at the North end of Lake Worth known as Lake Worth Inlet.
(1) Entrance to the harbour is by a dog-leg channel running due West through the jetties and then turning Southwesterly to the terminals, 400 ft. wide, narrowing to 300 ft. in width as it continues across the lake another 3,000 ft., leading into a trapezoidal turning basin. (2) 1,400 ft. by 1,310 ft., adjacent to the port terminals on the West shore. Depth of the channel and turning basin is 35 ft. (3) Slip No. 1 is 690 ft. in length with water depth of 27 ft. (4) Slip No. 2 is 650 ft. in length with water depth of 35 ft. (5) Extension of turning basin with water depth of 25 ft. (6) Three Ro/Ro ramps and the New North Wharf, which together comprise 1,054 ft. in length.

RIVERHEAD

SUGGESTED MOORING PLAN — NORTH BERTH

The diagram above represents a suggested mooring arrangement for the North berth of the Northville Industries Corporation tanker platform at Riverhead, New York.

The ship plan represents a 30,000 to 40,000 d.w.t. handy size tanker with bridge amidship.

Mooring operations at Northville are conducted as follows:

1. With the vessel alongside the breasting dolphins, run spring lines fore and aft to maintain desired position. Spring line leads must provide adequate scope.
2. The launch will carry a messenger from the mooring dolphins to the bow or stern to run head, stern, and breast lines. The line crew will work one end of the ship at a time, as requested by the Master.
3. Each mooring line should be secured to an individual set of bitts. Placing two lines on one set of bitts by taking round turns should be avoided.
4. All lines must be tight, and the mooring plan adequate for all anticipated weather conditions before the transfer arms will be connected.
5. The ship's gangway is not used at this terminal.

RIVERHEAD

SUGGESTED MOORING PLAN — SOUTH BERTH

The diagram below represents a suggested mooring arrangement for the South Berth of the Northville Industries Corporation tanker platform at Riverhead, New York.
The ship plan represents a 30,000 to 40,000 DWT handy size tanker with bridge amidship.

Mooring operations at Northville are conducted as follows:

1. With the vessel alongside the breasting dolphins, run spring lines fore and aft to maintain desired position.
2. The launch will carry a messenger from the mooring dolphins to the bow or stern to run head, stern, and breast lines. The line crew will work one end of the ship at a time, as requested by the Master.
3. Each mooring line should be secured to an individual set of bitts. Placing two lines on one set of bitts by taking round turns should be avoided.
4. All lines must be tight, and the mooring plan adequate for all anticipated weather conditions before the transfer arms will be connected.
5. The ship's gangway is not used at this terminal.

Australia

BRISBANE: (Also see Page 67)

RADIO OFFICER'S REPORT: September 1990.
Brisbane was the last port of call in Australia.

Documents:
Customs will normally only board the ship at departure. Quarantine will not board the ship.

Sealed envelope from Customs in Sydney handed over. 2 copies of Crew List required.

If the vessel is going to Indonesia, Hong Kong or Singapore after Australia, the following forms should be faxed prior to departure:

Indonesia:	Crew List to be faxed to first Indonesian port for pre-arrival clearance.
Hong Kong:	Crew List to be faxed to Hong Kong for pre-arrival clearance (not possible with crew originating from communist countries). Also List of Ports of Call, copies of Registry, Safety Equipment, Safety Construction, Safety Radio, Load Line and Derat Certificates.
Singapore:	Crew List to be faxed for pre-arrival clearance.

MELBOURNE: (Also see Page 104)

RADIO OFFICER'S REPORT: September 1990.
Melbourne was the first port in Australia.

Documents: Customs and Port Health Authorities will board the ship. All Australian forms needed, IMO Crew List is accepted.

4 copies Crew List.
4 copies Form M & S 11.
1 copy Ship's Stores consumed (Part 1 only), only drugs to be declared, no Ship's Stores List required.
1 copy List of Crew's Possessions (showing value, type, make, serial number).
4 copies Ports of Call.
1 copy Animal Cargo ("Nil" return not required).
1 copy Ship's Pets ("Nil" return required).
2 copies Shipmaster's Bond (required only if any ship's pets).
2 copies Health Report.

All ship's certificates, including Australian Light Dues Certificates and Australian Identification Cards for crew are required.

Customs Allowances: 1 bottle of liquor (opened and not exceeding 750 ml.), 200 cigarettes or 225 gm. tobacco.

SYDNEY: (Also see Page 133)

RADIO OFFICER'S REPORT: September 1990.
Sydney was the second port of call in Australia..

Documents: Customs and Quarantine will board the ship. Sealed envelope from Customs in Melbourne handed over.
2 copies Ports of Call List.
1 copy Ship's Pets.
3 copies Crew List.

Canada

LIVERPOOL, Nova Scotia: 44.03 N. 64.42 W.

(See Late Plans)

SHIPMASTER'S REPORT: November 1990.

DOCUMENTS: See "Halifax".

PILOTAGE/APPROACHES: For the approach to the outer anchorage, no pilot service is necessary.

There are numerous lighthouses and buoys which mark shallows, and the approach is without difficulties.

Pilots are sent from Halifax and require 3 – 4 hours notice from Agent, therefore vessel has to give Agent plenty of notice. Pilot will board the vessel at the outer anchorage. The pilot boat is aluminium in colour and has no special identification markings, and is also used to bring the mooring lines ashore when berthing. Pilots are only on VHF Channel 16 when they are on duty or prior to boarding a vessel for berthing. Pilots are very experienced.

In addition to listening on Channel 16, vessels should switch to VHF Channel 10 for receiving instructions for the Paper Mill.

ANCHORAGES: There is a safe outer anchorage close to the Pilot Station, situated at the centre of cross bearings from Coffin Island, Eastern Head and Moose Point, about 0.8 nautical miles from each point in about 26.0 m., with good holding ground, no dragging.

RESTRICTIONS: No information available.

MAX. SIZE: As per Bowater Agencies, depending on the state of the tide (LOA 500 ft. (approx.) and draft 24 ft. – 26 ft.).

HEALTH: See "Halifax".

RADIO: Halifax Radio, VCS, was used for ETA messages.

VHF: Bowater Agency maintains watch on Channel 10. Coast Guard Radio stations at Halifax and Yarmouth maintain watch on Channel 16.

RADAR: No radar.

TUGS: No tugs available.

BERTHING: Berthing is done by dropping anchor in front of tip of pier and by swinging stern first, and mooring starboard side at the N.E. side of the pier.

There is a finger pier about 500 ft. long with about 24 ft. – 26 ft. depth alongside, depending on tide. The pier is of wood construction and berthing has to be done with great care because of the aged condition of the wood piles which have been partly renewed.

Loading of newsprint paper rolls is done by ship's gear.

CRANES: There are no cranes.

BULK CARGO FACILITIES: There are no facilities available.

SPECIALISED CARGO HANDLING FACILITIES: No information available.

BRIDGES: None.

STEVEDORES: Agent to be kept well informed by cable. Stevedores are local union personnel.

Normal working hours are 0800 hrs. – 2000 hrs.

Loading rate is about 50 tonnes per gang/working hour.

MEDICAL: There is a modern hospital and several doctors in the town.

TANKERS: No information available.

DENSITY: 1025.

FRESH WATER: Available in unlimited quantities at no cost.

FUEL: Diesel oil can be supplied by trucks from Halifax. Heavy fuel oil not available.

FIRE PRECAUTIONS: Paper Mill maintains a fire brigade.

CONSULS: See "Halifax".

REPAIRS: Minor repairs can be undertaken by the Paper Mill work shop or small local repair firms.

DRY DOCKS: There is a slip at Liverpool for small vessels.

SURVEYORS: There are several surveyors at Liverpool and Halifax.

GANGWAY/DECK WATCHMEN: Not compulsory or necessary.

HATCHES: Opening and closing of hatches is normally carried out by crew.

CUSTOMS ALLOWANCES: Every crew member is entitled to 1 bottle of spirits and 200 cigarettes every 7 days. There is only one Customs Officer at this port.

CARGO GEAR: Ship's gear is used.

REPATRIATION: Repatriation can be undertaken without difficulties, through the airport at Halifax.

AIRPORT: Halifax International Airport is 170 km. from Liverpool.

TIME: Summer – GMT minus 3 hours. Winter – GMT minus 4 hours.

HOLIDAYS: See "Halifax".

POLICE/AMBULANCE/FIRE: Use telephone inside Paper Mill or at gate.

EMERGENCY CO-ORDINATING CENTRE: No information available.

TELEPHONES: There is a telephone at the office next to the vessel.

SERVICES: See "Halifax". No special services at Liverpool.

BANKS: At Liverpool – Bank of Montreal, Bank of Nova Scotia and Royal Bank.

STORING: See "Prelims".

1. Can be stored by truck.
2. N.A.
3. Yes, but not during loading hours, due to the very narrow pier space.
4. Yes.
5. No information.
6. Stevedores have to be used.

SHIP SUPPLY SERVICE: No ship chandlers at Liverpool. No information on other services. Fresh provisions can be obtained from Supermarkets, which deliver to ship free of charge.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not necessary.

REGULATIONS: No particular or unusual regulations.

DELAYS: Delays may occur when Paper Mill cannot keep up with the fabrication of newsprint paper rolls, which are fabricated prior to vessel's arrival. This vessel had no delays.

DEVELOPMENTS: There are plans to enlarge the finger pier over the period of the next 3 years.

GENERAL: Agent, Customs Officers and stevedores – all very co-operative.

Charts: Canadian Chart No. 4379. B.A. Charts No. 340 and 730.

AUTHORITY: Bowater Mersey Paper Company Limited, P.O.Box 1150, Liverpool, Nova Scotia, B0T 1K0. *Tel:* (902) 354-3411. *Telex:* 019-21556. *FAX:* (902) 354-3579. *Contact:* Gary Levy or Jack Conrad.

AGENT: See "Authority".

Chile

VALPARAISO: (Also see Page 357)

SHIPS OFFICER'S REPORT: November 1990.
Documents:
Clearance from Last Port.
Light Dues Certificate.
1 copy Port Cargo Manifests (Manifiesto de carga para puerto).
Transit Cargo Manifests (Manifiesto de carga en transito), see Note (b).
Cargo Manifests, covering cargo shortshipped but manifested on previous vessels calling at Valparaiso (Manifiesto de carga de transbordo) – not required.
1 copy Dangerous Cargo List (Lista de carga peligrosa).
2 copies Passenger List (Pasajeros para puerto).
Transit Passengers List (Pasajeros en transito) – not required (See Note (a)).
5 copies Crew List (Rol de tripulacion).
2 copies Crew's Personal Effects Declaration (Declaracion de effectos de la tripulacion).
4 copies Stores List (Declaracion de suministoros del buque).
Mail Manifests (Guia de correos) – not required (See Note (a)).
Baggage Declaration (Equipajes acompanades) – not required.
Fumigation Certificate.

Notes:
(a) The vessel is a general cargo vessel, without passengers or mail on board.
(b) All cargo was discharged in Valparaiso, so no Transit Cargo Manifests were necessary.
(c) There was no transhipment cargo on board.
(d) It seemed preferable to prepare the documents in Spanish for the good reason that "everything ran smoother".

People's Republic of China

JIANGYIN: 31.55 N. 120.11 E.

ANCHORAGE: Jiangyin Port Anchorage is located 6.5 km. from the South bank of the upper reaches of the Chang Jiang River at Huang Tian Port. Depth of water 13.0 m. – 21.0 m. Nature of bottom is medium fine sand. Anchorage is suitable for vessels up to 25,000 d.w.t.
RESTRICTIONS: Vessels may enter and sail after sunset.
MAX. SIZE: Draft limitation in channel is 15.0 m.
Tidal range 0.0 m. – 3.15 m.
VHF: Call sign: Jaingyin Radio. Channels available 16, 21 and 71. Channel 21 is usual working channel. Station operates 24 hours.
TUGS: 1×150 h.p., 1×428 h.p. and 1×980 h.p.
BERTHING:

Cargo Handling Department	*Wharf*	*Max.Size* (d.w.t.)	*Length* (m.)	*Depth* (m.)	*Cargo Handled*	*Shore Cranes*
Jiangyin Port	No.2	1× 5,000	100	12.0	General Cargo	2×10 tons
Ward		2×25,000	535	21.0	General Cargo	

FUEL: Not available.
REPAIRS: Facilities available for vessels up to 30,000 d.w.t.
GENERAL: *Storage Areas:*
Warehouse 3,300 sq.m.
Open storage area 2,000 sq.m.
Cargo Handled: General cargo, steel, grain and cotton.

LANSHAN: 35.06 N. 119.22 E.

LOCATION: Lanshan is located at the Northern part of Haizhou Bay of Shandong Province. Distance by sea is about 81 miles South of Qingdao, and about 384 miles North of Shanghai.
PILOTAGE: Compulsory for all berthing movements. The pilot boarding ground is approximately 3 miles S.E. of the berth. The Pilots are stationed at Shijiu. Ample advance notice must be given to "Penavico" Shijiu Branch for booking a Pilot.
ANCHORAGE: The sea anchorage is located approximately 3 miles S.E. of the port. The anchorage is about 1,852 m. in radius. Maximum draft limitation for anchoring is 14.0 m. The nature of bottom is mainly sand/mud. The holding ground is reported to be good.
APPROACHES: The approaches to Lanshan are open sea without any outlying dangers. The coast lines are generally well defined, with conspicuous mountains for terrestrial fixes.

The fairway leading to the berth is buoyed. The buoys are unlit and night navigation is difficult. The depth in the fairway is 12.0 m. – 15.0 m.
RESTRICTIONS: Large loaded vessels can only berth/unberth during high water. This is due to a shoal patch of 6.20 m. approximately 30 m. off the berth.
MAX. SIZE: See "Berthing".
VHF: "Penavico" Shijiu Branch maintain VHF watch on Channel 16 during office hours (0730 – 1130, 1330 – 1730). During a vessel's stay in port, "Penavico" Lanshan Branch will maintain 24 hour watch on Channel 16.
TUGS: 2×1,080 h.p. There are also 4×3,200 h.p. tugs available from Shijiu.
BERTHING: This is a new port on the coast of Shandong Province. It has only recently been opened to foreign vessels, previously foreign vessel calling at Lanshan had to obtain a special permit from the Ministry of Communication, Beijing.
Berth Information: There are 2 berths open for foreign vessels. One for vessels up to 5,000 tons displacement, max. length 180 m. and draft 7.5 m., and the other for vessels up to 20,000 tonnes displacement, max. length 178.6 m. and max. draft 10.20 m. The berths are solid concrete type, and can handle dry cargo and edible oils.
Berth Facilities:
Pipeline connection: 1×6 in. diameter.
Max. back pressure: 6 kg.
Rate: Average about 120 tonnes/hour.
Max. 150 tonnes/hour.
Note: The shore tank farm is located on elevated hills. Total shore tank capacity is 14,000 tonnes.

Distance between shore manifold to ship's side is about 61 m. Short lengths of pipeline are connected between the ship's side and shore manifolds.
FRESH WATER: Available.
FUEL: Not available.
TANKERS: See "Berthing".
No slop facilities available.
REPAIRS: No facilities available.
GENERAL: *Weather Conditions:*
Wind: The prevailing wind is from the North. Average wind speed 3.4 m./sec. Max. wind speed 20 m./sec.
Rain: The annual average rainfall is 915.7 mm.
Fog: Fog generally between March – July. Average 26.7 days per year.
Temperature: The annual average temperature is 12.6° C. Maximum temperature recorded was 38.3° C. and minimum was –14.5° C.
Tidal Conditions: The tidal conditions for Lanshan are similar to the pattern at Lianyungang, the nearest standard port for tidal prediction. The tidal stream runs in an anti-clockwise direction, max. rate during flood tide is 88 cm./sec., and max. rate during ebb tide is 69 cm./sec. The average tidal range is about 2.5 m.
Charts: Presently, there is no British Admiralty Chart available for the port of Lanshan. Vessels proceeding to Lanshan can only use B.A. Chart No. 1253 (Sheyanghe Kou to Qingdao Gang) to approach the port.

Navigation charts for the port of Lanshan will be published by the Chinese Authority in late 1990 or early 1991.
Stores: Not available.
Agent: There is no state agent at the port. The port is covered by "Penavico", Shijiu Branch. All communications with Agents must go through "Penavico", Shijiu Branch, which is about 50 km. from Lanshan. Normally 2 officials from Shijiu Branch will be stationed at Lanshan throughout a vessel's stay in the port.

WUHAN: 30.34 N. 114.17 E.

PILOTAGE: Pilot boards at Qing Shan Xia Anchorage. Pilot available from 0800 hrs. until 1800 hrs.
ANCHORAGE: Qing Shan Xia Anchorage suitable for vessels up to 35,000 d.w.t. Depth of water 7.0 m. – 15.0 m.
RESTRICTIONS: Berthing and unberthing in daylight hours only.
MAX. SIZE: Draft limitation in the channel:
November – April: 4.5 m.
March – October: 8.0 m.
VHF: Port on Channel 16 throughout 24 hours.
TUGS: Available.
BERTHING:

Working District	*Berth* No.	*Length* (m.)	*Depth* (m.)	*Draft* (m.)	*Cargo Handled*	*Shore Cranes*

Yan Luo	1	78	10.0	9.0	General	3× 5 tons

CRANES: *Floating Cranes:* 3×30 tons and 2×50 tons.
FRESH WATER: Available.
FUEL: Available.
GENERAL: *Cargo Handled:* Textiles, local livestock products and light industrial products.
Storage:
Warehouse: 62,000 sq.m.
Open storage area: 400,000 sq.m.

WUHU: 31.22 N. 118.22 E.

PILOTAGE: Pilotage is undertaken from 0800 hrs. – 1700 hrs., and Pilot boards vessel at Pilot Station.

ANCHORAGE: Anchorage No. 1 at Wuhu Port has a depth of 8.0 m. – 12.0 m. The bottom is mud and sand. The anchorage can accept vessels of 10,000 d.w.t. – 15,000 d.w.t.

RESTRICTIONS: Daylight entry and departure only.

Draft limitation in the channel in dry season is 6.1 m.

Tidal Range: Maximum 1.90 m. Minimum 0.10 m.

VHF: Port on Channel 6 throughout 24 hours.

TUGS: 7 tugs up to 980 h.p.

BERTHING:

STEVEDORES: *Working Hours:* 0730 – 1130, 1330 – 0230.

FRESH WATER: Available.

REPAIRS: Possible.

GENERAL: *Storage:* Warehouse: 17,650 sq.m. Open storage space: 87,224 sq.m.

Cargo Handled: Coal, metal ore, timber, fertiliser, grain and general cargo.

Colombia

GENERAL: (Also see Page 395)

SHIPMASTER'S REPORT: September 1990.

The ship was not troubled by thieves or other persons at any of the three ports visited (Santa Marta, Barranquilla, Cartagena), while normal precautions were taken, such as locking all, but one, accommodation doors; hanging light-clusters over the off-side bow and stern areas, and general vigilance. In turn, the ports seemed to maintain a strict watch at the gate against unauthorised persons. At Cartagena, the local watchman kept a strict watch by exchanging a pass card for the stevedores identity card on boarding, which was returned when leaving the vessel.

Anti-Drug Abuse: A day before arriving at the first port in Colombia, the crew were advised about the dangers of drugs and smuggling. In particular, their attention was drawn to the Company's notices as posted about the accommodation and the requirements of Paragraph 8 of the Sea Carrier Initiative.

Cuba

ANTILLA: (Also see page 423)

(b) SUB-PORT OF NICARO:

SHIPMASTER'S REPORT: September 1990.

Documents:

12 copies Crew List.

3 copies Stores List (including narcotics, ship's cash, bonded stores and ship's stores).

3 copies Crew Declaration (including jewellery, cameras, electronic equipment, video and radio cassettes, cash and sun glasses).

1 copy Health Declaration.

Pilotage: Pilot boards about 1 mile N.E. of Pta. Mayari.

Restrictions: Vessels can only enter at slack water because of the current, twice a day. Sailing possible at any time.

Tugs: Use of tugs not compulsory.

General: The Authorities came on board as soon as the vessel berthed.

Crew members are issued with shore passes, and a form on which watches, cameras and money are entered, when crew member goes on shore leave.

Crew members are not allowed to take Cuban money back to the ship, or change it ashore with the local people.

The Master has to sign many bills for the Agent before departure, all should be inspected carefully.

Before entering port, vessel should check that it has sufficient dunnage and lashing materials, as it is in short supply, expensive and takes a long time to arrive. Dunnage costs U.S.$ 116.00 per cu.m. Wire clamps and steel wire are difficult to obtain, and vessel may only receive half the amount requested.

BARACOA: (Also see page 427)

(b) SUB-PORT OF MOA:

SHIPMASTER'S REPORT: September 1990.

Documents:

12 copies Crew List.

3 copies Stores List (including narcotics, ship's cash, bonded stores and ship's stores).

3 copies Crew Declaration (including jewellery, cameras, electronic equipment, video and radio cassettes, cash and sun glasses).

1 copy Health Declaration.

Pilotage: Pilot boards 0.75 miles off Buoy No. 1.

It is difficult to make contact with the Pilot Station at night.

Approaches: On entering, keep Buoy No. 1 close on the port side and approach on a heading of 211°.

Restrictions: Daylight navigation only.

Officials: Vessel goes to anchorage and is visited firstly by the doctor, after which all other officials board. The ship and crew cabins are searched.

Meat is sealed in freezers, if produce is from Argentina, Brazil or Uruguay. Fish and chicken is not sealed.

General: According to the Pilot, a tug is compulsory but it is a waste of money. On some occasions, vessel will need a tug, especially if turning when empty. If possible, refuse a tug when not needed, because the cost is high (500 h.p. tug – U.S.$ 259.00, 501 h.p. – 1,000 h.p. tug – U.S.$ 447.00 and 1,000 h.p. – 1,500 h.p. tug – U.S.$ 755.00). There was only one tug of over 500 h.p., and we had to pay U.S. 447.00 for about 10 – 15 minutes service. The Agents will bill every single move, and great care should be taken before signing the bills, which the Master has to sign before sailing. Ship and cabins will be searched before departure in case of possible stowaways.

Before entering port, vessel should check that it has sufficient dunnage and lashing materials, as it is in short supply, expensive and takes a long time to arrive. Dunnage costs U.S.$ 116.00 per cu.m. Wire clamps and steel wire are difficult to obtain, and vessel may only receive half the amount requested.

Cyprus

LARNACA: (Also see page 453)

MAX. SIZE: *Amend:* Maximum permissible LOA 202 m. (662 ft.).

Maximum permissible draft 11.4 m. (37.4 ft.).

The port is dredged to 12.0 m. (39.4 ft.), and the approach channel is dredged to 13.0 m.

Egypt

SUEZ CANAL: (Also see page 514)

RADIO OFFICER'S REPORT: September 1990.

Documents: When vessel Southbound:

State Agent:

1 copy Information concerning a vessel transiting the Canal.

1 copy Navigability Form.

1 copy Information concerning a ship extracted from its official documents.

1 copy Double Bottom Tank Form.

1 copy Statistical Declaration.

4 copies Crew List.

4 copies Shipping Agency out/home.

Register and Suez Canal Tonnage Certificate (returned at Suez).

Protecting Agent:

1 copy Crew List.

Quarantine:

1 copy Maritime Declaration of Health.

1 copy Vaccination List.

1 copy Port Clearance.

Suez Canal Authorities:

2 copies Information concerning a vessel transiting the Canal.

2 copies Double Bottom Tank Forms.

1 copy Crew List.

When on the buoys at Port Said, Immigration require one copy of Crew List.

When vessel Northbound:

Same documents required as Southbound.

Port Said Loading/Discharging:

Immigration:

2 copies Crew List.

1 copy Declaration of Arrival and Departure.

Passports for Shore Leave Passes.

List of People going ashore.

Shore Leave Passes (leave one half with policeman on board and take the other half together with your Passport ashore).

Radio: During transit, listen to SUQ on 421 kHz, and reply on 425, 454, or 468 kHz. Pilot will advise you when.

France

CALAIS: (Also see page 580)

BERTHING: The new deep water Eastern Dock became operational on 25th September 1990. The new dock can accept vessels of LOA 245 m. and max. draft 11.50 m. There is no beam restriction.

The new deep water dock has direct access to the sea and 3 multi-purpose berths. 4×40 tonne multi-purpose cranes are already available.

DUNKIRK: (Also see page 584)

TANKERS: The following telex was received by a vessel from Agent in August 1990:

Please find hereafter general information concerning your call at Dunkirk:

(1) Receivers: Messrs. Stocknord – Telex: 130065.
(2) Berth: Stocknord Terminal – Pier 3.
(3) Connections: 2×12 in.
(4) Discharge: Empty tank ashore – no back pressure. From experience, turnaround is about 24 hours, including analysis prior to discharge.
(5) Facilities: Shore gangway – no shore crane – no lorry access (only lub oil in bulk with lorry fitted with special safety equipment). Bunkering: only by barge (concurrently with discharge). Fresh water available.
(6) ETA France: Please kindly remember following telex numbers:
SURNAV Marine/Cherbourg 170495
France: Marine/Brest 940527
Cross/Gris-Nez 130680
Information directly from ship only is considered as official.
(7) ETA Dunkirk: Attention please to New Pilotage Procedure: Agent will advise all parties, but Pilot Station requires information directly from ship 12 hours, 6 hours (Telex 820902), 3 hours, 2 hours (VHF) and permanent contact prior arrival.
New procedure Pilot/Dunkerque – boarding either by helicopter or fast launch boat, please kindly update ship's book.
(8) Tugs Order: Pilot will arrange tugs order when on board, after meeting with Master.
(9) Prospects: Awaiting receivers instructions at this stage.
(10) Documents: Upon arrival, please kindly prepare following documents:
The Ship's Register.
5 Crew Lists, 3 Stores Lists, 3 Crew Declarations, Cargo Manifest/Sailing Clearance from Last Port, Original Bill of Lading to receivers and copy to Agent.
(11) Information: We need as soon as possible, when known, following information:
Best ETA please.
Draft on arrival fore/aft.
Ship's and B/L figures -- kilos/liters/API.
Your requirements.
(12) Acknowledgement of this message is kindly required when received.
(13) Please kindly read carefully, especially No. 7 (New Pilotage Procedure).

Guam

GUAM (Apra Harbour): (Also see page 685)

PILOTAGE: 2nd Paragraph: *Delete and substitute.*

Pilots are available 24 hours and are required on all vessels over 500 g.r.t. Pilots will board and disembark 2 miles West of harbour entrance at Point "Alpha Hotel".

Guatemala

PUERTO QUETZAL: (Also see page 688)

SHIPMASTER'S REPORT: November 1990.

Tugs: There are 2 tugs. The "Santa Rosa" 800 h.p. and the "Carolyn B" 165 h.p. They are included in the port charges. In effect, you pay for them even if you do not use them.

Fresh Water: Available alongside the pier at a good pressure. The connections are 2.5 in.

Guyana

GEORGETOWN: (Also see page 697)

MAX. SIZE: *Delete* 20 ft. 08 in., *insert* 30 ft. 08 in.
CRANES: *Amend:* Heavy lift cranes of 25 tons available.
TANKERS: Rome Terminal (Shell): *Delete* 11 ft., *insert* 18.5 ft.
Ramsburg Terminal (Texaco): *Delete* 11 ft., *insert* 18 ft.
DEVELOPMENTS: Delete entry.

India

GENERAL: (Also see Page 720)

SHIP REPORTING SYSTEMS: *Delete entry on Page 720 and substitute:*

THE INDIAN SHIP POSITION AND INFORMATION REPORTING SYSTEM (INSPIRES): Notice No. 7A/90.

1. With effect from 01 November 1986, the Indian Ship Position and Information Reporting System (INSPIRES) was brought into operation for all Indian merchant vessels, including coastal vessels and fishing vessels of more than 300 g.r.t. All other vessels in the area are encouraged to participate in this system.

2. **Objectives:** INSPIRES has the following objectives:
(a) to provide up-to-date information on shipping for search and rescue;
(b) for effective vessel traffic management services;
(c) for weather forecasting;
(d) for prevention and containment of marine pollution.

3. **Area of Applicability** (INSPIRES Area). All the sea area North of Lat. 30° S. in the Indian Ocean including Arabian Sea and Bay of Bengal, on the West along the African Coast between Lat. 10° 30′ S. and Lat. 12° N. (boundary of Navarea VIII) and in the East upto Long. 95° E.

4. **Operating Authority:** The Director General Shipping shall co-ordinate the functioning of the system with Maritime Operations Room, Bombay. The Indian Naval Communication Centres (COMCENs) Bombay (VTF) and Vishakhapatnam (VTO); Bombay Radio (VWB) and Madras Radio (VWM) will participate as the shore stations for receiving INSPIRES messages.

5. **Types of Reports.**

(a) *Sailing Plan (SP):*

Immediately prior to departure, at departure or immediately after departure from a port within the INSPIRES area, or when entering the INSPIRES area.

As the Sailing Plan message is lengthy with full particulars, it would be advisable to send this directly by telex. In the event the sailing time is changed by more than two hours, then only the time may be amended by the vessel when the Pilot is disembarked.

Ships fitted only with Radiotelephony should send their departure reports prior to sailing, and send their position reports through other vessels in the vicinity. Vessels fitted with W.T. are requested to assist vessels not fitted to relay the position reports.

(b) *Position Report (PR):*

Every day at time specified below, vessels shall transmit a Position Report:

A. *West of Longitude 80° E.*
Latitudes: 0° – 10° N. 0400 – 0455 GMT
10° N. – 20° N. 0500 – 0655 GMT
North of 20° N. 0700 – 0755 GMT
0° – 30° S. 0400 – 0455 GMT

B. *East of Longitude 80° E.*
Latitudes: 0° – 10° N. 0300 – 0355 GMT
10° N. – 20° N. 0500 – 0555 GMT
North of 20° N. 0600 – 0655 GMT
0° – 30° S. 0400 – 0455 GMT

(c) *Deviation Report (DR):*

When ship's position varies significantly from the position that would have been predicted from previous reports, or when changing the reported route, or as decided by the Master.

(d) *Final Report (FR):*

On arrival at destination or when leaving the INSPIRES area.

(e) *Any other Report:*

Whenever required as decided by the Master to enhance the effectiveness of the objective of INSPIRES, and may, if necessary, include brief report on cyclones, deep depressions, defects, damages, deficiencies, limitations, etc., of the participating vessel which assists the position reporting system, and also reports concerning marine pollution observed at sea during the reporting period.

6. **Reporting Format.** Reporting format and procedures are given in Appendix 'A'. Sections of the Reporting Format which are not relevant to the ship should be omitted from the report.

7. **Receiving Stations.**

(a) All the reports specified in Paragraph 5 are to be prefixed INSPIRES and transmitted to the stations detailed in Appendix 'B'.

(b) At present the reports can be sent by any of the following methods:
- (i) Wireless telegraphy
- (ii) Radiotelephony
- (iii) Radio Telex and
- (iv) Telephone (Terrestrial)

(c) Particulars of frequencies, watch-keeping timings, telex number, telephone numbers, etc., of Bombay Radio (VWB), Madras Radio (VWM), COMCEN Bombay (VTF), COMCEN Vishakhapatnam (VTO) through which the reports can be made are given at Appendix 'B'.

(d) INSPIRES reports will be accepted free of charge by VTF and VTO. Reports sent through VWB and VWM are chargeable, but are likely to be free of charge in near future.

(e) The reports should be sent as follows:

Sailing Plan	Before or as near to the time of departure from a port within a system or when entering the area covered by the system.
Position Report	Every day at the time specified in Paragraph 5 (b).
Deviation Report	When the ship's position varies significantly from the position that would have been predicted from previous reports, when changing the reported route or as decided by the Master.
Final Report	On arrival at destination and when leaving the area covered by the system.
Any other Report	Any other report should be made in accordance with the system procedures as notified in accordance with Paragraph 5 (c).

(f) Importance of forwarding reports at the scheduled times specified in Paragraph 5 (b) is stressed upon the Masters and Shipowners. Masters and Shipowners are advised that if the Position Reports are not received within 6 hours of the scheduled times, names of such vessels will be broadcast on frequencies given in Notice No. 11/89 Paragraph 5. Masters are advised to listen to broadcast BN from COMCEN Bombay (VTG) for vessels West of 80° E. and broadcast VN from COMCEN Vishakhapatnam (VTP) for vessels East of 80° E., every day at 1400 hrs. GMT on frequencies given in Notice No. 11/89 Paragraph 5. Vessels whose names are enlisted in this broadcast are to send their Position Reports to the concerned COMCEN immediately.

APPENDIX 'A'

STANDARD REPORTING FORMAT AND PROCEDURES

Telegraphy	*Telephone (alternative)*	*Function*	*Information required*
Name of System	Name of System		
INSPIRES	INSPIRES	System Identifier	Ship Reporting System
(1) SP (2) PR (3) DR (4) FR (5) Give in full	State in full	Type of Report	Type of Report (1) Sailing Plan (2) Position Report (3) Deviation Report (4) Final Report (5) Any other Report
A (Alpha)	Ship	Ship	Name and Call Sign or Ship Station identity.
B (Bravo)	Time	Date and time of event	A 6 digit group giving day of month (first two digits) hours and minutes GMT (last four digits).
C (Charlie)	Position	Position	A 4 digit group giving latitude in degrees and minutes suffixed with N (North) or S (South), and a four digit group giving longitude in degrees and minutes suffixed with E (East) or W (West); or
D (Delta)	Position	Position	True bearing (first 3 digits) and distance (two digits) in nautical miles from a clearly identified landmark (state landmark).
E (Echo)	Course	True Course	A 3 digit group.
F (Foxtrot)	Speed	Speed	A 3 digit group in knots and tenths of knots.
G (Golf)	Departed	Port of Departure.	Name of last Port of Call.
H (Hotel)	Entry	Date, time and point of entry into system	Entry time expressed as in (B) and entry position expressed as in (C) or (D).
I (India)	Destination and Ee-Tee-Aye	Destination and expected time of arrival.	Name of port and date time group expressed as in (B).
J (Juliet)	Pilot	Pilot	State whether a deep sea or local pilot is on board.
K (Kilo)	Exit	Date, time and point of exit from the system.	Exit time expressed as in (B) and exit position expressed as in (C) or (D).
L (Lima)	Route	Route information.	Intended track (see Note 2).
M (Mike)	Radio communications	Radio communications	State in full, name of stations/frequencies guarded.
N (November)	Next report	Time of next report.	Date time group expressed as in (B).
O (Oscar)	Draft	Maximum present static draft in metres.	4 digit giving metres and centimetres.
P (Papa)	Cargo	Cargo	Cargo and brief details of any dangerous cargoes including harmful substances and gases that could endanger persons or the environment.
Q (Quebec)	Defect, damage, deficiency limitations.	Defect, damage, deficiencies, other limitations.	Brief details of defects, damage, deficiencies or other limitations.
R (Romeo)	Pollution	Description of pollution incident or observation.	Brief details, including type of pollution (oil, chemicals, etc.), position expressed as in (C) or (D).
S (Sierra)	Weather	Weather conditions to report cyclonic conditions only.	Brief details.
***T** (Tango)	Agent	Ship's representative.	Details of name and particulars of ship's representative for provision of information.
***U** (Uniform)	Size and type	Ship size and type	Details of length, breadth (in metres) gross tonnage and type etc. as required.
V (Victor)	Medical personnel	Medical personnel	Doctor, physician's assistant, nurse, No Medic.
W (Whiskey)	Persons	Total number of persons on board.	State number.
X (X-ray)	Remarks	Miscellaneous	Any other information – give brief details.

Note:

1. For route information, latitude and longitude should be given for each turn point, expressed in C above, together with type of intended track between these points, e.g. 'RL' (rhumb-line), 'GC' (great circle) or 'Coast', or in the case of coastal sailing, the estimated date of passing significant points expressed by a 6 digit group as in (B) above.
2. The International Code of Signals should be used to send detailed information whenever language problems may exist. When the International Code is used, the appropriate indicator should be inserted after the alphabetical index in the text.

* 3. Information under 'T' and 'U' groups shall be provided by the Shipowner or Agent of Indian ships. All other ships may include this information in Sailing Plan (SP) on departure from any Indian Port or entry into the system.

Messages should normally contain the following Groups:

SAILING PLAN: SP A B E F G I L M N O P V W.
Please see Note No. 3.
ENTRY REPORT: SP A B C or D E F G H I L M N O P V W.
Please see Note No. 3.
POSITION REPORT: PR A B C or D E F N.
DEVIATION REPORT: DR A B C or D E F L N and Q, if desired.
FINAL REPORT: FR A B C or D.
EXIT REPORT: FR A B C or D E F K L.

APPENDIX 'B'

(see next page)

APPENDIX 'C'

Frequencies, Call Sign, Class of Emission, Scheduled Time and Details of Transmission of broadcast by COMCEN Bombay (BN) and COMCEN Vishakhapatnam (VN) are tabulated below:

(a) Broadcast by COMCEN Bombay (BN):

Name of Station	*Call Sign*	*Frequencies kHz*	*Class of Emission*	*Scheduled Time (GMT)*	*Details of Transmission*
COMCEN Bombay (Main Station)	VTG 3	2072	A1	0500	VTG 4
	VTG 4	4268		Main	VTG 6
	VTG 5	6467		1500	Continuous
	VTG 6	8634			VTG 7
	VTG 7	12808.5		0900 Repeat	VTG 3 Night
	VTG 8	16938		Period	VTG 5 (1430 – 0230 GMT)
	VTG 9	22378			
				1215 Sunday	VTG 8 Day
				Summary	VTG 9 (0230 – 1430 GMT)

(b) Broadcast by COMCEN Vishakhapatnam (VN):

Name of Station	*Call Sign*	*Frequencies kHz*	*Class of Emission*	*Scheduled Time (GMT)*	*Details of Transmission*
COMCEN Vishakhapatnam (Supplementary station)	VTP 3	2295		0500 Main	VTP 4 Continuous
	VTP 4	4238		1500	VTP 6
	VTP 5	6418	A1	0900 Repeat Period	VTP 3 Night
	VTP 6	8646			VTP 5 (1430 – 0230 GMT)
	VTP 7	12840			
				1215 Sunday Summary	VTP 7 Day (0230 – 1430 GMT)

Note: Ships are to indicate their working frequency to COMCEN.

JAWAHARLAL NEHRU PORT (Nhava Sheva): 18.57 N. 72.58 E. (See Late Plans)

PORT LIMITS: Vessel is considered to have "arrived" when Pilot is embarked, and/or when vessel is required to anchor outside pilotage area, awaiting a suitable tide, as in the case of large bulk carriers/container vessels.

PILOTAGE: Compulsory for vessels of 100 n.r.t. and above.

Minimum of 24 hours advance notice to Agents and Harbour Master, JNPT, who can be contacted directly over telex installed in the Port Signal Station, and is manned 24 hours a day (Telex: 01177506 HM JP IN).

Jawaharlal Nehru Port Trust operates a VHF service on Channels 13 and 16 on a 24 hours basis, with the call sign "Jawaharlal Port Control".

In-bound vessels are required to contact "Jawaharlal Port Control" on Channel 13 and 16 to report ETA and receive instructions. Vessels must not proceed beyond Bombay Floating Light without being instructed to do so.

Pilot will be embarked by means of a pilot launch with a black hull and white superstructure with the legend "Pilot" on the side, in position 1.8 miles South of Prongs Reef Lighthouse. The pilot launch is equipped with VHF Channel 13, radar and searchlight, and displays the usual pilot jack during daylight hours and pilot lights at night.

Whilst Jawaharlal Nehru Port Pilot will give instructions and communicate directly on VHF to incoming vessels, the overall control of shipping at the Pilot Station will rest with the Master Pilot of Bombay Port Pilot vessel "Venu", which usually keeps station about one mile E.S.E. of Prongs Reef Buoy and maintains a VHF watch on Channels 12, 14 and 16.

During the S.W. monsoon season, a long swell prevails at the port entrance, and the pilot launch may experience difficulties in coming alongside. At such times, Masters may be instructed to steam up to a position approximately one mile S.E. of Sunk Rock Lighthouse, where a better lee may be obtained. Masters will be advised which side to make a lee by the Pilot. During the early part of the S.W. monsoon, when the wind is South of S.W., the sea runs from the South, and Masters are advised to keep their ships heading East, when making a lee for the Pilot.

DOCUMENTS: Agents to submit 'VIA' form prior to the vessel's arrival to Operations Department and Berthing Application to the Harbour Master's Office.

ANCHORAGE: *Outer Anchorage:* See "Bombay".
Inner Anchorage: For the present, Jawaharlal Nehru Port does not afford any inner anchorage to vessels. However, one 500 m. diameter emergency anchorage with a dredged depth of 13.5 m. exists North of the container berth.
RESTRICTIONS: Maximum draft of vessel's for transiting through JNPT is 12.0 m. inward and 12.5 m. outward.
MAX. SIZE: Drafts in the common channel, JNP approach channel, bulk and container terminals are subject to dredging soundings and rise of the tide. These drafts are declared by the Harbour Master, JNPT, periodically. Vessels, intending to call at JNP and planning to load to the maximum permissible draft, should check at the time with the Harbour Master's Office.
PRATIQUE: See "Bombay".
RADIO: See "Bombay".
RADAR: The port has no radar. However, one integrated VTMS service together with Bombay Port is planned to be provided in the near future.
VHF: See 'Pilotage'.
TUGS: 3 Voith Schneider tugs of 30 tons bollard pull. Tugs join vessel at the JNP channel entrance. Tugs lines are used. 2 mooring boats are provided for docking.
BERTHING: Separate berthing facilities available for the discharge of bulk cargo at the Bulk Terminal, and loading and unloading of containerised cargo at the Container Terminal.
BULK CARGO FACILITIES:
Bulk Terminal:
2 berths with total quay length 500 m.
1 Service Berth with quay length 212 m.
Depth alongside 12.5 m.
Maximum permissible ship draft at low water level: 12.5 m.
Discharge by shore equipment at both bulk berths.
Discharge can be done in Service Berth by ship's own gear.
No loading facility at present.
Cargoes handled:
Fertiliser (DAP, MCP, SOP, Borax).
Fertiliser raw material (Sulphur, Rock Phosphate).
Foodgrains.
Equipment:
Bulk Berth No. 1 is equipped with 2 grab unloaders.
Bulk Berth No. 2 is equipped with 2 continuous unloaders.
Maximum height of discharging gear above high water level: 60.80 m.
Maximum discharge rate: 12,000 tonnes/day (all equipment combined).
CONTAINER HANDLING FACILITIES:
Container Terminal:
3 berths with total quay length 680 m.
Depth alongside 12.5 m.
Maximum permissible ship draft at low water level: 12.5 m.
Discharge and loading by shore equipment.
Cargo handled: Containerised cargo.
Equipment:
3 rail mounted quay cranes, one in each berth. Two cranes working possible in each berth.
8 rubber tyred gantry cranes for yard operations.
1 rail mounted gantry crane for ICD operations.
38 tractors (prime movers).
136×40 ft. trailers.
Ro/Ro facilities available in container terminal. Presently, Maruti cars and other heavy vehicles are being exported.
CRANES: 2 Omega P&H mobile cranes with telescopic boom and capacities of 50 tons and 25 tons available for maintenance work.
STEVEDORES: Stevedoring work undertaken by port employees. No special agency. Both bulk and container terminals work 24 hours a day in 3 shifts, except holidays.
Shift Times: 1st shift: 0700 hrs. – 1500 hrs.
2nd shift: 1500 hrs. – 2300 hrs.
3rd shift: 2300 hrs. – 0700 hrs.
Overtime work is arranged on holidays, if necessary.
Average discharge rate for bulk cargo 8,000 tonnes/day (with all 4 appliances).
Average discharge rate for container cargo is 1,200 TEUs/day with all 3 quay cranes on a cellular vessel.
HATCHES: Opening and closing done by ship's crew.
CARGO GEAR: Load/discharge effected by shore gear.
Special beams available for handling O/H containers.
MEDICAL: Emergency medical facilities are provided at JNP. However, in serious cases, arrangements can be made for transportation and hospitalisation at Bombay.
DENSITY: See 'Bombay'.
FRESH WATER: Available at all berths.
FUEL: Diesel and furnace oil available at all berths. Bunkers provided from storage tanks belonging to BPCL.
FIRE PRECAUTIONS: Port Fire Service maintains 24 hours watch. Any fire/emergency must be immediately reported to Port Signal Station on VHF Channel 13, which operates on a 24 hour basis. All hot work to be carried out after obtaining Hot Work Permit from Port Safety Inspector, Tel: 306.
CONSULS: See "Bombay".
REPAIRS/DRY DOCKS: See "Bombay".
SURVEYORS: See "Bombay".
GANGWAY/DECK WATCHMEN: Routine gangway/deck watch is the responsibility of the vessel's Master. Private watchman not envisaged as a port requirement.
CUSTOMS ALLOWANCE: See "Bombay".
REPATRIATION: See "Bombay".
AIRPORT: See "Bombay".
TIME: See "Bombay".
HOLIDAYS: See "Bombay".
POLICE/FIRE/AMBULANCE: Police: Sheva Police Station, Tel: 364. Fire: JNP Fire Station, Tel: 306. Ambulance: Tel: 360, 346.
TELEPHONES: Arrangements are being made to provide telephones at all the berths.
IDENTIFICATION CARDS: See "Bombay".
GENERAL: *Hazardous Cargo:* At present, hazardous cargo in break bulk form is not handled in JNP. Except for Class 1 and 7, IMDG code hazardous goods of all IMO Classes are allowed to be landed/loaded in containerised form at JNP container berths.

In each case, Masters of vessels carrying dangerous cargo in containers must arrange to transmit Dangerous Cargo List, giving container No., IMO Class, Bay Plan, description of goods, UN Code No., to the Harbour Master of JNPT.
REGULATIONS: See "Bombay".
DEVELOPMENTS: Procurement of additional container handling equipment such as 2 quay cranes, 2 yard gantry cranes and 2 reach stackers. Expected date of completion by end of 1992.

Conversion of bulk service berth for import of phosphoric acid, edible oils, LPG and export of foodgrains. Expected date of completion by end of 1995.

Construction of two additional berths for container handling, enlargement of stacking area, enlargement of CFS, etc. Expected date of completion after 1995.
AUTHORITY: Jawaharlal Nehru Port Trust, Sheva, New Bombay. *Tel:* 02157/301. *Telex:* 011-77502/4148. *Contact:* Captain R.Ramkumar, Harbour Master.

Indonesia

ANOA NATUNA: 05.14 N. 105.36 E.

LOCATION: Anoa Natuna Terminal is located in position Lat. 05° 13′ 56″ N., Long. 105° 35′ 49″ E. The terminal is for loading crude oil and is due to come on stream in the near future.
OPERATOR: Amoseas Indonesia Inc. *Telex:* 44762. *Fax:* Jakarta 345913. *Contact:* Captain P.Bartlett, Marine Operations Superintendent.

JAKARTA: (Also see page 779)

RADIO OFFICER'S REPORT: September 1990.
Documents:
Agent:
8 copies Crew List.
1 copy Personal Effects List.
1 copy Stores List.
Ship's Certificates.
Oil Record Book.
Health Book (supplied on first visit to Jakarta).
Customs:
1 copy Personal Effects List.
1 copy Stores List.
1 copy Crew List.
1 copy Ports of Call List.
1 copy "Nil" Return of Mail/Parcels/Passengers/Arms and Ammunition/Animals.
Amount cargo for Jakarta and next port.
Manifests.
Bonded Store will not be sealed.
Agent will handle Immigration and Quarantine matters.
Shore Leave: If no shore passes are issued, Passport will suffice when going ashore.

SOURABAJA: (Also see page 812)

RADIO OFFICER'S REPORT: September 1990.
Documents:
Agent:
1 copy Personal Effects List.
2 copies Crew List.
Arrival Conditions: Extra Lub Oil, Boiler Water, Ballast Water.
Manifest.
1 copy Maritime Declaration of Health.
1 copy Vaccination List.
Agent attends to Immigration and Quarantine matters.
Customs:
1 copy Personal Effects List.
7 copies Crew List.
Customs will come on board to do a "Boatcheck". Bonded stores were not sealed.
Customs Allowance: 1 bottle of spirits and 40 cigarettes or 50 gm. of tobacco.
Shore Leave: Crew are supplied with shore passes which have to be returned prior to departure.

WIDURI MARINE TERMINAL: 04.40 S. 106.39 E.

LOCATION:

1st Export S.B.M.: Lat. 04° 40′ 11.88″ S., Long. 106° 39′ 40.99″ E.
2nd Export S.B.M.: Lat. 04° 40′ 36.09″ S., Long. 106° 38′ 48.99″ E.

The terminal is for loading crude oil only, and is due to come on stream in early December 1990.

OPERATOR: Maxus Southeast Sumatra, Inc. *Telex:* 47121 Maxus Ia.

Italy

LA SPEZIA: (Also see page 880)

RADIO OFFICER'S REPORT: September 1990.

Documents:

Agent:
- 4 copies Crew List.
- 1 copy Stores List.
- Certificates, Italian Light Dues, Oil Record Book, Ship's Particulars and Lub Oil.
- Copy first and last page of Oil Record Book.

Customs:
- 1 copy Stores List (also showing pepper / cigarette papers / cacao / chocolate).
- 1 copy Crew List.
- Manifest.

Immigration:
- 1 copy Crew List.

When second Italian port:

Customs:
- Italian Stores List from previous Port (Manifesto di partenza).

Shore Leave: Shore passes are issued but do not have to be returned.

LIVORNO: (Also see page 882)

RADIO OFFICER'S REPORT: September 1990.

Documents:

Agent:
- 4 copies Crew List.
- 1 copy Stores List.

Customs:
- 1 copy Crew List.
- 1 copy Stores List (include pepper, cigarette papers, cacao, chocolate).
- Manifests.

Immigration:
- 1 copy Crew List.

Harbour Master:
- 1 copy Crew List.
- 1 copy Harbour Master's Papers.

Health:
- When Northbound, 1 copy Maritime Declaration of Health is required.

Shore Passes: Immigration issue passes, but they do not have to be returned.

RAVENNA: (Also see page 897)

(B) ENEL MARINE TERMINAL:

CHIEF OFFICER'S REPORT: November 1990.

1. *ENEL ITC Marine Terminal:* Constructed in 1986, and situated about 8.5 km. off the coast of Ravenna in position Lat. 44° 27.8′ N., Long. 12° 23.9′ E. It is designed to unload fuel oil and crude oil to the onshore tanks and from there to the power plant at Porto Tolle.

This terminal has been designed for the mooring of tankers from 18,000 d.w.t. to 80,000 d.w.t. with a max. draft of 11.5 m. at the mooring point.

The terminal will be unmanned when no tankers are moored.

Two submarine pipelines, each 22 in. diameter and 8.8 km. in length, connect the terminal to the shore.

The terminal is equipped with a "Safety Berthing Device" (SBD). The latter is provided with 2 luminous displays which give the distance between the side of the tanker and the breasting dolphins, starting from 99 m., as well as a traffic light which indicates the tanker approach speed.

Firefighting is ensured by a remote controlled foam monitor.

2. *Lighterage:* To reach a draft of 11.5 m., vessel must be lightered at Ravenna Roads in a special anchorage for lightering purposes. The anchorage is situated between following points:
   - (a) Lat. 44° 31′ 08″ N., Long. 12° 24′ 00″ E.
   - (b) Lat. 44° 31′ 08″ N., Long. 12° 28′ 00″ E.
   - (c) Lat. 44° 29′ 30″ N., Long. 12° 24′ 00″ E.
   - (d) Lat. 44° 29′ 30″ N., Long. 12° 28′ 00″ E.

Our lightering barges were the M.T. "Assunta Ravenna" and M.T. "Marina II", both of 1,000 tonnes. Lighters, according to weather conditions, could berth port or starboard side to and also connected cargo hoses, but lighterage operations will not be carried out simultaneously. Each barge was fitted with 1×150 mm. diameter hose and 2 Yokohama fenders.

During discharging operations on the roads and at the Marine Terminal, automatic sampling equipment was installed on the manifold flanges. The equipment is operated by an SGS-Redwood Inspector, so accommodation and food must be arranged for one person.

3. *Basic Data and Operating Limits:*

	Minimum	Maximum
Tanker class:	18,000 d.w.t.	80,000 d.w.t.
Overall length:	160 m.	270 m.
Max. overall displacement:		110,000 tons
Max. draft:		11.5 m.

Operating approach speed: Less than 0.1 m./sec.
Max. operating approach speed: Less than 0.15 m./sec.
Designed approach speed: Less than 0.2 m./sec.

NOTE: 0.2 m./sec. is the limiting speed and must never be exceeded.

Designed berthing energy of a tanker with 110,000 tons displacement and 0.2 m./sec. berthing speed: 172 tons/m.

Limiting conditions for mooring:
- Daylight only.
- Wind speed: 30 knots.
- Wave height: 2 m. maximum.
- Minimum visibility: 0.5 miles.

Limiting conditions for unmooring:
- Day and night.
- Wind speed: 40 knots.
- Wave height: 2 m. maximum.

Conditions in which unloading must be shut down:
- Max. wind speed: 50 knots.

4. *Mooring and Unmooring Operations:* Normally the vessel will approach the terminal from the South

After having consulted the Pilot, the Master will decide whether to use two or more tugs, depending on the power of the tugs available and weather conditions.

This decision must, however, be made by radio before the Pilot leaves the port, in order to allow the tugs enough time to reach the terminal, about 30 to 40 minutes.

The moored tanker *must supply* each tug with 2 identical lines, in good condition, which are connected to the hooks on the tugs.

The tugs will await the tanker about one mile from the terminal.

Mooring personnel will reach the terminal by service boat. At least 4 men will leave the boat and connect the tanker's lines to the hooks on the unloading terminal (two at each end of the tanker).

When the tanker is parallel to the terminal and at a distance of about 150 m. – 200 m., it may be necessary to drop the port anchor so as to have better control over the vessel during the last phase of the approach. The anchor will also give greater control during unmooring.

With simultaneous slackening of the chain and heaving off the bow/stern ropes, already connected to the terminal platform, the tanker may be carefully brought alongside and kept, as far as possible, parallel with terminal platform.

The control of tanker manoeuvres will be made easier by using the safety docking device monitoring system (SBD).

After the tanker has been correctly positioned for the connection of the loading arms, the mooring operation must be completed. There must be at least 8 lines: 3 head/stern ropes, 3 breast ropes and 2 springs, at each end.

Unmooring operation: Assuming the same wind and sea conditions as for mooring, the anchor can be used for unmooring (if it has already been employed).

After the lines have been gradually slackened, and the tanker's stern is free, the tanker's engine can be used and the anchor chain heaved in, so that the bow can be moved away from the platform. Assistance will be given by at least one tug of 1,500 b.h.p., which will move the tanker by pulling on a stern rope.

If, however, the anchor is not used, the Master and the Pilot will decide the number of tugs required.

5. *Cargo Connections:* Unloading operations will be performed by means of 2 hydraulic loading arms of 12 in. diameter. Each arm will be equipped with a double valve disconnector of the MIB type and a connecting flange with a diameter of 12 in. Max. pressure allowed is 12 kg./sq.cm.
6. *Ballast Facilities:* None available.
7. *Gangway:* Access to the tanker from the terminal is possible by a built-in automatic telescopic gangway.
8. *Ullaging/Temperature Sampling:* Taken by terminal personnel and SGS-Redwood Inspector, automatic sampling equipment also installed.
9. *Telecommunications:* The terminal personnel will be on permanent stand-by on VHF Channels 69 and 16.

The tanker will be able to communicate with the Terminal Control Room on Channel 69.

Socialist People's Libyan Arab Jamahiriya

GENERAL: All ports: (Also see page 1068)

NAVIGATION REGULATIONS: The following telex was received from Libyan Marine Department on 1st October 1990.

Quote:

The following is a resume of standard marine regulations issued by Libyan Authorities to which all ships must abide in Libyan waters, which are limited by 12 nautical miles from coastline and in Gulf of Sirte by parallel 32° 30′ N.

1. Ships bound to any Libyan port must:
   (a) Inform her Agent in Libya, from her sailing port, of the following: Name, call sign, nationality, name and address of owner, name and nationality of Master, No. of crew and passengers (if any), G.T., type of cargo, destination port, date and ETAs or (departure), date of arrival.
   (b) 24 hours prior to arriving at the selected approach point, vessel must contact the nearest coastal station to confirm the above information and include the following: Position, speed, course at that moment, approach point to use, state of sea, ship's condition (trim, list, draft (fore and aft)).
   (c) On arriving at the approach point, vessel must contact the port of destination to confirm ETA, course and speed.
2. Ships leaving any Libyan port on international voyage must:
   (a) Advise her Agent, at least 4 hours before departure, of the following: Name, call sign, No. of crew and passenger (if any), next port, cargo on board, course and speed from the outer limits of the port to the end of Libyan territorial waters.
   (b) Insure regular communication with the port radio and coastal station on VHF Channel 16.
3. Ships on voyages between Libyan ports must:
   (a) Advise her Agent of the following: Name, call sign, ETAs or (time of departure), cargo on board, next port, ETA, draft (fore and aft), course and speed or courses and speeds.
   (b) Insure continuous monitoring on Channel 16.
   (c) Insure regular contact with the port radio and/or coastal station every 4 hours or when possible.
4. All ships must abide to the anchorage and prohibited areas and must adjust their course to pass by one of the approach points.
5. All ships must insure that they have on board all certificates and documents required, including the Safe Minimum Manning Certificate, when going to any Libyan port or passing through Libyan territorial waters.
6. Ships that violate these standard regulations and prevailing laws will be subject to punitive penalties.
7. These regulations will come into force on 10th October 1990.

Unquote.

Morocco

LAAYOUNE: (Also see page 1168)

SHIPMASTER'S REPORT: November 1990.

Phosboucraa Ocean Terminal for Phosphate Loading: Chart: B.A. No. 863.

On a recent call to the above phosphate loading facility, the following observations were made:

The pier is about half a mile long, running North to South, with 3 berths, N.W., S.W., S.E. The N.W. Berth has been seriously damaged in a storm from the Southwest. The berth is closed and will not be repaired.

The Southernmost dolphin is isolated because the catwalk has fallen into the sea. Thus both the North and South light beacons are extinguished.

The vessel anchored 1.5 miles S.W. of the pier, and waited 24 hours for the swell to reduce to an acceptable level. The vessel was then placed at the S.W. Berth, using the port anchor with 7 shackles on deck, and picking up a heavy buoyant sea-line on the port side aft. The Pilot asked for 4 head lines to the Northerly dolphin, and three to the dolphin aft, no back springs required. The largest vessel to berth was 233 m. long, with a beam of 33 m., i.e. about 70,000 d.w.t.

The position of final mooring was with the vessel some 6 ft. to 15 ft. clear of the four steel breasting dolphins. Of these only the third from North had wooden cladding on it, the others were bare steel. The bearing area is pivoted and bears against a small section of rubber buffer. These dolphins are the last ditch defence of the concrete pilings on which the quay stands.

The berth has 2 telescopic extending booms, pivoted from the inboard end. The forward end is carried on a carriage around an arc, giving a wide range of movement. The booms are currently capable of 1,200 tons per hour. However, the vessel was not positioned correctly, and Holds No. 1 and 4 could not be properly centralised.

The Loading Foreman took station in the centre window of the wheelhouse, with walkie-talkie communications to the boom drivers and the shore plant. There were 3 foremen initially, and the Loading Foreman asked for a cabin for their use. They were given use of the Pilot Cabin as they were working nearby in the wheelhouse. They were fed on board. Access was by means of a "two man cage" lowered from the loading boom onto the deck. Thus for a shift change, the 'new' foreman lowered the cage for the 'old' foreman and hoisted him up. Then the 'old' foreman lowered the cage for the 'new' foreman onto the deck, before stowing it at the boom position. Thus little chance of casual boarders visiting the ship. The pier has a permanent garrison of troops bivouaced on it. No shore leave is normally allowed, in special circumstances, visas have to be obtained from the local military commander.

The inspection party comprised Charterer's Agent, Owner's protecting Agents and 5 officials (Customs, Health, etc.). 7 Crew Lists were required, otherwise as per Casablanca. On departure, there were 3 officials for the papers. No Port Clearance is issued, but an Export Manifest is issued. The American Immigration Crew Lists were sent to the Embassy in Casablanca for processing.

The prevailing current sets across the wharf by 20° – 30°, which puts a heavy strain on the sea-line. The rapid changes of trim, and equally rapid changes in direction and height of swell can 'upset' the balance of the moorings in only a few minutes.

The vessel was moving in a constant "cork screwing motion" throughout the time on the berth, rising and falling 3 ft. – 8 ft. against the loading boom, and rolling 5° – 10°.

Several times the ship set down onto the 4th dolphin from North, and rubbed steel to steel. Damage was suffered when the dolphin got under the main deck multi-roller fairlead, breaking the welding and buckling the brackets.

While trying to heave in the sea-line, yet one more time, the deck eyebolt pulled out when holding 2 stoppers. One seaman was caught across the hand by the sea-line as it jumped, he subsequently fainted from shock. Possibly 30 ft. of sea-line was hove in during the loading. *This was in good weather with winds of Force 3 or less from the N.W.*

Ship's engines must be at short notice to leave the berth, if the wind or the swell become dangerous. The berth is very dangerous with wind and swell from the S.W. There are two dangerous wrecks reported to lie 2 miles West and Northwest of the main pier.

The vessel was unable to obtain a British, Spanish, French or American chart of the port of Laayoune in Spain or Casablanca.

A request was sent by radio for a 'Draft Survey' to be conducted on Owner's Account. The advice was that no such independant service was available, and the cargo was sold on 'sellers measurement'.

At the draft check it was found that the shore scale had apparently underread by nearly 1,000 tons or 2%. A run of 800 tons was asked for, but in fact the ship may have received 1,060 tonnes. This effectively removed any safety factor for the restricted draft at the discharge berth. Density was found to be 1028 – 1029.

The Loading Foreman, Chief Officer and Duty Officer made independant readings of draft at 6 points, with wave heights of 4 ft. across the figures as the ship continued to corkscrew actively.

The Bill of Lading was made out for the cargo tonnage shown by the draft check, with 'Quantity and Quality unknown', as endorsement.

Disbursement Account and Demurrage Statement was endorsed "Subject to Owner's Approval".

On sailing it was intended to take up the slack of anchor chain, put the sea-line on the bitts, and then single up to one line each end. Unfortunately the forward dolphin let all lines go at once.

The ship was hove forward and outward by the windlass, and holding onto the sea-line. However, the sea-line became so tight that it was dangerous to approach, and a "Dead Slow Astern" was needed to take the weight off it. It is a remarkably long line. Altogether the sailing was a tense period. A tug stood by on arrival and on sailing.

Fuel and water are not available. Any provisions or spare gear would need to be delivered by boat on the offside, due to the movement of the ship.

It was 60 hours from "finish with engines" until "stand-by main engines", with some 5 hours for electrical power failure (when the ship could not have sailed with booms extended over the ship), for 47,000 tons.

The concrete piers are showing signs of wear and stress from the heavy battering from the S.W. gales each Winter. I understand that in the future a new port will be built, and this terminal abandoned. The conventional wisdom is that in Summer months it is not an unreasonable berth, but in Winter there is much waiting for sea and swell to subside.

Netherlands Antilles

ST. EUSTATIUS: (Also see page 1214)

SHIPMASTER'S REPORT: October 1990.

Vessel approached from the South (very good radar target).

VHF contact established with Statia Terminal at about 30 miles, initially Channel 16 and afterwards all communications on Channel 9.

Vessel had bunker fuel oil for discharge, and was instructed to anchor 5 cables West of Statia Terminal Jetty in Tumbledowndick Bay. The water depth was 47 m. and the holding ground good, vessel had 8 shackles on deck.

Discharge was into 3 barges, all made fast on vessel's port side, with 2 ship's wires forward and aft.

Berthing at the jetty was effected starboard side to, with vessel heading South and turning to port, prior to swinging. Two tugs made fast fore and aft, at break of forecastle head and forward of after accommodation – tugs lines with eye on deck.

Vessel swung through 360° and slid stern first into berth. Port anchor was used, and when in position, 5 shackles were in the water. Moorings forward were 3 head lines, 2 breast lines and 2 springs, and aft 2 springs, 2 breast lines and 4 stern lines. Mooring boat was out of action, so all lines were passed by heaving line. Head and stern lines to be ropes only.

Chicksan discharge arm and shore gangway used, but no ship's personnel allowed to use the jetty.

All shore communications (for shore leave and ship's business) had to be by the terminal tugs, fitting in with their schedule, as the boat usually used was out of commission.

All terminal, Pilot, tugs and agency communications and co-operation were of a high standard.

Caleb-Brett were terminal surveyors.

Vessel later returned to the terminal area for bunkers. We were instructed to anchor 5 cables South of the jetty and 6 cables from the shore, in 22 m. of water. Vessel lay to the South while bunkering operations were taking place.

Crew changes were effected while in the port. All outgoing and incoming personnel were routed via the Isle of St.Maarten.

St.Maarten Port Services were vessel's Agent on both islands.

Cash was obtained, but had difficulty with Bank transfer from St.Maarten to St.Eustatius.

All Customs and Immigration documentation handled by the Agent (2 copies Crew List, 1 copy Stores List, 1 copy Personal Effects List and Last Port Clearance).

After cargo discharged at the terminal, vessel anchored 1.6 miles South of the terminal to await port clearance, documentation, etc. Vessel anchored in 30 m. with 6 shackles in the water, on the line 078° to the Gallows Bay 'City Pier'.

Once clearance obtained, Netherlands Antilles Government charge approximately U.S.$350.0 per day "waiting fee", if vessel remains in the anchorage area off the island, so it is prudent to move away to the Saba Bank and wait.

Nigeria

PORT HARCOURT, (including Okrika Refinery:) (Also see page 1265)

SHIPMASTER'S REPORT: October 1990.

Vessel: 50,000 d.w.t.

Berth: Okrika Refinery.

Report: The following is a copy of a telex received from a Master.

Okrika Pilot boards at Bonny Town. Daylight berthing only. River passage fairly well buoyed. There are two berths ('A' and 'B') on the East side of the river. Vessel berths portside to, so has to turn short round adjacent to berths. Tug "Limburgh" in attendance. After turning, starboard anchor used to check approach alongside. Tug was used as mooring boat. Tie up with 4 head/stern lines and 2 springs fore and aft. Berth 'A' is of good solid cement construction. Good fenders alongside berth at approximately 70 m. intervals. Dolphins for head lines have good leads, but aft dolphins give poor leads for stern lines and breast lines.

Berth 'B' (length 110 m.) is best berth. Also of good solid cement construction with very good fenders, leads to dolphins each end good. Both berths have 10 in. Chicksans. Density 1012 varies. Max. sailing draft 9.5 m. Communications overall chaotic, very difficult to get any information. One task force soldier onboard. We had no problems with pirates, but other vessels did. Pirates can be vicious and will come out 30 miles from coast. Port officials board at Okrika and Bonny. Vessel requires two complete sets of entry papers.

Norway

GLOMFJORD: (Also see page 1279) (See Late Plans)

SHIPMASTER'S REPORT: September 1990.

Pilotage: Not compulsory, but advisable for foreign vessels and especially for tankers. When arriving from the South, Pilot boards 1.5 miles N.W. of Aasvaer Lighthouse, from a large cutter with a white hull and red deck house. It is similar in appearance to a fishing boat and can attain a speed of 14 knots.

Pilots have to be ordered through the Agent or through Lodingen Pilot Office, which is near Narvik. As much notice as possible is required, and notice should not be less than 2 hours when arriving, and 6 hours when leaving Glomfjord. When a vessel leaves the port, the Pilot arrives by car or by one of the attending tugs. The Pilot comes from Sandnessjoen Pilot Station by cutter, approximately 2 hours. Five pilots are stationed here for coastal duties and for berthing vessels at small ports up to Narvik.

No pilots are stationed at Aasvaer.

The distance from Glomfjord to Aasvaer is 65 miles, most of the passage is at near full sea speed and in sheltered waters through the islands.

Approaches: Lovunden Mountain in position Lat. 66° 22′ N., Long. 12° 20′ E., is 2,031 ft. above sea level, and can be seen from 45 miles on a clear day. It has a distinctive pinnacle. Sanna Island in position Lat. 66° 30′ N., Long. 12° 02′ E., is also conspicuous. Aasvaer Lighthouse is painted a distinctive red in colour, and has a very good Racon.

Charts: Charts used for approaching the port were B.A.Charts No. 3887 (3886/3885/2310).

Anchorage: There are no safe anchorages outside the pilotage district. Once inside the islands, numerous anchorages can be found. Pilot advised vessel to use Lillesjona anchorage in position Lat. 66° 13.5′ N., Long. 13° 04′ E. Pilotage is not compulsory for going to the anchorage, but it is advisable to use one, if you do not have local knowledge.

VHF: Pilots at Sandnessjoen monitor Channels 16 and 13. There is now no pilot VHF service at Aasvaer Lighthouse. Vessels should call Lodingen Pilot Office through Bodo Radio (Tel: 082-31104).

Norsk Hydro at Glomfjord listen continuously on Channels 16 and 12 from 0600 hrs. on Monday to 2200 hrs. on Friday. They do not listen at weekends or public holidays.

Tugs: 2 tugs are available, 1×1,500 h.p. and 1×2,000 h.p. One tug comes from Mo-i-rana and the other from Sandnessjoen, both these places are about 6 hours from Glomfjord.

Large vessels inward bound usually use 2 tugs and outward bound one tug, but if strong winds are blowing, 2 tugs should be ordered.

Ship's lines are used.

Berthing: Ammonia Berth: Ammonia Berth is to the West of the Fertiliser Berth, in position Lat. 66° 48.4′ N., Long. 13° 56′ E. The Ammonia Berth is of concrete pile construction with a berthing face of 30 m. length, with breasting/mooring dolphin to the West, which is connected by walkway giving another 25 m. of berthing face. The berth is set out 30 m. from the shore line (See "Late Plans").

When the vessel is berthed port side to, the ship's bow overhangs to the East so mooring is poor, no head or stern leads, only breasts and springs. There are electric capstans on the jetty and the fenders are good. Only a bridle can be used as a gangway. The berth is fairly well sheltered, except when high winds are blowing from the East, when the wind funnels from the mountains down the Fjord. At this time, the berth becomes very exposed to violent wind gusts, and in Winter long delays can be incurred with berthing and unberthing.

When approaching the berth, to berth port side to, starboard anchor is let go when approximately 100 m. off the berth, to 5 or 6 shackles in the water, to assist unberthing.

When vessel comes parallel with the berth, it is eased alongside by the tugs. This is due to shallow areas to the West of the berth. The mooring gang for the Ammonia Berth came from the fertiliser plant and do not like handling wires. For mooring, it is suggested that a vessel tries to moor with 3 head/stern lines, 2 breast lines and 2 springs at each end. This is particularly necessary during the Winter months. The rise and fall of the tide is approximately 2.0 m.

Vessels usually berth port side to at all berths. However, in my opinion, large ammonia gas tankers would be better berthing starboard side to, if the wind is calm, and using 2 tugs, thereby being in a more favourable position for leaving in ballast.

Largest vessel to berth at the Ammonia Berth was 30,000 cu.m. The Fjord is very deep, but the depth alongside at low water is 15.0 m.

Fertiliser Berth: The Fertiliser Berth has a straight quay of approximately 300 m. length. The berth can accept vessels up to 26,000 d.w.t. Depth alongside at low water is 8.5 m.

Cargo Operations: The berth is equipped with an 8 in. Chicksan (300 ASA) with clamps. It is possible to use a 150 ASA reducer. The maximum discharge rate is approximately 520 t.p.h. Discharge is to a storage cavern with a capacity of 42,000 tonnes, which is set in the hillside 60 m. below sea level. The cavern was blasted out in 1985/86. It is possible to receive warm product up to ambient temperature, but discharge is very slow.

Cavern storage compressors are in the Machinery/Control House, adjacent to the berth. Whilst the vessel is discharging, there is an operator on watch in the Control Room, and he is in continuous contact with the ship by Motorola VHF.

About 80,000 tonnes of ammonia are imported each year, and approximately 220 tons are taken from storage each day. Production at Glomfjord plant is 100,000 tonnes per year.

The surveyor from SGS is in attendance and helpful, no samples taken. A representative from Norsk Hydro is in attendance for arrival and departure survey.

Fresh Water: Available at the jetty at a good rate and is free.

Stores: A local chandler can deliver stores alongside. Fresh produce is very expensive, and the quality is poor.

Agent: Norsk Hydro have an office on the Fertiliser Quay, which is about 1 km. from the Ammonia Berth. They may be contacted between 0730 hrs. and 1500 hrs, Monday to Friday. They are very helpful when on duty, but are difficult to contact out of hours. There are two metered telephones in the office for the ship's use.

Documents: The Agent handles all documentation. Customs are based in Bodo, but do not normally attend on board. The following are to be prepared on Norwegian forms:

3 copies Crew List.
1 copy Master's Declaration, and 3 copies.
1 copy Cargo Manifest, and 2 copies.
1 copy Crew Declaration, and 2 copies.
1 copy Maritime Declaration of Health.

Radio: Bodo Radio. Melroy Radio is a slave station and can handle public correspondence. It was not possible to use the ship's satellite communicator whilst alongside, due to the high mountains surrounding the Fjord. The Agent reports that this is usually the case.

Airport: There are 5 return flights each day from Oslo to Bodo, which is 2.5 hours away by car.

General: Agent will lay on tour of the surrounding area which is interesting, especially to the glacier. The town of Glomfjord has one hotel and a few shops, but prices are high.

It is possible to make telephone calls from the hotel.

A minibus passes the berth at ten minutes to the hour on weekdays from 0700 hrs. to 0300 hrs.

Port State Control (Norwegian Coastguard) visited the vessel, they are based in Bodo. Bodo is the Northern administrative capital of Norway. They are very strict on pollution in the area.

STURE: (Also see page 1296)

PILOTAGE: *Amend:* Pilotage is compulsory for *ALL* vessels....
RESTRICTIONS: *Add:*
Wind Limitations: Vessels up to 180,000 d.w.t. will not be allowed to go alongside Jetty No. 1 and 2 when the wind force exceeds 14 m./sec. (10 min. average) from the most prevailing wind directions. For vessels from 180,000 d.w.t. – 300,000 d.w.t., the wind limitation is 10 m./sec. (10 min. average).
TUGS: *Amend:* 2×50 tons bollard pull and 1×35 tons bollard pull.
RADIO: *Pre-Arrival Information: Amend:*

72 hours before arrival, the Master shall inform the terminal about the following, either via his Agent or direct to the terminal on Telex No. 40314, or Fax. No. 05-389420.

(a) Ship's name, call sign and ex-name.
(b) Flag/nationality.
(c) Name of Master.
(d) Owners.
(e) Shipper.
(f) Cargo number.
(g) Gross registered tonnage.
(h) Summer deadweight.
(i) Draft, fore and aft.
(j) Last port of call.
(k) Confirm ETA (local time and date).
(l) Whether loaded/part loaded or in ballast. If loaded, nature and quantity of cargo, if ballasted, type (segregated/oily) and quantity to be discharged ashore and estimated deballasting time.
(m) Quantity of cargo to be loaded, and requested loading rate.
(n) Length overall and beam, number, size, distance from bow to connections and position (above water line and from ship's side) of vessel's manifold connections.
(o) Defects in vessel or equipment affecting discharging/loading performance or manoeuvrability.
(p) Confirmation that an inert gas system is fitted, fully operational, and that the oxygen content of all tanks does not exceed 8% by volume.
(q) Last three cargoes.
(r) Mooring equipment.

FUEL: *Add:*
Bunker barges are not permitted to deliver bunkers at Sture.

Peru

CALLAO: (Also see page 1341)

SHIP'S OFFICER'S REPORT: October 1990.
Documents: Vessel's copies to be delivered on clearing vessel inbound on arrival, when Health, Customs and other Authorities board.

Cargo Manifests, including additionals. Must be faithful copies of Bills of Lading descriptions (Manifiesto de carga para puerto).	4
Same Manifest, but freighted.	Nil
Transit Cargo Manifests (Manifiesto de carga en transito).	3
Cargo Manifests, covering cargo shortshipped but manifested on previous vessels calling at Callao (Manifiesto de carga de transbordo).	2
Bills of Lading, full set and copies.	3
Dangerous Cargo Lists (Lista de carga peligrosa para puerto).	2
Transit Dangerous Cargo Lists (Lista de carga peligrosa en transito).	2
Mail Manifests (Guia de correos).	2
Passenger Lists (Pasajeros para puerto).	6
Transit Passenger Lists (Pasajeros en transito).	6
Tally Books.	Nil
Stowage Plan	Nil
Consolidated Stowage Plan, prepared or checked on board.	Nil
Visaed Tonnage Certificate or General Declaration from first port receiving cargo for Peru and every port of call thereafter.	1
Health Clearance, last port and a Declaration of Health (Declaracion de sanidad).	1
Vaccination List (Lista de vacuna).	1
General Declarations (provided in port).	7
Crew Lists (Rol de tripulacion).	8
Crew's Personal Effects Declarations (Declaracion de effectos de la tripulacion).	3
Stores Lists (Declaracion de suministros del buque).	3
Baggage Declarations (accompanied) (Equipajes acompanades).	4
Baggage Declaration (unaccompanied) (Equipajes no acompanades).	Nil

Remarks:
(a) The vessel considered, is a general cargo vessel, without passengers or mail on board.
(b) No containers were unloaded at Callao, and therefore no container lists.
(c) There was no transhipment cargo on board.
(d) It seemed preferable to prepare the documents in Spanish for the good reason that "everything ran smoother".

PIRACY: *Report:* October 1990.
The pirates were armed with knives and daggers, and managed to steal various articles such as mooring ropes.

St. Lawrence Seaway

ST. LAWRENCE SEAWAY: (Also see page 1425)

SHIPMASTER'S REPORT: September 1990.
Route: St. Lawrence Seaway. Great Lakes: Ontario, Erie, Huron and Michigan.
Port Visited: Burns Harbour, Indiana.
St. Lawrence Seaway and Great Lakes: Ballast Control Guidelines: Before entering Cabot Straits, ECAREG asked for details concerning location and depth of water where any ballast was taken on. Any ballast taken from depths of less than 2,000 m. should be exchanged. This was no comfort to us, as we had 1,800 tonnes of ballast on board for stability reasons. Following an exchange of telexes with ECAREG and Montreal Agents, common sense prevailed. The Canadian Coast Guard confirmed, it was not necessary to exchange ballast, if in any way deballasting affects ship stability. Subsequently we deballasted in Burns Harbour before lifting a steel cargo without further concern.

Seaway Inspection: This took place at anchor off Montreal and lasted for 2.5 hours, while the 3 Inspectors completed (a) Ship Inspection Report, (b) Radio Inspection Certificate and (c) Food Inspection. Item (a) is mainly concerned with compliance with the particular equipment requirements for the Seaway, such as rigging of seaway wires, landing booms, stern anchor, anchor marker buoys and air drafts. The Inspector was particularly helpful and tolerant, which was welcome, as only one officer had transited before. Item (b), compliance with the Canadian Radio Telephone Regulations. Item (c), the Food Inspection brought its own problems for this ship, with only one freezer room in use, concerning the sealing up of meats. Even our U.K. meat was found to originate from the Argentine, and had to be sealed with the pork and poultry from Spain. We still had 6 days to go before taking any local stores in Burns Harbour was possible, so had to make some grill doors for the shelving for a locker space within the meat room.

Ballast adjusted to meet the max. draft requirement of 26 ft. even keel before departure from the anchorage and approved by the Inspector.

Seaway Transit: The Seaway max. draft of 26 ft. is rigidly enforced. Even lying alongside the dock brings its own problems, when a large Laker passes in the narrow canal, causing the vessel to surge on her moorings (large Lakers use fresh water sprinklers on deck from the cold lake waters, to avoid an increase in drafts due to hogging in the Summer). An upright ship is equally important in the high sided locks. Port side Man Overboard Signal and bracket torn off when the port bridge wing nearly made contact with lock wall. The steel chafing bars, as fitted to the sides of this ship, were invaluable to prevent further damage and so thoroughly recommended for any vessel using the Seaway.

Shiphandling in Locks and Seaway: Tugs are not used in the Seaway to transit the 7 locks or Welland Canal for the other 8 locks to clear the Niagara Falls. Pilots normally "slide the wall", a term for placing the bow on the approach wall for positive control before entering a lock. The alternative of making a lock "on the fly" is sometimes used in fine weather, but more risky and applicable to this vessel, when our port shoulder landed heavily with consequent damage, making the last of 30 locks. The loss of paintwork, when "sliding the wall" on the timber fendering, is therefore much preferred. Quartermaster's steering on the downward run was in marked contrast to that on the way up, after they had learnt to use bold wheel movements in keeping with the slow speeds. Mooring in the locks varies from port to starboard, using the 4 ship's wires secured to winch barrels. Particular care should be taken when slacking away wires quickly, when dropping down in the locks, to avoid breaking. A further precaution is not to try to hold the stern against the "cut" of the screw, when coming astern for a starboard side landing. Better to let the Pilot control the swing, or else risk breaking the stern wire as we did.

Approximate Distances and Time Scale:

	Distance miles	Time allowed hours
Escoumins Pilot to Quebec.	122	12
Quebec to Montreal, with Pilot change halfway at Three Rivers.	138	12 plus 3 for inspection
Montreal through 7 Seaways locks and Thousand Islands, "Narrows" to Cape Vincent Pilot change.	160	24
Lake Ontario.	138	12
Welland Canal (8 locks to by-pass Niagara Falls).	28	12
Lake Erie to Detroit Bridge Pilot change.	213	22
Detroit Bridge to Lake Huron.	63	6
Lake Huron to Mackinac Bridge.	215	20
Lake Michigan to Burns Harbour (S.E. Chicago).	314	24
Total	1,253	6 days 3 hours.

The above times erred on the slow side to avoid engine problems caused by slowing down too quickly. In particular, the open water passages from Escoumins Pilot to Montreal and across the smaller Lakes (Ontario and Erie), were made at manoeuvring full speed instead of the more usual Sea Speed on both occasions, up and down. Engine ran on gas oil for the Seaway and Welland Canal locks passages only with our controllable pitch propeller.

Saudi Arabia

RABIGH: (Also see page 1452)

VESSELS APPOINTMENT SYSTEM:
Tankers: *Add:*

29. Owners.
30. Operators.
31. Charterers.
32. Built.
33. Stowaways.
34. Alcoholic beverages as cargo on board.
35. Prohibited articles, if any, to be collected and placed in bonded stores prior to vessel's arrival.
36. P & I Club.
37. Master's name.

Singapore

SINGAPORE: (Also see page 1492)

RADIO OFFICER'S REPORT: September 1990.
Documents:
Agent:
2 copies Crew List.
1 copy Stores List.
Pre-Arrival Clearance possible. If coming from Australia, fax Crew List from last port.

Pilot: Pilot requires one copy of vessel's Check List for piloted movements.

Customs: Customs will only attend if coming from an Indonesian port (check for drugs).

Customs Allowances: 200 cigarettes or 250 gm. of tobacco, 7 bottles of wine, 1 bottle of spirits and 1 case of beer.

Shore Passes: Passport is sufficient.

PIRACY: Despite strong efforts by some local governments and authorities in the area, piracy continues.

Please see three separate reports below.

1. A 68,000 d.w.t. bulk carrier was attacked on 1st July 1990 at a position 14 miles off Mangaki Island whilst on passage through the Strait.

   The assault took place at 0100 hrs. local time and the four pirates armed with guns and knives left the ship after having spent more than 20 minutes on board holding the Master and senior officers at gunpoint.

   The pirates stole money and personal belongings but fortunately no one was harmed.

   The Master, prior to approaching the Strait, had taken precautions to prevent pirates from entering the accommodation by locking all doors. The pirates, however, were able to open the doors with skeleton keys.

   The pirates approached the ship from the stern in a small wooden speedboat but were not observed by the officer on duty on the bridge.
2. An owner has reported that a vessel was attacked by pirates while passing the Phillip Channel. The ship had reduced speed due to dense fog.

   The lookout on the poop was overpowered, tied up and taken to the bridge, where the officer on duty was also overpowered. The 5 pirates, armed with knives and swords, forced the Master to open the ship's safe. After tying up the Master and the two other crew members, the pirates abandoned the ship taking money and personal belongings.

   The Singapore Marine Police were informed and boarded the vessel to investigate.
3. After a few days on Singapore Roads for repair, a bulk carrier of 42,000 d.w.t. left Singapore on 18th October 1990 at 0030 hrs. en route from Australia to the Gulf. Shortly after departure at a position Lat. 1° 08.3′ N., Long. 103° 43.6′ E., four armed pirates boarded the ship via the poopdeck from a small motorboat. The Master, on the way from the bridge to his office, was overpowered by the pirates and was forced to open the ship's safe. The pirates got away with a substantial amount of cash and private belongings, such as watches, cameras, etc.

Spain

BARCELONA: (Also see page 1538)

RADIO OFFICER'S REPORT: September 1990.
Documents: The following is to be added to the list in the "Guide".
A Declaration of Oil Residues:
Last 3 ports sludge discharged: Date, quantity, by which means.
Total capacity of oil residue tanks.
Quantity of sludge on board.
Total capacity of the slop tanks.
Quantity of oil residue from tank washing, on board.
Next ports with reception facility.

Tunisia

ZARZIS: 33.30 N. 11.07 E. (See Late Plans)

PILOTAGE: Compulsory.

ANCHORAGE: The anchorage is one mile East of the Fairway Buoy (see "Approaches"). The bottom is mud and sand and the holding ground is good.

APPROACHES: The Approach Channel to the port is 8 miles long, 130 m. wide and is dredged to a depth of 13.0 m. From seaward the channel runs W.S.W. then W.N.W.

Manoeuvring Basin: The basin is marked by channel buoys No. 8, 9 10 and 11 and has a diameter of 450 m. The depth is 12.0 m.

Navigation Aids:

Lighthouse: Lat. 33° 28′ 41″ N., Long. 11° 07′ 50″ E. The lighthouse is a masonary structure with red and white horizontal bands. Height: 9.4 m. Light: 3 white ev. 15 secs., range 10 miles.

Fairway Buoy: Lat. 33° 29′ 43″ N., Long. 11° 17′ 44″ E. Colour: Red and white vertical stripes. Top Mark: Red sphere. Light: Fl.W.Ev.4 sec. Buoy has a Radar Reflector.

Channel Buoys:
No. 1: Lat. 33° 29′ 03″ N., Long. 11° 13′ 19″ E.
No. 2: Lat. 33° 28′ 39″ N., Long. 11° 11′ 22″ E.
No. 3: Lat. 33° 28′ 44″ N., Long. 11° 11′ 21″ E.
No. 4: Lat. 33° 28′ 26″ N., Long. 11° 10′ 04″ E.
No. 5: Lat. 33° 28′ 31″ N., Long. 11° 10′ 02″ E.
No. 6: Lat. 33° 28′ 13″ N., Long. 11° 08′ 44″ E.
No. 7: Lat. 33° 28′ 20″ N., Long. 11° 08′ 45″ E.
No. 8: Lat. 33° 28′ 35″ N., Long. 11° 07′ 29″ E.
No. 9: Lat. 33° 28′ 39″ N., Long. 11° 07′ 33″ E.
No.10: Lat. 33° 28′ 40″ N., Long. 11° 07′ 14″ E.
No.11: Lat. 33° 28′ 49″ N., Long. 11° 07′ 23″ E.

The port hand buoys (even numbers) are painted red and have red cylindrical topmarks. Lights are Fl. R. ev. 4 sec., range 6 miles.

The starboard hand buoys (odd numbers) are painted green and have green conical topmarks. Lights are Fl. 2 green ev. 6 sec., range 6 miles.

MAX. SIZE: The maximum permissible draft in the initial stages will be 10.5 m.

TUGS: Compulsory for tankers.

BERTHING: The Petroleum Quay is 640 m. long and has a depth of 12.0 m. The quay is 2.5 m. above chart datum. Rise of tide at Springs is 1.0 m.

There is a bank to the N.E. of quay marked by yellow and black buoys. The distance between quay and bank at the N.W. end is 150 m. and at the S.E. end 240 m.

TANKERS: The facility has been built for the handling of "Ezzaouia" Crude. The typical cargo size is 20,000 tonnes – 25,000 tonnes, due to the LOA and draft restrictions.

IGS, COW and coils are required.

Permanent or segregated ballast vessels only are allowed.

AUTHORITY: Office des Ports Nationaux, Port de la Goulette, P.O.Box 2060, La Goulette, Tunisia. *Tel:* 730.300. *Telex:* 15.386 Oporna. *FAX:* 730.812. *Contact:* M.Klaa, Chairman.

Turkey

GENERAL: (Also see page 1659)

REPORTS: The following telexes were received by a tanker owner from agent in Istanbul between May 1990 and October 1990.

MAY 1990:
Re: Tankers Exceeding 200 m. LOA and 90,000 g.r.t. Transiting the Dardanelles and Bosphorus:

Kindly note that 10 day's pre-advice of the ETA Dardanelles is now required by the Canakkale and Istanbul Port Authorities so that they can obtain the approval of the Ministry of Communications and close the Straits to all traffic during the passage of such tankers, for which an escort of 2 tugs (for vessel's a/c) and one Coast Guard launch is allocated.

Daylight passage through both Straits is required, which kindly note.

JUNE 1990:
Re: Transit Passage Through the Straits of Dardanelles/Bosphorus:
Re-passage of vessel with g.r.t. in excess of 90,000 tons and LOA more than 200 m. to be reported to Harbour Master. In addition to above, we have been informed that agents for such tonnage have to provide Harbour Master with Letters of Guarantee stating that in case of accident during passage, all damages/losses will be covered by the agent.

Please inform your Clubs accordingly. FYG local P & I Club informed accordingly.

OCTOBER 1990: Telex from owner to agent.
Re-your May telex concerning tankers exceeding 200 m. LOA and 90,000 g.r.t. transiting the Dardanelles and Bosphorus, grateful you advise whether the discrepancy between length and g.r.t. has yet been resolved.
REPLY:
Regulations now apply to tankers of 90,000 g.r.t. or over without any mention of LOA, however should a vessel's g.r.t. be close to 90,000 please advise us so that we can consult the Captain of the Port re any transit restrictions.

FERCOM TERMINAL: 40.46 N. 29.33 E.

LOCATION: The terminal is located in the Gulf of Izmit in position Lat. 40° 46′ 24″N., Long. 29° 33′ 03″ E.

The terminal is called Fercom or Upet and is for the import of gasoline.

PILOTAGE: Compulsory for berthing and through the Dardanelles.

MAX. SIZE:

Outer Berth: Max. LOA 210 m. Max. draft 16.0 m.
Inner Berth: Max. LOA 100 m. Max. draft 10.0 m.

BERTHING: The jetty is parallel to the shore and has 3 dolphins.

United Kingdom

MEDWAY PORTS

(C) ISLE OF GRAIN

ADD:

THAMESPORT: 51.26 N. 00.42 E.

DOCUMENTS: Same as "Isle of Grain" plus 2 copies Immigration Crew List and 1 copy Port Health Declaration.

PILOTAGE: Same as "Medway", except Pilots require 24 hours, 8 hours and 4 hours notice of ETA Pilotage Station, i.e. "North East Spit" or "Sunk".

ANCHORAGE: See "Medway".

Details via Medway Navigation Service based on vessel's dimensions and nature of cargo.

RESTRICTIONS: Max. draft for access from N.E. Spit through Edinburgh Channel 6.3 m. low tide. As an alternative, vessel can traverse via Long Sand Head, adding approximately one hour passage time to berth. Therefore, 24 hour access to port available.

MAX. SIZE: See "Berthing".

HEALTH: Port Health Declaration to be completed.

Also see "Isle of Grain".

RADIO: See "Isle of Grain" and "Pilotage".

ETA messages should be addressed to Telex No. 965873.

RADAR/VHF: See "Medway".

TUGS: Tugs should be ordered through Agent or Thamesport.

Towage is undertaken by J.P.Knight (Rochester) Ltd., 348 High Street, Rochester, Kent ME1 1DH. Tel: (0634) 826633.

3 tugs stationed for Medway operations: 1×30 tonne bollard pull 2,000 h.p. single screw, 1×30 tonne bollard pull 3,200 h.p. 3,200 h.p. with twin Z propellers, 1×40 tonne bollard pull 2,000 h.p. single screw. 1×55 tonne bollard pull 3,200 h.p. with twin Z propellers (Arriving February 1991).

BERTHING: *Location:* Strategically placed where the River Medway meets the Thames Estuary; just 35 miles from London, connected to the B.R. Rail Network.

Berths: Total berth frontage will be 750 m. on completion of all three stages of construction by 1993.

Phase I of the container terminal provides a jetty 314 m. × 50 m., linked to the container park by 2 approach bridges and with a minimum depth alongside of 13.5 m. (completed January 1990).

Phase II completes the container facility with a further 240 m. of jetty and an additional approach bridge. The container park will then extend to 60 acres with a stacking capacity of 25,000 TEUs (to be completed before end 1991).

Phase III will be a six million tonnes a year bulk cargo terminal able to accommodate Panamax bulk carriers drawing up to 16 m. and up to 110,000 tons deadweight (completion before end 1992).

Ship-to-Shore Cranes: Manufacturers: Magrini Galileo Meccanica, Padua, Italy.

Weight: 735 tonnes. Height: 60 m.
Outreach: 47.5 m. Lift capacity: 52.8 tonnes.
Cycle speed: 60 seconds – permitting up to 60 box moves per hour.
Operational in wind speeds up to 45 m.p.h.

Fourth generation, hi-tech cranes with remote-read condition monitoring and fault diagnosis systems.

Serviced from the landside stacking area by a fleet of 14 tractors and 50 trailers, some of which are self-steering and can be linked into five-unit trains.

Container Park Cranes: Manufacturers: Stage I MGM.

Weight: 195 tonnes. Height: 23 m. Width: 30 m.

Lift capacity: 35 tonnes under the spreader, five high across nine rows. "Cranes with brains" capable of fully automatic container handling through computerised speed and position controls. They also feature condition monitoring and fault diagnosis.

Systems: Thamesport is part of the FCP80 Community Container Network. Advanced internal information systems will link customers, authorities, overseas ports, banks and insurance companies. Customers can access at will for current cargo status. The fully duplicated systems are further backed up by standby generators and Uninterruptable Power Supply systems.

CRANES: See "Berthing".

BRIDGES: None.

STEVEDORES: Labour will be arranged based on vessel's final ETA.

MEDICAL: 24 hours advance notification required by Agents for any medical requirements.

TANKERS: See "Isle of Grain".

DENSITY: Approximately 1020.

FRESH WATER: No pipelines on quay at Thamesport. Fresh water available by barge, 24 hours notice required via Agent.

FUEL: See "Isle of Grain".

FIRE PRECAUTIONS: Shift managers attend each vessel on arrival, and provide full safety requirements and full emergency co-ordination instructions.

CONSULS: See "Rochester".

REPAIRS/SURVEYORS/REPATRIATION: All available through prior notification via Agent.

GANGWAY/DECK WATCHMEN: See "Isle of Grain".

HATCHES: Handled amicably by either party.

CUSTOMS ALLOWANCE: See "Isle of Grain".

TELEPHONES: Available on quay and in nearby offices.

STORING: Many local ship supply services available. Vessels can be stored ex-quay under terminal supervision, and stevedore assistance can be provided as required.

SHORE LEAVE: Possible, bar any immigration restrictions.

DELAYS: None anticipated.

DEVELOPMENTS: See "Berthing".

AUTHORITY: Medway Ports Authority.

Operator: Thamesport (London) Ltd., Isle of Grain, Kent ME3 0EP. *Tel:* (0634) 271511. *Telex:* 965873. *FAX:* (0634) 270384. *Contact:* A.R.G.Macleod, Managing Director.

SOUTHAMPTON: (Also see page 1849)

TANKERS:

B.P. Terminal, Hamble:

Limits:

D.W.T.: 110,000 tonnes.
Displacement: 64,000 tonnes.
LOA: 260 m.
Draft: 13.10 m.
Depth – approaches: 11.25 m. U.K.C. – 1.30 m.
– alongside: 13.60 m. U.K.C. – 0.50 m.
Manifold: 15.88 m. maximum. 5.10 m. minimum.

Fresh Water: Available alongside.

Type/Moorings: Alongside.

Berth: Coasters acceptable as they lie between dolphins and against fendered jetty head. Minimum height of manifold above waterline 2.74 m., therefore it may be necessary to disconnect over low water period and incur subsequent delay.

Product tankers must comply with "closed loading" requirements.

Length: Minimum parallel mid-body length for crude oil tankers is 47.5 m. forward and aft of manifold centreline; no restriction for product carriers.

Draft: An increase in draft possible on suitable tides.

Cargo Grades: 2×16 in. crude loading arms. Vessel must present 16 in. 150 ASA flanges. Height above waterline max. 21.94 m., min. 5.1 m. Manifolds must conform to OCIMF standards.

3×10 in. 150 ASA product loading arms. Vessels must arrive with appropriate reducing pieces fitted. Vessels unable to comply may be acceptable subject to prior check with terminal. Height above waterline max. 15.88 m., min. 2.74 m.

Dirty Ballast: Clean ballast from segregated ballast system may be discharged overboard, subject to Port and Terminal approval. No shore reception facilities for ballast or contents of slop tank.

General: Berth operated by B.P. Oil U.K. (Hemel Hempstead, Hertfordshire).

Products are imported, mainly by B.P. Oil U.K. coasters. Crude oil is exported (from Wytch Farm), cargo sizes have ranged from 43,000 tonnes to 58,000 tonnes.

Hamble Terminal was upgraded in 1990 to accommodate Wytch Farm Crude Oil exports.

For further information contact B.P. Oil U.K., Hamble. Tel: (0703) 456654.

Republic of Yemen

HODEIDAH: (Also see page 2113)

We quote below text of a circular telex received from Ports and Marine Affairs Corporation, Hodeidah:

"The General Corporation of Yemen Ports hereby advise all Masters, Owners, Charterers and Agents that as of September 14th, 1990 all vessels with a draft of more than 31 ft. (9.45 m.) should not attempt to enter the dredged channel to the port of Hodeidah.

Vessels arriving during darkness should anchor to the West of the Fairway Buoy and await instructions.

Vessels arriving during daylight may have to anchor for a short period of time, but it is the intention of G.C.Y.P. to put a pilot onboard each ship at the first daylight high water and bring such vessels to the inner anchorage.

Under no circumstances should vessels attempt to enter the port without a pilot, except with the express permission of the Harbour Master".
